

What standards does Open Networks need?

- Given the Authority's Statutory Objective and the IPAG advice on Equal Access
 - what standards may be required to enable timely DER deployment while managing safety and reliability, including time frames and dependencies.
- 20 mins working in table groups
- 10 minute report back by person on far right hand side of each table
 - Add to contributions of other groups
 - .. So you'll need 10 ideas as there are 10 tables
- EA staff and advisors make notes for all 10 presentations
- We'll triangulate from the notes

How should we prioritise standards development for Open Networks?

- Given the Authority's Statutory Objective and the IPAG advice on Equal Access
 - What are the priorities for standards development to support Open Networks?
 - How should this be resourced?
 - What regulatory support does it need?
- 20 mins working in table groups
- 10 minute report back by person on far left hand side of each table
 - Add to contributions of other groups
 - .. So you'll need 10 ideas as there are 10 tables (again)
- EA staff and advisors make notes for all 10 presentations (again)
