SYSTEM SOFTWARE RELEASE

Issues Addressed

NOTE:: performed as a manual release to address issue with delays in EIEP file processing

Ref.	Raised	Description	Status
ER-1366	07/05/2024	The queue handling for processing EIEP5A response files exited early from the processing loop if it found a queue object with no corresponding file on disk. This caused subsequent queue objects to not be processed. There is also a failure to deliver notifications where the subscribing process is performing an explicit sleep, the sleep call was introduced as an enhancement to allow for locked files (anti-virus temporarily holding a lock on the file). It has been reverted (to how it previously functioned) with the sleep not used. This requires further investigation to explain (this) unexpected behaviour.	Complete
