SYSTEM SOFTWARE RELEASE

Issues Addressed

Ref.	Raised	Description	Status
ER-1333	18/12/2023	When a Planned Outage is cancelled the previously notified participants are not notified of the cancellation	Complete

Documentation Updates

Enhancements (re-release with changes as noted under er-1342)

Ref.	Raised	Description	Status
ER-1334	04/01/2024	Raise a tracker instead of an alert when public holiday reminder generated – reduces background noise for operations	Complete
ER-1335	09/01/2024	For readability change public holiday admin table to load in reversed order (most recent public holidays first)	Complete
ER-1336	09/01/2024	Heartbeat (health check) for the web application reduced to every 30 seconds to reduce background noise for Jade 24 hour help desk	Complete
ER-1337	10/01/2024	the email address is now used as a key in SSouser collection, for consistency this should be stored as lower case, then when a SSO login attempt is returned the Registry the email claim should also be converted to lowercase before an attempt is made to find the user	Complete
ER-1339	16/01/2024	Configuration for SSO additional default supervisors' security group defined	Complete
ER-1342	08/02/2024	Additional configuration and format issues from SSO end to end testing. Re-release with additional changes: <ul style="list-style-type: none"> AzureAD requirements for SCIM integration includes path of "externalId" on the Group interface. Correct the location information on the User and Group response 	Complete
