

# Electricity Industry Participation Code

## 2010

---

### **Contents**

#### **Part 1**

Preliminary provisions

#### **Part 2**

Availability of information

#### **Part 3**

Market operation service providers

#### **Part 4**

Force majeure provisions relating to ancillary service agents

#### **Part 5**

Regime for dealing with undesirable trading situations

#### **Part 6**

Connection of distributed generation

#### **Part 6A**

Separation of distribution from certain generation and retailing

#### **Part 7**

System operator

#### **Part 8**

Common quality

#### **Part 9**

Security of supply

#### **Part 10**

Metering

**Part 11**

Registry information management

**Part 11A**

Consumer Care Obligations

**Part 12**

Transport

**Part 12A**

Distributor agreements, arrangements, and other provisions

**Part 13**

Trading arrangements

**Part 14**

Clearing and settlement

**Part 14A**

Prudential requirements

**Part 15**

Reconciliation

**Part 16**

Special provisions relating to Rio Tinto agreements *[Revoked]*

**Part 16A**

Audits

**Part 17**

Transitional provisions

---

**Code**

**1 Title**

This Code is the Electricity Industry Participation Code 2010.

**2 Commencement**

In accordance with section 36(1) of the Act, this Code comes into force on 1 November 2010.

# Electricity Industry Participation Code 2010

## Part 1 Preliminary provisions

### Contents

- 1.1 Interpretation
- 1.2 General principles of construction
- 1.3 Special definition of “related”
- 1.4 Special definition of “independent”
- 1.5 Special definition of “purchaser” and “participant”
- 1.5A Application of Code to distributors
- 1.6 Contents tables
- 1.7 Defined terms appear in bold

#### Schedule 1.1

#### Notice of assumption of rights and obligations under Parts 8, 13, 14, and 14A of the Electricity Industry Participation Code 2010

#### Schedule 1.2

#### Revocation of notice of assumption of rights and obligations under Parts 8, 13, 14, and 14A of the Electricity Industry Participation Code 2010

---

### 1.1 Interpretation

- (1) In this Code, unless the context otherwise requires,—

**Act** means the Electricity Industry Act 2010

**active energy** means the integration over time of the product of voltage, current and the cosine of the phase angle between them, and which is normally measured in kilowatt hours (kWh)

**active meter** means a **meter** used for the measurement of **active energy**

**active power** means the product of voltage, current and the cosine of the phase angle between them, and which is normally measured in kilowatts (kW)

**additional customer compensation scheme** means a scheme operated by a **retailer** under clause 9.26, in addition to the **retailer’s default customer compensation scheme**  
Clause 1.1(1) **additional customer compensation scheme**: inserted, on 1 April 2011, by clause 4(1) of the Electricity Industry Participation (Customer Compensation Schemes) Code Amendment 2011.

**adjustment** means, for the purposes of the definitions of **error compensation**, **loss compensation**, and Part 10, an operation or process intended to reduce the differences between the values indicated by an instrument and the values realised by a **reference standard** or **working standard** to within a predetermined tolerance, and **adjust** and **adjusted** have corresponding meanings

Clause 1.1(1) **adjustment**: amended, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

**adjustment clause** means a clause in a **risk management contract** under which the price or prices of a specified volume of **electricity** may be adjusted, including an adjustment relating to the Consumer Price Index, the Producers Price Index or any other index  
Clause 1.1(1) **adjustment clause**: amended, on 30 October 2024, by clause 4(1) of the Electricity Industry Participation Code Amendment (Hedge Disclosure Obligations) 2024.

**administrative cost** means, in relation to an **ancillary service**, the significant costs that are incurred by the **system operator** in relation to the development of **ancillary service** provision, that are specifically attributable to an **ancillary service**, and that have been agreed to by the **Authority** and the **system operator**

**allocable cost** has the meaning set out in clauses 8.55 to 8.58

**alternative agreement** has the meaning given to it by clauses 8(1) and 8(2) of Schedule 12A.1

Clause 1.1(1) **alternative agreement**: inserted, on 20 July 2020, by clause 4(3) of the Electricity Industry Participation Code Amendment (Default Distributor Agreement) 2020.

**alternative ancillary service arrangement** means an arrangement between a **participant** and another **participant** or other person, or an arrangement involving only a **participant**, which is authorised by the **system operator** in accordance with clause 8.48

**ancillary service** means **black start, over frequency reserve, frequency keeping, instantaneous reserve or voltage support**

**ancillary service agent** means a person who provides an **ancillary service**

**ancillary service arrangement** means a contract between the **system operator** and an **ancillary service agent** for the procurement of **ancillary services** in accordance with clause 8.45

**annual consumption list** *[Revoked]*

Clause 1.1(1) **annual consumption list**: amended, on 5 October 2017, by clause 4(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1.1(1) **annual consumption list**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**applications layer** means a part of a **metering installation** used for a function that is not performed by the **metrology layer**

Clause 1.1(1) **applications layer**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**approved calibration laboratory** means the Measurement Standards Laboratory of New Zealand, or a calibration laboratory that has been accredited under the Testing Laboratory Registration Act 1972 to ISO 17025, or an international laboratory that has been recognised by the Chief Metrologist for the specific **calibration** required

**approved investment** means—

- (a) an investment approved by the Electricity Commission under section III of part F of the **rules** before this Code came into force; or
- (b) an investment approved by the Commerce Commission under section 54R of the Commerce Act 1986; or
- (c) an investment that is permitted under an input methodology determined by the Commerce Commission under section 54S of the Commerce Act 1986

**approved system** means the system or systems required to convey information between persons in accordance with this Code, as may be approved from time to time by the **Authority**

Clause 1.1(1) **approved system**: inserted, on 5 October 2017, by clause 4(61) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**approved test house** means a facility that has been approved by the **Authority** in accordance with Part 10 to do one or more of the following:

- (a) **calibrate metering installations or metering components**
- (b) **certify metering installations or metering components**

Clause 1.1(1) **approved test house**: amended, on 29 August 2013, by clause 4(2)(a) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 1.1(1) **approved test house**: amended, on 19 December 2014, by clause 4(1) of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.

Clause 1.1(1) **approved test house**: substituted, on 1 February 2016, by clause 4(1)(a) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

**approved test laboratory** means a test laboratory that has been accredited under the Standards and Accreditation Act 2015 to ISO 17025 for the specific test required

Clause 1.1(1) **approved test laboratory**: amended, on 5 October 2017, by clause 4(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**asset** means equipment or plant that is connected to or forms part of the **grid** and, in the case of Part 8, includes equipment or plant that is intended to become connected to the **grid** and equipment or plant of an **embedded generator**

Clause 1.1(1) **asset**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **asset**: amended, on 5 October 2017, by clause 4(4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**asset capability statement** means a statement of capability and operational limitations that applies to specific **assets** during the normal and abnormal conditions that may arise on the **grid**, provided to the **system operator** in accordance with clause 2(5) of **Technical Code A** of Schedule 8.3

**asset owner** means a **participant** who owns an **asset** used for the generation or conveyance of **electricity** and a person who operates such **asset** and, in the case of Part 8, includes a **consumer** with a **point of connection** to the **grid**

**asset owner performance obligations** and **AOPO** means a performance obligation specified in subpart 2 of Part 8 that an **asset owner** must comply with so that the **system operator** can plan to comply and comply with its **principal performance obligations**

**associated equipment**, for the purposes of the definition of **distribution network** and Part 6, means any equipment that is used, or designed or intended for use, in relation to any works or **consumer installation**, if such use is for **construction**, maintenance, or safety purposes and not for purposes that relate directly to the generation, conversion, transformation, conveyance, or use of **electricity**

Clause 1.1(1) **associated equipment**: amended, on 23 February 2015, by clause 4(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **associated equipment**: amended, on 5 October 2017, by clause 4(5) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**assumed co-efficient of variation** *[Revoked]*

Clause 1.1(1) **assumed co-efficient of variation**: revoked, on 5 October 2017, by clause 4(60) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**ASX** *[Revoked]*

Clause 1.1(1) **ASX**: inserted, on 3 February 2020, by clause 4 of the Electricity Industry Participation Code Amendment (Hedge Market Arrangements) 2020.

Clause 1.1(1) **ASX**: revoked, on 3 November 2020 in accordance with section 40(2)(b) of the Electricity Industry Act 2010.

**ASX NZ electricity future** *[Revoked]*

Clause 1.1(1) **ASX NZ electricity future**: inserted, on 3 February 2020, by clause 4 of the Electricity Industry Participation Code Amendment (Hedge Market Arrangements) 2020.

Clause 1.1(1) **ASX NZ electricity future**: revoked, on 3 November 2020 in accordance with section 40(2)(b) of the Electricity Industry Act 2010.

**at risk HVDC transfer** means the quantity of **MWh** for each **trading period** calculated in accordance with Tables 1 and 2, where—

$INJ_{HVDCHAYt}$  is the **electricity** injected from the **HVDC link** into the North Island **grid assets** at the North Island **HVDC injection point** in **trading period t**; and

$INJ_{HVDCBENT}$  is the **electricity** injected from the **HVDC link** into the South Island **grid assets** at the South Island **HVDC injection point** in **trading period t**

**Table 1:** HVDC northward transfer – if **electricity** is injected at the North Island **HVDC injection point** in the relevant **trading period**

<b>HVDC configuration at the beginning of trading period t</b>	<b>At risk HVDC transfer north in trading period t (expressed in MWh)</b>
Pole 2 only	$INJ_{HVDCHAYt}$
Pole 3 only	$INJ_{HVDCHAYt}$
Pole 3 and Pole 2 bipole <b>round power</b>	$INJ_{HVDCHAYt}$
Pole 3 and Pole 2 bipole not <b>round power</b>	$\max(0, INJ_{HVDCHAYt} - 325)$

**Table 2:** HVDC southward transfer – if **electricity** is injected at the South Island **HVDC injection point** in the relevant **trading period**

<b>HVDC configuration at the beginning of trading period t</b>	<b>At risk HVDC transfer south in trading period t (expressed in MWh)</b>
Pole 2 only	$INJ_{HVDCBENT}$
Pole 3 only	$INJ_{HVDCBENT}$
Pole 3 and Pole 2 bipole <b>round power</b>	$INJ_{HVDCBENT}$
Pole 3 and Pole 2 bipole not <b>round power</b>	$\max(0, INJ_{HVDCBENT} - 308)$

Clause 1.1(1) **at risk HVDC transfer**: substituted, on 1 July 2012, by clause 4(1) of the Electricity Industry Participation (HVDC Pole 3 Minor Amendments) Code Amendment 2012.

Clause 1.1(1) **at risk HVDC transfer**: amended, on 1 March 2024, by clause 4(1)(a) and (b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Clause 1.1(1) **Table 1 HVDC northward transfer**: amended, on 1 March 2024, by clause 4(1)(c) and (d) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Clause 1.1(1) **Table 1 HVDC southward transfer**: amended, on 1 March 2024, by clause 4(1)(e) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

**ATH** means a person who is approved under Schedule 10.3 to operate an **approved test house**

Clause 1.1(1) **ATH**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**auction** means a must-run dispatch auction conducted by the **clearing manager** under subpart 3 of Part 13

**auction bid** means a bid made for an **auction** under clauses 13.117 to 13.130

**auction revenue** means, for a **generator**, the amount owing by the **generator** in accordance with clause 13.112(2) and, for a **purchaser**, the amount owing to the **purchaser** in accordance with clause 13.111

Clause 1.1(1) **auction revenue**: amended, on 24 March 2015, by clause 4(1)(a) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

**auction right** means the right (but not the obligation) to offer for sale a specified quantity of **electricity** to the **clearing manager** at 0 price in accordance with clause 13.116(1)

**audit** means a process of inspection of the facilities, processes, procedures, and other relevant items, to confirm compliance with this Code, and **audited** has a corresponding meaning

**auditor** means,—

- (a) for the purposes of Parts 10, 11, 15 and 16A—
  - (i) a person approved or appointed by the **Authority** to carry out an **audit**; or
  - (ii) the **Authority**, if the **Authority** carries out an **audit** itself; and
- (b) for all other Parts of this Code, a person carrying out an **audit**

Clause 1.1(1) **auditor**: replaced, on 1 June 2017, by clause 4(1) of the Electricity Industry Participation Code Amendment (Requirements and Processes for Audits) 2016.

Clause 1.1(1) **auditor**: amended, on 20 December 2021, by clause 4 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

**AUFLS technical requirements report** means the AUFLS technical requirements report that is incorporated by reference in this Code under clause 2 of Schedule 8.6

Clause 1.1(1) **AUFLS technical requirements report**: inserted, on 21 December 2021, by clause 4(1) of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**Authority** has the meaning given to it by section 5 of the **Act**

**automatic control plant** means any hydro **generating plant** that has a pre-programmed generation profile and an automatic override if uncontrollable water inflows change

**automatic under-frequency load shedding** means automatic shedding of electrical load when frequency falls below the relevant pre-set frequency, or falls at a rate, specified by the **system operator** in the **AUFLS technical requirements report** or in clause 7(6) and 7(6A) of **Technical Code B** of Schedule 8.3

Clause 1.1(1) **automatic under-frequency load shedding**: amended, on 7 August 2014, by clause 4(1) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 1.1(1) **automatic under-frequency load shedding**: replaced, on 21 December 2021, by clause 4(2) of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**availability cost** means a cost (other than an **administrative cost**), incurred by the **system operator** in purchasing **instantaneous reserve** and providing that **instantaneous reserve** for a **trading period**, and includes—

- (a) payments made by the **system operator** for that **trading period** under contracts that secure the availability of **instantaneous reserves**; and
- (b) the annual and variable costs (including any constrained-on costs) incurred by the **system operator** under any other contracts allocated by the **system operator** to that **trading period**; less
- (c) the costs of **instantaneous reserves** procured as a direct result of a **generator** being granted a **dispensation** under clause 8.31(1); and
- (d) **instantaneous reserve constrained on compensation** calculated in accordance with clause 13.212(6)

**back office** means a part of an **interrogation** system—

- (a) that sends or receives information to or from a **metering installation**; and
- (b) stores the information in a form that can be made available at the **services access interface** to another person

Clause 1.1(1) **back office**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**back-up metering information** [*Revoked*]

Clause 1.1(1) **back-up metering information**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**back up protection system** means a protection system—

- (a) that **electrically disconnects** faulted **assets** from the **grid** because a **main protection system** or a **circuit breaker** has failed to **electrically disconnect** a faulted **asset** from the **grid** in the allocated time; and
- (b) that may **electrically disconnect** non-faulted **assets** as well as a faulted **asset**

Clause 1.1(1) **back up protection system**: amended, on 5 October 2017, by clause 4(6)(a) and (b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**balancing area** means, in relation to any particular **ICP**,—

- (a) the **embedded network**; or
- (b) that part of the relevant **local network** owned by 1 **network owner**—  
having 1 or more **NSPs**, to which that **ICP** is **electrically connected** from time to time under normal circumstances

Clause 1.1(1) **balancing area**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **balancing area**: amended, on 5 October 2017, by clause 4(7) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**bank** means a registered bank within the meaning of the Reserve Bank of New Zealand Act 1989 that is carrying on in New Zealand the business of banking

**bank bill bid rate** means the rate per annum (rounded upwards to 2 decimal places) displayed at or about 10.45am on the Reuters Screen on page BKBM (or its successor or equivalent page) on the relevant date as the bank bill “settlement” bid rate for bank

bills having a tenor of 1 month, provided that if such a rate is not available, **bank bill bid rate** means the rate determined by the **clearing manager** to be the nearest practicable equivalent

**base case** means a base case **published** by the **Authority** under clause 13.236D

Clause 1.1(1) **base case**: inserted, on 1 December 2011, by clause 4 of the Electricity Industry Participation Code (Spot Price Risk Disclosure) Amendment 2011.

Clause 1.1(1) **base case**: amended, on 5 October 2017, by clause 4(8) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**benchmark agreement** [*Revoked*]

Clause 1.1(1) **benchmark agreement**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **benchmark agreement**: amended, on 5 October 2017, by clause 4(9) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1.1(1) **benchmark agreement**: revoked, on 1 October 2023, by clause 4(2) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

**benefit to the public** means public benefit net of any costs and detriments, including those detriments associated with a lessening of competition as those concepts are applied under the Commerce Act 1986

**bid**,—

(a) means—

(i) a **nominated bid**;

(ii) a **difference bid**; and

(b) includes a **bid** revised in accordance with clause 13.19A or 13.19B

(c) [*Revoked*]

Clause 1.1(1) **bid**: substituted, on 28 June 2012, by clause 4(b) of the Electricity Industry Participation (Demand-side Bidding and Forecasting) Code Amendment 2011.

Clause 1.1(1) **bid** paragraph (b): amended, on 29 June 2017, by clause 4(1)(a) of the Electricity Industry Participation Code Amendment (Shortened Gate Closure and Revised Bid and Offer Provisions) 2017.

Clause 1.1(1) **bid** paragraph (c): revoked, on 29 June 2017, by clause 4(1)(b) of the Electricity Industry Participation Code Amendment (Shortened Gate Closure and Revised Bid and Offer Provisions) 2017.

**bid-ask spread** means—

(a) if expressed as a dollar value, the dollar value that represents the difference in price between a **quote** to buy a **NZ electricity future** and a **quote** to sell a **NZ electricity future** of the same type on the same **exchange**; or

(b) if expressed as a percentage, the percentage calculated by dividing the difference between the price of a **quote** to buy a **NZ electricity future** and the price of a **quote** to sell a **NZ electricity future** of the same type on the same **exchange** by the price of the **quote** to sell a **NZ electricity future**.

Clause 1.1(1) **bid-ask spread**: inserted, on 3 February 2020, by clause 4 of the Electricity Industry Participation Code Amendment (Hedge Market Arrangements) 2020.

Clause 1.1(1) **bid-ask spread**: revoked, on 3 November 2020 in accordance with section 40(2)(b) of the Electricity Industry Act 2010.

Clause 1.1(1) **bid-ask spread**: inserted, on 27 April 2021, by clause 4(2) of the Electricity Industry Participation Code Amendment (Hedge Market Arrangements) 2021.

**binary load**, in relation to a **nominated dispatch bid**, means a quantity of **electricity** that corresponds to the **MW** specified in one or more entire price bands of the relevant **nominated dispatch bid**

Clause 1.1(1) **binary load**: inserted, on 1 November 2022, by clause 4(1) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**binding constraint** means a **constraint** that is likely to cause a significant difference between the price at 1 **node** and the price at another **node**

**billing period** means a period of 1 calendar month

**black start** means an **ancillary service** required to enable a **generating unit** isolated from the **grid** to be—

(a) made live, as defined in the Electricity (Safety) Regulations 2010; and

(b) **electrically connected to the grid**

Clause 1.1(1) **black start**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **black start**: replaced, on 5 October 2017, by clause 4(1)(a) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**block dispatch group** means a group of **generating stations** on 1 continuous water course, which is the subject of an agreement between the **system operator** and a **generator** under clause 13.60

**block security constraint** means any of the following:

(a) a security constraint as determined in accordance with the **policy statement** and applied by the **system operator** to a **generating unit** or **generating station** to provide **voltage support** or **frequency keeping**:

(b) a limitation in **grid** capacity that:

(i) is a limitation in the capacity of the **grid** to convey **electricity** between either:

(A) **generating stations** constituting a **block dispatch group**; or

(B) **generating stations** constituting a **block dispatch group** and the **grid**; and

(ii) arises because of either—

(A) a limitation in the offered capacity of the **grid**; or

(B) a security constraint as determined by the **system operator** in accordance with the **policy statement**.

Clause 1.1(1) **block security constraint**: replaced, on 31 December 2021, by clause 4(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

**bona fide physical reason** includes,—

(a) in relation to a **generator**, or a **purchaser**, or an **ancillary service agent** or a **grid owner**, a situation where personnel or plant safety is at risk; and

(b) in relation to a **generator** or an **ancillary service agent** providing **generation reserve** or **frequency keeping**,—

(i) a reasonably unforeseeable change in generating capability, reserve capability, or **frequency keeping** capability (as the case may be) from an item of **generating plant** that is the subject of an existing **offer**, **reserve offer**, or offer to provide **frequency keeping** by that **generator** or **ancillary service agent**; or

(ii) a reasonably unforeseeable change in the level of expected uncontrollable water inflows into the head pond of a hydro station that is the subject of an existing **offer**, **reserve offer**, or offer to provide **frequency keeping** by that **generator** or **ancillary service agent**; or

- (iii) a reasonably unforeseeable change in circumstances such that the **generator** or **ancillary service agent** will breach any consent held by it under the Resource Management Act 1991; or
- (iv) a reasonably unforeseeable physical infeasibility that arises from a **price-responsive schedule**, a **non-response schedule**, or a **dispatch schedule**; and
- (ba) in relation to an **intermittent generator**, a situation in which—
  - (i) variable resource conditions prevent the **intermittent generator** from generating at the level expected; or
  - (ii) the **intermittent generator** reduces the output of an **intermittent generating station**—
    - (A) to prevent an **un-modelled transmission asset** from exceeding its ratings; or
    - (B) in order to comply with an automated signal to maintain frequency; or
    - (C) in light of reasonably unforeseeable circumstances that require the output of the **intermittent generating station** to be reduced to enable the **intermittent generator** to comply with the conditions of a resource consent or other law; or
    - (D) in anticipation of the expected onset of a weather event that would be likely to cause the **intermittent generating station's** asset protection systems to shut down assets forming part of the **intermittent generating station**; and
- (c) in relation to a **purchaser**, or an **ancillary service agent** providing **interruptible load**,—
  - (i) a reasonably unforeseeable full or partial loss of demand or reserve capability (as the case may be) at a **grid exit point** that is the subject of an existing **bid** or **reserve offer** by the **purchaser** or the **ancillary service agent**; or
  - (ii) a reasonably unforeseeable change in circumstances such that the **purchaser** or **ancillary service agent** will breach any consent held by it under the Resource Management Act 1991; or
  - (iii) a reasonably unforeseeable full or partial loss of generating capability from an item of **generating plant** owned by, or the subject of a supply contract with, that **purchaser** during the relevant **trading periods**; and
- (d) in relation to a **grid owner**, a reasonably unforeseeable loss of full or partial capacity on transmission plant forming part of the **grid**

Clause 1.1(1) **bona fide physical reason** paragraph (b): amended, on 3 May 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Enabling Energy Storage Systems to Offer Instantaneous Reserve) 2022.

Clause 1.1(1) **bona fide physical reason** paragraph(b)(iv): substituted, on 28 June 2012, by clause 4(c)(i) of the Electricity Industry Participation (Demand-side Bidding and Forecasting) Code Amendment 2011.

Clause 1.1(1) **bona fide physical reason** paragraph(c)and(c)(i): amended, on 28 June 2012, by clause 4(c)(ii)and(iii) of the Electricity Industry Participation (Demand-side Bidding and Forecasting) Code Amendment 2011.

Clause 1.1(1) **bona fide physical reason** paragraph (ba): inserted, at 12.00 pm on 19 September 2019, by clause 4(1) of the Electricity Industry Participation Code Amendment (Wind Offer Arrangements) 2019.

Clause 1.1(1) **bona fide physical reason** paragraph (ba)(i): amended, on 20 March 2020, by clause 4(1) of the Electricity Industry Participation Code Amendment (Broadening Definitions of Generating Unit and Intermittent Generating Station) 2020.

**bound** [*Revoked*]

Clause 1.1(1) **bound**: amended, on 1 February 2016, by clause 4(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 1.1(1) **bound**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**branch** means an electrical link between—

- (a) 2 or more **nodes**; or
- (b) a **node** and a **point of connection** to the **grid**

**business** means, except in Part 6A, the business carried out as a **participant**

Clause 1.1(1) **business**: amended, on 1 March 2024, by clause 4(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

**business day** means,—

- (a) for the purposes of Part 6, any day of the week other than Saturday, Sunday, or a public holiday within the meaning of the Holidays Act 2003; and
- (b) for the rest of the Code, any day of the week except Saturdays, Sundays, **national holidays**, the day observed as Wellington Anniversary Day, and any other day from time to time declared by the **Authority** not to be a **business day** by notice to each **registered participant**

Clause 1.1(1) **business day**: amended, on 21 September 2012, by clause 4(1) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

Clause 1.1(1) **business day**: amended, on 5 October 2017, by clause 4(10) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1.1(1) **business day**: amended, on 1 March 2024, by clause 4(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

**buyer**, for the purposes of subpart 5 and subpart 7 of Part 13, means—

- (a) in respect of a **contract for differences**, the fixed-price payer, being the **party** obliged to make payments at a fixed price from time to time during the **term** of the contract; or
- (b) in respect of a **fixed-price physical supply contract**, the purchaser of **electricity**; or
- (c) in respect of an **options contract**, either—
  - (i) the **party** paying the **premium**; or
  - (ii) if there is no **premium**, the **party** who agrees to be the **buyer** for the purposes of subpart 5 or subpart 7 (as applicable) of Part 13; or
  - (iii) if neither **party** agrees to be the **buyer**, the **party** whose name is the first alphabetically; or
- (ca) for the purposes of subpart 5 of Part 13, in respect of a contract prescribed by the **Authority** under clause 13.219B as a **risk management contract**, either—
  - (i) the **party** specified as the buyer in the contract; or
  - (ii) if neither **party** is specified as the buyer, the **party** whose name is the first alphabetically; or
- (d) for the purposes of subpart 7 of Part 13, in respect of any other contract, the **party** consuming the **electricity** that the contract relates to

Clause 1.1(1) **buyer**: amended, on 19 August 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Restrictions on Materially Large Contracts) 2022.

Clause 1.1(1) **buyer**: revoked, on 18 May 2023, by clause 2(2) of the Electricity Industry Participation Code Amendment (Restrictions on Materially Large Contracts) 2023.

Clause 1.1(1) **buyer**: inserted, on 19 May 2023, by clause 4(2) of the Electricity Industry Participation Code Amendment (Restrictions on Materially Large Contracts) 2023.

Clause 1.1(1) **buyer**: clause (c)(iii) amended, on 30 October 2024, by clause 4(2)(a) of the Electricity Industry Participation Code Amendment (Hedge Disclosure Obligations) 2024.

Clause 1.1(1) **buyer**: clause (ca) inserted, on 30 October 2024, by clause 4(2)(b) of the Electricity Industry Participation Code Amendment (Hedge Disclosure Obligations) 2024.

**calibration** means the set of operations that establishes, under specified conditions, the relationship between the values indicated by the measuring system and the corresponding values of a quantity realised by a **reference standard** or **working standard**, and **calibrate** and **calibrated** have corresponding meanings

**calibration report** means a report that contains the results of all **calibration** tests carried out on—

- (a) a **metering installation**; or
- (b) a **metering component** in a **metering installation**; or
- (c) a **working standard**

Clause 1.1(1) **calibration report**: substituted, on 29 August 2013, by clause 4(2)(b) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**call** [*Revoked*]

Clause 1.1(1) **call**: revoked, on 24 March 2015, by clause 4(1)(b) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

**capacity** [*Revoked*]

Clause 1.1(1) **capacity**: revoked, on 23 February 2015, by clause 4(11) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

**capacity reserve** means—

- (a) demand that can be decreased for the purpose of adjusting a **constraint**; or
- (b) generation that can be increased or decreased for the purpose of adjusting a **constraint**

**cash deposit** means the cash deposited in **cleared funds** by a **participant** in accordance with clause 2 of Schedule 14A.1, and includes any interest under clause 14A.14 that has not been paid out

Clause 1.1(1) **cash deposit**: amended, on 24 March 2015, by clause 4(1)(c) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

**cash deposit accounts** means the trust accounts established by the **clearing manager** in accordance with clause 14A.11

Clause 1.1(1) **cash deposit accounts**: amended, on 24 March 2015, by clause 4(1)(d) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

**cash interest rate** [*Revoked*]

Clause 1.1(1) **cash interest rate**: revoked, on 24 March 2015, by clause 4(1)(e) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

**category 1 metering installation** means a **metering installation** that has the required defining characteristics for a **metering installation** of that category in Table 1 of Schedule 10.1

Clause 1.1(1) **category 1 metering installation**: inserted, on 1 December 2011, by clause 4(a) of the Electricity Industry Participation Code (Distributor Use-of-System Agreements and Distributor Tariffs) Amendment 2011.

Clause 1.1(1) **category 1 metering installation**: substituted, on 29 August 2013, by clause 4(2)(c) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**category 2 metering installation** means a **metering installation** that has the required defining characteristics for a **metering installation** of that category in Table 1 of Schedule 10.1

Clause 1.1(1) **category 2 metering installation**: inserted, on 1 December 2011, by clause 4(a) of the Electricity Industry Participation Code (Distributor Use-of-System Agreements and Distributor Tariffs) Amendment 2011.

Clause 1.1(1) **category 2 metering installation**: substituted, on 29 August 2013, by clause 4(2)(d) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**causer**, in relation to an **under-frequency event**, means—

- (a) if the **under-frequency event** is caused by an interruption or reduction of **electricity** from a single **generator's** or **grid owner's asset** or **assets**, the **generator** or **grid owner**; unless—
  - (i) the **under-frequency event** is caused by an interruption or reduction of **electricity** from a single **generator's asset** or **assets** but another **generator's** or a **grid owner's** act or omission or property causes the interruption or reduction of **electricity**, in which case the other **generator** or the **grid owner** is the **causer**; or
  - (ii) the **under-frequency event** is caused by an interruption or reduction of **electricity** from a single **grid owner's asset** or **assets** but a **generator's** or another **grid owner's** act or omission or property causes the interruption or reduction of **electricity**, in which case the **generator** or other **grid owner** is the **causer**; or
- (b) if the **under-frequency event** is caused by more than 1 interruption or reduction of **electricity**, the **generator** or **grid owner** who, in accordance with paragraph (a), would be the **causer** of the **under-frequency event** if it had been caused by the first in time of the interruption or reduction of **electricity**; but
- (c) if an interruption or reduction of **electricity** occurs in order to comply with this Code, the interruption or reduction of **electricity** must be disregarded for the purposes of determining the **causer** of the **under-frequency event**

**centralised data set** [*Revoked*]

Clause 1.1(1) **centralised data set**: revoked, on 1 February 2016, by clause 4(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

**certification** means—

- (a) if applied to a **metering installation**, confirmation that the **metering installation** meets the requirements of this Code; and
- (b) if applied to a **metering component**, confirmation that the **metering component** meets the requirements of this Code; and
- (c) if applied to a **reconciliation participant**, confirmation that that **reconciliation participant** has met the requirements of Schedule 15.1

Clause 1.1(1) **certification**: amended, on 29 August 2013, by clause 4(2)(e) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**certification report** means a report that contains—

- (a) the **calibration report** or **calibration reports**;
- (b) all other information relevant to the **certification** of a **metering installation** or a **metering component** required under Part 10

Clause 1.1(1) **certification report**: substituted, on 29 August 2013, by clause 4(2)(f) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**certification sticker** means a sticker that is valid for a specific period and that is attached—

- (a) to a **metering installation**, confirming that the **metering installation** has been **certified** by an **ATH** under Schedule 10.7; or
- (b) to a **metering component**, confirming that the **metering component** has been **certified** by an **ATH** under Schedule 10.8

Clause 1.1(1) **certification sticker**: substituted, on 29 August 2013, by clause 4(2)(g) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**certified** means having achieved **certification**

**certify** means to carry out a **certification**

**chargeable capacity** means the capacity that the **distributor** may charge for, but that may not be the actual installed capacity at the relevant **ICP**

**check metering information** [*Revoked*]

Clause 1.1(1) **check metering information**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**circuit branch** means a **branch** that is not a **transformer branch** or the **HVDC link**

**circuit breaker** means a switching device capable of making, carrying and breaking currents under normal circuit conditions, and capable of making, carrying for a specified time and breaking currents under specified abnormal conditions (such as a short circuit)

**circuit breaker failure protection system** means a protection system that—

- (a) operates because a **circuit breaker** has failed to **electrically disconnect** a faulted **asset** from the **grid** in the allocated time; and
- (b) may **electrically disconnect** non-faulted **assets** from the **grid** as well as a faulted **asset**

Clause 1.1(1) **circuit breaker failure protection system**: amended, on 5 October 2017, by clause 4(11) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**class A approved test house** [*Revoked*]

Clause 1.1(1) **class A approved test house**: revoked, on 29 August 2013, by clause 4(3) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**class A ATH** means an **ATH** who is approved under clause 3 of Schedule 10.3

Clause 1.1(1) **class A ATH**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**class B approved test house** [*Revoked*]

Clause 1.1(1) **class B approved test house**: revoked, on 29 August 2013, by clause 4(3) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**class B ATH** means an **ATH** who is approved under clause 4 of Schedule 10.3

Clause 1.1(1) **class B ATH**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**cleared funds**, in relation to a **business day**, means funds that are immediately available for disbursement on that day

**clearing auction price** means the lowest successful price bid at an **auction** in dollars per **MW** per **half hour**

**clearing manager** has the meaning given to it in section 5 of the **Act**

**Code information** means all information that is supplied by 1 **participant** to another **participant**, or group of **participants**, under this Code (other than **excluded Code information** and information that is supplied under Parts 2 to 6 and 9 of this Code)

Clause 1.1(1) **Code information**: amended, on 16 December 2013, by clause 4(1) of the Electricity Industry Participation (Revocation of Part 16) Code Amendment 2013.

**code of practice** means a code of practice issued under this Code

Clause 1.1(1) **code of practice**: amended, on 29 August 2013, by clause 4(2)(h) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**co-efficient of variation** means the ratio of the standard deviation to the mean of the distribution for the random variable under consideration

**co-generator** *[Revoked]*

Clause 1.1(1) **co-generator**: revoked, on 27 May 2015, by clause 4(1) of the Electricity Industry Participation Code Amendment (Industrial Co-generation Dispatch Arrangements) 2015.

**collateral term** means a term in a **default distributor agreement** that is not—

- (a) a **core term**; or
- (b) an **operational term**; or
- (c) *[Revoked]*
- (d) a term required in accordance with clause 3(1)(d) of Schedule 12A.4

Clause 1.1(1) **collateral term**: inserted, on 20 July 2020, by clause 4(3) of the Electricity Industry Participation Code Amendment (Default Distributor Agreement) 2020.

Clause 1.1(1) **collateral term**: amended, on 25 November 2024, by clause 4(1) of the Electricity Industry Participation Code Amendment (Distributor Agreement Amendments) 2024.

**commissioning** means to verify the correct operation of—

- (a) an **asset**; or
- (b) a **point of connection**; or
- (c) metering equipment installed in a **metering installation**,—

and **commissioned** has a corresponding meaning

Clause 1.1(1) **commissioning**: amended, on 29 August 2013, by clause 4(2) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

Clause 1.1(1) **commissioning**: replaced, on 5 October 2017, by clause 4(1)(b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**commissioning report** *[Revoked]*

Clause 1.1(1) **commissioning report**: revoked, on 29 August 2013, by clause 4(3) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**committed projects** means transmission augmentation projects and **non-transmission projects** that are reasonably likely to proceed in a similar timeframe for which the assessment of costs and benefits under a net benefits test set out in Part 12 is undertaken, and in relation to which either—

- (a) all of the following are satisfied:
  - (i) the proponent has obtained all required planning consents, construction approvals, and licences, and fulfilled any other regulatory requirement that must be met before commencing construction;
  - (ii) construction has commenced or a firm commencement date for construction has been set;
  - (iii) the proponent has acquired or executed an agreement to acquire land (or commenced legal proceedings to acquire land), or has executed an agreement for the leasing of land, for the purposes of construction;

- (iv) contracts for supply and construction of the major components of the plant and equipment (including any **generating units**, turbines, boilers, transmission towers, conductors, termination station equipment) have been executed (i.e. all the necessary formal legal requirements have been observed to make the contract valid and complete);
- (v) contracts for the financing of the project, including any debt plans, have been executed (i.e. all the necessary formal legal requirements have been observed to make the contract valid and complete); or
- (b) in the case of transmission augmentation projects, the project is an **approved investment**

**common quality** means those elements of quality of **electricity** conveyed across the **grid** that cannot be technically or commercially isolated to an identifiable person or group of persons

**communication** means, for the purposes of Part 10, the electronic transfer of information, or instructions, to or from a **metering installation**

Clause 1.1(1) **communication**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**communication equipment** means a device, used for **communication**, in—

- (a) a **metering installation**; or
- (b) a **back office**

Clause 1.1(1) **communication equipment**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**comparative recertification** means **recertification** of a **category 2 metering installation** under clause 12(3) of Schedule 10.7

Clause 1.1(1) **comparative recertification**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**compensation factor** means any of the following factors used to compensate for errors, losses, or ratios within a **metering installation** that are required to be applied to raw meter data:

- (a) **error compensation**;
- (b) **loss compensation**;
- (c) **ratio compensation**

To avoid doubt, the **raw meter data** from a **metering installation** may require more than one **compensation factor**, if the relevant types of compensation are required.

Clause 1.1(1) **compensation factor**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 1.1(1) **compensation factor**: amended, on 1 February 2021, by clause 4(1) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 1.1(1) **compensation factor**: amended, on 20 December 2021, by clause 4(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

**complete** [*Revoked*]

Clause 1.1(1) **complete**: revoked, on 16 December 2013, by clause 4(2)(a) of the Electricity Industry Participation (Revocation of Part 16) Code Amendment 2013.

**confidential information**, for the purposes of Schedule 6.2, means all data and other information of a confidential nature provided by 1 party (A) to another party (B) under the **regulated terms**, but excludes—

- (a) information known to B before the date it was provided by B to A and that was not obtained directly or indirectly from A; and
- (b) information obtained bona fide from another person who is in lawful possession of the information and who did not acquire the information directly or indirectly from A under an obligation of confidence

**conforming GXP** means a **GXP** that—

- (a) has been determined by the **Authority** to be a **conforming GXP** under clause 13.27A or 13.27B(4); or
- (b) is deemed to be a **conforming GXP** under clause 13.27F

Clause 1.1(1) **conforming GXP**: inserted, on 28 March 2012, by clause 4(a) of the Electricity Industry Participation (Demand-side Bidding and Forecasting) Code Amendment 2011.

**congestion management policy** means the policies, clauses, or conditions referred to in clause 6.3(2)(d)

**connect***[Revoked]*

Clause 1.1(1) **connect**: amended, on 23 February 2015, by clause 4(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **connect**: revoked, on 5 October 2017, by clause 4(60) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**connected asset owner** means a **direct consumer**, or a **distributor** in its capacity as the owner or operator of a **local network**

Clause 1.1(1) **connected asset owner**: inserted, on 1 February 2016, by clause 4(19) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

**connection and operation standards**, in relation to a **distributor** or **distributed generation**,—

- (a) means requirements, as amended from time to time by the **distributor**, that—
  - (i) are set out in written policies and standards of the **distributor**; and
  - (ii) relate to connecting **distributed generation** to a **distribution network** or to a **consumer installation** that is connected to a **distribution network**, and the operation of the **distribution network**, including requirements relating to the planning, design, construction, testing, inspection, and operation of **distributed generation** that is, or is proposed to be, connected; and
  - (iii) are made publicly available in accordance with clause 6.3; and
  - (iv) reflect, or are consistent with, **reasonable and prudent operating practice**; and
- (b) includes the following, as amended from time to time by the **distributor**:
  - (i) the **distributor's congestion management policy**, as referred to in clause 6.3(2)(d); and
  - (ii) the **distributor's** emergency response policies; and
  - (iii) the **distributor's** safety standards; and
- (c) until 1 September 2026, may include the **distributor's** policies for specifying available **maximum export power** amongst categories of **network** users, a **maximum export power** threshold for applications under Part 1A of Schedule 6.1, and the methodology used to determine that threshold

Clause 1.1(1) **connection and operation standards**: amended, on 23 February 2015, by clause 4(3) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **connection and operation standards**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **connection and operation standards**, paragraph (a)(ii): replaced, on 5 October 2017, by clause 4(12) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1.1(1) **connection and operation standards**, paragraph (b)(iii): amended, on 1 September 2021, by clause 4(1)(a) of the Electricity Industry Participation Code Amendment (Application for Distributed Generation) 2021.

Clause 1.1(1) **connection and operation standards**, paragraph (c): inserted, on 1 September 2021, by clause 4(1)(b) of the Electricity Industry Participation Code Amendment (Application for Distributed Generation) 2021. **Note: paragraph (c) automatically revokes on the close of 1 September 2026 under clause 8 of the Electricity Industry Participation Code Amendment (Application for Distributed Generation) 2021.**

**connection asset**, for the purposes of subparts 2, 6 and 7 of Part 12, has the meaning set out in the **transmission pricing methodology**

**Connection Code** means the Connection Code that is included in the **default transmission agreement template** as Schedule 8

Clause 1.1(1) **Connection Code**: amended, on 1 October 2023, by clause 4(3) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

**connection location** means a substation or other location at which **lines**, equipment and plant owned or managed by a **designated transmission customer** that are directly related to a **point of connection**, and that are used for the consumption, conveyance, or generation of **electricity**, are directly connected to the **grid**

Clause 1.1(1) **connection location**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **connection location**: amended, on 1 February 2016, by clause 4(4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 1.1(1) **connection location**: amended, on 5 October 2017, by clause 4(13) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**constrained off amounts** means the amounts calculated by the **clearing manager** under clauses 13.194 to 13.196

**constrained off compensation** means either—

- (a) **constrained off amounts** owing to a **dispatched purchaser** under clause 13.201A; or
- (b) **constrained off amounts** owing to the **clearing manager** under clause 13.201A by **purchasers**

Clause 1.1(1) **constrained off compensation**: inserted, on 15 May 2014, by clause 5(1) of the Electricity Industry Participation (Modified Dispatchable Demand) Code Amendment 2013.

Clause 1.1(1) **constrained off compensation**: amended, on 24 March 2015, by clause 4(1)(g) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

**constrained off situation** means a situation as defined in clause 13.192

**constrained on amounts** means the amounts calculated by the **clearing manager** under clauses 13.204 and 13.205

**constrained on compensation** means, as the case may be,—

- (a) the **constrained on amounts** owing to—
  - (i) a **generator** under clause 13.212(1)(a); or
  - (ii) an **ancillary service agent** under clause 13.212(1)(a); or
  - (iii) a **dispatched purchaser** under clause 13.212(1)(b); or
- (b) the **constrained on amounts** owing by—
  - (i) the **system operator** under clause 13.212(2); or
  - (ii) a **purchaser** under clause 13.212(5)

Clause 1.1(1) **constrained on compensation**: substituted, on 15 May 2014, by clause 5(2) of the Electricity Industry Participation (Modified Dispatchable Demand) Code Amendment 2013.

Clause 1.1(1) **constrained on compensation**: amended, on 24 March 2015, by clause 4(1)(f) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

**constrained on situation** means a situation as defined in clause 13.202

**constraint** means a limitation in the capacity of the **grid** to convey electricity caused by limitations in capability of available **assets** forming the **grid** or limitations in the performance of the integrated power system

**constraint price** [*Revoked*]

Clause 1.1(1) **constraint price**: amended, on 15 May 2014, by clause 4(1) of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

Clause 1.1(1) **constraint price**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**construct**, for the purposes of the definition of **associated equipment** and Part 6, includes to erect, to lay, and to place, and **construction** has a corresponding meaning  
Clause 1.1(1) **construct**: amended, on 21 September 2012, by clause 4(2) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

**consumer** means a person who is supplied **electricity** for consumption, and includes a **distributor**, a **retailer** or a **generator** if the **distributor**, or the **retailer** or the **generator** is supplied with **electricity** for its own consumption

**consumer installation**, for the purposes of the definition of **associated equipment** and Part 6, means—

- (a) all fittings that are part of a system for conveying **electricity** from a **consumer's point of supply** to any point from which **electricity** conveyed through that system may be consumed; and
- (b) includes any fittings that are used, or designed or intended for use, by any person in, or in relation to, the generation of **electricity**—
  - (i) for that person's use and not for supply to any other person; or
  - (ii) so that **electricity** can be injected into a **distribution network**; but
- (c) does not include any appliance that uses, or is designed or intended to use, **electricity**, whether or not it also uses, or is designed or intended to use, any other form of energy

Clause 1.1(1) **consumer installation**: substituted, on 23 February 2015, by clause 4(4)(a) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **consumer installation**: amended, on 5 October 2017, by clause 4(14) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**consumption information** means the information describing the quantity of **electricity** conveyed during the period for which the information is required, which may be directly measured or calculated from information obtained from a **metering installation**, or calculated in accordance with this Code

**consumption pattern** means, for the purposes of this Part and Schedule 15.5, the shape of the half **hourly** consumption

**consumption period** means a calendar month during which **electricity** is supplied to **consumers** (and conversely produced by **generators**)

**contract for differences**, for the purposes of subpart 5 and subpart 7 of Part 13, means a financial derivative contract—

- (a) under which 1 or both **parties** makes or may make a payment to the other **party**; and
- (b) in which the payment to be made depends on, or is derived from, the price of a **quantity of electricity** at a particular time; and
- (c) that may provide a means for the risk to 1 or both **parties** of an increase or decrease in the price of **electricity** to be reduced or eliminated; and
- (d) that relates to a quantity of **electricity** that equals or exceeds 0.1 MW of **electricity**.

Clause 1.1(1) **contract for differences**: amended, on 15 January 2016, by clause 4(5) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 1.1(1) **contract for differences**: amended, on 19 August 2022, by clause 4(3) of the Electricity Industry Participation Code Amendment (Restrictions on Materially Large Contracts) 2022.

Clause 1.1(1) **contract for differences**: revoked, on 18 May 2023, by clause 2(2) of the Electricity Industry Participation Code Amendment (Restrictions on Materially Large Contracts) 2023.

Clause 1.1(1) **contract for differences**: inserted, on 19 May 2023, by clause 4(3) of the Electricity Industry Participation Code Amendment (Restrictions on Materially Large Contracts) 2023.

Clause 1.1(1) **contract for differences**: paragraph (b) amended, on 30 October 2024, by clause 4(3)(a) of the Electricity Industry Participation Code Amendment (Hedge Disclosure Obligations) 2024.

Clause 1.1(1) **contract for differences**: paragraph (d) replaced, on 30 October 2024, by clause 4(3)(b) of the Electricity Industry Participation Code Amendment (Hedge Disclosure Obligations) 2024.

#### **contract price** [*Revoked*]

Clause 1.1(1) **contract price**: amended, on 20 December 2021, by clause 4(4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 1.1(1) **contract price**: revoked, on 30 October 2024, by clause 4(4) of the Electricity Industry Participation Code Amendment (Hedge Disclosure Obligations) 2024.

#### **contract price schedule** [*Revoked*]

Clause 1.1(1) **contract price schedule**: revoked, on 30 October 2024, by clause 4(5) of the Electricity Industry Participation Code Amendment (Hedge Disclosure Obligations) 2024.

**contract specifications** means specifications prescribing the specific terms of, and terms of trading in, each class of contract that may from time to time be traded on a market under this Code

**control device** means a device in a **metering installation** that controls either or both of the following:

- (a) **electricity**—
  - (i) conveyed through the **metering installation**; and
  - (ii) used to satisfy controllable load:
- (b) a **meter** register in the **metering installation**

Clause 1.1(1) **control device**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation Code Amendment (Metering Arrangements) Code Amendment 2011.

**controllable load**, for the purposes of Part 8, means the quantity of resources (in MW) that a **connected asset owner** estimates will be available for use by the **system operator** under a **grid emergency**. The available **controllable load** must exclude—

- (i) resources a **connected asset owner** intends to use for its own network demand management purposes; and
- (ii) any resources offered into the **instantaneous reserves** market; and
- (iii) any resources bid or offered on behalf of a **dispatch-capable load station** or **dispatch notification purchaser** or **dispatch notification generator**.

Clause 1.1(1) **controllable load**: inserted, on 1 May 2024, by clause 4 of the Electricity Industry Participation Code Amendment (Controllable Load) 2024.

**controller** means,—

- (a) in relation to a company,—
    - (i) any person in accordance with whose directions and instructions the persons occupying the position of directors of the company are accustomed to act (but disregarding advice given in a professional capacity); or
    - (ii) any person who is entitled to exercise, or control the exercise of, 50% or more of the voting power at any general meeting of the company or of another company of which the company is a **subsidiary**; and
  - (b) in relation to an unincorporated body of persons,—
    - (i) any person in accordance with whose directions and instructions the officers of the body are accustomed to act (but disregarding advice given in a professional capacity); or
    - (ii) any person who is entitled to exercise, or control the exercise of, 50% or more of the voting power on any resolution of the body;
  - (c) in relation to any person, any person who has the power to appoint or remove a majority of the participants of the governing body of that person or otherwise controls or has the power to control the affairs or policies of that person,—
- and **control** and **controlled** have corresponding meanings

**control room** means the location at which **asset owners** have facilities to receive operational instructions from the **system operator** and to act on those instructions

**control system** means equipment that adjusts the output voltage, frequency, **MW** or **reactive power** (as the case may be) of an **asset** in response to certain aspects of **common quality** such as voltage, frequency, **MW** or **reactive power**, including speed governors and exciters

**core grid** means the **assets** that form part of the **core grid** as specified in the **core grid determination**

**core grid determination** means the determination specifying the **assets** forming part of the **core grid**, developed in accordance with clauses 12.63 to 12.69, including variations

**core term** means a term set out in a **default distributor agreement template** for inclusion in a **default distributor agreement** in accordance with clause 3(1)(a) of Schedule 12A.4

Clause 1.1(1) **core term**: inserted, on 20 July 2020, by clause 4(3) of the Electricity Industry Participation Code Amendment (Default Distributor Agreement) 2020.

**customer** *[Revoked]*

Clause 1.1(1) **customer**: revoked, on 1 November 2018, by clause 4(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

**customer compensation scheme** means a **default customer compensation scheme** or an **additional customer compensation scheme**

Clause 1.1(1) **customer compensation scheme**: inserted, on 1 April 2011, by clause 4(1) of the Electricity Industry Participation (Customer Compensation Schemes) Code Amendment 2011.

**data logger** *[Revoked]*

Clause 1.1(1) **data logger**: revoked, on 15 May 2014, by clause 4(2) of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

**data storage device** means a device in a **metering installation**, whether or not integral to the **meter**, that—

- (a) electronically stores data and **event logs** used to provide information for the purposes of Part 15; and
- (b) makes the data and **event logs** available during an **interrogation**

Clause 1.1(1) **data storage device**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**declaration date** means the date, nominated by the **profile applicant**, on which the **Authority** must, for a particular **profile**, give written notice to every **registered participant** of the information set out in clause 13 of Schedule 15.5 for that **profile**

Clause 1.1(1) **declaration date**: amended, on 5 October 2017, by clause 4(15) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**decommissioning** means—

- (a) the permanent removal from service of—
  - (i) an **asset**; or
  - (ii) a **point of connection**; or
  - (iii) a **metering installation** associated with a **point of connection**; or
- (b) for the purposes of Parts 11 and 15, the permanent removal of a **point of connection** by—
  - (i) permanently removing an **electrical facility** associated with the **point of connection**; or
  - (ii) changing the allocation of electrical loads between **points of connection** with the effect of making the **point of connection** obsolete; or
  - (iii) in the case of a **distributor-only ICP** for an **embedded network**, the **embedded network** ceasing to exist

and **decommission** and **decommissioned** have corresponding meanings

Clause 1.1(1) **decommissioning**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 1.1(1) **decommissioning**, paragraph (a): replaced, on 5 October 2017, by clause 4(16) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1.1(1) **decommissioning**, paragraph (b)(i): amended, on 1 March 2024, by clause 4(5) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

**de-energisation** [*Revoked*]

Clause 1.1(1) **de-energisation**: amended, on 29 August 2013, by clause 4(2)(i) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 1.1(1) **de-energisation**: amended, on 1 February 2016, by clause 4(6) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 1.1(1) **de-energisation**: revoked, on 5 October 2017, by clause 4(60) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**de-energise** [*Revoked*]

Clause 1.1(1) **de-energise**: inserted, on 29 August 2013, by clause 4(3) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

Clause 1.1(1) **de-energise**: revoked, on 1 February 2016, by clause 4(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

**default customer compensation scheme** means a scheme that complies with clause 9.24

Clause 1.1(1) **default customer compensation scheme**: inserted, on 1 April 2011, by clause 4(1) of the Electricity Industry Participation (Customer Compensation Schemes) Code Amendment 2011.

**default distributor agreement** means an agreement that a **distributor** is required to develop in accordance with clauses 3 to 11 of Schedule 12A.4, and which includes—

- (a) **core terms**; and
- (b) **operational terms**; and
- (c) *[Revoked]*
- (d) **collateral terms** (if any); and
- (e) any terms required in accordance with clause 3(1)(d) of Schedule 12A.4

Clause 1.1(1) **default distributor agreement**: inserted, on 20 July 2020, by clause 4(3) of the Electricity Industry Participation Code Amendment (Default Distributor Agreement) 2020.

Clause 1.1(1) **default distributor agreement**: amended, on 25 November 2024, by clause 4(2) of the Electricity Industry Participation Code Amendment (Distributor Agreement Amendments) 2024.

**default distributor agreement template** means a template agreement set out in an appendix to Schedule 12A.4

Clause 1.1(1) **default distributor agreement template**: inserted, on 20 July 2020, by clause 4(3) of the Electricity Industry Participation Code Amendment (Default Distributor Agreement) 2020.

**default interest rate** means the **bank bill bid rate** plus 5% per annum

**default transmission agreement** means a binding contract between **Transpower** and a **designated transmission customer** for the connection to and/or use of the **grid**, that applies under clause 12.10 or 12.13 and which is based on the **default transmission agreement template**

Clause 1.1(1) **default transmission agreement**: inserted, on 1 October 2023, by clause 4(1) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

**default transmission agreement template** means the template agreement set out in Schedule 12.6

Clause 1.1(1) **default transmission agreement template**: inserted, on 1 October 2023, by clause 4(1) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

**demand** means the rate of consumption of electrical energy

**designated transmission customers** means **participants** who are required to enter into **transmission agreements** with **Transpower** under subpart 2 of Part 12

**difference bid** means the information that a **purchaser** submits to the **system operator** under clause 13.7AA to indicate a reasonable estimate of an increase or decrease in the **purchaser's** usual **non-dispatch-capable load** purchased at a **conforming GXP**

Clause 1.1(1) **difference bid**: inserted, on 28 June 2012, by clause 4(a) of the Electricity Industry Participation (Demand-side Bidding and Forecasting) Code Amendment 2011.

Clause 1.1(1) **difference bid**: substituted, on 15 May 2014, by clause 5(2) of the Electricity Industry Participation (Modified Dispatchable Demand) Code Amendment 2013.

Clause 1.1(1) **difference bid**: amended, on 29 June 2017, by clause 4(2) of the Electricity Industry Participation Code Amendment (Shortened Gate Closure and Revised Bid and Offer Provisions) 2017.

**direct consumer** means a **consumer** with a **point of connection** to the **grid**

**direct purchaser** means a **consumer** who purchases, or agrees to purchase, **electricity** directly from the **clearing manager** for its own consumption at a **point of connection**

**disclosed** *[Revoked]*

Clause 1.1(1) **disclosed**: revoked, on 16 December 2013, by clause 4(2)(b) of the Electricity Industry Participation (Revocation of Part 16) Code Amendment 2013.

**disclosing participant** means any of the following:

- (a) a person who consumes **electricity** that is conveyed to the person directly from

the national **grid**:

(b) a person who buys **electricity** from the **clearing manager**

Clause 1.1(1) **disclosing participant**: inserted, on 1 December 2011, by clause 4 of the Electricity Industry Participation Code (Spot Price Risk Disclosure) Amendment 2011.

**disclosure information**, in relation to a **participant**, means information that—

- (a) is about the **participant**; and
- (b) is held by the **participant**; and
- (c) the **participant** expects, or ought reasonably to expect, if made available to the public, will, or is likely to, have a material impact on prices in the **wholesale market**

Clause 1.1(1) **disclosure information**: inserted, on 1 October 2013, by clause 4(1) of the Electricity Industry Participation (Disclosure Obligations) Code Amendment 2013.

Clause 1.1(1) **disclosure information**: amended, on 5 October 2017, by clause 4(17) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1.1(1) **disclosure information**: paragraph (c) amended, on 6 April 2021, by clause 4 of the Electricity Industry Participation Code Amendment (Definition of Disclosure Information) 2021.

Clause 1.1(1) **disclosure information**: paragraph (c) amended, on 15 December 2021, by clause 4 of the Electricity Industry Participation Code Amendment (Definition of Disclosure Information (No. 2)) 2021.

**disconnected** [*Revoked*]

Clause 1.1(1) **disconnected**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **disconnected**: revoked, on 5 October 2017, by clause 4(60) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**discretionary demand** [*Expired*]

Clause 1.1(1) **discretionary demand**: inserted, on 3 May 2023, by clause 4 of the Electricity Industry Participation Code Amendment (Discretionary Demand Control) 2023 and expired on 3 February 2024.

**dispatch** means the process of—

- (a) pre-dispatch scheduling, to match expected **supply** with expected **demand**, and to allocate **ancillary service offers** and **transmission offers** to match expected **grid** conditions; and
- (b) rescheduling to meet forecast **demand**; and
- (c) issuing instructions and notifications based on the **dispatch schedule** and the real-time conditions to manage resources to meet the actual **demand**,—

and **dispatching** and **dispatched** have a corresponding meaning

Clause 1.1(1) **dispatch** paragraphs (a) and (c): amended, on 28 June 2012, by clause 4(d) of the Electricity Industry Participation (Demand-side Bidding and Forecasting) Code Amendment 2011.

Clause 1.1(1) **dispatch**: amended, on 1 November 2022, by clause 4(3) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**dispatch arc flows** [*Revoked*]

Clause 1.1(1) **dispatch arc flows**: revoked, on 28 June 2012, by clause 4(i) of the Electricity Industry Participation (Demand-side Bidding and Forecasting) Code Amendment 2011.

**dispatch group constraint arc flows** [*Revoked*]

Clause 1.1(1) **dispatch group constraint arc flows**: revoked, on 28 June 2012, by clause 4(i) of the Electricity Industry Participation (Demand-side Bidding and Forecasting) Code Amendment 2011.

**dispatch instruction** means an instruction issued by the **system operator** under clause 13.72(1)(a)

Clause 1.1(1) **dispatch instruction**: substituted, on 15 May 2014, by clause 5(2) of the Electricity Industry Participation (Modified Dispatchable Demand) Code Amendment 2013.

Clause 1.1(1) **dispatch instruction**: amended, on 1 November 2022, by clause 4(4) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**dispatch marginal location factor** means the factor that is determined by dividing the **dispatch price** at any **grid exit point** or **grid injection point** by the **dispatch price** at the relevant **reference point**

Clause 1.1(1) **dispatch marginal location factor**: inserted, on 1 November 2022, by clause 4(1) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**dispatch notification** means a notification to a **dispatch notification purchaser** or **dispatch notification generator** made by the **system operator** under clause 13.72(1)(b)

Clause 1.1(1) **dispatch notification**: inserted, on 1 November 2022, by clause 4(1) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**dispatch notification generator** means a **generator** that is approved by the **system operator** under clause 13.3F to be a **dispatch notification generator**

Clause 1.1(1) **dispatch notification generator**: inserted, on 1 November 2022, by clause 4(1) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**dispatch notification purchaser** means for the purposes of Part 1 and Part 13 only, a **dispatchable load purchaser** that is approved by the **system operator** under Schedule 13.8 to operate a **dispatch-capable load station** as a **dispatch notification purchaser**. For the purpose of this definition and for the purpose of all references to **purchaser** in relation to a **dispatch notification purchaser**, **purchaser** includes a load aggregator

Clause 1.1(1) **dispatch notification purchaser**: inserted, on 1 November 2022, by clause 4(1) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

Clause 1.1(1) **dispatch notification purchaser**: amended, on 1 March 2024, by clause 4(1) of the Electricity Industry Participation Code Amendment (Dispatch Notification Enhancement and Clarifications) 2024.

**dispatch objective** means the objective defined in clause 13.57

**dispatch price** means a price in dollars and cents for each **grid injection point**, each **grid exit point**, and each **reference point**, as specified in the **dispatch schedule**

Clause 1.1(1) **dispatch price**: inserted, on 1 November 2022, by clause 4(1) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**dispatch prices** *[Revoked]*

Clause 1.1(1) **dispatch prices**: revoked, on 28 June 2012, by clause 4(i) of the Electricity Industry Participation (Demand-side Bidding and Forecasting) Code Amendment 2011.

**dispatch quantities** *[Revoked]*

Clause 1.1(1) **dispatch quantities**: revoked, on 28 June 2012, by clause 4(i) of the Electricity Industry Participation (Demand-side Bidding and Forecasting) Code Amendment 2011.

**dispatch reserve price** means a price in dollars and cents for **fast instantaneous reserve** and **sustained instantaneous reserve** for each **island**, as specified in the **dispatch schedule**

Clause 1.1(1) **dispatch reserve price**: inserted, on 1 November 2022, by clause 4(1) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**dispatch schedule** means the schedule produced by the **system operator** under clause 13.69A

Clause 1.1(1) **dispatch schedule**: substituted, on 15 May 2014, by clause 5(2) of the Electricity Industry Participation (Modified Dispatchable Demand) Code Amendment 2013.

**dispatchable load information** means the **volume information**—

- (a) of each **dispatch-capable load station** for each **trading period** in a **consumption period**; and
- (b) that is—
  - (i) prepared under clause 15.5A or 15.5B; and
  - (ii) aggregated and rounded in accordance with clause 15.5C

Clause 1.1(1) **dispatchable load information**: inserted, on 15 May 2014, by clause 5(1) of the Electricity Industry Participation (Modified Dispatchable Demand) Code Amendment 2013.

**dispatchable load purchaser** means a **purchaser** that purchases **electricity** for a **dispatch-capable load station** and, for the purposes of Parts 1 and 13 only, includes a **dispatch notification purchaser**. For clarity, other than in Parts 1 and 13, a **dispatch notification purchaser** is not a **dispatchable load purchaser**

Clause 1.1(1) **dispatchable load purchaser**: inserted, on 15 May 2014, by clause 5(1) of the Electricity Industry Participation (Modified Dispatchable Demand) Code Amendment 2013.

Clause 1.1(1) **dispatchable load purchaser**: amended, on 1 March 2024, by clause 4(2) of the Electricity Industry Participation Code Amendment (Dispatch Notification Enhancement and Clarifications) 2024.

**dispatch-capable load station** means a device or a group of devices approved as a **dispatch-capable load station** under clause 13.3A

Clause 1.1(1) **dispatch-capable load station**: inserted, on 15 May 2014, by clause 5(1) of the Electricity Industry Participation (Modified Dispatchable Demand) Code Amendment 2013.

**dispatch-capable load station identifier** means a unique code—

- (a) assigned to a **dispatch-capable load station** under clause 6(2) of Schedule 13.8; and
- (b) that is used to identify the **dispatch-capable load station** and the **GXP** at which **nominated bids** are to be submitted for that **dispatch-capable load station**

Clause 1.1(1) **dispatch-capable load station identifier**: inserted, on 15 May 2014, by clause 5(1) of the Electricity Industry Participation (Modified Dispatchable Demand) Code Amendment 2013.

Clause 1.1(1) **dispatch-capable load station identifier**: amended, on 1 March 2024, by clause 4(3) of the Electricity Industry Participation Code Amendment (Dispatch Notification Enhancement and Clarifications) 2024.

**dispatched purchaser** means a **dispatchable load purchaser**,—

- (a) issued with a **dispatch instruction** under clause 13.72(1)(a)(iii) for 1 or more **dispatch-capable load stations**; or
- (b) issued with a **dispatch instruction** in accordance with backup procedures under clause 13.81 for 1 or more **dispatch-capable load stations**

Clause 1.1(1) **dispatched purchaser**: inserted, on 15 May 2014, by clause 5(1) of the Electricity Industry Participation (Modified Dispatchable Demand) Code Amendment 2013.

Clause 1.1(1) **dispatched purchaser**: amended, on 1 November 2022, by clause 4(5) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**dispensation** means an exclusion from compliance with an **AOPO** or **technical code** granted by the **system operator** in accordance with the process set out in clauses 8.29 to 8.31

**distributed generation** means **generating plant** that is connected, or that a **distributed generator** proposes to connect, to a **distribution network** or to a **consumer installation** that is connected to a **distribution network**, but does not include—

- (a) **generating plant** that is connected, or that a **participant** proposes to connect, to a **distribution network** and that is operated by a **distributor** for the purpose of maintaining or restoring the provision of **electricity** to part or all of the **distributor's distribution network**—

- (i) as a result of a planned **distribution network** outage; or
  - (ii) as a result of an unplanned **distribution network** outage; or
  - (iii) during a period when the **distribution network capacity** would otherwise be exceeded on part or all of the **distribution network**; or
- (b) **generating plant** that is only momentarily **synchronised**, or that a **participant** proposes only to momentarily **synchronise**, with the **distribution network** for the purpose of switching operations to start or stop the **generating plant**

Clause 1.1(1) **distributed generation**: substituted, on 23 February 2015, by clause 4(4)(b) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **distributed generation**: replaced, on 5 October 2017, by clause 4(1)(c) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**distributed generator**, for the purposes of Part 6, means a person who owns or operates, or intends to own or operate, **distributed generation**

Clause 1.1(1) **distributed generator**: amended, on 23 February 2015, by clause 4(5) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

**distributed unmetered load** means **unmetered load** with a single **profile** supplied across more than 1 **point of connection** to either 1 customer of a **retailer** or to 1 **direct purchaser**

Clause 1.1(1) **distributed unmetered load**: amended, on 1 November 2018, by clause 4(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

**distribution** has the meaning given to it by section 5 of the **Act**

Clause 1.1(1) **distribution**: inserted, on 1 February 2016, by clause 4(19) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

**distribution network** means the **electricity lines**, and **associated equipment**, owned or operated by a **distributor**

Clause 1.1(1) **distribution network**: amended, on 23 February 2015, by clause 4(6) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

**distribution network capacity** means the capacity of a **distribution network** to convey **electricity** under a range of load and **generation** conditions in accordance with **reasonable and prudent operating practice**

Clause 1.1(1) **distribution network capacity**: inserted, on 23 February 2015, by clause 4(12) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

**distributor** has the meaning given to it by section 5 of the **Act**

Clause 1.1(1) **distributor**: amended, on 21 September 2012, by clause 4(3) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

Clause 1.1(1) **distributor**: amended, on 23 February 2015, by clause 4(7) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **distributor**: amended, on 24 March 2015, by clause 4(1)(h) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

Clause 1.1(1) **distributor**: substituted, on 1 February 2016, by clause 4(1)(b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

**distributor agreement** means an agreement between a **distributor** and a **participant** trading on, connected to, or using the **distributor's network** or equipment connected to the **distributor's network**

Clause 1.1(1) **distributor agreement**: inserted, on 20 July 2020, by clause 4(3) of the Electricity Industry Participation Code Amendment (Default Distributor Agreement) 2020.

**distributor installation details** means any information, additional to **price category** and **chargeable capacity**, that may be used to calculate line charges applicable to an **ICP**

**distributor kvar reference node** means a notional node that represents a group of **grid exit points** within a **zone** for which a **distributor** nominates peak demand in kvar, and for which the individual kvar quantities measured at the individual **grid exit points** within the group are aggregated for **voltage support** charging purposes, as approved by the **system operator** (such approval not to be unreasonably withheld)

**document**, for the purposes of paragraph (b) of the definition of **publish**, and Parts 2 and 6, has the meaning given to it in section 2(1) of the Official Information Act 1982  
Clause 1.1(1) **document**: amended, on 16 December 2013, by clause 4(3)(a) and (b) of the Electricity Industry Participation (Revocation of Part 16) Code Amendment 2013.

**domestic consumer** *[Revoked]*

Clause 1.1(1) **domestic consumer**: revoked, on 1 March 2024, by clause 4(6) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

**draft policy statement** *[Revoked]*

Clause 1.1(1) **draft policy statement**: amended, on 10 January 2013, by clause 4(1) of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 1.1(1) **draft policy statement**: revoked, on 1 August 2023, by clause 4(2) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

**draft procurement plan** *[Revoked]*

Clause 1.1(1) **draft procurement plan**: amended, on 10 January 2013, by clause 4(2) of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 1.1(1) **draft procurement plan**: revoked, on 1 August 2023, by clause 4(3) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

**effective date**, for the purposes of subpart 5 of Part 13, means the date of the first **trading period** to which a **risk management contract** applies

**EIEP** means an electricity information exchange protocol that sets out standard formats for the exchange or provision of information

Clause 1.1(1) **EIEP**: inserted, on 16 December 2013, by clause 4(a) of the Electricity Industry Participation (Electricity Information Exchange Protocols) Code Amendment 2013.

Clause 1.1(1) **EIEP**: amended, on 1 February 2016, by clause 4(7) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

**EIEP12** *[Revoked]*

Clause 1.1(1) **EIEP12**: inserted, on 1 December 2011, by clause 4(a) of the Electricity Industry Participation Code (Distributor Use-of-System Agreements and Distributor Tariffs) Amendment 2011.

Clause 1.1(1) **EIEP12**: revoked, on 16 December 2013, by clause 4(b) of the Electricity Industry Participation (Electricity Information Exchange Protocols) Amendment 2013.

**EIE System** means an Electricity Information Exchange System being any system prescribed by the **Authority** under clause 11.32EG

Clause 1.1(1) **EIE System**: inserted, on 1 March 2020, by clause 4 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Information Requests by Agents) 2020.

Clause 1.1(1) **EIE System**: amended, on 1 March 2024, by clause 4(7) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

**electrical facility** means,—

(a) *[revoked]*

(b) all fittings that form part of a system for conveying **electricity** at any point from an **ICP** to any point from which **electricity** conveyed through that system may be consumed (including any fittings that are used or designed or intended for use by any person in, or in relation to, the generation of **electricity** for that person's use

and not for supply to any other person), but does not include any electrical appliance, —

and **electrical facilities** has a corresponding meaning

Clause 1.1(1) **electrical installation paragraph (a)**: revoked, on 23 February 2015, by clause 4(8)(a) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **electrical installation paragraph (b)**: amended, on 23 February 2015, by clause 4(8)(b) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **electrical installation paragraph (b)**: amended, on 5 October 2017, by clause 4(18) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1.1(1) **electrical facility paragraph (b)**: amended, on 1 March 2024, by clause 4(8) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

**electrically connect** means to operate a device so that **electricity** is able to flow, including through a **point of connection**, and **electrically connected**, **electrically connecting**, **electrical connection**, and similar phrases have corresponding meanings

Clause 1.1(1) **electrically connect**: inserted, on 5 October 2017, by clause 4(61) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**electrically connecting** [*Revoked*]

Clause 1.1(1) **electrically connecting**: inserted, on 29 August 2013, by clause 4(2) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 1.1(1) **electrically connecting**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **electrically connecting**: revoked, on 5 October 2017, by clause 4(60) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**electrically disconnect** means to operate a device so that **electricity** is unable to flow, including through a **point of connection**, and **electrically disconnected**, **electrically disconnecting**, **electrical disconnection**, and similar phrases have corresponding meanings

Clause 1.1(1) **electrically disconnect**: inserted, on 5 October 2017, by clause 4(61) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**electricity** means electrical energy measured in kilowatt-hours (kWh)

**electricity supplied** means, for any particular period, the information relating to the quantities of **electricity** supplied by **retailers** across **points of connection** to **consumers**, sourced directly from the **retailer's** financial records, including quantities—

- (a) that are metered or unmetered; and
- (b) supplied through normal customer supply and billing arrangements; and
- (c) supplied under sponsorship arrangements; and
- (d) supplied under any other arrangement

Clause 1.1(1) **electricity supplied**: amended, on 1 November 2018, by clause 4(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

**electronic signature** has the meaning given to it in section 209 of the Contract and Commercial Law Act 2017

Clause 1.1(1) **electronic signature**: inserted, on 1 March 2020, by clause 4 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Information Requests by Agents) 2020.

**embedded generating station** means 1 or more **generating units** that are directly connected to a **local network** or an **embedded network** and that injects into a **local network** or an **embedded network** at a single point of **injection**

Clause 1.1(1) **embedded generating station**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **embedded generating station**: amended, on 5 October 2017, by clause 4(19) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**embedded generator** means a **generator** who owns or operates 1 or more **embedded generating stations**

**embedded network** means equipment that is used, designed or intended for use in, or in connection with, the conveyance of **electricity**, and that—

- (a) is indirectly connected to the **grid** through 1 or more other **networks**; and
- (b) has 1 or more **ICP identifiers** recorded in the **registry** as being connected to it

Clause 1.1(1) **embedded network**: amended, on 1 February 2016, by clause 4(1)(c) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 1.1(1) **embedded network**: replaced, on 5 October 2017, by clause 4(20) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1.1(1) **embedded network**: amended, on 1 March 2024, by clause 4(9) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

**emergency management policy** means the emergency management policy that is incorporated by reference in this Code under clause 7.4

**EMP departure situation** means any situation in which the **system operator** believes on reasonable grounds that complying with the **emergency management policy** will not—

- (a) adequately mitigate an emergency situation; or
- (b) minimise risk to public safety or significant damage to **assets**

Clause 1.1(1) **EMP departure situation**: inserted, on 21 September 2012, by clause 4(4) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

**end date**, for the purposes of subpart 5 of Part 13, means the date of the final **trading period** to which the **risk management contract** applies

**energisation** *[Revoked]*

Clause 1.1(1) **energisation**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 1.1(1) **energisation**: substituted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 1.1(1) **energisation** paragraph (b): revoked, on 1 February 2016, by clause 4(8) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 1.1(1) **energisation**: revoked, on 5 October 2017, by clause 4(60) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**energy storage system** means all equipment functioning together as a single entity that is able to take **electricity** from a **network**, store the energy in another form, and provide **injection**

Clause 1.1(1) **energy storage system**: inserted, on 3 May 2022, by clause 4(1) of the Electricity Industry Participation Code Amendment (Enabling Energy Storage Systems to Offer Instantaneous Reserve) 2022.

**equivalence arrangement** means an arrangement put in place in accordance with the process set out in clauses 8.29 and 8.30

**equivalent day** *[Revoked]*

Clause 1.1(1) **equivalent day**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**error claimant** *[Revoked]*

Clause 1.1(1) **error claimant**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**error compensation** means the application of a predetermined **adjustment** or process to the data within or obtained from, a **metering component** or **metering installation** in order to correct such data for known errors in any **metering component**

Clause 1.1(1) **error compensation**: amended, on 29 August 2013, by clause 4(2)(j) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**estimated reading** means a value, used in the place of a **meter reading**, that is—

- (a) created using an estimation algorithm; and
- (b) not a **validated meter reading**

**event charge** means the amount calculated under clause 8.64

**event date**, in relation to an **ICP**, means the earlier of the following dates:

- (a) the date on which the gaining **trader** commences trading **electricity** at the **ICP** under clauses 1(1), 8(1) or 13(1) of Schedule 11.3:
- (b) the date on which the gaining **trader** otherwise assumes responsibility under clause 11.18(1) for the **ICP**

Clause 1.1(1) **event date**: substituted, on 1 February 2016, by clause 4(1)(d) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

**event log** means an automatically generated record of activity in a **data storage device**, that can be extracted or manually read as part of an **interrogation**

Clause 1.1(1) **event log**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**event of default** means any event listed in clause 14.41

Clause 1.1(1) **event of default**: amended, on 24 March 2015, by clause 4(1)(i) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

**exceptional circumstances** means, for the purposes of Part 15, circumstances in which access to the relevant **meter** is not achieved despite the **reconciliation participant's** best endeavours

**exchange** means an exchange included in a list **published** by the **Authority** on which New Zealand electricity base load futures contracts are available for trade

Clause 1.1(1) **exchange**: inserted, on 27 April 2021, by clause 4(1) of the Electricity Industry Participation Code Amendment (Hedge Market Arrangements) 2021.

**excluded Code information** means information—

- (a) that relates to **bids**, **offers**, **reserve offers**, or any **asset capability statement**; or
- (b) that is provided to the **Authority**, any investigator, or the **Rulings Panel** and that is required to be kept confidential under this Code or the **Act**; or
- (c) in relation to which the **Rulings Panel** has prohibited publication or communication

Clause 1.1(1) **excluded Code information** paragraph (a): substituted, on 1 October 2013, by clause 4(2) of the Electricity Industry Participation (Disclosure Obligations) Code Amendment 2013.

**excluded generating station** has the meaning set out in clause 8.21(1)

**existing assets** means transmission **assets** and **non-transmission projects** that have been **commissioned** before, and are in operation at the time of, application of a net benefits tests set out in Part 12. To avoid doubt, an investment in the expansion of generating capacity of an existing **generating unit** is not an **existing asset** or part of an **existing asset**, unless the additional generating capacity associated with the investment

has been **commissioned** before, and is in operation at the time of, the application of the relevant net benefits test

Clause 1.1(1) **existing assets**: amended, on 5 October 2017, by clause 4(21) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**expected interruption costs** [*Revoked*]

Clause 1.1(1) **expected interruption costs**: revoked, on 7 August 2014, by clause 4(2) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

**expected near-constraint arc flows** means the scheduled quantity of energy flow on a transmission line or a transformer, if the energy flow is equal to or greater than 95% of the maximum energy flow limit (in MW) of the transmission line or transformer as set by the **system operator** in accordance with Schedule 13.3

Clause 1.1(1) **expected near-constraint arc flows**: inserted, on 28 June 2012, by clause 4(a) of the Electricity Industry Participation (Demand-side Bidding and Forecasting) Code Amendment 2011.

**expected near-group-constraint arc flows** means the scheduled quantity of energy flow on a group of transmission **lines** or a group of transformers or a group of transmission **lines** and transformers, calculated according to a group constraint formula covering the group, if the scheduled quantity of energy flow is equal to or above 95% of the maximum energy flow limit (in MW) for the group as set by the **system operator** in accordance with Schedule 13.3

Clause 1.1(1) **expected near-group-constraint arc flows**: inserted, on 28 June 2012, by clause 4(a) of the Electricity Industry Participation (Demand-side Bidding and Forecasting) Code Amendment 2011.

Clause 1.1(1) **expected near-group-constraint arc flows**: amended, on 1 February 2016, by clause 4(9) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

**expected unserved energy** means a forecast of the aggregate amount by which the **demand** for electricity exceeds the **supply** of electricity at each **grid exit point** as a result of likely planned or unplanned outages of **primary transmission equipment**

**extended emergency situation** [*Revoked*]

Clause 1.1(1) **extended emergency situation**: revoked, on 21 September 2012, by clause 4(4) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

**export congestion** means a situation in which a **distribution network** is unable to accept **electricity** exported from **distributed generation** because the injection of an additional unit of **electricity** into the **distribution network** would—

- (a) directly cause a component in the **network** to operate beyond the component's rated maximum capacity; or
- (b) give rise to an unacceptably high level of voltage at the **point of connection** between the **distribution network** and the **distributed generation**

Clause 1.1(1) **export congestion**: inserted, on 23 February 2015, by clause 4(12) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **export congestion**: amended, on 5 October 2017, by clause 4(22) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**extended reserve** [*Revoked*]

Clause 1.1(1) **extended reserve**: inserted, on 7 August 2014, by clause 4(3) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 1.1(1) **extended reserve**: revoked, on 21 December 2021, by clause 4(3) of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**extended reserve manager** [*Revoked*]

Clause 1.1(1) **extended reserve manager**: inserted, on 7 August 2014, by clause 4(3) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 1.1(1) **extended reserve manager**: amended, on 5 October 2017, by clause 4(23) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1.1(1) **extended reserve manager**: amended, on 20 December 2021, by clause 4(5) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 1.1(1) **extended reserve manager**: revoked, on 21 December 2021, by clause 4(3) of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**extended reserve procurement notice** *[Revoked]*

Clause 1.1(1) **extended reserve procurement notice**: inserted, on 7 August 2014, by clause 4(3) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 1.1(1) **extended reserve procurement notice**: revoked, on 21 December 2021, by clause 4(3) of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**extended reserve procurement schedule** *[Revoked]*

Clause 1.1(1) **extended reserve procurement schedule**: inserted, on 7 August 2014, by clause 4(3) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 1.1(1) **extended reserve procurement schedule**: revoked, on 21 December 2021, by clause 4(3) of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**extended reserve provider** *[Revoked]*

Clause 1.1(1) **extended reserve provider**: inserted, on 7 August 2014, by clause 4(3) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 1.1(1) **extended reserve provider**: revoked, on 21 December 2021, by clause 4(3) of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**extended reserve schedule** *[Revoked]*

Clause 1.1(1) **extended reserve schedule**: inserted, on 7 August 2014, by clause 4(3) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 1.1(1) **extended reserve schedule**: revoked, on 21 December 2021, by clause 4(3) of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**extended reserve selection methodology** *[Revoked]*

Clause 1.1(1) **extended reserve selection methodology**: inserted, on 7 August 2014, by clause 4(3) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 1.1(1) **extended reserve selection methodology**: revoked, on 21 December 2021, by clause 4(3) of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**extended reserve technical requirements report** *[Revoked]*

Clause 1.1(1) **extended reserve technical requirements report**: inserted, on 7 August 2014, by clause 4(3) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 1.1(1) **extended reserve technical requirements report**: revoked, on 21 December 2021, by clause 4(3) of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**extended reserve technical requirements schedule** *[Revoked]*

Clause 1.1(1) **extended reserve technical requirements schedule**: inserted, on 7 August 2014, by clause 4(3) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 1.1(1) **extended reserve technical requirements schedule**: revoked, on 21 December 2021, by clause 4(3) of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**fast instantaneous reserve** means the increase in generation or reduction in **demand** (in MW) provided no later than 6 seconds, and measured at 6 seconds, after the start of a “Contingent Event” (as defined in the **policy statement**) and that is sustained until at least 60 seconds after the start of the “Contingent Event”

Clause 1.1(1) **fast instantaneous reserve**: amended, on 3 May 2022, by clause 4(3)(a) of the Electricity Industry Participation Code Amendment (Enabling Energy Storage Systems to Offer Instantaneous Reserve) 2022.

**final application**, for the purposes of Part 6, means an application made under clause 15 of Schedule 6.1

**final estimate** *[Revoked]*

Clause 1.1(1) **final estimate**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**final marginal location factor** means the factor that is determined by dividing the **final price** at any **grid exit point** or **grid injection point** by the **final price** at the relevant **reference point**

**final price** means an **interim price** that becomes a **final price** in accordance with clause 13.182A or 13.182B

Clause 1.1(1) **final price**: amended, on 1 November 2022, by clause 4(6)(a) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**final reserve price** means an **interim reserve price** that becomes a **final reserve price** in accordance with clause 13.182A or 13.182B

Clause 1.1(1) **final reserve price**: amended, on 1 November 2022, by clause 4(6)(b) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**financial year** means, except in Part 6A and Schedule 12.4, the **financial year** adopted by a **participant** from time to time, being a 12 month period as a **participant** determines

Clause 1.1(1) **financial year**: revoked, on 5 October 2017, by clause 4(60) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1.1(1) **financial year**: inserted, on 30 November 2021, by clause 4 of the Electricity Industry Participation Code Amendment (Internal Transfer Prices and Segmented Profitability Reporting) 2021.

Clause 1.1(1) **financial year**: amended, on 1 March 2024, by clause 4(10) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

**fittings** *[Revoked]*

Clause 1.1(1) **fittings**: revoked, on 23 February 2015, by clause 4(11) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

**fixed-price physical supply contract** means a contract that provides for the physical supply of **electricity**, if—

- (a) the **buyer** is reasonably expected to purchase 1 **MW** or more of **electricity** on average during the **term** of the contract (for the purposes of determining whether a contract meets this 1 **MW** threshold, the total purchases under the contract must be used; and
- (b) the contract allows the **buyer** to purchase either—
  - (i) variable amounts of **electricity** linked to actual consumption or generation of **electricity** at a fixed price or prices; or
  - (ii) a fixed amount of **electricity** at a fixed price or prices; and
- (c) excludes a contract for the physical supply of **electricity**, that is generated by an **embedded generating station**, directly to a **consumer**

Clause 1.1(1) **fixed-price physical supply contract**: paragraphs (a) and (b) amended, on 30 October 2024, by clause 4(6) of the Electricity Industry Participation Code Amendment (Hedge Disclosure Obligations) 2024.

**flagged**, in relation to a **dispatch instruction** issued to an **intermittent generator**, means an indication on the **dispatch instruction** that it is a **dispatch instruction** of the kind described in clause 13.73(1A), and **flag** has a corresponding meaning

Clause 1.1(1) **flagged**: inserted, at 12.00 pm on 19 September 2019, by clause 4(5) of the Electricity Industry Participation Code Amendment (Wind Offer Arrangements) 2019.

**floating-price payer** means the **party** obliged to make 1 or more payments, from time to time during the **term** of a **risk management contract**, of a floating amount for a **quantity of electricity**

Clause 1.1(1) **floating-price payer**: amended, on 30 October 2024, by clause 4(7) of the Electricity Industry Participation Code Amendment (Hedge Disclosure Obligations) 2024.

**force majeure clause**, for the purposes of subpart 5 of Part 13, means a clause in a **risk management contract** under which some or all obligations may be suspended and/or the **risk management contract** may terminate due to 1 or more events (not being events specified in a **suspension clause**) beyond the control of the **party** and that could not reasonably have been foreseen, including—

- (a) any event or circumstance occasioned by, or in consequence of, any act of God (being an event or circumstance—
  - (i) due to natural causes, directly or indirectly and exclusively without human intervention; and
  - (ii) that could not reasonably have been foreseen or if foreseen, could not reasonably have been resisted); or
- (b) strikes, lockouts, other industrial disturbances, acts of public enemy, wars, blockades, insurrections, riots, epidemics, or civil disturbances; or
- (c) the binding order of any court, government or a local authority beyond the control of the **party**

**force majeure event**, for the purposes of Parts 3 and 4,—

- (a) means an event or circumstance beyond the reasonable control of a **market operation service provider** or **ancillary service agent** that results in, or causes, the **market operation service provider** or **ancillary service agent** to be unable to perform any of its obligations under this Code or the Electricity Industry (Enforcement) Regulations 2010; and
- (b) includes (without limitation)—
  - (i) fire, flood, storm, earthquake, landslide, volcanic eruption, or other act of God; and
  - (ii) explosion or nuclear, biological, or chemical contamination; and
  - (iii) sabotage, terrorism, or act of war (whether declared or not); and
- (c) includes an act or omission by a party to an agreement with a **market operation service provider** (not being the **Authority**) or an **ancillary service agent** only if—
  - (i) the act or omission is a breach of an obligation under the agreement; and
  - (ii) the obligation is in all material respects the same as an obligation in the **market operation service provider agreement**, or the **ancillary service agent's** agreement with the **system operator**; and
  - (iii) the act or omission would have been a **force majeure event** if it had been an act or omission of the **market operation service provider** or **ancillary service agent** and not an act or omission of the party; and
- (d) does not include that a **market operation service provider**, **ancillary service agent**, or other person—
  - (i) is unable or unwilling to pay any amount necessary to meet the obligations under this Code or the Electricity Industry (Enforcement) Regulations 2010; or
  - (ii) is unable to pay its debts; or

- (iii) calls a meeting for the purpose of Part 14 of the Companies Act 1993; or
  - (iv) is adjudicated bankrupt; or
  - (v) in the case of a company, society, or partnership, has a receiver or statutory manager or similar person appointed in respect of it or of all or any of its assets; or
  - (vi) is put into liquidation; and
- (e) does not include an event that could have been prevented by the **market operation service provider** or **ancillary service agent** by the exercise of a reasonable standard of care

Clause 1.1(1) **force majeure event**: substituted, on 1 November 2012, by clause 4 of the Electricity Industry Participation (Force Majeure) Code Amendment 2012.

**forecast marginal location factor** means the factor that is determined by dividing the **forecast price** at any **grid exit point** or **grid injection point** by the **forecast price** at the relevant **reference point**

**forecast of generation potential** means, in relation to an **intermittent generating station**, an **intermittent generator's** estimate of the **electricity** (specified in **MW**) it will generate during a **trading period**, if—

- (a) the **system operator** issues **dispatch instructions** to the **intermittent generator** for the **intermittent generating station** for the **trading period**; and
- (b) none of the **dispatch instructions** are **flagged** in accordance with clause 13.73(1A)

Clause 1.1(1) **forecast of generation potential**: inserted, at 12.00 pm on 19 September 2019, by clause 4(5) of the Electricity Industry Participation Code Amendment (Wind Offer Arrangements) 2019.

**forecast price** means the price for **electricity** at each **grid exit point**, each **grid injection point**, and each **reference point** scheduled in the **price-responsive schedule** or the **non-response schedule** (whichever is the case) in dollars and cents

Clause 1.1(1) **forecast prices**: substituted, on 28 June 2012, by clause 4(e) of the Electricity Industry Participation (Demand-side Bidding and Forecasting) Code Amendment 2011.

Clause 1.1(1) **forecast price**: amended, on 1 November 2022, by clause 4(6)(c) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**forecast reserve prices** means the prices for **fast instantaneous** and **sustained instantaneous reserve** for each **island** scheduled in the **price-responsive schedule** or the **non-response schedule** (whichever is relevant) in dollars and cents

Clause 1.1(1) **forecast reserve prices**: substituted, on 28 June 2012, by clause 4(f) of the Electricity Industry Participation (Demand-side Bidding and Forecasting) Code Amendment 2011.

**formal notice** means a notice issued by the **system operator** in accordance with clause 5 of **Technical Code B** of Schedule 8.3

Clause 1.1(1) **formal notice**: amended, on 1 June 2013, by clause 4(b) of the Electricity Industry Participation (Scarcity Pricing) Code Amendment 2011.

**forward estimate** means, in relation to non **half hour** metered **ICPs**, any **volume information** (in kWh) submitted for a part or full **consumption period** that is not an **historical estimate**

**frequency fluctuation** means a deviation in frequency outside the **normal band**

Clause 1.1(1) **frequency fluctuation**: inserted, on 19 May 2016, by clause 4(2) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

**frequency keeping** means an **ancillary service** that maintains the system frequency within the **normal band**

**frequency keeping unit** means any equipment that provides **frequency keeping services**

Clause 1.1(1) **frequency keeping unit**: inserted, on 3 October 2013, by clause 4 of the Electricity Industry Participation (Technology Neutral Language in Frequency Keeping) Code Amendment 2013.

**frequency time error** [*Revoked*]

Clause 1.1(1) **frequency time error**: revoked, on 19 May 2016, by clause 4(1) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

**FTR** means a financial transmission right created under subpart 6 of Part 13

Clause 1.1(1) **FTR**: inserted, on 1 October 2011, by clause 4(1) of the Electricity Industry Participation (Financial Transmission Rights) Code Amendment 2011.

**FTR account** [*Revoked*]

Clause 1.1(1) **FTR account**: inserted, on 1 October 2011, by clause 4(1) of the Electricity Industry Participation (Financial Transmission Rights) Code Amendment 2011.

Clause 1.1(1) **FTR account**: revoked, on 24 March 2015, by clause 4(1)(j) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

**FTR acquisition cost** means—

- (a) the amount a **participant** owes or is owed in respect of the acquisition of an **FTR** in an **FTR auction**; or
- (b) if an **FTR** has been assigned by the first holder of the **FTR**, the amount that becomes owing under clause 13.249(3); or
- (c) an amount described in paragraph (a) or (b) that is adjusted under clause 13.242A

Clause 1.1(1) **FTR payment**: inserted, on 1 October 2011, by clause 4(1) of the Electricity Industry Participation (Financial Transmission Rights) Code Amendment 2011.

Clause 1.1(1) **FTR payment**: amended to **FTR acquisition cost**, on 1 November 2012, by clause 4(2) of the Electricity Industry Participation (Financial Transmission Rights) Code Amendment 2012.

Clause 1.1(1) **FTR acquisition cost**: amended, on 1 November 2014, by clause 4(2) of the Electricity Industry Participation (FTR Reconfiguration Auctions) Code Amendment 2014.

Clause 1.1(1) **FTR acquisition cost**: amended, on 24 March 2015, by clause 4(1)(l) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

**FTR allocation plan** means the FTR allocation plan prepared and **published** by the **FTR manager** under clause 13.238

Clause 1.1(1) **FTR allocation plan**: inserted, on 1 October 2011, by clause 4(1) of the Electricity Industry Participation (Financial Transmission Rights) Code Amendment 2011.

**FTR auction** means an auction conducted by the **FTR manager** in accordance with the **FTR allocation plan** approved under subpart 6 of Part 13

Clause 1.1(1) **FTR auction**: inserted, on 1 October 2011, by clause 4(1) of the Electricity Industry Participation (Financial Transmission Rights) Code Amendment 2011.

**FTR hedge value** means the gross amount that becomes due and owing by the **clearing manager** or the holder of an **FTR** on the settlement of the **FTR** in accordance with the terms of the **FTR** (excluding the **FTR acquisition cost** and any amount owing under clause 13.249(4) or (7))

Clause 1.1(1) **FTR hedge value**: inserted, on 1 November 2012, by clause 4(1) of the Electricity Industry Participation (Financial Transmission Rights) Code Amendment 2012.

Clause 1.1(1) **FTR hedge value**: amended, on 24 March 2015, by clause 4(1)(k) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

**FTR manager** means the **market operation service provider** for the time being appointed as the FTR manager under this Code

Clause 1.1(1) **FTR manager**: inserted, on 1 October 2011, by clause 4(1) of the Electricity Industry Participation (Financial Transmission Rights) Code Amendment 2011.

Clause 1.1(1) **FTR payment**: inserted, on 1 October 2011, by clause 4(1) of the Electricity Industry Participation (Financial Transmission Rights) Code Amendment 2011.

Clause 1.1(1) **FTR payment**: amended to **FTR acquisition cost**, on 1 November 2012, by clause 4(2) of the Electricity Industry Participation (Financial Transmission Rights) Code Amendment 2012.

Clause 1.1(1) **FTR manager**: amended, on 5 October 2017, by clause 4(24) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1.1(1) **FTR manager**: amended, on 20 December 2021, by clause 4(7) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

**FTR period means a period for which an FTR applies**

Clause 1.1(1) **FTR period**: inserted, on 1 October 2011, by clause 4(1) of the Electricity Industry Participation (Financial Transmission Rights) Code Amendment 2011.

**FTR reconfiguration amount means the amount a participant that sells a reconfigured FTR—**

- (a) is entitled to be paid for the **reconfigured FTR**, if the amount is positive; or
- (b) is liable to pay in respect of the **reconfigured FTR**, if the amount is negative

Clause 1.1(1) **FTR reconfiguration amount**: inserted, on 1 November 2014, by clause 4(1) of the Electricity Industry Participation (FTR Reconfiguration Auctions) Code Amendment 2014.

**FTR reconfiguration auction means an FTR auction that allows a holder of an FTR to offer for sale a portion of the FTR expressed in terms of all or a specified amount of the electricity (in MW) to which the FTR relates**

Clause 1.1(1) **FTR reconfiguration auction**: inserted, on 1 November 2014, by clause 4(1) of the Electricity Industry Participation (FTR Reconfiguration Auctions) Code Amendment 2014.

**FTR register means the register created and operated by the FTR manager under clause 13.247**

Clause 1.1(1) **FTR register**: inserted, on 1 October 2011, by clause 4(1) of the Electricity Industry Participation (Financial Transmission Rights) Code Amendment 2011.

**fully calibrated certification means certification of a metering installation under clause 13(3) of Schedule 10.7**

Clause 1.1(1) **fully calibrated certification**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**fully certified metering installation means a metering installation that has been certified other than an interim certified metering installation**

Clause 1.1(1) **fully certified metering installation**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 1.1(1) **fully certified metering installation**: amended, on 20 December 2021, by clause 4(6) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

**gaining metering equipment provider means, for the purposes of Parts 10 and 11,—**

- (a) the person who a **trader** records in the **registry** as the **metering equipment provider** for each **metering installation** for a **point of connection**; or
- (b) the person with whom the **participant** responsible for ensuring there is a **metering installation** for a **point of connection** enters into an arrangement to become the **metering equipment provider** for each **metering installation** for the **point of connection**

Clause 1.1(1) **gaining metering equipment provider**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 1.1(1) **gaining metering equipment provider**: amended, on 5 October 2017, by clause 4(25) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**gaining retailer** means a **retailer** who has entered into an arrangement to supply **electricity** to a person where, at the time the arrangement is entered into, the person is a customer of another **retailer** (being a **losing retailer**)

Clause 1.1(1) **gaining retailer**: inserted, on 31 March 2020, by clause 4 of the Electricity Industry Participation Code Amendment (Prohibition of Save and Win-Back Approaches by Losing Retailers During a Switch Protected Period) 2020.

**gate closure period**, in relation to a **trading period** for which a **generator** or **ancillary service agent** has submitted an **offer** or **reserve offer**, or for which a **dispatchable load purchaser** has submitted a **nominated dispatch bid**, means—

- (a) the **trading period** to which the **offer** or **reserve offer** relates, and the **trading period** immediately preceding that **trading period** for—
  - (i) an **embedded generator**;
  - (ii) an **ancillary service agent** that is also an **embedded generator**;
  - (iii) a **dispatch notification purchaser**;
  - (iv) a **dispatch notification generator**; and
- (b) the **trading period** to which the **offer**, **reserve offer**, or **nominated dispatch bid** relates, and the 2 **trading periods** immediately preceding that **trading period**, for—
  - (i) any other **generator**;
  - (ii) any other **ancillary service agent**;
  - (iii) a **dispatchable load purchaser** (other than a **dispatch notification purchaser**)

Clause 1.1(1) **gate closure period**: inserted, on 29 June 2017, by clause 4(3) of the Electricity Industry Participation Code Amendment (Shortened Gate Closure and Revised Bid and Offer Provisions) 2017.

Clause 1.1(1) **gate closure period** paragraph (a)(ii): revoked, at 12.00 pm on 19 September 2019, by clause 4(2) of the Electricity Industry Participation Code Amendment (Wind Offer Arrangements) 2019.

Clause 1.1(1) **gate closure period**: amended, on 1 November 2022, by clause 4(6)(d) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**generally available retail tariff plan**—

- (a) means a retail tariff plan that a **retailer** will make available to any **consumer** (subject to credit requirements) if the **consumer** satisfies the requirements specified for the retail tariff plan relating to:
  - (i) physical location;
  - (ii) **metering** configuration;
  - (iii) **price category** code; but
- (b) does not include a retail tariff plan made available by a **retailer** only under an agreement reached as a result of the **retailer** directly contacting a **consumer** to offer a retail tariff plan that provides the **consumer** with a financial discount or other benefit when compared with any other of the **retailer's** tariff plans to which paragraph (a) applies that are available to that **consumer**

Clause 1.1(1) **generally available retail tariff plan**: inserted, on 1 February 2016, by clause 4 of the Electricity Industry Participation Code Amendment (Access to Retail Tariff Information) 2015.

**generating plant** means equipment collectively used for generating **electricity**

**generating station** means 1 or more **generating units** that are directly connected to the **grid** or to a **local network** and that inject into the **grid** or a **local network** (as the case may be) at a single point of **injection**

Clause 1.1(1) **generating station**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **generating station**: amended, on 5 October 2017, by clause 4(26) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**generating unit** means all equipment functioning together as a single entity to produce **electricity**

Clause 1.1(1) **generating unit**: amended, on 20 March 2020, by clause 4(2) of the Electricity Industry Participation Code Amendment (Broadening Definitions of Generating Unit and Intermittent Generating Station) 2020

**generating unit gross** means the output of a **generating unit** measured or calculated at its output terminals, inclusive of any **generating unit load** supplied

Clause 1.1(1) **generating unit gross**: inserted, on 1 June 2011, by clause 4(1) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2011.

**generating unit load** means the active and **reactive power** supplied or injected via connections between the **generating unit's** output terminals and its **generating unit circuit breaker**

Clause 1.1(1) **generating unit load**: inserted, on 1 June 2011, by clause 4(1) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2011.

Clause 1.1(1) **generating unit load**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **generating unit load**: amended, on 5 October 2017, by clause 4(27) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**generating unit net** means the output of a **generating unit** measured or calculated at its **point of connection**, but does not include **generating unit load** or any other active or **reactive power** supplied (including **losses**) between the **generating unit** and the **point of connection**

Clause 1.1(1) **generating unit net**: inserted, on 1 June 2011, by clause 4(1) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2011.

Clause 1.1(1) **generating unit net**: amended, on 20 December 2021, by clause 4(8) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

**generation reserve** means a form of **instantaneous reserve** (including, without limitation, **partly loaded spinning reserve, tail water depressed reserve** and that provided by **energy storage systems**) which comprises generating capacity that is able to provide **fast instantaneous reserve** or **sustained instantaneous reserve** in accordance with the **procurement plan**.

Clause 1.1(1) **generation reserve**: inserted, on 3 May 2022, by clause 4(1) of the Electricity Industry Participation Code Amendment (Enabling Energy Storage Systems to Offer Instantaneous Reserve) 2022.

**generator** means, except in Part 6A, a person who owns **generating units** connected to a **network**, or any person who acts, in respect of Parts 13, 14 and 15, on behalf of any person who owns such **generating units**, and includes **embedded generators, intermittent generators, type A co-generators, and type B co-generators**

Clause 1.1(1) **generator**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **generator**: amended, on 27 May 2015, by clause 4(2) of the Electricity Industry Participation Code Amendment (Industrial Co-generation Dispatch Arrangements) 2015.

Clause 1.1(1) **generator**: amended, on 5 October 2017, by clause 4(28) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1.1(1) **generator**: amended, on 1 March 2024, by clause 4(11) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

**generator retailer** means a **trader** who is both a **generator** and a **retailer** and in any month of the **financial year** of the **generator retailer**:

- (a) has sold to the **clearing manager** an amount of **electricity** at least equivalent to 5% of the total amount of **electricity** sold in any of those months by all **generators** who are **traders** to the **clearing manager**, as measured in **MWh**; and
- (b) was recorded in the **registry** in any of those months as being responsible for at least 5% of the total number of **ICPs** registered in the registry with an **ICP** status of “Active”,—

and, for the purposes of this definition, the terms “**trader**”, “**generator**” and “**retailer**” include any related company, as defined in section 2 of the Companies Act 1993, of a **participant** provided that the related company is a **participant**

Clause 1.1(1) **generator retailer**: inserted, on 30 November 2021, by clause 4 of the Electricity Industry Participation Code Amendment (Internal Transfer Prices and Segmented Profitability Reporting) 2021.

**good electricity industry practice** in relation to transmission, means the exercise of that degree of skill, diligence, prudence, foresight and economic management, as determined by reference to good international practice, which would reasonably be expected from a skilled and experienced **asset owner** engaged in the management of a transmission **network** under conditions comparable to those applicable to the **grid** consistent with applicable law, safety and environmental protection. The determination is to take into account factors such as the relative size, duty, age and technological status of the relevant transmission **network** and the applicable law

Clause 1.1(1) **good electricity industry practice**: amended, on 20 December 2021, by clause 4(9)(a) and (b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

**grid** means the system of transmission **lines**, substations and other works, including the **HVDC link** used to connect **grid injection points** and **grid exit points** to convey **electricity** throughout the North Island and the South Island of New Zealand

Clause 1.1(1) **grid**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **grid**: amended, on 1 February 2016, by clause 4(10) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 1.1(1) **grid**: amended, on 5 October 2017, by clause 4(29) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**grid economic investment report** means the report prepared under clause 12.115, either as part of **Transpower’s** annual planning report or in some other form, if the **Authority** so determines

**grid emergency** means a situation where—

- (a) in the reasonable opinion of the **system operator**, 1 or more of the events set out in clause 5(1) of **Technical Code B** of Schedule 8.3 has occurred, or is reasonably expected to occur and urgent action is required of the **system operator** or **participants** to alleviate the situation; or
- (b) independent action (as set out in clause 9 of **Technical Code B** of Schedule 8.3) is required of a **participant** to alleviate the situation

**grid exit point** and **GXP** mean any **point of connection** on the **grid**—

- (a) at which **electricity** predominantly flows out of the **grid**; or
- (b) determined as being such by the **Authority** following an application in accordance with clause 13.28,—

and such **point of connection** may, at any given time, be a **grid exit point** or a **grid injection point**, but may not be both at the same time

**grid injection point** and **GIP** mean any **point of connection** on the **grid** at which **electricity** predominantly flows into the **grid**. A **point of connection** may, at any given time, be a **grid injection point** or a **grid exit point**, but may not be both at the same time

**grid interface** means the **assets** used to make a connection to the **grid** (as the case may be), including associated protection, control and communication systems. The term includes the interface between **assets** forming part of the **grid**

Clause 1.1(1) **grid interface**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **grid interface**: amended, on 5 October 2017, by clause 4(30) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**grid owner** means a person who owns or operates any part of the **grid**

**grid reliability report** means a report on grid reliability **published** by **Transpower** under clause 12.76(1)

**grid reliability standards** means standards for reliability of the **grid** developed in accordance with clauses 12.55 to 12.58, 12.61 and 12.62

**grid zone area** means a geographical area, which includes many **nodes**, as determined by the **Authority** and **published** under clause 13.221(1)

**group constraint formula** means the mathematical formula applied by the **system operator**, in accordance with Schedule 13.3, to constrain the energy flows on a group of transmission **lines**, transformers or both

Clause 1.1(1) **group constraint formula**: amended, on 1 February 2016, by clause 4(11) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

**GST** means goods and services tax payable under the Goods and Services Tax Act 1985

**half hour** means a thirty minute period ending on any hour or half hour, and **half hourly** has a corresponding meaning

**half-hour metering** means the process of measuring and recording information—

- (a) relating to **electricity** conveyed; and
- (b) during—
  - (i) an interval that is a **trading period**; or
  - (ii) intervals that can be aggregated to 1 **trading period**

Clause 1.1(1) **half-hour metering**: substituted, on 29 August 2013, by clause 4(2)(k) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**half-hour metering information**—

- (a) means information describing the quantity of **electricity** conveyed in each **trading period** that is—
  - (i) recorded directly by a **metering installation**; or
  - (ii) calculated or estimated using information recorded directly by a **metering installation**; and

- (b) in respect of a **generator** that is selling **electricity** to the **clearing manager** and other persons at the same **grid injection point** in the same **trading period**, includes the file recording the quantity of **electricity** sold to the **clearing manager** during each such **trading period** constructed in accordance with **dispatch instructions** issued by the **system operator** under this Code.

Clause 1.1(1) **half-hour metering information**: substituted, on 19 December 2014, by clause 4(2) of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.

**half-hour metering installation** means a **metering installation** used for **half-hour metering**

Clause 1.1(1) **half-hour metering installation**: amended, on 29 August 2013, by clause 4(2)(l) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**hedge settlement agreement** means an agreement in a form set out in Schedule 14.4 between **participants** that provides for settlement by the **clearing manager** of payments for differences in respect of the price of **electricity**

Clause 1.1(1) **hedge settlement agreement**: amended, on 24 March 2015, by clause 4(1)(m) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

**high spring washer price relaxation factor** *[Revoked]*

Clause 1.1(1) **high spring washer price relaxation factor**: amended, on 21 September 2012, by clause 4(1) of the Electricity Industry Participation (High Spring Washer Price Situation) Code Amendment 2012.

Clause 1.1(1) **high spring washer price relaxation factor**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**high spring washer price situation** *[Revoked]*

Clause 1.1(1) **high spring washer price situation**: amended, on 21 September 2012, by clause 4(2) of the Electricity Industry Participation (High Spring Washer Price Situation) Code Amendment 2012.

Clause 1.1(1) **high spring washer price situation**: amended, on 5 October 2017, by clause 4(31) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1.1(1) **high spring washer price situation**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**high spring washer price situation methodology** *[Revoked]*

Clause 1.1(1) **high spring washer price situation methodology**: amended, on 21 September 2012, by clause 4(3) of the Electricity Industry Participation (High Spring Washer Price Situation) Code Amendment 2012.

Clause 1.1(1) **high spring washer price situation methodology**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**high spring washer price trigger ratio** *[Revoked]*

Clause 1.1(1) **high spring washer price trigger ratio**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**high voltage terminal** means the point at which the higher voltage side of a **grid owner's** transformer connects to the **grid**

Clause 1.1(1) **high voltage terminal**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **high voltage terminal**: amended, on 5 October 2017, by clause 4(32) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**historical annual consumption** *[Revoked]*

Clause 1.1(1) **historical annual consumption**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**historical estimate** means, in relation to non **half hour** metered **ICPs**, **volume information** (in kWh)—

- (a) apportioned to part or full **consumption periods** after having applied—

- (i) the **seasonal adjustment shape**; or
  - (ii) any other **profile** that has, from time to time, been approved by the **Authority** for this purpose; or
  - (iii) any other **profile** permitted under clause 5 of Schedule 15.3; and
- (b) being 1 of the following:
- (i) the difference between 2 actual **validated meter readings**;
  - (ii) the difference between 2 **permanent estimates**;
  - (iii) any relevant **unmetered load**;
  - (iv) the difference between a **validated meter reading** and a **permanent estimate**

Clause 1.1(1) **historical estimate**: amended, on 1 February 2019, by clause 4(4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 1.1(1) **historical estimate**: replaced, on 31 December 2021, by clause 4(10) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

**hub** means a **node** or group of **nodes** (and in the case of a group of **nodes**, **nodes** in the group may be given different weightings) identified as either hub A or hub B in an **FTR**

Clause 1.1(1) **hub**: inserted, on 1 October 2011, by clause 4(1) of the Electricity Industry Participation (Financial Transmission Rights) Code Amendment 2011.

**HV**, for the purposes of subparts 2, 6 and 7 of Part 12, means high voltage

**HVDC component flows** means the quantity of energy flow on each component of the **HVDC link** as calculated by the modelling system in accordance with the model formulation set out in the **system operator's market operation service provider agreement** (as amended from time to time)

**HVDC injection point** means the point at which **electricity** is injected into the North Island or the South Island from the **HVDC link**

**HVDC link** means the converter stations at Benmore in the South Island and Haywards in the North Island and the high voltage transmission **lines** and undersea cables linking them (and including all associated equipment)

Clause 1.1(1) **HVDC link**: amended, on 1 February 2016, by clause 4(12) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

**HVDC link configuration** means the following modes of operation of the **HVDC link**:

- (a) *[Revoked]*
- (b) Pole 2 only:
- (c) Pole 3 only:
- (d) *[Revoked]*
- (e) Pole 3 and Pole 2 bipole **round power**:
- (f) Pole 3 and Pole 2 bipole **not round power**

Clause 1.1 **configuration**: substituted, on 1 July 2012, by clause 4(2) of the Electricity Industry Participation (HVDC Pole 3 Minor Amendments) Code Amendment 2012.

Clause 1.1(1) **HVDC link configuration**: amended, on 1 March 2024, by clause 4(4)(a) and (b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Clause 1.1(1) **HVDC link configuration** (a) and (d): revoked, on 1 March 2024, by clause 4(4)(c) and (d) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024

**HVDC owner** means the **grid owner** who owns and/or operates the **HVDC link**

**HVDC risk offsets** means the values by which HVDC flows are adjusted by the **system operator** to determine the relevant reserve risk on the **HVDC link**

**ICP** means an installation control point being 1 of the following:

- (a) a **point of connection** at which the **electrical facility** for a **retailer's** customer is connected to a **network** other than the **grid**;
- (b) a **point of connection** between a **network** and an **embedded network**;
- (c) a **point of connection** between a **network** and **shared unmetered load**

Clause 1.1(1) **ICP**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **ICP**: amended, on 5 October 2017, by clause 4(33) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1.1(1) **ICP**: amended, on 1 November 2018, by clause 4(5) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 1.1(1) **ICP**: amended, on 1 March 2024, by clause 4(12) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

**ICP day** means any day when an **ICP** with the **installation type** L or B is recorded on the **registry** as having the status of Active

Clause 1.1(1) **ICP day**: amended, on 5 October 2017, by clause 4(34) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**ICP identifier** means a unique identifier for an **ICP** created by a **distributor** in accordance with clause 1 of Schedule 11.1

**identification costs** means any reasonable identification and testing costs incurred by the **system operator** in accordance with clause 8.3 that are unable to be recovered from **participants** by the **system operator**

**incremental costs**, for the purpose of Part 6, means:

- (a) the reasonable additional costs (which include any reasonable additional transmission costs) that an efficient **distributor** would incur in providing **electricity** distribution services to **distributed generation**; minus
- (b) the **distribution** costs (which do not include any transmission costs) that an efficient **distributor** would be able to avoid as a result of the **electrical connection** of the **distributed generation**.

Clause 1.1(1) **incremental costs**: inserted, on 23 February 2015, by clause 4(12) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **incremental costs**: amended, on 5 October 2017, by clause 4(35) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1.1(1) **incremental costs**: amended, on 1 April 2023, by clause 4 of the Electricity Industry Participation Code Amendment (Avoided Cost of Transmission) 2022.

**industrial co-generating station** means a **generating station** that —

- (a) *[Revoked]*
- (b) is reliant on a co-located **industrial process** because—
  - (i) it derives its fuel source from that co-located **industrial process**; or
  - (ii) it provides some or all of the **electricity** that it generates to that co-located **industrial process**; or
  - (iii) it provides some or all of any by-product of generating **electricity** to that co-located **industrial process**; and
- (c) is tightly coupled to an **industrial process**; and

(d) has been approved by the **Authority** under clause 8(1)(a) of Schedule 13.4

Clause 1.1(1) **industrial co-generating station**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **industrial co-generating station**: amended, on 27 May 2015, by clause 4(3)(a) of the Electricity Industry Participation Code Amendment (Industrial Co-generation Dispatch Arrangements) 2015.

Clause 1.1(1) **industrial co-generating station** paragraph (a): revoked, on 27 May 2015, by clause 4(3)(b) of the Electricity Industry Participation Code Amendment (Industrial Co-generation Dispatch Arrangements) 2015.

Clause 1.1(1) **industrial co-generating station** paragraph (b): amended, on 27 May 2015, by clause 4(3)(c) of the Electricity Industry Participation Code Amendment (Industrial Co-generation Dispatch Arrangements) 2015.

Clause 1.1(1) **industrial co-generating station** paragraph (c): amended, on 27 May 2015, by clause 4(3)(d) of the Electricity Industry Participation Code Amendment (Industrial Co-generation Dispatch Arrangements) 2015.

Clause 1.1(1) **industrial co-generating station** paragraph (d): amended, on 27 May 2015, by clause 4(3)(e) of the Electricity Industry Participation Code Amendment (Industrial Co-generation Dispatch Arrangements) 2015.

**industrial process** means a process that has a primary purpose of producing an output other than **electricity**

**infeasibility situation** *[Revoked]*

Clause 1.1(1) **infeasibility situation**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**information system** *[Revoked]*

Clause 1.1(1) **information system**: revoked, on 5 October 2017, by clause 4(60) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**inherent characteristics** means the permanent and fundamental characteristics of an **asset** that are outside the reasonable control of the **asset owner** and affect the output or response of that **asset** and includes the effects of water temperature, ambient air temperature and performance during ramping on **asset** performance

**initial application**, for the purposes of Part 6, means an application under clause 11 of Schedule 6.1

**initial estimate** *[Revoked]*

Clause 1.1(1) **initial estimate**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**injection** means the flow of **electricity** into a **network**

**input connection contract** *[Revoked]*

Clause 1.1(1) **input connection contract**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **input connection contract**: amended, on 5 October 2017, by clause 4(36) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1.1(1) **input connection contract**: revoked, on 1 April 2023, by clause 4 of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Related Amendments) (No 2) 2022.

**input information** *[Revoked]*

Clause 1.1(1) **input information**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**installation type** means a category based on whether an **ICP** consumes **electricity**, generates **electricity**, or both consumes and generates **electricity**

**instantaneous reserve** means an **ancillary service** provided to balance the injection of **electricity** into the **grid** with the offtake of **electricity** from the **grid** following a drop in system frequency to the level specified in the **procurement plan**, comprising 1 or more of the following:

(a) **interruptible load**:

**(b) generation reserve**

Clause 1.1(1) **instantaneous reserve**: amended, on 3 May 2022, by clause 4(3)(b) of the Electricity Industry Participation Code Amendment (Enabling Energy Storage Systems to Offer Instantaneous Reserve) 2022.

**interconnecting transformer** means a transformer (other than a transformer that is required to supply **demand to distributors** or **direct consumers**) that allows for the transfer of power within the grid between any of the following voltage levels:

- (a) 220kV:
- (b) 110kV:
- (c) 66kV:
- (d) 50kV

**interconnection asset**, for the purposes of subparts 2, 6 and 7 of Part 12—

- (a) has the meaning set out in the **transmission pricing methodology**; and
- (b) includes the **HVDC link**

**interconnection branch** means an **interconnection circuit branch**, and an **interconnection transformer branch**

**interconnection circuit branch** means a **circuit branch** that comprises or includes **interconnection assets**

**interconnection point** means a **point of connection** between—

- (a) a **local network** and any other **local network**; or
- (b) an **embedded network** that is not a gateway **NSP** and a **local network**; or
- (c) an **embedded network** that is not a gateway **NSP** and any other **embedded network**

Clause 1.1(1) **interconnection point**: substituted, on 29 August 2013, by clause 4(2)(m) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**interconnection transformer branch** means a **transformer branch** comprising **interconnection assets**

**interim certified metering installation** means a **metering installation** referred to in clause 10.51(3)(a)(i)

Clause 1.1(1) **interim certified metering installation**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**interim marginal location factor** means the factor that is determined by dividing the **interim price** at any **grid exit point** or **grid injection point** by the **interim price** at the relevant **reference point**

**interim price** means a price in dollars and cents for each **grid injection point** and each **grid exit point**, determined in accordance with the methodology specified in clause 13.134A, and includes a revised **interim price** made available on **WITS** by the **clearing manager** under clause 13.177(b)

Clause 1.1(1) **interim price**: amended, on 1 November 2022, by clause 4(7) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**interim reserve price** means a price in dollars and cents for **fast instantaneous reserve** and **sustained instantaneous reserve**, determined in each **island** in accordance with

the methodology specified in clause 13.134A, and includes a revised **interim reserve price** made available on **WITS** by the **clearing manager** under clause 13.177(b)

Clause 1.1(1) **interim reserve price**: amended, on 5 October 2017, by clause 4(37) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1.1(1) **interim reserve price**: amended, on 1 November 2022, by clause 4(8) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**intermittent generating station** means a **generating station** that relies on a variable resource that is not stored and in respect of which a **generator** has not been approved by the **system operator** under clause 13.3F as a **dispatch notification generator**

Clause 1.1(1) **intermittent generating station**: amended, on 20 March 2020, by clause 4(3) of the Electricity Industry Participation Code Amendment (Broadening Definitions of Generating Unit and Intermittent Generating Station) 2020

Clause 1.1(1) **intermittent generating station**: amended, on 1 November 2022, by clause 4(9) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**intermittent generator** means the owner of an **intermittent generating station**. To avoid doubt, clauses referring to an **intermittent generator** apply only to the **intermittent generating stations** owned by the **intermittent generator**

**interposed arrangement** means an arrangement between a **distributor** and a **trader** under which the **distributor**—

- (a) conveys electricity to 1 or more **consumers** on the **distributor's network**; and
- (b) does not have a contract in respect of the conveyance of **electricity** with that **consumer** or those **consumers**

Clause 1.1(1) **interposed arrangement**: inserted, on 20 July 2020, by clause 4(3) of the Electricity Industry Participation Code Amendment (Default Distributor Agreement) 2020.

**interrogation** means the extraction or manual reading of stored data from a **metering installation** and **interrogated** and **interrogating** have corresponding meanings

Clause 1.1(1) **interrogation**: amended, on 29 August 2013, by clause 4(2)(n) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**interruptible load** means a form of **instantaneous reserve** comprised of **demand** that is able to be reduced to provide **fast instantaneous reserve** or **sustained instantaneous reserve** following a drop in system frequency, in accordance with the **procurement plan**

Clause 1.1(1) **interruptible load**: amended, on 5 October 2017, by clause 4(38) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1.1(1) **interruptible load**: amended, on 3 May 2022, by clause 4(3)(c) of the Electricity Industry Participation Code Amendment (Enabling Energy Storage Systems to Offer Instantaneous Reserve) 2022.

**interruptible load group GXP** means the **grid exit point**, as approved by the **system operator** (such approval not to be unreasonably withheld), at which a **reserve offer** for **interruptible load** comprises the aggregate quantity of **interruptible load** available at a number of specified **grid exit points** for the purposes of **offer** and **dispatch**

**interruption**, for the purposes of Part 12, means an interruption in the conveyance of **electricity** between **assets** owned or operated by a **designated transmission customer** and the **grid assets** owned by **Transpower** at a **point of connection**, other than an interruption by reason of **Transpower** being directed to **electrically disconnect a point of connection** by the **Authority** or the **Rulings Panel** under the **Act** or this Code or by any other person authorised to do so by this Code

Clause 1.1(1) **interruption**: amended, on 5 October 2017, by clause 4(39) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**investment contracts** means contracts for investments that are agreed between **Transpower** and a **designated transmission customer**

**island** means the South Island or the North Island of New Zealand (as the case may be)

**island GWAP** *[Revoked]*

Clause 1.1(1) **island GWAP**: inserted, on 1 June 2013, by clause 4(a) of the Electricity Industry Participation (Scarcity Pricing) Code Amendment 2011.

Clause 1.1(1) **island GWAP**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**island scarcity pricing situation** *[Revoked]*

Clause 1.1(1) **island scarcity pricing situation**: inserted, on 1 June 2013, by clause 4(a) of the Electricity Industry Participation (Scarcity Pricing) Code Amendment 2011.

Clause 1.1(1) **island scarcity pricing situation**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**island shortage situation** *[Revoked]*

**island shortage situation**: inserted, on 1 June 2013, by clause 4(a) of the Electricity Industry Participation (Scarcity Pricing) Code Amendment 2011.

Clause 1.1(1) **island shortage situation**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**ITP information** means information on internal transfer pricing as described in clause 13.256

Clause 1.1(1) **ITP information**: inserted, on 30 November 2021, by clause 4 of the Electricity Industry Participation Code Amendment (Internal Transfer Prices and Segmented Profitability Reporting) 2021.

**line function services** has the meaning given to it by section 5 of the Act

Clause 1.1(1) **line function services**: substituted, on 1 February 2016, by clause 4(1)(e) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

**line owner**, for the purposes of the definition of **specified participant**, means a person who owns **works** that are used or intended to be used for the conveyance of **electricity**

Clause 1.1(1) **line owner**: amended, on 21 September 2012, by clause 4(5) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

**lines** has the meaning given to it by section 5 of the Act

Clause 1.1(1) **lines**: amended, on 23 February 2015, by clause 4(9) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **lines**: substituted, on 1 February 2016, by clause 4(1)(f) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

**livening** *[Revoked]*

Clause 1.1(1) **livening**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 1.1(1) **livening**: revoked, on 29 August 2013, by clause 4(2) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

**load weighted contract price** means, in respect of a **risk management contract**, a price that has, in accordance with clause 13.220, been calculated, load weighted, adjusted to a **location factor** for the relevant **grid zone area**, and corrected for **losses**, for the purposes of subpart 5 of Part 13

Clause 1.1(1) **load weighted contract price**: inserted, on 30 October 2024, by clause 4(8) of the Electricity Industry Participation Code Amendment (Hedge Disclosure Obligations) 2024.

**local authority**, for the purposes of Part 6, means a territorial authority within the meaning of the Local Government Act 2002

**local losses** means **losses** applying to the conveyance of **electricity** over a **local network** or an **embedded network**

**local network** means the **lines**, equipment and plant that are used to convey **electricity** between the **grid** and 1 of the following:

- (a) an **embedded generator**;
- (b) an **embedded network**;
- (c) an **ICP**

Clause 1.1(1) **local network**: amended, on 1 February 2016, by clause 4(13) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

**location factor**, for the purposes of subpart 5 of Part 13, means the location factor calculated in accordance with clause 13.221(2)

**losing metering equipment provider** means, for the purposes of Parts 10 and 11, the existing **metering equipment provider** responsible for each **metering installation** for a **point of connection** at which there is a **gaining metering equipment provider**

Clause 1.1(1) **losing metering equipment provider**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**losing retailer** is defined as set out in the definition of **gaining retailer**

Clause 1.1(1) **losing retailer**: inserted, on 31 March 2020, by clause 4 of the Electricity Industry Participation Code Amendment (Prohibition of Save and Win-Back Approaches by Losing Retailers During a Switch Protected Period) 2020.

**loss adjusted demand** [*Revoked*]

Clause 1.1(1) **loss adjusted demand**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**loss and constraint excess** means the difference between **purchaser** and **generator** payments as defined in clause 14.16

Clause 1.1(1) **loss and constraint excess**: amended, on 24 March 2015, by clause 4(1)(n) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

**loss category** means the relevant code in the schedule **published** by the **registry manager** that identifies the relevant **loss factors** that apply to **submission information** or **dispatchable load information**

Clause 1.1(1) **loss category**: amended, on 15 May 2014, by clause 5(3) of the Electricity Industry Participation (Modified Dispatchable Demand) Code Amendment 2013.

Clause 1.1(1) **loss category**: amended, on 5 October 2017, by clause 4(40) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**loss compensation** means the application of a predetermined **adjustment** or process to the data within, or obtained from, a **metering component** or **metering installation** in order to correct such data for known **losses** in primary plant (such as power transformers and cables)

Clause 1.1(1) **loss compensation**: amended, on 29 August 2013, by clause 4(2)(o) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**losses** means the difference between the delivered **electricity** at a **point of connection** and the **electricity** required to be injected into an other **point of connection** in order to supply the delivered **electricity**

**loss factor** means the factor, identified by reference to a **loss category** within the **registry**, to be applied to **submission information** or **dispatchable load information** to obtain adjusted for **losses** information at the relevant **NSP**, which factor is—

- (a) as set out in the report to be provided by the **registry** in accordance with clause 11.26(b); or
- (b) if a report has not been provided by the **registry**, as directed by the **Authority** under clause 15.20B(3) or 15(1) of Schedule 15.4

Clause 1.1(1) **loss factor**: amended, on 15 May 2014, by clause 5(4) of the Electricity Industry Participation (Modified Dispatchable Demand) Code Amendment 2013.

**loss of communication** means a sustained disruption of communications between the **system operator** and 1 or more **generators**, **ancillary service agents**, North Island **connected asset owners**, South Island **grid owners**, or **dispatchable load purchasers** such that operation of the **grid** is affected or is likely to be affected

Clause 1.1(1) **loss of communication**: amended, on 1 November 2018, by clause 4(6) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 1.1(1) **loss of communication**: amended, on 21 December 2021, by clause 4(4) of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**LV**, for the purposes of subparts 2, 6 and 7 of Part 12, means low voltage

**main protection system** means a protection system that detects 1 or more types of faults and **electrically disconnects** a faulted **asset** from the **grid** with the least possible disruption to the **grid** and non-faulted **assets**

Clause 1.1(1) **main protection system**: amended, on 5 October 2017, by clause 4(41) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**maintain**, for the purposes of Part 6, includes to repair, and **maintenance** has a corresponding meaning

**major participant** means—

- (a) a **generator** who is subject to **dispatch** or a **generator** with aggregated national generation capacity in excess of 30MW; or
- (b) an **ancillary service agent** providing **frequency keeping** or **instantaneous reserve**; or
- (c) a **direct purchaser**; or
- (d) a **grid owner**

Clause 1.1(1) **major participant**: inserted, on 1 April 2021, by clause 4(1) of the Electricity Industry Participation Code Amendment (Reporting on Wholesale Market Information Disclosure) 2020.

**manufacturer's specification**, for the purposes of Part 12, means the specifications for an **asset**, as stated by the manufacturer

**market administrator** *[Revoked]*

Clause 1.1(1) **market administrator**: revoked, on 5 October 2017, by clause 4(60) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**market operation service provider** has the meaning given to it in section 5 of the **Act**

**market operation service provider agreement** means the agreement entered into between the **Authority** and a **market operation service provider** for the provision of services for the purposes of this Code

**mass market customers** means all those customers of a **generator retailer** or **retailer** who the **generator retailer** or **retailer** classifies as mass market or who are commonly understood to be **mass market customers** in accordance with standard industry practice  
Clause 1.1(1) **mass market customers**: inserted, on 30 November 2021, by clause 4 of the Electricity Industry Participation Code Amendment (Internal Transfer Prices and Segmented Profitability Reporting) 2021.

**materially large contract**, for the purposes of subpart 7 of Part 13, has the meaning given to it by clause 13.268

Clause 1.1(1) **materially large contract**: inserted, on 19 August 2022, by clause 4(1) of the Electricity Industry Participation Code Amendment (Restrictions on Materially Large Contracts) 2022.

Clause 1.1(1) **materially large contract**: revoked, on 18 May 2023, by clause 2(2) of the Electricity Industry Participation Code Amendment (Restrictions on Materially Large Contracts) 2023.

Clause 1.1(1) **materially large contract**: inserted, on 19 May 2023, by clause 4(1) of the Electricity Industry Participation Code Amendment (Restrictions on Materially Large Contracts) 2023.

**maximum continuous rating** means the maximum electrical performance of an **asset** that can be maintained continuously in normal service

**maximum export power** means the maximum **active power** exported into the **local network** or **embedded network** at an **ICP** of a **distributed generator**, and is equal to—

- (a) the **nameplate capacity** of the **distributed generation** minus the minimum load at the **point of connection**; or
- (b) the power export limit imposed by an active export control device

Clause 1.1(1) **maximum export power**: inserted, on 1 September 2021, by clause 4(2) of the Electricity Industry Participation Code Amendment (Application for Distributed Generation) 2021. **Note:**

**Paragraph maximum export power automatically revokes on the close of 1 September 2026 under clause 8 of the Electricity Industry Participation Code Amendment (Application for Distributed Generation) 2021.**

**maximum South Island frequency** means the maximum frequency permitted in the South Island, which is 55 Hertz

**measuring transformer** means—

- (a) a current transformer; or
- (b) a voltage transformer; or
- (c) both a current transformer and a voltage transformer

Clause 1.1(1) **measuring transformer**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**meter** means a device that measures either or both of the following—

- (a) **active energy**;
- (b) **reactive energy**

Clause 1.1(1) **meter**: substituted, on 29 August 2013, by clause 4(2)(p) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**meter reading** means a **meter** register value or the equivalent, obtained from **raw meter data** or such other reading as detailed in clause 3(1) of Schedule 15.2, which is not an **estimated reading**

**metering** means the process used to measure **electricity** conveyed

Clause 1.1(1) **metering**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**metering component** means a component of a **metering installation** including—

- (a) a **measuring transformer**;

- (b) all wiring and intermediate terminals in the **metering installation**:
- (c) a **control device**:
- (d) a **meter**:
- (e) a **data storage device**:
- (f) a **test facility**:
- (g) a fuse:
- (h) a **circuit breaker**:
- (i) **communication equipment**:
- (j) an **error compensation device**

Clause 1.1(1) **metering component**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**metering data** means, in relation to a **metering installation**,—

- (a) all **metering records** about the **metering installation**; and
- (b) all **raw meter data** obtained from the **metering installation**

Clause 1.1(1) **metering data**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**metering equipment owner** means the **participant** who owns any or all of the items of metering equipment installed in a **metering installation**

**metering equipment provider** has the meaning given to it in section 5 of the **Act**

Clause 1.1(1) **metering equipment provider**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**metering information** means the quantity of **electricity** measured by a **metering installation** and adjusted for **local losses** (if relevant) to represent the equivalent amount of **electricity** at the **point of connection** with the **grid** and consolidated into a single quantity per **trading period**

**metering infrastructure** means, in relation to a **metering installation**,—

- (a) the **metering installation**:
- (b) if a **back office** process is necessary, the **metering equipment owner's back office** for the **metering installation**:
- (c) a system that collects and sends information to or from the **metering installation**

Clause 1.1(1) **metering infrastructure**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**metering installation** means—

- (a) equipment, including all **metering components**, used, or intended to be used, for **metering**:
- (b) in the context of **unmetered load**, the calculation process used to derive the quantity of **unmetered load**:
- (c) in the context of instances of both **metered electricity** quantities and **unmetered load**, both (a) and (b)

Clause 1.1(1) **metering installation**: substituted, on 29 August 2013, by clause 4(2)(q) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 1.1(1) **metering installation**: inserted, on 1 February 2016, by clause 4(14) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

**metering records** means all specifications for, attributes of, and information relating to or concerning, a **metering installation** (other than **raw meter data**), including—

- (a) the relevant records of the **metering equipment provider** responsible for the **metering installation**:
- (b) the relevant records of each **ATH** who **certified the metering installation** or any **metering component** of the **metering installation**:
- (c) all factors applied in a **meter** in the **metering installation** and relating to that data (for example the k factor and m factor):
- (d) the **metering installation's** maintenance and repair history and requirements:
- (e) details of each **metering component** in the **metering installation** including information about its ownership:
- (f) all **certification reports** and supporting documents and records

Clause 1.1(1) **metering records**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

#### **metering situation** *[Revoked]*

Clause 1.1(1) **metering situation**: substituted, on 15 May 2014, by clause 5(2) of the Electricity Industry Participation (Modified Dispatchable Demand) Code Amendment 2013.

Clause 1.1(1) **metering situation** paragraph (a)(v): inserted, on 27 May 2015, by clause 4(4) of the Electricity Industry Participation Code Amendment (Industrial Co-generation Dispatch Arrangements) 2015.

Clause 1.1(1) **metering situation** paragraph (a)(iv): amended, at 12.00 pm on 19 September 2019, by clause 3(a) and (b) of the Electricity Industry Participation Code Amendment (Wind Offer Arrangements) 2019.

Clause 1.1(1) **metering situation**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

#### **metering testing requirements** *[Revoked]*

Clause 1.1(1) **metering testing requirements**: revoked, on 29 August 2013, by clause 4(3) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**metering standards** means the **metering** requirements set out in the Schedules to Part 10

Clause 1.1(1) **metering standards**: substituted, on 29 August 2013, by clause 4(2)(r) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**metrology layer** means a part of a **metering installation** used for either or both of the following:

- (a) measuring and recording **electricity** conveyed; or
- (b) recording **event logs**

Clause 1.1(1) **metrology layer**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**minimum South Island frequency** means the minimum frequency permitted in the South Island, which is 45 Hertz

**model formulation** means the model from which **software specifications** have been developed for the **system operator**

**modelled projects** means transmission augmentation projects and **non-transmission projects** that are reasonably expected to occur within the time period for which the assessment of costs and benefits under a net benefits test set out in Part 12 is undertaken

#### **momentary fluctuations** *[Revoked]*

Clause 1.1(1) **momentary fluctuations**: revoked, on 19 May 2016, by clause 4(1) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

**MV**, for the purposes of subparts 2, 6 and 7 of Part 12, means medium voltage

**MW** means a megawatt of electrical power

**MWh** means a megawatt hour of electrical energy

**N-1 criterion** means that, with all **assets** that are reasonably expected to be in service, the power system would be in a **secure state**

**nameplate capacity** means the lesser of—

- (a) the full-load continuous rating of **generating plant** under conditions specified by its designer in **MW** or kilowatts; or
- (b) the full-load continuous rating of the **generating plant's** inverter (if any) under conditions specified by its designer in **MW** or kilowatts

Clause 1.1(1) **nameplate capacity**: inserted, on 23 February 2015, by clause 4(12) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

**national grid** *[Revoked]*

Clause 1.1(1) **national grid**: revoked, on 23 February 2015, by clause 4(11) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

**national GWAP** *[Revoked]*

Clause 1.1(1) **national GWAP**: inserted, on 1 June 2013, by clause 4(a) of the Electricity Industry Participation (Scarcity Pricing) Code Amendment 2011.

Clause 1.1(1) **national GWAP**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**national holiday** means any day on which any of the following are observed as a statutory holiday:

- (a) Good Friday:
- (b) Easter Monday:
- (c) ANZAC Day:
- (d) the birthday of the reigning Sovereign (observed on the first Monday in June):
- (da) Te Rā Aro ki a Matariki/Matariki Observance Day:
- (e) Labour Day:
- (f) Christmas Day:
- (g) Boxing Day:
- (h) New Year's Day:
- (i) the day after New Year's Day:
- (j) Waitangi Day

Clause 1.1(1) **national holiday**: amended, on 1 March 2024, by clause 4(13) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

**national scarcity pricing situation** *[Revoked]*

**national scarcity pricing situation**: inserted, on 1 June 2013, by clause 4(a) of the Electricity Industry Participation (Scarcity Pricing) Code Amendment 2011.

Clause 1.1(1) **national scarcity pricing situation**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**national shortage situation** *[Revoked]*

**national shortage situation**: inserted, on 1 June 2013, by clause 4(a) of the Electricity Industry Participation (Scarcity Pricing) Code Amendment 2011.

Clause 1.1(1) **national shortage situation**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**negative sequence voltage** means a measure of difference in magnitude and phase angle in each phase

**net grid exit point** *[Revoked]*

Clause 1.1(1) **net grid exit point**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**net grid injection point** *[Revoked]*

Clause 1.1(1) **net grid injection point**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**net purchase quantity assessment** means the quantity of an **ancillary service** derived from the following formula:

$$a = b - c$$

where

- a is the net purchase quantity of the **ancillary service** to be procured by the **system operator** in accordance with the **procurement plan**
- b is the gross amount of an **ancillary service** that the **system operator** believes is required in order to meet the **principal performance objectives**;
- c is the amount of the **ancillary service** that is made available to the **system operator** under **alternative ancillary service arrangements**

**network** means, except in Part 6A, the **grid**, a **local network** or an **embedded network**

Clause 1.1(1) **network**: amended, on 1 March 2024, by clause 4(14) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

**new investment agreement contracts** means contracts entered into before 1 April 2008 between **Transpower** and its customers, under which **Transpower** agrees to provide new or upgraded plant and the customer agrees to pay charges based on **Transpower's** cost of providing the new or upgraded plant

**New Zealand daylight time** means New Zealand daylight time declared by Order in Council under section 4 of the Time Act 1974

**New Zealand standard time** has the meaning given to it by section 2 of the Time Act 1974

**node** means—

- (a) a bus; or
- (b) a location at which an electrical link that is not part of or does not contain a **transformer**, diverges or terminates (such as a "tee" point or a deviation); or
- (c) a point at a substation at which 2 or more electrical links join at which there is no bus

**nominal voltage** means the voltage at which particular equipment is designed to operate under normal circumstances

**nominated bid**—

- (a) *[Revoked]*
- (b) *[Revoked]*
- (c) *[Revoked]*

- (d) means the information that a **purchaser** submits to the **system operator** under clause 13.7 to indicate a reasonable estimate of the—
- (i) **electricity** that the **purchaser** will purchase for a **dispatch-capable load station** at a **GXP**; or
  - (ii) **non-dispatch-capable load** that the **purchaser** will purchase at a **non-conforming GXP**; and

(e) includes a deemed **nominated bid** under clause 13.8A

Clause 1.1(1) **nominated bid**: inserted, on 28 June 2012, by clause 4(a) of the Electricity Industry Participation (Demand-side Bidding and Forecasting) Code Amendment 2011.

Clause 1.1(1) **nominated bid**: amended, on 15 May 2014, by clause 5(5) of the Electricity Industry Participation (Modified Dispatchable Demand) Code Amendment 2013.

Clause 1.1(1) **nominated bid**: amended, on 19 December 2014, by clause 4(3) of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.

Clause 1.1(1) **nominated bid** paragraph (d): amended, on 29 June 2017, by clause 4(4) of the Electricity Industry Participation Code Amendment (Shortened Gate Closure and Revised Bid and Offer Provisions) 2017.

**nominated dispatch bid** means a **nominated bid** that a **purchaser** submits to the **system operator** in relation to a **dispatch-capable load station** that the **purchaser** is making available to be **dispatched**

Clause 1.1(1) **nominated dispatch bid**: inserted, on 15 May 2014, by clause 5(1) of the Electricity Industry Participation (Modified Dispatchable Demand) Code Amendment 2013.

**nominated non-dispatch bid** means a **nominated bid** that a **purchaser** submits to the **system operator** in relation to—

- (a) **non-dispatch-capable load** at a **non-conforming GXP**; or
- (b) a **dispatch-capable load station** that the **purchaser** is not making available to be dispatched

Clause 1.1(1) **nominated non-dispatch bid**: inserted, on 15 May 2014, by clause 5(1) of the Electricity Industry Participation (Modified Dispatchable Demand) Code Amendment 2013.

**non-conforming GXP** means a **GXP** that has been determined by the **Authority** to be a **non-conforming GXP** under clause 13.27A or 13.27B(4)

Clause 1.1(1) **non-conforming GXP**: inserted, on 28 March 2012, by clause 4(a) of the Electricity Industry Participation (Demand-side Bidding and Forecasting) Code Amendment 2011.

**non-dispatch-capable load** means a quantity of **electricity** purchased at a **GXP** that is not purchased for 1 or more **dispatch-capable load stations**

Clause 1.1(1) **non-dispatch-capable load**: inserted, on 15 May 2014, by clause 5(1) of the Electricity Industry Participation (Modified Dispatchable Demand) Code Amendment 2013.

**non half-hour metering** means the process of measuring and recording information—

- (a) relating to **electricity** conveyed; and
- (b) at intervals that are greater than 1 **trading period**

Clause 1.1(1) **non half-hour metering**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**non half-hour metering installation** means a **metering installation** used for **non half-hour metering**

Clause 1.1(1) **non half-hour metering installation**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**non-response schedule** means the schedule prepared by the **system operator**—

- (a) under clause 13.58(1)(b); and
- (b) for the purpose of assisting **generators, purchasers, consumers, ancillary service agents, and grid owners** to manage their resources

Clause 1.1(1) **non-response schedule**: inserted, on 28 June 2012, by clause 4(a) of the Electricity Industry

Participation (Demand-side Bidding and Forecasting) Code Amendment 2011.

**non-transmission projects** includes investments in any of the following:

- (a) generation;
- (b) energy efficiency;
- (c) **demand-side** management;
- (d) **local network** augmentation;
- (e) improvements to the systems and processes of the **system operator**;
- (f) the provision of **ancillary services**

**normal band** means a frequency band between 49.8 Hertz and 50.2 Hertz (both inclusive)

**notified planned outage**, for the purposes of Technical Code D of Schedule 8.3, means any **planned outage** for which the **asset owner** has given notice to the **system operator** in accordance with Technical Code D of Schedule 8.3

Clause 1.1(1) **notified planned outage**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **notified planned outage**: replaced, on 5 October 2017, by clause 4(1)(d) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1.1(1) **notified planned outage**: replaced, on 1 January 2025, by clause 4(1) of the Electricity Industry Participation Code Amendment (Co-ordination of outages affecting common quality) 2024.

**notify** [*Revoked*]

Clause 1.1(1) **notify**: revoked, on 5 October 2017, by clause 4(60) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**notional embedding contracts** means contracts entered into before 1 April 2008 between **Transpower** and its customers, under which a customer's generation assets are treated as if they were physically connected to load in lieu of their existing connection to the **grid**

Clause 1.1(1) **notional embedding contracts**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **notional embedding contracts**: amended, on 5 October 2017, by clause 4(43) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**NSP** means a network supply point that is a **point of connection** between—

- (a) a **local network** and the **grid**; or
- (b) 2 **local networks**; or
- (c) a **local network** and an **embedded network**; or
- (d) 2 **embedded networks**; or
- (e) a **generator** and the **grid**

Clause 1.1(1) **network supply point**: amended, on 5 October 2017, by clause 4(42) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**NSP identifier** means a unique identifier for an **NSP** created by the **reconciliation manager** in accordance with clause 28 of Schedule 11.1

**obligation FTR** means an **FTR** for which the terms and conditions provide that—

- (a) (excluding the **FTR acquisition cost**) the holder of the **FTR** is entitled to receive a payment when, for the **FTR period**, the difference between the price (calculated in accordance with the terms of the **FTR**) at the **hub** identified as hub B and the price at the **hub** identified as hub A in the **FTR** is positive; and

(b) (excluding the **FTR acquisition cost**) the holder must make a payment when the difference between those prices is negative

Clause 1.1(1) **obligation FTR**: inserted, on 1 October 2011, by clause 4(1) of the Electricity Industry Participation (Financial Transmission Rights) Code Amendment 2011.

Clause 1.1(1) **obligation FTR**: amended, on 1 November 2012, by clause 4(3) of the Electricity Industry Participation (Financial Transmission Rights) Code Amendment 2012.

**NZEF market-making agreement** means an agreement between a **participant** and an **exchange** that imposes obligations on the **participant** in relation to the **exchange's** daily settlement market-making scheme for **NZ electricity futures**, in the form of agreement used on the **exchange** for this purpose that is satisfactory to the **Authority**, having regard to its inclusion of the requirements set out in clause 13.236L and of the permitted exemptions from the performance of market-making services

Clause 1.1(1) **NZEF market-making agreement**: inserted, on 3 February 2020, by clause 4 of the Electricity Industry Participation Code Amendment (Hedge Market Arrangements) 2020.

Clause 1.1(1) **NZEF market-making agreement**: revoked, on 3 November 2020 in accordance with section 40(2)(b) of the Electricity Industry Act 2010.

Clause 1.1(1) **NZEF market-making agreement**: inserted, on 27 April 2021, by clause 4(3) of the Electricity Industry Participation Code Amendment (Hedge Market Arrangements) 2021.

**NZEF market-making period** means from 1530 to 1600 New Zealand time on each **business day** on which **NZ electricity futures** are traded

Clause 1.1(1) **NZEF market-making period**: inserted, on 3 February 2020, by clause 4 of the Electricity Industry Participation Code Amendment (Hedge Market Arrangements) 2020.

Clause 1.1(1) **NZEF market-making period**: revoked, on 3 November 2020 in accordance with section 40(2)(b) of the Electricity Industry Act 2010.

Clause 1.1(1) **NZEF market-making period**: inserted, on 27 April 2021, by clause 4(4) of the Electricity Industry Participation Code Amendment (Hedge Market Arrangements) 2021.

**NZ electricity future** means a New Zealand electricity 0.1 **MW** base load equivalent futures contract in respect of the Otahuhu reference **node** or the Benmore reference **node** available for trade on an **exchange**

Clause 1.1(1) **NZ electricity future**: inserted, on 27 April 2021, by clause 4(1) of the Electricity Industry Participation Code Amendment (Hedge Market Arrangements) 2021.

Clause 1.1(1) **NZ electricity future**: amended, on 1 September 2022, by clause 4(1) of the Electricity Industry Participation Code Amendment (Hedge Market Arrangements) 2022.

**offer** means the information that a **generator** submits to the **system operator** under clause 13.6(1), and includes any revised **offer** that a **generator** submits under clauses 13.17 to 13.19

Clause 1.1(1) **offer**: amended, on 15 May 2014, by clause 4(3) of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

Clause 1.1(1) **offer**: substituted, on 29 June 2017, by clause 5(a) of the Electricity Industry Participation Code Amendment (Shortened Gate Closure and Revised Bid and Offer Provisions) 2017.

**offer stack** [*Revoked*]

Clause 1.1(1) **offer stack**: amended, at 12.00 pm on 19 September 2019, by clause 4(4) of the Electricity Industry Participation Code Amendment (Wind Offer Arrangements) 2019.

Clause 1.1(1) **offer stack**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**offered FTR** means an **FTR** that has been offered into an **FTR reconfiguration auction**

Clause 1.1(1) **offered FTR**: inserted, on 1 November 2014, by clause 4(1) of the Electricity Industry Participation (FTR Reconfiguration Auctions) Code Amendment 2014.

**official conservation campaign** is a campaign to encourage **electricity** conservation that—

- (a) is commenced by the **system operator**; and
- (b) lasts for 1 week or more; and
- (c) covers—
  - (i) the South Island; or
  - (ii) all of New Zealand

Clause 1.1(1) **official conservation campaign**: inserted, on 1 April 2011, by clause 4(1) of the Electricity Industry Participation (Customer Compensation Schemes) Code Amendment 2011.

**offtake** means the flow of **electricity** from the **grid** at a **grid exit point**

**operating account** means the trust account or accounts established by the **clearing manager** in accordance with clause 14.66, and **operating accounts** has a considerable meaning

Clause 1.1(1) **operating account**: amended, on 24 March 2015, by clause 4(1)(o) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

Clause 1.1(1) **operating account**: amended, on 1 March 2024, by clause 4(15) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

**operational term** means a term that is described in a **default distributor agreement template** for inclusion in a **default distributor agreement** in accordance with clause 3(1)(b) of Schedule 12A.4

Clause 1.1(1) **operational term**: inserted, on 20 July 2020, by clause 4(3) of the Electricity Industry Participation Code Amendment (Default Distributor Agreement) 2020.

**option FTR** means an **FTR** for which the terms and conditions provide that—

- (a) (excluding the **FTR acquisition cost**) the holder of the **FTR** is entitled to receive a payment when, for the **FTR period**, the difference between the price (calculated in accordance with the terms of the **FTR**) at the **hub** identified as hub B and the price at the **hub** identified as hub A in the **FTR** is positive; but
- (b) (excluding the **FTR acquisition cost**) the holder is not required to make a payment when the difference between those prices is negative

Clause 1.1(1) **option FTR**: inserted, on 1 October 2011, by clause 4(1) of the Electricity Industry Participation (Financial Transmission Rights) Code Amendment 2011.

Clause 1.1(1) **option FTR**: amended, on 1 November 2012, by clause 4(4) of the Electricity Industry Participation (Financial Transmission Rights) Code Amendment 2012.

**options contract** means a contract containing the right to buy or sell a financial derivative contract that relates to a quantity of **electricity** that equals or exceeds 0.1 **MW** of **electricity**

Clause 1.1(1) **options contract**: amended, on 30 October 2024, by clause 4(9) of the Electricity Industry Participation Code Amendment (Hedge Disclosure Obligations) 2024.

**order**, for the purposes of subpart 5B of Part 13, means a **quote**, or a bundle of **quotes** (at the same price) in relation to a particular month or calendar quarter, and particular reference **node** simultaneously, placed on an **exchange** by a **participant** referred to in clause 13.236K(1)

Clause 1.1(1) **order**: inserted, on 1 September 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Hedge Market Arrangements) 2022.

**other party**, for the purposes of subpart 5 of Part 13, means the **party** to a **risk management contract** who did not submit information under clauses 13.219(1), 13.223(1), or 13.224, as the case may be

Clause 1.1(1) **other party**: amended, on 30 October 2024, by clause 4(10) of the Electricity Industry Participation Code Amendment (Hedge Disclosure Obligations) 2024.

**outage**—

- (a) for the purposes of Technical Code D of Schedule 8.3, means any situation where an **asset** that forms part of, or is connected to, the **grid** or a **local network**—
- (i) is temporarily not available for the generation, conveyance or consumption of **electricity**; or
  - (ii) is temporarily not available for the generation, conveyance or consumption of **electricity** at its normal capacity; and
  - (iii) includes any situation where any **asset** of a **generator** is not available as specified in sub-paragraphs (i) and (ii) due to an **outage** of any **asset** of a **distributor**; and
- (b) for the purposes of Part 12, has the meaning given to it by clause 12.130

Clause 1.1(1) **outage**: replaced, on 1 January 2025, by clause 4(2) of the Electricity Industry Participation Code Amendment (Co-ordination of outages affecting common quality) 2024.

**outage constraint** means any **grid injection point** or **grid exit point** that has no load or generation connected to it in the modelling system, and of which the **system operator** gives written notice to the **reconciliation manager** under clause 15.15(a)

Clause 1.1(1) **outage constraint**: replaced, on 5 October 2017, by clause 4(1)(e) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**outage plan**, for the purposes of Part 12, means the annual outage plan developed under the **Outage Protocol**

**Outage Protocol**, for the purposes of Part 12, means the Outage Protocol that is incorporated by reference in this Code under clause 12.150

**overall accuracy** [*Revoked*]

Clause 1.1(1) **overall accuracy**: revoked, on 29 August 2013, by clause 4(3) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**over frequency limit** means the maximum frequency of 50.5 Hz

**over frequency reserve** means an **ancillary service** that comprises an automatic reduction in the level of **injection** by a generating set to arrest an unplanned rise in system frequency

**Part 6A dispensation** means an exclusion from compliance with Part 6A or any provisions of Part 6A granted by the **Authority** in accordance with the process set out in clause 6A.9

Clause 1.1(1) **Part 6A dispensation**: inserted, on 31 August 2023, by clause 4 of the Electricity Industry Participation Code Amendment (Part 6A Dispensation for Specified Persons) 2023.

Clause 1.1(1) **Part 6A dispensation**: replaced, on 1 March 2024, by clause 4 of the Electricity Industry Participation Code Amendment (Part 6A Dispensation for Specified Persons) 2024.

**participant** has the meaning given to it in section 5 of the **Act** and, for the purposes of Parts 8, 13, 14, and 14A, has the additional meaning set out in clause 1.5

Clause 1.1(1) **participant**: amended, on 5 October 2017, by clause 4(44) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**participant identifier** means a unique 4 letter code assigned to a **participant** under clause 15.39 that is used to identify the **participant**, including in the reconciliation and **registry** processes

Clause 1.1(1) **participant identifier**: amended, on 15 May 2014, by clause 4(4) of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

**participant rolling outage plan** means a plan developed by a **specified participant** under clauses 9.6 to 9.13

**partly loaded spinning reserve** means a form of **generation reserve** consisting of spare capacity, held in reserve on a **generation unit**, generating, but not operating at full output, but excludes the spare capacity provided by an **energy storage system**

Clause 1.1(1) **partly loaded spinning reserve**: amended, on 5 October 2017, by clause 4(45) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1.1(1) **partly loaded spinning reserve**: amended, on 3 May 2022, by clause 4(3)(d) of the Electricity Industry Participation Code Amendment (Enabling Energy Storage Systems to Offer Instantaneous Reserve) 2022.

**party**, for the purposes of subpart 5 and subpart 7 of Part 13, means either the **buyer** or **seller** under a **risk management contract** or both the **buyer** and **seller** under a **risk management contract**, as the case may be, and for the purposes of subpart 7 of Part 13, means either the **buyer** or **seller** under a contract or both the **buyer** and **seller** under a contract, as the case may be

Clause 1.1(1) **party**: amended, on 19 August 2022, by clause 4(4) of the Electricity Industry Participation Code Amendment (Restrictions on Materially Large Contracts) 2022.

Clause 1.1(1) **party**: revoked, on 18 May 2023, by clause 2(2) of the Electricity Industry Participation Code Amendment (Restrictions on Materially Large Contracts) 2023.

Clause 1.1(1) **party**: inserted, on 19 May 2023, by clause 4(4) of the Electricity Industry Participation Code Amendment (Restrictions on Materially Large Contracts) 2023.

#### **payee** [*Revoked*]

Clause 1.1(1) **payee**: substituted, on 1 October 2011, by clause 4(2) of the Electricity Industry Participation (Financial Transmission Rights) Code Amendment 2011.

Clause 1.1(1) **payee**: amended, on 15 May 2014, by clause 5(6) of the Electricity Industry Participation (Modified Dispatchable Demand) Code Amendment 2013.

Clause 1.1(1) **payee**: revoked, on 24 March 2015, by clause 4(1)(p) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

#### **payer** [*Revoked*]

Clause 1.1(1) **payer** paragraph (iv): inserted, on 1 October 2011, by clause 4(3) of the Electricity Industry Participation (Financial Transmission Rights) Code Amendment 2011.

Clause 1.1(1) **payer**: revoked, on 24 March 2015, by clause 4(1)(q) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

**permanent estimate** means—

- (a) a value sourced from an **estimated reading** that has passed the validation process in clauses 16 and 17 of Schedule 15.2 and has been calculated from **validated meter readings**; or
- (b) if, despite using reasonable endeavours, a **reconciliation participant** cannot replace **volume information** created using **estimated readings** with **volume information** created using **validated meter readings** by the month 14 revision cycle, a value created by the **reconciliation participant** using its best estimates of **validated meter readings**

Clause 1.1(1) **permanent estimate**: replaced, on 1 February 2019, by clause 4(7) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

#### **pivotal** [*Revoked*]

Clause 1.1(1) **pivotal**: inserted, on 17 July 2014, by clause 4(1) of the Electricity Industry Participation Code Amendment (Pivotal Supply) 2014.

Clause 1.1(1) **pivotal**: revoked, on 30 June 2021 by clause 4 of the Electricity Industry Participation Code Amendment (Trading Conduct Provisions) 2021.

**planned interruption**, for the purposes of Part 12, means an **interruption** caused by a **planned outage**

**planned outage**—

- (a) for the purposes of Technical Code D of Schedule 8.3, means any **outage** that is planned by the relevant **asset owner** and, in the case of an **outage** coming within paragraph (a)(iii) of the definition of **outage**, any such **outage** that is caused by a **planned outage** of a **distributor**; and
- (b) for the purposes of Part 12, means an **outage** carried out in accordance with the planning requirements set out in the **Outage Protocol**

Clause 1.1(1) **planned outage**: replaced, on 1 January 2025, by clause 4(3) of the Electricity Industry Participation Code Amendment (Co-ordination of outages affecting common quality) 2024.

**point of connection** means—

- (a) a point at which **electricity** may flow, via one or more phases or conductors—
  - (i) into or out of a **network**; or
  - (ii) both into and out of a **network** at the same time, where each directional flow is on different phases or conductors; and
- (b) for the purposes of **Technical Code A** of Schedule 8.3, means a **grid injection point** or a **grid exit point**

Clause 1.1(1) **point of connection**: replaced, on 31 December 2021, by clause 4(11) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

**point of measurement** *[Revoked]*

Clause 1.1(1) **point of measurement**: revoked, on 29 August 2013, by clause 4(3) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**point of service** means a normally contiguous electrical busbar of a particular voltage at which **Transpower**, as a **grid owner**, has agreed to provide services to 1 or more **designated transmission customers**

**point of supply**, in relation to any premises, means the point at which fittings, used or intended to be used for the purposes of supplying **electricity** to those premises, enter those premises

**policy statement** means the policy statement that is incorporated by reference in this Code under clause 8.10

**preceding year** *[Revoked]*

Clause 1.1(1) **preceding year**: revoked, on 5 October 2017, by clause 4(60) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**preceding year day** *[Revoked]*

Clause 1.1(1) **preceding year day**: revoked, on 5 October 2017, by clause 4(60) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**pre-dispatch schedule** *[Revoked]*

Clause 1.1(1) **pre-dispatch schedule**: revoked, on 28 June 2012, by clause 4(i) of the Electricity Industry Participation (Demand-side Bidding and Forecasting) Code Amendment 2011.

**preliminary sample** means the statistical sample that is required in order to establish parameter estimates to determine the appropriate size of the **profile sample**

**preliminary sample size** means the required size of the **preliminary sample**

**premium**, in relation to a **risk management contract**, means the dollar amount paid by the **buyer** to the **seller**

Clause 1.1(1) **premium**: amended, on 30 October 2024, by clause 4(11) of the Electricity Industry Participation Code Amendment (Hedge Disclosure Obligations) 2024.

**prescribed form** means a form prescribed from time to time by the **Authority**

**price**, for the purposes of Part 5, includes—

- (a) valuable consideration in any form, whether direct or indirect; and
- (b) any consideration that in effect relates to the acquisition of goods or services or the acquisition or disposition of any interest in land, although ostensibly relating to any other matter or thing

**price category** means the relevant code in the schedule **published** by a **distributor** that is used to unambiguously define the line charges for an **ICP**

**price-responsive schedule** means the schedule prepared by the **system operator**—

- (a) under clause 13.58(1)(a); and
- (b) for the purpose of assisting **generators, purchasers, consumers, ancillary service agents, and grid owners** to manage their resources

Clause 1.1(1) **price-responsive schedule**: inserted, on 28 June 2012, by clause 4(a) of the Electricity Industry Participation (Demand-side Bidding and Forecasting) Code Amendment 2011.

**pricing error** means an error in an **interim price** or **interim reserve price** as a result of—

- (i) a **dispatch price** or **dispatch reserve price** that was not made available on **WITS** being used to calculate the **interim price** or **interim reserve price**; or
- (ii) the **clearing manager** having followed an incorrect process in calculating that **interim price** or **interim reserve price**, in contravention of this Code

Clause 1.1(1) **pricing error**: amended, on 1 November 2022, by clause 4(6)(e) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**pricing manager** *[Revoked]*

Clause 1.1(1) **pricing manager**: amended, on 20 December 2021, by clause 4(12) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 1.1(1) **pricing manager**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**primary transmission equipment** means any plant or equipment forming part of the **grid** that enables the bulk transfer of **electricity**, including without limitation transmission circuits, busbars and switchgear

**principal performance obligation** and **PPO** mean a **system operator** obligation set out in any of clauses 7.2A to 7.2D

Clause 1.1(1) **principal performance obligations** and **PPOs**: amended, on 19 May 2016, by clause 4(3) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

**procurement plan** means the procurement plan that is incorporated by reference in this Code under clause 8.42

**profile** means a fixed or variable **electricity consumption pattern** assigned to a particular group of **meter** registers or **unmetered loads**

**profile acceptance limit** means the maximum value allowed for the sample **co-efficient of variation** calculated from the **preliminary sample**

**profile applicant** means the **participant** who submitted an application to the **Authority** to approve a new **profile** or a change to an existing **profile**, and may be a joint entity with more than 1 **participant** or an independent commercial entity acting on behalf of 1 or more **participants**

Clause 1.1(1) **profile applicant**: amended, on 5 October 2017, by clause 4(46) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**profile class** means the grouping of 1 or more individual **profiles** that are applied to **metering installations** and loads with similar generic descriptions

**profile owner** means the legal entity that introduced the approved **profile** or is nominated as the **profile owner** in accordance with Schedule 15.5

**profile population** means all **ICP identifiers** included in a **profile**

**profile sample** means the statistical sample used to generate consumption data that is to be used to represent the load patterns of all **ICP identifiers** included in the **profile**

**profile sample size** means the required size of the **profile sample**

**provisional marginal location factor** *[Revoked]*

Clause 1.1(1) **provisional marginal location factor**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**provisional price** *[Revoked]*

Clause 1.1(1) **provisional price**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**provisional price situation** *[Revoked]*

Clause 1.1(1) **provisional price situation**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**provisional reserve price** *[Revoked]*

Clause 1.1(1) **provisional reserve price**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**public conservation period** *[Revoked]*

Clause 1.1(1) **public conservation period**: inserted, on 1 April 2011, by clause 4(1) of the Electricity Industry Participation (Customer Compensation Schemes) Code Amendment 2011.

Clause 1.1(1) **public conservation period**: revoked, on 20 December 2021, by clause 4(13) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

**publicise** *[Revoked]*

Clause 1.1(1) **publicise**: revoked, on 5 October 2017, by clause 4(60) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**publish** means—

- (a) in respect of information that the **Authority** is required to **publish** under this Code, to make the information available to the public, at no cost, on a website maintained by, or on behalf of, the **Authority**; or
- (b) in respect of information that a **participant** is required to **publish** under this Code, to make the information available to the public, at no cost, on a website maintained by, or on behalf of, the **participant**,—

and **published**, **publishes**, **publication**, and **publishing** have corresponding meanings

Clause 1.1(1) **publish**: replaced, on 5 October 2017, by clause 4(1)(f) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**purchaser** means a person who buys **electricity** from the **clearing manager** and, for the purposes of Parts 8, 13, 14, and 14A, has the additional meaning set out in clause 1.5

Clause 1.1(1) **purchaser**: amended, on 5 October 2017, by clause 4(47) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**qualifying customer** has the meaning set out in clause 9.21

Clause 1.1(1) **qualifying customer**: inserted, on 1 April 2011, by clause 4(1) of the Electricity Industry Participation (Customer Compensation Schemes) Code Amendment 2011.

**qualifying date** [*Revoked*]

Clause 1.1(1) **qualifying date**: inserted, on 1 April 2011, by clause 4(1) of the Electricity Industry Participation (Customer Compensation Schemes) Code Amendment 2011.

Clause 1.1(1) **qualifying date**: revoked, on 5 October 2017, by clause 4(60) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**quantity**, for the purposes of subpart 5 of Part 13, means—

- (a) for a **risk management contract** other than a **fixed-price physical supply contract** the total volume in **MWh** of **electricity** to which the contract relates; or
- (b) for a **fixed-price physical supply contract**, the volume in **MWh** of **electricity** reasonably likely to be supplied under the contract

Clause 1.1(1) **quantity**: amended, on 30 October 2024, by clause 4(12) of the Electricity Industry Participation Code Amendment (Hedge Disclosure Obligations) 2024.

**quarterly disclosure report** means a report provided by a **major participant** under clause 13.2B.

Clause 1.1(1) **quarterly disclosure report**: inserted, on 1 April 2021, by clause 4(2) of the Electricity Industry Participation Code Amendment (Reporting on Wholesale Market Information Disclosure) 2020.

**quote** means an offer to buy or sell a **NZ electricity future on an exchange**

Clause 1.1(1) **quote**: inserted, on 3 February 2020, by clause 4 of the Electricity Industry Participation Code Amendment (Hedge Market Arrangements) 2020.

Clause 1.1(1) **quote**: revoked, on 3 November 2020 in accordance with section 40(2)(b) of the Electricity Industry Act 2010.

Clause 1.1(1) **quote**: inserted, on 27 April 2021, by clause 4(5) of the Electricity Industry Participation Code Amendment (Hedge Market Arrangements) 2021.

**ratio compensation** means a multiplier, used to convert **raw meter data** into **volume information**, that is developed from—

- (a) the connected ratio of **measuring transformers**; and
- (b) the number of **metering** elements; and
- (c) the resolution of the **meter**

Clause 1.1(1) **ratio compensation**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 1.1(1) **ratio compensation**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **ratio compensation**: amended, on 5 October 2017, by clause 4(48) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**raw meter data** means—

- (a) for the purposes of Part 10, information obtained by the **interrogation** of a **metering installation**; or

- (b) for the purposes of Part 15, information obtained from a **metering installation** by 1 of the following **interrogation** methods:
- (i) locally by way of a handheld computer or recording device (in which case it must take the form of a downloaded file); or
  - (ii) locally by way of any other manual record (in which case it must take the form of the first entry in a database system); or
  - (iii) remotely (in which case it must take the form of database records), but excluding data transmission between **meters** and data concentrators that are relaying information into the **back office**

Clause 1.1(1) **raw meter data**: substituted, on 29 August 2013, by clause 4(2)(s) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**reactive** means that component of the impedance at which the current and voltage are 90 degrees out of phase

**reactive capability** means the **reactive power** injection or absorption capability of **generating units** and other **reactive power** resources such as Static Var Compensators, capacitors and synchronous condensers, and includes **reactive power** capability of a **generating unit** during the normal course of the **generating unit** operations

**reactive current** means the component of electrical current on a **line** 90 degrees out of phase with the voltage on the **line**

Clause 1.1(1) **reactive current**: inserted, on 24 November 2016, by clause 4 of the Electricity Industry Participation Code Amendment (Generation Fault Ride Through) 2016.

**reactive energy** means the integration over time of the product of voltage and current and the sine of the phase angle between them, normally measured in kilovar hours (kvarh)

Clause 1.1(1) **reactive energy**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**reactive meter** means a **meter** used for the measurement of **reactive power**

**reactive power** means the product of voltage and current and the sine of the phase angle between them, and which is normally measured in kiloVolt-Amps reactive (kVAr)

**real time price** *[Revoked]*

Clause 1.1(1) **real time price**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**real time pricing period** *[Revoked]*

Clause 1.1(1) **real time pricing period**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**reasonable and prudent operating practice**, in relation to **distributed generation**, includes—

- (a) the industry operating standards; and
- (b) measures to avoid the injection of **electricity** from **distributed generation** that—
  - (i) exceeds the **distribution network capacity** at the point of injection; or
  - (ii) results in a significant adverse effect on voltage levels; or

- (iii) results in a significant adverse effect on the quality and reliability of **electricity** conveyed to other users of the **distribution network**; and
- (c) the use or proposed use of reasonable and prudent measures to enable the connection of **distributed generation**

Clause 1.1(1) **reasonable and prudent operating practice**: amended, on 23 February 2015, by clause 4(10) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **reasonable and prudent operating practice**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **reasonable and prudent operating practice**: amended, on 5 October 2017, by clause 4(49) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**reasonable and prudent system operator** [*Revoked*]

Clause 1.1(1) **reasonable and prudent system operator**: revoked, on 19 May 2016, by clause 4(1) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

**recalibration** means to repeat a **calibration** because a previous **calibration** has expired or become suspect, and **recalibrate** has a corresponding meaning

**recertification** means to repeat a **certification** because a previous **certification** has expired or been cancelled, and **recertified** and **recertify** have corresponding meanings

**reconciled quantity** means a quantity of **electricity** that has been reconciled by the **reconciliation manager**

**reconciliation information** means information specifying the amount of **electricity** sold to or purchased from the **clearing manager** in each **half hour** of a **reconciliation period** (or such other period as has been agreed to), calculated from and reconciled with **submission information** and the relevant **losses**, and after the process of balancing in accordance with clause 22 of Schedule 15.4

**reconciliation manager** means the **market operation service provider** for the time being appointed as reconciliation manager under this Code

Clause 1.1(1) **reconciliation manager**: amended, on 20 December 2021, by clause 4(14) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

**reconciliation participant** means a **participant** that—

- (a) is one of the following:
- (i) a **retailer** when purchasing **electricity** from, or selling **electricity** to, the **clearing manager**:
  - (ii) a **generator**:
  - (iii) a **network** owner:
  - (iv) a **distributor**:
  - (v) a person who purchases **electricity** from or sells **electricity** to the **clearing manager**, including a **dispatchable load purchaser**: and
- (b) provides information to the **reconciliation manager** in accordance with clauses 15.4 to 15.11

Clause 1.1(1) **reconciliation participant**: replaced, on 1 March 2024, by clause 4(16) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

**reconciliation period** means a calendar month, subsequent to a **consumption period**, during which the reconciliation process is performed in respect of the **electricity** conveyed during 1 or more **consumption periods**

Clause 1.1(1) **reconciliation period**: amended, on 1 June 2011, by clause 4(2) of the Electricity Industry

Participation (Minor Amendments) Code Amendment 2011.

**reconciliation type** means a code that identifies the type of processing to be performed during reconciliation

**reconfigured FTR** means the portion of an FTR that was sold at an FTR reconfiguration auction

Clause 1.1(1) **reconfigured FTR**: inserted, on 1 November 2014, by clause 4(1) of the Electricity Industry Participation (FTR Reconfiguration Auctions) Code Amendment 2014.

**recorded term** [*Revoked*]

Clause 1.1(1) **recorded term**: inserted, on 20 July 2020, by clause 4(3) of the Electricity Industry Participation Code Amendment (Default Distributor Agreement) 2020.

Clause 1.1(1) **recorded term**: revoked, on 25 November 2024, by clause 4(3) of the Electricity Industry Participation Code Amendment (Distributor Agreement Amendments) 2024.

**reference point** means,—

- (a) for the North Island,—
- (i) the Haywards 220 kV bus to which the HVDC Pole 2 or Pole 3 **injection** or **offtake** is **electrically connected**; or
  - (ii) if there is no Pole 2 or Pole 3 **injection** or **offtake** that is **electrically connected** to a Haywards 220kV bus, the first indexed Haywards 220 kV **node**;
- (b) for the South Island,—
- (i) the Benmore 220 kV bus to which the HVDC Pole 2 or Pole 3 **injection** or **offtake** is **electrically connected**; or
  - (ii) if there is no Pole 2 or Pole 3 **injection** or **offtake** that is **electrically connected** to a Benmore 220kV bus, the first indexed Benmore 220 kV **node**

Clause 1.1(1) **reference point**: substituted, on 1 July 2012, by clause 4(3) of the Electricity Industry Participation (HVDC Pole 3 Minor Amendments) Code Amendment 2012.

Clause 1.1(1) **reference point**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **reference point**: amended, on 5 October 2017, by clause 4(50) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**reference standard** means a measuring instrument that has been **calibrated** by an **approved calibration laboratory** and is not used as a **working standard**

**register** means the register of **participants** maintained by the **Authority** under section 16 of the **Act**

**registered**, in relation to a **participant**, means that details of the **participant** are kept in the **register**

**registry** means the database maintained by the **Authority** to record information about **ICPs**

Clause 1.1(1) **registry** and **registry manager**: replaced, on 5 October 2017, by clause 4(1)(g) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**registry manager** means the **market operation service provider** for the time being appointed as registry manager under this Code

Clause 1.1(1) **registry manager**: inserted, on 5 October 2017, by clause 4(61) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**registry metering records** means the **metering records** set out in Table 1 of clause 7 of Schedule 11.4

Clause 1.1(1) **registry metering records**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**regulated terms** means the terms set out in Schedule 6.2

**relative standard error** means the error expressed as a percentage of the estimated parameter

**relevant contracts** *[Revoked]*

Clause 1.1(1) **relevant contracts**: revoked, on 24 March 2015, by clause 4(1)(r) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

**relevant information** *[Revoked]*

Clause 1.1(1) **relevant information**: amended, on 21 September 2012, by clause 4(7) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

Clause 1.1(1) **relevant information**: revoked, on 1 October 2013, by clause 4(3) of the Electricity Industry Participation (Disclosure Obligations) Code Amendment 2013.

**relevant local reconciliation contracts** means the contracts for the sale and/or the purchase of **electricity** within a **local network**

**relevant participant** *[Revoked]*

Clause 1.1(1) **relevant participant**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 1.1(1) **relevant participant**: revoked, on 1 June 2017, by clause 4(2) of the Electricity Industry Participation Code Amendment (Requirements and Processes for Audits) 2016.

**relevant registration factor** *[Revoked]*

Clause 1.1(1) **relevant registration factor**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**republish** *[Revoked]*

Clause 1.1(1) **republish**: revoked, on 5 October 2017, by clause 4(60) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**reserve offer** means the information that an **ancillary service agent** submits to the **system operator** under clauses 13.37 to 13.54 specifying the **instantaneous reserve** the **ancillary service agent** is willing and able to provide

Clause 1.1(1) **reserve offer**: substituted, on 28 June 2012, by clause 4(g) of the Electricity Industry Participation (Demand-side Bidding and Forecasting) Code Amendment 2011.

Clause 1.1(1) **reserve offer**: substituted, on 29 June 2017, by clause 5(b) of the Electricity Industry Participation Code Amendment (Shortened Gate Closure and Revised Bid and Offer Provisions) 2017.

**residual loss and constraint excess** means, in respect of a **billing period**, an amount available for the settlement of **FTRs** that is not required to settle **FTRs** for the **billing period**, but does not include any amount that is retained for the settlement of **FTRs** in a future **billing period** in accordance with clause 13.249(6)

Clause 1.1(1) **residual loss and constraint excess**: inserted, on 1 October 2011, by clause 4(1) of the Electricity Industry Participation (Financial Transmission Rights) Code Amendment 2011.

Clause 1.1(1) **residual loss and constraint excess**: amended, on 24 March 2015, by clause 4(1)(s) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

**resistive** means that component of the impedance that is where the current and voltage are in phase

**responsible party** means the person responsible for the installation, maintenance, operation and **interrogation** of a **metering installation** and the supply of **submission information** to the **reconciliation manager**

**retailer** means as follows:

- (a) except as provided in paragraphs (b) and (c), a **participant** who supplies **electricity** to another person for any purpose other than for resupply by the other person:
- (b) in Parts 1 (except for the definition of specified participant), 8, 10, and 12 to 15, a **participant** who supplies **electricity** to a **consumer** or to another **retailer**:
- (c) in subpart 4 of Part 9, the **retailer** defined in paragraph (a) who is recorded in the **registry** as being responsible for the **ICP** described in clause 9.21(1)(b)

Clause 1.1(1) **retailer**: substituted, on 1 April 2011, by clause 4(2) of the Electricity Industry Participation (Customer Compensation Schemes) Code Amendment 2011.

Clause 1.1(1) **retailer** para (b): amended, on 28 February 2015, by clause 4 of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

Clause 1.1(1) **retailer**: amended, on 5 October 2017, by clause 4(51) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**retail gross margin report** means a report provided by a **retailer** under clause 13.259

Clause 1.1(1) **retail gross margin report**: inserted, on 30 November 2021, by clause 4 of the Electricity Industry Participation Code Amendment (Internal Transfer Prices and Segmented Profitability Reporting) 2021.

**retail ITP** means the notional price or prices per **MWh** for **electricity** set between either the generating arm or the trading arm of a **generator retailer**, on the one hand, and the retailing arm of the **generator retailer**, on the other hand, in respect of **electricity** generated by the **generator retailer** that is sold by the **generator retailer** to **mass market customers** and that is used for internal accounting, management, or other purposes

Clause 1.1(1) **retail ITP**: inserted, on 30 November 2021, by clause 4 of the Electricity Industry Participation Code Amendment (Internal Transfer Prices and Segmented Profitability Reporting) 2021.

**Rio Tinto agreement** *[Revoked]*

Clause 1.1(1) **Rio Tinto agreement**: revoked, on 16 December 2013, by clause 4(2)(c) of the Electricity Industry Participation (Revocation of Part 16) Code Amendment 2013.

**Rio Tinto party** *[Revoked]*

Clause 1.1(1) **Rio Tinto party**: revoked, on 16 December 2013, by clause 4(2)(d) of the Electricity Industry Participation (Revocation of Part 16) Code Amendment 2013.

**risk management contract**, for the purposes of subpart 5 and subpart 7 of Part 13, means—

- (a) a **contract for differences**; or
- (b) a **fixed-price physical supply contract**; or
- (c) an **options contract**; or
- (ca) for the purposes of subpart 5 of Part 13, a contract prescribed by the **Authority** under clause 13.219B as a **risk management contract**; but
- (d) does not include an **FTR**

Clause 1.1(1) **risk management contract**: amended, on 15 May 2014, by clause 4(5) of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

Clause 1.1(1) **risk management contract**: amended, on 19 August 2022, by clause 4(5) of the Electricity Industry Participation Code Amendment (Restrictions on Materially Large Contracts) 2022.

Clause 1.1(1) **risk management contract**: revoked, on 18 May 2023, by clause 2(2) of the Electricity Industry Participation Code Amendment (Restrictions on Materially Large Contracts) 2023.

Clause 1.1(1) **risk management contract**: inserted, on 19 May 2023, by clause 4(5) of the Electricity Industry Participation Code Amendment (Restrictions on Materially Large Contracts) 2023.

Clause 1.1(1) **risk management contract**: clause (c) amended, on 30 October 2024, by clause 4(13)(a) of the Electricity Industry Participation Code Amendment (Hedge Disclosure Obligations) 2024.

Clause 1.1(1) **risk management contract**: clause (ca) inserted, on 30 October 2024, by clause 4(13)(b) of the Electricity Industry Participation Code Amendment (Hedge Disclosure Obligations) 2024.

**round power** means a mode of operation of the **HVDC link** where power is transferred in opposite directions on Pole 2 and Pole 3

Clause 1.1(1) **round power**: inserted, on 1 July 2012, by clause 4(4) of the Electricity Industry Participation (HVDC Pole 3 Minor Amendments) Code Amendment 2012.

**rules** means the Electricity Governance Rules 2003

**Rulings Panel** has the meaning given to it in section 5 of the Act

**sample date** means the most recent date when the **profile sample** was drawn or updated

**satisfactory state** means that none of the following occur on the power system:

- (a) insufficient **supply of electricity** to satisfy **demand for electricity** at any **grid exit point**;
- (b) **unacceptable overloading** of any **primary transmission equipment**;
- (c) **unacceptable voltage conditions**;
- (d) **system instability**

**SCADA** means the monitoring and remote control of equipment from a central location using computing technologies

**SCADA situation** *[Revoked]*

Clause 1.1(1) **SCADA situation**: amended, on 15 May 2014, by clause 5(7) of the Electricity Industry Participation (Modified Dispatchable Demand) Code Amendment 2013.

Clause 1.1(1) **SCADA situation**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**scaling factor**, for the purpose of Appendix A of Technical Code C of Schedule 8.3, means a factor applied to a measurement at 1 point to calculate a corresponding measurement at another point

Clause 1.1(1) **scaling factor**: inserted, on 1 June 2011, by clause 4(1) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2011.

**schedule of dispatch prices, dispatch quantities, dispatch arc flows, dispatch group constraint arc flows, group constraint formulas and HVDC component flows**

*[Revoked]*

Clause 1.1(1) **schedule of dispatch prices, dispatch quantities, dispatch arc flows, dispatch group constraint arc flows, group constraint formulas and HVDC component flows**: revoked, on 28 June 2012, by clause 4(i) of the Electricity Industry Participation (Demand-side Bidding and Forecasting) Code Amendment 2011.

**scarcity pricing situation** *[Revoked]*

Clause 1.1(1) **scarcity pricing situation**: inserted, on 1 June 2013, by clause 4(a) of the Electricity Industry Participation (Scarcity Pricing) Code Amendment 2011.

Clause 1.1(1) **scarcity pricing situation**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**schedule length period** means,—

- (a) in relation to a **price-responsive schedule** or a **non-response schedule** prepared under clause 13.62(1)(a), the current **trading period** and the following 71 **trading periods**; and

- (b) in relation to a **price-responsive schedule** or a **non-response schedule** prepared under clause 13.62(1)(b), the current **trading period** and the following **7 trading periods**

Clause 1.1(1) **schedule length period**: inserted, on 28 June 2012, by clause 4(a) of the Electricity Industry Participation (Demand-side Bidding and Forecasting) Code Amendment 2011.

**schedule period** means the current **trading period** and the following **71 trading periods**

Clause 1.1(1) **schedule period**: substituted, on 28 June 2012, by clause 4(h) of the Electricity Industry Participation (Demand-side Bidding and Forecasting) Code Amendment 2011.

**scheduled quantity**, for the purposes of clauses 13.194 and 13.204(1)(a) and (b), means the sum of all the **offer** quantities at the relevant **grid injection point** at which the **final price** is equal to or greater than the **offer** price for each of those **offer** quantities in the relevant **trading period**. For the **grid injection points** that form part of a **block dispatch group**, **scheduled quantity** is the sum of all the **offer** quantities of the individual **grid injection points** that form that **block dispatch group** at which the **final price** is equal to or greater than the **offer** price for each of those **offer** quantities in the relevant **trading period**

**scorecard rating** means the numerical value, pursuant to clauses 17 and 18 of Schedule 15.4, to rate the quality of each **retailer's** processes for the production of **submission information**

**seasonal adjustment shape** means the total energy consumption (expressed as daily kWh values) for all **NSP** derived **profiles** for all **retailers** in each **balancing area**

**secure state** means that the power system—

- (a) would be in a **satisfactory state**; and
- (b) would remain in a **satisfactory state** during and following a **single credible contingency event** occurring on the **grid**

**security of supply forecasting and information policy** means the security of supply forecasting and information policy that is incorporated by reference in this Code under clause 7.4

**selected component certification** means **certification** of a **metering installation** under clause 11(3) of Schedule 10.7

Clause 1.1(1) **selected component certification**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**seller**, for the purposes of subpart 5 and subpart 7 of Part 13, means—

- (a) in respect of a **contract for differences**, the **floating-price payer**; or
- (b) in respect of a **fixed-price physical supply contract**, the **party** selling the **electricity**; or
- (c) in respect of an **options contract**, either—
  - (i) the **party** receiving the **premium**; or
  - (ii) if there is no **premium** under the **options contract**, the **party** who agrees to be the **seller** for the purposes of subpart 5 or subpart 7 (as applicable) of Part 13; or
  - (iii) if neither **party** agrees to be the **seller**, the **party** whose name is the second alphabetically; or
- (ca) for the purposes of subpart 5 of Part 13, in respect of a contract prescribed by the **Authority** under clause 13.219B as a **risk management contract**, either—

- (i) the **party** specified as the seller in the contract; or
- (ii) if neither **party** is specified as the seller, the **party** whose name is the second alphabetically; or
- (d) for the purposes of subpart 7 of Part 13, in respect of any other contract, the **party** who is not the **buyer**

Clause 1.1(1) **seller**: amended, on 19 August 2022, by clause 4(6) of the Electricity Industry Participation Code Amendment (Restrictions on Materially Large Contracts) 2022.

Clause 1.1(1) **seller**: revoked, on 18 May 2023, by clause 2(2) of the Electricity Industry Participation Code Amendment (Restrictions on Materially Large Contracts) 2023.

Clause 1.1(1) **seller**: inserted, on 19 May 2023, by clause 4(6) of the Electricity Industry Participation Code Amendment (Restrictions on Materially Large Contracts) 2023.

Clause 1.1(1) **seller**: clause (c) amended, on 30 October 2024, by clause 4(14)(a) of the Electricity Industry Participation Code Amendment (Hedge Disclosure Obligations) 2024.

Clause 1.1(1) **seller**: clause (ca) inserted, on 30 October 2024, by clause 4(14)(b) of the Electricity Industry Participation Code Amendment (Hedge Disclosure Obligations) 2024.

**series**, for the purposes of determining the level of impedance of **branches** under Part 12, means an arrangement of **assets** where the **assets** comprising a **branch** have the same current flowing through them

**serious financial breach** means a failure by a **retailer**—

- (a) to pay to a **distributor** an amount due and owing that exceeds the greater of \$100,000 or 20% of the actual charges payable by the **retailer** for the previous month, unless the amount is genuinely disputed by the **retailer**; or
- (b) to pay to a **distributor** 100% of the actual charges payable by the **retailer** for the previous two months, unless the amount is genuinely disputed by the **retailer**; or
- (c) to comply with the prudential requirements under a **distributor agreement** between the **retailer** and a **distributor**.

Clause 1.1(1) **serious financial breach**: inserted, on 16 December 2013, by clause 4 of the Electricity Industry Participation (Managing Retailer Default Situations) Code Amendment 2013.

Clause 1.1(1) **serious financial breach**: replaced, on 20 July 2020, by clause 4(1) of the Electricity Industry Participation Code Amendment (Default Distributor Agreement) 2020.

**services access interface** means the point, at which access may be gained to the services available from a **metering installation**, that is—

- (a) recorded in the **certification report** by the **certifying ATH** for the **metering installation**; and
- (b) where information received from the **metering installation** can be made available to another person; and
- (c) where signals for services such as remote control of load (but not ripple control) can be injected

Clause 1.1(1) **services access interface**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

**settlement default** means failure of a **participant** to pay any amount payable when it becomes due under Part 14

Clause 1.1(1) **settlement default**: inserted, on 24 March 2015, by clause 4(1)(t) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

**settlement residue** is the **loss and constraint excess** and **residual loss and constraint excess** paid to a **grid owner** by the **clearing manager** under Part 14.

Clause 1.1(1) **settlement residue**: inserted, on 1 April 2023, by clause 4 of the Electricity Industry Participation Code Amendment (Settlement Residual Allocation Methodology) 2022.

**shared unmetered load** means **unmetered load** at a single **point of connection** that is distributed across more than 1 **ICP**, including without limitation, streetlighting in a private right-of-way servicing multiple properties, and sewage pumps servicing multiple properties

Clause 1.1(1) **shared unmetered load**: amended, on 1 March 2024, by clause 4(17) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

**shortage situation** [*Revoked*]

Clause 1.1(1) **shortage situation**: inserted, on 1 June 2013, by clause 4(a) of the Electricity Industry Participation (Scarcity Pricing) Code Amendment 2011.

Clause 1.1(1) **shortage situation**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**shunt**, for the purposes of determining the level of impedance of **branches** under Part 12, means an arrangement of **assets** where the **assets** comprising a **branch** have the same voltage across the terminals

**shunt asset**, for the purposes of Part 12, means a shunt connected **asset** that is an **interconnection asset**

Clause 1.1(1) **shunt asset**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **shunt asset**: amended, on 5 October 2017, by clause 4(52) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**simple random sampling without replacement** means the general procedure of drawing **consumers** from a **profile population** to form a sample. Each **consumer** in the **profile population** must have an equal probability of being drawn and may only be drawn once

**single credible contingency event** means an individual credible contingency event comprising any of the following:

- (a) a single transmission circuit interruption:
- (b) the failure or removal from operational service of a single **generating unit**:
- (c) an **HVDC link** single pole interruption:
- (d) the failure or removal from service of a single bus section:
- (e) a single inter-connecting transformer interruption:
- (f) the failure or removal from service of a single shunt connected reactive component

Clause 1.1(1) **single credible contingency event**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **single credible contingency event**: amended, on 5 October 2017, by clause 4(53) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**single-line diagram** means a schematic diagram of a **network** interface

**software** means, other than in Parts 10 and 15, any software—

- (a) developed by or on behalf of a **market operation service provider** that is used by that **market operation service provider** to perform its obligations under this Code or its **market operation service provider agreement**; or
- (b) used by a **market operation service provider** exclusively for the purposes of performing its obligations under this Code or its **market operation service provider agreement**

Clause 1.1(1) **software**: amended, on 29 August 2013, by clause 4(2)(t) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**software specification** means the user requirements and other information describing the **software** in respect of the **market operation service providers**

**special credit clause** means a clause in a **risk management contract** that specifies that, if a **party** defaults during the **term** of the contract, the **party** that is not in default will be paid a specified amount or that, on execution of the contract, the **party** that is not in default is provided with a guarantee that payment will be made when the settlement amount reaches a certain threshold

Clause 1.1(1) **special credit clause**: amended, on 30 October 2024, by clause 4(15) of the Electricity Industry Participation Code Amendment (Hedge Disclosure Obligations) 2024.

**special protection scheme** means a protection scheme that takes predetermined action, including reconfiguration of the **grid**, changes of **demand**, or changes of generation, to counteract a particular condition once that condition is detected. **Special protection schemes** allow a power system to be operated to a higher pre-event capacity limit while still in a **secure state**. **Automatic under-frequency load shedding** systems and **instantaneous reserves** are excluded from the requirements for **special protection schemes**

Clause 1.1(1) **special protection scheme**: inserted, on 1 June 2011, by clause 4(1) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2011.

Clause 1.1(1) **special protection scheme**: amended, on 15 May 2014, by clause 4(6) of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

Clause 1.1(1) **special protection scheme**: amended, on 1 February 2016, by clause 4(15) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

**specified participant** for the purposes of Part 9,—

(a) means any of the following:

- (i) **distributor**;
- (ii) **retailer**;
- (iii) a **line owner**; and

(a) includes a person who uses **electricity** that is conveyed to the person directly from the **grid**

**specified person** has the meaning given in section 32(6) of the **Act**

Clause 1.1(1) **specified person**: inserted, on 31 August 2023, by clause 4 of the Electricity Industry Participation Code Amendment (Part 6A Dispensation for Specified Persons) 2023.

Clause 1.1(1) **specified person**: replaced, on 1 March 2024, by clause 4 of the Electricity Industry Participation Code Amendment (Part 6A Dispensation for Specified Persons) 2024.

**spot price risk disclosure statement** means a spot price risk disclosure statement prepared and submitted under clause 13.236A

Clause 1.1(1) **spot price risk disclosure statement**: inserted, on 1 December 2011, by clause 4 of the Electricity Industry Participation Code (Spot Price Risk Disclosure) Amendment 2011.

**statement of extended reserve obligation** *[Revoked]*

Clause 1.1(1) **statement of extended reserve obligations**: inserted, on 7 August 2014, by clause 4(3) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 1.1(1) **statement of extended reserve obligation**: revoked, on 21 December 2021, by clause 4(3) of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**statement of proposal**, in relation to a proposal, means a statement that contains—

- (a) a detailed statement of the proposal; and
- (b) a statement of the reasons for the proposal; and
- (c) an assessment of the reasonably practicable options, including the proposal; and

(d) any other information relevant to considering the proposal.

**station dispatch group** means—

- (a) 1 or more **generating units** that inject into a single **grid injection point**; or
- (b) 1 or more **generating units** that are the subject of an agreement between the **system operator** and a **generator**,—

and is not a **block dispatch group**

**station net** means the sum of all **generating unit net** outputs for **generating units** at a single **generating station**, measured or calculated at its **point of connection**, but excludes **generating unit load** and any other active or **reactive power** (including **losses**) supplied between the **generating station** and the **point of connection**

Clause 1.1(1) **station net**: inserted, on 1 June 2011, by clause 4(1) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2011.

Clause 1.1(1) **station net**: amended, on 20 December 2021, by clause 4(15) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

**station security constraint** means any of the following:

- (a) a security constraint as determined in accordance with the **policy statement** and applied by the **system operator** to a **generating unit** to provide **voltage support** or **frequency keeping**;
- (b) a limitation in **grid capacity** that:
  - (i) is a limitation in the capacity of the **grid** to convey **electricity** between either—
    - (A) **generating units** constituting a **station dispatch group**; or
    - (B) **generating units** constituting a **station dispatch group** and the **grid**;and
  - (ii) arises because of either—
    - (A) a limitation in the offered capacity of the **grid**; or
    - (B) a security constraint as determined by the **system operator** in accordance with the **policy statement**

Clause 1.1(1) **station security constraint**: replaced, on 31 December 2021, by clause 4(16) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

**stress test** means a stress test **published** by the **Authority** under clause 13.236D

Clause 1.1(1) **stress test**: inserted, on 1 December 2011, by clause 4 of the Electricity Industry Participation Code (Spot Price Risk Disclosure) Amendment 2011.

Clause 1.1(1) **stress test**: amended, on 5 October 2017, by clause 4(54) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**sub-block dispatch groups** means a grouping of **generating stations** or **generating units** within a **block dispatch group** into subgroups to take account of any **block security constraints** of which the **system operator** gives notice in accordance with clauses 13.61(1) and 13.73(1)(j)

Clause 1.1(1) **sub-block dispatch groups**: amended, on 21 September 2012, by clause 4(8) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

Clause 1.1(1) **sub-block dispatch groups**: amended, on 15 May 2014, by clause 5(8) of the Electricity Industry Participation (Modified Dispatchable Demand) Code Amendment 2013.

Clause 1.1(1) **sub-block dispatch groups**: amended, on 1 November 2018, by clause 4(8)(a) and (b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

**sub-station dispatch group** means a grouping of **generating units** or **generating stations** within a **station dispatch group** into subgroups to take account of any **station**

**security constraints** of which the **system operator** gives notice in accordance with clauses 13.65(1) and 13.75(1)(g)

Clause 1.1(1) **sub-station dispatch groups**: amended, on 15 May 2014, by clause 5(9) of the Electricity Industry Participation (Modified Dispatchable Demand) Code Amendment 2013.

Clause 1.1(1) **sub-station dispatch groups**: amended, on 1 February 2016, by clause 4(16) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 1.1(1) **sub-station dispatch group**: amended, on 1 November 2018, by clause 4(9) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

**submission expiry date** means—

- (a) *[Revoked]*
- (b) *[Revoked]*
- (c) *[Revoked]*
- (d) *[Revoked]*
- (e) in the case of a submission on the draft **grid reliability standards**, the date **published** by the **Authority** in accordance with clause 12.61(3); and
- (f) in the case of a submission on the issues paper, the date **published** by the **Authority** in accordance with clause 12.82(1); and
- (g) in the case of a submission on the proposed **transmission pricing methodology**, the date **published** by the **Authority** in accordance with clause 12.92(2)

Clause 1.1(1) **submission expiry date**: amended, on 19 December 2014, by clause 4(4) of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.

Clause 1.1(1) **submission expiry date**: amended, on 1 November 2018, by clause 4(10)(a) and (b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 1.1(1) **submission expiry date**: paragraphs (a) and (b) revoked, on 1 August 2023, by clause 4(4) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 1.1(1) **submission expiry date**: paragraphs (c) and (d) revoked, on 1 October 2023, by clause 4(4) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

**submission information** means **volume information** aggregated in accordance with clause 8 of Schedule 15.3 (and includes, if relevant, any **profile** shape or control times associated with a **profile**)

**subsidiary** means a subsidiary as defined in section 5 of the Companies Act 1993

**supply** means a measure of the rate of production of electrical energy

**supply shortage declaration** means a declaration made under clause 9.14

**suspension clause** means a clause in a **risk management contract** under which some or all of the obligations may be suspended due to an event directly relating to the **supply** (including transmission) or generation of **electricity** or the price at which **electricity** is supplied, including an inability to inject **electricity** into the **grid** as a result of an **outage** of or damage to the **grid** or a **grid injection point** or the price of **electricity** exceeding a level specified in the contract

**sustained instantaneous reserve** means the average increase in generation or reduction in **demand** (in MW) provided by **instantaneous reserve** during the first 60 seconds after the start of a “Contingent Event” (as defined in the **policy statement**) and that is sustained for at least 15 minutes after the start of the “Contingent Event” (unless a new **dispatch instruction** is given before the expiry of that 15 minute period)

Clause 1.1(1) **sustained instantaneous reserve**: amended, on 3 May 2022, by clause 4(3)(e) of the Electricity Industry Participation Code Amendment (Enabling Energy Storage Systems to Offer Instantaneous Reserve) 2022.

**switch** means the process of a customer of a **losing retailer** changing from receiving the supply of **electricity** from the **losing retailer** to receiving the supply of **electricity** from a **gaining retailer**, and the term **switching** has a corresponding meaning

Clause 1.1(1) **switch**: inserted, on 31 March 2020, by clause 4 of the Electricity Industry Participation Code Amendment (Prohibition of Save and Win-Back Approaches by Losing Retailers During a Switch Protected Period) 2020.

**switch event meter reading**, in relation to a **meter** or **data storage device** that is located at an **ICP** that is being switched under Schedule 11.3, means—

- (a) a **validated meter reading**, if one is available; or
- (b) a reasonable estimate of the **meter reading** based on the **meter reading** contained in the final information provided in the switch file that the losing **trader** received when it gained the **ICP** if—
  - (i) a **validated meter reading** is not available; and
  - (ii) the losing **trader** has been recorded in the **registry** as being responsible for the **ICP** for a period of less than 3 months; or
- (c) in every other case, a **permanent estimate**

Clause 1.1(1) **switch event meter reading**: amended, on 9 October 2015, by clause 4 of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

**switch protected period** means the period that:

- (a) starts on the earlier of—
  - (i) the day on which the **registry manager**, under clause 22(a) of Schedule 11.3, makes written notice available to the **losing retailer** or the **losing retailer** otherwise becomes aware that a customer is switching to a **gaining retailer**; or
  - (ii) the day on which a **gaining retailer** assumes responsibility for billing a customer of a **losing retailer** for **electricity**; and
- (b) ends on the earlier of—
  - (i) the date that is 180 days after the relevant date specified in paragraph (a); or
  - (ii) the date on which the **losing retailer** receives a notice under clause 4A(1) of Schedule 11.5 from the **Authority** or otherwise becomes aware that the customer is switching from the **gaining retailer** back to the **losing retailer** due to an **event of default**; or
  - (iii) if the **gaining retailer** is a **trader** and makes a withdrawal request, the date on which the **registry manager**, under clause 22(b) of Schedule 11.3, makes written notice of the withdrawal request available to the **losing retailer** (if a **trader**); or
  - (iv) if the **trader** for the **losing retailer** and **gaining retailer** (neither of whom is a **trader**) is the same, the date on which the **trader** receives advice from the **gaining retailer** withdrawing the switch request from the **losing retailer**.

Clause 1.1(1) **switch protected period**: inserted, on 31 March 2020, by clause 4 of the Electricity Industry Participation Code Amendment (Prohibition of Save and Win-Back Approaches by Losing Retailers During a Switch Protected Period) 2020.

Clause 1.1(1) **switch protected period**: amended, on 1 March 2022, by clause 17(a) and (b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

**synchronised** means the condition whereby a synchronous **generating unit** is **electrically connected** to a **network** and the electrical angular velocity of the

**generating unit** corresponds with the **network** frequency and **synchronise, de-synchronise, synchronising, synchronism** and **synchronisation** have corresponding meanings. Asynchronous **intermittent generating stations** must be treated as being **synchronised** for the purposes of subpart 2 of Part 8

Clause 1.1(1) **synchronised**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **synchronised**: amended, on 5 October 2017, by clause 4(55) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1.1(1) **synchronised**: amended, on 20 March 2020, by clause 4(4) of the Electricity Industry Participation Code Amendment (Broadening Definitions of Generating Unit and Intermittent Generating Station) 2020.

**system instability** means operating conditions under which it is reasonably likely that 1 or more **generating units** may cease to be **synchronised** with the **grid**

**system number** means a coded number assigned to **assets** referred to in clause 2(1)(a) of **Technical Code A** of Schedule 8.3 for the purposes of the operation of the **grid** and the management of the **assets** that, when used in conjunction with a locality name, uniquely identifies the **assets**

**System operation document** means any of the following documents:

- (a) the **security of supply forecasting and information policy**;
- (b) the **emergency management policy**;
- (c) the **policy statement**;
- (d) the **procurement plan**;
- (e) the **AUFLS technical requirements report**;
- (f) the **system operator rolling outage plan**.

Clause 1.1(1) **system operation document**: inserted, on 1 August 2023, by clause 4(1) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

**system operator** has the meaning given to it in section 5 of the Act

**system operator register** means the register kept by the **system operator** for recording **equivalence arrangements, dispensations, and alternative ancillary service arrangements** in accordance with clause 8 of Schedule 8.1 and clause 4 of Schedule 8.2.

Clause 1.1(1) **system operator register**: amended, on 5 October 2017, by clause 4(56) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1.1(1) **system operator register**: amended, on 20 December 2021, by clause 4(18) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

**system operator rolling outage plan** means the system operating rolling outage plan that is incorporated by reference in this Code under clause 9.3

**system security** means the security and quality objectives set out in Part 8

**system security forecast** means the forecast prepared by the **system operator** under clause 8.15

**system security situation** means any situation that the **system operator** believes on reasonable grounds is not adequately mitigated by the current **policy statement** and 1 of the following exists:

- (a) the **system operator** reasonably considers that its ability to comply with the **principal performance obligations** is at risk;
- (b) there is a risk of significant damage to **assets**;
- (c) public safety is at risk

**system test** means a test conducted on an **asset**, with the **asset electrically connected to the grid**, to assess the interaction of the **asset with the grid**

Clause 1.1(1) **system test**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **system test**: amended, on 5 October 2017, by clause 4(57) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**tail water depressed reserve** means a form of **generation reserve** comprising a generating capacity on a motoring hydro generation set with no water flowing through the turbine that is available following a drop in system frequency

Clause 1.1(1) **tail water depressed reserve**: amended, on 3 May 2022, by clause 4(4) of the Electricity Industry Participation Code Amendment (Enabling Energy Storage Systems to Offer Instantaneous Reserve) 2022.

**technical codes** means the technical codes contained in Schedule 8.3

**temporary energisation** *[Revoked]*

Clause 1.1(1) **temporary energisation**: inserted, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 1.1(1) **temporary energisation**: revoked, on 5 October 2017, by clause 4(60) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**term**, for the purposes of subpart 5 of Part 13, means the term of a **risk management contract**, being the period between the **effective date** and the **end date**

**test facility** means a device that permits access to voltage and current circuits for testing purposes while the **metering installation** is in normal service

**time block** means a block of **trading periods** either from 1 to 16 (inclusive) or from 17 to 48 (inclusive) in each **trading day**. On the day on which **New Zealand daylight time** begins **time block** means a block of **trading periods** either from 1 to 14 (inclusive) or from 15 to 46 (inclusive). On the day on which **New Zealand daylight time** ends, **time block** means a block of **trading periods** either from 1 to 18 (inclusive) or from 19 to 50 (inclusive)

**time block meter channel** means a **meter channel** where—

- (a) the volume of **electricity** conveyed is recorded on two or more **meter registers**; and
- (b) each **meter register** is active for a fixed period of time; and
- (c) only one **meter register** is active at any point in time.

Clause 1.1(1) **time block meter channel**: inserted, on 1 February 2021, by clause 4(2) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

**time weighted contract price** means, in respect of a **risk management contract**, a price that has, in accordance with clause 13.220, been calculated, time weighted, adjusted to a **location factor** for the relevant **grid zone area**, and corrected for **losses**, for the purposes of subpart 5 of Part 13

Clause 1.1(1) **time weighted contract price**: inserted, on 30 October 2024, by clause (4)16 of the Electricity Industry Participation Code Amendment (Hedge Disclosure Obligations) 2024.

**total auction revenue** means, for each **auction**, the aggregate of all amounts owing by all **generators** in the relevant **time block**

Clause 1.1(1) **total auction revenue**: amended, on 24 March 2015, by clause 4(1)(u) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

**total required volume**, for the purposes of subpart 5B of Part 13, means 2.4 MW base load equivalent of **NZ electricity futures**, taking into account traded **NZ electricity futures** across both buy **quotes** and sell **quotes**

Clause 1.1(1) **total required volume**: inserted, on 1 September 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Hedge Market Arrangements) 2022.

**total traded NZEF**, for the purposes of subpart 5B of Part 13, means the cumulative total amount of buy **quotes** and sell **quotes** traded by that **participant** as **NZ electricity futures** up to the start of the current **volume refresh period** in that **NZEF market-making period** in relation to the applicable reference **node** (Benmore or Otahuhu) and for the particular month or calendar quarter referred to in clause 13.236L(1) for the **participant** to which the **total traded NZEF** is being applied

Clause 1.1(1) **total traded NZEF**: inserted, on 1 September 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Hedge Market Arrangements) 2022.

**traceable** means having the property of **traceability**

**traceability** is the property of the result of a measurement whereby it can be related to the SI units of measurement through an unbroken chain of comparisons, each with a stated **uncertainty**

**trade date**, for the purposes of subpart 5 of Part 13, means the date the **parties** enter into a **risk management contract**

Clause 1.1(1) **trade date**: amended, on 30 October 2024, by clause 4(17) of the Electricity Industry Participation Code Amendment (Hedge Disclosure Obligations) 2024.

**trader** means a **retailer** or a **generator** or a **purchaser** who—

- (a) buys **electricity** from the **clearing manager**; or
- (b) sells **electricity** to the **clearing manager**; or
- (c) enters into an arrangement with another **retailer** or **generator** or **purchaser** to buy or sell contracts (or parts of contracts) for **electricity** for the purposes of this Code

Clause 1.1(1) **trader**: amended, on 29 August 2013, by clause 4(2)(u) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**trading day** means the period from 0000 hours until 2400 hours on any day

**trading period** means a period of 30 minutes ending on each hour or 30 minutes past each hour on any **trading day**

**trading rights** means, in relation to a **generator** or a **purchaser**, the rights conferred on the **generator** or **purchaser** by this Code in relation to the trading of **electricity**

**transfer** *[Revoked]*

Clause 1.1(1) **transfer**: revoked, on 20 December 2021, by clause 4(19) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

**transformer branch** means a **branch** that contains a transformer

**transmission alternative** *[Revoked]*

Clause 1.1(1) **transmission alternative**: amended, on 21 September 2012, by clause 4(9) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

Clause 1.1(1) **transmission alternative**: revoked, on 15 May 2014, by clause 4(7)(a) of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

**transmission agreement** means an agreement for connection and/or use of the **grid** and includes a **default transmission agreement** under subpart 2 of Part 12 (including, if relevant, an agreement for investment in the **grid**)

Clause 1.1(1) **transmission agreement**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **transmission agreement**: amended, on 5 October 2017, by clause 4(58) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1.1(1) **transmission agreement**: amended, on 1 October 2023, by clause 4(5) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

**transmission alternative** means an alternative to investment in the **grid**, including investment in local generation, energy efficiency, demand-side management and **distribution network** augmentation set out in Part 12

Clause 1.1(1) **transmission alternative**: inserted, on 15 May 2014, by clause 4(7)(b) of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

**transmission pricing methodology** means the pricing methodology developed in accordance with subpart 4 of Part 12

**transmission security constraint** means a flow limit relating to the AC transmission system configuration, capacity and losses, including any adjustments that have been made in accordance with clause 13(2)(d) and (f) of Schedule 13.3, but excluding a flow limit set in relation to the **HVDC link**

Clause 1.1(1) **transmission security constraint**: amended, on 1 November 2022, by clause 4(10) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**Transpower** means Transpower New Zealand Limited

**type A co-generator** means the owner of a **type A industrial co-generating station**, in its capacity as owner of that **industrial co-generating station**

Clause 1.1(1) **type A co-generator**: inserted, on 27 May 2015, by clause 4(5) of the Electricity Industry Participation Code Amendment (Industrial Co-generation Dispatch Arrangements) 2015.

**type A industrial co-generating station** means an **industrial co-generating station** approved by the **Authority** under clause 8(1)(a)(i) of Schedule 13.4

Clause 1.1(1) **type A industrial co-generating station**: inserted, on 27 May 2015, by clause 4(5) of the Electricity Industry Participation Code Amendment (Industrial Co-generation Dispatch Arrangements) 2015.

**type B co-generator** means the owner of a **type B industrial co-generating station**, in its capacity as owner of that **industrial co-generating station**

Clause 1.1(1) **type B co-generator**: inserted, on 27 May 2015, by clause 4(5) of the Electricity Industry Participation Code Amendment (Industrial Co-generation Dispatch Arrangements) 2015.

**type B industrial co-generating station** means an **industrial co-generating station** approved by the **Authority** under clause 8(1)(a)(ii) of Schedule 13.4

Clause 1.1(1) **type B industrial co-generating station**: inserted, on 27 May 2015, by clause 4(5) of the Electricity Industry Participation Code Amendment (Industrial Co-generation Dispatch Arrangements) 2015.

**type-testing** means subjecting a sample or samples of a device to testing by an **approved test laboratory** accredited for the appropriate form of **type-testing** to verify compliance of that device with a prescribed standard or defined requirements, and **type-test** and **type-tested** have corresponding meaning

**unacceptable overloading** means that 1 or more **grid assets** exceed their stated capability, as set out in the **asset capability statements** for those **grid assets**, for the

prevailing conditions, including without limitation ambient and seasonal temperature, pre-fault loading and time dependent loading cycles

**unaccounted for electricity** and **UFE** mean, for any **balancing area**, the quantity of **electricity**, as calculated per **trading period** by the **reconciliation manager** under clause 16 of Schedule 15.4.

**unacceptable voltage conditions** means voltages on the **grid** outside the limits specified in Part 8 of this Code

**uncertainty** means a parameter associated with the result of a measurement that characterises the dispersion of the values that could reasonably be attributed to the quantity being measured, and must be determined to a confidence level of 95% or greater unless otherwise specifically stated

**unconstrained cleared offer price** [*Revoked*]

Clause 1.1(1) **unconstrained cleared offer price**: revoked, on 1 November 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**under-frequency event** means—

- (a) an interruption or reduction of **electricity** injected into the **grid**; or
- (b) an interruption or reduction of **electricity** injected from the **HVDC link** into the South Island **HVDC injection point** or the North Island **HVDC injection point**—

if there is, within any 60 second period, an aggregate loss of **injection of electricity** in excess of 60 **MW** (being the aggregate of the net reductions in the **injection of electricity** (expressed in **MW**) experienced at **grid injection points** and **HVDC injection points** by reason of paragraph (a) or (b)), and such loss causes the frequency on the **grid** (or any part of the **grid**) to fall below 49.25 Hz (as determined by **system operator** frequency logging)

**under-frequency limit** means the minimum frequency of 48hz for a contingent event

**undesirable trading situation** means any situation—

- (a) that threatens, or may threaten, confidence in, or the integrity of, the **wholesale market**; and
- (b) that, in the reasonable opinion of the **Authority**, cannot satisfactorily be resolved by any other mechanism available under this Code (but for the purposes of this paragraph a proceeding for a breach of clause 13.5A is not to be regarded as another mechanism for satisfactory resolution of a situation)

Clause 1.1(1) **undesirable trading situation**: substituted, on 18 July 2013, by clause 4(1) of the Electricity Industry Participation (Undesirable Trading Situation) Code Amendment 2013.

Clause 1.1(1) **undesirable trading situation**: amended, on 17 July 2014, by clause 4(2) of the Electricity Industry Participation Code Amendment (Pivotal Supply) 2014.

**unit cost** means the quantity calculated by dividing the product of the **consumer's half hour** consumption and the corresponding **half hour** prices over a defined time period by the sum of the **consumer's half hour** consumption over the same period of time (note that the **half hour** prices are based on the prices for trading at the **grid exit point** supplying energy to the **consumer**)

**unmetered load** means **electricity** consumed that is not directly recorded using a **meter**, but is calculated or estimated in accordance with this Code, and includes **shared unmetered load** and **distributed unmetered load**

**un-modelled transmission asset** means a **transmission asset** for which the **system operator's dispatch** optimisation model does not include **asset ratings** as a **constraint**

Clause 1.1(1) **un-modelled transmission asset**: inserted, at 12.00 pm on 19 September 2019, by clause 4(5) of the Electricity Industry Participation Code Amendment (Wind Offer Arrangements) 2019.

**unoffered generation** means **electricity** supplied from a **generating** station for which an **offer** has not been made in accordance with clause 13.25, but which is purchased by the **clearing manager**

**unplanned interruption**, for the purposes of Part 12, means an **interruption** caused by an **unplanned outage**

**unplanned outage**—

- (a) for the purposes of Technical Code D of Schedule 8.3, means any **outage** that is not a **planned outage**; and
- (b) for the purposes of Part 12, means an **outage** not planned in accordance with the planning requirements set out in the **Outage Protocol**

Clause 1.1(1) **unplanned outage**: replaced, on 1 January 2025, by clause 4(4) of the Electricity Industry Participation Code Amendment (Co-ordination of outages affecting common quality) 2024.

**unsupplied demand situation** means a situation in which—

- (a) there is **demand** at a **GXP**—
  - (i) in a **price-responsive schedule**, for which price and quantity values have been assigned by the **system operator** under clause 13.58AA(1)(a); or
  - (ii) in a **non-response schedule**, for which price and quantity values have been assigned by the **system operator** under clause 13.58AA(1)(b); or
  - (iii) in a **dispatch schedule**, for which price and quantity values have been assigned by the **system operator** under clause 13.69AA; and
- (b) the **system operator** expects that the relevant **demand** will be unable to be supplied by **offers** in the relevant **price-responsive schedule, non-response schedule, or dispatch schedule**

Clause 1.1(1) **unsupplied demand situation**: inserted, on 1 November 2022, by clause 4(1) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**use-of-system agreement** [*Revoked*]

Clause 1.1(1) **use-of-system agreement**: inserted, on 1 December 2011, by clause 4(a) of the Electricity Industry Participation Code (Distributor Use-of-System Agreements and Distributor Tariffs) Amendment 2011.

Clause 1.1(1) **use-of-system agreement**: amended, on 1 February 2016, by clause 4(17) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 1.1(1) **use-of-system agreement**: revoked, on 20 July 2020, by clause 4(2) of the Electricity Industry Participation Code Amendment (Default Distributor Agreement) 2020.

**validated meter reading** means a **meter reading** that has passed a **reconciliation participant's** validation process in accordance with clauses 16 and 17 of Schedule 15.2

**value of expected unserved energy** means the value of any **expected unserved energy** that applies under clause 4 of Schedule 12.2 or clause 12.39

Clause 1.1(1) **value of expected unserved energy**: amended, on 1 February 2016, by clause 4(18) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

**verification notice**, for the purposes of subpart 5 of Part 13, means the notice provided by the **other party** in accordance with clause 13.226(2)(b) or (c)

**voltage support** means an **ancillary service** comprising **reactive power injection** to the power system to boost voltage at the point of injection

**volume refresh**, for the purposes of subpart 5B of Part 13, means the requirement in accordance with clause 13.236L(3) to refresh the number of **quotes** provided by that **participant**

Clause 1.1(1) **volume refresh**: inserted, on 1 September 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Hedge Market Arrangements) 2022.

**volume refresh period**, for the purposes of subpart 5B of Part 13, means, for a particular **volume refresh**, the time period from the time the most recent buy or sell **quotes** were traded as **NZ electricity futures** until the time the **volume refresh** is completed

Clause 1.1(1) **volume refresh period**: inserted, on 1 September 2022, by clause 4(2) of the Electricity Industry Participation Code Amendment (Hedge Market Arrangements) 2022.

**volume information** means the information describing the quantity of **electricity** generated, conveyed, or consumed that is calculated or estimated from **raw meter data** and supporting data, and in the case of **unmetered load**, calculated in accordance with this Code

**washup** means the correction procedure followed as set out in subpart 6 of Part 14 if incorrect information, including **volume information**, has been used in calculating an amount owing under Part 14

Clause 1.1(1) **washup**: amended, on 24 March 2015, by clause 4(1)(v) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

**wholesale market** means—

- (a) the spot market for **electricity**, including the processes for setting—
  - (i) *[Revoked]*:
  - (ii) **forecast prices** and **forecast reserve prices**:
  - (iii) *[Revoked]*:
  - (iv) **interim prices** and **interim reserve prices**:
  - (v) **final prices** and **final reserve prices**:(vi)**dispatch prices** and **dispatch reserve prices**:
- (b) markets for **ancillary services**:
- (c) the hedge market for **electricity**, including the market for **FTRs**

Clause 1.1(1) **wholesale market**: substituted, on 18 July 2013, by clause 4(2) of the Electricity Industry Participation (Undesirable Trading Situation) Code Amendment 2013.

Clause 1.1(1) **wholesale market**: subparagraphs (i) and (iii) revoked, on 1 November 2022, by clause 4(11)(a) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

Clause 1.1(1) **wholesale market**: subparagraph (vi) inserted, on 1 November 2022, by clause 4(11)(b) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

**wind generating station** means 1 or more **generating units** that are connected to the **grid** or to a **local network** and that inject into the **grid** or a **local network** (as the case may be) at a single point of **injection**, and for which wind is the primary power source

Clause 1.1(1) **wind generating station**: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1.1(1) **wind generating station**: amended, on 5 October 2017, by clause 4(59) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**winter capacity margin** means the difference between a measure of the expected capacity and expected demand from 1 April to 31 October between 7am and 10pm, expressed as a MW margin over demand

**winter energy margin** means the difference between the expected amount of energy that can be supplied and expected demand during the period 1 April to 30 September, expressed as a percentage of expected demand

**WITS** means the system operated by the **WITS manager**

Clause 1.1(1) **WITS**: inserted, on 5 October 2017, by clause 4(61) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**WITS manager** means the **market operation service provider** for the time being appointed as wholesale information trading system provider under this Code

Clause 1.1(1) **WITS manager**: inserted, on 5 October 2017, by clause 4(61) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**working day** *[Revoked]*

Clause 1.1(1) **working day**: revoked, on 5 October 2017, by clause 4(60) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**working standard** means a measuring instrument that has been **calibrated** by an **approved calibration laboratory** or an **ATH**, that is used routinely for the **calibration of metering installations and metering components**

Clause 1.1(1) **working standard**: amended, on 29 August 2013, by clause 4(2)(v) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

**works** has the meaning given to it in section 5 of the **Act**

**year** *[Revoked]*

Clause 1.1(1) **year**: revoked, on 5 October 2017, by clause 4(60) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**zone** means the following **points of connection**:

- (a) zone 1: all **points of connection** to the **grid** in the North Island on circuits north of Huntly (excluding the Thames Valley spur):
  - (b) zone 2: all **points of connection** to the **grid** in the North Island not in zone 1:
  - (c) zone 3: all **points of connection** to the **grid** in the South Island on circuits north of (and not including) Islington, Coleridge, Hororata and Papanui:
  - (d) zone 4: all **points of connection** to the **grid** in the South Island not in zone 3
- (2) Any term that is defined in the **Act** and used, but not defined in this Code, has the same meaning as in the **Act**.

Compare: Electricity Governance Rules 2003 rule 1 part A

## 1.2 General principles of construction

In this Code—

- (a) a **participant** who carries on the functions or **business** of a **generator**, a **purchaser**, a **distributor**, a **grid owner** or a **market operation service provider** is, for the purpose of this Code, to be treated as a separate person for each such function or **business**, notwithstanding that at law all or any of the functions or **businesses** may be carried on by the same person; and

- (b) for the purpose of the arrangements expressed in this Code as to the supply and conveyance of **electricity** by a **generator** or a **purchaser** to another **generator** or **purchaser**, the supply and conveyance is deemed to have been made, notwithstanding that the physical flow of **electricity** from **generators** to **consumers** will not necessarily correspond with the contractual supply of **electricity** from **generators** to **purchasers**.

Compare: Electricity Governance Rules 2003 rule 2 part A

### 1.3 Special definition of “related”

For the purposes of this Code a person (the “first person”) is deemed to be related to another person (the “second person”) if the first person is related to the second person by reason of any domestic or **business** relationship (other than because the second person is a customer of the first person), such that the first person can reasonably be expected to have influence over the second person’s judgment in trading or investment matters, or to be consulted by the second person before any such judgment is formed, and if the first person is deemed to be so connected, the second person is also deemed to be related to the first person. No person is deemed to be related to any other person if either person is a shareholding minister as that term is defined in section 2 of the State-Owned Enterprises Act 1986 or any other New Zealand legislation, provided that person is acting in his or her capacity as a shareholding minister.

Compare: Electricity Governance Rules 2003 rule 3 part A

Clause 1.3: amended, on 1 November 2018, by clause 4(11) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

### 1.4 Special definition of “independent”

A person is deemed to be independent for the purposes of this Code, unless the person—

- (a) is a director or employee of a **participant**; or
- (b) has a direct or indirect financial interest, whether legal or beneficial, and whether as a shareholder, a partner or another equity holder in a **participant**, other than an interest not greater than 0.1% of the equity capital or funds of the relevant entity or, if that entity is a **subsidiary** of another entity, of the other entity; or
- (c) is a director or employee of a shareholder, a partner or another equity holder referred to in paragraph (b); or
- (d) is a person who regularly or from time to time trades, directly or indirectly, under this Code.

Compare: Electricity Governance Rules 2003 rule 4 part A

### 1.5 Special definition of “purchaser” and “participant”

- (1) For any matter that relates to a **trading period** during which a notice given under subclause (2) is in effect, a reference in Parts 8, 13, 14, or 14A of this Code to a **purchaser** or a **participant** that incurs financial obligations under this Code or owes an amount to the **clearing manager**, if it refers to a **participant** who is described as participant B in the notice, must be read as a reference to the **participant** who is described as participant A in the notice.

- (2) A **participant** (participant A) may, by notice in the form set out in Schedule 1.1, give notice to the **Authority** that, from a date specified in the notice, participant A will assume all rights and obligations under Parts 8, 13, 14, and 14A of this Code of another **participant** named in the notice (participant B) in participant B's capacity as a **purchaser** and a **participant** that incurs financial obligations under this Code or owes an amount to the **clearing manager**.
- (3) A notice given under subclause (2) takes effect from the first **trading period** on—
  - (a) the date specified in the notice, which must be at least 10 **business days** after the date that the notice is given to the **Authority**, or
  - (b) if the **Authority** reasonably considers additional time is required in any particular case, any later date specified by the **Authority** in a notice given to the **participant** (participant A) within 10 **business days** after the date the **Authority** receives the notice in subclause (2).
- (4) A notice given under subclause (2) does not take effect unless the **Authority** approves it by notice to the **clearing manager**, participant A, and participant B.
- (5) Participant A or participant B may revoke a notice given under subclause (2) by giving notice to the **Authority** in the form set out in Schedule 1.2.
- (6) A revocation takes effect from the first **trading period** on the date specified in the notice. That date must be at least 15 **business days** after the date that the notice is given to the **Authority**.
- (7) A notice given under subclauses (2) or (5) must be signed by both participant A and participant B.
- (8) The **Authority** must **publish** notice of—
  - (a) each approval given by the **Authority** under subclause (4); and
  - (b) each revocation under subclause (5).
- (9) If, but for this clause, a provision in Parts 8, 13, 14, or 14A of this Code would confer a right or impose an obligation on participant B in participant B's capacity as a **purchaser** or a **participant** that incurs financial obligations under this Code or owes an amount to the **clearing manager**, that provision must be read as conferring the right or imposing the obligation on participant A in respect of every **trading period** during which a notice under subclause (2) is in effect.
- (10) Participant A is able to comply with any obligation that arises from the operation of subclause (9) by complying in aggregate with its own obligations under this Code and obligations that arise from the operation of subclause (9).
- (11) To avoid doubt, for any **trading period** during which a notice under subclause (2) is in effect, participant A is deemed to be the person who buys **electricity** from the **clearing manager** for participant B.

Compare: Electricity Governance Rules 2003 rule 5 part A

Heading of clause 1.5: amended, on 24 March 2015, by clause 4(2)(a) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

Clause 1.5(1): amended, on 24 March 2015, by clause 4(2)(b) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

Clause 1.5(2): amended, on 24 March 2015, by clause 4(2)(c) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

Clause 1.5(9): amended, on 24 March 2015, by clause 4(2)(d) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

Clause 1.5(3): replaced, on 1 March 2024, by clause 5 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

### 1.5A Application of Code to distributors

Except in Parts 6, 9, and 12A, nothing in this Code applies to a **distributor** in respect of its **distribution** activities that are not conducted on a **network** that is—

- (a) directly connected to the **grid**; or
- (b) indirectly connected to the **grid** through 1 or more other **networks**.

Clause 1.5A: inserted, on 1 February 2016, by clause 5 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 1.5A: amended, on 5 October 2017, by clause 5 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 1.6 Contents tables

The contents tables that appear at the beginning of this Code, and at the beginning of each Part, are included only to assist in reading this Code, and do not form part of it.

### 1.7 Defined terms appear in bold

Words and phrases appear in bold in this Code only to alert the reader to the fact that they are defined in this Part.

- 2.16 Authority may specify information that participants must collect, collate and/or provide regularly or in response to events
- 2.17 Requirements that the Authority must or may specify in a notice under clause 2.16
- 2.18 Authority must consult before publishing notice
- 2.19 Factors the Authority must consider before publishing notice
- 2.20 Participants must provide information to Authority
- 2.21 Participants may identify confidential information
- 2.22 Authority dealing with information identified as confidential
- 2.23 Privilege against self-incrimination
- 2.24 Authority may amend notice

---

##### *Power to request Code information*

#### **2.1 Requests for Code information**

- (1) A **participant** may request the **Authority** to make available to the **participant** (the requesting **participant**) any **Code information** held by the **Authority** or by any other **participant**.

- (2) The request must specify, with as much particularity as possible, the nature of the information sought and the name of the **participant** who is believed to hold the information.

Compare: SR 2003/374 r 15

*Information held by Authority*

**2.2 Information held by Authority**

If the **Authority** receives a request for the supply of **Code information** that the **Authority** holds, the **Authority** must—

- (a) consider and process the request in accordance with the Official Information Act 1982; and
- (b) if the **Authority** proposes to provide the information to the requester, give prior written notice to the **participant** that supplied the information to the **Authority**.

Compare: SR 2003/374 r 16

Clause 2.2(b): replaced, on 5 October 2017, by clause 8 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

*Information held by other participants*

**2.3 Information not held by Authority**

The rest of this Part applies if the **Authority** receives a request for the supply of **Code information** that the **Authority** does not hold.

Compare: SR 2003/374 r 17

**2.4 Authority must contact participant believed to hold requested information**

The **Authority** must, as soon as practicable after receiving a request for **Code information** that it does not hold, send a written notice to the **participant** who the **Authority** believes holds the relevant **Code information**—

- (a) giving the **participant** written notice of the request made to the **Authority**, and the name and address of the requesting **participant**; and
- (b) requesting the **participant** to either—
  - (i) supply the information, together with a note of the **participant's** charges (if any) in relation to the supply of information; or
  - (ii) supply reasons for refusing to supply the information.

Compare: SR 2003/374 r 18

Clause 2.4: amended, on 5 October 2017, by clause 9(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 2.4(a): amended, on 5 October 2017, by clause 9(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**2.5 Participant must consider request**

A **participant** who receives a request under clause 2.4(b) must consider that request in accordance with clauses 2.6 to 2.8.

Compare: SR 2003/374 r 19

**2.6 Code information should be made available to all participants unless good reason**

- (1) The general principle to be followed by **participants** in relation to **Code information** is that **Code information** should be made available to all **participants** unless there is good reason for refusing to supply it.
- (2) A **participant** has good reason for refusing to supply **Code information** if the supply of the information would be likely to—
  - (a) breach a legislative, regulatory, or other legal requirement; or
  - (b) prejudice the maintenance and supervision of this Code, including the prevention, investigation, and detection of Code breaches and the right to a fair hearing before the **Rulings Panel**; or
  - (c) result in a disclosing **participant** breaching an obligation of confidentiality; or
  - (d) interfere with the privacy of natural persons; or
  - (e) create an improper gain or improper advantage for the requesting **participant** or any other **participant** or person; or
  - (f) commercially disadvantage the disclosing **participant** or any other **participant** or person, in a material manner; or
  - (g) prejudice the future supply of information that is required by a **market operation service provider** to perform any obligation under this Code.

Compare: SR 2003/374 r 20

## 2.7 Other reasons

A **participant** may also refuse to supply **Code information** if—

- (a) the information requested is, or will soon be, made available to the public; or
- (b) the information requested does not exist or cannot be found; or
- (c) the information requested cannot be made available without substantial collation or research and the **Authority** agrees that it is unreasonable to undertake the collation or research; or
- (d) the request is frivolous or vexatious or the information requested is trivial.

Compare: SR 2003/374 r 21

Clause 2.7(a): amended, on 5 October 2017, by clause 10 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 2.8 Transfer of requests

- (1) This clause applies if—
  - (a) a notice is sent to a **participant** under clause 2.4(b); and
  - (b) the information to which the request relates—
    - (i) is not held by the **participant** but is believed by the person dealing with the notice to be held by another **participant**; or
    - (ii) is believed by the person dealing with the notice to be more closely related to the activities of another **participant**.
- (2) The **participant** to which the notice was sent must promptly, and in any case not later than **10 business days** after the day on which the notice is received, transfer the notice to the other **participant**, and inform the **Authority** accordingly.

Compare: SR 2003/374 r 22

Clause 2.8(1)(b)(ii): amended, on 5 October 2017, by clause 11(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 2.8(2): amended, on 5 October 2017, by clause 11(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 2.9 Participants must not enter contracts that prejudice supply of Code information

A **participant** must, so far as is reasonably practicable without materially affecting its business or its ability to meet its obligations under this Code, avoid entering into an obligation with a person that would have the effect of prejudicing that **participant's** ability to comply freely with the provisions of this Part.

Compare: SR 2003/374 r 23

## 2.10 Decision about supplying information

A **participant** must, as soon as practicable after considering a request, inform the **Authority** and the requesting **participant** of whether it agrees or refuses to supply all or part of the **Code information** requested.

Compare: SR 2003/374 r 24

## 2.11 Process if participant agrees to supply information

- (1) If a **participant** agrees to supply all or part of the **Code information** requested, the **participant** must, as soon as practicable,—
  - (a) inform the **Authority** and the requesting **participant** of the information that will be supplied, and the amount of any charges to be paid for the supply of that information under clause 2.12; and
  - (b) supply that information, with any deletions authorised by clause 2.13, to the **Authority**.
- (2) The **Authority** must, as soon as practicable after receiving the information, and any charges required to be paid in respect of it by the requesting **participant**, send the information to the requesting **participant**.

Compare: SR 2003/374 r 25

## 2.12 Charges payable

- (1) A **participant** that supplies **Code information** may charge the requesting **participant** for—
  - (a) the reasonable cost of labour and materials involved in supplying the information to the requesting **participant**; and
  - (b) any additional costs incurred as a result of a request for urgent availability.
- (2) The **participant** that supplies the **Code information**, or the **Authority**, may require the whole or any part of the charge to be paid in advance by the requesting **participant**.

Compare: SR 2003/374 r 26

## 2.13 Documents may include deletions

If the **Code information** requested is contained in a **document**, and there are good reasons for refusing to supply some of the information contained in the **document**, the **participant** supplying the information may supply a copy of the **document** with any deletions or alterations that are necessary.

Compare: SR 2003/374 r 27

## 2.14 Process if participant refuses to supply information

- (1) If the **participant** refuses to supply all or any of the **Code information** requested, the **participant** must, as soon as practicable, give written notice to the **Authority** and the requesting **participant** of both the refusal and of the reasons for the refusal.
- (2) The **Authority** must, as soon as practicable after receiving the notice, advise the requesting **participant** of its rights to appeal under clause 2.15.

Compare: SR 2003/374 r 28

Clause 2.14(1): amended, on 5 October 2017, by clause 12(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 2.14(2): amended, on 5 October 2017, by clause 12(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 2.15 Appeal

A requesting **participant** who receives written notice under clause 2.14 that another **participant** refuses to supply any **Code information** may appeal that refusal by notice of appeal to the **Rulings Panel**.

Compare: SR 2003/374 r 29

Clause 2.15: amended, on 5 October 2017, by clause 13 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### *Regular and event-driven provision of information to the Authority*

Subheading: inserted, on 1 August 2022, by clause 6 of the Electricity Industry Participation Code Amendment (Regular and Event-Driven Provision of Information to the Authority) 2022.

## 2.16 Authority may specify information that participants must collect, collate and/or provide regularly or in response to events

- (1) The **Authority** may **publish** a notice specifying information that a **participant** must, on a regular basis or as a result of an identified event, provide to the **Authority**.
- (2) The **Authority** may specify information under subclause (1) only for the purposes set out in section 45(a) of the **Act** being to carry out the **Authority's** monitoring functions which are to—
  - (a) monitor compliance with the **Act**, the regulations and the Code under section 16(1)(c) of the **Act**; or
  - (b) undertake and monitor the operation and effectiveness of market-facilitation measures under section 16(1)(f) of the **Act**; or
  - (c) undertake industry and market monitoring, and carry out and make publicly available reviews, studies, and inquiries into any matter relating to the electricity industry, under section 16(1)(g) of the **Act**.
- (3) The **Authority** may not specify information under subclause (1) for the purpose of investigating or enforcing compliance with the **Act**, the regulations and the Code except that it may use information obtained under a notice **published** under subclause (1) in the course of making a decision to appoint an investigator under regulation 12 of the Electricity Industry (Enforcement) Regulations 2010.

Clause 2.16: inserted, on 1 August 2022, by clause 6 of the Electricity Industry Participation Code Amendment (Regular and Event-Driven Provision of Information to the Authority) 2022.

Clause 2.16(2)(a) & (3): amended, on 1 March 2024, by clause 6(1) & (2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

## 2.17 Requirements that the Authority must or may specify in a notice under clause 2.16

- (1) In a notice **published** under clause 2.16, the **Authority** must specify the following information requirements:
  - (a) the **participant** who must provide the information:
  - (b) the information the **Authority** requires the **participant** to provide, to a reasonable level of detail:
  - (c) either:
    - (i) the time and/or the frequency at which the **participant** must provide the information to the **Authority**; or
    - (ii) the event following which the **participant** must provide the information to the **Authority** and the time by which the **participant** must provide the information
  - (d) the manner in which the **participant** must provide the information to the **Authority**:
  - (e) the date from which the notice applies, which can be different dates for different **participants**.
- (2) In a notice **published** under clause 2.16, the **Authority** may specify 1 or more standard formats in which the **participant** must provide the information to the **Authority**.  
Clause 2.17: inserted, on 1 August 2022, by clause 6 of the Electricity Industry Participation Code Amendment (Regular and Event-Driven Provision of Information to the Authority) 2022.

## 2.18 Authority must consult before publishing notice

- (1) Before **publishing** a notice under clause 2.16, the **Authority** must provide to the **participant** to whom the proposed notice applies—
  - (a) the proposed notice; and
  - (b) the **Authority**'s purpose in setting the information requirements in the proposed notice; and
  - (c) the **Authority**'s assessment of the likely benefits of the **Authority** obtaining the information required in the proposed notice and whether those benefits are expected to outweigh the likely costs.
- (2) The **Authority** must give that **participant** a reasonable opportunity to make submissions to the **Authority** on the proposed notice and take into account those submissions in deciding whether to—
  - (a) make any reasonable changes to the information requirements to be included in the **published** notice; and
  - (b) **publish** the notice.
- (3) The **Authority** may, but is not required to, consult with any other person the **Authority** wishes, following whatever consultation process the **Authority** considers appropriate.
- (4) If, following the consideration of submissions under subclause (2), the **Authority** proposes to extend the number of **participants** to whom it proposes the notice will

apply, the **Authority** must consult with those additional **participants** following the process in subclauses (1) and (2) if it has not already.

Clause 2.18: inserted, on 1 August 2022, by clause 6 of the Electricity Industry Participation Code Amendment (Regular and Event-Driven Provision of Information to the Authority) 2022.

## 2.19 Factors the Authority must consider before publishing notice

- (1) Before **publishing** a notice under clause 2.16, the **Authority** must be satisfied that—
  - (a) the benefits of the **Authority** obtaining the information outweigh the costs of the information requirements set out in the proposed notice; and
  - (b) the information requirements set out in the proposed notice promote one or more of the **Authority's** objectives in section 15 of the **Act**.
- (2) Before **publishing** a notice under clause 2.16, the **Authority** must consider the impact of the proposed information requirements on each **participant** to whom it is proposed the notice apply.

Clause 2.19: inserted, on 1 August 2022, by clause 6 of the Electricity Industry Participation Code Amendment (Regular and Event-Driven Provision of Information to the Authority) 2022.

Clause 2.19(1)(b): amended, on 1 March 2024, by clause 7 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

## 2.20 Participants must provide information to Authority

- (1) If the **Authority publishes** a notice under clause 2.16, each **participant** to whom the notice applies must—
  - (a) collect and record the information specified in the notice; and
  - (b) collate from its own systems, records and/or information the information specified in the notice; and
  - (c) provide to the **Authority** the information specified in the notice; and
  - (d) meet the other information requirements specified in the notice.
- (2) A **participant** does not need to provide any information to the **Authority** under subclause (1)(c) if—
  - (a) the **participant** has legal professional privilege in respect of the information; or
  - (b) it is not reasonably possible for the **participant** to obtain that information, including because the person that holds the information may lawfully refuse to provide the information to the **participant**.

Clause 2.20: inserted, on 1 August 2022, by clause 6 of the Electricity Industry Participation Code Amendment (Regular and Event-Driven Provision of Information to the Authority) 2022.

## 2.21 Participants may identify confidential information

- (1) In supplying information under clause 2.20, a **participant** may identify any information for which confidentiality is sought by reason that—
  - (a) disclosure of the information would unreasonably prejudice the commercial position of the **participant** or the person who is the subject of that information; or
  - (b) confidentiality is necessary to protect information which is itself subject to an obligation of confidence; or

- (c) if clause 2.20 did not apply, disclosure of the information by the **participant** would be in breach of law.

Clause 2.21: inserted, on 1 August 2022, by clause 6 of the Electricity Industry Participation Code Amendment (Regular and Event-Driven Provision of Information to the Authority) 2022.

## 2.22 Authority dealing with information identified as confidential

- (1) If a **participant** identifies to the **Authority** any information under clause 2.21, the **Authority** will determine whether—
- (a) there are reasons for keeping the information confidential; and
  - (b) if there are reasons to keep the information confidential as determined by the **Authority**, those reasons are outweighed by other considerations which render it desirable for the **Authority** to make all or any part of the information publicly available in order to give effect to one or more of the **Authority's** objectives in section 15 of the **Act** and for the purposes of any of the **Authority's** functions in either:
    - (i) section 16 of the **Act**; or
    - (ii) section 14 of the Crown Entities Act 2004.
- (2) If the **Authority** does not consider under subclause 1(a) that there are reasons for keeping the information confidential, the **Authority** is not required to keep the information confidential.
- (3) If the **Authority** considers that it is desirable under subclause 1(b) to make all or any part of the information publicly available, the **Authority**—
- (a) is not required to keep the information confidential; and
  - (b) will inform the **participant** of that decision, provided that doing so is reasonably possible in the circumstances and does not compromise the reasons for making the information publicly available.
- (4) If the **Authority** considers under subclause 1(a) that there are reasons for keeping the information confidential and does not consider that it is desirable under subclause 1(b) to make all or any part of the information publicly available, subject to subclause (5), the **Authority** must keep the information identified by a **participant** under clause 2.21 confidential.
- (5) Subclause (4) does not prevent the **Authority** from—
- (a) using the information identified under clause 2.21 for any purpose in connection with one or more of the **Authority's** objectives in section 15 of the **Act** or the **Authority's** functions in section 16 of the **Act** or section 14 of the Crown Entities Act 2004; or
  - (b) disclosing the information to any person in connection with a purpose referred to in paragraph (a) in anonymised form or in consolidated form with other information such that the reasons for keeping the information confidential are not compromised; or

- (c) disclosing the information where the **participant** who supplied the information or the person who is the subject of the information (if different from the **participant**) either:
- (i) has consented specifically to the disclosure of that information; or
  - (ii) has consented generally to the disclosure, even where the **participant** identifies the information as confidential under clause 2.21, of:
    - (A) information specified in the notice **published** under clause 2.16 under which the **participant** supplied the information to the **Authority**; or
    - (B) a category of information specified in the notice **published** under clause 2.16 under which the **participant** supplied the information and the **Authority** reasonably considers the information that it intends to disclose comes within that category; or
- (d) disclosing the information as required by or under law.

Clause 2.22: inserted, on 1 August 2022, by clause 6 of the Electricity Industry Participation Code Amendment (Regular and Event-Driven Provision of Information to the Authority) 2022.

Clause 2.22(1)(b): amended, on 1 March 2024, by clause 8(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Clause 2.22(5)(a): amended, on 1 March 2024, by clause 8(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

### 2.23 Privilege against self-incrimination

The **Authority** must comply with section 48(2) and 48(3) of the **Act** in respect of information that is subject to privilege against self-incrimination.

Clause 2.23: inserted, on 1 August 2022, by clause 6 of the Electricity Industry Participation Code Amendment (Regular and Event-Driven Provision of Information to the Authority) 2022.

### 2.24 Authority may amend notice

- (1) The **Authority** may amend a notice **published** under clause 2.16 following the procedure set out in clause 2.18 and complying with clause 2.19.
- (2) The **Authority** does not need to consult under clause 2.18 on a proposed amendment to a notice if it is satisfied on reasonable grounds that—
  - (a) the nature of the amendment is technical and non-controversial; or
  - (b) there is widespread support for the amendment among the **participants** to whom the notice applies and to whom the proposed amendment will apply; or
  - (c) there has been adequate prior consultation (for instance, by or through an advisory group) so that all relevant views have been considered.

Clause 2.24: inserted, on 1 August 2022, by clause 6 of the Electricity Industry Participation Code Amendment (Regular and Event-Driven Provision of Information to the Authority) 2022.

- 3.17 Market operation service provider must arrange audit of software
- 3.18 Requirements for using software

---

### 3.1 Appointment of market operation service providers

- (1) The **Authority** must appoint a person or persons to perform each of the following **market operation service provider** roles:
  - (a) **registry manager:**
  - (b) **reconciliation manager:**
  - (c) *[Revoked]:*
  - (d) **clearing manager:**
  - (e) **FTR manager:**
  - (f) **WITS manager:**
  - (g) *[Revoked]:*

- (h) any other role identified in regulations as a **market operation service provider** role and for which market operation services are provided under this Code.
- (2) *[Revoked]*.
- (3) The **system operator** is also a **market operation service provider**, but clauses 3.3, 3.10 and 3.15 do not apply to the **system operator**.
- (4) The **Authority** may also appoint a person or persons to act as an industry service provider in providing any service under this Code.

Compare: SR 2003/374 r 30

Clause 3.1(3): amended, on 19 May 2016, by clause 5 of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 3.1(1): substituted, on 5 October 2017, by clause 14(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 3.1(1)(g): revoked, on 21 December 2021, by clause 5 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

Clause 3.1(2): revoked, on 5 October 2017, by clause 14(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 3.1(1)(c): revoked, on 1 November 2022, by clause 5 of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

### 3.2 Functions, rights, powers, and obligations of market operation service providers

A **market operation service provider** has the functions, rights, powers, and obligations set out in relation to that **market operation service provider** under this Code and Part 2 and Subpart 1 of Part 4 of the **Act**.

Compare: SR 2003/374 r 31

Clause 3.2: amended, on 5 October 2017, by clause 15 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### 3.2A Market operation service providers to assist Authority to give effect to Authority's main statutory objective

- (1) Each **market operation service provider** must perform its obligations under this Code in a way that assists the **Authority** to give effect to the **Authority's** main objective in section 15 of the **Act**.
- (2) The **system operator** must progressively increase the extent to which it assists the **Authority** to give effect to the **Authority's** main objective in section 15 of the **Act**.
- (3) The **system operator** is not required to comply with subclause (1) when exercising discretion in real time in performing its functions.
- (4) This clause does not permit a **market operation service provider** to contravene any other provision of this Code.

Clause 3.2A: inserted, on 19 May 2016, by clause 6 of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 3.2A Heading: amended, on 1 March 2024, by clause 9(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Clause 3.2A(1) and (2): amended, on 1 March 2024, by clause 9(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

### 3.3 Term of appointment of market operation service provider

- (1) A **market operation service provider's** term of appointment, and the date on which the term begins, is as agreed between the **Authority** and the **market operation service provider**.

- (2) The **Authority** may at any time terminate, re-appoint, or change the appointment of a person as a **market operation service provider**, subject to the terms of any agreement between that **market operation service provider** and the **Authority**.

Compare: SR 2003/374 r 32(1) and (2)

### 3.4 Terms of market operation service provider agreements

- (1) The remuneration of a **market operation service provider** is as agreed between the **Authority** and the **market operation service provider**.
- (2) The **Authority** and the **market operation service provider** may agree on any other terms and conditions, not inconsistent with the functions, rights, powers, and obligations of that **market operation service provider** under this Code and Part 2 and Subpart 1 of Part 4 of the **Act**.

Compare: SR 2003/374 r 33

Clause 3.4(2): amended, on 19 December 2014, by clause 5 of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.

Clause 3.4(2): amended, on 5 October 2017, by clause 16 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 3.5 Publication of market operation service provider agreements

The **Authority** must **publish** each **market operation service provider agreement**.

Compare: SR 2003/374 r 34

Clause 3.5: amended, on 5 October 2017, by clause 17 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 3.6 Insurance cover

Each **market operation service provider** must at all times maintain any insurance cover that is required by the **Authority**, on terms and in respect of risks approved by the **Authority**, with an insurer approved by the **Authority**.

Compare: SR 2003/374 r 36

*Force majeure provisions relating to market operation service providers*

### 3.7 Relief of obligation because of force majeure

- (1) A **market operation service provider** is relieved of an obligation under this Code and under the Electricity Industry (Enforcement) Regulations 2010 to the extent that, and for so long as, it is unable to perform the obligation as a result of a **force majeure event**.
- (2) Subclause (1) applies only—
- if the **market operation service provider** promptly advises the **Authority** of—
    - the details of the **force majeure event**; and
    - the obligation that cannot be performed; and
    - the likely duration of the inability to perform the obligation; and
  - for so long as the **market operation service provider** uses its reasonable endeavours to overcome the inability to perform the obligation from which it seeks relief and to remove or mitigate the effect of the **force majeure event**; and
  - if the **market operation service provider** provides the **Authority** with reports in accordance with subclauses (3) and (4).

- (3) As soon as practicable, but in any event no later than by the end of the month following the month in which the **market operation service provider** advises the **Authority** of a **force majeure event** under subclause (2)(a), the **market operation service provider** must provide the **Authority** with a written report that sets out—
  - (a) the full details of the **force majeure event**; and
  - (b) the actions the **market operation service provider** is taking or intends to take to comply with subclause (2)(b); and
  - (c) the proposed timeline for completing the actions.
- (4) By the end of each following month (unless the **Authority** advises that reports may be provided less frequently or are not required) the **market operation service provider** must provide the **Authority** with a written report that updates the information previously provided and includes any other matters related to the **force majeure event** that the **Authority** requests.
- (5) The **Authority** must **publish** the information provided under subclause (2)(a) and the reports provided under subclauses (3) and (4) as soon as practicable after receiving the information.
- (6) Despite subclause (5), the **Authority** must not **publish** or otherwise make available to the public any information or any part of a report if the **market operation service provider** advises the **Authority** (with reasons) that the **market operation service provider** considers that it would have good reason to refuse to supply the information or the part under clause 2.6 or clause 2.7.

Compare: SR 2003/374 r 38

Clause 3.7: substituted, on 1 November 2012, by clause 5 of the Electricity Industry Participation (Force Majeure) Code Amendment 2012.

Clause 3.7(5): amended, on 5 October 2017, by clause 18(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 3.7(6): amended, on 5 October 2017, by clause 18(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 3.8 Effect of relief

If a **market operation service provider** is relieved of an obligation under clause 3.7,—

- (a) the **market operation service provider** is not liable for a breach of this Code or with the Electricity Industry (Enforcement) Regulations 2010 in respect of that obligation during the period for which the relief applies under that clause; and
- (b) any costs arising from the relief from the obligation lie where they fall, except that the **Authority** and the **market operation service provider** may agree to adjust the remuneration of the **market operation service provider**.

Compare: SR 2003/374 r 39

Clause 3.8(a): amended, on 1 November 2012, by clause 6 of the Electricity Industry Participation (Force Majeure) Code Amendment 2012.

### 3.9 Authority may contract elsewhere during force majeure event

For the duration of a **force majeure event**, the **Authority** may contract with others for the performance of an obligation that the **market operation service provider** fails to perform in accordance with this Code or with the Electricity Industry (Enforcement) Regulations 2010, or the relevant **market operation service provider agreement**.

Compare: SR 2003/374 r 40

Clause 3.9: amended, on 1 November 2012, by clause 7 of the Electricity Industry Participation (Force Majeure) Code Amendment 2012.

### 3.10 Authority may terminate market operation service provider agreements

If a **force majeure event** results in a **market operation service provider** being relieved of a material obligation for more than 30 continuous days, the **Authority** may terminate the relevant **market operation service provider agreement** by written notice with immediate effect.

Compare: SR 2003/374 r 41(1)

#### *Disclosure to Authority*

### 3.11 Disclosure to Authority

Each **market operation service provider** is entitled to disclose to the **Authority** all information received by it from any person as part of its provision of services under this Code and Part 2 and Subpart 1 of Part 4 of the **Act**.

Compare: SR 2003/374 r 42

Clause 3.11: amended, on 5 October 2017, by clause 19 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### *Performance standards*

### 3.12 Performance standards to be agreed

The **Authority** and the relevant **market operation service provider** must, at the beginning of each year ending 30 June, seek to agree on a set of performance standards against which the **market operation service provider's** actual performance must be reported and measured at the end of the year ending 30 June.

Compare: SR 2003/374 r 43

Clause 3.12: amended, on 5 October 2017, by clause 20 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### *Accountability of market operation service providers via self-review*

### 3.13 Self-review must be carried out by market operation service providers

- (1) Each **market operation service provider** must conduct, on a monthly basis, a self-review of its performance.
- (2) The review must concentrate on the **market operation service provider's** compliance with—
  - (a) its obligations under this Code and Part 2 and Subpart 1 of Part 4 of the **Act**; and
  - (b) the operation of this Code and Part 2 and Subpart 1 of Part 4 of the **Act**; and
  - (c) any performance standards agreed between the **market operation service provider** and the **Authority**; and
  - (d) the provisions of the **market operation service provider agreement**.

Compare: SR 2003/374 r 44

Clause 3.13(2)(a) and (b): amended, on 5 October 2017, by clause 21 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### **3.14 Market operation service providers must report to Authority**

- (1) Each **market operation service provider** must prepare a written report for the **Authority** on the results of the review carried out under clause 3.13.
- (1A) A **market operation service provider** must provide the report prepared under subclause (1) to the **Authority**—
  - (a) within 10 **business days** after the end of each calendar month except after the month of December;
  - (b) within 20 **business days** after the end of the month of December.
- (2) The report must contain details of—
  - (a) any circumstances identified by the **market operation service provider** in which it has failed, or may have failed, to comply with its obligations under this Code and Part 2 and Subpart 1 of Part 4 of the **Act**; and
  - (b) any event or series of events that, in the **market operation service provider's** view, highlight an area where a change to this Code may need to be considered; and
  - (c) any other matters that the **Authority**, in its reasonable discretion, considers appropriate and asks the **market operation service provider**, in writing within a reasonable time before the report is provided, to report on.

Compare: SR 2003/374 r 45

Clause 3.14(1): replaced, on 5 October 2017, by clause 22(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 3.14(1A): inserted, on 5 October 2017, by clause 22(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 3.14(2)(a): amended, on 5 October 2017, by clause 22(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### **3.14A Market operation service providers to self-report breaches to Authority**

- (1) If a **market operation service provider** believes on reasonable grounds that it has breached a provision of this Code, the **market operation service provider** must report the alleged breach to the **Authority** in writing as soon as practicable after the **market operation service provider** becomes aware of the alleged breach.
- (2) The written report must specify—
  - (a) the provision of this Code allegedly breached; and
  - (b) the date and time the alleged breach occurred; and
  - (c) the circumstances relating to the alleged breach, including any **participants** the **market operation service provider** believes the alleged breach may have affected.

Clause 3.14A: inserted, on 1 November 2018, by clause 5 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

### *Review of market operation service providers by Authority*

### **3.15 Review of market operation service providers**

- (1) At the end of each year ending 30 June, the **Authority** may review the manner in which each **market operation service provider** has performed its duties and obligations under this Code and Part 2 and Subpart 1 of Part 4 of the **Act**.

- (2) The review must concentrate on the **market operation service provider's** compliance with—
- (a) its obligations under this Code and Part 2 and Subpart 1 of Part 4 of the **Act**; and
  - (b) the operation of this Code and Part 2 and Subpart 1 of Part 4 of the **Act**; and
  - (c) any performance standards agreed between the **market operation service provider** and the **Authority**; and
  - (d) the provisions of the **market operation service provider agreement**.

Compare: SR 2003/374 r 46

Clause 3.15: amended, on 5 October 2017, by clause 23 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### *Market operation service provider software*

### **3.16 Software specifications for market operation service providers**

- (1) This clause and clauses 3.17 and 3.18, apply only to **software** that the **market operation service provider agreement** requires the **market operation service provider** to use.
- (2) Unless otherwise agreed by the **Authority** in writing, the **software specification** for all **software** to be used by a **market operation service provider** must be set out or described in the **market operation service provider agreement** for that **market operation service provider**.
- (3) Each **market operation service provider** must ensure that its **software** performs in accordance with the relevant **software specification** and this Code.

Compare: SR 2003/374 r 51(1AA) to (2)

### **3.17 Market operation service provider must arrange audit of software**

- (1) Unless otherwise agreed by the **Authority** in writing, each **market operation service provider** must arrange and pay for a suitably qualified independent person approved by the **Authority** to carry out—
- (a) before any **software** is first used by the **market operation service provider** in relation to this Code and Part 2 and Subpart 1 of Part 4 of the **Act**, an **audit** of all **software** and **software specifications** to be used by the **market operation service provider**; and
  - (b) an annual **audit** of all **software** used by the **market operation service provider**, within 1 month after 1 March in each year; and
  - (c) an **audit** of any changes to the **software** or the **software specification**, before it is used by the **market operation service provider**.
- (2) A **market operation service provider** must ensure that the person carrying out an **audit** under subclause (1) provides a report to the **Authority** as to—
- (a) the performance (including likely future performance) of all of the **software** in accordance with the relevant **software specification**; and
  - (b) any other matters that the **Authority** requires.

Compare: SR 2003/374 r 52

Clause 3.17(2): amended, on 1 February 2016, by clause 6 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 3.17(1)(a): amended, on 5 October 2017, by clause 24 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### **3.18 Requirements for using software**

A **market operation service provider** may not use any **software** unless—

- (a) the **market operation service provider** has provided to the **Authority**, in respect of that **software**, an **auditor's** report issued in accordance with clause 3.17(2); or
- (b) the **Authority** has agreed that no **audit** is required under clause 3.17(1).

Compare: SR 2003/374 r 53

# Electricity Industry Participation Code 2010

## Part 4

### Force majeure provisions relating to ancillary service agents

#### Contents

- 4.1 Relief of obligation because of force majeure
  - 4.2 Effect of relief
- 

#### 4.1 Relief of obligation because of force majeure

- (1) An **ancillary service agent** is relieved of an obligation under this Code and under the Electricity Industry (Enforcement) Regulations 2010 to the extent that, and for so long as, it is unable to perform the obligation as a result of a **force majeure event**.
- (2) Subclause (1) applies only—
  - (a) if the **ancillary service agent** advises the **system operator**, immediately after becoming aware of the existence of a **force majeure event**, of—
    - (i) the details of the **force majeure event**; and
    - (ii) the obligation that cannot be performed; and
    - (iii) the likely duration of the inability to perform the obligation; and
  - (b) for so long as the **ancillary service agent** uses its reasonable endeavours to overcome the inability to perform the obligation from which it seeks relief and to remove or mitigate the effect of the **force majeure event**; and
  - (c) if the **ancillary service agent** provides the **Authority** with reports in accordance with subclauses (4) and (5).
- (3) To avoid doubt, the relief in subclause (1) applies only if an **ancillary service agent** is acting in its capacity as an **ancillary service agent** under an **ancillary service arrangement**.
- (4) As soon as practicable, but in any event no later than by the end of the month following the month in which the **ancillary service agent** advises the **system operator** of a **force majeure event** under subclause (2)(a), the **ancillary service agent** must provide the **Authority** with a written report that sets out—
  - (a) the full details of the **force majeure event**; and
  - (b) the actions the **ancillary service agent** is taking or intends to take to comply with subclause (2)(b); and
  - (c) the proposed timeline for completing the actions.
- (5) By the end of each following month (unless the **Authority** advises that reports may be provided less frequently or are not required) the **ancillary service agent** must provide the **Authority** with a written report that updates the information previously provided and includes any other matters related to the **force majeure event** that the **Authority** requests.
- (6) The **Authority** must **publish** the information provided under subclause (2)(a) and the reports provided under subclauses (4) and (5) as soon as practicable after receiving the information.

- (7) Despite subclause (6), the **Authority** must not **publish** or otherwise make available to the public any information or any part of a report if the **ancillary service agent** advises the **Authority** (with reasons) that the **ancillary service agent** considers that it would have good reason to refuse to supply the information or the part under clause 2.6 or clause 2.7.

Compare: SR 2003/374 r 53B

Clause 4.1: substituted, on 1 November 2012, by clause 8 of the Electricity Industry Participation (Force Majeure) Code Amendment 2012.

Clause 4.1(6): amended, on 5 October 2017, by clause 25(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 4.1(7): amended, on 5 October 2017, by clause 25(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### 4.2 Effect of relief

If an **ancillary service agent** is relieved of an obligation under clause 4.1,—

- (a) the **ancillary service agent** is not liable for a breach of this Code or of the Electricity Industry (Enforcement) Regulations 2010 in respect of that obligation during the period for which the relief applies under that clause; and
- (b) any costs arising from the relief from the obligation lie where they fall, except that the **system operator** and the **ancillary service agent** may agree to adjust the remuneration of the **ancillary service agent**.

Compare: SR 2003/374 r 53C

Clause 4.2(a): amended, on 21 September 2012, by clause 5 of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

Clause 4.2(a): amended, on 1 November 2012, by clause 9 of the Electricity Industry Participation (Force Majeure) Code Amendment 2012.

# Electricity Industry Participation Code 2010

## Part 5

### Regime for dealing with undesirable trading situations

#### Contents

- 5.1 Occurrence of undesirable trading situation
  - 5.1A Time limit for investigating undesirable trading situation
  - 5.2 Actions Authority may take to correct undesirable trading situation
  - 5.3 Authority must consult with system operator
  - 5.4 Authority must consult with participants
  - 5.5 Authority must attempt to correct and restore normal operation as soon as possible
- 

#### 5.1 Occurrence of undesirable trading situation

- (1) If the **Authority** suspects or anticipates the development, or possible development, of an **undesirable trading situation**, the **Authority** may investigate the matter.
- (2) The following are examples of what the **Authority** may consider to constitute an **undesirable trading situation**:
  - (a) manipulative or attempted manipulative trading activity;
  - (b) conduct in relation to trading that is misleading or deceptive, or is likely to mislead or deceive;
  - (c) unwarranted speculation or an undesirable practice;
  - (d) material breach of any law;
  - (e) a situation that threatens orderly trading or proper settlement;
  - (f) any exceptional or unforeseen circumstance that is contrary to the public interest.
- (3) To avoid doubt,—
  - (a) the list of examples in subclause (2) is not an exhaustive list, and does not prevent the **Authority** from finding that an **undesirable trading situation** is developing or has developed in other circumstances; and
  - (b) an example listed in subclause (2) does not constitute an **undesirable trading situation** unless the example comes within the definition of that term in Part 1.

Compare: SR 2003/374 r 54

Clause 5.1(2) and (3): inserted, on 18 July 2013, by clause 5 of the Electricity Industry Participation (Undesirable Trading Situation) Code Amendment 2013.

#### 5.1A Time limit for investigating undesirable trading situation

Despite clause 5.1(1), the **Authority** must not commence an investigation if more than 10 **business days** have passed since the situation, which the **Authority** suspects or anticipates may be an **undesirable trading situation**, occurred.

Clause 5.1A: inserted, on 18 July 2013, by clause 6 of the Electricity Industry Participation (Undesirable Trading Situation) Code Amendment 2013.

Clause 5.1A: amended, on 15 May 2014, by clause 5 of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

## 5.2 Actions Authority may take to correct undesirable trading situation

- (1) If the **Authority** finds that an **undesirable trading situation** is developing or has developed, it may take any action that—
  - (a) the **Authority** considers is necessary to correct the **undesirable trading situation**; and
  - (b) relates to an aspect of the **electricity** industry that the **Authority** could regulate in this Code under section 32 of the **Act**.
- (2) The actions that the **Authority** may take under subclause (1) include any 1 or more of the following:
  - (a) directing that an activity be suspended, limited, or stopped, either generally or for a specified period:
  - (b) directing that completion of trades be deferred for a specified period:
  - (c) directing that any trades be closed out or settled at a specified price:
  - (d) directing a **participant** to take any actions that will, in the **Authority's** opinion, correct or assist in overcoming the **undesirable trading situation**.
- (2A) A direction given to a **participant** under subclause (2)(d)—
  - (a) may be inconsistent with this Code; but
  - (b) must not be inconsistent with the **Act**, or any other law.
- (3) The **participant** must comply promptly with a direction given to it in writing.
- (4) A **participant** is not liable to any other **participant** in relation to the taking of an action, or an omission, that is reasonably necessary for compliance with an **Authority** direction under this clause.
- (5) A **participant** does not breach this Code if it acts in accordance with a direction given under subclause (2)(d).

Compare: SR 2003/374 r 56

Clause 5.2(1): substituted, on 18 July 2013, by clause 7(1) of the Electricity Industry Participation (Undesirable Trading Situation) Code Amendment 2013.

Clause 5.2(2): substituted, on 18 July 2013, by clause 7(2) of the Electricity Industry Participation (Undesirable Trading Situation) Code Amendment 2013.

Clause 5.2(2A): inserted, on 18 July 2013, by clause 7(2) of the Electricity Industry Participation (Undesirable Trading Situation) Code Amendment 2013.

Clause 5.2(4): amended, on 18 July 2013, by clause 7(3) of the Electricity Industry Participation (Undesirable Trading Situation) Code Amendment 2013.

Clause 5.2(5): inserted, on 18 July 2013, by clause 7(4) of the Electricity Industry Participation (Undesirable Trading Situation) Code Amendment 2013.

## 5.3 Authority must consult with system operator

- (1) The **Authority** must consult with the **system operator** if—
  - (a) the **Authority** is considering taking an action under clause 5.2 to correct an **undesirable trading situation**; and
  - (b) it is possible that the action may have an effect on **system security**.
- (2) The **system operator** must maintain procedures that are necessary to enable it to respond immediately to the **Authority**, and provide information as soon as reasonably practicable, if the **Authority** consults the **system operator** under this clause.

Compare: SR 2003/374 r 58

**5.4 Authority must consult with participants**

If the **Authority** finds that an **undesirable trading situation** is developing or has developed, the **Authority** must—

- (a) immediately advise all **registered participants** of its findings and of any actions that the **Authority** intends to take, or has taken, to correct the **undesirable trading situation**; and
- (b) unless the **Authority** considers that it is impractical to do so, consult with affected **participants** before taking the action.

Compare: SR 2003/374 r 59

**5.5 Authority must attempt to correct and restore normal operation as soon as possible**

The **Authority** must attempt to correct every **undesirable trading situation** and, consistently with section 15 of the **Act**, restore the normal operation of the **wholesale market** as soon as possible.

Compare: SR 2003/374 r 60

---

**6.1 Contents of this Part**

This Part specifies—

- (a) a framework to enable the connection and continued connection of **distributed generation** if consistent with **connection and operation standards**; and
- (b) in Schedule 6.1, processes (including time frames) under which **distributed generators** may—
  - (i) connect **distributed generation**; or
  - (ii) continue an existing connection of **distributed generation** if the connection contract for the **distributed generation**—
    - (A) is in force and the **distributed generator** wishes to extend the term of the connection contract; or
    - (B) has expired; or
  - (iii) continue an existing connection of **distributed generation** that is connected without a connection contract if the **regulated terms** do not apply; or
  - (iv) change the **nameplate capacity** or fuel type of connected **distributed generation**; and
- (c) in Schedule 6.2, the **regulated terms** that apply to the connection of **distributed generation** in the absence of contractually agreed terms; and
- (d) in Schedule 6.3, a default dispute resolution process for disputes related to this Part; and
- (e) in Schedule 6.4, the pricing principles to be applied for the purposes of this Part; and
- (f) in Schedule 6.5, prescribed maximum fees.

Compare: SR 2007/219 r 4

Clause 6.1(a) and (b): substituted, on 23 February 2015, by clause 5 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6.1(a): amended, on 5 October 2017, by clause 26(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 6.1(b): amended, on 5 October 2017, by clause 26(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 6.1(c): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6.1(c): amended, on 5 October 2017, by clause 26(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 6.2 Purpose

The purpose of this Part is to enable **distributed generation** to be connected to a **distribution network** or to a **consumer installation** that is connected to a **distribution network**, if being connected is consistent with **connection and operation standards**.

Compare: SR 2007/219 r 3

Clause 6.2: amended, on 23 February 2015, by clauses 6 and 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6.2: replaced, on 5 October 2017, by clause 27 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 6.2A Application of Part to distributors in respect of embedded networks

Nothing in this Part applies to—

- (a) a **distributor** in respect of the **distributor's** ownership or operation of an **embedded network** that conveys less than 5 GWh of **electricity** per annum; or
- (b) a **distributed generator** when the **distributed generator** wishes to connect or has **distributed generation** connected to such an **embedded network**.

Clause 6.2A: inserted, on 1 February 2016, by clause 7 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 6.2A(b): amended, on 5 October 2017, by clause 28 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 6.2B Application of Part to distributors in respect of systems of lines not directly or indirectly connected to grid

Nothing in this Part applies to—

- (a) a **distributor** in respect of the **distributor's** ownership or operation of a system of **lines** that is used for providing **line function services** only to the **distributor**; or
- (b) a **distributor** in respect of the **distributor's** ownership or operation of a system of **lines**—
  - (i) that conveys less than 5 GWh of **electricity** per annum; and
  - (ii) that is not—
    - (A) directly connected to the **grid**; or
    - (B) indirectly connected to the **grid** through 1 or more other **networks**; or
- (c) a **distributed generator** when the **distributed generator** wishes to connect or has **distributed generation** connected to a system of **lines** described in paragraph (b).

Heading: amended, on 5 October 2017, by clause 29(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 6.2B: inserted, on 1 February 2016, by clause 7 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 6.2B(b)(ii)(A) and (B): amended, on 5 October 2017, by clause 29(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 6.2B(c): amended, on 5 October 2017, by clause 29(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 6.3 Distributors must make information publicly available

- (1) The purpose of this clause is to require each **distributor** to make certain information publicly available to enable the approval of **distributed generation** under Schedule 6.1.
- (2) Each **distributor** must make publicly available, free of charge, from its office and Internet site,—
  - (a) forms for applications under Schedule 6.1; and
  - (b) the **distributor's connection and operation standards**; and
  - (c) a copy of the **regulated terms**, together with an explanation of how the **regulated terms** will apply if—
    - (i) approval is granted under Schedule 6.1; and
    - (ii) the **distributor** and the **distributed generator** do not enter into a connection contract; and
  - (d) a statement of the circumstances in which **distributed generation** will be, or may be, curtailed or interrupted from time to time in order to ensure that the **distributor's other connection and operation standards** are met; and
  - (da) a list of all locations on its **distribution network** that the **distributor** knows to be subject to **export congestion**; and
  - (db) a list of all locations on its **distribution network** that the **distributor** expects to become subject to **export congestion** within the next 12 months; and
  - (dc) until 1 September 2026, the **maximum export power** threshold and the methodology used to determine that threshold, for locations at which the **distributor** has set a **maximum export power** threshold for applications under Part 1A of Schedule 6.1; and
  - (e) a list of any fees that the **distributor** charges under Schedule 6.1, which must not exceed the relevant maximum fees prescribed in Schedule 6.5; and
  - (f) a list of the makes and models of inverters that the **distributor** has approved for connection to its **distribution network**; and
  - (g) the **distributor's** contact information for any enquiries relating to the connection of **distributed generation** to its **distribution network**.
- (3) The application forms referred to in subclause (2)(a) must specify the information, including any supporting documents, that must be provided with an application under Schedule 6.1.

Compare: SR 2007/219 r 6

Clause 6.3(1): substituted, on 23 February 2015, by clause 7(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6.3(2)(a) – (c): substituted, on 23 February 2015, by clause 7(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6.3(2)(c)(ii), (f) and (g): amended, on 5 October 2017, by clause 30(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 6.3(2)(d): amended, on 23 February 2015, by clause 7(3) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6.3(2)(d): amended, on 5 October 2017, by clause 30(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 6.3(2)(da): inserted, on 23 February 2015, by clause 7(4) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6.3(2)(da): replaced, on 20 December 2021, by clause 5(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 6.3(2)(db): inserted, on 20 December 2021, by clause 5(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 6.3(2)(dc): amended, on 20 December 2021, by clause 5(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 6.3(2)(e): substituted, on 23 February 2015, by clause 7(5) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6.3(2)(f) and (g): inserted, on 23 February 2015, by clause 7(5) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6.3(3): substituted, on 23 February 2015, by clause 7(6) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6.3(2)(db): inserted, on 1 September 2021, by clause 5 of the Electricity Industry Participation Code Amendment (Application for Distributed Generation) 2021. **Note: paragraph 6.3(2)(dc) automatically revokes on the close of 1 September 2026 under clause 8 of the Electricity Industry Participation Code Amendment (Application for Distributed Generation) 2021.**

## 6.4 Process for obtaining approval

- (1) Schedule 6.1 applies if a **distributed generator** wishes to—
  - (a) connect **distributed generation**, whether on the **regulated terms** or on other terms; or
  - (b) continue an existing connection of **distributed generation** if the connection contract for the **distributed generation**—
    - (i) is in force and the **distributed generator** wishes to extend the term of the connection contract; or
    - (ii) has expired; or
  - (c) continue an existing connection of **distributed generation** that is connected without a connection contract if the **regulated terms** do not apply; or
  - (d) change the **nameplate capacity** or fuel type of connected **distributed generation**.
- (2) A **distributor** must approve an application submitted under Schedule 6.1 if the application complies with the requirements of that Schedule.
- (3) Except as provided in clause 6.4A, a **distributor** cannot contract out of the provisions of Schedule 6.1 with a **distributed generator**.

Compare: SR 2007/219 r 7

Clause 6.4: substituted, on 23 February 2015, by clause 8 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6.4(1): amended, on 5 October 2017, by clause 31 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 6.4A Distributor and distributed generator may agree to simpler process for existing connection

A **distributor** and a **distributed generator** may agree a simpler process for the continued connection of **distributed generation** to the **distributor's distribution network** than the relevant process set out in Schedule 6.1 if—

- (a) a connection contract for the **distributed generation**—
  - (i) is in force and the **distributed generator** wishes to extend the term of the connection contract; or
  - (ii) has expired; or
- (b) the **distributed generation** is connected without a connection contract; or
- (c) there is a change in the **nameplate capacity** or fuel type of the **distributed generation**.

Clause 6.4A: inserted, on 23 February 2015, by clause 8 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6.4A: amended, on 5 October 2017, by clause 32 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 6.5 Connection contract

If a **distributor** and a **distributed generator** enter into a contract for the connection of **distributed generation**,—

- (a) their rights and obligations in respect of the connection of the **distributed generation** are governed by that contract, and accordingly the **regulated terms** do not apply; and
- (b) a breach of the terms of that contract is not a breach of this Code.

Compare: SR 2007/219 r 8

Heading: amended, on 23 February 2015, by clause 9 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6.5: amended, on 23 February 2015, by clauses 9 and 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6.5: amended, on 5 October 2017, by clause 33 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 6.6 Connection on regulated terms

- (1) Schedule 6.2 sets out the **regulated terms** for the connection of **distributed generation**.
- (2) The **regulated terms** apply in the following circumstances:
  - (a) if a **distributor** and a **distributed generator** do not enter into a connection contract by the expiry of the period for negotiating a connection contract under clauses 9 or 24 of Schedule 6.1:
  - (b) in accordance with clause 9G of Schedule 6.1.
- (3) If the **regulated terms** apply,—
  - (a) the parties' rights and obligations in respect of the connection of the **distributed generation** are governed by the **regulated terms**; and
  - (b) a breach of the **regulated terms** is not a breach of contract.
- (4) Despite this clause, a **distributor** and a **distributed generator** may at any time, by agreement, enter into a connection contract that will apply instead of the **regulated terms**.

Compare: SR 2007/219 r 9

Clause 6.6: amended, on 5 October 2017, by clause 34 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 6.6(1): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6.6(2) and (4): substituted, on 23 February 2015, by clause 10 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6.6(3): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

## 6.7 Extra terms

- (1) The parties' rights and obligations in respect of a connection on the **regulated terms** are also governed by any other terms and conditions that—
  - (a) were made publicly available under clause 6.3(2)(d) in a statement of the terms and conditions that would apply to **distributed generation** if there is congestion on the **distribution network**; or
  - (b) cover any other incidental matters (for example, invoicing procedures) if—
    - (i) the matters are not covered by the **regulated terms**; and
    - (ii) the other matters are reasonable terms and conditions that either were proposed by the **distributor** during the 30 **business day** negotiation period as part of a connection contract or are terms that would be implied by law if the connection was under a connection contract; and
    - (iii) the other terms and conditions do not contradict any of the **regulated terms**.

- (2) In this Part, if the parties have agreed to change all or any part of 1 or more of the **regulated terms** as part of a binding contract, the resulting contract is, in total, a connection contract on terms that apply instead of the **regulated terms** for the purposes of this Part.

Compare: SR 2007/219 r 10

Clause 6.7: amended, on 23 February 2015, by clauses 11 and 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6.7: amended, on 5 October 2017, by clause 35 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 6.8 Dispute resolution

- (1) Subject to subclause (2), Schedule 6.3 applies to a dispute between a **distributed generator** that is a **participant** and a **distributor** arising from any one of the following

- (a) an allegation that a party has breached any of the **regulated terms** that apply under clause 6.6(2); and
- (aa) an allegation that conditions specified by the **distributor** under clause 18 of Schedule 6.1 are not reasonably required; and
- (ab) an allegation that a party has not attempted to negotiate in good faith under clause 6 or clause 21 of Schedule 6.1; and
- (b) an allegation that a party has breached any of the other provisions of this Part.

- (2) However, Schedule 6.3 does not apply to disputes between a **distributed generator** and a **distributor**—

- (a) arising from an allegation that a party has breached any of the terms of a connection contract; or
- (b) arising from an allegation that a party has breached any of the extra terms referred to in clause 6.7(1); or
- (c) that the **distributed generator** and the **distributor** have agreed should be determined by any other agreed method (for example, under any dispute resolution scheme under section 95 of the **Act**).

Compare: SR 2007/219 r 11

Clause 6.8: amended, on 5 October 2017, by clause 36 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 6.8(1) and (1)(a): amended, on 23 February 2015, by clause 12(1) and (2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6.8(1)(aa) and (ab): inserted, on 23 February 2015, by clause 12(3) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6.8(1)(b): substituted, on 23 February 2015, by clause 12(4) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6.8(2)(a): amended, on 23 February 2015, by clauses 12(5) and 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

## 6.9 Pricing principles

Schedule 6.4 applies in accordance with—

- (a) clause 19 of Schedule 6.2; and
- (b) clause 4 of Schedule 6.3.

Compare: SR 2007/219 r 12

Clause 6.9(a): amended, on 23 February 2015, by clause 13 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

## 6.10 *[Revoked]*

Compare: SR 2007/219 r 13

Clause 6.10: revoked, on 23 February 2015, by clause 14 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

### **6.11 Distributors must act at arm's length**

A **distributor** must use, in respect of all **distributed generators**, the same reasonable efforts in processing and considering applications and notices under Schedule 6.1, regardless of—

- (a) whether the **distributor** has an ownership interest or a beneficial interest in the **distributed generator**; or
- (b) who the **distributed generator** is.

Compare: SR 2007/219 r 14

Heading: amended, on 23 February 2015, by clause 15(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6.11 and 6.11(a): amended, on 23 February 2015, by clause 15(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6.11(b): substituted, on 23 February 2015, by clause 15(3) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

### **6.12 This Part does not affect rights and obligations under Code**

This Part does not affect any rights or obligations of a **distributor** or a **distributed generator** under any other clause in this Code.

Compare: SR 2007/219 r 15

### *Transitional provisions*

### **6.13 This Part does not apply to earlier connections**

This Part does not apply in relation to, or affect, any **distributed generation** that was connected under a contract entered into before 30 August 2007, except for the purpose of renewing or extending the term of the contract.

Compare: SR 2007/219 r 17

Clause 6.13: substituted, on 23 February 2015, by clause 16 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6.13: amended, on 5 October 2017, by clause 37 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## Schedule 6.1 Process for obtaining approval

cl 6.4

Heading: amended, on 23 February 2015, by clause 17 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

### Contents

#### *Preliminary provisions*

- 1A Contents of this Schedule
- 1B Distributed generator must apply
- 1C How Parts apply to applications
- 1D When application may be made under Part 1A

### **Part 1**

Applications for distributed generation 10 kW or less in total

- 1 Contents of this Part

#### *Application process*

- 2 Applications under this Part of this Schedule
- 3 Distributor's decision on application
- 4 Extension of time by mutual agreement for distributor to process application
- 5 Distributed generator must give notice of intention to negotiate

#### *Post-approval process*

- 6 30 business days to negotiate connection contract if distributed generator gives notice of intention to proceed
- 7 Testing and inspection
- 8 Connection of distributed generation if connection contract negotiated
- 9 Connection of distributed generation on regulated terms if connection contract not negotiated

### **Part 1A**

Applications for distributed generation of 10 kW or less in total in specified circumstances

- 9A Contents of this Part
- 9B Application for distributed generation of 10 kW or less in total in specified circumstances
- 9C Distributor may inspect distributed generation
- 9D Export congestion
- 9E Non-compliance or incomplete information
- 9F Notice of final approval
- 9G Regulated terms apply
- 9H When distributed generator may connect to distribution network

### **Part 2**

Applications for distributed generation above 10 kW in total

- 10 Contents of this Part

#### *Initial application process*

- 11 Distributed generator must make initial application and give information
- 12 Distributor must give information to distributed generator

- 13 Other matters to assist with decision making  
14 Distributor and distributed generator must make reasonable endeavours regarding new information

*Final application process*

- 15 Distributed generator must make final application  
16 Notice to third parties  
17 Priority of final applications  
18 Distributor's decision on application  
19 Time within which distributor must decide final applications  
20 Distributed generator must give notice of intention to negotiate

*Post-approval process*

- 21 30 business days to negotiate connection contract if distributed generator gives notice of intention to negotiate  
22 Testing and inspection  
23 Connection of distributed generation if connection contract negotiated  
24 Connection of distributed generation on regulated terms if connection contract not negotiated

**Part 3**

General provisions

*Confidentiality*

- 25 Confidentiality of information provided

*Annual reporting and record keeping*

- 26 *[Revoked]*  
27 *[Revoked]*  
28 Distributors must keep records

*Costs*

- 29 Responsibility for costs under this Schedule
- 

*Preliminary provisions*

**1A Contents of this Schedule**

This Schedule specifies the procedures for processing applications from **distributed generators** for the connection or continued connection of **distributed generation**.

Clause 1A: amended, on 5 October 2017, by clause 38 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**1B Distributed generator must apply**

Subject to clause 6.4A and clause 1D, a **distributed generator** that owns or operates **distributed generation** must apply to a **distributor** if it wishes to—

- (a) connect the **distributed generation** to the **distributor's distribution network**; or  
(b) continue an existing connection of the **distributed generation** to the **distributor's distribution network** if a connection contract for the **distributed generation**—  
(i) is in force and the **distributed generator** wishes to extend the term of the connection contract; or

- (ii) has expired; or
- (c) continue an existing connection of the **distributed generation** to the **distributor's distribution network** that is connected without a connection contract if the **regulated terms** do not apply; or
- (d) change the **nameplate capacity** or fuel type of the **distributed generation** connected to the **distributor's distribution network**.

Clause 1B: amended, on 5 October 2017, by clause 39 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 1C How Parts apply to applications

This Schedule applies to applications made under clause 1B as follows:

- (a) Part 1 applies to applications in respect of **distributed generation** that has a **nameplate capacity** of 10 kW or less in total, unless the **distributed generator** has elected, under clause 1D, to apply under Part 1A:
- (b) Part 1A applies to applications in respect of **distributed generation** that has a **nameplate capacity** of 10 kW or less in total, if the **distributed generator** has elected, under clause 1D, to apply under Part 1A:
- (c) Part 2 applies to applications in respect of **distributed generation** that has a **nameplate capacity** of more than 10 kW in total.

### 1D When application may be made under Part 1A

- (1) A **distributed generator** may elect to apply to a **distributor** under Part 1A instead of Part 1 if the **distributed generation** to which the application relates—
  - (a) is designed and installed in accordance with AS/NZS 4777.1:2016; and
  - (b) incorporates an inverter that—
    - (i) has been tested and issued a Declaration of Conformity with AS/NZS 4777.2:2020 by a laboratory with accreditation issued or recognised by International Accreditation New Zealand; and
    - (ii) has settings that meet the **distributor's connection and operation standards**.
- (2) Until 1 September 2026, a **distributed generator** may only elect to apply to a **distributor** under Part 1A instead of Part 1, if the **distributed generation** to which the application relates has, in addition to the requirements in subclause (1)—
  - (a) a volt-watt response mode;
  - (b) a volt-var response mode;
  - (c) control settings and volt response mode settings that meet the **distributor's connection and operation standards**; and
  - (d) a **maximum export power** limit at the **ICP** of the **distributed generator** that does not exceed the **maximum export power** threshold, if any, specified by the **distributor** in its **connection and operation standards**.

Cross heading and clauses 1A to 1D: inserted, on 23 February 2015, by clause 18 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1D(b): amended, on 20 October 2016, by clause 4 of the Electricity Industry Participation Code Amendment (Inverter Standard for Distributed Generation) 2016.

Clause 1D: replaced, on 1 September 2021, by clause 6(1) of the Electricity Industry Participation Code Amendment (Application for Distributed Generation) 2021.

Clause 1D(2): inserted, on 1 September 2021, by clause 6(2) of the Electricity Industry Participation Code Amendment (Application for Distributed Generation) 2021. **Note: paragraph 1D(2) automatically revokes on the close of 1 September 2026 under clause 8 of the Electricity Industry Participation Code Amendment (Application for Distributed Generation) 2021.**

Clause 1D(1)(b)(i): amended, on 18 December 2021, by clause 4 of the Electricity Industry Participation Code Amendment (Inverter Standard for Distributed Generation) 2021.

Part 1  
Applications for distributed generation  
10 kW or less in total

Heading: amended, on 23 February 2015, by clause 19 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

**1 Contents of this Part**

- (1) This Part applies to applications relating to **distributed generation** that has a **nameplate capacity** of 10 kW or less in total, unless the **distributed generator** that owns or operates the **distributed generation** has elected, under clause 1D, to apply under Part 1A.
- (2) This Part of this Schedule provides for a 1-stage application process.  
Compare: SR 2007/219 clause 1 Schedule 1  
Clause 1(1): substituted, on 23 February 2015, by clause 20 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

*Application process*

**2 Applications under this Part of this Schedule**

- (1) *[Revoked]*
- (2) A **distributed generator** must apply to a **distributor** by—
- (a) using the application form provided by the **distributor** that is publicly available under clause 6.3(2)(a); and
  - (b) providing any information in respect of the **distributed generation** to which the application relates that is—
    - (i) referred to in subclause (3); and
    - (ii) specified by the **distributor** under clause 6.3(3) as being required to be provided with the application; and
  - (c) paying the application fee (if any) specified by the **distributor** in accordance with clause 6.3(2)(e).
- (3) The information may include the following:
- (a) the full name and address of the **distributed generator** and the contact details of a person that the **distributor** may contact regarding the **distributed generation**:
    - (aa) whether the application is to—
      - (i) connect **distributed generation**; or
      - (ii) continue an existing connection of **distributed generation** that is connected in accordance with a connection contract if the connection contract—
        - (A) is in force and the **distributed generator** wishes to extend the term of the connection contract; or
        - (B) has expired; or
      - (iii) continue an existing connection of **distributed generation** that is connected without a connection contract; or
      - (iv) change the **nameplate capacity** or fuel type of connected **distributed generation**:
    - (b) evidence of the **nameplate capacity** that the **distributed generation** will have, or other suitable evidence that the **distributed generation** is or will only be capable of generating **electricity** at a rate of 10 kW or less:

- (ba) if the application is to change the **nameplate capacity** or fuel type of connected **distributed generation**—
    - (i) the **nameplate capacity** that the **distributed generation** will have after the change; and
    - (ii) the aggregate **nameplate capacity** that all **distributed generation** that is connected at the **point of connection** at which the **distributed generation** is connected will have after the change; and
    - (iii) the fuel type that the **distributed generation** will have after the change:
  - (c) details of the fuel type of the **distributed generation** (for example, solar, wind, or liquid fuel):
  - (d) a brief description of the physical location at the address at which the **distributed generation** is or will be connected:
  - (da) if the application is to connect **distributed generation**, when the **distributed generator** expects the **distributed generation** to be connected:
  - (e) technical specifications of the **distributed generation** and **associated equipment**, including the following:
    - (i) technical specifications of equipment that allows the **distributed generation** to be **electrically disconnected** from the **distribution network** on loss of mains voltage:
    - (ii) manufacturer's rating of equipment:
    - (iii) number of phases:
    - (iv) proposed or current **point of connection** to the **distribution network** (for example, the **ICP identifier** and street address):
    - (v) details of either or both of any inverter and battery storage:
    - (vi) details of any load at the proposed or current **point of connection**:
    - (vii) details of the voltage (for example, 415 V or 11 kV) when it is **electrically connected**:
  - (f) information showing how the **distributed generation** complies with the **distributor's connection and operation standards**:
  - (g) any additional information or documents that are reasonably required by the **distributor**.
- (4) *[Revoked]*
- (5) The **distributor** must, within 5 **business days** of receiving an application, give written notice to the applicant advising whether or not the application is complete.
- Compare: SR 2007/219 clause 2 Schedule 1  
Heading: amended, on 23 February 2015, by clause 21(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.  
Clause 2: amended, on 5 October 2017, by clause 40(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 2(1): revoked, on 23 February 2015, by clause 21(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.  
Clause 2(2): substituted, on 23 February 2015, by clause 21(3) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.  
Clause 2(3)(a): amended, on 23 February 2015, by clause 21(4) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.  
Clause 2(3)(aa): inserted, on 23 February 2015, by clause 21(5) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.  
Clause 2(3)(aa): amended, on 5 October 2017, by clause 40(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 2(3)(aa), (3)(ba) and 3(d): amended, on 5 October 2017, by clause 40(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 2(3)(b): substituted, on 23 February 2015, by clause 21(6) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 2(3)(ba): inserted, on 23 February 2015, by clause 21(7) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 2(3)(ba)(ii): amended, on 23 February 2015, by clause 6(1) of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.

Clause 2(3)(ba)(iii): inserted, on 23 February 2015, by clause 6(2) of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.

Clause 2(3)(c) and(d): substituted, on 23 February 2015, by clause 21(8) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 2(3)(da): inserted, on 23 February 2015, by clause 21(9) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 2(3)(da): amended, on 5 October 2017, by clause 40(4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 2(3)(e): substituted, on 23 February 2015, by clause 21(10) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 2(3)(e)(i): amended, on 5 October 2017, by clause 40(5) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 2(3)(e)(vii): amended, on 5 October 2017, by clause 40(6) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 2(3)(g): amended, on 23 February 2015, by clause 21(11) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 2(4): revoked, on 23 February 2015, by clause 21(12) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

### **3 Distributor's decision on application**

- (1) A **distributor** must, within 30 **business days** after the date of receipt of a completed application made in accordance with clause 2, give notice in writing to the applicant stating whether the application is approved or declined.
- (2) A **distributor** must approve an application if—
  - (a) the application has been properly made in accordance with Part 6 of this Code; and
  - (b) the information provided in the application would reasonably support an assessment by the **distributor** that—
    - (i) the **distributed generator** will comply at all times with the requirements of the Health and Safety at Work Act 2015; and
    - (ii) the **distributed generator** will ensure that the **distributed generation** complies at all times with the **Act**, and this Code; and
    - (iii) the **distributed generation** meets the **distributor's connection and operation standards**.
- (3) A notice stating that an application is declined must be accompanied by the following information:
  - (a) detailed reasons of why the application has been declined and the steps that the applicant can take to achieve approval if it makes a new application;
  - (b) information about the default process under Schedule 6.3 for the resolution of disputes between **participants** about an alleged breach of the **regulated terms** or any other provision of Part 6 of this Code;
  - (c) that if the **distributed generator** is not a **participant**, the **distributed generator** may report to the **Authority** under the Electricity Industry (Enforcement) Regulations 2010 if it considers that the **distributor** has breached any requirement in Part 6 of this Code.

Compare: SR 2007/219 clause 3 Schedule 1

Clause 3(2): amended, on 23 February 2015, by clause 22(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 3(2)(b)(i): amended, on 5 October 2017, by clause 41 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 3(2)(b)(ii) and (iii): substituted, on 23 February 2015, by clause 22(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 3(3)(a) and (b): amended, on 23 February 2015, by clause 22(3) and (4) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 3(3)(c): inserted, on 23 February 2015, by clause 22(5) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

#### **4 Extension of time by mutual agreement for distributor to process application**

- (1) A **distributor** may seek an extension of the time specified in clause 3(1) by which the **distributor** must give notice in writing stating whether an application is approved or declined.
- (2) The **distributor** must do this by notice in writing to the **distributed generator** specifying the reasons for the extension.
- (3) The **distributed generator** that made the application—
  - (a) may grant an extension which must not exceed **20 business days**; and
  - (b) must not unreasonably withhold consent to an extension.

Compare: SR 2007/219 clause 4 Schedule 1

Clause 4(1): amended, on 23 February 2015, by clause 23(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 4(3): substituted, on 23 February 2015, by clause 23(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

#### **5 Distributed generator must give notice of intention to negotiate**

- (1) If a **distributor** advises a **distributed generator** that its application is approved, the **distributed generator** must give written notice to the **distributor** confirming whether the **distributed generator** intends to negotiate a connection contract under clause 6 and, if so, confirming the details of the **distributed generation** to which the application relates.
- (2) The **distributed generator** must give the notice within **10 business days** after the **distributor** gives notice of approval, or such later date as is agreed by the **distributor** and the **distributed generator**.
- (3) The **distributor's** duties under Part 6 of this Code arising from the application no longer apply if the **distributed generator** fails to give notice to the **distributor** within the time limit specified in subclause (2).
- (4) Subclause (3) does not prevent the **distributed generator** from making a new application under Part 6 of this Code.

Compare: SR 2007/219 clause 5 Schedule 1

Heading: amended, on 5 October 2017, by clause 42(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 5(1): substituted, on 23 February 2015, by clause 24(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 5(1): amended, on 5 October 2017, by clause 42(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017. Clause 5(2): amended, on 23 February 2015, by clause 24(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 5(3) and (4): amended, on 23 February 2015, by clause 24(3) and (4) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

*Post-approval process*

Cross heading: amended, on 23 February 2015, by clause 25 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

**6 30 business days to negotiate connection contract if distributed generator gives notice of intention to proceed**

- (1) If a **distributed generator** whose application under clause 2 is approved gives notice to a **distributor** under clause 5, the **distributor** and the **distributed generator** have 30 **business days**, starting on the date on which the **distributor** receives the notice, during which they must, in good faith, attempt to negotiate a connection contract.
- (2) The **distributor** and the **distributed generator** may, by agreement, extend the time specified in subclause (1) for negotiating a connection contract.

Compare: SR 2007/219 clause 6 Schedule 1

Clause 6 heading: amended, on 1 November 2018, by clause 6 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 6: amended, on 23 February 2015, by clauses 26 and 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6: amended, on 5 October 2017, by clause 43 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**7 Testing and inspection**

- (1) Subject to subclause (1A), a **distributed generator** whose application under clause 2 is approved by a **distributor** must test and inspect the **distributed generation** to which the application relates within a reasonable time frame specified by the **distributor**.
- (1A) The **distributor** may waive the requirement that the **distributed generator** test and inspect if the **distributor** is satisfied that the **distributed generation** complies with the **distributor's connection and operation standards**.
- (2) The **distributed generator** must give adequate notice of the testing and inspection to the **distributor**.
- (3) The **distributor** may send qualified personnel to the site to observe the testing and inspection.
- (4) The **distributed generator** must give the **distributor** with a written test report when testing and inspection is complete, including suitable evidence that the **distributed generation** complies with the **distributor's connection and operation standards**.
- (5) The **distributed generator** must pay any fee specified by the **distributor** in accordance with clause 6.3(2)(e) for observing the testing and inspection.

Compare: SR 2007/219 clause 7 Schedule 1

Clause 7(1): substituted, on 23 February 2015, by clause 27(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 7(1A): inserted, on 23 February 2015, by clause 27(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 7(4) and (5): amended, on 23 February 2015, by clause 27(3) and (4) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

**8 Connection of distributed generation if connection contract negotiated**

- (1) This clause applies if a **distributor** and a **distributed generator** whose application under this Part of this Schedule is approved enter into a connection contract before the period for negotiating a connection contract under this Part of this Schedule expires.

- (2) If the application is to connect **distributed generation** under clause 1B(a), the **distributor** must allow the **distributed generator** to connect the **distributed generation** in accordance with the contract as soon as practicable.
- (3) If the application is to continue an existing connection of **distributed generation** under clause 1B(b), the **distributor** must use its best endeavours to ensure that the new terms under which the **distributed generator's** existing connection continues apply—
  - (a) as soon as practicable, if the previous connection contract has expired; or
  - (b) no later than the expiry of the previous connection contract, if the contract is in force.
- (4) If the application is to continue an existing connection for which there is no connection contract under clause 1B(c), the **distributor** must use its best endeavours to ensure that the new terms under which the **distributed generator's** existing connection continues apply as soon as practicable.
- (5) If the application is to change the **nameplate capacity** or fuel type of connected **distributed generation** under clause 1B(d), the **distributor** must use its best endeavours to ensure that the new terms under which the **distributed generator's** existing connection continues apply as soon as practicable.

Compare: SR 2007/219 clause 8 Schedule 1

Clause 8: substituted, on 23 February 2015, by clause 28 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 8: amended, on 5 October 2017, by clause 44 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 9 **Connection of distributed generation on regulated terms if connection contract not negotiated**

- (1) This clause applies if a **distributor** and a **distributed generator** whose application under this Part of this Schedule is approved do not enter into a connection contract before the period for negotiating a connection contract under this Part of this Schedule expires.
- (2) If the application is to connect **distributed generation** under clause 1B(a), the **distributor** must allow the **distributed generator** to connect the **distributed generation** on the **regulated terms** as soon as practicable after the expiry of the period.
- (3) If the application is to continue an existing connection of **distributed generation** under clause 1B(b), the **regulated terms** apply to the **distributed generator's** existing connection as follows:
  - (a) if the previous connection contract has expired, the **regulated terms** apply from the day after the date on which the period for negotiating a connection contract under this Part of this Schedule expires;
  - (b) if the previous connection contract is still in force, the **regulated terms** apply from the day after the date on which the contract expired.
- (4) If the application is to continue an existing connection for which there is no connection contract under clause 1B(c), the **regulated terms** apply from the day after the date that the period for negotiating a connection contract under this Part of this Schedule expires.
- (5) If the application is to change the **nameplate capacity** or fuel type of connected **distributed generation** under clause 1B(d), the **regulated terms** apply from the day after the date that the period for negotiating a connection contract under this Part of this Schedule expires.

Compare: SR 2007/219 clause 9 Schedule 1

Clause 9: substituted, on 23 February 2015, by clause 28 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 9: amended, on 5 October 2017, by clause 45(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9(2): amended, on 5 October 2017, by clause 45(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9(5): amended, on 5 October 2017, by clause 45(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### Part 1A

#### Applications for distributed generation of 10 kW or less in total in specified circumstances

#### 9A Contents of this Part

- (1) This Part applies to applications relating to **distributed generation** that has a **nameplate capacity** of 10 kW or less in total if the **distributed generator** that owns or operates the **distributed generation** has elected, under clause 1D, to apply under this Part of this Schedule.
- (2) This Part of this Schedule provides for a simplified 1-stage application process.

#### 9B Application for distributed generation of 10 kW or less in total in specified circumstances

- (1) A **distributed generator's** application to a **distributor** must specify which of the following circumstances applies:
  - (a) the **distributed generator** wishes to connect **distributed generation**:
  - (b) the **distributed generator** wishes to continue an existing connection of **distributed generation** that is connected in accordance with a connection contract that—
    - (i) is in force and the **distributed generator** wishes to extend the term of the connection contract; or
    - (ii) has expired:
  - (c) the **distributed generator** wishes to continue an existing connection of **distributed generation** that is connected without a connection contract:
  - (d) the **distributed generator** wishes to change the **nameplate capacity** or fuel type of connected **distributed generation**.
- (2) An application must include the following:
  - (a) the name, contact, and address details of the **distributed generator** and, if applicable, the **distributed generator's** agent:
  - (b) a brief description of the physical location at the address at which the **distributed generation** is or will be connected:
  - (c) any application fee specified by the **distributor** in accordance with clause 6.3(2)(e):
  - (d) details of the make and model of the inverter:
  - (e) confirmation as to whether the inverter—
    - (i) is included on the **distributor's** list of approved inverters made publicly available under clause 6.3(2)(f); or
    - (ii) conforms with the settings specified in the **distributor's connection and operation standards**:
  - (f) if the inverter is not included on the **distributor's** list of approved inverters, a copy of the AS/NZS 4777.2:2020 Declaration of Conformity certificate for the inverter:
  - (g) details of—

- (i) the **nameplate capacity** of the **distributed generation**; and
  - (ii) the fuel type of the **distributed generation** (for example, solar, wind, or liquid fuel).
- (2A) Until 1 September 2026, an application must also include—
- (a) confirmation as to whether the inverter conforms with the control settings and volt response mode settings specified in the **distributor’s connection and operation standards**;
  - (b) confirmation that the **distributed generation** has a **maximum export power** limit that does not exceed the **maximum export power** threshold, if any, specified by the **distributor** in its **connection and operation standards**; and
  - (c) the **maximum export power** of the **distributed generation**.
- (3) The **distributed generator** must also give the **distributor** the following information as soon as it is available, but no later than 10 **business days** after the approval of the application:
- (a) a copy of the Certificate of Compliance issued under the Electricity (Safety) Regulations 2010 that relates to the **distributed generation**;
  - (b) the **ICP identifier** of the **ICP** at which the **distributed generation** is connected or is proposed to be connected, if one exists.
- (4) A **distributor** must, no later than 2 **business days** after receiving an application from a **distributed generator**, acknowledge receipt of the application.

Clause 9B: amended, on 5 October 2017, by clause 46(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9B(1)(a): amended, on 5 October 2017, by clause 46(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9B(1): amended, on 5 October 2017, by clause 46(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9B(2)(e)(ii): amended, on 1 September 2021, by clause 7(1) of the Electricity Industry Participation Code Amendment (Application for Distributed Generation) 2021.

Clause 9B(2)(f): amended, on 20 October 2016, by clause 5 of the Electricity Industry Participation Code Amendment (Inverter Standard for Distributed Generation) 2016.

Clause 9B(2)(f): amended, on 1 September 2021, by clause 7(2) of the Electricity Industry Participation Code Amendment (Application for Distributed Generation) 2021.

Clause 9B(2)(f): amended, on 18 December 2021, by clause 5 of the Electricity Industry Participation Code Amendment (Inverter Standard for Distributed Generation) 2021

Clause 9B(2A): inserted, on 1 September 2021, by clause 7(3) of the Electricity Industry Participation Code Amendment (Application for Distributed Generation) 2021. **Note: paragraph 9B(2A) automatically revokes on the close of 1 September 2026 under clause 8 of the Electricity Industry Participation Code Amendment (Application for Distributed Generation) 2021.**

### **9C Distributor may inspect distributed generation**

- (1) A **distributor** may inspect **distributed generation** that is connected or is proposed to be connected to its **distribution network** for the purpose of—
- (a) verifying that the **distributed generation** meets, or continues to meet, the requirements specified in clause 1D; or
  - (b) verifying the information contained in an application made under this Part of this Schedule.
- (2) If a **distributor** wishes to inspect **distributed generation**, the **distributor** must give the **distributed generator** at least 2 **business days’** notice of the time and date on which the inspection will take place.
- (3) Following receipt of a notice, the **distributed generator** must—
- (a) pay the fee specified by the **distributor** in accordance with clause 6.3(2)(e) for the inspection (if any); and

(b) provide or arrange for the **distributor** to have reasonable access to the **distributed generation**.

Clause 9C(1): amended, on 5 October 2017, by clause 47 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### **9D Export congestion**

(1) This clause applies if a **distributed generator** applies to a **distributor** under this Part of this Schedule to connect **distributed generation** or continue an existing connection of **distributed generation** to a location on the **distributor's distribution network** that is included in the list made publicly available in accordance with clause 6.3(2)(da) or (db).

(2) The **distributor** may advise the **distributed generator** that the **distributed generation** may be subject to **export congestion** as set out in the **distributor's congestion management policy**.

(3) If a **distributor** has advised a **distributed generator** under subclause (2), the **distributor** must take reasonable steps to work with the **distributed generator** to assess whether solutions exist to mitigate the **export congestion**.

Clause 9D(1): amended, on 5 October 2017, by clause 48 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9D(1): amended, on 20 December 2021, by clause 6 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

#### **9E Non-compliance or incomplete information**

(1) This clause applies if a **distributor** considers that an application made to it by a **distributed generator** under this Part of this Schedule has 1 or more of the following deficiencies:

(a) the **distributed generation** to which the application relates does not meet the requirements specified in clause 1D:

(b) the **distributed generation** to which the application relates is not as described in the information given under clause 9B(2):

(c) the **distributed generator** has not complied with clause 9B(2).

(2) If this clause applies, the **distributor** must advise the **distributed generator** of the deficiency or deficiencies.

(3) If the **distributed generator** is advised of a deficiency or deficiencies, it must remedy each deficiency to the satisfaction of the **distributor** no later than 10 **business days** after being advised of the deficiency.

(4) If the **distributed generator** is required to remedy a deficiency it must pay the relevant fee specified by the **distributor** in accordance with clause 6.3(2)(e).

(5) If the **distributed generator** does not remedy each deficiency of which it is advised within the time frame specified in subclause (3)—

(a) if the **distributed generation** to which the application relates is **electrically connected** to the **distributor's distribution network** at the time the **distributor** advises the **distributed generator** under subclause (2), the **distributor** may, by notice to the **distributed generator**, require the **distributed generator** to—

(i) **electrically disconnect** the **distributed generation** within a reasonable time frame specified by the **distributor** (if applicable); and

(ii) keep the **distributed generation electrically disconnected** until each deficiency is remedied to the **distributor's** satisfaction; or

- (b) if the **distributed generation** is not connected to the **distributor's distribution network** at the time of being advised under subclause (2), the **distributor** may, by notice to the **distributed generator**, prohibit the **distributed generator** from connecting the **distributed generation** to the **distributor's distribution network** until each deficiency is remedied to the **distributor's** satisfaction.
- (6) The **distributor** must approve connection of the **distributed generation** as soon as is reasonable in the circumstances if—
- (a) the **distributed generator** complies with a notice given under subclause (5)(a) (if applicable); and
- (b) the **distributed generator** remedies each deficiency advised under subclause (2)—
- (i) to the satisfaction of the **distributor**; and
- (ii) no later than 12 months after the date of the notice given under subclause (5) or such later date as is agreed by the **distributor** and the **distributed generator**.
- (7) If the **distributor** approves the connection of **distributed generation**, it must give a notice of final approval to the **distributed generator** under clause 9F.
- Clause 9E(5)(a): replaced, on 5 October 2017, by clause 49(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.
- Clause 9E(5)(b): amended, on 5 October 2017, by clause 49(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.
- Clause 9E(6): amended, on 5 October 2017, by clause 49(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.
- Clause 9E(7): amended, on 5 October 2017, by clause 49(4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### **9F Notice of final approval**

- (1) A **distributor** must give a notice of final approval of **distributed generation** to a **distributed generator** that has made an application to the **distributor** under this Part of this Schedule if the **distributor** is satisfied that—
- (a) the **distributed generation** meets the requirements specified in clause 1D; and
- (b) the information given by the **distributed generator** under clause 9B(2) is complete and accurate.
- (2) The **distributor** must give the notice no later than 10 **business days** after the date on which the application was submitted.
- (3) If the **distributed generator** does not receive a notice by the date specified in subclause (2), the **distributor** is deemed to have given notice of final approval.

#### **9G Regulated terms apply**

- (1) If a **distributor** gives a notice of final approval to a **distributed generator** under clause 9F, the **regulated terms** apply.
- (2) Despite subclause (1), and in accordance with clause 6.6(4), the **distributor** and **distributed generator** may at any time enter into a connection contract on terms that apply instead of the **regulated terms**.
- Clause 9G(2): amended, on 5 October 2017, by clause 50 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### **9H When distributed generator may connect to distribution network**

- (1) A **distributed generator** that has submitted an application to a **distributor** under clause 1D may connect the **distributed generation** to which the application relates to the **distributor's distribution network** if the **distributed generator** receives a notice

of final approval under clause 9F(1), or is deemed to have received a notice of final approval under clause 9F(3).

- (2) Despite subclause (1) a **distributor** may prohibit a **distributed generator** from connecting if—
- (a) the **distributor** has advised the **distributed generator** of a deficiency under clause 9E(2) and the deficiency has not been remedied in accordance with clause 9E(3); or
  - (b) the **distributor** gave notice that it wished to inspect the **distributed generation** under clause 9C(2), but the **distributed generator** has not provided or arranged for the **distributor** to have reasonable access to the **distributed generation** under clause 9C(3)(b).

Part 1A: inserted, on 23 February 2015, by clause 29 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 9H(1) and (2): amended, on 5 October 2017, by clause 51 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## Part 2

### Applications for distributed generation above 10 kW in total

Heading: amended, on 23 February 2015, by clause 30 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

#### 10 Contents of this Part

- (1) This Part of this Schedule applies to applications relating to **distributed generation** that has a **nameplate capacity** of more than 10 kW in total.
- (2) This Part of this Schedule provides for a 2-stage application process.

Compare: SR 2007/219 clause 10 Schedule 1

Clause 10(1): substituted, on 23 February 2015, by clause 31 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

#### *Initial application process*

#### 11 Distributed generator must make initial application and give information

- (1) *[Revoked]*
- (2) A **distributed generator** must apply to a **distributor** ("**initial application**") by—
  - (a) using the application form provided by the **distributor** that is publicly available under clause 6.3(2)(a); and
  - (b) providing any information in respect of the **distributed generation** to which the application relates that is—
    - (i) referred to in subclause (3); and
    - (ii) specified by the **distributor** under clause 6.3(3) as being required to be provided with the application; and
  - (c) paying the application fee (if any) specified by the **distributor** in accordance with clause 6.3(2)(e).
- (3) The information may include the following:
  - (a) the full name and address of the **distributed generator** and the contact details of a person whom the **distributor** may contact regarding the **distributed generation**:
  - (aa) whether the application is to—

- (i) connect **distributed generation**; or
  - (ii) continue an existing connection of **distributed generation** that is connected in accordance with a connection contract if the connection contract—
    - (A) is in force and the **distributed generator** wishes to extend the term of the connection contract; or
    - (B) has expired; or
  - (iii) continue an existing connection of **distributed generation** that is connected without a connection contract; or
  - (iv) change the **nameplate capacity** or fuel type of connected **distributed generation**:
- (b) evidence of the **nameplate capacity** that the **distributed generation** will have:
  - (ba) if the application is to change the **nameplate capacity** or fuel type of connected **distributed generation**,—
    - (i) the **nameplate capacity** that the **distributed generation** will have after the change; and
    - (ii) the aggregate **nameplate capacity** that all **distributed generation** that is connected at the **point of connection** at which the **distributed generation** is connected will have after the change; and
    - (iii) the fuel type that the **distributed generation** will have after the change:
  - (c) details of the fuel type of the **distributed generation** (for example, solar, wind, or liquid fuel):
  - (d) a brief description of the physical location at the address at which the **distributed generation** is or will be connected:
  - (da) if the application is to **connect distributed generation**, when the **distributed generator** expects the **distributed generation** to be connected:
  - (e) technical specifications of the **distributed generation** and **associated equipment**, including the following:
    - (i) technical specifications of equipment that allows the **distributed generation** to be **electrically disconnected** from the **distribution network** on loss of mains voltage:
    - (ii) manufacturer's rating of equipment:
    - (iii) number of phases:
    - (iv) proposed or current **point of connection** to the **distribution network** (for example, the **ICP identifier** and street address):
    - (v) details of either or both of any inverter and battery storage:
    - (vi) details of any load at the proposed or current **point of connection**:
    - (vii) details of the voltage (for example, 415 V or 11 kV) when **electrically connected**:
  - (f) information showing how the **distributed generation** complies with the **distributor's connection and operation standards**:
  - (g) the maximum **active power** injected (**MW max**):
  - (h) the **reactive power** requirements (**MVAr**s) (if any):
  - (i) resistance and reactance details of the **distributed generation**:
  - (j) fault level contribution (**kA**):
  - (k) method of voltage control:
  - (l) single line diagram of proposed connection:

- (m) means of **synchronising** with, **electrically connecting** to, and **electrically disconnecting** from, the **distribution network**, including the type and ratings of the proposed **circuit breaker**;
  - (n) details of compliance with frequency and voltage support requirements as specified in this Code (if applicable);
  - (o) proposed periods and amounts of **electricity injections** into, and **oftakes** from, the **distribution network** (if known);
  - (p) any other information that is required by the **system operator**;
  - (q) any additional information or **documents** that are reasonably required by the **distributor**.
- (4) *[Revoked]*
- (5) The **distributor** must, within **5 business days** of receiving an **initial application**, give written notice to the applicant advising whether or not the application is complete.
- Compare: SR 2007/219 clause 11 Schedule 1  
Heading: amended, on 23 February 2015, by clause 32(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.  
Clause 11: amended, on 5 October 2017, by clause 52(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 11(1): revoked, on 23 February 2015, by clause 32(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.  
Clause 11(2): substituted, on 23 February 2015, by clause 32(3) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.  
Clause 11(3)(a): amended, on 23 February 2015, by clause 32(4) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.  
Clause 11(3)(aa): inserted, on 23 February 2015, by clause 32(5) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.  
Clause 11(3)(aa): amended, on 5 October 2017, by clause 52(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 11(3)(aa), (ba) and (d): amended, on 5 October 2017, by clause 52(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 11(3)(b): substituted, on 23 February 2015, by clause 32(6) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.  
Clause 11(3)(ba): inserted, on 23 February 2015, by clause 32(7) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.  
Clause 2(3)(ba)(ii): amended, on 23 February 2015, by clause 7(1) of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.  
Clause 2(3)(ba)(iii): inserted, on 23 February 2015, by clause 7(2) of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.  
Clause 11(3)(c) and (d): substituted, on 23 February 2015, by clause 32(8) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.  
Clause 11(3)(da): inserted, on 23 February 2015, by clause 32(9) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.  
Clause 11(3)(da): amended, on 5 October 2017, by clause 52(4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 11(3)(e): substituted, on 23 February 2015, by clause 32(10) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.  
Clause 11(3)(e)(i): amended, on 5 October 2017, by clause 52(5) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 11(3)(e)(vii): amended, on 5 October 2017, by clause 52(6) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 11(3)(i): amended, on 23 February 2015, by clause 32(11) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.  
Clause 11(3)(l): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.  
Clause 11(3)(l): amended, on 5 October 2017, by clause 52(7) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 11(3)(m): amended, on 23 February 2015, by clauses 32(12) and 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 11(3)(m): replaced, on 5 October 2017, by clause 52(8) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11(3)(q): amended, on 23 February 2015, by clause 32(13) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 11(4): revoked, on 23 February 2015, by clause 32(14) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

## 12 Distributor must give information to distributed generator

A **distributor** must give a **distributed generator** that makes an **initial application** the following within 30 **business days** of receiving the completed **initial application**:

- (a) information about the **capacity** of the **distribution network**, including both the design **capacity** (including fault levels) and actual operating levels;
- (b) information about the extent to which connection and operation of the **distributed generation** may result in a breach of the relevant standards for safety, voltage, power quality, and reliability of **electricity** conveyed to **points of connection** on the **distribution network**;
- (c) information about any measures or conditions (including modifications to the design and operation of the **distribution network** or to the operation of the **distributed generation**) that may be necessary to address the matters referred to in paragraphs (a) and (b);
- (d) the approximate costs of any **distribution network** related measures or conditions identified under paragraph (c) and an estimate of time constraints or restrictions that may delay connecting the **distributed generation**;
- (e) information about any further detailed investigative studies that the **distributor** reasonably considers are necessary to identify any potential adverse effects the **distributed generation** may have on the system, together with an indication of—
  - (i) whether the **distributor** agrees to the **distributed generator**, or a suitably qualified agent of the **distributed generator**, undertaking those studies; or
  - (ii) if not, whether the **distributor** could undertake those studies and, if so, the reasonable estimated cost of the studies that the **distributed generator** would be charged;
- (f) information about any obligations to other parties that may be imposed on the **distributor** and that could affect the **distributed generation** (for example, obligations to **Transpower**, in respect of other **networks**, or under this Code);
- (g) any additional information or documents that the **distributor** considers would assist the **distributed generator's** application;
- (h) information about the extent to which planned and **unplanned outages** may adversely affect the operation of the **distributed generation**.

Compare: SR 2007/219 clause 12 Schedule 1

Heading: amended, on 23 February 2015, by clause 33(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 12: amended, on 23 February 2015, by clause 33(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 12(b): amended, on 23 February 2015, by clauses 33(3) and 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 12(b): amended, on 5 October 2017, by clause 53(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12(d): amended, on 23 February 2015, by clauses 33(4) and 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 12(d): amended, on 5 October 2017, by clause 53(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12(e): amended, on 23 February 2015, by clause 33(5) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

### **13 Other matters to assist with decision making**

- (1) A **distributor** must provide, if requested by a **distributed generator** making an **initial application**, further information that is reasonably necessary to enable the **distributed generator** to consider and act on the information given by the **distributor** under clause 12.
- (2) The information that the **distributor** must provide under subclause (1) may include single line diagrams, equipment ratings, normal switch configurations (including fault levels), and protection system details relevant to the current or proposed **point of connection** of the **distributed generation** to the **distribution network**.
- (3) The **distributor** must provide the further information under this clause within 10 **business days** of the request being received.

Compare: SR 2007/219 clause 13 Schedule 1

Clause 13(2): amended, on 23 February 2015, by clause 34 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

### **14 Distributor and distributed generator must make reasonable endeavours regarding new information**

If a **distributor** or a **distributed generator** has given information under this Part of this Schedule and subsequently becomes aware of new information that is relevant to the application, the party that becomes aware of the new information must use reasonable endeavours to provide the other party with the new information.

Compare: SR 2007/219 clause 14 Schedule 1

Clause 14: amended, on 23 February 2015, by clause 35 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

### *Final application process*

### **15 Distributed generator must make final application**

- (1) A **distributed generator** that makes an **initial application** to a **distributor** must make a **final application**, no later than 12 months after receiving information under clauses 12 and 13, if the **distributed generator** wishes to proceed with the application, unless—
  - (a) the **distributor** and the **distributed generator** agree that a **final application** is not required; and
  - (b) there are no persons to whom the **distributor** must give written notice under clause 16 at the time that the **distributor** and **distributed generator** agree that a **final application** is not required.
- (1A) If a **final application** is not required—
  - (a) subclause (2) does not apply; and
  - (b) the **distributed generator's initial application** must be treated as a **final application** for the purposes of clauses 16 to 24.
- (2) The **distributed generator** must make the **final application** by—

- (a) using the **final application** form provided by the **distributor** that is publicly available under clause 6.3(2)(a); and
- (b) providing the results of any investigative studies that were identified by the **distributor** under clause 12(e)(i) as to be undertaken by the **distributed generator** or the **distributed generator's agent**.

Compare: SR 2007/219 clause 15 Schedule 1

Clause 15(1): substituted, on 23 February 2015, by clause 36(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 15(1)(b): amended, on 1 November 2018, by clause 7 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018. Clause 15(1A): inserted, on 23 February 2015, by clause 36(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

## 16 Notice to third parties

A **distributor** that receives a **final application** must give written notice to the following persons no later than 10 **business days** after receiving the **final application**:

- (a) all persons that have made an **initial application** relating to a particular part of the **distribution network** that the **distributor** considers would be affected by the approval of the **final application**; and
- (b) all **distributed generators** that have **distributed generation** with a **nameplate capacity** of 10 kW or more in total connected on the **regulated terms** to the particular part of the **distribution network** that the **distributor** considers would be affected by the approval of the **final application**.

Compare: SR 2007/219 clause 16 Schedule 1

Clause 16: substituted, on 23 February 2015, by clause 37 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 16(b): amended, on 5 October 2017, by clause 54 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 17 Priority of final applications

- (1) Subclause (2) applies if—
  - (a) a **distributor** receives a **final application** (the **first application**); and
  - (b) the **distributor** receives another **final application**, within 20 **business days** after receiving the **first application**, relating to a particular part of the **distribution network** that the **distributor** considers would be affected by the approval of the **first application**.
- (2) If this subclause applies, the **distributor**—
  - (a) may consider the **final applications** together as if they were competitive bids to use the same part of the **distribution network**; and
  - (b) must consider the **final applications** in light of the purpose of Part 6 of this Code.
- (3) In any other case in which a **distributor** receives more than 1 **final application** relating to a similar part of the **distribution network**, the **distributor** must consider an earlier **final application** in priority to other **final applications**.
- (4) Subclause (3) does not limit clause 19.

Compare: SR 2007/219 clause 17 Schedule 1

Clause 17(1) and (2): substituted, on 23 February 2015, by clause 38(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 17(3): amended, on 23 February 2015, by clause 38(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

## 18 Distributor's decision on application

- (1) A **distributor** must, within the time limit specified in clause 19, give notice in writing to the applicant stating whether the **final application** is approved or declined.
- (2) A **distributor** must approve a **final application**, subject to any conditions specified by the **distributor** that are reasonably required, if—
  - (a) the application has been properly made in accordance with Part 6 of this Code; and
  - (b) the information provided in the application would reasonably support an assessment by the **distributor** that—
    - (i) the **distributed generator** will comply at all times with the requirements of the Health and Safety at Work Act 2015; and
    - (ii) the **distributed generator** will ensure that the **distributed generation** complies at all times with the **Act** and this Code; and
    - (iii) the **distributed generation** meets the **distributor's connection and operation standards** (assuming that the **distributed generator** meets the conditions (if any) referred to in subclause (3)).
- (3) A notice stating that an application is approved must be accompanied by the following information:
  - (a) a detailed description of any conditions (or other measures) that are conditions of the approval under subclause (2), and what the **distributed generator** must do to comply with them;
  - (b) detailed reasons for those conditions (or other measures):
  - (c) a detailed description of any charges payable by the **distributed generator** to the **distributor** or by the **distributor** to the **distributed generator**, and an explanation of how the charges have been, or will be, calculated;
  - (d) the default process for resolving disputes under Schedule 6.3, if the **distributed generator** disputes all or any of the conditions (or other measures) or charges payable.
- (4) A notice stating that an application is declined must be accompanied by the following information:
  - (a) detailed reasons as to why the application has been declined and what the applicant must do to get approval if it makes a new application:
  - (aa) if the application is one to which clause 17(2) applies, the criteria used in making a decision under clause 17(2)(a) and clause 17(2)(b):
  - (b) the default process for resolving disputes between **participants** under Schedule 6.3:
  - (c) that if the **distributed generator** is not a **participant**, the **distributed generator** may report to the **Authority** under the Electricity Industry (Enforcement) Regulations 2010 if it considers that the **distributor** has breached any requirement in Part 6 of this Code.

Compare: SR 2007/219 clause 18 Schedule 1

Clause 18(2): amended, on 23 February 2015, by clause 39(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 18(2)(b)(i): amended, on 5 October 2017, by clause 55 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 18(3): substituted, on 23 February 2015, by clause 39(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 18(4)(a): substituted, on 23 February 2015, by clause 39(3) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 18(4)(aa): inserted, on 23 February 2015, by clause 39(4) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 18(4)(b): substituted, on 23 February 2015, by clause 39(5) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 18(4)(c): inserted, on 23 February 2015, by clause 39(5) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

## **19 Time within which distributor must decide final applications**

- (1) A notice required by clause 18 must be given by a **distributor** to a **distributed generator** no later than—
  - (a) **45 business days** after the date of receipt of the **final application**, in the case of **distributed generation** that will have a **nameplate capacity** of less than **1 MW**; or
  - (b) **60 business days** after the date of receipt of the **final application**, in the case of **distributed generation** that will have a **nameplate capacity** of **1 MW** or more but less than **5 MW**; or
  - (c) **80 business days** after the date of receipt of the **final application**, in the case of **distributed generation** that will have a **nameplate capacity** of **5 MW** or more.
- (2) The **distributor** may seek 1 or more extensions of the time specified in subclause (1).
- (3) The **distributor** must do this by notice in writing to the **distributed generator** specifying the reasons for the extension.
- (4) A **distributed generator** that receives a notice seeking an extension—
  - (a) may grant an extension which must not exceed **40 business days**; and
  - (b) must not unreasonably withhold consent to an extension.

Compare: SR 2007/219 clause 19 Schedule 1

Clause 19(1): substituted, on 23 February 2015, by clause 40(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 19(4): substituted, on 23 February 2015, by clause 40(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

## **20 Distributed generator must give notice of intention to negotiate**

- (1) If a **distributor** advises a **distributed generator** that the **distributed generator's final application** is approved, the **distributed generator** must give written notice to the **distributor** confirming whether or not the **distributed generator** intends to proceed to negotiate a connection contract under clause 21(1) and, if so, confirming—
  - (a) the details of the **distributed generation**; and
  - (b) that the **distributed generator** accepts all of the conditions (or other measures) that have been specified by the **distributor** under clause 18.
- (2) The **distributed generator** must give the notice no later than **30 business days** after the day on which the **distributor** gives notice of approval under clause 18, or such later date as is agreed by the **distributor** and the **distributed generator**.
- (3) If the **distributed generator** is a **participant** and does not accept 1 or more of the conditions specified by the **distributor** under clause 18(2) (if any), but intends to proceed to negotiate a connection contract under clause 21(1), the **distributed generator** must—
  - (a) give notice of the dispute in accordance with clause 2 of Schedule 6.3 within **30 business days** after the day on which the **distributor** gives notice of approval under clause 18; and

- (b) give a notice under subclause (1) within 30 **business days** after the dispute is resolved.
- (4) The **distributor's** duties under Part 6 of this Code arising from the application no longer apply if the **distributed generator** fails to give notice to the **distributor** of an intention to proceed to negotiate a connection contract under clause 21(1) within the time limits specified in this clause.
- (5) Subclause (4) does not prevent the **distributed generator** from making a new application under Part 6 of this Code.
- Compare: SR 2007/219 clause 20 Schedule 1  
Clause 20 heading: amended, on 20 December 2021, by clause 7 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.  
Clause 20: substituted, on 23 February 2015, by clause 41 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.  
Clause 20: amended, on 5 October 2017, by clause 56 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### *Post-approval process*

Cross heading: amended, on 23 February 2015, by clause 42 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

### **21 30 business days to negotiate connection contract if distributed generator gives notice of intention to negotiate**

- (1) If a **distributed generator** whose **final application** is approved gives notice to a **distributor** under clause 20(1), the **distributor** and the **distributed generator** have 30 **business days**, starting on the date on which the **distributor** receives the notice, during which they must, in good faith, attempt to negotiate a connection contract.
- (2) The **distributor** and the **distributed generator** may, by agreement, extend the time specified in subclause (1) for negotiating a connection contract.
- Compare: SR 2007/219 clause 21 Schedule 1  
Clause 21 heading: amended, on 20 December 2021, by clause 8 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.  
Clause 21 heading: amended, on 1 November 2018, by clause 8 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.  
Clause 21: amended, on 23 February 2015, by clauses 43 and 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.  
Clause 21: amended, on 5 October 2017, by clause 57 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### **22 Testing and inspection**

- (1) A **distributed generator** whose **final application** is approved by a **distributor** must test and inspect the **distributed generation** to which the **final application** relates within a reasonable time frame specified by the **distributor**.
- (1A) The **distributor** may waive the requirement that the **distributed generator** test and inspect if the **distributor** is satisfied that the **distributed generation** complies with the **distributor's connection and operation standards**.
- (2) The **distributed generator** must give adequate notice of the testing and inspection to the **distributor**.
- (3) The **distributor** may send qualified personnel to the site to observe the testing and inspection.

- (4) The **distributed generator** must give the **distributor** with a written test report when testing and inspection is complete, including suitable evidence that the **distributed generation** complies with the **distributor's connection and operation standards**.
- (5) The **distributed generator** must pay any fee specified by the **distributor** in accordance with clause 6.3(2)(e) for observing the testing and inspection.

Compare: SR 2007/219 clause 22 Schedule 1

Clause 22(1): substituted, on 23 February 2015, by clause 44(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 22(1A): inserted, on 23 February 2015, by clause 44(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 22(4): amended, on 23 February 2015, by clause 44(3) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 22(5): amended, on 23 February 2015, by clause 44(4) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

### **23 Connection of distributed generation if connection contract negotiated**

- (1) This clause applies if a **distributor** and a **distributed generator** whose **final application** is approved enter into a connection contract before the period for negotiating a connection contract under this Part of this Schedule expires.
- (2) If the application is to connect **distributed generation** under clause 1B(a), the **distributor** must allow the **distributed generator** to connect the **distributed generation** in accordance with the contract as soon as practicable.
- (3) If the application is to continue an existing connection of **distributed generation** under clause 1B(b), the **distributor** must use its best endeavours to ensure that the new terms under which the **distributed generator's** existing connection continues apply—
  - (a) as soon as practicable, if the previous connection contract has expired; or
  - (b) no later than the expiry of the previous connection contract, if the contract is in force.
- (4) If the application is to continue an existing connection for which there is no connection contract under clause 1B(c), the **distributor** must use its best endeavours to ensure that the new terms under which the **distributed generator's** existing connection continues apply as soon as practicable.
- (5) If the application is to change the **nameplate capacity** or fuel type of connected **distributed generation** under clause 1B(d), the **distributor** must use its best endeavours to ensure that the new terms under which the **distributed generator's** existing connection continues apply as soon as practicable.

Compare: SR 2007/219 clause 23 Schedule 1

Clause 23: substituted, on 23 February 2015, by clause 45 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 23: amended, on 5 October 2017, by clause 58(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 23(2): amended, on 5 October 2017, by clause 58(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 23(5): amended, on 5 October 2017, by clause 58(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### **24 Connection of distributed generation on regulated terms if connection contract not negotiated**

- (1) This clause applies if a **distributor** and a **distributed generator** whose **final application** is approved do not enter into a connection contract before the period for negotiating a connection contract under this Part of this Schedule expires.

- (2) If the application is to connect **distributed generation** under clause 1B(a), the **distributor** must allow the **distributed generator** to connect the **distributed generation** on the **regulated terms** as soon as practicable after the later of the following:
- (a) the expiry of the period for negotiating a connection contract under this Part of this Schedule:
  - (b) the date on which the **distributed generator** has fully complied with any conditions (or other measures) that were specified by the **distributor** under clause 18 as conditions of the connection.
- (3) If the application is to continue an existing connection of **distributed generation** under clause 1B(b), the **regulated terms** apply to the **distributed generator's** existing connection from the later of the following:
- (a) the expiry of the period for negotiating a connection contract under this Part of this Schedule:
  - (b) the expiry of the existing connection contract:
  - (c) the date on which the **distributed generator** has fully complied with any conditions (or other measures) that were specified by the **distributor** under clause 18 as conditions of the connection.
- (4) If the application is to continue an existing connection for which there is no connection contract under clause 1B(c), the **regulated terms** apply from the later of the following:
- (a) the expiry of the period for negotiating a connection contract under this Part of this Schedule:
  - (b) the date on which the **distributed generator** has fully complied with any conditions (or other measures) that were specified by the **distributor** under clause 18 as conditions of the connection.
- (5) If the application is to change the **nameplate capacity** or fuel type of connected **distributed generation** under clause 1B(d), the **regulated terms** apply from the later of the following:
- (a) the expiry of the period for negotiating a connection contract under this Part of this Schedule:
  - (b) the date on which the **distributed generator** has fully complied with any conditions (or other measures) that were specified by the **distributor** under clause 18 as conditions of the connection.

Compare: SR 2007/219 clause 24 Schedule 1

Clause 24: substituted, on 23 February 2015, by clause 45 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 24: amended, on 5 October 2017, by clause 59(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 24(2): amended, on 5 October 2017, by clause 59(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 24(5): amended, on 23 February 2015, by clause 8 of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.

Clause 24(5): amended, on 5 October 2017, by clause 59(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## Part 3 General provisions

### *Confidentiality*

## 25 Confidentiality of information provided

- (1) All information given with, or relating to, an application made under this Schedule to a **distributor** must be kept confidential by the **distributor** except as agreed otherwise by the person that gave the information.
- (1A) A **distributor** may require a **distributed generator** to keep confidential information that—
  - (a) is given to the **distributed generator** by the **distributor** for the purpose of an application under this Schedule; and
  - (b) the **distributor** reasonably identifies as being confidential.
- (1B) A **distributor** is excused from processing an application made by a **distributed generator** under this Schedule if the **distributed generator** does not agree to comply with a requirement to keep information confidential imposed under subclause (1A).
- (2) Despite subclause (1), the **distributor**—
  - (a) may, in response to an application under this Schedule, disclose to the applicant that another **distributed generator** has made an application under this Schedule (without identifying who the other **distributed generator** is); and
  - (b) may, in the case of an application under Part 1 of this Schedule, generally indicate the location or proposed location of the **distributed generation** that is the subject of the other application; and
  - (c) may, in the case of an application under Part 2 of this Schedule, disclose the **nameplate capacity** and proposed location of the **distributed generation** that is the subject of the other application.
- (3) The obligation to keep information confidential set out in subclause (1) includes—
  - (a) an obligation not to use the information for any purpose other than considering the application under this Schedule and enabling the connection or continued connection of the **distributed generation**; and
  - (b) an obligation to destroy the information as soon as is reasonably practicable after the later of—
    - (i) the date on which the information is no longer required for the purposes in paragraph (a); and
    - (ii) 60 months after receiving the information.

Compare: SR 2007/219 clause 25 Schedule 1

Heading: amended, on 23 February 2015, by clause 46(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 25(1): substituted, on 23 February 2015, by clause 46(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 25(1A) and (1B): inserted, on 23 February 2015, by clause 46(3) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 25(2) and (3): substituted, on 23 February 2015, by clause 46(4) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 25(3)(a): amended, on 5 October 2017, by clause 60 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### *Record keeping*

Heading: amended, on 29 August 2013, by clause 4(1) of the Electricity Industry Participation (Additional Registry Fields) Code Amendment 2012

## 26 *[Revoked]*

Compare: SR 2007/219 clause 26 Schedule 1

Clause 26: revoked, on 29 August 2013, by clause 4(2) of the Electricity Industry Participation (Additional Registry Fields) Code Amendment 2012

**27** ***[Revoked]***

Compare: SR 2007/219 clause 27 Schedule 1

Clause 27: amended, on 21 September 2012, by clause 6 of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012

Clause 27: revoked, on 29 August 2013, by clause 4(2) of the Electricity Industry Participation (Additional Registry Fields) Code Amendment 2012

**28** **Distributors must keep records**

A **distributor** must maintain records of each application and notice received under this Schedule and the resulting outcomes, including records of how long it took to approve or decline the application, and justification for these outcomes, for a minimum of 60 months after the day on which the application was approved or declined.

Compare: SR 2007/219 clause 28 Schedule 1

Clause 28: substituted, on 23 February 2015, by clause 47 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 28: amended, on 1 November 2018, by clause 9 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

*Costs*

**29** **Responsibility for costs under this Schedule**

A **distributor** and **distributed generator** must pay their respective costs (including legal costs) incurred under this Schedule.

Cross heading and clause 29: inserted, on 23 February 2015, by clause 48 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

  - 23 Liability clauses do not apply to fraud, wilful breach, and breach of confidentiality
  - 24 *[Revoked]*
  - 25 Force majeure
-

*General*

**1 Contents of this Schedule**

This Schedule sets out the **regulated terms** that apply to a **distributor** and a **distributed generator** in respect of **distributed generation** that is connected in accordance with clause 6.6 and Schedule 6.1.

Compare: SR 2007/219 clause 1 Schedule 2

Clause 1: amended, on 23 February 2015, by clauses 50 and 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1: amended, on 5 October 2017, by clause 61 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1: amended, on 20 December 2021, by clause 9 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

**2 Interpretation**

These **regulated terms** must be interpreted—

- (a) in light of the purpose of Part 6 of this Code; and
- (b) so as to give business efficacy to the relationship between the **distributor** and the **distributed generator** created by Part 6 of this Code.

Compare: SR 2007/219 clause 2 Schedule 2

**3 General obligations**

- (1) The **distributor** and the **distributed generator** must perform all obligations under these **regulated terms** in accordance with **connection and operation standards** (where applicable).
- (2) The **distributor** and the **distributed generator** must each **construct**, connect, operate, test, and **maintain** their respective equipment in accordance with—
  - (a) these **regulated terms**; and
  - (b) **connection and operation standards** (where applicable); and
  - (c) this Code.
- (3) The **distributed generator** must, subject to subclause (2), **construct**, connect, operate, test, and **maintain** its **distributed generation** in accordance with—
  - (a) **reasonable and prudent operating practice**; and
  - (b) the applicable manufacturer's instructions and recommendations.
- (4) The **distributor** and **distributed generator** must each be fully responsible for the respective facilities they own or operate.
- (5) The **distributor** and **distributed generator** must each ensure that their respective facilities adequately protect each other's equipment, personnel, and other persons and their property, from damage and injury.
- (6) The **distributed generator** must comply with any conditions specified by the **distributor** under clause 18 of Schedule 6.1 (or, to the extent that those conditions were the subject of a dispute under clause 20(3) of that Schedule, or of negotiation during the period for negotiation of the connection contract, the conditions or other measures as finally resolved or negotiated).

Compare: SR 2007/219 clause 3 Schedule 2

Clause 3(1): amended, on 23 February 2015, by clause 51(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 3(2) and (3): amended, on 5 October 2017, by clause 62(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 3(6): amended, on 23 February 2015, by clauses 51(2) and 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 3(6): amended, on 5 October 2017, by clause 62(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### *Meters*

#### **4 Installation of meters and access to metering information**

(1) *[Revoked]*

(2) The **distributed generator** must give the **distributor**, at the **distributor's** request, the interval data and cumulative data recorded by the **metering installations** at the **point of connection** at which the **distributed generation** is connected or is proposed to be connected.

(3) The **distributed generator** must provide **reactive** metering if—

(a) the **meter** for the **distributed generation** is part of a **category 2 metering installation**, or a higher category of **metering installation**; and

(b) the **distributed generator** is required to do so by the **distributor**.

(4) The **distributor's** requirements in respect of metering measurement and accuracy must be the same as set out in Part 10 of this Code.

Compare: SR 2007/219 clause 4 Schedule 2

Clause 4(1): revoked, on 23 February 2015, by clause 52(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014. Clause 4(2): amended, on 5 October 2017, by clause 63 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 4(3): substituted, on 1 December 2011, by clause 5 of the Electricity Industry Participation Code (Distributor Use-of-System Agreements and Distributor Tariffs) Amendment 2011.

Clause 4(2) to (4): substituted, on 23 February 2015, by clause 52(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

### *Access*

#### **5 Right of distributor to access distributed generator's premises**

(1) The **distributed generator** must provide the **distributor**, or a person appointed by the **distributor**, with safe and unobstructed access onto the **distributed generator's** premises at all reasonable times—

(a) for the purpose of installing, testing, inspecting, maintaining, repairing, replacing, operating, reading, or removing any of the **distributor's** equipment and for any other purpose related to these **regulated terms**; and

(b) for the purpose of verifying **metering information**; and

(c) for the purpose of ascertaining the cause of any interference to the quality of delivery services being provided by the **distributor** to the **distributed generator**; and

(d) for the purpose of protecting, or preventing danger or damage to, persons or property; and

(e) for the purposes of **electrically connecting** or **electrically disconnecting** the **distributed generation**; and

(f) for any other purpose relevant to either or both of—

- (i) the **distributor** connecting **distributed generation** in accordance with **connection and operation standards**; and
  - (ii) maintaining the integrity of the **distribution network**.
- (2) The rights of access conferred by these **regulated terms** are in addition to any right of access the **distributor** may have under a statute or regulation or contract.
- Compare: SR 2007/219 clause 5 Schedule 2  
Clause 5(1)(e): amended, on 5 October 2017, by clause 64(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 5(1)(f)(i): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.  
Clause 5(1)(f)(i): amended, on 5 October 2017, by clause 64(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## **6 Process if distributor wants to access distributed generator's premises**

- (1) The **distributor** must exercise its right of access under clause 5 by,—
- (a) wherever practicable, giving to the **distributed generator** reasonable notice of its intention and of the purpose for which it will exercise its right of access; and
  - (b) causing as little inconvenience as practicable to the **distributed generator** in carrying out its work; and
  - (c) observing **reasonable and prudent operating practice** at all times; and
  - (d) observing any reasonable security or site safety requirements that are made known to the **distributor** by the **distributed generator**.
- (2) However, the **distributor** may take all reasonable steps to gain immediate access where it reasonably believes there is immediate danger to persons or property.

Compare: SR 2007/219 clause 6 Schedule 2

## **7 Distributor must not interfere with distributed generator's equipment**

- (1) The **distributor** must not interfere with the **distributed generator's** equipment without the prior written consent of the **distributed generator**.
- (2) However, if emergency action has to be taken to protect the health and safety of persons, or to prevent damage to property, the **distributor**—
- (a) may interfere with the **distributed generator's** equipment without prior written consent; and
  - (b) must, as soon as practicable, inform the **distributed generator** of the occurrence and circumstances involved.

Compare: SR 2007/219 clause 7 Schedule 2

## **8 Distributed generator must not interfere with, and must protect, distributor's equipment**

- (1) The **distributed generator** must not interfere with the **distributor's** equipment without the prior written consent of the **distributor**.
- (2) However, if emergency action has to be taken to protect the health and safety of persons, or to prevent damage to property, the **distributed generator**—
- (a) may interfere with the **distributor's** equipment without prior written consent; and
  - (b) must, as soon as practicable, inform the **distributor** of the occurrence and circumstances involved.

- (3) The **distributed generator** must protect the **distributor's** equipment against interference and damage.  
Compare: SR 2007/219 clause 8 Schedule 2  
Clause 8(1): amended, on 23 February 2015, by clause 53 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

## 9 **Obligation to advise if interference with distributor's equipment or theft of electricity is discovered**

- (1) If the **distributor** or the **distributed generator** discovers evidence of interference with the **distributor's** equipment, or evidence of theft of **electricity**, the party discovering the interference or evidence must advise the other party within 24 hours.
- (2) If interference with the **distributor's** equipment at the **distributed generator's** installation is suspected, the **distributor** may itself carry out an investigation and present the findings to the **distributed generator** within a reasonable period.
- (3) The cost of the investigation—
- (a) must be borne by the **distributed generator** if it is discovered that interference by the **distributed generator**, or by its subcontractors, agents, or invitees, has occurred, or if the interference has been by a third party, and the **distributed generator** has failed to provide reasonable protection against interference to the **distributor's** equipment; and
- (b) must be borne by the **distributor** in any other case.

Compare: SR 2007/219 clause 9 Schedule 2

Heading: amended, on 23 February 2015, by clause 54(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 9(1): amended, on 23 February 2015, by clause 54(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

### *Interruptions and disconnections*

## 10 **General obligation relating to interruptions**

The **distributor** must make reasonable endeavours to ensure that the connection of the **distributed generation** is not interrupted.

Compare: SR 2007/219 clause 10 Schedule 2

Clause 10: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 10: amended, on 5 October 2017, by clause 65 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 11 **Circumstances allowing distributor to temporarily electrically disconnect distributed generation**

Despite clause 10, the **distributor** may interrupt the connection service, or curtail either the operation or output of the generation, or both, and may temporarily **electrically disconnect** the **distributed generation** in any of the following cases:

- (a) in accordance with the **distributor's congestion management policy**;
- (b) if reasonably necessary for planned **maintenance, construction**, and repairs on the **distribution network**;
- (c) for the purpose of protecting, or preventing danger or damage to, persons or property:

- (d) if the **distributed generator** fails to allow the **distributor** access as required by clause 5:
- (e) *[Revoked]*
- (f) in accordance with clause 13 (adverse operating effects):
- (g) if the **distributed generator** fails to comply with the **distributor's**—
  - (i) **connection and operation standards**; or
  - (ii) safety requirements.

Compare: SR 2007/219 clause 11 Schedule 2

Heading: amended, on 5 October 2017, by clause 66(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11: amended, on 23 February 2015, by clauses 55(1) and 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 11: amended, on 5 October 2017, by clause 66(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11(e): revoked, on 23 February 2015, by clause 55(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 11(g): inserted, on 23 February 2015, by clause 55(3) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

## 12 Obligations if distributed generation temporarily electrically disconnected by distributor

- (1) The **distributor** must make reasonable endeavours to—
  - (a) advise the **distributed generator** before an interruption under clause 11; and
  - (b) co-ordinate with the **distributed generator** to minimise the impact of the interruption.
- (2) The **distributor** and the **distributed generator** must co-operate to restore the **distribution network** and the **distributed generation** to a normal operating state as soon as is reasonably practicable following the **distributed generation** being temporarily **electrically disconnected**.
- (3) In the case of a forced outage, the **distributor** must, subject to the need to restore the **distribution network**, make reasonable endeavours to—
  - (a) restore service to the **distributed generator**; and
  - (b) advise the **distributed generator** of the expected duration of the outage.

Compare: SR 2007/219 clause 12 Schedule 2

Heading: amended, on 5 October 2017, by clause 67(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12(1)(a): amended, on 23 February 2015, by clause 56(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 12(2): amended, on 5 October 2017, by clause 67(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12(3): amended, on 23 February 2015, by clause 56(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

## 13 Adverse operating effects

- (1) The **distributor** must advise the **distributed generator** as soon as is reasonably practicable if it reasonably considers that operation of the **distributed generation** may—
  - (a) adversely affect the service provided to other **distribution network** customers; or
  - (b) cause damage to the **distribution network** or other facilities; or
  - (c) present a hazard to a person.

- (2) If, after receiving that advice, the **distributed generator** fails to remedy the adverse operating effect within a reasonable time, the **distributor** may **electrically disconnect the distributed generation** by giving reasonable notice (or without notice when reasonably necessary in the event of an emergency or hazardous situation).

Compare: SR 2007/219 clause 13 Schedule 2

Clause 13(1): amended, on 23 February 2015, by clause 57(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 13(2): amended, on 23 February 2015, by clause 57(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 13(2): amended, on 5 October 2017, by clause 68 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### 14 Interruptions by distributed generator

- (1) This clause applies to any connected **distributed generation** above 10 kW in total.
- (2) The **distributed generator** must advise the **distributor** of any **planned outages** and must make reasonable endeavours to advise the **distributor** of an event that affects **distribution network** operations.
- (3) The **distributed generator** must make reasonable endeavours to advise the **distributor** of the interruption and to co-ordinate with the **distributor** to minimise the impact of the interruption.

Compare: SR 2007/219 clause 14 Schedule 2

Clause 14: amended, on 23 February 2015, by clauses 58 and 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 14(1): amended, on 5 October 2017, by clause 69 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### 15 Disconnecting distributed generation

- (1) Despite clause 10, the **distributor** may disconnect **distributed generation** in the following circumstances:
- (a) on receipt of a request from a **distributed generator**:
- (b) without notice, if a **distributed generator** has been temporarily **electrically disconnected** under clause 11(g) and—
- (i) the **distributed generator** fails to remedy the non-compliance within a reasonable period of time; and
- (ii) there is an ongoing risk to persons or property:
- (c) without notice, if the **trader** that is recorded in the **registry** as being responsible for the **ICP** to which the **distributed generation** is connected to the **distribution network** has **electrically disconnected** the **ICP** and updated the **ICP's** status in the **registry** to "inactive" with the reason of "electrically disconnected – ready for decommissioning":
- (d) on at least 10 **business days'** notice of intention to disconnect, if—
- (i) the **distributed generator** has not injected **electricity** into the **distribution network** at any time in the preceding 12 months; and
- (ii) the **distributed generator** has not given written notice to the **distributor** of the reasons for the non-injection; and
- (iii) the **distributor** has reasonable grounds for believing that the **distributed generator** has ceased to operate the **distributed generation**.
- (2) *[Revoked]*

- (3) If a **distributor** disconnects **distributed generation** under subclause (1) and the **point of connection** is to be **decommissioned**, the **distributor** must—
- (a) remove all electrical conductors between the **distributed generation** and the **distributor's lines**;
  - (b) advise the **distributed generator** within 2 **business days** of the completion of the work referred to in paragraph (a).

(4) *[Revoked]*

(5) *[Revoked]*

Compare: SR 2007/219 clause 15 Schedule 2

Heading: replaced, on 5 October 2017, by clause 70(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 15(1): amended, on 5 October 2017, by clause 70(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 15(1)(b): amended, on 5 October 2017, by clause 70(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 15(1)(b) and (c): substituted, on 23 February 2015, by clause 59(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 15(1)(c): amended, on 5 October 2017, by clause 70(4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 15(1)(d)(i): amended, on 23 February 2015, by clause 59(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 15(1)(d)(ii): replaced, on 5 October 2017, by clause 70(5) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 15(2): revoked, on 23 February 2015, by clause 59(3) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 15(3): amended, on 23 February 2015, by clause 59(4) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 15(3): replaced, on 5 October 2017, by clause 70(6) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 15(4) and (5): revoked, on 23 February 2015, by clause 59(5) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

### *Time frame for construction*

#### **15A Distributed generator must construct distributed generation within 18 months of approval**

- (1) This clause applies if the **distributor** approves the **distributed generator's** application to connect **distributed generation** under Part 1, Part 1A, or Part 2 of Schedule 6.1.
- (2) The **regulated terms** cease to apply if the **distributed generator** does not **construct the distributed generation** within—
  - (a) 18 months from the date on which approval was granted; or
  - (b) such later date as is agreed by the **distributor** and **distributed generator**.
- (3) The **distributed generator** must reapply under Schedule 6.1 if—
  - (a) the **regulated terms** no longer apply in accordance with subclause (1); and
  - (b) the **distributed generator** wishes to connect **distributed generation** to the **distributor's distribution network**.

Cross heading and clause 15A: inserted, on 23 February 2015, by clause 60 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 15A: amended, on 5 October 2017, by clause 71 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

*Confidentiality*

**16 General obligations relating to confidentiality**

- (1) Each party must preserve the confidentiality of **confidential information**, and must not directly or indirectly reveal, report, publish, transfer, or disclose the existence of any **confidential information**, except as permitted in subclause (2).
- (2) Each party must only use **confidential information** for the purposes expressly permitted by these **regulated terms**.

Compare: SR 2007/219 clause 17 Schedule 2

**17 When confidential information can be disclosed**

Either party may disclose **confidential information** in any of the following circumstances:

- (a) if the **distributed generator** and **distributor** agree in writing to the disclosure of information:
- (b) if disclosure is expressly provided for under these **regulated terms**:
- (c) if, at the time of receipt by the party, the **confidential information** is in the public domain or if, after the time of receipt by either party, the **confidential information** enters the public domain (except where it does so as a result of a breach by either party of its obligations under this clause or a breach by any other person of that person's obligation of confidence):
- (d) if either party is required to disclose **confidential information** by—
  - (i) a statutory or regulatory obligation, body, or authority; or
  - (ii) a judicial or arbitration process; or
  - (iii) the regulations of a stock exchange upon which the share capital of either party is from time to time listed or dealt in; or
  - (iv) this Code:
- (e) if the **confidential information** is released to the officers, employees, directors, agents, or advisors of the party, provided that—
  - (i) the information is disseminated only on a need-to-know basis; and
  - (ii) recipients of the **confidential information** have been made fully aware of the party's obligations of confidence in relation to the information; and
  - (iii) any copies of the information clearly identify it as **confidential information**:
- (f) if the **confidential information** is released to a bona fide potential purchaser of the business or any part of the business of a party, subject to that bona fide potential purchaser having signed a confidentiality agreement enforceable by the other party in a form approved by that other party, and that approval may not be unreasonably withheld.

Compare: SR 2007/219 clause 18 Schedule 2

## 18 Disclosures by employees, agents, etc

To avoid doubt, a party is responsible for any unauthorised disclosure of **confidential information** made by that party's officers, employees, directors, agents, or advisors.

Compare: SR 2007/219 clause 19 Schedule 2

### *Pricing*

## 19 Pricing principles

Charges that are payable by the **distributed generator** or the **distributor** must be determined in accordance with the pricing principles set out in Schedule 6.4.

Compare: SR 2007/219 clause 20 Schedule 2

Clause 19: amended, on 23 February 2015, by clause 61 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

### *Liability*

## 20 General obligations relating to liability

- (1) If the **distributor** or the **distributed generator** breaches any of the **regulated terms** (whether by act or omission), that party is liable to the other.
- (2) The **distributed generator's** and the **distributor's** liability to each other is limited to damages for any direct loss caused by that breach.
- (3) This clause and clauses 21 to 25 do not limit the liability of either party to pay all charges and other amounts due under Part 6 of this Code or the **regulated terms**.

Compare: SR 2007/219 clause 21 Schedule 2

Clause 20(1) and (3): amended, on 23 February 2015, by clause 62 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

## 21 Exceptions to obligations relating to liability

- (1) Neither the **distributor** nor the **distributed generator**, nor any of its officers, employees, directors, agents, or advisors, are in any circumstances liable to the other party for—
  - (a) any indirect loss, consequential loss (including, but not limited to, incidental or special damages), loss of profit, loss of revenue (except any liability under clause 20(3)), loss of use, loss of opportunity, loss of contract, or loss of goodwill; or
  - (b) any loss resulting from the liability of the other party to another person; or
  - (c) any loss or damage incurred by the other party if, and to the extent that, this results from any breach of the **regulated terms** or any negligent action.
- (2) The **distributor** is not liable, except to the extent caused or contributed to by the **distributor** in circumstances where the **distributor** was not acting in accordance with Part 6 of this Code (including these **regulated terms**), for—
  - (a) any momentary fluctuations in the voltage or frequency of **electricity** conveyed to or from the **distributed generation's point of connection** or nonconformity with harmonic voltage and current levels; or
  - (b) any failure to convey **electricity** to the extent that—
    - (i) the failure arises from any act or omission of the **distributed generator** or other person, excluding the **distributor** and its officers, employees, directors, agents, or advisors; or

- (ii) the failure arises from a reduced **injection** of **electricity** into the **distribution network**; or
  - (iia) the failure arises from an interruption in the conveyance of **electricity** in the **distribution network**, if the interruption was at the request of the **system operator** or under a nationally or regionally co-ordinated response to an **electricity** shortage; or
  - (iii) the failure arises from any defect or abnormal conditions in or about the **distributed generator's** premises; or
  - (iv) the **distributor** was taking any action in accordance with Part 6 of this Code or the **regulated terms**; or
  - (v) the **distributor** was prevented from making necessary repairs (for example, by police at an accident scene).
- (3) The **distributed generator** is not liable for—
- (a) a failure to perform an obligation under these **regulated terms** caused by the **distributor's** failure to comply with the obligation; or
  - (b) a failure to perform an obligation under these **regulated terms** arising from any defect or abnormal conditions in the **distribution network**.

Compare: SR 2007/219 clause 22 Schedule 2

Clause 21(1): amended, on 23 February 2015, by clause 63(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 21(2)(b)(ii): substituted, on 23 February 2015, by clause 63(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 21(2)(b)(iia): inserted, on 23 February 2015, by clause 63(3) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

## 22 Limits on liability

The maximum total liability of each party, as a result of a breach of the **regulated terms**, must not in any circumstances exceed, in respect of a single event or series of events arising from the same event or circumstance, the lesser of—

- (a) the direct damage suffered or the maximum total liability that the party bringing the claim against the other party has at the time that the event (or, in the case of a series of related events, the first of such events) giving rise to the liability occurred; or
- (b) \$1,000 per kW of **nameplate capacity** up to a maximum of \$5 million.

Compare: SR 2007/219 clause 23 Schedule 2

Clause 22(b): amended, on 23 February 2015, by clause 64 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

## 23 Liability clauses do not apply to fraud, wilful breach, and breach of confidentiality

The exceptions in clause 21, and the limits on liability in clause 22, do not apply—

- (a) if the **distributor** or the **distributed generator**, or any of its officers, employees, directors, agents, or advisors, has acted fraudulently or wilfully in breach of these **regulated terms**; or
- (b) to a breach of confidentiality under clause 16 by either party.

Compare: SR 2007/219 clause 24 Schedule 2

Clause 23(a): amended, on 23 February 2015, by clause 65 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

**24** *[Revoked]*

Compare: SR 2007/219 clause 25 Schedule 2  
Clause 24: revoked, on 23 February 2015, by clause 66 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

**25 Force majeure**

- (1) A failure by either party to comply with or observe any provisions of these **regulated terms** (other than payment of any amount due) does not give rise to any cause of action or liability based on default of the provision if—
- (a) the failure is caused by—
    - (i) an event or circumstance occasioned by, or in consequence of, an act of God, being an event or circumstance—
      - (A) due to natural causes, directly or indirectly and exclusively without human intervention; and
      - (B) that could not reasonably have been foreseen or, if foreseen, could not reasonably have been resisted; or
    - (ii) a strike, lockout, other industrial disturbance, act of public enemy, war, blockade, insurrection, riot, epidemic, aircraft, or civil disturbance; or
    - (iii) the binding order or requirement of a Court, government, **local authority**, the **Rulings Panel**, or the **Authority**, and the failure is not within the reasonable control of the affected party; or
    - (iv) the partial or entire failure of the **injection of electricity** into the **distribution network**; or
    - (v) any other event or circumstance beyond the control of the party invoking this clause; and
  - (b) the party could not have prevented such failure by the exercise of the degree of skill, diligence, prudence, and foresight that would reasonably and ordinarily be expected from a skilled and experienced **distributor** or **distributed generator** engaged in the same type of undertaking under the same or similar circumstances in New Zealand at the time.
- (2) If a party becomes aware of a prospect of a forthcoming **force majeure event**, it must advise the other party as soon as is reasonably practicable of the particulars of which it is aware.
- (3) If a party invokes this clause, it must as soon as is reasonably practicable advise the other party that it is invoking this clause and of the full particulars of the **force majeure event** relied on.
- (4) The party invoking this clause must—
- (a) use all reasonable endeavours to overcome or avoid the **force majeure event**; and
  - (b) use all reasonable endeavours to mitigate the effects or the consequences of the **force majeure event**; and
  - (c) consult with the other party on the performance of the obligations referred to in paragraphs (a) and (b).
- (5) Nothing in subclause (4) requires a party to settle a strike, lockout, or other industrial disturbance by acceding, against its judgement, to the demands of opposing parties.
- Compare: SR 2007/219 clause 26 Schedule 2

**Electricity Industry Participation Code 2010**  
**Schedule 6.2**

---

Clause 25(1)(a)(iv): substituted, on 23 February 2015, by clause 67(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 25(2) and (3): amended, on 23 February 2015, by clause 67(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

## Schedule 6.3 Default dispute resolution process

cl 6.8

### Contents

- 
- 1 Application of this schedule
  - 2 Notice of dispute
  - 3 Complaints
  - 4 Application of pricing principles to disputes
  - 5 Orders that Rulings Panel can make
- 

#### 1 Application of this Schedule

This Schedule applies in accordance with clause 6.8.

Compare: SR 2007/219 clause 1 Schedule 3

Clause 1: substituted, on 23 February 2015, by clause 68 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

#### 2 Notice of dispute

- (1) A party must give written notice to the other party of the dispute.
- (2) The parties must attempt to resolve the dispute with each other in good faith.
- (3) If the parties are unable to resolve the dispute, either party may complain in writing to the **Authority**.

Compare: SR 2007/219 clause 2 Schedule 3

#### 3 Complaints

- (1) A complaint made under clause 2(3) must be treated as if it were a notification given under regulations made under section 112 of the **Act**.
- (2) The following provisions apply to the complaint:
  - (a) sections 53-62 of the **Act**; and
  - (b) the Electricity Industry (Enforcement) Regulations 2010 except regulations 5, 6, 7, 9, 17, 51 to 75, and subpart 2 of Part 3.
- (3) Those provisions apply—
  - (a) to the dispute that is the subject of the complaint in the same way as those provisions apply to a notification of an alleged breach of this Code; and
  - (b) as if references to a **participant** in those provisions were references to a party under Part 6 of this Code; and
  - (c) with any further modifications that the **Authority** or the **Rulings Panel**, as the case may be, considers necessary or desirable for the purpose of applying those provisions to the complaint.

Compare: SR 2007/219 clause 3 Schedule 3

#### 4 Application of pricing principles to disputes

- (1) The **Authority** and the **Rulings Panel** must apply the pricing principles set out in Schedule 6.4 to determine any connection charges payable.
- (2) Subclause (1) applies if—

- (a) there is a dispute under Part 6 of this Code; and
- (b) in the opinion of the **Authority** or the **Rulings Panel** it is necessary or desirable to apply subclause (1) in order to resolve the dispute.

Compare: SR 2007/219 clause 4 Schedule 3

Clause 4(1): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 4(1): amended, on 5 October 2017, by clause 72 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## **5 Orders that Rulings Panel can make**

If a complaint is referred to it, the **Rulings Panel** may make any order, or take any action, that it is able to make or take in accordance with section 54 of the **Act**.

Compare: SR 2007/219 clause 5 Schedule 3

## Schedule 6.4 Pricing principles

cl 6.9

- 1 This Schedule sets out the pricing principles to be applied for the purposes of Part 6 of this Code in accordance with clause 6.9 (which relates to clause 19 of Schedule 6.2 and clause 4 of Schedule 6.3).

Compare: SR 2007/219 clause 1 Schedule 4

Clause 1: amended, on 23 February 2015, by clause 69 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

- 2 The pricing principles are as follows:

*Charges to be based on recovery of reasonable costs incurred by distributor as a result of connecting the distributed generator and to comply with connection and operation standards within the distribution network, and must include consideration of any identifiable avoided or avoidable costs*

- (a) subject to paragraph (i), connection charges in respect of **distributed generation** must not exceed the **incremental costs** of providing connection services to the **distributed generation**:
- (b) when calculating **incremental costs**, any costs that cannot be calculated must be estimated with reference to reasonable estimates of how the **distributor's** capital investment decisions and operating costs would differ, in the future, with and without the generation:
- (c) estimated costs may be adjusted ex post. Ex-post adjustment involves calculating, at the end of a period, what the actual costs incurred by the **distributor** as a result of the **distributed generation** being **electrically connected** to the **distribution network** were and deducting the costs that would have been incurred had the generation not been **electrically connected**. In this case, if the costs differ from the costs charged to the **distributed generator**, the **distributor** must advise the **distributed generator** and recover or refund those costs after they are incurred (unless the **distributor** and the **distributed generator** agree otherwise):

*Capital and operating expenses*

- (d) if costs include distinct capital expenditure, such as costs for a significant **asset** replacement or upgrade, the connection charge attributable to the **distributed generator's** actions or proposals is payable by the **distributed generator** before the **distributor** has committed to incurring those costs. When making reasonable endeavours to facilitate connection, the **distributor** is not obliged to incur those costs until that payment has been received:
- (e) if **incremental costs** are negative, the **distributed generator** is deemed to be providing network support services to the **distributor**, and may invoice the **distributor** for this service and, in that case, the **distributed generator** must

comply with all relevant obligations (for example, obligations under Part 6 of this Code and in respect of tax):

- (f) if costs relate to ongoing or periodic operating expenses, such as costs for routine **maintenance**, the connection charge attributable to the **distributed generator's** actions or proposals may take the form of a periodic charge:
- (g) *[Revoked]*
- (h) after the connection of the **distributed generation**, the **distributor** may review the connection charges payable by a **distributed generator** not more than once in any 12-month period. Following a review, the **distributor** must advise the **distributed generator** in writing of any change in the connection charges payable, and the reasons for any change, not less than 3 months before the date the change is to take effect:

*Share of generation-driven costs*

- (i) if multiple **distributed generators** are sharing an investment, the portion of costs payable by any 1 **distributed generator**—
  - (i) must be calculated so that the charges paid or payable by each **distributed generator** take into account the relative expected peak of each **distributed generator's** injected generation; and
  - (ii) may also have regard to the percentage of **assets** that will be used by each **distributed generator**, the percentage of **distribution network capacity** used by each **distributed generator**, the relative share of expected maximum combined peak output, and whether the combined peak generation is coincident with the peak load on the **distribution network**:
- (j) in order to facilitate the calculation of equitable connection charges under paragraph (i), the **distributor** must make and retain adequate records of investments for a period of 60 months, provide the rationale for the investment in terms of facilitating **distributed generation**, and indicate the extent to which the associated costs have been or are to be recovered through generation connection charges:

*Repayment of previously funded investment*

- (k) if a **distributed generator** has paid connection charges that include (in part) the cost of an investment that is subsequently shared by other **distributed generators**, the **distributor** must refund to the **distributed generator** all connection charges paid to the **distributor** under paragraph (i) by other **distributed generators** in respect of that investment:
- (l) if there are multiple prior **distributed generators**, a refund to each **distributed generator** referred to in paragraph (k) must be provided in accordance with the expected peak of that **distributed generator's** injected generation over a period of time agreed between the **distributed generator** and the **distributor**. The refund—

- (i) must take into account the relative expected peak of each **distributed generator's** injected generation; and
- (ii) may also have regard to the percentage of **assets** that will be used by each **distributed generator**, the percentage of **distribution network capacity** used by each **distributed generator**, the relative share of expected maximum combined peak output, and whether the combined peak generation is coincident with the peak load on the **distribution network**:
- (m) no refund of previous payments from the **distributed generator** referred to in paragraph (k) is required after a period of 36 months from the initial connection of that **distributed generator**:

*Non-firm connection service*

- (n) to avoid doubt, nothing in Part 6 of this Code creates any **distribution network capacity** or property rights in any part of the **distribution network** unless these are specifically contracted for. **Distributors** must **maintain** connection and **lines** services to **distributed generators** in accordance with their **connection and operation standards**.

Compare: SR 2007/219 clause 2 Schedule 4

Heading: amended, on 23 February 2015, by clause 70(1) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 2: amended, on 23 February 2015, by clause 70(2) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 2: amended, on 1 April 2023, by clause 5(1) of the Electricity Industry Participation Code Amendment (Avoided Cost of Transmission) 2022.

Clause 2(a): amended, on 23 February 2015, by clauses 70(3) and 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 2(a): replaced, on 9 January 2017, by clause 4 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2016.

Clause 2(a): amended, on 5 October 2017, by clause 73(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 2(a) and (b): amended, on 1 April 2023, by clause 5(2) of the Electricity Industry Participation Code Amendment (Avoided Cost of Transmission) 2022.

Clause 2(c): amended, on 23 February 2015, by clauses 70(4) and 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 2(c): amended, on 5 October 2017, by clause 73(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 2(d): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 2(d), (f), (h), (j), (k), and (m): amended, on 5 October 2017, by clause 73(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 2(f): amended, on 23 February 2015, by clauses 70(5) and 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 2(g): revoked, on 23 February 2015, by clause 70(6) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 2(h): amended, on 23 February 2015, by clauses 70(7) and 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 2(i)(ii): amended, on 23 February 2015, by clause 70(8) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 2(j): amended, on 23 February 2015, by clauses 70(9) and 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 2(k): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 2(l)(ii): amended, on 23 February 2015, by clause 70(10) of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 2(m): amended, on 23 February 2015, by clauses 70(11) and 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

# Electricity Industry Participation Code 2010

## Part 6A

### Separation of distribution from certain generation and retailing

*Part 6A: inserted on 1 September 2022, by the Electricity Industry Amendment Act 2021*

#### Contents

- 6A.1 Purpose and outline of this Part
- 6A.2 Interpretation
  - Corporate separation and arm's-length rules*
- 6A.3 Corporate separation and arm's length rules applying to distributors and connected generators and connected retailers
  - Other rules*
- 6A.4 Distributor agreements
- 6A.5 Payments for transfer of retail customers to connected retailers prohibited customers to connected retailers
- 6A.6 No discrimination when paying rebates or dividends
  - Disclosure and reporting to Authority*
- 6A.7 Disclosure of information to Authority
- 6A.8 Reporting compliance with arm's length rules
  - Part 6A dispensations*
- 6A.9 Authority may grant Part 6A dispensation to specified person

#### Schedule 6A.1 Arm's-length rules

##### 1 Objective

##### 2 Interpretation

##### 3 Arm's-length rules

*Duty to ensure arm's length objective is met*

*Arms-length test*

*Duty not to prefer interests of business B*

*Duty not to discriminate in favour of business B*

*Duty to focus on interests of right ultimate owners*

*Duty of directors and managers of parents of business A*

*At least 2 independent directors*

*No cross-directors who are executive directors*

*Separate management rules*

*Directors and managers must not be placed under certain obligations*

*Restriction on use of information*

*Records*

*Practical considerations*

##### 4 Rules do not limit objective

### 6A.1 Purpose and outline of this Part

- (1) The purpose of this Part is to promote competition in the electricity industry by restricting relationships between a **distributor** and a generator or a **retailer**, where those relationships may not otherwise be at arm's length.
- (2) In general terms, this Part imposes rules in respect of **distributors** as follows:
  - (a) corporate separation and arm's-length rules, if a person is involved both in a **distributor** and in either or both of—
    - (i) a generator with connected generation of more than 50 MW of generation connected to the **distributor's** network; or
    - (ii) a **retailer** that retails more than 75 GWh per year to customers connected to the **distributor's** network:
  - (b) **distributor agreement** rules, if—
    - (i) a connected retailer retails more than 5 GWh per year to customers connected to the **distributor's** local network; or
    - (ii) a connected generator has connected generation of more than 10 MW of generation that is connected to any of the **distributor's** networks:
  - (c) rules preventing payments to **retailers** in respect of the transfer of retail customers:
  - (d) no-discrimination rules that apply when **distributors** or **specified persons** pay dividends or rebates.
- (3) Subclause (2) is intended only as a guide to the general scheme and effect of this Part.

Compare: 2010 No 116 s 72

Clause 6A.1(1), (2), (2)(a), (2)(a)(i) and (ii), (2)(b), (2)(b)(i) and (ii), 2(c) and 2(d): amended, on 1 March 2024, by clause 10 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Clause 6A.1(2)(a)(i) and (2)(b)(ii): amended, on 1 June 2024, by clause 4 of the Electricity Industry Participation Code Amendment (Definition of Connected Generation) 2024.

Clause 6A.1(2)(c) and (d): amended, on 1 June 2024, by clause 4 of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

### 6A.2 Interpretation

In this Part and Schedule 6A.1, unless the context otherwise requires,—

**arm's-length rules** means the objective and rules set out in Schedule 6A.1

**assets** [*Revoked*]

**associate** has the meaning given to it by section 6A of the Act

**business** has the meaning given to it by section 5 of the Act

**connected generation** means the sum of the maximum capacity of each **generating unit** of the generator, where maximum capacity of each **generating unit** is the greatest amount for each **generating unit**, in MW, that is:

- (a) offered into the wholesale market as **offers** or **reserve offers**; or
- (b) gifted to the wholesale market by giving notice under clause 15.13 that the generation is not receiving payment from the **clearing manager**; or
- (c) contracted to the **system operator** as an **ancillary service**; or
- (d) for generation that is not included in any of (a), (b), or (c) above, the **nameplate capacity** of the **generating unit**

**consumer** *[Revoked]*

**customer** *[Revoked]*

**director** *[Revoked]*

**financial year** has the meaning given to it by section 6A of the Act

**generator** has the meaning given to it by section 5 of the Act

**involved in** has the meaning given to it by section 6A of the Act

**network** has the meaning given to it by section 5 of the Act

**retailer** *[Revoked]*

**total capacity** *[Revoked]*

Compare: 2010 No 116 s 73

Clause 6A.2 Interpretation of assets, consumer, customer, director and retailer: revoked, on 1 March 2024, by clause 11(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Clause 6A.2 Interpretation of associate, business, financial year, generator, involved in, network and total capacity: amended, on 1 March 2024, by clause 11(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Clause 6A.2 Interpretation of connected generation: inserted, on 1 June 2024, by clause 5(1) of the Electricity Industry Participation Code Amendment (Definition of Connected Generation) 2024.

Clause 6A.2 Interpretation of total capacity: revoked, on 1 June 2024, by clause 5(2) of the Electricity Industry Participation Code Amendment (Definition of Connected Generation) 2024.

### *Corporate separation and arm's-length rules*

#### **6A.3 Corporate separation and arm's-length rules applying to distributors and connected generators and connected retailers**

- (1) Every **participant** and **specified person** who carries on the business of **distribution** must carry on that business in a different company from the company that carries on the business of a connected generator or a connected retailer.
- (2) The following persons must comply, and ensure that the person's businesses comply, with the arm's-length rules:
  - (a) every **distributor** in respect of which there is a connected generator or a connected retailer, and any other **participant** involved in that **distributor**;
  - (b) a connected generator in respect of the **distributor**, and any other **participant** involved in the connected generator;
  - (c) a connected retailer in respect of the **distributor**, and any other **participant** involved in the connected retailer;
  - (d) a **specified person** who is involved in the **distributor**, and either a connected generator or a connected retailer in respect of the **distributor**.
- (3) In this clause, unless the context otherwise requires,—
 

**connected generator**, in relation to a **distributor**, means a generator—

  - (a) that has connected generation of more than 50 MW of generation that is connected to any of the **distributor's** networks; and
  - (b) in respect of which the **distributor**, or any other person involved in the **distributor**, is involved

**connected retailer**, in relation to a **distributor**, means a **retailer**—

- (a) that is involved in retailing more than 75 GWh of **electricity** in a financial year to customers who are connected to any of the **distributor's** networks; and
- (b) in respect of which the **distributor**, or any other person involved in the **distributor**, is involved.

Compare: 2010 No 116 s 76

Clause 6A.3(1), (2) and (3): amended, on 1 March 2024, by clause 12 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Clause 6A.3(1): amended, on 1 June 2024, by clause 5(1) of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

Clause 6A.3(2): replaced, on 1 June 2024, by clause 5(2) of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

Clause 6A.3(3)(a): amended, on 1 June 2024, by clause 6 of the Electricity Industry Participation Code Amendment (Definition of Connected Generation) 2024.

### *Other rules*

#### **6A.4 Distributor agreements**

- (1) Every **distributor** in respect of which there is a connected retailer or a connected generator must—
  - (a) have a comprehensive, written **distributor agreement** that provides for the supply of **line function services** and information to the connected retailer or connected generator (as the case may be); and
  - (b) ensure that the terms of that **distributor agreement** do not discriminate in favour of one business and do not contain arrangements that include elements that the business usually omits, or omit elements that the business usually includes, in **distributor agreements** with parties that are—
    - (i) connected or related only by the transaction or dealing in question; and
    - (ii) acting independently; and
    - (iii) each acting in its own best interests; and
  - (c) operate in accordance with that **distributor agreement**; and
  - (d) **publish** that **distributor agreement** and provide it to the **Authority**.
- (2) A **distributor agreement** required by subclause (1)(a) must be entered into, in the case of a business to which the corporate separation rule does not apply, as if the distribution business and the connected retailer or connected generator were separate legal persons.
- (3) In this clause, unless the context otherwise requires,—
 

**connected generator**, in relation to a **distributor**, means a generator—

  - (a) that has connected generation of more than 10 MW of generation that is connected to any of the **distributor's** networks; and
  - (b) in respect of which the **distributor**, or any other person involved in the **distributor**, is involved

**connected retailer**, in relation to a **distributor**, means a **retailer**—

  - (a) that is involved in retailing more than 5 GWh of **electricity** on the **distributor's** local network in a financial year to customers who are connected to that network; and
  - (b) in respect of which the **distributor**, or any other person involved in the **distributor**, is involved

**local network** means a network operated by a **distributor** in a contiguous geographic area or areas.

- (4) A **distributor** required to have a **distributor agreement** under this clause must submit to the **Authority** a statement indicating whether, in the preceding calendar year,—
- (a) the terms in the **distributor agreement** are a true and fair view of the terms on which **line function services** and information were supplied in respect of the retailing or generating to which the agreement relates; and
  - (b) this clause was otherwise fully complied with.
- (4A) The statement provided under subclause (4) must be:
- (a) in the **prescribed form**;
  - (b) signed and dated by a director of the **distributor** and either—
    - (i) another director of the **distributor**; or
    - (ii) the **distributor's** chief financial officer, or a person holding the equivalent position; or
    - (iii) the **distributor's** chief executive officer, or a person holding the equivalent position; and
  - (c) submitted by 31 March in respect of the preceding calendar year.
- (4B) The statement provided under subclause (4) must be **published** by the **distributor**.
- (5) A **distributor** must not **publish** or provide the **Authority** with any information under this clause that, at the time the information was **published** or provided, was false or misleading in a material particular.

Compare: 2010 No 116 s 77

Clause 6A.4 Heading: amended, on 1 March 2024, by clause 13(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Clause 6A.4(1), (1)(a)(b) (c) and (d), (2), (3), (4), 4(a) and 5(b): amended, on 1 March 2024, by clause 13 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Clause 6A.4(1), (1)(a), (b), (c) and (d): amended, on 1 June 2024, by clause 6(1) of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

Clause 6A.4(3)(a): amended, on 1 June 2024, by clause 7 of the Electricity Industry Participation Code Amendment (Definition of Connected Generation) 2024.

Clause 6A.4(4) chapeau: replaced, on 1 June 2024, by clause 6(2) of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

Clause 6A.4(4A) and (4B): inserted, on 1 June 2024, by clause 6(3) of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

Clause 6A.4(5): replaced, on 1 June 2024, by clause 6(4) of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

### **6A.5 Payments for transfer of retail customers to connected retailers prohibited**

- (1) A **distributor**, and any other person listed in subclause (2), must not pay, or offer to pay, any consideration to a **retailer** in respect of the transfer to a connected retailer of any retail customers who are connected to the **distributor's** networks.
- (2) The following persons must comply with subclause (1):
  - (a) the **distributor** and any other **participant** involved in the **distributor**;
  - (b) a connected generator in respect of the **distributor** and any other **participant** involved in the connected generator;
  - (c) a connected retailer in respect of the **distributor** and any other **participant** involved in the connected retailer;

- 
- (d) a **specified person** who is involved in the **distributor** and either a connected generator or connected retailer in respect of the **distributor**.
  - (3) To avoid doubt, subclause (1) includes a prohibition on—
    - (a) any agreement to acquire the assets or voting securities of another **retailer** (regardless of whether any, or only nominal, consideration is attributed to customers) as a result of which there is a transfer of responsibility for retailing **electricity** to customers; and
    - (b) any consideration that is directly or indirectly or in whole or in part in respect of the transfer of any of another **retailer's** customers or customer accounts.
  - (4) *[Revoked]*
  - (5) In this clause,—

**agreement** has the same meaning as in clause 10 of Schedule 2 of the Act

**connected generator** has the same meaning as in clause 6A.4

**connected retailer** has the same meaning as in clause 6A.4.

Compare: 2010 No 116 s 78

Clause 6A.5 heading: amended, on 1 June 2024, by clause 7(1) of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

Clause 6A.5(1), (2)(a), (b) and (c), and (3)(a) and (b): amended, on 1 March 2024, by clause 14 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Clause 6A.5(2): replaced, on 1 June 2024, by clause 7(2) of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

Clause 6A.5(4): revoked, on 1 June 2024, by clause 7(3) of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

#### 6A.6 No discrimination when paying rebates or dividends

- (1) This clause applies if a **distributor** has a connected retailer.
- (2) Every person listed in subclause (3) must ensure that any rebates or dividends or other similar payments paid do not discriminate between—
  - (a) customers of the connected retailer; and
  - (b) customers of other **retailers** where those customers are connected to the **distributor's** networks.
- (3) The persons are—
  - (a) the **distributor**, and any director of the **distributor** who is involved in the connected retailer; and
  - (b) any customer trust or community trust that is involved in the **distributor** and the connected retailer, and the trustees of that consumer trust or community trust; and
  - (c) any customer co-operative that is involved in the **distributor** and the connected retailer, and the directors of that customer co-operative.
- (4) In this clause, **connected retailer** has the same meaning as in clause 6A.4.
- (5) *[Revoked]*

Compare: 2010 No 116 s 79

Clause 6A.6(1), (2)(b), (3)(a), (b) and (c): amended, on 1 March 2024, by clause 15(1), (2) and (3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Clause 6A.6(3): replaced, on 1 June 2024, by clause 8(1) of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

Clause 6A.6(5): revoked, on 1 June 2024, by clause 8(2) of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

---

*Disclosure and reporting to Authority*

**6A.7 Disclosure of information to Authority**

- (1) Each **distributor** referred to in clause 6A.4(1) (**distributor agreements**) must disclose the quantity of **electricity** sold each financial year by connected retailers to customers who are connected to its local network (within the meanings in that clause).
- (2) The disclosure must be made in a statement to the **Authority** within 2 months after the end of the financial year.
- (3) The statement provided under subclause (2) must be:
  - (a) in the **prescribed form**; and
  - (b) signed and dated by a director of the **distributor** and either—
    - (i) another director of the **distributor**; or
    - (ii) the **distributor's** chief financial officer, or a person holding the equivalent position; or
    - (iii) the **distributor's** chief executive officer, or a person holding an equivalent position.
- (4) The statement provided under subclause (2) must be **published** by the **Authority** and the **distributor**.
- (5) A **distributor** must not **publish** or provide the **Authority** with any information under this clause that, at the time the information was disclosed, was false or misleading in a material particular.

Compare: 2010 No 116 s 88

Clause 6A.7(1), (2) (3), (4) and (5)(b): amended, on 1 March 2024, by clause 16 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Clause 6A.7(1) and (4): amended, on 1 June 2024, by clause 9(1) and (3), respectively, of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

Clause 6A.7(3) and (5): replaced, on 1 June 2024, by clause 9(2) and (4), respectively, of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

**6A.8 Reporting compliance with arm's-length rules**

- (1) Each person referred to in clause 6A.3(2) must provide to the **Authority**, no later than 31 March in each year, a statement confirming whether the person has complied with all of the arm's-length rules during the preceding calendar year.
- (1A) The statement provided under subclause (1) must be:
  - (a) in the **prescribed form**; and
  - (b) unless subclause (1B) or (1C) applies, signed and dated by a director of the **participant** and either—
    - (i) another director of the **participant**; or
    - (ii) the **participant's** chief financial officer, or a person holding the equivalent position; or
    - (iii) the **participant's** chief executive officer, or a person holding an equivalent position.
- (1B) If the person providing the statement under subclause (1) is a natural person, the statement must be signed and dated by that person.
- (1C) If the person providing the statement under subclause (1) is a **specified person** but is not a natural person, the statement must be signed and dated by an authorised

representative of that **specified person**.

- (2) Statements provided under subclause (1) must be **published** by the **Authority** and, if the person who provided the statement is a **participant**, the **participant**.
- (3) A person must not **publish** or provide the **Authority** with any information under this clause that, at the time the information was **published** or provided, was false or misleading in a material particular.

Compare: 2010 No 116 s 89

Clause 6A.8(1), (2) and (3)(b): amended, on 1 March 2024, by clause 17 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Clause 6A.8 heading and 6A.8(1): amended, on 1 June 2024, by clause 10(1) and (2) of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

Clause 6A.8(1A), (1B) and (1C): inserted, on 1 June 2024, by clause 10(3) of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

Clause 6A.8(2) and (3): replaced, on 1 June 2024, by clause 10(4) and (5) of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

### *Part 6A dispensations*

#### **6A.9 Authority may grant Part 6A dispensation to specified person**

- (1) A **specified person** may apply to the **Authority** for a **Part 6A dispensation** in respect of their involvement in two or more classes of industry **participant** that are the subject of this Part, or specific provisions of this Part.
- (2) The application must be submitted in the form and by the means specified by the **Authority**.
- (3) Where the **Authority** receives an application under this clause, it may grant a **Part 6A dispensation** to a **specified person** if the **Authority** is satisfied that—
  - (a) it is not necessary, for the purpose of achieving the **Authority's** objectives under section 15 of the **Act**, for the **specified person** to comply with this Part or the specific provisions of this Part; or
  - (b) granting a **Part 6A dispensation** in respect of the **specified person** would better achieve the **Authority's** objectives than requiring compliance.
- (4) The **Authority** must give reasons for its decision under subclause (3).
- (5) The **Authority** may grant a **Part 6A dispensation** on any terms or conditions that it reasonably considers are necessary.
- (6) The **Authority** may amend or revoke a **Part 6A dispensation** granted under subclause (3) by issuing a notice that identifies the **specified person** subject to the **Part 6A dispensation** and gives reasons for the amendment or revocation, but only if the **Authority**—
  - (a) has given notice of the proposed amendment or revocation to the **specified person** subject to the **Part 6A dispensation** and given them a reasonable opportunity to comment; and
  - (b) in relation to an amendment, is satisfied that the amendment is necessary or desirable for the purpose of achieving the **Authority's** objectives in section 15 of the **Act**; and
  - (c) in relation to a revocation, is no longer satisfied of the matters in subclause (3).
- (7) The **Authority** must publish a list of all current **Part 6A dispensations** granted under this clause.

Clause 6A.9: inserted, on 31 August 2023, by clause 5 of the Electricity Industry Participation Code Amendment (Part 6A Dispensation for Specified Persons) 2023.

**Electricity Industry Participation Code 2010**

**Part 6A**

---

Clause 6A.9: replaced, on 1 March 2024, by clause 5 of the Electricity Industry Participation Code Amendment (Part 6A Dispensation for Specified Persons) 2024.

---

## Schedule 6A.1

cl 6A.2

### Arm's-length rules

#### 1 Objective

- (1) The objective of this schedule is to ensure that the **distributors**, connected retailers and connected generators to which clause 6A.3 applies operate at arm's-length.
- (2) Without limiting the ordinary meaning of the expression, **arm's-length** includes having relationships, dealings, and transactions that, if the parties were in the position described in subclause (3),—
  - (a) do not include elements that parties in that position would usually omit; and
  - (b) do not omit elements that parties in that position would usually include.
- (3) The position of the parties referred to in subclause (2) is one in which the parties are—
  - (a) connected or related only by the transaction or dealing in question; and
  - (b) acting independently; and
  - (c) each acting in their own best interests.

#### 2 Interpretation

- (1) In this schedule,—

**business A** means a business that is required to be carried out in one company under clause 6A.3, and **business B** then refers to a business that is required to be carried out in another company under that clause

**common parent**, in relation to business A and business B, means a **participant** or **specified person** that is involved in both business A and business B

**electricity trust** means a community trust or a customer trust or a customer co-operative

**manager** has the meaning given to it by section 5 of the **Act**

**parent**, in relation to a business, means every person that is involved in the business.
- (2) In this schedule, a person is **interested** in a transaction if the person, or an associate of that person,—
  - (a) is a party to, or will derive a material financial benefit from, the transaction; or
  - (b) has a material financial interest in a party to the transaction; or
  - (c) is a director or manager of a party to, or a person who will or may derive a material financial benefit from, the transaction; or
  - (d) is otherwise directly or indirectly materially interested in the transaction.
- (3) Where this schedule applies to business A, it applies equally to business B, and vice versa.
- (4) References to trust A and trust B have corresponding meanings and application.

#### 3 Arm's-length rules

The arm's-length rules are set out in clauses 3A to 3M.

**3A Duty to ensure arm's-length objective is met**

Business A, business B and every parent of either business A or B (where that parent is a **participant** or **specified person** involved in both business A and business B) must take all reasonable steps to ensure that the arm's-length objective in clause 1 is met.

**3B Arm's-length test**

Business A, and every parent of business A (where that parent is a **participant** or **specified person** involved in both business A and business B), must not enter into a transaction in which business B, or any parent of business B, is interested if the terms of the transaction are terms that unrelated parties in the position of the parties to the transaction, each acting independently and in its own best interests, would not have agreed to.

**3C Duty not to prefer interests of business B**

Business A, and every director or manager of business A who is also involved in business B, must not, when exercising powers or performing duties in connection with business A, act in a manner that they know or ought reasonably to know would prefer the interests of business B over the interests of business A.

**3D Duty not to discriminate in favour of business B**

Business A must not, in providing services or benefits, discriminate in favour of business B or the customers, suppliers, or members of business B.

**3E Duty to focus on interests of right ultimate owners**

Business A, and every director or manager of business A who is also involved in business B, must, when exercising powers or performing duties in connection with business A, act in the interests of the ultimate members of business A in their capacity as such, and must neither subordinate the interests of those members to the interests of the members of business B nor, to the extent that the members or ultimate beneficial members of each business overlap, take account of that fact or have regard to their dual capacity as members of business B and business A.

**3F Duty on parents of business A**

Any parent of business A (where that parent is a **participant** or a **specified person** and involved in both business A and business B), and any director or manager of a parent of business A (where that director or manager is a **specified person** who is also involved in business B), must not, when exercising powers or performing duties in connection with business A, act in a manner that they know or ought reasonably to know would favour the interests of business B, or of the customers, suppliers, or members of business B in that capacity, over the interests of business A or the customers, suppliers, or members of business A.

**3G At least 2 independent directors**

At least 2 directors of business A must—

- (a) be neither a director nor a manager of business B; and
- (b) not be an associate of business B, other than by virtue of being a director of business A.

**3H No cross-directors who are executive directors**

- (a) A director of business A may be a director of business B, but must not—  
manage business B on a day-to-day basis; or
- (b) be an associate of business B, other than by virtue of being a director of business A or business B; or
- (c) be involved in business B (other than by having material influence over business B by virtue of being a director of business B).

**3I Separate management rule**

- (1) This clause applies if business A is involved in—
  - (a) a generator that has connected generation of more than 50 MW and that is connected to any of business A's networks; or
  - (b) a **retailer** that retails more than 75 GWh of **electricity** in a financial year to customers who are connected to any of business A's networks.
- (2) A manager of business A must not—
  - (a) be a manager of business B; or
  - (b) be an associate of business B, other than by virtue of being a manager of business A; or
  - (c) be involved in the business of business B.

**3J Directors and managers must not be placed under certain obligations**

- (1) Subject to subclause (2), no **participant** or **specified person** may place a director or manager of business A under an obligation, whether enforceable or not, to act in accordance with the directions, instructions, or wishes of business B, or any director or manager or associate of business B, or any parent of business B, and no director or manager may submit to any such obligation.
- (2) A common parent, or a cross-director or a cross-manager, of both business A and business B may place a director or manager under an obligation referred to in subclause (1) if doing so does not contravene another of the arm's-length rules.

**3K Restriction on use of information**

- (1) Business A must not disclose or permit the disclosure to business B, or use or permit the use for the purposes of business B, of restricted information of business A.
- (2) An electricity trust that is a parent of business A (**trust A**), business A, and every parent of trust A (where trust A, or the parent of trust A, is a **participant** or **specified person** involved in both business A and business B) must not disclose or permit the disclosure to business B, an electricity trust that is a parent of business B (**trust B**), or any parent of trust B, or use or permit the use for the purposes of business B or trust B, of restricted information of business A or trust A.
- (3) In this clause, **restricted information** is information received or generated, and held, by business A or trust A that is connected with its business, being information that—
  - (a) is not available to the competitors or potential competitors of business B or trust B; and
  - (b) if disclosed to business B or trust B, would put, or be likely to put, business B or trust B in a position of material advantage in relation to any competitor or potential competitor.

- (4) This clause does not prevent cross-directors under clause 3H from having access to normal board information.
- (5) A manager of business A who is not prohibited from being a manager of business B under clause 3I may use restricted information of both business A and business B, but only to the extent that the use does not contravene another of the arm's-length rules.

### 3L Records

- (1) Every business to which this schedule applies must keep at its registered office a register of transactions entered into between business A, or any parent of business A, and business B, or any parent of business B.
- (2) Business A must, within 10 working days of entering into such transaction, enter in its register details sufficient to identify the nature and import of the transaction.

### 3M Practical considerations

- (1) Business A and every parent of business A (where that parent is a **participant or specified person**) must ensure that its practical arrangements, such as use of accommodation, equipment, and services, do not contravene this schedule.
- (2) Business A and every parent of business A (where that parent is a **participant or specified person**) must ensure that its selection and appointment of advisors does not prejudice compliance with clauses 3G to 3K.

## 4 Rules do not limit objective

The arm's-length rules in clauses 3A to 3M do not limit the generality of the arm's-length objective in clause 1.

Schedule 6A.1 clause 1(1): amended, on 1 June 2024, by clause 11 of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

Schedule 6A.1 clause 2(1) definition of **common parent**: amended, on 1 June 2024, by clause 12 of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

Schedule 6A.1 clause 2 definition of **manager**: inserted, on 1 March 2024, by clause 18 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Schedule 6A.1 clause 3: amended, on 1 March 2024, by clause 19 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Schedule 6A.1 clause 3A-3M: inserted, on 1 March 2024, by clause 20 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Schedule 6A.1 clause 3A: replaced, on 1 June 2024, by clause 13 of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

Schedule 6A.1 clause 3B: amended, on 1 June 2024, by clause 14 of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

Schedule 6A.1 clause 3C: replaced, on 1 June 2024, by clause 15 of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

Schedule 6A.1 clause 3E: amended, on 1 June 2024, by clause 16 of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

Schedule 6A.1 clause 3F: replaced, on 1 June 2024, by clause 17 of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

Schedule 6A.1 clause 3I(1)(a): amended, on 1 June 2024, by clause 8 of the Electricity Industry Participation Code Amendment (Definition of Connected Generation) 2024.

Schedule 6A.1 clause 3J(1): amended, on 1 June 2024, by clause 18 of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

Schedule 6A.1 clause 3K(2): amended, on 1 June 2024, by clause 19 of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

## Electricity Industry Participation Code 2010

### Schedule 6A.1

---

Schedule 6A.1 clause 3M(1) and (2): amended, on 1 June 2024, by clause 20 of the Electricity Industry Participation Code Amendment (Updating and Clarifying Part 6A Obligations) 2024.

Schedule 6A.1, clause 4: amended, on 1 March 2024, by clause 21 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

# Electricity Industry Participation Code 2010

## Part 7 System operator

### Contents

- 7.1 Contents of this Part
- 7.1A Reasonable and prudent system operator standard
- 7.2 Principal performance obligations of the system operator in relation to common quality and dispatch
  - 7.2A System operator to maintain frequency
  - 7.2B System operator to restore frequency if frequency fluctuation occurs
  - 7.2C System operator to manage frequency time error
  - 7.2D System operator to identify and resolve problems
  - 7.2E System operator to report on frequency fluctuations
- 7.3 Functions of system operator in relation to security of supply and emergency management
- 7.4 Incorporation of security of supply forecasting and information policy and emergency management policy by reference
- 7.5 *[Revoked]*
- 7.6 *[Revoked]*
- 7.7 System operator and Authority joint development programme
- 7.8 Review of system operator
- 7.9 Additional matters to be taken into account in system operator review
- 7.10 Separation of Transpower roles
- 7.11 Review of performance of the system operator
- 7.12 Authority must publish system operator reports

### *Amending or replacing system operation documents*

- 7.13 Proposals to amend system operation documents
  - 7.14 Process where participants request amendments
  - 7.15 Review of policy statement and procurement plan
  - 7.16 Authority must consent to consultation before system operator consults on proposal to amend system operation document
  - 7.17 Authority direction to system operator
  - 7.18 Process if the Authority does not approve a proposal for consultation
  - 7.19 Effect of Authority's and system operator decisions under clauses 7.16 to 7.18
  - 7.20 Consultation on proposed amendments
  - 7.21 Approval of system operation documents
  - 7.22 Authority may prescribe timeframes
-

## 7.1 Contents of this Part

This Part provides for—

- (aa) a reasonable and prudent **system operator** standard; and
- (a) high level, output focussed performance obligations of the **system operator** in relation to the real time co-ordination and delivery of **common quality and dispatch**; and
- (b) the functions of the **system operator** in relation to **demand** and supply forecasting, security of supply, and supply emergencies; and
- (c) review of the **system operator's** performance under the **Act**, this Code, and the relevant **market operation service provider agreement**; and
- (d) requirements for the amendment or replacement of **system operation documents**.

Clause 7.1(aa): inserted, on 19 May 2016, by clause 7(1) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 7.1(a): amended, on 19 May 2016, by clause 7(2) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 7.1(b): amended, on 19 May 2016, by clause 7(3) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 7.1(c): amended, on 19 May 2016, by clause 7(4) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 7.1(c): amended, on 1 August 2023, by clause 5(1) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 7.1(d): inserted, on 1 August 2023, by clause 5(2) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

### 7.1A Reasonable and prudent system operator standard

- (1) The **system operator** must carry out its obligations under this Code with skill, diligence, prudence, foresight, good economic management, and in accordance with recognised international good practice, taking into account—
  - (a) the circumstances in New Zealand; and
  - (b) the fact that real-time co-ordination of the power system involves complex judgements and inter-related events.
- (2) The **system operator** does not breach a **principal performance obligation** or clause 8.5 of this Code if the **system operator** complies with subclause (1).

Clause 7.1A: inserted, on 19 May 2016, by clause 8 of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

## 7.2 Principal performance obligations of the system operator in relation to common quality and dispatch

The obligations in clauses 7.2A to 7.2D are **principal performance obligations**.

Clause 7.2: amended, on 19 May 2016, by clause 9 of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

### 7.2A System operator to maintain frequency

- (1) The **system operator** must **dispatch assets** made available in a manner that avoids cascade failure of **assets** resulting in a loss of **electricity** to **consumers** arising from—
  - (a) a frequency or voltage excursion; or
  - (b) a **supply** and **demand** imbalance.
- (2) Except as provided in this clause and clause 7.2B, the **system operator** must maintain frequency in the **normal band**.

- (3) The **system operator** must ensure that the scheduling, pricing, and dispatch tool has the information necessary to schedule a minimum quantity of **instantaneous reserve**.
- (4) Subject to the availability of **offers** or **reserve offers**, the **system operator** must schedule sufficient **instantaneous reserve** to meet the **system operator's** obligations in subclauses (5) to (7).
- (5) During a contingent event, the **system operator** must ensure that, for the **island** in which the contingent event takes place—
  - (a) frequency remains at or above 48 Hertz; and
  - (b) frequency returns to or above 49.25 Hertz within 60 seconds after the contingent event.
- (6) During an extended contingent event in the North Island, the **system operator** must ensure that, for that **island**—
  - (a) frequency remains at or above 47 Hertz; and
  - (b) frequency does not drop to or below 47.1 Hertz for longer than 5 seconds; and
  - (c) frequency does not drop to or below 47.3 Hertz for longer than 20 seconds; and
  - (d) frequency returns to or above 49.25 Hertz within 60 seconds after the extended contingent event.
- (7) During an extended contingent event in the South Island, the **system operator** must ensure that, for that **island**—
  - (a) frequency remains at or above 45 Hertz; and
  - (b) frequency returns to or above 49.25 Hertz within 60 seconds after the extended contingent event.

#### **7.2B System operator to restore frequency if frequency fluctuation occurs**

If a **frequency fluctuation** occurs, the **system operator** must ensure that frequency is restored to the **normal band** as soon as reasonably practicable having regard to all circumstances surrounding the **frequency fluctuation**.

#### **7.2C System operator to manage frequency time error**

- (1) The **system operator** must ensure that any deviations from **New Zealand standard time** in the power system, caused by variations in system frequency, do not exceed 5 seconds.
- (2) At least once in each day, the **system operator** must eliminate from the power system any deviations from **New Zealand standard time** caused by variations in system frequency.

#### **7.2D System operator to identify and resolve problems**

- (1) A **participant** may request that the **system operator** investigate and resolve a security of supply or reliability problem arising from non-compliance with a standard in clause 4.7, 4.8, or 4.9 of the **Connection Code**, at any **point of connection** to the **grid**.
- (2) If the **system operator** receives a reasonable request under subclause (1), the **system operator** must, given the **assets** made available to it at the relevant time—
  - (a) identify whether there is a security of supply or reliability problem arising from non-compliance with a standard in clause 4.7, 4.8, or 4.9 of the **Connection**

**Code**, at any **point of connection** to the **grid**; and

- (b) if there is such a problem—
- (i) identify the cause of the problem; and
  - (ii) resolve the problem to the extent reasonable and practical.

**7.2E System operator to report on frequency fluctuations**

- (1) By the 10<sup>th</sup> **business day** of each month (except by the 20<sup>th</sup> **business day** in the month of January), the **system operator** must report to the **Authority** the number of **frequency fluctuations** in each of the following frequency bands, in each **island** in the previous month:

Frequency band (Hertz) (where "x" is the maximum or minimum frequency during a <b>frequency fluctuation</b> )			
52.00	>	x	≥ 51.25
51.25	>	x	≥ 50.50
49.50	>	x	≥ 48.75
48.75	>	x	≥ 48.00
48.00	>	x	≥ 47.00

- (2) By the 10<sup>th</sup> **business day** of each month (except by the 20<sup>th</sup> **business day** in the month of January), the **system operator** must report to the **Authority** the number of **frequency fluctuations** in each of the following frequency bands, in the South Island in the previous month:

Frequency band (Hertz) (where "x" is the maximum or minimum frequency during a <b>frequency fluctuation</b> )			
55.00	>	x	≥ 53.75
53.75	>	x	≥ 52.00
47.00	>	x	≥ 45.00

Compare: Electricity Governance Rules 2003 rules 2 and 3 section II part C  
 Clauses 7.2A-E: inserted, on 19 May 2016, by clause 10 of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.  
 Clause 7.2E: amended, on 5 October 2017, by clause 77 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**7.3 Functions of system operator in relation to security of supply and emergency management**

- (1) The **system operator** must—
  - (a) prepare and **publish** a **security of supply forecasting and information policy** that includes a requirement that the **system operator**—
    - (i) prepare and **publish** at least annually a security of supply assessment that contains detailed supply and demand forecasts for at least 5 years, which assists interested parties to assess whether the energy security of supply standard and the capacity security of supply standard set out in subclause (2) are likely to be met; and
    - (ii) consult with persons that the **system operator** thinks are representative of the interests of persons likely to be substantially affected by a security of supply assessment prepared under subparagraph (i) before **publishing** such an assessment; and
    - (iii) prepare and **publish** information that assists interested parties to monitor how hydro and thermal generating capacity, transmission assets, primary fuel, and **ancillary services** are being utilised to manage risks of shortage, including extended dry periods; and
    - (iv) **publish**, in relation to the information **published** under subparagraphs (i) and (iii), sufficient details of the modelling data, assumptions, and methodologies that the **system operator** has used to prepare that information as to allow interested parties to recreate that information (but without **publishing** information that is confidential to any **participant**); and
  - (b) implement and comply with the **security of supply forecasting and information policy** prepared and **published** in accordance with paragraph (a).
- (2) For the purposes of subclause (1)(a)(i)—
  - (a) the energy security of supply standard is a **winter energy margin** of 14-16% for New Zealand and a **winter energy margin** of 25.5-30% for the South Island; and
  - (b) the capacity security of supply standard is a **winter capacity margin** of 630-780 **MW** for the North Island.
- (2A) The **Authority** may **publish** a security standards assumptions document.
- (2B) Subject to subclauses (2C) and (2D), if the **Authority** has **published** a security standards assumptions document under subclause (2A), the **system operator** must use the assumptions set out in that document in preparing a security of supply assessment under the **security of supply forecasting and information policy**.
- (2C) The **system operator** may use different assumptions from those in a security standards assumptions document to prepare a security of supply assessment if—
  - (a) the **system operator** considers that there are good reasons to use different assumptions; and
  - (b) the **system operator** includes in the security of supply assessment—
    - (i) a detailed explanation of the assumptions used to prepare the security of supply assessment; and
    - (ii) a statement of reasons for using those assumptions instead of the assumptions **published** by the **Authority**; and
    - (iii) a description of how the security of supply assessment prepared using those assumptions differs from a security of supply assessment prepared using the

- assumptions set out in the security standards assumptions document.
- (2D) Despite subclause (2C), the **system operator** is not required to include the information referred to in subclause (2C)(b) in a security of supply assessment if the **system operator** considers that it would have good reason to refuse to supply the information under clause 2.6.
- (3) The **system operator** must —
- (a) prepare and **publish** an **emergency management policy** that sets out the steps that the **system operator** must take, and must encourage **participants** to take, at various stages during an extended emergency such as an extended dry sequence or an extended period of capacity inadequacy; and
  - (b) include in the **emergency management policy** the steps that, at various stages in anticipation of and during a gas transmission failure or gas supply failure to **generators**, the **system operator** must—
    - (i) take as the **system operator**; and
    - (ii) encourage **participants** to take, including, if appropriate, steps for relevant **participants** to take in conjunction with gas industry entities; and
    - (iii) encourage relevant gas industry entities to take; and
  - (c) implement and comply with the **emergency management policy** .
- (4) The **emergency management policy** is not required to include information that is already set out in—
- (a) the **system operator rolling outage plan** prepared under subpart 1 of Part 9; or
  - (b) the **policy statement**; or
  - (c) **Technical Code B** of Schedule 8.3.
- (5) The **system operator** may depart from the policies set out in an **emergency management policy** if an **EMP departure situation** arises and such departure is required to enable the **system operator** to comply with clause 7.1A(1).
- (6) If the **system operator** makes a departure under subclause (5), the **system operator** must provide a report to the **Authority** setting out the circumstances of the **EMP departure situation** and the actions taken to deal with it. The **Authority** must **publish** the report within a reasonable time of its receipt.

Heading: amended, on 5 October 2017, by clause 78(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 7.3(1): amended, on 19 May 2016, by clause 11(1) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 7.3(1)(a): amended, on 19 May 2016, by clause 11(2) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 7.3(1)(a)(iv): amended, on 5 October 2017, by clause 78(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 7.3(1)(b): amended, on 19 May 2016, by clause 11(3) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 7.3(2)(a): amended, on 3 January 2013, by clause 4(1) of the Electricity Industry Participation (Supply Standards) Code Amendment 2012.

Clause 7.3(2)(b): amended, on 3 January 2013, by clause 4(2) of the Electricity Industry Participation (Supply Standards) Code Amendment 2012.

Clause 7.3(2A), (2B), (2C) and (2D): inserted, on 3 January 2013, by clause 4(3) of the Electricity Industry Participation (Supply Standards) Code Amendment 2012.

Clause 7.3(2A): amended, on 5 October 2017, by clause 78(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 7.3(2B): amended, on 19 May 2016, by clause 11(4) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 7.3(2B): amended, on 5 October 2017, by clause 78(4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 7.3(2C)(b)(ii): amended, on 5 October 2017, by clause 78(5) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 7.3(3): amended, on 19 May 2016, by clause 11(5) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 7.3(3)(a): amended, on 19 May 2016, by clause 11(6)(a) and (b) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 7.3(3)(b): amended, on 19 May 2016, by clause 11(7) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 7.3(3)(b)(i): amended, on 19 May 2016, by clause 11(8) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 7.3(3)(b)(ii): amended, on 19 May 2016, by clause 11(9) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 7.3(3)(c): amended, on 19 May 2016, by clause 11(10) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 7.3(4)(b): amended, on 10 January 2013, by clause 5 of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 7.3(5): amended, on 21 September 2012, by clause 7(1) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

Clause 7.3(5): amended, on 19 May 2016, by clause 11(11) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 7.3(6): amended, on 21 September 2012, by clause 7(2) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

Clause 7.3(6): amended, on 19 May 2016, by clause 11(12) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

#### **7.4 Incorporation of security of supply forecasting and information policy and emergency management policy by reference**

- (1) **The security of supply forecasting and information policy and the emergency management policy** are incorporated by reference in this Code.
- (2) Clauses 7.13 to 7.22 apply to any amendment or replacement of the **security of supply forecasting and information policy or emergency management policy**.

Clause 7.4(1): amended, on 5 October 2017, by clause 79 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 7.4(1): amended, on 1 August 2023, by clause 6(1) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 7.4(2): replaced, on 1 August 2023, by clause 6(2) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 7.4(2): amended, on 1 March 2024, by clause 22 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

#### **7.5 [Revoked]**

Clause 7.5(2): revoked, on 19 May 2016, by clause 12 of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 7.5(7): amended, on 1 November 2018, by clause 10(a) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 7.5(8): amended, on 1 November 2018, by clause 10(b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 7.5: revoked, on 1 August 2023, by clause 7 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

#### **7.6 [Revoked]**

Clause 7.6: revoked, on 1 August 2023, by clause 8 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

#### **7.7 System operator and Authority joint development programme**

- (1) At least annually, the **system operator** and the **Authority** must agree a development

programme that coordinates and prioritises—

- (a) those items in the **Authority's** industry development work plan on which the **Authority** intends to liaise with the **system operator**; and
  - (b) the **system operator's** capital expenditure plan provided to the **Authority** under the **system operator market operation service provider agreement**.
- (2) The **Authority** must **publish** the programme agreed under subclause (1).

## 7.8 Review of system operator

- (1) The **Authority** must review the performance of the **system operator** at least once in each year ending 30 June, after the **system operator** submits its self-review under clause 7.11.
- (2) The review must concentrate on the **system operator's** compliance with—
  - (a) its obligations under this Code and the **Act**; and
  - (b) the operation of this Code and the **Act**; and
  - (c) any performance standards agreed between the **system operator** and the **Authority**; and
  - (d) the provisions of the **system operator's market operation service provider agreement**.
- (3) The **Authority** must **publish** a report on the performance of the **system operator** no later than 10 **business days** after the **Authority** completes its review.

Compare: SR 2003/374 r 47

Clause 7.8(1): amended, on 19 May 2016, by clause 13(1) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 7.8(1): amended, on 5 October 2017, by clause 80(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 7.8(3): inserted, on 19 May 2016, by clause 13(2) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 7.8(3): amended, on 5 October 2017, by clause 80(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 7.9 Additional matters to be taken into account in system operator review

The **Authority** must take into account the following matters when conducting a review under clause 7.8:

- (a) the terms of the **system operator's market operation service provider agreement**;
- (b) reports from the **system operator** to the **Authority**, including the **system operator's** self-review under clause 7.11;
- (c) the performance of the **system operator** over time in relation to this Part and Part 8;
- (d) the extent to which the acts or omissions of other persons have impacted on the performance of the **system operator** and the nature of the task being monitored;
- (e) reports or complaints from any person, and any responses by the **system operator** to such reports or complaints;
- (f) the fact that the real time co-ordination of the power system involves a number of complex judgments and inter-related incidents;
- (g) any disparity of information between the **Authority** and the **system operator**;
- (h) any other matter the **Authority** considers relevant to assess the **system operator's**

performance.

Compare: SR 2003/374 r 48

Clause 7.9(b): amended, on 19 May 2016, by clause 14(1) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 7.9(e): amended, on 19 May 2016, by clause 14(2) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

#### 7.10 Separation of Transpower roles

- (1) **Transpower's** role as **system operator** under this Code and the **Act** is distinct and separate from any other role or capacity that **Transpower** may have under this Code and the **Act**, including as a **grid owner** or transmission provider.
- (2) For this purpose, when assessing an aspect of the performance, or non-performance, of the **system operator**,—
  - (a) the assessment must be made on the basis that the **system operator** had no other role or capacity; and
  - (b) the **system operator** must be treated as if it did not have any knowledge or information that may be received or held by **Transpower** unless **Transpower** receives or holds that information or knowledge in its capacity as **system operator**.
- (3) Subclause (2) applies, with necessary modifications, to an assessment of an aspect of the performance, or non-performance, of **Transpower** in any other role or capacity under this Code or the **Act**.
- (4) **Transpower** must report, in each self-review report provided under this Code, on the extent to which its role as **system operator** under this Code and the **Act** has, despite subclauses (1) to (3), been materially affected by—
  - (a) any other role or capacity that **Transpower** has under this Code or the **Act**; or
  - (b) an agreement.

Compare: SR 2003/374 r 50

#### 7.11 Review of performance of the system operator

- (1) No later than 31 August in each year, the **system operator** must submit to the **Authority** a review and assessment of its performance in the previous 12 month period ending 30 June.
- (2) The self-review must contain such information as the **Authority** may reasonably require from time to time to enable the **Authority** to review the **system operator's** performance during the period in relation to the following:
  - (a) the **policy statement**;
  - (b) the **security of supply forecasting and information policy**;
  - (c) the **emergency management policy**;
  - (d) the joint development programme prepared under clause 7.7(1);
  - (e) the work programmes agreed with the **Authority** under the **system operator's market operation service provider agreement**;
  - (f) the **system operator's** engagement with **participants**;
  - (g) delivery of the **system operator's** capital and business plans;
  - (h) the financial and operational performance of the **system operator**.
- (3) *[Revoked]*

(4) *[Revoked]*

Compare: Electricity Governance Rules rule 14 section II part C

Clause 7.11(1): amended, on 19 May 2016, by clause 15(1)(a) and (b) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 7.11(2): amended, on 19 May 2016, by clause 15(2) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 7.11(3) and (4): revoked, on 19 May 2016, by clause 15(3) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 7.11(4): amended, on 15 May 2014, by clause 6 of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

### 7.12 Authority must publish system operator reports

(1) The **Authority** must **publish** all self-review reports that are received from the **system operator** and that are required to be provided by the **system operator** to the **Authority** under this Code.

(2) The **Authority** must **publish** each report within **5 business days** after receiving the report.

Compare: SR 2003/374 r 49

Clause 7.12: amended, on 5 October 2017, by clause 81 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### *Amending or replacing system operation documents*

Cross heading: inserted, on 1 August 2023, by clause 9 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

### 7.13 Proposals to amend system operation documents

(1) A proposal to amend a **system operation document** is made by the **system operator** to the **Authority**.

(2) The process for the **system operator** to develop a proposal may be initiated by—

(a) the **Authority** directing the **system operator** to consider a proposal to amend a **system operation document**; or

(b) the **system operator** agreeing under clause 7.14 to progress an amendment to a system operation document; or

(c) the **system operator** deciding to progress an amendment, either—

(i) at the conclusion of a review carried out under clause 7.15; or

(ii) at any other time.

(3) Before providing a proposal to the **Authority** to amend a **system operation document**, the **system operator** must consult on the proposal where required by clause 7.20, after obtaining consent as required by clause 7.16.

(4) For the purposes of clauses 7.13 to 7.22, a proposal to amend a **system operation document** includes a proposal to replace a **system operation document**.

Clause 7.13: inserted, on 1 August 2023, by clause 9 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

### 7.14 Process where participants request amendments

(1) If a **participant** requests an amendment to a **system operation document** to the **system operator**, the **system operator** must decide to—

(a) consider the amendment as part of the next review under clause 7.15; or

(b) consider the amendment outside of a review; or

(c) decline to consider the amendment.

- (2) The **system operator** must advise the **Authority** and the **participant** that requested the amendment of its decision, including its reasons, within 1 month of receiving the request.

Clause 7.14: inserted, on 1 August 2023, by clause 9 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

### **7.15 Review of policy statement and procurement plan**

- (1) The **system operator** must review the **policy statement** and the **procurement plan** at least once every 2 years to identify whether the document should be amended.
- (2) For the purposes of subclause (1), any 2 year period commences on either—
- (a) the date the last review of the document was completed if that review did not result in an amendment being made; or
  - (b) if a review results in an amendment being made, the date the amendment takes legal effect.
- (3) At the conclusion of a review the **system operator** must either—
- (a) propose an amendment to the **Authority**, following consultation where required by clause 7.20, after obtaining consent as required by clause 7.16; or
  - (b) advise the **Authority** that the **system operator** does not consider that an amendment is required and provide the **Authority** with a written report describing the process carried out for the review, the **system operator's** decision, and the reasons for the decision.

Clause 7.15: inserted, on 1 August 2023, by clause 9 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

### **7.16 Authority must consent to consultation before system operator consults on proposal to amend system operation document**

- (1) The **system operator** must obtain the **Authority's** consent before consulting on a proposal to amend a **system operation document**.
- (2) The purpose for the **Authority** consenting to consultation is to enable the **Authority** to identify to the **system operator** any issues with—
- (a) the proposal that may cause the **Authority** to not issue a notice to adopt the amendment under section 131B(2) of the **Act** or to not progress the amendment as a **Code** amendment under section 38 of the **Act**, as the case may be; and
  - (b) the **system operator's** proposed consultation process and the information to be provided with the proposal for consultation under clause 7.20(2)(a).
- (3) When requesting the **Authority's** consent, the system operator must provide the following information to the **Authority**:
- (a) the consultation information in clause 7.20(2)(a);
  - (b) the proposed consultation period in clause 7.20(2)(b);
  - (c) the **system operator's** proposed consultation process;
  - (d) a list of the persons the **system operator** proposes to consult with.
- (4) The **Authority** must within a reasonable period time after receiving the **system operator's** request for consent either—
- (a) consent to the consultation and notify the **system operator** accordingly; or
  - (b) raise any issues it has identified under subclause (2) with the **system operator**.

Clause 7.16: inserted, on 1 August 2023, by clause 9 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 7.16(4)(b): amended, on 1 March 2024, by clause 23 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

### **7.17 Authority direction to system operator**

- (1) In addition to its powers under clause 7.16, the **Authority** may direct the **system operator** to make changes to any of the matters listed in clause 7.16(3), other than the proposed amendment itself.
- (2) The **Authority** may not give a direction under subclause (1) if the effect of the direction is that the proposal, if finally made, could not be considered to have been made by the **system operator** for the purposes of section 131B(2) of the **Act**.

Clause 7.17: inserted, on 1 August 2023, by clause 9 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

### **7.18 Process if the Authority does not approve a proposal for consultation**

- (1) If the **Authority** identifies any issues or concerns under clause 7.16(2)(a), unless the **Authority** has given a direction under clause 7.17(1), the **system operator** must consider those issues and either—
  - (a) amend the proposal, proposed consultation process or the consultation information to be provided with the proposal and re-submit the information required under clause 7.16(3) to the **Authority** for approval; or
  - (b) decide not to continue with the proposal; or
  - (c) continue with the proposal without making any amendment to it, the proposed consultation process or the information to be provided with the proposal.
- (2) If the **Authority** directs the **system operator** under clause 7.17(1), the **system operator** must make the change and re-submit the information required under clause 7.16(3) to the **Authority** for approval.
- (3) If the **system operator** re-submits the information required under clause 7.16(3) to the **Authority**, the **Authority** must re-consider the information and decide either to:
  - (a) consent to the consultation; or
  - (b) not consent to the consultation.
- (4) If the **Authority** does not consent to a proposal for consultation under subclause (3), the **system operator** must decide either—
  - (a) to not continue with the proposal; or
  - (b) to continue with the proposal.
- (5) The **system operator** and the **Authority** must give each other notice of their decisions and the reasons for the decision under the above subclauses.

Clause 7.18: inserted, on 1 August 2023, by clause 9 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

### **7.19 Effect of Authority's and system operator decisions under clauses 7.16 to 7.18**

- (1) The **Authority's** consent to consultation under clause 7.16(4)(a) or 7.18(3)(a) or to direct the **system operator** under clause 7.17(1) does not affect the **Authority's** decision regarding approval of a **system operation document** under clause 7.21.
- (2) If the **system operator** continues with a proposal under clauses 7.18(1)(c) or 7.18(4)(b), the **system operator**:
  - (a) does so with the risk that the **Authority** may decide not to issue a notice to adopt the amendment under section 131B(2) of the **Act** or to not progress the amendment as a Code amendment under section 38 of the **Act**; and
  - (b) must advise the persons it consults with under clause 7.20 that the **Authority** has not consented to the consultation and that the risk described in paragraph (a) arises.

- (3) Subclause (2)(a) does not prevent the **Authority** from deciding to not issue a notice to adopt an amendment under section 131B(2) of the **Act** or to not progress the amendment as a Code amendment under section 38 of the **Act**.

Clause 7.19: inserted, on 1 August 2023, by clause 9 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 7.19(1): amended, on 1 March 2024, by clause 24(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Clause 7.19(2)(a) and (3): amended, on 1 March 2024, by clause 24(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Clause 7.19(2)(b): amended, on 1 March 2024, by clause 24(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

## 7.20 Consultation on proposed amendments

- (1) The **system operator** must consult on any proposed amendment of a **system operation document** with affected **participants** or persons that represent the interests of those persons likely to be affected by the proposed amendment.
- (2) The **system operator** must, at least, carry out the following steps as part of consultation on a proposed amendment:
- (a) make the following information available to the persons it is consulting with:
    - (i) a draft of the proposed amendment:
    - (ii) a statement of the objectives of the proposed amendment:
    - (iii) an evaluation of the costs and benefits of the proposed amendment:
    - (iv) an evaluation of alternative means of achieving the objectives of the proposed amendment (if any):
  - (b) provide a reasonable period of time to the persons it is consulting with to consider the information provided under paragraph (a) and to make submissions:
  - (c) consider any submissions.
- (3) In evaluating the costs and benefits of a proposed amendment under subclause (2)(a)(iii), the **system operator** must undertake a quantitative assessment, if reasonably possible.
- (4) The **system operator** must provide a copy of each submission received under subclause (2) to the **Authority**.
- (5) Despite subclause (1), consultation is not required if the **system operator** satisfies the **Authority**, on reasonable grounds, that—
- (a) the nature of the amendment is technical and non-controversial; or
  - (b) there is widespread support for the amendment among the persons likely to be affected by it; or
  - (c) there has been adequate prior consultation so that all relevant views have been considered; or
  - (d) it is necessary or desirable in the public interest that the proposed amendment be made urgently.

Clause 7.20: inserted, on 1 August 2023, by clause 9 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

## 7.21 Approval of system operation documents

- (1) Following consultation, or if clause 7.20(5) applies, the **system operator** must provide the **Authority** with a report that sets out the following:
- (a) the information required by clause 7.20(2)(a), regardless of whether or not consultation was carried out, but incorporating any changes made following consultation:

- (b) a summary of any submissions received and the **system operator's** response to each;
  - (c) a list of any changes made to the proposed amendments to the **system operation document** after consultation and the reasons for the changes;
  - (d) if clause 7.20(5) applies, the reasons why the **system operator** considered that consultation was not required;
  - (e) a final draft of the proposed amendments to the **system operation document** (either as amendments to the **system operation document** or a replacement **system operation document**).
- (2) After receipt of the report, the **Authority** may—
- (a) approve the proposed amendments to the **system operation document**; or
  - (b) require the **system operator** to conduct further consultation before re-submitting the proposed amendments to the **system operation document** to the **Authority** for approval; or
  - (c) decline to approve the proposed amendments to the **system operation document**.
- (3) The approval by the **Authority** of proposed amendments to a **system operation document**—
- (a) does not remove the requirement for the **Authority** to comply with either section 38 or section 131B of the **Act** in order to give legal effect to the amendments as part of the **Code**; and
  - (b) does not affect, pre-determine or otherwise override any decision by the **Authority** under section 38 or section 131B of the **Act**.
- (4) To avoid doubt, an approved **system operation document** is not invalid only because the **Authority** and the **system operator** did all or any of the things referred to in clauses 7.16 to 7.20 before those clauses came into force.

Clause 7.21: inserted, on 1 August 2023, by clause 9 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 7.21(1) and (1)(d): amended, on 1 March 2024, by clause 25 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

## 7.22 Authority may prescribe timeframes

From time to time the **Authority** may prescribe reasonable timeframes that the **system operator** must comply with in completing any steps in clauses 7.16 to 7.21.

Clause 7.22: inserted, on 1 August 2023, by clause 9 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

# Electricity Industry Participation Code 2010

## Part 8 Common quality

### Contents

- 8.1 Contents of this Part
- 8.1A *[Revoked]*
  - Subpart 1—Performance obligations of the system operator
- 8.2 Contents of this subpart
- 8.3 Recovery of costs from causers of voltage non-compliance
- 8.4 System operator may rely on information provided
- 8.5 Restoration
- 8.6 System operator may contract for higher levels of common quality
- 8.7 System operator must not contract contrary to this arrangement
- Policy statement*
- 8.8 System operator to comply with policy statement
- 8.9 *[Revoked]*
- 8.10 Incorporation of policy statement by reference
- 8.10A *[Revoked]*
- 8.10B *[Revoked]*
- 8.10C *[Revoked]*
- 8.11 Content of policy statement
- 8.11A *[Revoked]*
- 8.12 *[Revoked]*
- 8.12A *[Revoked]*
- 8.12B *[Revoked]*
- 8.13 *[Revoked]*
- 8.14 Departure from policy statement
- System security forecast*
- 8.15 System operator to prepare and review system security forecast
  - Subpart 2—Asset owner performance obligations and technical standards
- 8.16 Contents of this subpart
  - Asset owner performance obligations and technical standards concerning frequency*
  - 8.17 Contribution by injections to overall frequency management
  - 8.18 Contributions by purchasers to overall frequency management
  - 8.19 Contributions to frequency support in under-frequency events
  - 8.20 Contributions by grid owners to frequency support
  - 8.21 Excluded generating stations
  - Asset owner performance obligations and technical standards concerning voltage*
  - 8.22 Voltage range AOPOs
  - 8.23 Voltage support AOPOs
  - 8.24 Load shedding obligations to support voltage
  - 8.25 Other asset owner performance obligations and technical standards
  - 8.25A Fault ride through
  - 8.25B Reactive current and active power output

- 8.25C Use of additional equipment
- 8.25D Application
- 8.26 Asset owners must co-operate

*Compliance*

- 8.27 System operator to monitor compliance
- 8.28 Responsibility for compliance

*Equivalence arrangements and dispensations*

- 8.29 Right to apply for approval of equivalence arrangement or grant of dispensation
- 8.30 Approval of equivalence arrangements
- 8.31 Grant of dispensations
- 8.32 Liability of asset owner pending decision
- 8.33 Modification of equivalence arrangement or dispensation
- 8.34 Cancellation of equivalence arrangement or dispensation
- 8.35 Revocation of equivalence arrangement and revocation or variation of dispensation
- 8.36 Appeal against decisions
- 8.37 Other provisions relating to equivalence arrangements and dispensations
- 8.38 Authority may require excluded generating stations to comply with certain clauses

Subpart 3—Arrangements concerning ancillary services

- 8.39 Contents of this subpart

*Procurement plan*

- 8.40 System operator to use reasonable endeavours to implement and comply with procurement plan
- 8.41 *[Revoked]*
- 8.42 Incorporation of procurement plan by reference
- 8.42A *[Revoked]*
- 8.42B *[Revoked]*
- 8.42C *[Revoked]*
- 8.43 Content of procurement plan
- 8.43A *[Revoked]*
- 8.44 *[Revoked]*
- 8.44A *[Revoked]*
- 8.44B *[Revoked]*
- 8.45 Contracts with ancillary service agents
- 8.45A Methodology to assess net purchase quantity
- 8.46 *[Revoked]*
- 8.47 Departure from procurement plan

*Alternative ancillary service arrangements*

- 8.48 Alternative ancillary service arrangements
- 8.49 Suspension of alternative ancillary service arrangement
- 8.50 Modification of alternative ancillary service arrangement
- 8.51 Cancellation of alternative ancillary service arrangement
- 8.52 Revocation of alternative ancillary service arrangements
- 8.53 Appeal of system operator decisions
- 8.54 Other provisions relating to alternative ancillary service arrangements

Subpart 4—Interruptible load

- 8.54A Contents of this subpart

- 8.54AA System operator to maintain and publish register
- 8.54B Ancillary service agents to provide information about interruptible load

Subpart 5—*[Revoked]*

- 8.54C *[Revoked]*
- 8.54D *[Revoked]*
- 8.54E *[Revoked]*
- 8.54F *[Revoked]*
- 8.54G *[Revoked]*
- 8.54H *[Revoked]*
- 8.54I *[Revoked]*
- 8.54J *[Revoked]*
- 8.54K *[Revoked]*
- 8.54L *[Revoked]*
- 8.54M *[Revoked]*
- 8.54N *[Revoked]*
- 8.54O *[Revoked]*
- 8.54P *[Revoked]*
- 8.54Q *[Revoked]*
- 8.54R *[Revoked]*
- 8.54S *[Revoked]*
- 8.54T *[Revoked]*
- 8.54TA *[Revoked]*
- 8.54TB *[Revoked]*
- 8.54TC *[Revoked]*
- 8.54TD *[Revoked]*
- 8.54TE *[Revoked]*
- 8.54TF *[Revoked]*

Subpart 6—Allocating costs

- 8.54U Contents of this subpart

*Allocating costs for ancillary services*

- 8.55 Identifying costs associated with ancillary services
- 8.56 Black start costs allocated to grid owner
- 8.57 Over frequency reserve costs allocated to HVDC owner
- 8.58 Frequency keeping costs are allocated to purchasers
- 8.59 Availability costs allocated to generators and HVDC owner
- 8.60 System operator must investigate causer of under-frequency event
- 8.61 Authority to determine causer of under-frequency event
- 8.62 Disputes regarding Authority determinations
- 8.63 Decision of the Rulings Panel
- 8.64 Event costs allocated to event causers
- 8.65 Rebates paid for under-frequency events
- 8.66 Payments and rebates
- 8.67 Voltage support costs allocated in 3 parts – nominated peak, monthly peak and residual charges
- 8.67A *[Revoked]*
- 8.68 Clearing manager to determine amounts owing

- 8.69 Clearing manager to determine wash up amounts payable and receivable  
8.70 System operator pays ancillary service agents

**Schedule 8.1**

**Approval of equivalence arrangement or grant of dispensation**

**Schedule 8.2**

**Approval of alternative ancillary service arrangement**

**Schedule 8.3**

**Technical codes**

*Technical Code A – Assets*

*Appendix A: Main protection system requirements*

*Appendix B: Routine testing of assets and automatic under-frequency load shedding systems*

*Technical Code B – Emergencies*

*Technical Code C – Operational communications*

*Appendix A: Indications and Measurements*

*Technical Code D – Co-ordination of outages affecting common quality*

**Schedule 8.4**

***[Revoked]***

**Schedule 8.5**

***[Revoked]***

**Schedule 8.6**

**AUFLS technical requirements report incorporated by reference**

---

**8.1 Contents of this Part**

This Part relates to **common quality**. In particular, this Part concerns the performance obligations of the **system operator**, the performance obligations of **asset owners**, arrangements concerning **ancillary services**, and **technical codes**.

Compare: Electricity Governance Rules 2003 rule 1 section I part C

Clause 8.1: amended, on 7 August 2014, by clause 5 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 8.1: amended, on 21 December 2021, by clause 6 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**8.1A *[Revoked]***

Clause 8.1A: inserted, on 19 January 2017, by clause 4 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2016.

Clause 8.1A: revoked, on 21 December 2021, by clause 7 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**Subpart 1—Performance obligations of the system operator**

**8.2 Contents of this subpart**

This subpart provides for—

- (a) general performance obligations of the **system operator**
- (b) a **policy statement** relating to the **principal performance obligations** of the **system operator**; and

- (c) the review of the **policy statement**.

Compare: Electricity Governance Rules 2003 rule 1 section II part C

### 8.3 Recovery of costs from causers of harmonic and voltage non-compliance

- (1) If the **system operator** is able to establish who is causing any departure from the standards referred to in clause 7.2(D), the **system operator** must endeavour to recover its reasonable identification and testing costs from that person. If the causer is a **participant**, the **participant** must pay those costs to the **system operator**.
- (2) If the **system operator** is unable to recover its reasonable identification and testing costs, or the causer is not able to be identified, then those costs will form part of the **system operator's identification costs**.

Compare: Electricity Governance Rules 2003 rule 2.3.2 section II part C

Clause 8.3 Heading: amended, on 19 May 2016, by clause 16(1) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 8.3(1): amended, on 19 May 2016, by clause 16(2) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

### 8.4 System operator may rely on information provided

For the purposes of this Code, the **system operator** may—

- (a) rely on the **assets** and information about the **assets** made available to the **system operator** by **asset owners**; and
- (b) assume that **asset owners** are complying with the **asset owner performance obligations** and the **technical codes**, or complying with a valid **dispensation** or **equivalence arrangement**
- (c) *[Revoked]*

Compare: Electricity Governance Rules 2003 rule 4 section II part C

Clause 8.4: replaced, on 19 January 2017, by clause 5 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2016.

Clause 8.4(b): amended, on 21 December 2021, by clause 8(1) of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

Clause 8.4(c): revoked, on 21 December 2021, by clause 8(2) of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

### 8.5 Restoration

- (1) If an event disrupts the **system operator's** ability to comply with the **principal performance obligations**, the **system operator** must re-establish normal operation of the power system as soon as possible, given—
- (a) the capability of **generation**, and **ancillary services**; and
- (b) the configuration and capacity of the **grid**; and
- (c) the information made available by **asset owners**.
- (2) When re-establishing normal operation of the power system under subclause (1), the **system operator** must have regard to the following priorities:
- (a) first, the safety of natural persons:
- (b) second, the avoidance of damage to **assets**:
- (c) third, the restoration of **offtake**:
- (d) fourth, conformance with the **principal performance obligations**:
- (e) fifth, full conformance with the **dispatch objective**.

Compare: Electricity Governance Rules 2003 rule 5 section II part C

Clause 8.5(1): amended, on 19 May 2016, by clause 17 of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 8.5(1)(a): amended, on 7 August 2014, by clause 6 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 8.5(1)(a): amended, on 21 December 2021, by clause 9 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

## 8.6 System operator may contract for higher levels of common quality

Subject to clause 17.29, nothing in this Code prevents the **system operator** from entering into contracts or arrangements in which levels of quality more stringent than those specified in the **principal performance obligations** are agreed, if the **system operator** can identify the incremental costs of those more stringent levels, and can ensure that those incremental costs are paid to the **system operator** by the persons wishing to enter into that contract or arrangement with the **system operator**.

Compare: Electricity Governance Rules 2003 rule 6 section II part C

## 8.7 System operator must not contract contrary to this arrangement

Subject to clauses 8.6 and 17.29, the **system operator** must not enter into a contract with another person that is inconsistent with the **system operator's** obligations under this Code and the **technical codes**.

Compare: Electricity Governance Rules 2003 rule 7 section II part C

### *Policy statement*

## 8.8 System operator to comply with policy statement

Subject to clause 8.14, the **system operator** must comply with the **policy statement**.

Compare: Electricity Governance Rules 2003 rule 8 section II part C

Clause 8.8: amended, on 19 May 2016, by clause 18 of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

## 8.9 *[Revoked]*

Clause 8.9: revoked, on 10 January 2013, by clause 6 of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

## 8.10 Incorporation of policy statement by reference

(1) The **policy statement** is incorporated by reference in this Code.

(2) Clauses 7.13 to 7.22 apply to any amendment or replacement of the **policy statement**.

Compare: Electricity Governance Rules 2003 rule 9 section II part C

Clause 8.10(1): amended, on 10 January 2013, by clause 7 of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.10(1): amended, on 1 August 2023, by clause 10(1) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 8.10(2): amended, on 1 August 2023, by clause 10(2) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 8.10(2): amended, on 1 March 2024, by clause 26 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

## 8.10A *[Revoked]*

Clause 8.10A: inserted, on 10 January 2013, by clause 8 of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.10A(1): amended, on 5 October 2017, by clause 82 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.10A: revoked, on 1 August 2023, by clause 11 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

### **8.10B** *[Revoked]*

Clause 8.10B: inserted, on 10 January 2013, by clause 8 of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.10B: revoked, on 1 August 2023, by clause 12 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

### **8.10C** *[Revoked]*

Clause 8.10C: inserted, on 10 January 2013, by clause 8 of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.10C(3): amended, on 5 October 2017, by clause 83 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.10C: revoked, on 1 August 2023, by clause 13 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

## **8.11 Content of policy statement**

(1) *[Revoked]*

(2) *[Revoked]*

(3) **A policy statement must include—**

- (a) the policies and means that the **system operator** considers appropriate for the **system operator** to observe in complying with its **principal performance obligations**; and
- (b) the policies and means by which scheduling and **dispatch** are adjusted to meet the **dispatch objective**, and must include the provision of a **dispatch** process statement. The **dispatch** process statement must contain the details of the processes that enable the **system operator** to meet the **dispatch objective**, including the methodologies to be used by the **system operator** for planning to meet the **dispatch objective** during the period leading up to real time and meeting the **dispatch objective** in real time; and
- (c) a policy setting out how the **system operator** will manage any conflict of interest that arises in the performance of its obligations under this Code; and
- (d) a statement of the reasons for adopting the policies and means set out in the **policy statement** (which statement must be regarded as an explanatory note only and does not form part of the policies itself); and
- (e) a statement of how future policies and means might be formulated and implemented.

Compare: Electricity Governance Rules 2003 rule 10 section II part C

Clause 8.11 Heading: substituted, on 10 January 2013, by clause 9(a) of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.11 Heading: amended, on 1 August 2023, by clause 14(1) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 8.11(1): revoked, on 10 January 2013, by clause 9(b) of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.11(2): revoked, on 10 January 2013, by clause 9(c) of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.11(3): amended, on 10 January 2013, by clause 9(d) of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.11(3): amended, on 19 May 2016, by clause 19(1) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 8.11(3)(c): amended, on 19 May 2016, by clause 19(2) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 8.11(3): amended, on 1 August 2023, by clause 14(2) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

#### **8.11A** *[Revoked]*

Clause 8.11A: inserted, on 10 January 2013, by clause 10 of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.11A(3)(b): amended, on 5 October 2017, by clause 84 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.11A: revoked, on 1 August 2023, by clause 15 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

#### **8.12** *[Revoked]*

Compare: Electricity Governance Rules 2003 rule 11 section II part C

Clause 8.12: substituted, on 10 January 2013, by clause 11 of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.12(1), (2), (4) and (6): amended, on 5 October 2017, by clause 85(1) and (2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.12: revoked, on 1 August 2023, by clause 16 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

#### **8.12A** *[Revoked]*

Clause 8.12A: inserted, on 10 January 2013, by clause 12 of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.12A(4)(a) and (6): amended, on 5 October 2017, by clause 86 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.12A: revoked, on 1 August 2023, by clause 17 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

#### **8.12B** *[Revoked]*

Clause 8.12B: inserted, on 10 January 2013, by clause 12 of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.12B(b): amended, on 5 October 2017, by clause 87 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.12B: revoked, on 1 August 2023, by clause 18 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

#### **8.13** *[Revoked]*

Compare: Electricity Governance Rules 2003 rule 12 section II part C

Clause 8.13: revoked, on 10 January 2013, by clause 13 of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

#### **8.14 Departure from policy statement**

- (1) The **system operator** may depart from the policies set out in a **policy statement** when a **system security situation** arises and such departure is required for the **system operator** to comply with clause 7.1A(1).
- (2) If the **system operator** departs from a **policy statement** under subclause (1), the **system operator** must provide a report to the **Authority** setting out the circumstances of the **system security situation** and the actions taken to deal with it.
- (3) The **Authority** must **publish** the report within a reasonable time after receiving it.

Compare: Electricity Governance Rules 2003 rule 13 section II part C

Clause 8.14(1): amended, on 19 May 2016, by clause 20(1) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 8.14(2): amended, on 19 May 2016, by clause 20(2) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 8.14(3): substituted, on 10 January 2013, by clause 14 of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.14(3): amended, on 5 October 2017, by clause 88 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

*System security forecast*

**8.15 System operator to prepare and review system security forecast**

- (1) Every 2 years, the **system operator** must prepare, **publish**, and provide to the **Authority** a **system security forecast**.
- (1A) The **system security forecast** must—
  - (a) identify risks to the **system operator's** ability to meet the **principal performance obligations** over the ensuing period of not less than 36 months, and indicate how those risks can be managed; and
  - (b) take into account the capabilities of the **grid** and connected **assets** based on information known to, and able to be disclosed by, the **system operator**.
- (2) The date by which the **system operator** must **publish** the **system security forecast** and provide it to the **Authority** in each year in which the **system operator** is required to do so, is the date established for that purpose under rule 15 of section II of part C of the **rules**.
- (3) The **system operator** must review the most recent **system security forecast** prepared in accordance with subclause (1) at 6 monthly intervals until a new forecast or update is prepared. If, in the reasonable opinion of the **system operator**, a change has been made to the power system that would materially affect the most recent forecast or update, the **system operator** must amend the **system security forecast**, **publish** it and provide it to the **Authority**.

Compare: Electricity Governance Rules 2003 rule 15 section II part C

Clause 8.15(1): substituted, on 21 September 2012, by clause 8 of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

Clause 8.15(1A): inserted, on 21 September 2012, by clause 8 of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

Clause 8.15(1A)(b): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 8.15(1A)(b): amended, on 5 October 2017, by clause 89 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Subpart 2—Asset owner performance obligations and technical standards

**8.16 Contents of this subpart**

This subpart provides for—

- (a) the establishment of performance obligations and technical standards for **asset owners** to assist the **system operator** in complying with the **principal performance obligations**; and
- (b) **asset owners** to obtain an assessment of their **assets** from the **system operator**; and
- (c) a process for the **system operator** to approve applications for **equivalence arrangements** and **dispensations** (if necessary).

Compare: Electricity Governance Rules 2003 rule 1 section III part C

*Asset owner performance obligations and technical standards concerning frequency*

**8.17 Contribution by injections to overall frequency management**

Each **generator** (while **synchronised**) and the **HVDC owner** must at all times ensure that its **assets**, other than any **generating units** within an **excluded generating station**, make the maximum possible **injection** contribution to maintain frequency within the **normal band** (and to restore frequency to the **normal band**). Any such contribution must be assessed against the **technical codes**.

Compare: Electricity Governance Rules 2003 rule 2.1 section III part C

**8.18 Contributions by purchasers to overall frequency management**

Each **purchaser** must limit the magnitude of any instantaneous change in the **offtake** of **electricity** and net rate of change in **offtake** to the levels the **system operator** reasonably requires. In setting those requirements, the **system operator** must have regard to the impact of the **offtake** on the **system operator's** ability to comply with the **principal performance obligations** concerning frequency (as set out in clause 7.2A to 7.2C) and the **dispatch objective**.

Compare: Electricity Governance Rules 2003 rule 2.2 section III part C

Clause 8.18: amended, on 19 May 2016, by clause 21 of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

**8.19 Contributions to frequency support in under-frequency events**

- (1) Subject to subclause (3), each **generator** must at all times ensure that, while **electrically connected**, its **assets**, other than any **excluded generating stations**, contribute to supporting frequency by remaining **synchronised**, ensuring that each of its **generating units** can and does, at a minimum, sustain pre-event output—
  - (a) at all times when the frequency is above 47.5 Hertz; and
  - (b) for at least 120 seconds when the frequency is 47.5 Hertz; and
  - (c) for at least 20 seconds when the frequency is 47.3 Hertz; and
  - (d) for at least 5 seconds when the frequency is 47.1 Hertz; and
  - (e) for at least 0.1 seconds when the frequency is 47.0 Hertz; and
  - (f) at any frequencies between those specified in paragraphs (b) to (e) for times derived by linear interpolation.
- (2) If the **inherent characteristics** and design of a **generator's generating unit** are such that it is reasonably able to operate beyond the above requirements, the **generator** must declare such capabilities in accordance with clause 2(5) of **Technical Code A** of Schedule 8.3.
- (3) Each South Island **generator** must ensure that each of its **assets**, other than **excluded generating units**, remains **synchronised**, and can and do, at a minimum, sustain pre-event output—
  - (a) at all times when the frequency is above 47 Hertz; and
  - (b) for 30 seconds if the frequency falls below 47 Hertz but not below 45 Hertz.
- (4) The **HVDC owner** must at all times ensure that, while **electrically connected**, its **assets** contribute to supporting frequency during an **under-frequency event** in either **island**

by—

- (a) remaining **electrically connected** to those **assets** making up the **grid** in the North Island and South Island while the frequency in both **islands** remains above 48 Hertz; and
  - (b) remaining **electrically connected** to those **assets** making up the **grid** in the North Island and South Island while the frequency in both **islands** remains below 48 Hertz and above 47 Hertz for 90 seconds; and
  - (c) remaining **electrically connected** to those **assets** making up the **grid** in the North Island and South Island while the frequency in both **islands** remains above 45 Hertz for 35 seconds, unless the frequency in either **island** is less than 46.5 Hertz and the frequency is falling at a rate of 7 Hertz per second or greater; and
  - (d) subject to the level of transfer and the **HVDC link configuration** at the beginning of the **under-frequency event**, if the **HVDC link** itself is not the cause of the **under-frequency event**, modifying the instantaneous transfer on the **HVDC link** by up to 250 MW with the objective of limiting the difference between the North Island and South Island frequencies to no greater than 0.2 Hertz.
- (5) Each North Island **connected asset owner** and each South Island **grid owner** must ensure that it has established and maintained **automatic under-frequency load shedding** in block sizes and with relay settings in accordance with the **technical codes**.

Compare: Electricity Governance Rules 2003 rule 2.3 section III part C

Clause 8.19(5): substituted, on 7 August 2014, by clause 7 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 8.19(1) and (4): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 8.19(1) and (4): amended, on 5 October 2017, by clause 90 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.19(5): amended, on 21 December 2021, by clause 10 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

Clause 8.19(4)(d): amended, on 1 March 2024, by clause 27 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

## 8.20 Contributions by grid owners to frequency support

Each **grid owner** must ensure that its **assets** are capable of being operated, and operate, within the frequency targets set out in clause 7.2A.

Compare: Electricity Governance Rules 2003 rule 2.4 section III part C

Clause 8.20: amended, on 19 May 2016, by clause 22 of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

## 8.21 Excluded generating stations

- (1) For the purposes of clauses 8.17, 8.19, 8.25D, and the provisions in **Technical Code A** of Schedule 8.3 relating to the obligations of **asset owners** in respect of frequency, an **excluded generating station** means a **generating station** that exports less than 30 MW to a **local network** or the **grid**, unless the **Authority** has issued a direction under clause 8.38 that the **generating station** must comply with clauses 8.17, 8.19, 8.25A, and 8.25B and the relevant provisions in **Technical Code A** of Schedule 8.3.
- (2) Whether likely to be an **excluded generation station** or not, a **generator** who is planning to connect to the **grid** or a **local network** a **generating unit** with rated net maximum capacity equal to or greater than 1 MW must provide the **system operator** with written advice of its intention to connect together with other information relating to

that **generating unit** in accordance with clause 8.25(4).

Compare: Electricity Governance Rules 2003 rules 2.5 and 2.6 section III part C

Clause 8.21(1): amended, on 24 November 2016, by clause 5(1) and (2) of the Electricity Industry Participation Code Amendment (Generation Fault Ride Through) 2016.

Clause 8.21(2): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 8.21(2): amended, on 5 October 2017, by clause 91 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

*Asset owner performance obligations and technical standards concerning voltage*

**8.22 Voltage range AOPOs**

- (1) Each **grid owner** must ensure that its **assets** at and in between—
- (a) the **high voltage terminals** of the **grid owner's** transformers at each **grid injection point** and **grid exit point**; or
  - (b) if no transformer exists, the relevant **grid injection point** or **grid exit point**—
- are capable of being operated within the following range of voltages:

Nominal <b>grid</b> voltage (kV)	Voltage limits			
	Minimum (kV)		Maximum (kV)	
220	198	-10.0%	242	10.0%
110	99	-10.0%	121	10.0%
66	62.7	-5.0%	69.3	5.0%
50	47.5	-5.0%	52.5	5.0%

- (2) Each **generator** with a **point of connection** to the **grid** must at all times ensure that its **assets** are capable of being operated, and do operate, when the **grid** is operated within the range of voltages set out in subclause (1).
- (3) Each **connected asset owner** must ensure that its **local network** is capable of being operated, and does operate, when the **grid** is operated over the range of voltages set out in subclause (1).

Compare: Electricity Governance Rules 2003 rule 3.1 section III part C

Clause 8.22(3): amended, on 1 February 2016, by clause 8 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

**8.23 Voltage support AOPOs**

Each **generator** with a **point of connection** to the **grid** must at all times ensure that its **assets**—

- (a) when the voltage at its **grid injection point** is within the applicable range of nominal voltage, are capable of exporting (over excited) when **synchronised** and made available for **dispatch** by the **system operator**, a minimum net **reactive power** which is 50% of the maximum continuous **MW** output power as measured at the following **generating unit** terminals:

Nominal <b>grid</b> voltage (kV)	Voltage range for which <b>reactive power</b> is required			
	Minimum (kV)		Maximum (kV)	
220	198	-10.0%	242	10.0%
110	99	-10.0%	121	10.0%
66	62.7	-5.0%	69.3	5.0%
50	47.5	-5.0%	52.5	5.0%
33	31.35	-5.0%	34.65	5.0%
22	21.45	-2.5%	22.55	2.5%
11	10.725	-2.5%	11.275	2.5%

- (b) when the voltage at its **grid injection point** is within the applicable range of nominal voltage, are capable of importing (under excited) when **synchronised** and made available for **dispatch** by the **system operator**, a minimum net **reactive power** which is 33% of the maximum continuous **MW** output power as measured at the **generating unit** terminals as set out below:

Nominal <b>grid</b> voltage (kV)	Voltage range for which <b>reactive power</b> is required			
	Minimum (kV)		Maximum (kV)	
220	209	-5.0%	242	10.0%
110	104.5	-5.0%	121	10.0%
66	62.7	-5.0%	69.3	5.0%
50	47.5	-5.0%	52.5	5.0%
33	31.35	-5.0%	34.65	5.0%
22	21.45	-2.5%	22.55	2.5%
11	10.725	-2.5%	11.275	2.5%

- (c) when **synchronised**, continuously operate in a manner that supports voltage and voltage stability on the **grid** in compliance with the **technical codes**.

Compare: Electricity Governance Rules 2003 rule 3.2 section III part C  
Clause 8.23: amended, on 21 September 2012, by clause 9 of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

#### 8.24 Load shedding obligations to support voltage

- (1) If it is not possible for a **connected asset owner** to comply with subclause (2), the **grid owner** must, if possible, establish load shedding in block sizes and at voltage levels (and, if automatic systems are established, with relay settings) set out in the **technical codes** or otherwise as the **system operator** reasonably requires.
- (2) In order to prevent the collapse of the **network** voltage, each **connected asset owner** must ensure that, if possible, it has established load shedding in block sizes and at voltage levels (and, if automatic systems are established, with relay settings) in accordance with the **technical codes** or otherwise as the **system operator** reasonably requires.

Compare: Electricity Governance Rules 2003 rule 3.3 section III part C

Clause 8.24(1): amended, on 1 February 2016, by clause 9 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 8.24(2): amended, on 1 May 2016, by clause 4 of the Electricity Industry Participation Code Amendment (Minor Code Amendments) 2016.

### 8.25 Other asset owner performance obligations and technical standards

- (1) Each **grid owner** must ensure that the design and configuration of its **assets** (including its connections to other persons) and associated protection arrangements are consistent with the **technical codes** and, in the reasonable opinion of the **system operator**, with maintaining the **system operator's** ability to comply with the **principal performance obligations**. In reaching this opinion, the **system operator** must have regard to the potential impact of the design or configuration of those **assets** or associated protection arrangements on its compliance with the **principal performance obligations** and achievement of the **dispatch objective**.
- (2) Each **grid owner** and each **connected asset owner** must use reasonable endeavours to ensure that a **generator** who meets the following criteria provides the **system operator** with written advice of the existence of its **generating unit** and the **generator's** name and address:
  - (a) the **generator** is directly connected to the **grid owner's grid** or directly or indirectly connected to the **local network** (as the case may be):
  - (b) the **generator** has a **generating unit** with a rated net maximum capacity equal to or greater than 1 **MW**.
- (3) Each **asset owner** and each **purchaser** must provide communication facilities that comply with the **technical codes** or otherwise, as the **system operator** reasonably requires, which must assist the **system operator** in planning to comply, and complying, with its **principal performance obligations** and achieving the **dispatch objective**.
- (4) Each **asset owner** and each **purchaser** must provide information that complies with the **technical codes** or otherwise as the **system operator** reasonably requests, to assist the **system operator** in planning to comply, and complying, with its **principal performance obligations** and achieving the **dispatch objective**.
- (5) If the **system operator** reasonably considers it necessary to assist the **system operator** in planning to comply, and complying, with the **principal performance obligations** and achieving the **dispatch objective**, the **system operator**—
  - (a) may require that an **embedded generator** provide information regarding the intended output of each **embedded generating station** greater than 10 **MW** in capacity, that must be either—
    - (i) submitted as an **offer** in accordance with subpart 1 of Part 13; or
    - (ii) provided in a form and manner agreed between the **system operator** and the **embedded generator**; and
  - (b) must advise the **embedded generator** of its requirement at least 20 **business days** in advance of the requirement coming into effect.
- (6) If the **system operator** reasonably considers it necessary to assist it in planning to comply, and complying, with the **principal performance obligations** and achieving the **dispatch objective**, the **system operator** may apply to the **Authority** to require an **embedded generator** to provide information regarding the intended output of a group of **embedded generating stations** that total greater than 10 **MW** in capacity and that

are connected to the same **grid exit point**. If the **Authority** approves the **system operator's** request, the information must be provided to the **system operator** by the relevant **embedded generator** in a form and manner determined by the **Authority**.

Compare: Electricity Governance Rules 2003 rule 4.1 to 4.6 section III part C

Clause 8.25(1), (2) and (6): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 8.25(1), (2) and (6): amended, on 5 October 2017, by clause 92(1) and (2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.25(2): amended, on 1 February 2016, by clause 10 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 8.25(2): amended, on 20 December 2021, by clause 10 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 8.25(5)(b): amended, on 5 October 2017, by clause 92(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.25(5)(b): amended, on 1 November 2018, by clause 11 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

### 8.25A Fault ride through

- (1) Each **generator** must ensure that each of its **assets**, when **electrically connected** to a **network**, is capable of remaining stable and **electrically connected** when the **grid's** lowest **line-to-line** voltage is within the no-trip zone shaded and marked "No-trip zone" in Figure 8.1 (for an **asset** in the North Island) or Figure 8.2 (for an **asset** in the South Island) for the period of 6 seconds immediately following the commencement of a zero impedance three-phase short circuit fault, or an unbalanced short circuit fault, on any part of the **grid** at 110 kV or 220 kV in the **island** in which the **asset** is connected.
- (2) Each **generator** must ensure that each of its **assets**, when **electrically connected** to a **network**, is capable of remaining stable and **electrically connected** when the highest **line-to-line** voltage at Haywards 220 kV bus (for an **asset** in the North Island) or Benmore 220 kV bus (for an **asset** in the South Island) is within the no-trip zone shaded and marked "No-trip zone" in Figure 8.3 for the period of 1 second immediately following the commencement of a trip of the **HVDC link**.
- (3) Whether a **generator** is complying with subclause (2) must be determined using power system analysis that uses—
  - (a) study cases provided by the relevant **grid owner**; and
  - (b) relevant system assumptions provided by the **system operator**.
- (4) A **generator** is not required to comply with subclause (1) in respect of an **asset** in the event of a fault of a type described in subclause (1) if the **asset** becomes isolated from the **grid** as a result of the fault.
- (5) A **generating unit** need not comply with subclause (1) to the extent that it is complying with a **special protection scheme** approved by the **system operator**.
- (6) The absolute **grid** voltage (per unit) shown on the Y axis of Figure 8.1 and Figure 8.2 is the ratio of **grid** lowest **line-to-line** voltage on a **line** to the nominal operating voltage of the **line** (that is, 110 kV or 220 kV).

**Figure 8.1: North Island no-trip zone during 110 kV or 220 kV faults**

Figure 8.2: South Island no-trip zone during 110 kV or 220 kV faults

Figure 8.3: Haywards and Benmore no-trip zone during permanent loss of the HVDC link

Clause 8.25A Figure 8.1, Figure 8.2 and Figure 8.3: inserted, on 24 November 2016, by clause 6 of the Electricity Industry Participation Code Amendment (Generation Fault Ride Through) 2016.

Clause 8.25A(1): amended, on 5 October 2017, by clause 93(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.25A(2): amended, on 5 October 2017, by clause 93(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 8.25B Reactive current and active power output

- (1) Each **generator** must ensure that each of its **generating units** generates **reactive current** to oppose the change in its terminal voltage without exceeding the maximum transient **reactive current** specified in the **generator's asset capability statement** for the period of 6 seconds immediately following the commencement of a fault on the **grid** of a type described in clause 8.25A(1).
- (2) Each **generator** must ensure that each of its **generating units** provides **active power** output relative to pre-fault **active power** output at least in proportion to the **grid** voltage at the **grid injection point** for the period of 6 seconds immediately following the clearance of a fault on the **grid** of a type described in clause 8.25A(1).
- (3) Subclause (2) does not apply to a **wind generating station** if there has been a reduction in the intermittent wind power source during the 6 seconds following the commencement of the fault.

Clause 8.25B: inserted, on 24 November 2016, by clause 6 of the Electricity Industry Participation Code Amendment (Generation Fault Ride Through) 2016.

### 8.25C Use of additional equipment

A **generator** may comply with clause 8.25A in relation to a **generating station** by—

- (a) ensuring that the performance of **generating units** that comprise the **generating station** comply; or

- (b) installing additional equipment within the **generating station**; or
- (c) a combination of the methods described in paragraphs (a) and (b).

Clause 8.25C: inserted, on 24 November 2016, by clause 6 of the Electricity Industry Participation Code Amendment (Generation Fault Ride Through) 2016.

### 8.25D Application

Clauses 8.25A and 8.25B do not apply—

- (a) to a **wind generating station** when it operates at less than 5% of rated **MW**; or
- (b) to any **asset** at an **excluded generating station**.

Clause 8.25D: inserted, on 24 November 2016, by clause 6 of the Electricity Industry Participation Code Amendment (Generation Fault Ride Through) 2016.

### 8.26 Asset owners must co-operate

Each **asset owner** and each **purchaser** must co-operate with the **system operator** as may reasonably be required by the **system operator** in carrying out its functions.

Compare: Electricity Governance Rules 2003 rule 4.7 section III part C

## *Compliance*

### 8.27 System operator to monitor compliance

- (1) To the extent possible, given the information made available by **asset owners**, the **system operator** must monitor, in the manner set out in the **policy statement**, the ongoing compliance of **asset owners** with the **asset owner performance obligations** and the **technical codes**. To avoid doubt, the **system operator** has no monitoring obligations under this subpart other than those set out in the **policy statement**.
- (2) The **system operator** has a discretion to not **dispatch** an **asset** or configuration of **assets**, if it is not satisfied that the **assets** or configuration of **assets** comply with the relevant **asset owner performance obligations** or provisions of the **technical codes**, or that the **asset owner** has and is complying with a valid **equivalence arrangement** or **dispensation** from the relevant **asset owner performance obligations** or provisions of the **technical codes**.
- (3) The **system operator** must immediately advise an **asset owner** if the **system operator** has reasonable grounds to believe that the **asset owner** is not complying with an **asset owner performance obligation**, **equivalence arrangement** or **dispensation**, and that the **asset owner**—
  - (a) does not have a valid **equivalence arrangement** or **dispensation** from the relevant **asset owner performance obligations** or provisions of the **technical codes**: or
  - (b) is not complying with a valid **equivalence arrangement** or **dispensation** from the relevant **asset owner performance obligations** or provisions of the **technical codes**.

Compare: Electricity Governance Rules 2003 rule 5 section III part C

Clause 8.27(2): amended, on 19 May 2016, by clause 23 of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

### 8.28 Responsibility for compliance

- (1) Each **asset owner** must comply with the **asset owner performance obligations** and **technical codes** at all times and must satisfy the **system operator**, whenever requested by the **system operator** acting reasonably, that each of its **assets** or configuration of **assets** complies with the **asset owner performance obligations** and **technical codes** that apply to that **asset** or configuration of **assets**.
- (2) If the **system operator** advises an **asset owner** under clause 8.27(3), the **asset owner** must co-operate with the **system operator** and use reasonable endeavours to restore compliance as soon as practicable.
- (3) During a period of **commissioning** or testing of **assets**, the **asset owner performance obligations** and **technical codes** do not apply to the **asset owner** in respect of the **assets**, if—
  - (a) the obligations that do not apply to the **asset owner** are specified in the agreed **commissioning** plan or testing plan; and
  - (b) during the period of non-compliance the **asset owner** complies with a **commissioning** plan or testing plan (as appropriate) agreed with the **system operator**; and
  - (c) the period of non-compliance is no longer than the agreed **commissioning** plan or testing plan; and
  - (d) subject to subclause (4), if an **asset owner** during a period of non-compliance meets the requirements of paragraphs (a) to (c), neither the **asset owner** nor the **system operator** is liable under this Code in relation to the non-compliance, except that the **asset owner** is not relieved of liability in the case of a negligent act or omission by the **asset owner**.
- (4) During any period of non-compliance, the non-compliant **asset owner** must pay the readily identifiable and quantifiable costs associated with its non-compliance, including the costs of the **system operator** purchasing additional **ancillary services** required as a consequence of its non-compliance.

Compare: Electricity Governance Rules 2003 rule 6 section III part C

Clause 8.28(2): amended, on 1 November 2018, by clause 12 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018

Clause 8.28(3): amended, on 5 October 2017, by clause 94 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### *Equivalence arrangements and dispensations*

### 8.29 Right to apply for approval of equivalence arrangement or grant of dispensation

- (1) Subject to subclause (2), if an **asset owner** cannot comply with an **AOPO** or a **technical code** obligation in respect of a particular **asset** or configuration of **assets**, being an existing, new or proposed **asset**, the **asset owner** may apply for an **equivalence arrangement** to be approved or **dispensation** to be granted in accordance with Schedule 8.1.
- (2) The **system operator** may not grant a dispensation in relation to an obligation to provide **automatic under-frequency load shedding** under clause 8.19(5) or Schedule 8.3, Technical Code B, clause 7.

Compare: Electricity Governance Rules 2003 rule 7.1 section III part C  
Clause 8.29(1): amended, on 7 August 2014, by clause 8(1) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.  
Clause 8.29(2): inserted, on 7 August 2014, by clause 8(2) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.  
Clause 8.29(2): amended, on 21 December 2021, by clause 11 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

### 8.30 Approval of equivalence arrangements

The **system operator** must approve an **equivalence arrangement** if it has received satisfactory evidence that the **asset owner** will put in place on the agreed date technical or commercial arrangements that will, in the reasonable opinion of the **system operator**, achieve compliance with the **AOPO** or **technical code** for which the **equivalence arrangement** is sought, even if the **assets** or configuration of **assets** do not strictly comply.

Compare: Electricity Governance Rules 2003 rule 7.2 section III part C

### 8.31 Grant of dispensations

- (1) Subject to subclause (1A), the **system operator** must grant a **dispensation** to an **asset owner** who has or will have **assets** or a configuration of **assets** that do not comply with either an **AOPO** or **technical code** if the **system operator** has a reasonable expectation that it can continue to operate the existing system and meet its **principal performance obligations** and if the **system operator** can readily quantify the costs on other persons of that **dispensation**, despite the non-compliance of the **assets**, but—
- (a) if the approval of a **dispensation** could impose readily identifiable and quantifiable costs on other persons, a condition of the **dispensation** must be that the **asset owner** is liable to pay the **system operator** for those costs, including the costs of the **system operator** purchasing any other **ancillary services** required as a consequence of its **dispensation**; and
  - (b) the **asset owner** must acknowledge that the granting of a **dispensation** does not guarantee that the **system operator** will **dispatch** that **asset** for which the **dispensation** was granted, as **dispatch** will only occur in accordance with the **dispatch objective**; and
  - (c) if the **dispensation** is a **generating unit dispensation** from clause 8.19(1) or (3), the **generator** must be allocated the following costs in a relevant **trading period** with respect to paragraph (a) for each of **fast instantaneous reserves** or **sustained instantaneous reserves**:

$$\text{DispCost}_{\text{GEN}_{xt}} = 0.5 * Q_{\text{GEN}_{xt}} * P_{\text{IR}t}$$

where

**DispCost**<sub>GEN<sub>xt</sub></sub> is the cost payable by a **generator** for **generating unit x** in any **trading period t** in which a class of **instantaneous reserves** is procured as a direct result of that **generating unit's dispensation** to ensure that the frequency does not fall below 47 Hertz or, in the South Island, below the **minimum South Island frequency**

- Q<sub>GENxt</sub>** is the **MW** amount by which **generating unit x** is unable to sustain pre-event output in **trading period t** with reference to clause 8.19(1) or (3) (as the case may be) as determined from the capabilities specified in that **generating unit's dispensation** (different amounts may be specified with respect to each class of **instantaneous reserves**)
- P<sub>IRt</sub>** is the **final reserve price** for **fast instantaneous reserves** or **sustained instantaneous reserves** (as the case may be) in **trading period t** in the relevant **island**.

- (1A) If the **system operator** grants a **dispensation** from clause 8.25A or clause 8.25B to an **asset owner** under subclause (1), and the granting of the **dispensation** could impose readily identifiable and quantifiable costs on any other person, the **system operator** must not impose a condition on the **asset owner** in accordance with subclause (1)(a) that has effect earlier than 24 November 2018.
- (2) The **system operator** may impose other reasonable conditions on the grant of a **dispensation** under subclause (1), including conditions as to duration of the **dispensation**.

Compare: Electricity Governance Rules 2003 rules 7.3 and 7.4 section III part C

Clause 8.31(1): amended, on 15 May 2014, by clause 7 of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

Clause 8.31(1): amended, on 24 November 2016, by clause 7(1) of the Electricity Industry Participation Code Amendment (Generation Fault Ride Through) 2016.

Clause 8.31(1)(c): amended, on 19 May 2016, by clause 24 of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 8.31(1A): inserted, on 24 November 2016, by clause 7(2) of the Electricity Industry Participation Code Amendment (Generation Fault Ride Through) 2016.

### 8.32 Liability of asset owner pending decision

Pending determination of an **asset owner's** application for a **dispensation** or an **equivalence arrangement**, if the **asset** does not comply with the **AOPOs** or the **technical codes**, the **asset owner** is liable for the non-compliance and is responsible for additional costs incurred by the **system operator** or **asset owners** as a result of the non-compliance, including the costs of the **system operator** purchasing other **ancillary services** as a consequence of the non-compliance.

Compare: Electricity Governance Rules 2003 rule 8 section III part C

Clause 8.32: amended, on 15 May 2014, by clause 8 of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

### 8.33 Modification of equivalence arrangement or dispensation

An **asset owner** may apply to the **system operator** for a modification to an **equivalence arrangement** or **dispensation**, in which case clauses 8.34 to 8.36 and Schedule 8.1 apply.

Compare: Electricity Governance Rules 2003 rule 8.1 section III part C

### 8.34 Cancellation of equivalence arrangement or dispensation

- (1) An **asset owner** may at any time give written notice to the **system operator** for an

**equivalence arrangement** or a **dispensation** to be cancelled on the grounds that the **asset** or configuration of **assets** subject to the **equivalence arrangement** or **dispensation** complies with **APOOs** or **technical codes**.

- (2) A cancellation takes effect on the date specified in the notice as being the date the **system operator** accepted the cancellation.
- (3) The **system operator** must record the cancellation in the **system operator register** no later than 5 days after receiving the notice.

Compare: Electricity Governance Rules 2003 rule 8.2 section III part C

### 8.35 Revocation of equivalence arrangement and revocation or variation of dispensation

- (1) The **system operator** may revoke approval of an **equivalence arrangement** or revoke or vary the grant of a **dispensation** as the **system operator** reasonably considers appropriate if, at any time after the **system operator** has approved an **equivalence arrangement** or granted a **dispensation**, the **system operator** is satisfied that 1 or more of the following apply:
  - (a) the **dispensation** or **equivalence arrangement** was approved on information that was false or materially misleading;
  - (b) a prerequisite of the **dispensation** or **equivalence arrangement** has changed;
  - (c) a condition on which the **dispensation** or **equivalence arrangement** was approved has not been complied with;
  - (d) withdrawal is **provided** for under the terms of the **dispensation** granted;
  - (e) a change to this Code has occurred that affects the **dispensation** or **equivalence arrangement**;
  - (f) a decision has been reconsidered at the direction of the **Rulings Panel** under clause 8.36(4).
- (2) The **system operator** must not revoke or amend a **dispensation** or grant a further **dispensation** or revoke its approval of an **equivalence arrangement** under subclause (1), unless—
  - (a) the **asset owner** to whom the **dispensation** was granted, or for whom an **equivalence arrangement** was approved, and any other person who in the opinion of the **system operator** is likely to have an interest in the matter, is given reasonable notice of the **system operator's** intentions and a reasonable opportunity to make submissions to the **system operator** on the issue; and
  - (b) the **system operator** has had regard to the submissions.

Compare: Electricity Governance Rules 2003 rule 8.3 section III part C

### 8.36 Appeal against decisions

- (1) A **participant** may appeal a decision of the **system operator** in relation to an application for **dispensation** or **equivalence arrangements** on the grounds set out in subclause (3).
- (2) An appeal must be made to the **Rulings Panel** by giving written notice to the **Authority** specifying the grounds of appeal. A notice must be given no later than 10 **business days** after publication of the relevant decision in the **system operator register** under clause 8 of Schedule 8.1.

- (3) For the purposes of subclause (2), an appeal may be made on the grounds that—
  - (a) the **system operator** made an error of fact or failed to take into account all relevant information or took into account irrelevant information and such error, failure or irrelevancy was material to the decision; or
  - (b) the conditions imposed on the **dispensation** or **equivalence arrangement** are unjustifiably onerous, unnecessary or impose extra costs if appropriate alternatives exist.
- (4) The **Rulings Panel**, in determining an appeal, must approve the decision of the **system operator** or direct the **system operator** to reconsider the decision in full or by reference to specified matters.
- (5) Pending the outcome of an appeal, the decision of the **system operator** in relation to the grant of a **dispensation** or approval of an **equivalence arrangement** remains valid and may be relied upon by the relevant **asset owner**.

Compare: Electricity Governance Rules 2003 rule 8.4 section III part C  
Clause 8.36(1): amended, on 1 November 2018, by clause 13 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

### **8.37 Other provisions relating to equivalence arrangements and dispensations**

- (1) An **asset owner** who obtains approval for an **equivalence arrangement** must comply with its obligations under that arrangement.
- (1A) An **asset owner** who is granted a **dispensation** must comply with its obligations under that **dispensation**.
- (2) An **equivalence arrangement** and a **dispensation** are specific to an **asset owner**, and no approval of an **equivalence arrangement** or granting of a **dispensation** creates a precedent for the approval of other **equivalence arrangements** or **dispensations**.
- (3) The owner or operator of an **asset** or configuration of **assets** must advise the **system operator** if the owner or operator believes that it is in breach of a condition of its **dispensation** or **equivalence arrangement** or that the **asset** or configuration of **assets**, including any **equivalence arrangement**, does not, or is likely not to, comply with the **asset owner performance obligations** and **technical codes**.
- (4) If an **asset owner** fails to put in place, maintain and meet all requirements of an approved **equivalence arrangement** or **dispensation**, the **asset owner** is in breach of this Code.

Compare: Electricity Governance Rules 2003 rule 9 section III part C  
Clause 8.37(1A): inserted, on 15 May 2014, by clause 9 of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

### **8.38 Authority may require excluded generating stations to comply with certain clauses**

- (1) Despite clauses 8.17, 8.19, and 8.25D, the **system operator** may, at any time, apply to the **Authority** for the **Authority** to issue a directive that an **excluded generating station asset** must comply with clauses 8.17, 8.19, 8.25A, and 8.25B, and the provisions of the **technical codes** (or parts thereof).
- (2) The **Authority** must issue the directive referred to in subclause (1) if the **Authority** is satisfied that there is a **benefit to the public** in obtaining compliance.
- (3) If a directive is issued under subclause (2), the owner of the **excluded generating station asset** must comply with the directive with effect from the date specified in the

directive.

Compare: Electricity Governance Rules 2003 rule 10 section III part C

Clause 8.38(1): amended, on 24 November 2016, by clause 8(1) and (2) of the Electricity Industry Participation Code Amendment (Generation Fault Ride Through) 2016.

### Subpart 3—Arrangements concerning ancillary services

#### 8.39 Contents of this subpart

This subpart provides for—

- (a) a **procurement plan** that the **system operator** must use reasonable endeavours to implement and comply with; and
- (b) the review of the **procurement plan**; and
- (c) **alternative ancillary service arrangements**; and
- (d) how **ancillary services** are to be priced and measured; and
- (e) identifying the **allocable costs** for **ancillary services** and the regime by which those costs are allocated to affected parties.

Compare: Electricity Governance Rules 2003 rule 1 section IV part C

#### *Procurement plan*

#### 8.40 System operator to use reasonable endeavours to implement and comply with procurement plan

The **system operator** must use reasonable endeavours to both implement and comply with the **procurement plan**.

Compare: Electricity Governance Rules 2003 rule 2 section IV part C

#### 8.41 *[Revoked]*

Clause 8.41: revoked, on 10 January 2013, by clause 15 of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

#### 8.42 Incorporation of procurement plan by reference

- (1) The **procurement plan** is incorporated by reference in this Code.
- (2) Clauses 7.13 to 7.22 apply to any amendment or replacement of the **procurement plan**.

Compare: Electricity Governance Rules 2003 rule 3 section IV part C

Clause 8.42(1): amended, on 10 January 2013, by clause 16 of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.42(1): amended, on 1 August 2023, by clause 19(1) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 8.42(2): amended, on 1 August 2023, by clause 19(2) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 8.42(2): amended, on 1 March 2024, by clause 28 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

#### 8.42A *[Revoked]*

Clause 8.42A: inserted, on 10 January 2013, by clause 17 of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.42A(1): amended, on 5 October 2017, by clause 95 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.42A: revoked, on 1 August 2023, by clause 20 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

#### 8.42B *[Revoked]*

Clause 8.42B: inserted, on 10 January 2013, by clause 17 of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.42B: revoked, on 1 August 2023, by clause 21 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

#### 8.42C *[Revoked]*

Clause 8.42C: inserted, on 10 January 2013, by clause 17 of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.42C(3): amended, on 5 October 2017, by clause 96 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.42C: revoked, on 1 August 2023, by clause 22 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

### 8.43 Content of procurement plan

A **procurement plan** must, for each **ancillary service**—

- (a) specify the principles that the **system operator** must apply in making a **net purchase quantity assessment**, which must include—
  - (i) determining the requirements for complying with the **principal performance obligations**; and
  - (ii) determining the requirements for achieving the **dispatch objective**; and
  - (iii) assessing the contribution that compliance by **asset owners** with the **asset owner performance obligations** will make towards the **system operator's** compliance with the **principal performance obligations**; and
  - (iv) assessing the impact that **dispensations** and **alternative ancillary services arrangements** held by **asset owners** will have on the quantity of **ancillary services** required to enable the **system operator** to comply with the **principal performance obligations**; and
- (b) contain a methodology for conducting a **net purchase quantity assessment** for each relevant **ancillary service**; and
- (c) outline the process that the **system operator** must use to procure that **ancillary service**, taking into account that the **system operator** must use—
  - (i) market mechanisms to procure **ancillary services** wherever technology and transaction costs make this practicable and efficient; and
  - (ii) transparent processes that encourage all potential providers to compete to supply **ancillary services** required to meet **common quality** standards at the best economic cost; and
- (d) specify the **administrative costs** for that **ancillary service** as proposed in the **procurement plan**; and
- (e) outline the **system operator's** technical requirements and key contract terms to support the **procurement plan**; and
- (f) outline the rights and obligations of the **system operator** in relation to procurement of that **ancillary service** in circumstances not anticipated by the **procurement plan**, and if the assumptions made by the **system operator** in the **procurement plan** cannot be met; and
- (g) outline how the **system operator** will report on progress in implementing the **procurement plan**.

Compare: Electricity Governance Rules 2003 rule 4 section IV part C

Clause 8.43 Heading: amended, on 1 August 2023, by clause 23(1) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 8.43: substituted, on 10 January 2013, by clause 18 of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.43: amended, on 19 December 2014, by clause 9 of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.

Clause 8.43: amended, on 1 August 2023, by clause 23(2) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 8.43(d): amended, on 1 August 2023, by clause 23(3) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 8.43(f): amended, on 1 August 2023, by clause 23(4) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

#### **8.43A** *[Revoked]*

Clause 8.43A: inserted, on 10 January 2013, by clause 19 of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.43A(3)(b): amended, on 5 October 2017, by clause 97 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.43A: revoked, on 1 August 2023, by clause 24 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

#### **8.44** *[Revoked]*

Compare: Electricity Governance Rules 2003 rule 5 section IV part C

Clause 8.44: substituted, on 10 January 2013, by clause 20 of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.44(1), (4) and (6): amended, on 5 October 2017, by clause 98(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.44(2): amended, on 5 October 2017, by clause 98(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.44: revoked, on 1 August 2023, by clause 25 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

#### **8.44A** *[Revoked]*

Clause 8.44A: inserted, on 10 January 2013, by clause 21 of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.44A(4)(a) and (6): amended, on 5 October 2017, by clause 99 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.44A: revoked, on 1 August 2023, by clause 26 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023

#### **8.44B** *[Revoked]*

Clause 8.44B: inserted, on 10 January 2013, by clause 21 of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.44B(b): amended, on 5 October 2017, by clause 100 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.44B: revoked, on 1 August 2023, by clause 27 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023

#### **8.45 Contracts with ancillary service agents**

- (1) The **system operator** must use reasonable endeavours to implement the **procurement plan** for each **ancillary service** by entering into contracts with the **ancillary service agents** in the manner specified in the **procurement plan**.
- (2) The **system operator** is the principal in any contract it enters into with an **ancillary service agent**.
- (3) If the **system operator** has entered into a contract, the **system operator** must use reasonable endeavours to ensure that the **ancillary service agent** complies with its contractual obligations, but the **system operator** is not otherwise liable in respect of

any failure by an **ancillary service agent** to comply with such obligations.

Compare: Electricity Governance Rules 2003 rule 6 section IV part C

#### **8.45A Methodology to assess net purchase quantity**

The **system operator** must make the **net purchase quantity assessment** for each relevant **ancillary service** using the methodology in the **procurement plan** and **publish** the results of the assessment as soon as practicable.

Clause 8.45A: inserted, on 10 January 2013, by clause 22 of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.45A: amended, on 5 October 2017, by clause 101 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### **8.46 [Revoked]**

Compare: Electricity Governance Rules 2003 rule 7 section IV part C

Clause 8.46: revoked, on 10 January 2013, by clause 23 of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

#### **8.47 Departure from procurement plan**

- (1) The **system operator** may depart from the processes and arrangements set out in the **procurement plan** if the **system operator** reasonably considers it necessary to do so to comply with the **principal performance obligations**.
- (2) When the **system operator** makes a departure under subclause (1), the **system operator** must provide a report to the **Authority** setting out the circumstances of the departure and the actions taken to deal with it.
- (3) The **Authority** must **publish** the report within a reasonable time after receiving it.

Compare: Electricity Governance Rules 2003 rule 8 section IV part C

Clause 8.47(2): amended, on 10 January 2013, by clause 24(a) of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.47(3): inserted, on 10 January 2013, by clause 24(b) of the Electricity Industry Participation (Policy Statement and Procurement Plan Review Process) Code Amendment 2012.

Clause 8.47(3): amended, on 5 October 2017, by clause 102 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### *Alternative ancillary service arrangements*

#### **8.48 Alternative ancillary service arrangements**

- (1) If an **asset owner** wishes to have an **alternative ancillary service arrangement** authorised by the **system operator**, that **asset owner** (or, if more than 1 **asset owner** wishes to have an authorisation, those **asset owners** jointly) may apply to the **system operator** to have that arrangement authorised as an **alternative ancillary service arrangement** using the process set out in Schedule 8.2.
- (2) The **system operator** must authorise the arrangement as an **alternative ancillary service arrangement** if—
  - (a) the proposed arrangement complies with the technical requirements for that **ancillary service** as set out in the current **procurement plan**; and
  - (b) the implementation of the proposed arrangement will make the **ancillary service** available for **dispatch** by the **system operator** in substantially the same manner as if the **ancillary service** had been procured in accordance with the **procurement plan**.

- (3) As a condition of authorising an **alternative ancillary service arrangement** under subclause (2), the **system operator** may do 1 or more of the following:
- (a) require the **asset owner** to enter into arrangements with the **system operator** to ensure that the **system operator** can continue to meet the **principal performance obligations**;
  - (b) specify the date on which the **alternative ancillary service arrangement** commences;
  - (c) impose any other condition it reasonably believes is necessary, including conditions necessary for the **system operator** to meet its **principal performance obligations** and conditions necessary for the orderly reconciliation and settlement of **ancillary services**.

Compare: Electricity Governance Rules 2003 rules 9.1 to 9.3 section IV part C

#### **8.49 Suspension of alternative ancillary service arrangement**

- (1) An **asset owner** may at any time give written reasonable notice to the **system operator** of suspension of the **alternative ancillary service arrangement** for a period specified in the notice.
- (2) The **system operator** may suspend an **alternative ancillary service arrangement** in a **system security situation**.

Compare: Electricity Governance Rules 2003 rule 9.4 section IV part C

#### **8.50 Modification of alternative ancillary service arrangement**

An **asset owner** may apply to the **system operator** for a modification to an **alternative ancillary service arrangement** in which case clauses 8.51 to 8.53 and Schedule 8.2 apply.

Compare: Electricity Governance Rules 2003 rule 9.5 section IV part C

#### **8.51 Cancellation of alternative ancillary service arrangement**

An **asset owner** may at any time give reasonable notice in writing to the **system operator** of cancellation of the **alternative ancillary service arrangement**, which comes into effect on the date specified in the notice.

Compare: Electricity Governance Rules 2003 rule 9.6 section IV part C

#### **8.52 Revocation of alternative ancillary service arrangements**

- (1) The **system operator** may revoke authorisation of the **alternative ancillary service arrangement** as the **system operator** reasonably considers appropriate, if at any time after the **system operator** has authorised an **alternative ancillary service arrangement**, the **system operator** is satisfied that 1 or more of the following factors apply:
  - (a) the **alternative ancillary service arrangement** was authorised on information that was false or materially misleading;
  - (b) a prerequisite of the **alternative ancillary service arrangement** has changed;
  - (c) a condition upon which the authorisation was granted has not been complied with;
  - (d) such revocation is provided for under the terms of the authorisation.
- (2) Subject to clause 8.49(2), the **system operator** must not revoke or amend an

**alternative ancillary service arrangement** unless—

- (a) the person to whom the authorisation was granted and any other person who, in the opinion of the **system operator**, is likely to have an interest in the matter, is given reasonable notice of the **system operator's** intentions and a reasonable opportunity to make submissions to the **system operator**; and
- (b) the **system operator** has had regard to those submissions.

Compare: Electricity Governance Rules 2003 rule 9.7 section IV part C

### 8.53 Appeal of system operator decisions

- (1) An applicant may appeal any decision of the **system operator** in relation to any **alternative ancillary service arrangement**.
- (2) A **participant** may appeal any decision of the **system operator** in relation to an **alternative ancillary service arrangement** on the grounds set out in subclause (4).
- (3) An appeal must be commenced with the **Rulings Panel** by giving written notice to the **Authority**, specifying the grounds of appeal. A notice must be given within 10 **business days** of **publication** of the decision in the **system operator register** under clause 4 of Schedule 8.2.
- (4) For the purpose of subclause (2), an appeal may be made on the grounds that—
  - (a) the **system operator** made an error of fact, or failed to take properly into account all relevant information or took into account irrelevant information, and such error, failure or irrelevancy was material to the decision; or
  - (b) the conditions imposed on the **alternative ancillary service arrangement** are onerous, unnecessary or impose extra costs if appropriate alternatives exist.
- (5) The **Rulings Panel**, in determining an appeal, must either approve the decision of the **system operator** or direct the **system operator** to reconsider the decision in full or by reference to specified matters.
- (6) Pending the outcome of an appeal, the decision of the **system operator** in relation to the authorisation of an **alternative ancillary service arrangement** remains valid and can be acted upon by the relevant **asset owner**.

Compare: Electricity Governance Rules 2003 rule 9.8 section IV part C

### 8.54 Other provisions relating to alternative ancillary service arrangements

- (1) The **system operator** must monitor the performance of **alternative ancillary service arrangements** in accordance with the **procurement plan** and the monitoring regimes specified in the respective **alternative ancillary service arrangements**. If the **system operator** considers, on reasonable grounds, that an **alternative ancillary service arrangement** is not being, or likely not to be, complied with, the **system operator** must immediately advise the **asset owner**.
- (2) An **asset owner** who obtains an authorisation of an **alternative ancillary service arrangement** must comply with its obligations under the arrangement. If the **system operator** advises an **asset owner** under subclause (1), the **asset owner** must co-operate with the **system operator** and must immediately use reasonable endeavours to restore compliance as soon as possible.
- (3) An **asset owner** who holds an **alternative ancillary service arrangement** is relieved of

an obligation to pay costs for **ancillary service** in the manner provided for in clauses 8.55 to 8.59 and 8.64 to 8.70 to the extent provided for in the **alternative ancillary service arrangement**.

- (4) The holder of an **alternative ancillary service arrangement** breaches this Code if **ancillary services** are not made available to the **system operator** in accordance with the **alternative ancillary service arrangement**, or if an **alternative ancillary service arrangement** fails. From the date a breach of an **alternative ancillary service arrangement** becomes known, the holder of the **alternative ancillary service arrangement** must meet its share of the ancillary costs as if the **alternative ancillary service arrangement** had not been authorised.

Compare: Electricity Governance Rules 2003 rule 10 section IV part C

Clause 8.54(2): amended, on 1 November 2018, by clause 14 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

## Subpart 4—Interruptible load

Heading: inserted, on 7 August 2014, by clause 9 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

### 8.54A Contents of this subpart

This subpart provides for the provision of information relating to **interruptible load**.

Clause 8.54A: inserted, on 7 August 2014, by clause 9 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

### 8.54AA System operator to maintain and publish register

- (1) The **system operator** must maintain and **publish** an up to date copy of the **system operator register**.
- (2) The up to date copy of the **system operator register published** under subclause (1) must be available to the public at all times up until a new up to date copy is **published**.

Clause 8.54AA: inserted, on 20 December 2021, by clause 11 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

### 8.54B Ancillary service agents to provide information about interruptible load

- (1) Each **ancillary service agent** that contracts for **interruptible load** in a **network** must, within 10 **business days** of entering into the contract, give the following **participants** the information in subclause (2):
- (a) if the **interruptible load** is contracted on a **local network**, the **connected asset owner** that operates the **local network**;
  - (b) if the **interruptible load** is contracted on an **embedded network**, the **connected asset owner** that operates the **local network** to which the **embedded network** is **connected**;
  - (c) if the **interruptible load** is contracted on the **grid**, the **grid owner** that owns or operates the part of the **grid** on which the **interruptible load** is contracted.
- (2) The information required is—
- (a) a list of the **ICPs** to which the contract relates; and
  - (b) the maximum **MW** that can be interrupted under the contract; and
  - (c) the commencement and expiry dates of the contract.

- (3) If an **ancillary service agent** has given a **connected asset owner** or **grid owner** information under subclause (1), the **connected asset owner** or **grid owner** may require the **ancillary service agent** to provide further information about the **interruptible load** to which the contract relates.
- (4) An **ancillary service agent** must comply with a requirement under subclause (3).  
Clause 8.54B: inserted, on 7 August 2014, by clause 9 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.  
Clause 8.54B(1)(b): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.  
Clause 8.54B(1) and (3): amended, on 1 February 2016, by clause 11 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

### Subpart 5—*[Revoked]*

Heading: inserted, on 7 August 2014, by clause 9 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.  
Heading: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

#### 8.54C *[Revoked]*

Clause 8.54C: inserted, on 7 August 2014, by clause 9 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.  
Clause 8.54C: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

#### 8.54D *[Revoked]*

Clause 8.54D: inserted, on 7 August 2014, by clause 9 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.  
Clause 8.54D: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

#### 8.54E *[Revoked]*

Clause 8.54E: inserted, on 7 August 2014, by clause 9 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.  
Clause 8.54E(2): amended, on 19 December 2014, by clause 10 of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.  
Clause 8.54E: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

#### 8.54F *[Revoked]*

Clause 8.54F: inserted, on 7 August 2014, by clause 9 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.  
Clause 8.54F(3): amended, on 5 October 2017, by clause 103 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 8.54F: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

#### 8.54G *[Revoked]*

Clause 8.54G: inserted, on 7 August 2014, by clause 9 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.  
Clause 8.54G(3)(g): amended, on 5 October 2017, by clause 104(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 8.54G(3)(h): revoked, on 5 October 2017, by clause 104(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 8.54G(3A): inserted, on 5 October 2017, by clause 104(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.54G: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**8.54H** *[Revoked]*

Clause 8.54H: inserted, on 7 August 2014, by clause 9 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 8.54H: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**8.54I** *[Revoked]*

Clause 8.54I: inserted, on 7 August 2014, by clause 9 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 8.54I: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**8.54J** *[Revoked]*

Clause 8.54J: inserted, on 7 August 2014, by clause 9 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 8.54J(2): amended, on 19 December 2014, by clause 11 of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.

Clause 8.54J(12): inserted, on 19 January 2017, by clause 6 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2016.

Clause 8.54J: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**8.54K** *[Revoked]*

Clause 8.54K: inserted, on 7 August 2014, by clause 9 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 8.54K(1): amended, on 19 January 2017, by clause 7(1) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2016.

Clause 8.54K(2): replaced, on 19 January 2017, by clause 7(2) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2016.

Clause 8.54K: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**8.54L** *[Revoked]*

Clause 8.54L: inserted, on 7 August 2014, by clause 9 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 8.54L: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**8.54M** *[Revoked]*

Clause 8.54M: inserted, on 7 August 2014, by clause 9 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 8.54M: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**8.54N** *[Revoked]*

Clause 8.54N: inserted, on 7 August 2014, by clause 9 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 8.54N: amended, on 19 January 2017, by clause 8 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2016.

Clause 8.54N: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**8.54O** *[Revoked]*

Clause 8.54O: inserted, on 7 August 2014, by clause 9 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 8.54O(3)(c): amended, on 19 January 2017, by clause 9(1) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2016.

Clause 8.54O(5): inserted, on 19 January 2017, by clause 9(2) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2016.

Clause 8.54O: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

#### **8.54P** *[Revoked]*

Clause 8.54P: inserted, on 7 August 2014, by clause 9 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 8.54P: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

#### **8.54Q** *[Revoked]*

Clause 8.54Q: inserted, on 7 August 2014, by clause 9 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 8.54Q heading: amended, on 19 December 2014, by clause 12(1) of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.

Clause 8.54Q heading: amended, on 19 January 2017, by clause 10(1) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2016.

Clause 8.54Q heading: amended, on 5 October 2017, by clause 105(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.54Q(1) and (2)(b): amended, on 19 December 2014, by clause 12(2) of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.

Clause 8.54Q(1) and (2)(b): amended, on 19 January 2017, by clause 10(2) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2016.

Clause 8.54Q(1) and (2)(b): amended, on 5 October 2017, by clause 105(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.54Q: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

#### **8.54R** *[Revoked]*

Clause 8.54R: inserted, on 7 August 2014, by clause 9 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 8.54R heading: amended, on 19 December 2014, by clause 13 of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.

Clause 8.54R: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

#### **8.54S** *[Revoked]*

Clause 8.54S: inserted, on 7 August 2014, by clause 9 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 8.54S Heading: amended, on 1 February 2016, by clause 12(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 8.54S(1) & (2): amended, on 1 February 2016, by clause 12(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 8.54S: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

#### **8.54T** *[Revoked]*

Clause 8.54T: inserted, on 7 August 2014, by clause 9 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 8.54T(4): amended, on 19 December 2014, by clause 14 of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.

Clause 8.54T(4): amended, on 5 October 2017, by clause 106 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.54T: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**8.54TA [Revoked]**

Clause 8.54TA: inserted, on 19 January 2017, by clause 11 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2016.

Clause 8.54TA: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**8.54TB [Revoked]**

Clause 8.54TB: inserted, on 19 January 2017, by clause 11 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2016.

Clause 8.54TB: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**8.54TC [Revoked]**

Clause 8.54TC: inserted, on 19 January 2017, by clause 11 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2016.

Clause 8.54TC: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**8.54TD [Revoked]**

Clause 8.54TD: inserted, on 19 January 2017, by clause 11 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2016.

Clause 8.54TD: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**8.54TE [Revoked]**

Clause 8.54TE: inserted, on 5 October 2017, by clause 107 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.54TE: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**8.54TF [Revoked]**

Clause 8.54TF: inserted, on 5 October 2017, by clause 107 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.54TF: revoked, on 21 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

## Subpart 6—Allocating costs

Heading: inserted, on 24 March 2015, by clause 10 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

**8.54U Contents of this subpart**

This subpart provides for the allocation of costs relating to **ancillary services**.

Clause 8.54U: inserted, on 24 March 2015, by clause 10 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 8.54U: amended, on 21 December 2021, by clause 13 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

### *Allocating costs for ancillary services*

Cross heading: amended, on 24 March 2015, by clause 11 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Cross heading: amended, on 21 December 2021, by clause 14 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**8.55 Identifying costs associated with ancillary services**

(1) The **allocable costs** for each **ancillary service** are—

- (a) the actual amounts that the **ancillary service agents** are entitled to receive for that **ancillary service** under contracts entered into by the **system operator** in implementing the **procurement plan**; plus
- (b) the actual **administrative costs** of the **system operator** (as approved by the **Authority**) incurred in administering the **procurement plan** in respect of that **ancillary service**; less
- (c) any readily identifiable and quantifiable costs to be paid by **asset owners** in respect of that **ancillary service** as a condition of any **dispensations** stipulated in accordance with clause 8.31(1)(a); less
- (d) any identifiable costs to be paid by any person in respect of that **ancillary service**, as a condition of any agreement reached by the **system operator**, in accordance with clause 8.6.

(2) *[Revoked]*

Compare: Electricity Governance Rules 2003 rule 11.1 section IV part C

Clause 8.55 heading: amended, on 24 March 2015, by clause 12(1) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 8.55 heading: amended, on 21 December 2021, by clause 15(1) of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

Clause 8.55(2): inserted, on 24 March 2015, by clause 12(2) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 8.55(2): revoked, on 21 December 2021, by clause 15(2) of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

### 8.56 Black start costs allocated to grid owner

The **allocable cost** of **black start** must be paid by the **registered participants** who are **grid owners** to the **system operator** in accordance with the process described in clause 8.68. If there are multiple **grid owners**, those costs must be allocated between them in proportion to their respective ODV valuations.

Compare: Electricity Governance Rules 2003 rule 11.2 section IV part C

### 8.57 Over frequency reserve costs allocated to HVDC owner

The **allocable cost** of **over frequency reserve** must be paid by the **HVDC owner** to the **system operator** in accordance with the process described in clause 8.68.

Compare: Electricity Governance Rules 2003 rule 11.3 section IV part C

### 8.58 Frequency keeping costs are allocated to purchasers

The **allocable cost** of **frequency keeping** must be paid by **purchasers** to the **system operator** in accordance with the process in clause 8.68. Those costs must be calculated in accordance with the following formula:

$$\text{Share}_{\text{PURx}} = \frac{F_c * \max(0, \sum_t (\text{Offtake}_{\text{PURxt}} - E_{\text{PURxt}}^{\text{FK}}))}{\sum_x \max(0, \sum_t (\text{Offtake}_{\text{PURxt}} - E_{\text{PURxt}}^{\text{FK}}))}$$

where

$\text{Share}_{\text{PURx}}$  is **purchaser x's share of allocable cost** in relation to **frequency keeping**

$F_c$  is the **allocable cost of frequency keeping services** in the **billing period**

$Offtake_{PURxt}$  is the total **reconciled quantity** in **kWh** for **purchaser x** across all **grid exit points** in **trading period t** in the **billing period**

$E_{PURxt}^{FK}$  is the quantity of any **frequency keeping** provided under any **alternative ancillary service arrangement** for **frequency keeping** authorised by the **system operator** for **purchaser x** in **trading period t**.

Compare: Electricity Governance Rules 2003 rule 11.4 section IV part C

### 8.59 Availability costs allocated to generators and HVDC owner

The **availability costs** in a **billing period** must be allocated separately to persons in the North Island and South Island in accordance with the following formula:

$$Share_t = \frac{Ac_t * m_t}{M_t}$$

where

$Share_t$  is the **availability cost** allocated to a **generator** who owns **generating unit x** or to the **HVDC link** for **trading period t** for the North Island or South Island as appropriate

$Ac_t$  is the **availability cost** for the North Island or South Island as appropriate incurred in respect of **trading period t**

$m_t$   $\left\{ \begin{array}{l} \text{is } \max(0, INJ_{GENxt} - (h * INJ_D) - E_{GENxt}^{IR}) = m_{xt} \text{ for any } \mathbf{generating\ unit} \\ \text{is } \max(0, HVDC_{Riskt} - (h * INJ_D) - E_{HVDCt}^{IR}) = m_{ht} \text{ for the } \mathbf{HVDC\ link} \end{array} \right.$

$M_t$  is  $\sum_x m_{xt} + m_{ht}$

$h$  is **0.5 MWh/MW**

$INJ_{GENxt}$  is the **electricity injected** (expressed in **MWh**) by **generating unit x** in **trading period t** into the North Island or South Island as appropriate

$E_{GENxt}^{IR}$  is the quantity of any **instantaneous reserve** provided under any **alternative ancillary service arrangements** for **instantaneous reserve** authorised by the **system operator** for **generating unit x** in **trading period t**

$HVDC_{Riskt}$  is the **at risk HVDC transfer** (expressed in **MWh**) in **trading period t** into the North Island or South Island as appropriate

$E_{HVDCt}^{IR}$  is the quantity of any **instantaneous reserve** provided under any **alternative ancillary service arrangement** for **instantaneous reserve** authorised by the **system operator** for **at risk HVDC transfer** in **trading period t**

$INJ_D$  is **60 MW**.

Compare: Electricity Governance Rules 2003 rule 11.5.1 section IV part C

#### **8.60 System operator must investigate causer of under-frequency event**

- (1) The **system operator** must promptly advise the **Authority**, every **generator**, **grid owner** and any other **participant** substantially affected by an **under-frequency event**, that an **under-frequency event** has occurred.
- (2) The **system operator** may, by notice in writing to a **participant**, require a **participant** to provide information required by the **system operator** for the purposes of this clause.
- (3) A notice given under subclause (2) must specify the information required by the **system operator** and the date by which the information must be provided (which must not be earlier than 20 **business days** after the notice is given).
- (4) A **participant** who has received a notice under subclause (2) must provide the information required by the **system operator** by the date specified by the **system operator** in the notice.
- (5) Within 40 **business days** of receiving the information, or such longer period as may be agreed by the **Authority**, the **system operator** must provide a report to the **Authority** that includes the following:
  - (a) whether, in the **system operator's** view, the **under-frequency event** was caused by a **generator** or **grid owner**, and if so, the identity of the **causer**;
  - (b) the reasons for the **system operator's** view;
  - (c) all of the information the **system operator** considered in reaching its view.

Compare: Electricity Governance Rules 2003 rule 11.5.1A section IV part C

Clause 8.60 Heading: amended, on 19 May 2016, by clause 25(1) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 8.60(1): amended, on 19 May 2016, by clause 25(2) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 8.60(1): amended, on 1 November 2018, by clause 15 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 8.60(2): amended, on 19 May 2016, by clause 25(3)(a), (b) and (c) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 8.60(3): amended, on 19 May 2016, by clause 25(4)(a) and (b) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 8.60(5): inserted, on 19 May 2016, by clause 25(5) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

#### **8.61 Authority to determine causer of under-frequency event**

- (1) The **Authority** must determine whether an **under-frequency event** has been caused by a **generator** or **grid owner** and, if so, the identity of the **causer**.
- (2) The **Authority** must **publish** a draft determination that states whether the **under-frequency event** was caused by a **generator** or **grid owner** and, if so, the identity of the **causer**.
- (3) The **Authority** must give reasons for its findings in the draft determination.
- (4) The **Authority** must consult every **generator**, **grid owner** and other **participant** substantially affected by an **under-frequency event** in relation to the draft determination.
- (5) When the **Authority publishes** the draft determination under subclause (2), the **Authority** must give notice to **generators**, **grid owners**, and other **participants** substantially affected by the **under-frequency event** of the closing date for submissions on the draft determination.

- (6) The date referred to in subclause (5) must be no earlier than 10 **business days** after the date of **publication** of the draft determination.
- (7) The **Authority** must **publish** submissions received under subclause (4) unless there is good reason for withholding information in a submission.
- (8) For the purposes of subclause (7), good reason for withholding information exists if there is good reason for withholding the information under the Official Information Act 1982.
- (9) Following the consultation under subclause (4), the **Authority** must **publish** a final determination.

Compare: Electricity Governance Rules 2003 rule 11.5.1B section IV part C

Clause 8.61 Heading: amended, on 19 May 2016, by clause 26(1) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 8.61: amended, on 19 May 2016, by clause 26(2) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 8.61(1): amended, on 19 May 2016, by clause 26(3) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 8.61(5): amended, on 19 May 2016, by clause 26(4)(a) and (b) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

### 8.62 Disputes regarding Authority determinations

- (1) A **participant** who is substantially affected by a determination may dispute the determination by referring the matter to the **Rulings Panel**.
- (2) A dispute is commenced by giving written notice to the **Rulings Panel** specifying the grounds of the dispute.
- (3) A notice under subclause (2) must be given within 10 **business days** after the determination is **published**.
- (4) The **Authority's** determination is suspended if a dispute is referred to the **Rulings Panel** within that time.
- (5) If a dispute is not referred to the **Rulings Panel** within that time, the determination is final.
- (6) If a dispute is referred to the **Rulings Panel**, the **Authority** must provide the **Rulings Panel** with all information considered by the **Authority** in making the determination.

Compare: Electricity Governance Rules 2003 rule 11.5.1C section IV part C

Clause 8.62 Heading: amended, on 19 May 2016, by clause 27(1) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 8.62(1): amended, on 19 May 2016, by clause 27(2) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 8.62(3): amended, on 5 October 2017, by clause 108 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.62 (4): amended, on 19 May 2016, by clause 27(3) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 8.62(6): amended, on 19 May 2016, by clause 27(4) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

### 8.63 Decision of the Rulings Panel

- (1) The **Rulings Panel** may—
  - (a) confirm the determination; or
  - (b) amend the determination; or
  - (c) substitute its own determination; or
  - (d) refer the determination back to the **Authority** with directions as to the particular matters that require reconsideration or amendment.

- (2) The **Authority's** determination has effect as confirmed, amended, or substituted by the **Rulings Panel** from the date of the **Rulings Panel's** decision.
- (3) The **Rulings Panel** must give a copy of its decision to the **Authority** as soon as reasonably practicable.
- (4) The **Authority** must **publish** the **Rulings Panel's** decision as soon as reasonably practicable.
- (5) If the **Rulings Panel** refers the matter back to the **Authority**, the **Authority** must have regard to the **Rulings Panel's** directions under subclause (1)(d).

Compare: Electricity Governance Rules 2003 rule 11.5.1D section IV part C

Clause 8.63: amended, on 19 May 2016, by clause 28(1) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 8.63(3): amended, on 19 May 2016, by clause 28(2) of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

#### 8.64 Event costs allocated to event causers

The **event charge** payable by the **causer** of an **under-frequency event** (referred to as "Event e" below) must be calculated in accordance with the following formula:

$$EC = ECR * (\sum_y (INT_{ye} \text{ for all } y) - INJ_D)$$

where

EC is the **event charge** payable by the **causer**

ECR is \$1,250 per **MW**

INJ<sub>D</sub> is 60 **MW**

INT<sub>ye</sub> is the electric power (expressed in **MW**) lost at point y by reason of Event e (being the net reduction in the **injection of electricity** (expressed in **MW**) experienced at point y by reason of Event e) excluding any loss at point y by reason of secondary Event e

y is a **point of connection** or the **HVDC injection point** at which the **injection of electricity** was interrupted or reduced by reason of Event e.

Compare: Electricity Governance Rules 2003 rule 11.5.2 section IV part C

Clause 8.64: amended, on 21 September 2012, by clause 10 of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

#### 8.65 Rebates paid for under-frequency events

An **event charge** that has been paid for an **under-frequency event** (referred to as "Event e") under clause 8.64 must be rebated in accordance with the following formula to persons who are allocated **availability costs** in accordance with clause 8.59:

$$\text{Rebate}_{xe} = EC_e * Z_{xe}/Z_{tote}$$

where

Rebate<sub>xe</sub> is the rebate of the **event charge** paid for Event e to person "x", who

has been allocated **availability costs** in accordance with clause 8.59

$EC_e$  is the **event charge** paid for Event e

$Z_{xe}$  is the sum of all **availability costs** paid by x during the **billing period** in which Event e occurred and the 2 preceding **billing periods**

$Z_{tote}$  is the sum of all **availability costs** paid for all **trading periods** during the **billing period** in which Event e occurred and the two preceding **billing periods**.

Compare: Electricity Governance Rules 2003 rule 11.5.3 section IV part C

### 8.66 Payments and rebates

All costs calculated in accordance with clauses 8.59 and 8.64 are payable by the relevant **participants** to the **system operator**, and all **event charge** rebates calculated in accordance with clause 8.65 are payable by the **system operator** to the relevant **participants**, in accordance with clause 8.69.

Compare: Electricity Governance Rules 2003 rule 11.5.4 section IV part C

### 8.67 Voltage support costs allocated in 3 parts – nominated peak, monthly peak and residual charges

- (1) Each **connected asset owner** must pay the **allocable cost of voltage support** in each **zone** to the **system operator** in accordance with clause 8.68. The costs must be calculated in accordance with this clause.
- (2) Each **connected asset owner** must pay a nominated peak kvar charge calculated in accordance with the following formula:

$$\text{NomCharge}_{xz} = \text{PeakRate}_z * \sum_j Q_{xjz}$$

where

$\text{NomCharge}_{xz}$  is the total nominated peak charges for **connected asset owner x** in **zone z**

$\text{Peak Rate}_z$  is the fixed \$/kvar set annually in advance by **system operator** for **zone z**

$Q_{xjz}$  is  $\text{Nom Peak}_{\text{LINES}_{xjz}}$ , which is the peak demand in kvar (in **zone z**) nominated to the **system operator** in advance of, and having effect from, 1 March each year by **connected asset owner x** at its **connected asset owner kvar reference node j**

$\sum_j$  is the sum across all **connected asset owner kvar reference nodes j** of **connected asset owner x** in **zone z**

- (3) Each **connected asset owner** must pay a monthly peak penalty charge calculated in accordance with the following formula:

$$\text{PeakPenaltyCharge}_{\text{LINE}_{xz}} = \text{PenaltyRate}_z * \sum_j \text{PenaltyQuantity}_{\text{LINE}_{xjz}}$$

where

$\text{PeakPenaltyCharge}_{\text{LINE}_{xz}}$  is the total peak penalty charges for **connected asset owner x** across all **connected asset owner kvar reference nodes j** for **connected asset owner x** in **zone z**

$\text{PenaltyRate}_z$  is the fixed \$/kvar penalty charge for “kvar above nominated kvar” set annually in advance by the **system operator** in **zone z**

$\sum_j$  is the sum across all **connected asset owner kvar reference nodes j** of **connected asset owner x** in **zone z**

$\text{PenaltyQuantity}_{\text{LINE}_{xjz}}$  is the “kvar above nominated kvar” quantity for **connected asset owner x** at its **connected asset owner kvar reference node j** in **zone z**

- (4) For the purpose of calculating the “kvar above nominated kvar” quantity, the kvar taken by the **connected asset owner**—
- (a) includes only kvar demands on weekdays (Monday to Friday but excluding **national holidays**) between the hours of 0700 to 2100 inclusive; and
  - (b) includes no more than 2 kvar peaks in any 1 day; and
  - (c) is the average of the 6 largest kvar peaks for the **connected asset owner** in each month measured at the **connected asset owner kvar reference node j** within the **zone z**,—

and “kvar above nominated kvar” is the difference between the kvar taken by the **connected asset owners** as determined in accordance with paragraphs (a) to (c) and the nominated kvar specified by the **connected asset owner**.

- (5) Each **connected asset owner** must pay a residual charge or receive a residual payment calculated in accordance with the following formulae:

$$\text{Residual}_{\text{ALL}z} = \text{Vcost}_z - \text{Nom Charge}_{\text{ALL}z} - \text{PeakPenaltyCharge}_{\text{ALL}z}$$

$$\text{Residual}_{\text{LINE}_{allz}} = \text{Residual}_{\text{ALL}z} * (\sum_{xj} \text{NomPeak}_{\text{LINE}_{xjz}} / \sum_{xj} Q_{xjz})$$

$$\text{Residual}_{\text{LINE}_{xz}} = \text{Residual}_{\text{LINE}_{allz}} * (\text{BillingPeriodOfftake}_{\text{LINE}_{xz}} / \text{BillingPeriodOfftake}_{\text{ALL}z})$$

where

$\text{Vcost}_z$  is the total **allocable costs** for **voltage support** in **zone z** in the **billing period**

$\text{Nom Charge}_{\text{ALL}z}$  is the sum of all  $\text{Nom Charge}_{xz}$  for **zone z**

PeakPenaltyCharge <sub>ALLz</sub>	is the sum of all <b>connected asset owners'</b> PeakPenaltyCharge <sub>LINExz</sub> for <b>zone z</b>
Residual <sub>ALLz</sub>	is the total residual to be recovered from or paid to <b>connected asset owners in zone z</b>
Residual <sub>LINeallz</sub>	is the portion of Residual <sub>ALLz</sub> to be recovered from or paid to <b>connected asset owners in zone z</b>
Residual <sub>LINExz</sub>	is the portion of Residual <sub>LINeallz</sub> to be recovered from or paid to <b>connected asset owner x in zone z</b>
BillingPeriodOfftake <sub>LINExz</sub>	is the sum of <b>metering information</b> for <b>connected asset owner x</b> across all <b>connected asset owner kvar reference nodes in zone z</b> for the <b>billing period</b> for all <b>trading periods</b>
BillingPeriodOfftake <sub>ALLz</sub>	is the sum of <b>metering information</b> for all <b>connected asset owners</b> across all <b>connected asset owner kvar reference nodes in zone z</b> for the <b>billing period</b> for all <b>trading periods</b>
$\Sigma_{xj}$	is the sum across all <b>connected asset owner kvar reference nodes j</b> for all <b>connected asset owners x</b> in <b>zone z</b>
$\Sigma_j$	is the sum across all <b>connected asset owner kvar reference nodes j</b> of <b>connected asset owner x</b> in <b>zone z</b>
$Q_{xjz}$	is Nom Peak <sub>LINExjz</sub> , which is the peak demand in kvar (in <b>zone z</b> ) nominated to the <b>system operator</b> in advance of, and having effect from, 1 March each year by <b>connected asset owner x</b> at its <b>connected asset owner kvar reference node j</b>

- (6) For the purposes of this clause, a **connected asset owner** does not include a **generator** who is supplied **electricity** for consumption at a **point of connection** with the **grid**.

Compare: Electricity Governance Rules 2003 rule 11.6 section IV part C

Clause 8.67: amended, on 1 February 2016, by clause 13 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 8.67(5): amended, on 15 May 2014, by clause 10 of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

### **8.67A [Revoked]**

Clause 8.67A: inserted, on 24 March 2015, by clause 13 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 8.67A Heading: amended, on 1 February 2016, by clause 14(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 8.67A: amended, on 1 February 2016, by clause 14(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 8.67A: amended, on 19 January 2017, by clause 12 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2016.

Clause 8.67A: revoked, on 21 December 2021, by clause 16 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

### 8.68 Clearing manager to determine amounts owing

- (1) The **clearing manager** must determine the amount owing to the **system operator** by each **grid owner, purchaser, generator** and **connected asset owner** for **ancillary services** under clauses 8.55 to 8.67. On behalf of the **system operator**, the **clearing manager** must collect those amounts, and any amounts advised by the **system operator** as owing to it under clauses 8.6 and 8.31(1)(a), by including the relevant amounts in the amounts advised by the **clearing manager** as owing under Part 14.
- (2) To enable the **clearing manager** to determine those amounts, the **system operator** must provide to the **clearing manager** the total **allocable cost** for each **ancillary service** and any additional information required to carry out the calculations under clauses 8.55 to 8.67 that is not otherwise provided by the **reconciliation manager** under Part 13.
- (3) *[Revoked]*
- (4) *[Revoked]*
- (5) *[Revoked]*
- (6) All amounts owing under this clause are subject to the priority order of payments set out in clause 14.56.

Compare: Electricity Governance Rules 2003 rule 11.7 section IV part C

Clause 8.68 heading: amended, on 24 March 2015, by clause 7(1) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

Clause 8.68(1): amended, on 24 March 2015, by clause 7(2) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

Clause 8.68(1): amended, on 24 March 2015, by clause 14(1) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 8.68(1): amended, on 1 February 2016, by clause 15 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 8.68(3), (4), (5) and (6): inserted, on 24 March 2015, by clause 14(2) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 8.68(3): amended, on 1 February 2016, by clause 15 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 8.68(3): amended, on 19 January 2017, by clause 13 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2016.

Clause 8.68(3), (4) and (5): revoked, on 21 December 2021, by clause 17 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

Clause 8.68(2): amended, on 1 November 2022, by clause 6 of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

### 8.69 Clearing manager to determine wash up amounts payable and receivable

- (1) The **clearing manager** must determine the following amounts owing as a result of **washups** under subpart 6 of Part 14:
  - (a) the amount owing to the **system operator** by each **grid owner, purchaser, generator** and **connected asset owner** for **ancillary services** under clauses 8.55 to 8.67:
  - (b) the amount owing to each **grid owner, purchaser, generator** and **connected asset owner** by the **system operator** for **ancillary services** under clauses 8.55 to 8.67:
  - (c) *[Revoked]*:
  - (d) *[Revoked]*.
- (2) On behalf of the **system operator** the **clearing manager** must collect or pay the

amounts owing for **ancillary services**, and any amounts advised by the **system operator** as payable to it under clauses 8.6 and 8.31(1)(a) by including the relevant amounts advised by the **clearing manager** as owing under Part 14.

- (3) To enable the **clearing manager** to determine the amounts payable for **ancillary services**, the **system operator** must provide to the **clearing manager** the **allocable cost** for each **ancillary service** and any additional information required to carry out the recalculations under clauses 8.55 to 8.67 that is not otherwise provided by the **reconciliation manager** under Part 13.
- (4) All amounts owing under this clause are subject to the priority order of payments set out in clause 14.56.

Compare: Electricity Governance Rules 2003 rule 11.8 section IV part C

Clause 8.69 heading: amended, on 24 March 2015, by clause 8(1) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

Clause 8.69: substituted, on 24 March 2015, by clause 15 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 8.69(1): amended, on 24 March 2015, by clause 8(2) of the Electricity Industry Participation (Settlement and Prudential Security) Code Amendment 2013.

Clause 8.69(1)(a) & (b): amended, on 1 February 2016, by clause 16(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 8.69(1)(c) and (d): revoked, on 21 December 2021, by clause 18 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

Clause 8.69(4): amended, on 1 February 2016, by clause 16(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 8.69(3): amended, on 1 November 2022, by clause 7 of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

#### **8.70 System operator pays ancillary service agents**

- (1) The **system operator** must pay each **ancillary service agent** the amounts that each **ancillary service agent** is entitled to receive for **ancillary services** under contracts entered into by the **system operator** in implementing the **procurement plan**.
- (2) The **system operator** must use the **clearing manager** as its agent to pay **participants**.

Compare: Electricity Governance Rules 2003 rule 11.9 section IV part C

## Schedule 8.1

cls 8.29 and 8.33

### Approval of equivalence arrangement or grant of dispensation

#### 1 Contents of this Schedule

This Schedule sets out the process for an **asset owner** who wishes to apply for—

- (a) approval of an **equivalence arrangement**; or
- (b) the grant of a **dispensation**.

Compare: Electricity Governance Rules 2003 clause 1 schedule C1 part C

#### 2 Application and supporting information

Each application for an **equivalence arrangement** or a **dispensation** must—

- (a) be in writing; and
- (b) specify the **AOPO** or **technical code** from which approval for an **equivalence arrangement** or the grant of **dispensation** is sought; and
- (c) provide supporting information for the application, including sufficient information about the actual capability of the **asset** or configuration of **assets**; and
- (d) describe any remedial action planned to return the **asset** or configuration of **assets** to a compliant state; and
- (e) specify the required term of the **equivalence arrangement** or **dispensation**; and
- (f) indicate any information for which confidentiality is sought on the grounds that it would, if disclosed, unreasonably prejudice the commercial position of the person who supplied the information (or of the person who is the subject of that information), or would disclose a trade secret, or on the ground that it is necessary to protect information which is itself subject to an obligation of confidence, and the duration of the requirement for confidentiality.

Compare: Electricity Governance Rules 2003 clause 2 schedule C1 part C

#### 3 System operator obligations on receipt of application

No later than **5 business days** after receiving the application made under clause 2, the **system operator** must—

- (a) record the name of the **asset owner** making the application, the date and the subject matter of the application in the **system operator register**; and
- (b) give written notice to the **Authority** of the application; and
- (c) provide the **asset owner** with an estimate of the likely time that it will take to consider the application and the likely costs associated with processing the application.

Compare: Electricity Governance Rules 2003 clause 3 schedule C1 part C

Clause 3: amended, on 20 December 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 3(b): amended, on 5 October 2017, by clause 109 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### 4 Rights and obligations while processing applications

- (1) The **system operator** must use reasonable endeavours to process an application for approval of an **equivalence arrangement** or grant of a **dispensation** within the

- timeframe and costs estimated in accordance with clause 3(c).
- (2) If the **system operator** cannot process the application within the timeframe or costs originally estimated, it must give notice of this fact and its amended estimates of timeframe or costs to the **asset owner**, and clause 5 applies in respect of those costs.
  - (3) The **system operator** may require the provision of additional information at any stage during the application process and, provided the **system operator's** requirements are reasonable, that information must be provided by the **asset owner** if the application is to be processed.
  - (4) The **asset owner** may withdraw an application at any time, provided that it meets all costs incurred by the **system operator** as at the date of the withdrawal of the application. If any costs have been paid in advance, those monies outstanding to the credit of the **asset owner** must immediately be returned to the **asset owner**.
  - (5) An applicant may amend an application being considered by the **system operator** at any time. All amendments must be in writing and submitted to the **system operator** and take effect from the date of receipt.

Compare: Electricity Governance Rules 2003 clause 4 schedule C1 part C

## 5 **Obligation of asset owner to pay costs**

- (1) The **system operator** and the **asset owner** must agree on the costs involved in processing an application for approval of an **equivalence arrangement** or grant of a **dispensation** and the method for payment to the **system operator** by the **asset owner** of those costs—
  - (a) before the **system operator** proceeds with the application; and
  - (b) at any time during the processing of the application when either—
    - (i) the **system operator** gives written notice to the **asset owner** that it considers the estimate of the likely timeframe involved in processing the application will exceed the estimate given under clause 3(c) or any revised estimate given under clause 4; or
    - (ii) an **asset owner** varies its application and the **system operator**, acting reasonably, considers this variation will change the cost of processing the application.
- (2) The **system operator** is entitled not to proceed until agreement on costs is reached at any of these stages.

Compare: Electricity Governance Rules 2003 clause 5 schedule C1 part C  
Clause 5(1)(b)(i): amended, on 5 October 2017, by clause 110 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 6 **Special provisions relating to the grant of dispensations**

- (1) Before granting a **dispensation**, the **system operator** must issue a draft decision on the application. The draft decision must be published on the **system operator register** and must include—
  - (a) an assessment by the **system operator** of the technical issues; and
  - (b) advice from the **system operator** about any changes required to **ancillary services** procurement as a result of the proposed **dispensation**.
- (2) If changes are required to the **procurement plan**, the draft decision must be conditional

on the **procurement plan** being amended appropriately in accordance with clauses 7.13 to 7.22.

- (3) A **participant** may make a submission to the **system operator** on the application that resulted in the publication of the draft decision no later than 10 **business days** after the draft decision is recorded on the **system operator register**.
- (4) The **system operator** must—
  - (a) consider all submissions; and
  - (b) give written notice of its decision on an application to the **participant** who made the application.

Compare: Electricity Governance Rules 2003 clause 6 schedule C1 part C

Clause 6(2): amended, on 1 August 2023, by clause 28 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 6(4): replaced, on 5 October 2017, by clause 111 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 6(2): amended, on 1 March 2024, by clause 29 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

## 7 Decision of the system operator

The **system operator** must advise all applicants for approval of an **equivalence arrangement** or grant of a **dispensation** of—

- (a) its decision as soon as it is made in writing; and
- (b) the reason for its decision.

Compare: Electricity Governance Rules 2003 clause 7 schedule C1 part C

## 8 Decisions must be recorded

- (1) An approval of an **equivalence arrangement** or grant of a **dispensation** by the **system operator** must be recorded in the **system operator register**.
- (2) The approval must state the name of the **asset owner**, the date, duration and nature of the **equivalence arrangement** or **dispensation**, including any conditions.
- (3) On request, and at the cost of the person making the request, the **system operator** must supply all background information in relation to its decision to that person, other than information designated as commercially sensitive by the relevant **asset owner**.

Compare: Electricity Governance Rules 2003 clause 8 schedule C1 part C

## Schedule 8.2

cls 8.48 and 8.50

### Approval of alternative ancillary service arrangement

#### 1 Process for approval of alternative ancillary service arrangement

- (1) An application for an **alternative ancillary service arrangement** must—
  - (a) be in writing; and
  - (b) specify the **ancillary service** for which approval for an **alternative ancillary service arrangement** is sought; and
  - (c) provide supporting information for the application, including sufficient information about the actual capability of the **asset** or configuration of **assets**; and
  - (d) describe any remedial action planned to return the **asset** or configuration of **assets** to a compliant state; and
  - (e) specify the required term of the **alternative ancillary service arrangement**; and
  - (f) indicate any information for which confidentiality is sought on the grounds that it would, if disclosed, unreasonably prejudice the commercial position of the person who supplied the information (or the person who is the subject of that information), or would disclose a trade secret, or on the ground that it is necessary to protect information which is itself subject to an obligation of confidence.
- (2) No later than 5 **business days** after receiving the application under subclause (1), the **system operator** must—
  - (a) record the name of the **asset owner** making the application, the date and the subject matter of the application in the **system operator register**; and
  - (b) give written notice to the **Authority** of the application; and
  - (c) provide the **asset owner** with an estimate of the likely time it will take to consider the application and the likely costs associated with processing the application.
- (3) The **system operator** and the **asset owner** must agree on the costs involved in processing an application for authorisation of an **alternative ancillary service arrangement** and the method for payment to the **system operator** by the **asset owner** of those costs—
  - (a) before the **system operator** proceeds with the application; and
  - (b) at any time during the processing of the application, the **system operator** is entitled not to proceed until agreement is reached if either—
    - (i) the **system operator** gives written notice to the **asset owner** that it considers the estimate of the likely timeframe and costs involved in processing the application will exceed the estimate given under subclause (2)(c); or
    - (ii) an **asset owner** varies its application and the **system operator**, acting reasonably, considers this variation will change the costs in processing the application.

Compare: Electricity Governance Rules 2003 clauses 1.1 to 1.3 schedule C2 part C

Clause 1(2): amended, on 20 December 2021, by clause 13 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 1(2)(b) and (3)(b)(i): amended, on 5 October 2017, by clause 112(1) and (2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 2 Obligations in processing applications

- (1) The **system operator** must use reasonable endeavours to process an application for authorisation of an **alternative ancillary service arrangement** within the timeframe and costs estimated in accordance with clause 1(2)(c).
- (2) If the **system operator** cannot process an application within the timeframe and costs originally estimated, it must give notice of this fact and its amended estimates of timeframe and costs to the **asset owner** and the provisions of clause 1(3) must apply in respect of those costs.
- (3) The **system operator** may require the provision of additional information at any stage during the application process and, provided the **system operator's** requirements are reasonable, that information must be provided by the **asset owner** if the application is to be processed.
- (4) The **asset owner** may withdraw an application at any time provided that it meets all costs incurred by the **system operator** as at the date of withdrawal of the application. If those costs have been paid in advance, those monies outstanding to the credit of the **asset owner** must immediately be returned to the **asset owner**.
- (5) An applicant may amend an application being considered by the **system operator** at any time. All amendments must be in writing and submitted to the **system operator** and must take effect from the date of receipt.

Compare: Electricity Governance Rules 2003 clause 1.4 schedule C2 part C

## 3 Decision of the system operator

The **system operator** must advise all applicants for authorisation of an **alternative ancillary service arrangement** of its decision as soon as it is made in writing, and advise such applicants of the reason for that decision.

Compare: Electricity Governance Rules 2003 clause 1.5 schedule C2 part C

## 4 Decisions must be recorded

An authorisation of an **alternative ancillary service arrangement** by the **system operator** must be recorded in the **system operator register**. Except for information that the **system operator** agreed was commercially sensitive, the authorisation must state the name of the **asset owner**, the date, duration and nature of the **alternative ancillary service arrangement**, including any conditions. On request, and at the cost of the person making the request, the **system operator** must supply all background information in relation to its decision to that person, other than information designated as commercially sensitive by the relevant **asset owner**.

Compare: Electricity Governance Rules 2003 clause 1.6 schedule C2 part C

---

## Schedule 8.3 Technical codes

cl 1.1

### *Technical Code A – Assets*

#### 1 Purpose

The purpose of this **technical code** is to define obligations for **asset owners** and technical standards for **assets** that are supportive of, or more detailed than, those set out in subpart 2 of Part 8, in order to enable the **system operator** to plan to comply, and to comply, with the **principal performance obligations**.

Compare: Electricity Governance Rules 2003 clause 1 technical code A schedule C3 part C

#### 2 General requirements

- (1) Each **asset owner** must ensure that—
  - (a) its **assets** at **grid exit points** and at **grid injection points**, and, in the case of **connected asset owners**, the **assets** of any **embedded generator** connected to it, are identified and referred to by a **system number**; and
  - (b) its **assets**, both in the manner in which they are designed and operated, are capable of being operated, and operate, within the limits stated in the **asset capability statement** provided by the **asset owner** for that **asset**; and
  - (c) it meets any other reasonable requirements of the **system operator**, identified during planning studies, which are required for the **system operator** to plan to comply, or to comply, with its **principal performance obligations**.
- (2) Each **asset owner** must provide the **system operator** with an **asset capability statement**, and any other information reasonably required by the **system operator**, to allow the **system operator** to assess compliance of its **asset** or any configuration of **assets** with the requirements of the **asset owner performance obligations** and **technical codes** at each of the following times:
  - (a) before the completion of planning for the construction of that **asset** or configuration of **assets**;
  - (b) at, or before, the completion of construction but before the **commissioning** of that **asset** or configuration of **assets**, except that the **asset owner** must put in place a **commissioning** plan in accordance with subclauses (6) to (8) to minimise the impact of **commissioning** tests on the **system operator's** ability to comply with its **principal performance obligations**, and adhere to this plan during **commissioning**, unless otherwise agreed to by the **system operator**.
- (3) On, or before, completion of **commissioning** of an **asset** or configuration of **assets**, the **asset owner** must obtain a final assessment in writing from the **system operator** that the **asset** or configuration of **assets** meets the requirements of the **asset owner performance obligations** and **technical codes**. This final assessment must be based on the information supplied by the **asset owner** and, if necessary, the result of **system tests** at **commissioning**.
- (4) The **system operator** must give the assessment referred to in subclause (2)(b) within a

- reasonable time frame of the request and supply the **asset owner** with all information that supports its assessment. Any permission granted by the **system operator** to an **asset owner** to conduct **commissioning** of any **asset** or configuration of **assets** must permit connection of the **asset** (or configuration of **assets**) solely for the purposes of **commissioning**.
- (5) Each **asset owner** must provide the **system operator** with an **asset capability statement** in the form from time to time **published** by the **system operator** for each **asset** that is proposed to be connected, or is connected to, or forms part of the **grid**. The **asset capability statement** must—
- (a) include all information reasonably requested by the **system operator** so as to allow the **system operator** to determine the limitations in the operation of the **asset** that the **system operator** needs to know for the safe and efficient operation of the **grid**; and
  - (b) include any modelling data for the planning studies, as reasonably requested by the **system operator**; and
  - (c) be updated and reissued to the **system operator** as information and design development progresses through the study, design, manufacture, testing and **commissioning** phases; and
  - (d) be complete and up to date before the **commissioning** of the **asset**; and
  - (e) be complete and up to date at all times while the **asset** is connected to, or forms part of, the **grid**.
- (6) Each **asset owner** must provide a **commissioning** plan or test plan in accordance with subclauses (7) or (8) (as the case may be) in the following situations:
- (a) when changes are made to **assets** that alter any of the following at the **grid interface**:
    - (i) the **single-line diagram**;
    - (ii) a protection system, other than a change to a protection system setting;
    - (iii) a **control system**, including a change to a **control system** setting;
    - (iv) any rating of **assets**;
  - (b) when **assets** are to be connected to, or are to form part of, the **grid**;
  - (c) if it is necessary for an **asset owner** to perform a **system test** or other test to ascertain or confirm **asset** capabilities, and if the **commissioning** or testing or connection of those **assets** may affect the **system operator**'s ability to plan to comply, or to comply with, its **principal performance obligations**. If an **asset owner** is unsure whether the **commissioning** or connection of an **asset** may impact on the **system operator**'s ability to plan to comply, and to comply, with the **principal performance obligations** it must contact the **system operator** for advice.
- (7) The **commissioning** plan prepared by an **asset owner** and agreed by the **system operator** must—
- (a) include a timetable containing the sequence of events necessary to connect the **assets** to the **grid** and conduct any proposed **system test**; and
  - (b) contain the protection and control settings to be applied before the **assets** are made live (where live has the meaning given to it in the Electricity (Safety)

- Regulations 2010); and
- (c) contain the procedures for **commissioning** the plant with minimum risk to personnel and plant and to the ability of the **system operator** to plan to comply and to comply with its **principal performance obligations**.
- (8) If a test plan is required under subclause (6), it must be prepared by the **asset owner** in consultation with the **system operator**. The test plan must contain sufficient information to enable the **system operator** to plan to comply, and to comply, with the **principal performance obligations**.
- (9) Once assessed by the **system operator** acting reasonably, the **asset owner** must follow the **commissioning** plan or test plan at all times, unless otherwise agreed with the **system operator** (such agreement must not be unreasonably withheld if compliance with the **commissioning** plan or testing plan is not practicable and non-compliance does not impact on the **system operator's** ability to comply with its **principal performance obligations** or on other **asset owners**).

Compare: Electricity Governance Rules 2003 clause 2 technical code A schedule C3 part C

Clause 2(1)(a): amended, on 1 February 2016, by clause 17 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 2(1)(a): amended, on 20 December 2021, by clause 14 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 2(1) and (4) – (7): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 2(1) - (7) and (9): amended, on 5 October 2017, by clause 113 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 3 Requirements for asset information

- (1) In accordance with clause 8.25(4), the following information is required by the **system operator** to assist it to plan to comply, and to comply, with its **principal performance obligations**:
- (a) sufficient information must be exchanged between the **system operator** and the **asset owner** to ensure that both fully understand the implications of any changes to the **asset capability statement** or of any proposed connection of the relevant **assets** to the **grid** or to the **local network**. This information must be exchanged in accordance with a timetable agreed to by the **system operator** and the **asset owner**;
  - (b) if reasonably requested by the **system operator**, the **asset owner** must provide sufficient information to the **system operator** to demonstrate the compliance of the **asset owner's assets** with the **asset owner performance obligations** and the **technical codes**.
- (2) Information about an **asset, supply** or **demand** of other **asset owners** must only be disclosed by the **system operator**—
- (a) as expressly provided for in this Code; or
  - (b) as reasonably required in a **grid emergency** or to ensure the security of the **grid**;  
or
  - (c) as required by law; or
  - (d) otherwise as may be agreed with the relevant **asset owners**.
- (3) Each **asset owner** must provide the **system operator** with—
- (a) all information reasonably requested by the **system operator** so as to ensure

compliance with clause 8.25(4) and to enable the **system operator** to assess the **grid interface**; and

- (b) details of protection systems, including settings, to ensure that the requirements of clause 8.25(4) are met.
- (4) Each **asset owner** must ensure that all supporting information for the operational control of **assets** is kept up to date.

Compare: Electricity Governance Rules 2003 clause 3 technical code A schedule C3 part C

Clause 3(1)(a): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 3(1)(a): amended, on 5 October 2017, by clause 114 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 3(2): amended, on 20 December 2021, by clause 15(a) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 3(2)(cc): amended, on 20 December 2021, by clause 15(b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

#### 4 Requirements for grid and grid interface

- (1) Each **asset owner** and **grid owner** must co-operate with the **system operator** to ensure that protection systems on both sides of a **grid interface**, which include **main protection systems** and **back up protection systems**, are co-ordinated so that a faulted **asset** is **electrically disconnected** by the **main protection system** first and the other **assets** are not prematurely **electrically disconnected**.
- (2) A proposed **grid interface**, including the settings of any associated protection system, must be agreed between the relevant **asset owner** and the **system operator** before being implemented.
- (3) Each **asset owner** must ensure that sufficient **circuit breakers** are provided for its **assets** so that each of its **assets** is able to be **electrically disconnected** from the **grid** whenever a fault occurs within the **asset**.
- (4) Each **asset owner** must ensure that it provides protection systems for its **assets** that are connected to, or form part of, the **grid**. Each **asset owner** must also ensure that as a minimum requirement—
- (a) such protection systems support the **system operator** in planning to comply, and complying, with the **principal performance obligations** and are designed, **commissioned** and maintained, and settings are applied, to achieve the following performance in a reliable manner:
- (i) **electrically disconnect** any faulted **asset** in minimum practical time (taking into account selectivity margins and industry best design practice) and minimum disruption to the operation of the **grid** or other **assets**:
- (ii) be selective when operating, so that the minimum amount of **assets** are **electrically disconnected**:
- (iii) as far as reasonably practicable, preserve power system stability; and
- (b) it provides duplicated **main protection systems** for each of its **assets** at voltages of 220 kV a.c. or above, other than busbars; and
- (c) it provides, for each of its 220 kV a.c. busbars—
- (i) a single **main protection system** and a **back up protection system**; or
- (ii) if the performance of its **back up protection system** does not meet the requirements of paragraph (a), a duplicated **main protection system**; and

- (d) it provides duplicated **main protection systems** for each of its busbars at voltages above 220 kV a.c; and
  - (e) it designs, tests and maintains its **main protection systems** at voltages of 220 kV a.c. or above in accordance with the requirements set out in Appendix A; and
  - (f) it provides a **circuit breaker failure protection system**, that need not be duplicated, for each **circuit breaker** at voltages of 220 kV a.c. or above. **Circuit breaker** duplication is not required; and
  - (g) protection system design for a connection of **assets** to the **grid** at lower voltages must be similar to existing design practice in adjacent connections of **assets** to ensure coordination of protection systems.
- (5) At a **point of connection**—
- (a) an **asset owner**, other than a **grid owner**, must provide a means of checking **synchronisation** before the switching of **assets** if it is possible that such switching may result in **electrical connection** of parts of the New Zealand electric power system that are not **synchronised**; and
  - (b) a **grid owner** must provide a means of checking **synchronisation** before the switching of **assets** in locations agreed with the **system operator** so that it is not possible for such switching to result in **electrical connection** of parts of the New Zealand electric power system that are not **synchronised**.
- (6) An auto-reclose facility at the **grid interface**, at which power flows into the **grid** can occur, must include an appropriate **synchronising** check facility.

Compare: Electricity Governance Rules 2003 clause 4 technical code A schedule C3 part C

Clause 4 Heading: amended, on 15 May 2014, by clause 11 of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

Clause 4(1), (3), (4) and (5): amended, on 5 October 2017, by clause 115 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 4(4) and (5): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

## 5 Specific requirements for generators

- (1) Each **generator** must ensure that—
- (a) each of its **generating units**, and its associated **control systems**,—
    - (i) supports the **system operator** to plan to comply, and to comply, with the **principal performance obligations**; and
    - (ii) is able to **synchronise** at a stable frequency within the frequency range stated in the **asset capability statement** for that **asset**; and
  - (b) the rate of change in the output of any of its **generating units** does not adversely affect the **system operator's** ability to plan to comply, and to comply, with the **principal performance obligations**. The rate of change must be adjustable to allow for changes in **grid** conditions; and
  - (c) each of its **generating units** has a speed governor that—
    - (i) provides stable performance with adequate damping; and
    - (ii) has an adjustable droop over the range of 1% to 7%; and
    - (iii) does not adversely affect the operation of the **grid** because of any of its non-linear characteristics; and
  - (d) appropriate speed governor settings to be applied before commencing **system**

- tests for a **generating unit** are agreed between the **system operator** and the **generator**. The performance of the **generating unit** is then assessed by measurements from **system tests** and final settings are then applied to the **generating unit** before making it ready for service after those final settings are agreed between the **system operator** and the **generator**. An **asset owner** must not change speed governor settings without **system operator** approval.
- (2) Each **generator** must ensure that each of its **generating units** connected to the **grid** is equipped with—
- (a) an excitation and voltage control system with a voltage set point that is adjustable over the range of voltage set out in clause 8.23 and operates continuously in the voltage control mode when **synchronised**; and
  - (b) in order to meet the **asset owner performance obligations**, either—
    - (i) a connection transformer with an appropriate range of taps on each transformer together with an on-load tap-changer; or
    - (ii) **assets** to give a dynamic performance equivalent to those required by subparagraph (i).
- (3) If the output of more than 1 **generating unit** is controlled by a common **control system**, the **generator** must ensure that—
- (a) the common **control system** does not adversely affect the ability of the **system operator** to plan to comply, and to comply, with the **principal performance obligations**; and
  - (b) the combined output from the **generating units** performs as though it were from 1 **generating unit**; and
  - (c) the **control system** does not degrade the individual performance of any one **generating unit**.
- (4) Each **generator** and **grid owner** must ensure that each of its **assets** is capable of operating under the voltage imbalance conditions stated in clause 4.9 of the **Connection Code** and, when operated within the limits stated in its **asset capability statement**, does not—
- (a) contribute unbalanced phase currents into the **grid**; or
  - (b) aggravate any current imbalance that may occur on the **grid**.
- (5) At some **points of connection**, a **generator** must ensure that its **generating units** have both **main protection systems** and **back-up protection systems** for nearby faults on the **grid**, if the necessity for, and the method of providing, such protection systems is agreed between the **system operator** and the **generator**.

Compare: Electricity Governance Rules 2003 clause 5 technical code A schedule C3 part C

Clause 5(2): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 5(2): amended, on 5 October 2017, by clause 116 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 5(2): amended, on 20 December 2021, by clause 16 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 5(4): amended, on 19 May 2016, by clause 29 of the Electricity Industry Participation Code Amendment (System Operator and Alignment with Statutory Objective) 2016.

Clause 5(1)(c)(ii): amended, on 1 March 2024, by clause 30 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

## 6 Specific requirements for connected asset owners

Each **connected asset owner** must agree with the **system operator** any temporary or permanent connection of the **connected asset owner's assets** if those **assets** become simultaneously connected to the **grid** at more than 1 **point of connection**.

Compare: Electricity Governance Rules 2003 clause 6 technical code A schedule C3 part C

Clause 6 Heading: amended, on 1 February 2016, by clause 18(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 6: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 6: amended, on 1 February 2016, by clause 18(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 6: amended, on 5 October 2017, by clause 117 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 7 Modifications and changes to assets

(1) **Assets** that have been modified, or are proposed to be modified, are deemed to be new **assets** for the purposes of this Code and this **Technical Code** and are subject to the requirements for connection to the **grid** and the requirements for **commissioning assets**. For the purposes of this Schedule, the following are considered to be modifications to **assets**, if the new connection or alteration may affect the capacity of the **assets** or may affect **asset owner performance obligations** or **technical code** requirements:

- (a) a new connection of **assets** to the **grid** or a **local network**;
- (b) a new connection of **assets** to form part of the **grid**;
- (c) a new connection of an **embedded generator** to a **local network** other than an **excluded generator** as defined in clause 8.21(1);
- (d) an alteration to **assets** already connected to the **grid** or, in the case of **embedded generator**, already connected to a **local network**.

(2) The **asset owner** must give written notice to the **system operator** in a timely manner of any **assets** that have been **decommissioned** if the **assets** affect or could affect the **system operator's** ability to comply with its **principal performance obligations**.

Compare: Electricity Governance Rules 2003 clause 7 technical code A schedule C3 part C

Clause 7(1): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 7(1) and (2): amended, on 5 October 2017, by clause 118 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 8 Records, tests and inspections

(1) Each **asset owner** must arrange for, and retain, records for each of its **assets** to demonstrate that the **assets** comply with the **asset owner performance obligations** and this **technical code**.

(2) In addition to the requirements for **commissioning** or testing in clause 2(6) to (8), each **asset owner** must carry out periodic testing—

- (a) of its **assets**, including **automatic under-frequency load shedding** systems, in accordance with Appendix B
- (b) *[Revoked]*.

(3) If the **system operator** advises an **asset owner** that it reasonably believes that an **asset** may not comply with an **asset owner performance obligation** or this **technical code**, the **asset owner** must—

- (a) as soon as practicable, but no later than 30 days after receiving a written request, advise the **system operator** of its remedial or test plan for the **assets**; and
  - (b) as soon as reasonably practicable undertake any remedial action or testing of its **assets** in accordance with its plan advised to the **system operator** in paragraph (a). The **system operator** may require such testing or remedial action to be undertaken in the presence of a **system operator** representative.
- (4) Each **asset owner** must, at the request of the **system operator**, provide access to records of the performance or testing of an **asset** and access to inspect an **asset**.

Compare: Electricity Governance Rules 2003 clause 8 technical code A schedule C3 part C

Clause 8(2): substituted, on 7 August 2014, by clause 16 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 8(2): amended, on 5 October 2017, by clause 119 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 8.2(a): amended, on 21 December 2021, by clause 19(1) of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

Clause 8.2(b): revoked, on 21 December 2021, by clause 19(2) of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

## 9 Status of system operator approval

A review and approval by the **system operator** under this Code must not be construed as confirming or endorsing the design or warranting the safety, durability or reliability of an **asset**. Such review or approval does not relieve the **asset owner** from its obligations to continue to meet the requirements of this Code. The **system operator** is not, by reason of any such review or lack of review, responsible for strength, adequacy of design or capacity of an **asset**. In undertaking a review, the **system operator** is not responsible for any consequence of a failure of an **asset** due to inadequate design.

Compare: Electricity Governance Rules 2003 clause 9 technical code A schedule C3 part C

*Appendix A: Main protection system requirements*

**1 General requirements**

An **asset owner** must design, test and maintain all **main protection systems** at voltages of 220 kV a.c. or above to conform to electricity industry standards and practices as they are reasonably and ordinarily applied by a skilled and experienced **asset owner** to current installations at voltages of 220 kV a.c. or above in the New Zealand context.

Compare: Electricity Governance Rules 2003 clause 1 appendix A technical code A schedule C3 part C

**2 Specific requirements for main protection systems**

**Main protection systems** at voltages of 220 kV a.c. or above must meet the requirements set out below:

- (a) either test blocks or both test switches and test terminals must be provided:
- (b) the electrical continuity of fused protection circuits, including d.c. and voltage transformer circuits must be supervised:
- (c) the electrical continuity of **circuit breaker** trip circuits must be supervised.

Compare: Electricity Governance Rules 2003 clause 2 appendix A technical code A schedule C3 part C

**3 Specific requirements for duplicated main protection systems**

Duplicated **main protection systems** (the 2 components of which are referred to in this appendix as main 1 protection and main 2 protection) at voltages of 220 kV a.c. or above must meet the requirements set out below:

- (a) duplicated **main protection systems** must be designed with sufficient coverage and probability of detection that if any or all parts of 1 **main protection system** fail, the other **main protection system electrically disconnects** a faulted **asset** before a **back up protection system** initiates the **electrical disconnection** of other non-faulted **assets**:
- (b) the d.c. supply to duplicated **main protection systems** must consist of 2 independent station batteries, each with its own charger, supervision, and with a capacity and carry over duty to cover charger failure until repair and restoration. Station batteries may only feed a common primary d.c. busbar provided that the busbar is insulated and isolated from earth:
- (c) the d.c. supply to each duplicated **main protection system** must be independently fused at the primary d.c. busbar:
- (d) the manufacturer of main 1 protection must not be the same as the manufacturer of main 2 protection, unless one protection uses different measurement principles from the other:
- (e) the current transformer core (or an equivalent instrument) and the cabling associated with that current transformer core or equivalent instrument (as the case may be) used for main 1 protection must be independent from that used for main 2 protection:
- (f) if a voltage transformer supply is required for main 1 or main 2 protection—
  - (i) the supply must be fused at the voltage transformer; and
  - (ii) the supply for main 1 protection must use an independent fuse and cable

from those used for main 2 protection:

- (g) main 1 protection must use, in each of the **circuit breakers** tripped by that main 1 protection, an independent trip coil from that used for main 2 protection:
- (h) if protection signalling is used, main 1 protection must use a signal channel over an independent bearer on a different route from that used for main 2 protection:
- (i) main 1 protection cabling must be segregated from main 2 protection cabling in a manner that minimises the risk of common mode failure of main 1 and 2 protection and minimises the number of connections in any protection circuit.

Compare: Electricity Governance Rules 2003 clause 3 appendix A technical code A schedule C3 part C  
Clause 3(a) and (i): amended, on 5 October 2017, by clause 120 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 3(i): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

#### 4 Existing equipment

Despite clauses 1 and 3—

- (a) a current transformer **commissioned** before 31 May 2007 is not required to comply with clause 3(e) until the current transformer is replaced; and
- (b) a **circuit breaker commissioned** before 31 May 2007, if not designed to incorporate a second trip coil, is not required to comply with clause 3(g) until the **circuit breaker** is replaced; and
- (c) cabling **commissioned** before 31 May 2007, if not designed to be segregated, is not required to comply with the segregation requirements of clause 3(i) until the cabling is replaced.

Compare: Electricity Governance Rules 2003 clause 4 appendix A technical code A schedule C3 part C  
Clause 4: amended, on 5 October 2017, by clause 121 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

*Appendix B: Routine testing of assets and automatic under-frequency load shedding systems*

Cross heading: amended, on 7 August 2014, by clause 17 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Cross heading: amended, on 21 December 2021, by clause 20 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

## 1 Periodic tests to be carried out

- (1) This Appendix sets out periodic tests required for the purposes of clause 8(2) of **Technical Code A**.
- (2) Each **asset owner** may be legally required, other than under this Code, to carry out additional tests to ensure that their **assets**, including **automatic under-frequency load shedding** systems, are safe and reliable.
- (3) For the purposes of this Appendix, **generating unit** does not include a **generating unit** for which wind is the primary power source.

Compare: Electricity Governance Rules 2003 clause 1 appendix B technical code A schedule C3 part C

Clause 1: substituted, on 7 August 2014, by clause 18 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 1(2): amended, on 21 December 2021, by clause 21 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

## 2 Generating unit frequency response

Each **generator**, other than **generators** who are owners of **excluded generating stations** that are not subject to a directive issued by the **Authority** under clause 8.38, must—

- (a) test the trip frequencies and trip time delays of each of its **generating units'** analogue over-frequency relays and analogue under-frequency relays at least once every 4 years; and
- (b) test the trip frequencies and trip time delays of each of its **generating units'** non-self monitoring digital over-frequency relays and non-self monitoring digital under-frequency relays at least once every 4 years; and
- (c) test the trip frequencies and trip time delays of each of its **generating units'** self monitoring digital over-frequency relays and self monitoring digital under-frequency relays at least once every 10 years; and
- (d) based on the tests carried out in accordance with paragraphs (a) to (c), provide a verified set of under-frequency trip settings and time delays to the **system operator** in an updated **asset capability statement** within 3 months of the completion date of each such test; and
- (e) based on the tests carried out in accordance with paragraphs (a) to (c), provide a verified set of over-frequency trip settings and time delays to the **system operator** in an updated **asset capability statement** within 3 months of the completion date of each such test.

Compare: Electricity Governance Rules 2003 clause 2 appendix B technical code A schedule C3 part C

## 3 Generating unit governor and speed control

Each **generator**, other than **generators** who are owners of **excluded generating stations** that are not subject to a directive issued by the **Authority** under clause 8.38 must—

- (a) test the governor system response of each of its **generating units**' mechanical or analogue speed governors at least once every 5 years; and
- (b) test the governor system response of each of its **generating units**' digital or electro-hydraulic speed governors at least once every 10 years; and
- (c) based on the tests carried out in accordance with paragraphs (a) or (b), provide a verified set of modelling parameters and governor system response data to the **system operator** in an updated **asset capability statement** within 3 months of the completion date of each such test, including—
  - (i) a block diagram showing the mathematical representation of the governor; and
  - (ii) a block diagram showing the mathematical representation of the turbine dynamics including non-linearity and the applicable fuel source; and
  - (iii) a parameter list showing gains, time constants and other settings applicable to the block diagrams.

Compare: Electricity Governance Rules 2003 clause 3 appendix B technical code A schedule C3 part C

#### 4 **Generating unit transformer voltage control**

Each **generator** with a **point of connection** to the **grid** must—

- (a) test the operation of each of its **generating unit** transformers' on-load tap changer analogue **control systems** at least once every 4 years; and
- (b) test the operation of each of its **generating unit** transformers' on-load tap changer digital **control systems** at least once every 10 years; and
- (c) based on the tests carried out in accordance with paragraphs (a) or (b), provide a verified set of control parameters including voltage set points, operating dead bands and response times to the **system operator** in an updated **asset capability statement** within 3 months of the completion date of each such test.

Compare: Electricity Governance Rules 2003 clause 4 appendix B technical code A schedule C3 part C

#### 5 **Generating unit voltage response and control**

Each **generator** with a **point of connection** to the **grid** must—

- (a) test the modelling parameters and voltage response of each of its **generating units**' analogue excitation systems at least once every 5 years; and
- (b) test the modelling parameters and voltage response of each of its **generating units**' digital excitation systems at least once every 10 years; and
- (c) based on the tests carried out in accordance with paragraphs (a) or (b), provide a verified set of modelling parameters and voltage response data to the **system operator** in an updated **asset capability statement** within 3 months of the completion date of each such test, including—
  - (i) a block diagram showing the mathematical representation of the automatic voltage regulator; and
  - (ii) a block diagram showing the mathematical representation of the exciter; and
  - (iii) a parameter list showing gains, time constants and other settings applicable to the block diagrams.

Compare: Electricity Governance Rules 2003 clause 5 appendix B technical code A schedule C3 part C

## 6 North Island connected asset owner automatic under-frequency load shedding systems profiles and trip settings

Each North Island **connected asset owner** must—

- (a) provide the profile information described in clause 7(9) of **Technical Code B** of Schedule 8.3 to the **system operator** in an updated **asset capability statement** at least once every year; and
- (b) test the operation of its analogue **automatic under-frequency load shedding** systems at least once every 4 years; and
- (c) test the operation of its non-self monitoring digital **automatic under-frequency load shedding** systems at least once every 4 years; and
- (d) test the operation of its self monitoring digital **automatic under-frequency load shedding** systems at least once every 10 years; and
- (e) based on the relevant test carried out in accordance with paragraphs (b), (c) or (d), provide a verified set of trip settings and time delays to the **system operator** in an updated **asset capability statement** within 3 months of the completion date of the relevant test.

Compare: Electricity Governance Rules 2003 clause 6 appendix B technical code A schedule C3 part C  
Clause 6: revoked, on 7 August 2014, by clause 19 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.  
Clause 6: replaced, on 21 December 2021, by clause 22 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

## 7 South Island grid owner automatic under-frequency load shedding systems profiles and trip settings

Each South Island **grid owner** must—

- (a) provide the profile information described in clause 7(9) of **Technical Code B** of Schedule 8.3 to the **system operator** in an updated **asset capability statement** at least once every year; and
- (b) test the operation of its analogue **automatic under-frequency load shedding** systems at least once every 4 years; and
- (c) test the operation of its non-self monitoring digital **automatic under-frequency load shedding** systems at least once every 4 years; and
- (d) test the operation of its self monitoring digital **automatic under-frequency load shedding** systems at least once every 10 years; and
- (e) based on the relevant test carried out in accordance with paragraphs (b), (c) or (d), provide a verified set of trip settings and time delays to the **system operator** in an updated **asset capability statement** within 3 months of the completion date of the relevant test.

Compare: Electricity Governance Rules 2003 clause 7 appendix B technical code A schedule C3 part C  
Clause 7: revoked, on 7 August 2014, by clause 19 of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.  
Clause 7: replaced, on 21 December 2021, by clause 22 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

## 8 Grid owner transformer voltage range

Each **grid owner** must—

- (a) test the operation of each of its transformers' on-load tap changer analogue **control systems** at least once every 4 years; and
- (b) test the operation of each of its transformers' on-load tap changer digital **control systems** at least once every 10 years; and
- (c) based on the tests carried out in accordance with paragraphs (a) or (b), provide a verified set of control parameters to the **system operator** in an updated **asset capability statement** within 3 months of the completion date of each such test, including voltage set points, operating dead bands and response times.

Compare: Electricity Governance Rules 2003 clause 8 appendix B technical code A schedule C3 part C

## 9 Grid owner static var compensator transient response and control

Each **grid owner** must—

- (a) test the transient response, steady state response and a.c. disturbance response of each of its static var compensators at least once every 10 years; and
- (b) test the operation of each of its static var compensators' analogue **control systems** at least once every 4 years; and
- (c) test the operation of each of its static var compensators' digital **control systems** at least once every 10 years; and
- (d) based on the test carried out in accordance with paragraph (a), provide a verified set of modelling parameters, transient response parameters, steady state response parameters, and a.c. disturbance response data to the **system operator** in an updated **asset capability statement** within 3 months of the completion date of each such test including—
  - (i) a block diagram showing the mathematical representation of the static var compensator; and
  - (ii) a parameter list showing gains, time constants, limiters and other settings applicable to the block diagrams; and
  - (iii) a detailed functional description of all of the components of the static var compensator and how they interact in each mode of control; and
  - (iv) step response test results; and
  - (v) a.c. fault recovery disturbance test results; and
- (e) based on tests carried out in accordance with paragraphs (b) or (c), provide a set of **control system** test results to the **system operator** in an updated **asset capability statement** within 3 months of the completion date of each such test.

Compare: Electricity Governance Rules 2003 clause 9 appendix B technical code A schedule C3 part C

## 10 Grid owner capacitors and reactive power control systems

Each **grid owner** must—

- (a) test the capacitance of each of its capacitors at least once every 8 years; and
- (b) test the operation of each of its reactive power control assets' analogue **control systems** at least once every 4 years; and
- (c) test the operation of each of its reactive power control assets' digital **control systems** at least once every 10 years; and
- (d) based on the test carried out in accordance with paragraph (a), provide a set of test

results to the **system operator** in an updated **asset capability statement** within 3 months of the completion date of each such test; and

- (e) based on tests carried out in accordance with paragraphs (b) or (c), provide a verified set of **control system** test results including voltage set points, operating dead bands and time delays to the **system operator** in an updated **asset capability statement** within 3 months of the completion date of each such test.

Compare: Electricity Governance Rules 2003 clause 10 appendix B technical code A schedule C3 part C

## 11 Grid owner synchronous compensators

Each **grid owner** must—

- (a) test each of its synchronous compensators' analogue and electromechanical excitation systems at least once every 5 years; and
- (b) test each of its synchronous compensators' digital excitation systems at least once every 10 years; and
- (c) based on the tests carried out in accordance with paragraphs (a) or (b), provide a verified set of modelling parameters and voltage response data to the **system operator** in an updated **asset capability statement** within 3 months of the completion date of each such test including—
- (i) a block diagram showing the mathematical representation of the automatic voltage regulator; and
- (ii) a block diagram showing the mathematical representation of the exciter; and
- (iii) a detailed functional description of the excitation system in all modes of control; and
- (iv) a parameter list showing gains, time constants, limiters and other settings applicable to the block diagrams.

Compare: Electricity Governance Rules 2003 clause 11 appendix B technical code A schedule C3 part C

## 12 HVDC link frequency control and protection

The **HVDC owner** must—

- (a) test the operation of each of its **HVDC link's** analogue **control systems** at least once every 4 years; and
- (b) test the operation of each of its **HVDC link's** digital **control systems** at least once every 10 years; and
- (c) test the operation of each of its **HVDC link's** analogue protection systems at least once every 4 years; and
- (d) test the operation of each of its **HVDC link's** digital protection systems at least once every 10 years; and
- (e) test the modulation functions on its **HVDC link** at least once every 10 years; and
- (f) based on the tests carried out in accordance with paragraphs (a) or (b), provide a set of **control system** test results and verified modelling parameters to the **system operator** in an updated **asset capability statement** within 3 months of the completion date of each such test; and
- (g) based on the tests carried out in accordance with paragraphs (c) or (d), provide a set of protection system test results to the **system operator** in an updated **asset**

- capability statement** within 3 months of the completion date of each such test; and
- (h) based on the tests carried out in accordance with paragraph (e), provide a set of modulation function test results to the **system operator** in an updated **asset capability statement** within 3 months of the completion date of each such test including—
- (i) a block diagram showing the mathematical representation of the **HVDC link**; and
  - (ii) a parameter list showing gains, time constants, limiters and other settings applicable to the block diagram; and
  - (iii) a detailed functional description of all of the components of the **HVDC link** and how they interact in each mode of control.

Compare: Electricity Governance Rules 2003 clause 12 appendix B technical code A schedule C3 part C

### 13 Asset owner a.c. protection systems

Each **asset owner** must—

- (a) test the operation of the analogue protection systems on its a.c. **assets** at least once every 4 years; and
- (b) test the operation of the non-self monitoring digital protection systems on its a.c. **assets** at least once every 4 years; and
- (c) test the operation of the self monitoring digital protection systems on its a.c. **assets** at least once every 10 years; and
- (d) test the operation of the protection system measuring circuits on its a.c. **assets** by secondary injection at least once every 4 years; and
- (e) test the operation of the protection system trip circuits, including circuit breaker trips, on its a.c. **assets** at least once every 4 years; and
- (f) confirm at least once every 4 years that its protection settings are identified, coordinated, applied correctly and meet the requirements of the **AOPOs** and the **technical codes**; and
- (g) based on tests carried out in accordance with paragraphs (a) to (e), provide a verification to the **system operator** in an updated **asset capability statement** that the protection systems meet the requirements of the **AOPOs** and **technical codes** within 3 months of the completion date of each such test; and
- (h) based on the confirmation carried out in accordance with paragraph (f), provide an updated **asset capability statement** to the **system operator** within 3 months of the completion date of each such confirmation.

Compare: Electricity Governance Rules 2003 clause 13 appendix B technical code A schedule C3 part C

### 14 Representative testing

- (1) Subject to clause 8(3) of **Technical Code A**, each **asset owner** may provide the information required under clauses 3(c), 5(c), and 11(c) to the **system operator**, based on representative modelling parameters and response data instead of based on the tests required under clauses 3(a) and (b), 5(a) and (b), and 11(a) and (b), for any group of identical **assets**, if each of those **assets**—

- (a) was manufactured to the same specification; and
  - (b) is installed at the same location; and
  - (c) is controlled in the same way; and
  - (d) has a similar maintenance history.
- (2) Each **asset owner** providing representative modelling parameters and response data to the **system operator** in accordance with subclause (1) for a group of identical **assets** must—
- (a) complete a full set of tests in accordance with clauses 3(a) or (b), 5(a) or (b), and 11(a) or (b), as applicable, on an **asset** that is representative of that group to derive a verified set of modelling parameters and response data; and
  - (b) complete sufficient testing on the remaining **assets** in that group of identical **assets** in accordance with clauses 3(a) or (b), 5(a) or (b), and 11(a) or (b), as applicable, to verify that the performance of the remaining **assets** in that group is fully consistent with the modelling parameters and response data derived from the tests carried out on the representative **asset**; and
  - (c) certify to the **system operator**, that to the best of the **asset owner's** information, knowledge and belief, the performance of that group of **assets** is fully consistent with the representative modelling parameters and response data provided to the **system operator** for that group of **assets**.

Compare: Electricity Governance Rules 2003 clause 14 appendix B technical code A schedule C3 part C

## 15 Transitional provisions

- (1) Unless a test interval of less than 60 months is specified in this Appendix, each **asset owner** must complete the first of each test required in this Appendix no later than 5 June 2013.
- (2) A test that is required to be carried out in accordance with this Appendix, but that an **asset owner** carried out before 5 June 2008, is deemed to be the first test of that type required in this Appendix, if—
  - (a) the **asset owner** has submitted the relevant written test results to the **system operator**; and
  - (b) the **system operator** has advised the **asset owner** that the specification of the test is acceptable; and
  - (c) the interval between the actual date of the test and the date on which this Code came into force is less than the maximum test interval specified for the corresponding test in this Appendix.
- (3) If a test has been deemed to be the first test in accordance with subclause (2), the date by which the next such test must be carried out must be calculated using the actual date upon which the first test was carried out, not the date upon which it was deemed to have been carried out.

Compare: Electricity Governance Rules 2003 clause 15 appendix B technical code A schedule C3 part C  
Clause 15(1): amended, on 21 September 2012, by clause 11(1) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.  
Clause 15(2): amended, on 21 September 2012, by clause 11(2) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

*Technical Code B – Emergencies*

**1 Purpose and application**

The purpose of this **technical code** is to set out the basis on which the **system operator** and **participants** must plan for, anticipate and respond to emergency events on the **grid** that affect the **system operator’s** ability to plan to comply, and to comply with its **principal performance obligations**.

Compare: Electricity Governance Rules 2003 clause 1.1 technical code B schedule C3 part C  
Clause 1: amended, on 21 December 2021, by clause 23 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**2 Application**

This **technical code** applies to all **asset owners** except for **excluded generating stations**. If the **system operator** reasonably considers it necessary to assist the **system operator** in planning to comply and complying with the **principal performance obligations**, the **system operator** may require that an **excluded generating station** comply with some or all of the requirements of this **technical code**.

Compare: Electricity Governance Rules 2003 clause 1.2 technical code B schedule C3 part C

**3 Obligations of all parties**

The **system operator** and all **participants** must plan individually and, if appropriate, collectively, for a **grid emergency**, and act quickly and safely during a **grid emergency** in accordance with this **technical code**, so that the actual and potential impacts of any **grid emergency** are minimised.

Compare: Electricity Governance Rules 2003 clause 2 technical code B schedule C3 part C

**4 Obligations of the system operator**

The **system operator** must use reasonable endeavours to ensure that—

- (a) if necessary, each **participant** is advised of any independent action required of it if there is a **grid emergency**; and
- (b) **grid owners** or other **asset owners** specify to the **system operator** the facilities they have in place to manually **electrically disconnect demand** at each **point of connection**.

Compare: Electricity Governance Rules 2003 clause 3 technical code B schedule C3 part C  
Clause 4: amended, on 15 May 2014, by clause 12 of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.  
Clause 4(b): amended, on 5 October 2017, by clause 122 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 4(b): amended, on 1 March 2024, by clause 31 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

**5 Formal notices and responses**

- (1) The **system operator** must issue a notice either orally or in writing to relevant **participants** whenever, or as soon as practicable after, any of the following events has occurred:
  - (a) the ability of the **system operator** to plan to comply, and to comply, with the **principal performance obligations** is at risk or is compromised (as set out in the

**policy statement):**

- (b) public safety is at risk:
  - (c) there is a risk of significant damage to **assets**:
  - (d) independent action has been taken in accordance with this **technical code** to restore the **system operator's principal performance obligations**:
  - (e) an **unsupplied demand situation**.
- (1A) *[Revoked]*
- (1B) *[Revoked]*
- (1C) *[Revoked]*
- (2) The **system operator** must ensure that a **formal notice** issued in accordance with subclause (1) includes the following:
- (a) the electrical or geographical region affected by the notice:
  - (b) the potential consequences of the situation:
  - (c) the responses requested of **participants**:
  - (d) the start time and end time of the situation to which the notice applies.
- (3) The **system operator** must record the issue of a **formal notice**, and each **participant** must record receipt of a **formal notice**.
- (4) If the **system operator** issues a request in accordance with this **technical code** to a **participant**, the **participant** must use reasonable endeavours to respond to the request.

Clause 5(1B): inserted, on 1 June 2013, by clause 5(a) of the Electricity Industry Participation (Scarcity Pricing) Code Amendment 2011. Clause 5(1C): inserted, on 1 June 2013, by clause 5(a) of the Electricity Industry Participation (Scarcity Pricing) Code Amendment 2011.

Clause 5(1A), (1B) and (1C): revoked, on 1 November 2022, by clause 8(2) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022. Clause 5(2): amended, on 1 June 2013, by clause 5(b) of the Electricity Industry Participation (Scarcity Pricing) Code Amendment 2011.

Clause 5(2): amended, on 1 November 2022, by clause 8(3) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022. Clause 5(2)(d): amended, on 19 January 2017, by clause 4 of the Electricity Industry Participation Code Amendment (Scarcity Pricing) 2016.

**5A Request to inform the system operator of available controllable load**

- (1) A **connected asset owner** must, as soon as reasonably practicable following a request by the **system operator**, inform the **system operator** of its available **controllable load** using a method or form agreed with the **system operator**.
- (2) A **connected asset owner** must submit **difference bids** to provide the information required under subclause (1) to the **system operator**, unless the **connected asset owner** agrees an alternative form or method for providing this information with the **system operator**.
- (3) For the purposes of subclauses (4) and (5), a **connected asset owner** who submits **difference bids** to the **system operator** under subclause (1) is deemed to be a **purchaser** who purchases **non-dispatch-capable load** at a **conforming GXP** for the purposes of clauses 13.7AA, 13.7AC, 13.7AD, 13.13(2), 13.15, 13.16 and 13.19A.
- (4) If the **system operator** requests information regarding available **controllable load**

under subclause (1), a **connected asset owner** who submits **difference bids** must, as soon as reasonably practicable following a request by the **system operator**—

- (a) submit to the **system operator** for each **trading period** notified by the **system operator** a **difference bid** that represents a reasonable estimate of the available **controllable load** which the **connected asset owner** can use to decrease its **demand**—
    - (i) at each **conforming GXP** in the **connected asset owner's** network or at a **conforming GXP** nominated by the **system operator** and agreed with the **connected asset owner**; and
    - (ii) for the **trading period**; and
    - (iii) at a single price band of \$9,000 per **MWh**; and
  - (b) following any **difference bids** submitted under paragraph (a), submit revised **difference bids** to reflect any changes in the **connected asset owner's** estimate of available **controllable load**, as soon as reasonably practicable following such changes.
- (5) No later than 5 **business days** following a request or requirement from the **system operator** under this **technical code** to reduce or disconnect **controllable load**, a **connected asset owner** who submits **difference bids** to the **system operator** must provide data as reasonably requested by the **system operator** to enable it to confirm the **connected asset owner's** compliance with subclause (4).
- (6) For the purposes of this clause 5A and the definition of **controllable load** in Part 1, a **connected asset owner** means a **distributor** in its capacity as the owner or operator of a **local network**, but excludes—
- (a) an **embedded generator**; and
  - (b) an owner or operator of an **embedded network**.

Clause 5A: inserted, on 3 May 2023, by clause 5 of the Electricity Industry Participation Code Amendment (Discretionary Demand Control) 2023 and expired 3 February 2024.

Clause 5A: inserted, on 1 May 2024, by clause 5 of the Electricity Industry Participation Code Amendment (Controllable Load) 2024.

## 6 Actions to be taken by the system operator in a grid emergency

- (1) If an **unsupplied demand situation**, or insufficient generation and **frequency keeping** gives rise to a **grid emergency**, the **system operator** may, having regard to the priority below, if practicable, and regardless of whether a **formal notice** has been issued, do 1 or more of the following:
  - (a) request that a **generator** varies its **offer** and **dispatch** the **generator** in accordance with that **offer**, to ensure there is sufficient generation and **frequency keeping**;
  - (b) request that a **purchaser** or a **connected asset owner** reduce **demand**;
  - (c) require a **grid owner** to reconfigure the **grid**;
  - (d) require the **electrical disconnection** of **demand** in accordance with clause 7(20);
  - (e) take any other reasonable action to alleviate the **grid emergency**.
- (2) If insufficient transmission capacity gives rise to a **grid emergency**, the **system operator** may, having regard to the priority below, if practicable, and regardless of whether a **formal notice** has been issued, do 1 or more of the following:
  - (a) request that a **generator** varies its **offer** and **dispatch** the **generator** in accordance with that **offer**, to ensure that the available transmission capacity

within the **grid** is sufficient to transmit the remaining level of **demand**:

- (b) request that an **asset owner** restores its **assets** that are not in service:
  - (c) request that a **purchaser** or **connected asset owner** reduces its **demand**:
  - (d) require the **electrical disconnection of demand** in accordance with clause 7(20):
  - (e) take any other reasonable action to alleviate the **grid emergency**.
- (3) If frequency is outside the **normal band** and all available **injection** has been **dispatched**, the **system operator** may require the **electrical disconnection of demand** in accordance with clause 7(20) in appropriate block sizes until frequency is restored to the **normal band**.
- (4) If any **grid** voltage reaches the minimum voltage limit set out in the table contained in clause 8.22(1), and is sustained at or below that limit, the **system operator** may require the **electrical disconnection of demand** in accordance with clause 7(20) in appropriate block sizes until the voltage is restored to above the minimum voltage limit.
- (5) The **system operator** may, if an unexpected event occurs giving rise to a **grid emergency**, take any reasonable action to alleviate the **grid emergency**.

Clause 6: amended, on 5 October 2017, by clause 124 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 6(1)(b): amended, on 1 February 2016, by clause 19 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 6(1)(d), amended, on 7 August 2014, by clause 20(1) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 6(2)(c): amended, on 1 February 2016, by clause 19 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 6(2)(d): amended, on 7 August 2014, by clause 20(1) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 6(3): amended, on 7 August 2014, by clause 20(2) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 6(4): amended, on 7 August 2014, by clause 20(1) of the Electricity Industry Participation Code Amendment (Extended Reserve) 2014.

Clause 6(1)(d), (2)(d), 3 and 4: amended, on 21 December 2021, by clause 24 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021

Clause 6(1): amended, on 1 November 2022, by clause 9 of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

## 7 Load shedding systems

- (1) Each North Island **connected asset owner** must ensure, at all times, that an **automatic under-frequency load shedding** system is installed in accordance with subclauses (6) and (6AA).
- (2) Every South Island **grid owner** must ensure, at all times, that an **automatic under-frequency load shedding system** is installed in accordance with subclause (6A) for each **grid exit point** in the South Island.
- (3) Subject to subclause (8), each **connected asset owner** and **grid owner** must use reasonable endeavours to ensure that at all times its **automatic under-frequency load shedding** systems are maintained in accordance with subclauses (6) and (6AA) or (6A) as applicable.
- (4) If, at any time, a North Island **connected asset owner** believes that an **automatic under-frequency load shedding** system may not be capable of meeting the requirements of subclauses (6) or (6AA) or a South Island **grid owner** believes that an **automatic under-frequency load shedding** system may not be capable of meeting the

- requirements of subclause (6A), the relevant **connected asset owner** or **grid owner** must notify the **system operator** as soon as practicable and provide any information that the **system operator** reasonably requests.
- (5) Each South Island **connected asset owner** must co-operate fully with any **grid owner** in relation to an **automatic under frequency load shedding** system installed at any **grid exit points** at which the **connected asset owner** is connected to the **grid**. Each South Island **connected asset owner** must also provide the **grid owner** with any information relating to **automatic under-frequency load shedding** that the **grid owner** reasonably requests.
- (6) An **automatic under-frequency load** shedding system required to be provided in accordance with subclause (1) must enable, at all times, automatic **electrical disconnection of demand** either—
- (a) as 2 blocks of **demand** (each block being a minimum of 16% of the **connected asset owner's** total pre-event **demand**), with—
- (i) block 1 **electrically disconnecting demand** within 0.4 seconds after the frequency reduces to, and remains at or below, 47.8 Hertz; and
- (ii) block 2 **electrically disconnecting demand**—
- (A) 15 seconds after the frequency reduces to, and remains at or below, 47.8 Hertz; and
- (B) within 0.4 seconds after the frequency reduces to, and remains at or below, 47.5 Hertz; or
- (b) in accordance with the **system operator's AUFLS technical requirements report**, as agreed with the **system operator** and subject to subclause (6AA).
- (6AA) Each North Island **connected asset owner** must transition as soon as reasonably practicable, and must be proactively engaging with the **system operator** to transition as soon as reasonably practicable, to an **automatic under-frequency load shedding** system that complies with the **system operator's AUFLS technical requirements report**. The transition must be completed before 30 June 2025.
- (6A) An **automatic under-frequency load shedding** system required to be provided in accordance with subclause (2) must enable, at all times, automatic **electrical disconnection** of 2 blocks of **demand** (each block being a minimum of 16% of the **grid owner's** total pre-event **demand**) subject to subclause (8), with—
- (a) block 1 **electrically disconnecting demand** within 0.4 seconds after the frequency reduces to, and remains at or below, 47.5 Hertz; and
- (b) block 2 **electrically disconnecting demand**—
- (i) 15 seconds after the frequency reduces to, and remains at or below, 47.5 Hertz; and
- (ii) within 0.4 seconds after the frequency reduces to, and remains at or below, 46.5 Hertz.
- (7) To avoid doubt, the **demand** calculated to comprise **automatic under-frequency load shedding** blocks must be net of any **interruptible load** procured by the **system operator**.
- (8) Subject to the **system operator's** agreement, which must not be unreasonably withheld, a **grid owner** may redistribute **automatic under-frequency load shedding** quantities

- between **grid exit points**, if the overall **automatic under-frequency load shedding** quantity obligations in subclause (6A) are met.
- (9) In addition to their obligations to provide information under clauses 6 and 7 of Appendix B of **Technical Code A**, each North Island **connected asset owner** and each South Island **grid owner** must provide **automatic under-frequency load shedding** block **demand** profile information to the **system operator** if reasonably requested by the **system operator**. For each North Island **connected asset owner** that information must be in the form, and supplied by the date, specified by the **system operator** in the **AUFLS technical requirements report**. For each South Island **grid owner** that information must be in the form specified by the **system operator** in the relevant **asset capability statement**.
- (9A) If requested by the **Authority**, the **system operator** must provide information it obtains under clauses 6 and 7 of Appendix B of **Technical Code A** and subclause (9) of this clause to the **Authority**, supplemented by the **system operator's** assessment, based on its analysis of that information, as to whether the **automatic under-frequency load shedding** scheme is secure.
- (10) Subclauses (12) to (16) apply if a direction under clause 9.15 is in force.
- (11) When subclauses (12) to (16) apply, the **system operator** may give notice to 1 or more of the **participants** specified in subclause (14), specifying modifications to the extent to which subclauses (1) to (4), (6), (6AA) and (6A) apply to the **participant** during any 1 or more periods, or in any 1 or more circumstances, specified in the notice.
- (12) The **system operator** must keep a record of each notice given under subclause (11).
- (13) When a notice under subclause (11) is in force in relation to a **participant**, the requirements of subclauses (1) to (4), (6), (6AA) and (6A) are modified for that **participant** to the extent, and during the periods, or in the circumstances (as the case may be), specified in the notice.
- (14) The participants to whom the **system operator** may issue a notice in accordance with subclause (11) are—
- (a) **connected asset owners** in the North Island;
  - (b) **grid owners** in the South Island.
- (15) The **system operator** may amend or revoke a notice, or revoke and substitute a new notice.
- (16) A notice under subclause (11) expires on the earlier of—
- (a) the date (if any) specified in the notice for its expiry;
  - (b) the revocation or expiry of the direction referred to in subclause (10).
- (17) The **system operator**, each **connected asset owner**, each **grid owner** and each relevant **retailer** must, to the extent reasonably practicable, co-operate to ensure that any **interruptible load** contracted by the **system operator** that could affect the size of an **automatic under-frequency load shedding** block is identified to assist the **connected asset owner** or the **grid owner** to meet its obligations in subclauses (1) to (9).
- (18) On the operation of an **automatic under-frequency load shedding** system, the **connected asset owner** or **grid owner**—
- (a) must, as soon as practicable, advise the **system operator** of the operation of the **automatic under-frequency load shedding** system and, if reasonably required

- by the **system operator** to plan to comply, or to comply, with its **principal performance obligations**, a reasonable estimate of the amount of **demand** that has been **electrically disconnected**; and
- (b) may **electrically connect the demand electrically disconnected** through the **automatic under-frequency load shedding** system only when permitted to do so by the **system operator**; and
  - (c) must ensure **demand electrically connected** in accordance with paragraph (b) complies with subclauses (6), (6AA) and (6A); and
  - (d) must report to the **system operator** if demand is moved between **points of connection**; and
  - (e) may request permission to **electrically connect demand** from the **system operator** if no instruction to **electrically connect demand** is received from the **system operator** within 15 minutes of the frequency returning to the **normal band**; and
  - (f) may cautiously and gradually **electrically connect the demand electrically disconnected** through the **automatic under-frequency load shedding** system if there is a **loss of communication**, after 15 minutes of the **loss of communication** occurring. This restoration must be done only while the frequency is within the **normal band** and the voltage is within the required range. Each **connected asset owner** must immediately cease the restoration of **demand** and, to the extent necessary, **electrically disconnect demand**, if the frequency drops below the **normal band** or the voltage moves outside the required range. As soon as practicable after communications are restored, each **connected asset owner** or each **grid owner** must report to the **system operator** on the status of load restoration and the status of re-arming the **automatic under-frequency load shedding** system; and
  - (g) must provide data detailing the **automatic under-frequency load shedding** system operation as detailed in the **AUFLS technical requirements report** or in a format agreed with the **system operator**.
- (19) Each **connected asset owner** must maintain an up-to-date process for the **electrical disconnection of demand for points of connection**, including the specification of the **participant** who will effect the **electrical disconnection of demand**. The **connected asset owner** must obtain agreement for the process from the **system operator** and each **grid owner** (such agreement not to be unreasonably withheld). Each **connected asset owner** must advise the **system operator** of the agreed process in addition to any changes to a process previously advised.
- (20) If the **system operator** requires the **electrical disconnection of demand** in accordance with this **Technical Code**, the **system operator** must instruct **connected asset owners** and **grid owners** (as the case may be) in accordance with the agreed process in subclause (19) to **electrically disconnect demand** for the relevant **point of connection**. If the **system operator** and a **connected asset owner** or **grid owner** (as the case may be) have not agreed on a process for **electrical disconnection of demand** for a **point of connection**, the **system operator** must instruct **grid owners** to **electrically disconnect demand** directly at the relevant **point of connection**. To the extent practicable, the

**system operator** must use reasonable endeavours to ensure equity between **connected asset owners** when instructing the **electrical disconnection of demand**.

- (21) Each **connected asset owner** or **grid owner** must act as instructed by the **system operator** operating in accordance with clauses 6 and 7.

Clause 7C: revoked, on 21 December 2021, by clause 28 of the Electricity Industry Participation Code Amendment (Automatic Under-Frequency Load Shedding Systems) 2021.

**8 Obligations of grid owners**

- (1) A **grid owner** must use reasonable endeavours to ensure that appropriate **assets** are installed for the manual **electrical disconnection of demand** at **points of connection**.
- (2) A **grid owner** must take independent action as may be required by the **system operator** in accordance with clause 6(4), to **electrically disconnect demand** at **points of connection** when any **grid** voltage reaches the minimum voltage limit set out in the table contained in clause 8.22(1) and is sustained at or below that level. A **grid owner** must continue to **electrically disconnect demand** at **points of connection** while the voltage remains below that minimum voltage limit, being guided by any arrangements with **connected asset owners** as advised by the **system operator**.

Compare: Electricity Governance Rules 2003 clause 7 technical code B schedule C3 part C

Clause 8(2): amended, on 1 February 2016, by clause 22 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 8(1) and (2): amended, on 5 October 2017, by clause 128(1) and (2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**9 Obligations of generators and ancillary service agents to take independent action**

The following independent action is required of **generators** and **ancillary service agents** during the occurrence of extreme variations of frequency or voltage at the **points of connection** to which their **assets** are connected (such extreme levels of frequency or voltage are deemed to constitute a **grid emergency** and require a fast and independent response from each **generator** and each **ancillary service agent**):

- (a) when the **under-frequency limit** is reached and the frequency continues to fall, each **generator** must use reasonable endeavours to take the following immediate independent action to assist in restoring frequency:
  - (i) increase the energy **injection** from each **generating unit** that is physically

- capable of increasing such **injection**:
- (ii) attempt to restore **grid** frequency to the **normal band** by **synchronising** and loading each **generating unit** that is not **electrically connected** but is able to be **electrically connected** and operated in this manner:
  - (iii) **re-synchronise** and load each **generating unit** that has tripped and is able to be **electrically connected** and operated in this manner:
  - (iv) report to the **system operator** as soon as practicable after taking action in accordance with subparagraphs (i) to (iii):
- (b) when the **over frequency limit** is reached and the frequency continues to rise, each **generator** must use reasonable endeavours to take the following immediate independent action to assist in restoring frequency:
- (i) decrease the energy injection from **electrically connected generating units** if the **generator** is physically capable of decreasing such **injection**:
  - (ii) report to the **system operator** as soon as practicable after taking action in accordance with subparagraph (i):
- (c) when either the minimum voltage limit or the maximum voltage limit set out in the table contained in clause 8.22(1) is exceeded at any **point of connection**:
- (i) **generators** and **ancillary service agents** must use reasonable endeavours to take immediate independent action to return the voltage to, as close as practicable, within such limits:
  - (ii) each **generator** must use reasonable endeavours to **synchronise** and, as necessary, load and adjust all available **generating units** that can assist in restoring the voltage:
  - (iii) **ancillary service agents** must use reasonable endeavours to **electrically connect** to the **grid** and, as necessary, load all available **reactive capability** resources, that can assist in restoring the voltage:
  - (iv) as soon as practicable after taking the actions described in subparagraphs (i) to (iii), each **generator** and **ancillary service agent** must report to the **system operator** on the action taken to correct voltage:
- (d) for a **loss of communication** with the **system operator**, lasting at least 5 minutes, each **generator** must use reasonable endeavours to—
- (i) for **synchronised generating units**, take independent action to adjust supply to maintain frequency as close as possible to the **normal band**, and maintain voltage as close as possible either to that previously advised by the **system operator**, or as can be best established by the **generator**; and
  - (ii) **synchronise** available **generating units** to the **grid** if the **generating units** currently **electrically connected** do not have the capacity to control the frequency and voltage as required by paragraph (e)(i); and
  - (iii) continue to attempt to maintain the frequency and voltage to meet the requirements of paragraph (e)(i); and
  - (iv) as soon as practicable after communications are restored, report to the **system operator** on the action taken:
- (e) for a **loss of communication** with the **system operator** lasting at least 5 minutes, **ancillary service agents** must use reasonable endeavours to—
- (i) if on load, take independent action to adjust any real or **reactive power**

resources to maintain frequency and voltage as close as possible either to that previously advised by the **system operator** or as can be best established by the **ancillary service agent**; and

- (ii) **electrically connect** available **reactive capability** resources to the **grid** if the currently **electrically connected reactive power** resources do not have the capacity to control the voltage above the minimum limit set out in the table contained in clause 8.22(1); and
  - (iii) continue to attempt to maintain the voltage above the minimum limit set out in the table contained in clause 8.22(1); and
  - (iv) as soon as practicable after communications are restored, report to the **system operator** on the action taken:
- (f) in the event of a failure at the **system operator's** operational centre that disables the main **dispatch** or communication systems, the **system operator** may temporarily transfer its operational activities to an alternative operational centre. If the **system operator** makes such a transfer, the **system operator** must:
- (i) arrange for communication facilities to transfer to the new location; and
  - (ii) give written notice to **participants** of those arrangements.

Compare: Electricity Governance Rules 2003 clause 8 technical code B schedule C3 part C

Clause 9: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 9: amended, on 5 October 2017, by clause 129 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9(c): replaced, on 20 December 2021, by clause 18(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 9(f): replaced, on 20 December 2021, by clause 18(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

*Technical Code C – Operational communications*

**1 Purpose**

The purpose of this **technical code** is to state the minimum requirements for the communications required under this Code between **asset owners**, except owners of **excluded generating stations**, and the **system operator**, in order to assist the **system operator** to plan to comply, and to comply, with the **principal performance obligations**. Additional requirements may be set out in other clauses. This **technical code** does not deal with the content of communications, which is dealt with in each **technical code** and in Part 13 where relevant.

Compare: Electricity Governance Rules 2003 clause 1.1 technical code C schedule C3 part C

**2 Application**

This **technical code** applies to the **system operator** and to all **asset owners** except owners of **excluded generating stations**. If the **system operator** reasonably considers it necessary to assist the **system operator** in planning to comply, and complying, with the **principal performance obligations**, the **system operator** may require that an **excluded generating station** comply with some or all of the requirements of this **technical code**.

Compare: Electricity Governance Rules 2003 clause 1.2 technical code C schedule C3 part C

**3 General requirements for operational communications**

- (1) Each voice or electronic communication between the **system operator** and an **asset owner** must be logged by the **system operator** and the **asset owner**. Unless otherwise agreed between the **system operator** and the **asset owner**, every voice instruction must be repeated back by the person receiving the instruction and confirmed by the person giving the instruction before the instruction is actioned.
- (2) The **system operator** and each **asset owner** must nominate and advise each other of the preferred points of contact and the alternative points of contact to be used by the **system operator** and the **asset owner**. Each **asset owner** must also nominate and advise the **system operator** of the person to receive instructions and **formal notices** as set out in **Technical Code B**. The preferred points of contact must include those to be used when the **system operator** instructs the **asset owner**, when the **system operator** sends **formal notices** to the **asset owner** and when the **asset owner** contacts the **system operator**. The alternative points of contact must be used only if the preferred points of contact are not available.
- (3) The **grid owner** and each other **asset owner** must nominate and advise each other of the preferred points of contact and the alternative points of contact to be used by the **grid owner** and the other **asset owner** for the purpose of communications regarding the availability of the **grid owner's** data transmission communications. The alternative points of contact must only be used if the preferred points of contact are not available.

Compare: Electricity Governance Rules 2003 clause 2 technical code C schedule C3 part C

#### 4 Specific requirements for voice communication

- (1) Each **asset owner** must have in place a primary means of communicating by voice between the **control room** of the **asset owner** and the **system operator**. The primary means of voice communication must use either—
  - (a) the **grid owner's** speech network; or
  - (b) a widely available public switched telephone network that operates in real time and in full duplex mode.
- (2) Each **asset owner** must have in place a backup means of communicating by voice between the **control room** of the **asset owner** and the **system operator**. The backup means of voice communication—
  - (a) must be approved by the **system operator** (such approval not to be unreasonably withheld); and
  - (b) may include, but is not limited to, satellite phone or cellular phone; and
  - (c) may be used only if the primary means of voice communication described in subclause (1) is unavailable or otherwise with the agreement of the **system operator**.
- (3) An **asset owner** who has a **control room** with, at any time, operational control of more than 299 MW of **injection, offtake**, or power flow must have 2 or more back up means of voice communication between the **control room** of the **asset owner** and the **system operator**, each of which must meet the requirements of subclause (2).

Compare: Electricity Governance Rules 2003 clause 3 technical code C schedule C3 part C

#### 5 Specific requirements for transmitting information

- (1) Each **asset owner** must transmit information between its **control room** and the **system operator** in writing.
- (2) Despite subclause (1), an **asset owner** may request the **system operator** to approve an alternative means of transmitting information (such approval not to be unreasonably withheld).
- (3) Each **asset owner** must have in place a backup means of transmitting information. The backup means of transmitting information—
  - (a) must be approved by the **system operator** (such approval not to be unreasonably withheld); and
  - (b) may include, but is not limited to, voice communication or email; and
  - (c) may only be used if the primary means of transmitting information described in subclause (1) or (2) is unavailable or otherwise with the agreement of the **system operator**.

Compare: Electricity Governance Rules 2003 clause 4 technical code C schedule C3 part C

Heading: amended, on 5 October 2017, by clause 130(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 5(1): replaced, on 5 October 2017, by clause 130(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 5(2) and (3): amended, on 5 October 2017, by clause 130(3) and (4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## **6 Specific requirements for data transmission communication**

- (1) Each **asset owner** (other than a **grid owner**) must have in place—
  - (a) a primary means of transmitting data between the **assets** of the **asset owner** and a **SCADA** remote terminal unit of a **grid owner**; or
  - (b) if approved by the **system operator** (such approval not to be unreasonably withheld), a primary means of transmitting data between the **assets** of the **asset owner** and the **system operator**.
- (2) A **grid owner** must have in place a primary means of transmitting data between the **assets** of the **grid owner** and the **system operator**.
- (3) Each **asset owner** must have in place a backup means of transmitting data for each type of indication and measurement specified in Appendix A of this **technical code**. The backup means of data transmission communication—
  - (a) must be approved by the **system operator** (such approval not to be unreasonably withheld); and
  - (b) may include, but is not limited to, use of voice communication or document transmission communication; and
  - (c) may only be used if the primary means of data transmission communication described in subclause (1) or (2) is unavailable or otherwise with the agreement of the **system operator**.

Compare: Electricity Governance Rules 2003 clause 5 technical code C schedule C3 part C

## **7 Availability of primary means of communication**

- (1) Each **asset owner** must use reasonable endeavours to ensure that the primary means of communication described in clauses 4(1), 5(1) or (2), and 6(1) or (2) is available continuously.
- (2) If the primary means of communication described in clauses 4(1), 5(1) or (2), and 6(1) or (2) is unavailable, an **asset owner** must use reasonable endeavours to restore availability of the primary means of communication as soon as practicable.

Compare: Electricity Governance Rules 2003 clause 6 technical code C schedule C3 part C

## **8 Notice of planned outages of primary means of communication**

Each **asset owner** must give written notice to the **system operator** of any planned outage of a primary means of communication described in clauses 4(1), 5(1) or (2), and 6(1) or (2).

Compare: Electricity Governance Rules 2003 clause 7 technical code C schedule C3 part C

Clause 8 heading: amended, on 1 November 2018, by clause 16 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 8: amended, on 5 October 2017, by clause 131 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## **9 Performance requirements for indications and measurements**

- (1) Each **asset owner** must provide the relevant indications and measurements shown in Appendix A to the **system operator**, in accordance with clause 6. The **system operator** may require the **asset owner** to provide additional information if, in the reasonable opinion of the **system operator**, such information is required for the **system operator** to plan to comply, and to comply, with its **principal performance obligations**.

- (2) The **asset owner** must use reasonable endeavours to ensure that the accuracy of the measurements it provides to the **system operator** in accordance with subclause (1) complies with Appendix A.
- (3) Each indication and measurement provided in accordance with subclause (1) must be updated at the **grid owner's SCADA** remote terminal or the **system operator's** interface unit at least once every 8 seconds when provided by the primary means of data transmission communications.

Compare: Electricity Governance Rules 2003 clause 8 technical code C schedule C3 part C

*Appendix A: Indications and Measurements  
(Clause 9(1)-(3) of Technical Code C)*

**Table A1: Requirements of generators**

Each **generator** must provide the indications and measurements in Table A1. If net (or gross) measurements are required in Table A1, the use of **scaling factors** together with the provision of the relevant gross (or net) values is acceptable with the **system operator's** approval. Each **generator** must provide **scaling factors** to the **grid owner** so that the **grid owner** can apply the adjustment at the **SCADA** server.

Indication or measurement	Values required	Accuracy <sup>3</sup>
<b>Station net MW</b>	Import and export	±2%
<b>Generating unit gross MW<sup>1</sup></b>	Import and export, for each <b>generating unit</b>	±2%
<b>Station net Mvar</b>	Import and export	±2%
<b>Generating unit gross Mvar<sup>1</sup></b>	Import and export, for each <b>generating unit</b>	±2%
<b>Generating unit circuit breaker status<sup>1</sup></b>	Open /closed /in transition/ indication error <sup>2</sup>	N/A
<b>Grid interface circuit breaker status</b>	Open /closed /in transition/ indication error <sup>2</sup>	N/A
<b>Grid interface disconnecter status</b>	Open /closed /in transition/ indication error	N/A
<b>Special protection scheme status</b>	Enabled/disabled/summer/winter	N/A
Maximum output capacity of <b>generating station (for intermittent generators only)</b>	Number of connected <b>generating units</b> × <b>MW</b> capability of each <b>generating unit</b>	N/A

Compare: Electricity Governance Rules 2003 table A1 appendix A technical code C schedule C3 part C

Table A1: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Table A1: amended, on 5 October 2017, by clause 132 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**Table A2: Requirements of grid owners:**

Each **grid owner** must provide the indications and measurements shown in Table A2 in respect of **assets** connected to, or forming part of, the **grid**.

Indication or measurement	Values required	Accuracy <sup>3</sup>
<b>Grid interface circuit breaker status</b>	Open /closed /in transition/ indication error <sup>2</sup>	N/A
<b>Grid interface disconnecter status</b>	Open/ closed/ in transition/ closed to earth/ indication error	N/A
<b>Grid interface auto reclose status</b>	Enabled/disabled/ operated/locked out	N/A
<b>Grid interface MW</b>	Import and export	±2%

Indication or measurement	Values required	Accuracy <sup>3</sup>
<b>Grid interface</b> Mvar	Import and export	±2%
Circuit Amps	Current at each termination point of a circuit	N/A
Circuit MW	MW at each termination point of a circuit	N/A
Circuit Mvar	Mvar at each termination point of a circuit	N/A
Tap positions for <b>interconnecting transformers</b> and supply transformers with on-load tap changers	Tap position for all windings including tapped tertiaries	N/A
Tap positions for <b>interconnecting transformers</b> and supply transformers with off-load tap changers <sup>4</sup>	Tap position for all windings including tapped tertiaries	N/A
Reactive plant (eg RPC equipment, capacitor, reactor, condenser) Mvar	Import and export	±2%
Bus voltage	kV	±2%
<b>Special protection scheme</b> status	Enabled/disabled/summer/winter	N/A
HVDC modulation status	Frequency stabiliser/ spinning reserve sharing/ Haywards frequency control/ AC transient voltage support	N/A

Compare: Electricity Governance Rules 2003 table A2 appendix A technical code C schedule C3 part C  
Table A2: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Table A2: amended, on 5 October 2017, by clause 133 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Table A2: amended, on 20 December 2021, by clause 19 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

### Table A3: Requirements of connected asset owners

Each **connected asset owner** must provide the indications and measurements shown in Table A3 in respect of **assets** connected to, or forming part of, the **grid**.

Indication or measurement	Values required	Accuracy <sup>3</sup>
<b>Grid interface circuit breaker</b> status	Open/ closed/ in transition/ indication error <sup>2</sup>	N/A
<b>Grid interface</b> disconnecter status	Open/ closed/ in transition/ indication error	N/A
<b>Grid interface</b> auto reclose status	Enabled/disabled/operated/locked out	N/A
<b>Special protection scheme</b> status	Enabled/disabled/summer/winter	N/A
Reactive plant <sup>5</sup> (eg RPC equipment, capacitor, reactor, condenser) Mvar	Import and export	±2%

Table A3 Heading: amended, on 1 February 2016, by clause 23(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Table A3: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Table A3: amended, on 1 February 2016, by clause 23(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Table A3: amended, on 5 October 2017, by clause 134 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

- <sup>1</sup> Required only if a **generating unit** has a maximum continuous rating of greater than 5 **MW**.
- <sup>2</sup> No intentional time delays should be included for **circuit breaker** indications as these are time tagged by the **system operator** to less than 10 ms.
- <sup>3</sup> If accuracy is measured at the input terminal of the RTU of the **grid owner**, under normal operating conditions at full scale.
- <sup>4</sup> Indication required within 5 minutes of status change.
- <sup>5</sup> Required only if reactive plant has a maximum continuous rating of greater than 5 Mvar.

Compare: Electricity Governance Rules 2003 table A3 appendix A technical code C schedule C3 part C

*Technical Code D – Co-ordination of outages affecting common quality*

## 1 Purpose

The purpose of this **technical code** is to set out the obligations of **asset owners** to give notice of **outages** to the **system operator**, and to set out the obligations of the **system operator** in relation to **outage** co-ordination and the provision of timely advice to **asset owners** on the security implications of **notified planned outages**.

Compare: Electricity Governance Rules 2003 clause 1 technical code D schedule C3 part C

Clause 1: amended, on 5 October 2017, by clause 135 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1: amended, on 1 January 2025, by clause 5 of the Electricity Industry Participation Code Amendment (Co-ordination of outages affecting common quality) 2024.

## 2 Notice of outages

(1) Subject to subclause (1A), each **asset owner** must, give notice to, and in a manner and form reasonably specified by, the **system operator** of each **outage** of each of its **assets**, whether or not the **outage** was caused or planned by the **asset owner**, as follows:

- (a) each **grid owner** must give notice of each such **outage**:
- (b) each **generator** other than an **intermittent generator** must give notice of each such **outage** that will result or results in a reduction of the **electricity** supplied at any **point of connection** for which it submits **offers** greater than or equal to 5 **MW** of the normal capacity at the **point of connection**:
- (c) each **intermittent generator** must give notice of each such **outage** that will result or results in a reduction of the **electricity** supplied at any **point of connection** for which it submits **offers** greater than or equal to 10 **MW** of the normal capacity at the **point of connection**:
- (d) each **generator** that submits **offers** must give notice of each such **outage** that they consider may impact the **system operator's** ability to plan to comply and to comply, with the **principal performance obligations** and for which notice is not given under paragraphs (b) or (c):
- (e) each **distributor** must give notice of—
  - (i) each such **outage** of an **asset** that is connected directly to the **grid**; and
  - (ii) each such **outage** of an **asset** that is indirectly connected to the **grid** that the **distributor** considers may impact or impacts on the **system operator's** ability to plan to comply, and to comply with, the **principal performance obligations**:
- (f) each **direct consumer** must give notice of each such **outage** that—
  - (i) will result or results in a reduction of the **electricity** consumed at any **point of connection** for which it submits **bids** greater than or equal to the lesser of the following amounts of the normal capacity at the **point of connection**:
    - (A) 20 **MW**; or
    - (B) 20%, provided the reduction is 5 **MW** or more; or
  - (ii) they consider may impact the **system operator's** ability to plan to comply and to comply with the **principal performance obligations**.

- (1A) Each **asset owner** must provide notice to the **system operator** under subclause (1) of each **outage** of each of its **assets** as follows:
- (a) for a **planned outage**—
    - (i) if the **outage** at the time it is first planned is scheduled to occur in 12 months or more time, the **asset owner** must give notice at least 12 months prior to the date the **outage** is scheduled to occur unless it is not practicable to do so, even if the **outage** is subject to change or otherwise unconfirmed; or
    - (ii) if the **outage** at the time it is first planned is scheduled to occur in less than 12 months' time or where is not practicable to give notice under subparagraph (i), the **asset owner** must give notice as soon as practicable after the **asset owner** has scheduled the **outage**, even if the **outage** is subject to change or otherwise unconfirmed:
  - (b) for an **unplanned outage**, as soon as practicable after the **asset owner** becomes aware of the **outage** or becomes aware that the **outage** may occur, whichever occurs first.
- (1B) For the purposes of subclause (1A)(a)—
- (a) a **planned outage** of any **asset** of a **generator** that is caused by a **planned outage** of any **asset** of a **distributor** is to be treated as being first planned by the **generator** at the time that the **generator** first receives notice of the **distributor's planned outage** from the **distributor**; and
  - (b) the scheduled date and time for the **planned outage** of the **asset** of the **generator** is the date and time of the **planned outage** of the **generator's asset**.
- (2) If the **asset owner** is unsure whether an **outage** of an **asset** may impact on the **system operator's** ability to plan to comply, and to comply, with the **principal performance obligations**, the **asset owner** must contact the **system operator** for advice.
- (3) Each **asset owner** must update the **system operator** of any change to any **outage** notified under subclause (1) as soon as practicable after the **asset owner** becomes aware of the change.

Compare: Electricity Governance Rules 2003 clause 2 technical code D schedule C3 part C

Heading: amended, on 5 October 2017, by clause 136(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Heading: amended, on 1 January 2025, by clause 6(1) of the Electricity Industry Participation Code Amendment (Co-ordination of outages affecting common quality) 2024.

Clause 1: amended, on 1 January 2025, by clause 6(2) of the Electricity Industry Participation Code Amendment (Co-ordination of outages affecting common quality) 2024.

Clause 2(1): replaced, on 1 January 2025, by clause 6(2) of the Electricity Industry Participation Code Amendment (Co-ordination of outages affecting common quality) 2024.

Clause 2(1A) and (1B): inserted, on 1 January 2025, by clause 6(3) of the Electricity Industry Participation Code Amendment (Co-ordination of outages affecting common quality) 2024.

Clause 2(1) and (3): amended, on 5 October 2017, by clause 136(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 2(2) and (3): amended, on 1 January 2025, by clause 6(4) and (5) of the Electricity Industry Participation Code Amendment (Co-ordination of outages affecting common quality) 2024.

### 3 Assessment of outages

The **system operator** must assess all **outages** notified to it under clause 2 and the extent to which they impact on the **system operator's** ability to plan to comply, and to comply with the **principal performance obligations**.

Compare: Electricity Governance Rules 2003 clause 3 technical code D schedule C3 part C  
Heading: amended, on 1 January 2025, by clause 7(1) of the Electricity Industry Participation Code Amendment (Co-ordination of outages affecting common quality) 2024.  
Clause 3: amended, on 1 January 2025, by clause 7(2) of the Electricity Industry Participation Code Amendment (Co-ordination of outages affecting common quality) 2024.

#### 4 Assets may be requested to remain in service

The **system operator** may request that an **asset owner** of **assets** that are the subject of a **notified planned outage** keep those **assets** in service until a more suitable time, if such outage would, in the reasonable opinion of the **system operator**, adversely affect the **system operator's** ability to plan to comply, and to comply, with the **principal performance obligations**. The **system operator** may propose a suitable alternative time for the **notified planned outage**.

Compare: Electricity Governance Rules 2003 clause 4 technical code D schedule C3 part C

#### 5 Asset owners to assist security

- (1) An **asset owner** must endeavour to programme its **planned outages** at a time when there will be no disruption to the **system operator's** ability to plan to comply, and to comply, with the **principal performance obligations**.
- (2) The **system operator** may advise an **asset owner** when an appropriate time would be.
- (3) If an **asset owner** is able to modify the **notified planned outage** period for an **asset** in the manner suggested by the **system operator** without material cost or disruption, the **asset owner** must endeavour to do so.

Compare: Electricity Governance Rules 2003 clause 5 technical code D schedule C3 part C  
Clause 5(1): amended, on 1 January 2025, by clause 8 of the Electricity Industry Participation Code Amendment (Co-ordination of outages affecting common quality) 2024.

#### 6 Asset outage programme

The **system operator** must regularly **publish** information on all **outages** notified to it under clause 2 by **asset owners**

Compare: Electricity Governance Rules 2003 clause 6 technical code D schedule C3 part C  
Clause 6: amended, on 1 January 2025, by clause 9 of the Electricity Industry Participation Code Amendment (Co-ordination of outages affecting common quality) 2024.

#### 7 Assets may be requested to return to service

- (1) The **system operator** may request an **asset owner** to terminate a **notified planned outage** in progress within a pre-arranged period so that **assets** that are the subject of the **notified planned outage** can be returned to service to support the **system operator** in planning to comply, and in complying, with the **principal performance obligations**.
- (2) The **system operator** may request an **asset owner** to terminate an **unplanned outage** in progress so that **assets** that are the subject of the **unplanned outage** can be returned to service as soon as possible to support the **system operator** in planning to comply, and in complying, with the **principal performance obligations**.
- (3) Each **asset owner** must endeavour to comply with a request made under subclause (1) or (2) unless doing so would—
  - (a) cause material cost or disruption; or
  - (b) create a risk to safety of personnel or plant.

## Part 9 Security of supply

### Contents

#### Subpart 1—Planning for shortage of supply situations

9.1 Purpose

*System operator rolling outage plan*

9.2 System operator must prepare and publish system operator rolling outage plan

9.3 Incorporation of system operator rolling outage plan by reference

9.4 Contents of system operator rolling outage plan

9.5 *[Revoked]*

*Participant rolling outage plans*

9.6 System operator must require specified participants to develop participant rolling outage plans

9.7 Specified participants must develop participant rolling outage plans

9.8 Contents of participant rolling outage plans

9.9 Approval of participant rolling outage plans

9.10 Revision of participant rolling outage plans

9.11 Approval of revised participant rolling outage plans

9.12 Publishing of participant rolling outage plans

9.13 Specified participants must keep participant rolling outage plans up to date

#### Subpart 1A—Urgent temporary grid reconfigurations

9.13A Purpose

9.13B Request for urgent temporary grid reconfiguration

#### Subpart 2—Outages in shortage of supply situation

9.14 Supply shortage declaration

9.15 Power to direct outages in security of supply situation

9.16 Specified participants must comply with direction

9.17 Revocation of supply shortage declaration

#### Subpart 3—Miscellaneous

9.18 Provision of information

#### Subpart 4—Customer compensation schemes

9.19 Contents of this subpart

*Requirement for retailers to have customer compensation scheme*

9.20 Retailer must have customer compensation scheme

9.21 Qualifying customers

9.22 Requirement to implement customer compensation schemes

*Official conservation campaign*

9.23 System operator commences official conservation campaign

9.23A System operator ends official conservation campaign

*Default customer compensation scheme*

9.24 Requirements of default customer compensation schemes

*Minimum weekly amount of compensation*

9.25 Authority must determine minimum weekly amount

*Additional customer compensation schemes*

9.26 Retailer may have additional customer compensation schemes

9.27 Qualifying customer may elect to be covered by additional customer compensation scheme

9.28 Publishing description of additional customer compensation schemes

*Certificate of compliance*

9.29 Each retailer must provide certification

*Audit*

9.30 Audit of compliance

9.31 Retailer must provide information to auditor

9.32 Auditor must provide audit report

9.33 Payment of auditor's costs

---

Subpart 1— Planning for shortage of supply situations

**9.1 Purpose**

The purpose of this subpart and subpart 2 is to provide for the management and co-ordination of planned outages as an emergency measure during energy shortages.

Compare: SR 2008/252 r 3

*System operator rolling outage plan*

**9.2 System operator must prepare and publish system operator rolling outage plan**

(1) The **system operator** must prepare and **publish a system operator rolling outage plan**.

(2) *[Revoked]*

(3) *[Revoked]*

Compare: SR 2008/252 r 5

Clause 9.2(2) and (3): revoked, on 1 March 2024, by clause 33 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

**9.3 Incorporation of system operator rolling outage plan by reference**

(1) The **system operator rolling outage plan** is incorporated by reference in this Code.

(2) Clauses 7.13 to 7.22 apply to any amendment or replacement of the **system operator rolling outage plan**.

Clause 9.3(1): amended, on 5 October 2017, by clause 144 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9.3(1): amended, on 1 March 2024, by clause 34(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Clause 9.3(2): replaced, on 1 March 2024, by clause 34(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

**9.4 Contents of system operator rolling outage plan**

A **system operator rolling outage plan** must—

- (a) describe events that the **system operator** predicts will be likely to give rise to the need to make a **supply shortage declaration**; and
- (b) set out thresholds that the **system operator** will apply in deciding whether to make a **supply shortage declaration**; and
- (c) specify how the **system operator** intends to determine what directions to give to address the shortage of **electricity** supply or transmission capacity that gives rise to the declaration; and
- (d) identify **specified participants**, or a class or classes of **specified participants**, who are required to develop **participant rolling outage plans** under clauses 9.6 to 9.13; and
- (e) specify criteria, methodologies, and principles to be applied in implementing outages, or taking any other action, to be provided for in **participant rolling outage plans**; and
- (f) specify criteria, methodologies, and principles to be applied by any **specified participant** who does not have an approved **participant rolling outage plan** in implementing outages, or taking any other action, in accordance with directions given by the **system operator** under clause 9.15.

Compare: SR 2008/252 r 6

## 9.5 *[Revoked]*

clause came into force.

Compare: SR 2008/252 r 7 and 8

Clause 9.5(4): amended, on 5 October 2017, by clause 145(a) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9.5(4)(c): amended, on 5 October 2017, by clause 145(b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9.5: revoked, on 1 March 2024, by clause 35 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

### *Participant rolling outage plans*

## 9.6 **System operator must require specified participants to develop participant rolling outage plans**

- (1) This clause applies when a **specified participant** is identified under a **system operator rolling outage plan** as being required to develop a **participant rolling outage plan**.
- (2) The **system operator** must send notice in writing to that **specified participant** of that requirement, including—
  - (a) specifying the requirements that the **participant rolling outage plan** must comply with under this Part and the **system operator rolling outage plan**; and
  - (b) specifying a date by which the **specified participant** must submit that plan to the **system operator**.
- (3) The **system operator** must send the notice under subclause (2) as soon as practicable after the **system operator publishes** its **system operator rolling outage plan**.

Compare: SR 2008/252 r 8A

### 9.7 Specified participants must develop participant rolling outage plans

- (1) Each **specified participant** who receives a notice under clause 9.6 must develop its **participant rolling outage plan** in accordance with the notice.
- (2) The **specified participant** must submit the plan to the **system operator** by the date specified under clause 9.6(2)(b).

Compare: SR 2008/252 r 8B

### 9.8 Contents of participant rolling outage plans

- (1) Each **participant rolling outage plan** must—
  - (a) be consistent with the **system operator rolling outage plan**; and
  - (b) comply with the requirements specified in the notice sent under clause 9.6(2)(a); and
  - (c) specify the actions that the **specified participant** will take to achieve, or contribute to achieving, reductions in the consumption of **electricity** (including any target level of reduction of consumption of **electricity** in accordance with criteria, methodologies, and principles specified in the **system operator rolling outage plan**) to comply with a direction from the **system operator** given under clause 9.15.
- (2) This clause does not limit clause 9.6(2)(a).

Compare: SR 2008/252 r 8C

### 9.9 Approval of participant rolling outage plans

- (1) The **system operator** must, as soon as practicable after receiving a **participant rolling outage plan**, by notice in writing to the **specified participant** who submitted the plan,—
  - (a) approve it; or
  - (b) decline to approve it.
- (2) The **system operator** may decline to approve the plan only if the **system operator** is not satisfied that the plan complies with clause 9.8.

Compare: SR 2008/252 r 8D

### 9.10 Revision of participant rolling outage plans

If the **system operator** declines to approve a **participant rolling outage plan**,—

- (a) the **system operator** must—
  - (i) indicate the grounds on which it declines to approve the plan; and
  - (ii) direct the **specified participant** to submit a revised plan; and
- (b) the **specified participant** must submit a revised plan to the **system operator** no later than—
  - (i) 15 **business days** after the date on which the **specified participant** received the direction from the **system operator** to submit a revised plan; or
  - (ii) any later date that the **system operator** may allow in any particular case.

Compare: SR 2008/252 r 8E

Clause 9.10(b)(i): amended, on 5 October 2017, by clause 146 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 9.11 Approval of revised participant rolling outage plans

- (1) As soon as practicable after receiving a revised **participant rolling outage plan**, the **system operator** must, by notice in writing to the **specified participant** who submitted the plan,—
  - (a) approve the plan; or
  - (b) decline to approve it.
- (2) If the **system operator** declines to approve the revised plan, clause 9.10 applies.

Compare: SR 2008/252 r 8F

### 9.12 Publishing of participant rolling outage plans

A **specified participant** must make its **participant rolling outage plan** available to the public, at no cost, on an Internet site maintained by or on behalf of the **specified participant**, at all reasonable times, as soon as practicable after it is approved by the **system operator**.

Compare: SR 2008/252 r 8G

### 9.13 Specified participants must keep participant rolling outage plans up to date

- (1) Each **specified participant** who has had a **participant rolling outage plan** approved under clauses 9.6 to 9.12 must—
  - (a) keep the plan under review, and (if necessary) amend the plan to take account of any change of circumstances and to ensure that the plan continues to comply with clause 9.8; and
  - (b) as soon as practicable after amending the plan, but in any case no later than 20 **business days** after amending it, submit the plan to the **system operator**.
- (2) Despite subclause (1), not later than 2 years after the date on which a **specified participant's participant rolling outage plan** was last approved, the **specified participant** must resubmit the plan to the **system operator** for approval.
- (3) A plan submitted to the **system operator** under subclause (1)(b) is deemed to be approved by the **system operator** unless, no later than 20 **business days** after the **system operator** receives the plan, the **system operator** advises the **specified participant** who submitted the plan, by notice in writing, that it declines to approve the plan.
- (4) Clauses 9.9 to 9.12 apply to a plan that is submitted or resubmitted or declined under this clause, except as provided in subclause (3).

Compare: SR 2008/252 r 8H

Clause 9.13(1)(b) and (3): amended, on 5 October 2017, by clause 147 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## Subpart 1A—Urgent temporary grid reconfigurations

Heading: inserted, on 16 December 2013, by clause 4 of the Electricity Industry Participation (Urgent Temporary Grid Reconfiguration) Code Amendment 2013.

### 9.13A Purpose

The purpose of this subpart is to provide for the urgent temporary removal of **interconnection assets** from service, or temporary reconfiguration of the **grid**, in order to improve security of **supply**.

Clause 9.13A: inserted, on 16 December 2013, by clause 4 of the Electricity Industry Participation (Urgent Temporary Grid Reconfiguration) Code Amendment 2013.

### 9.13B Request for urgent temporary grid reconfiguration

- (1) The **system operator** may give notice in writing to **Transpower** requesting that **Transpower** temporarily remove 1 or more **interconnection assets** from service, or temporarily reconfigure the **grid**, if the **system operator** considers that—
  - (a) exceptional circumstances exist—
    - (i) that are likely to lead, for a period of at least 3 weeks, to—
      - (A) a shortfall in thermal fuel; or
      - (B) a shortfall of hydro inflows; or
      - (C) the loss of a large generating **asset**; and
    - (ii) that make it necessary or desirable in the public interest to temporarily remove 1 or more **interconnection assets** from service or temporarily reconfigure the **grid**; and
  - (b) the removal or reconfiguration would improve security of **supply**.
- (2) A notice given under subclause (1) must specify—
  - (a) the exceptional circumstances; and
  - (b) the reasons why temporarily removing **assets** from service or temporarily reconfiguring the **grid** would improve security of **supply**.
- (3) No later than 10 **business days** after giving notice to **Transpower**, the **system operator** must give a written report to the **Authority** setting out the basis on which the **system operator** requested that **Transpower** remove 1 or more **interconnection assets** from service or temporarily reconfigure the **grid**.
- (4) The **system operator** must ensure that the report given under subclause (3) includes—
  - (a) the matters specified in subclause (2)(a) and (b); and
  - (b) sufficient information to demonstrate that in developing its request to **Transpower** the **system operator** followed a robust process, including the options the **system operator** considered and the extent of any analysis and consultation undertaken by the **system operator**.
- (5) The **Authority** must **publish** the report.

Clause 9.13B: inserted, on 16 December 2013, by clause 4 of the Electricity Industry Participation (Urgent Temporary Grid Reconfiguration) Code Amendment 2013.

Clause 9.13B(5): amended, on 5 October 2017, by clause 148 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## Subpart 2—Outages in shortage of supply situation

### 9.14 Supply shortage declaration

- (1) The **system operator** may, after consultation with the **Authority**, make a **supply shortage declaration**.
- (2) The **system operator** may make a **supply shortage declaration** only if there is a shortage of **electricity** supply or transmission capacity such that the **system operator** considers—

- (a) that the normal operation of the spot market for **electricity** is, or will soon be, unlikely to facilitate the adjustment of supply and demand necessary to ensure that supply matches demand; and
  - (b) that, if planned outages are not implemented, unplanned outages are likely.
- (2A) For the purposes of subclause (2), the spot market for **electricity** includes the processes for setting—
- (a) *[Revoked]*
  - (b) **forecast prices** and **forecast reserve prices**:
  - (c) *[Revoked]*
  - (d) **interim prices** and **interim reserve prices**:
  - (e) **final prices** and **final reserve prices**:
  - (f) **dispatch prices** and **dispatch reserve prices**.
- (3) A declaration applies to—
- (a) all of New Zealand; or
  - (b) the regions specified in the declaration.
- (4) In making a declaration under subclause (1), the **system operator** must have regard to the **system operator rolling outage plan**.
- (5) The **system operator** must **publish** the declaration as soon as practicable after it is made.

Compare: SR 2008/252 r 9

Clause 9.14(2)(a): amended, on 18 July 2013, by clause 8(1) of the Electricity Industry Participation (Undesirable Trading Situation) Code Amendment 2013.

Clause 9.14(2A): inserted, on 18 July 2013, by clause 8(2) of the Electricity Industry Participation (Undesirable Trading Situation) Code Amendment 2013.

Clause 9.14(2A)(a) and (c): revoked, on 1 November 2022, by clause 10(a) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

Clause 9.14(2A)(f): inserted, on 1 November 2022, by clause 10(b) of the Electricity Industry Participation Code Amendment (Real Time Pricing) 2022.

### 9.15 Power to direct outages in security of supply situation

- (1) The **system operator** may, at any time in the period during which a **supply shortage declaration** is in force, give a written direction to **specified participants** to contribute to achieving reductions in the consumption of **electricity** by implementing outages or taking any other action specified in the direction.
- (2) A direction must—
  - (a) be consistent with the **system operator rolling outage plan**; and
  - (b) be given only after consultation with the **Authority**; and
  - (c) if the direction requires a **specified participant** to implement outages, specify the savings targets that the **specified participant** must achieve.
- (3) *[Revoked]*
- (4) The **system operator** must **publish** each direction as soon as practicable after it is given.
- (5) The **system operator** may—
  - (a) amend a direction; or
  - (b) revoke a direction and, if the **system operator** considers it appropriate, substitute a new direction.

- (6) Subclauses (1) to (4) apply to an amendment to a direction or a substitute direction—
- (a) as if the amendment or substitute direction were the original direction; and
  - (b) with other necessary modifications.

Compare: SR 2008/252 r 10

Clause 9.15(1): amended, on 5 October 2017, by clause 149(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9.15(3): revoked, on 5 October 2017, by clause 149(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9.15(4): amended, on 5 October 2017, by clause 149(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 9.16 Specified participants must comply with direction

- (1) Each **specified participant** must comply with a direction given to it by the **system operator** under clause 9.15.
- (2) Each **specified participant** must, in complying with the direction, apply, to the extent practicable, the criteria, methodologies, and principles specified in the **system operator rolling outage plan**.
- (3) Each **specified participant** must comply with a direction in accordance with its **participant rolling outage plan**, if it has a plan that has been approved under subpart 1.
- (4) If a **specified participant** does not have a **participant rolling outage plan** approved under subpart 1, the **specified participant**,—
  - (a) in complying with the direction, must apply, to the extent practicable, the criteria, methodologies, and principles specified in the **system operator rolling outage plan**; and
  - (b) as soon as practicable after the direction is given, must provide to the **system operator** information as to the steps the **specified participant** will take to comply with the direction (including any steps the **specified participant** has already taken to comply with the direction).

Compare: SR 2008/252 r 11

### 9.17 Revocation of supply shortage declaration

- (1) The **system operator** must revoke a **supply shortage declaration** when it is satisfied that the circumstances that gave rise to the declaration no longer apply.
- (2) The **system operator** must **publish** the revocation as soon as practicable after it is made.

Compare: SR 2008/252 r 13

## Subpart 3—Miscellaneous

### 9.18 Provision of information

- (1) The **system operator** may, by notice in writing to a **participant** who the **system operator** considers may have information relevant to any of the following, require the **participant** to provide the information to the **system operator**:
  - (a) the preparation by the **system operator** of the **system operator rolling outage plan** under clauses 9.1 to 9.5; and
  - (b) the need for a **supply shortage declaration**; and
  - (c) the need for a direction requiring outages under clause 9.15; and

- (d) the number and extent of outages necessary under a direction; and
- (e) monitoring compliance with a direction given under clause 9.15.
- (2) Subclause (1) applies only to information that is—
  - (a) reasonably necessary for the **system operator** to undertake its functions under this Part or to monitor compliance with a direction regarding outages; and
  - (b) in that **participant's** possession or that the **participant** can obtain without unreasonable difficulty or expense.
- (3) The **system operator** must specify in the notice given under subclause (1) the date by which the **participant** must provide the information required.
- (4) A **participant** who has received a notice under subclause (1) must provide the information required by the **system operator** by the date specified by the **system operator** in the notice.
- (5) The **system operator** may require **specified participants** to provide to the **system operator** contact information specified by the **system operator** that would enable the **system operator** to communicate with the **specified participants**.

Compare: SR 2008/252 r 14

#### Subpart 4—Customer compensation schemes

Subpart 4: inserted, on 1 April 2011, by clause 5 of the Electricity Industry Participation (Customer Compensation Schemes) Code Amendment 2011.

#### 9.19 Contents of this subpart

This subpart provides a framework under which each **retailer** must have a **customer compensation scheme** for all of the **retailer's qualifying customers**, including—

- (a) a **default customer compensation scheme** that a **retailer** must have; and
- (b) **additional customer compensation schemes** that a **retailer** may have; and
- (c) determining when an **official conservation campaign** commences and ends, during which a **retailer** must make payments under its **customer compensation schemes**; and
- (d) a process by which the **Authority** can require that a **retailer's** compliance with this subpart is **audited**.

Clause 9.19: inserted, on 1 April 2011, by clause 5 of the Electricity Industry Participation (Customer Compensation Schemes) Code Amendment 2011.

Clause 9.19(c): amended, on 20 December 2021, by clause 20 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

#### *Requirement for retailers to have customer compensation scheme*

#### 9.20 Retailer must have customer compensation scheme

- (1) Each **retailer** who has 1 or more **qualifying customers**—
  - (a) must, at all times, have a **default customer compensation scheme**; and
  - (b) may, in addition to a **default customer compensation scheme**, have 1 or more **additional customer compensation schemes**.
- (2) Each of a **retailer's qualifying customers** must be covered by the **retailer's default customer compensation scheme**, unless the **retailer's qualifying customer** has

elected to be covered by 1 of the **retailer's additional customer compensation schemes** (if any) in accordance with clause 9.27.

- (3) A **retailer's customer compensation scheme** may cover a customer of the **retailer** who is not a **qualifying customer**.

Clause 9.20: inserted, on 1 April 2011, by clause 5 of the Electricity Industry Participation (Customer Compensation Schemes) Code Amendment 2011.

Clause 9.20(2): amended, on 1 November 2018, by clause 17(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 9.20(3): amended, on 1 November 2018, by clause 17(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

## 9.21 Qualifying customers

- (1) A **retailer's qualifying customer** is a person who, at any time during an **official conservation campaign**, —
- (a) is a customer of the **retailer**; and
  - (b) has a contract with the **retailer** for the supply of **electricity** in respect of an **ICP** at which—
    - (i) there is a **category 1 metering installation** or a **category 2 metering installation**; and
    - (ii) there was consumption, in the 12 months immediately before the start of the **official conservation campaign**, of 3000 kWh or more.
- (2) Despite subclause (1), a person is not a **qualifying customer** if the price of all of the **electricity** provided under the person's contract with the **retailer** for the supply of **electricity** is determined by reference to the **final price** at a **GXP**.
- (3) For the purposes of subclause (1)(b)(ii), if a **qualifying customer's** consumption at the **ICP** in the 12 months immediately before the start of the **official conservation campaign** is not available to the **retailer**, the **retailer** must make a reasonable estimate of the consumption.
- (4) To avoid doubt, the retailer is not required to make payments under a **customer compensation scheme** to a **qualifying customer** at an **ICP** in respect of any period during an **official conservation campaign**, when—
- (a) the premises to which the **ICP** is **electrically connected** are vacant; or
  - (b) the **ICP** is **electrically disconnected**.

Clause 9.21: inserted, on 1 April 2011, by clause 5 of the Electricity Industry Participation (Customer Compensation Schemes) Code Amendment 2011.

Clause 9.21: amended, on 5 October 2017, by clause 150(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9.21(1): amended, on 28 June 2018, by clause 4(1) of the Electricity Industry Participation Code Amendment (Customer Compensation Scheme) 2018.

Clause 9.21(1): amended, on 20 December 2021, by clause 21(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 9.21(1)(a): amended, on 1 November 2018, by clause 18 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 9.21(1)(b)(i): amended, on 1 December 2011, by clause 6 of the Electricity Industry Participation Code (Distributor Use-of-System Agreements and Distributor Tariffs) Amendment 2011.

Clause 9.21(1)(b)(ii): amended, on 5 October 2017, by clause 150(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9.21(1)(b)(ii): amended, on 20 December 2021, by clause 21(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 9.21(3): amended, on 5 October 2017, by clause 150(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9.21(3): amended, on 20 December 2021, by clause 21(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 9.21(4): replaced, on 28 June 2018, by clause 4(2) of the Electricity Industry Participation Code Amendment (Customer Compensation Scheme) 2018.

Clause 9.21(4): amended, on 20 December 2021, by clause 21(4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 9.21(4)(a)(i) and (ii): amended, on 5 October 2017, by clause 150(4)(a) and (b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9.21(4)(b)(i): amended, on 5 October 2017, by clause 150(4)(c) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## **9.22 Requirement to implement customer compensation schemes**

(1) A **retailer** must make payments to its **qualifying customers**, in respect of **ICPs** described in clause 9.21(1)(b), under its **customer compensation schemes** during an **official conservation campaign**.

(2) Despite subclause (1), if the **system operator** has commenced an **official conservation campaign** under clause 9.23(1), a **retailer** must make payments under its **customer compensation scheme** to its **qualifying customers** only in respect of **ICPs**, as described in clause 9.21(1)(b), in the South Island.

Clause 9.22: inserted, on 1 April 2011, by clause 5 of the Electricity Industry Participation (Customer Compensation Schemes) Code Amendment 2011.

Clause 9.22(1) & (2): amended, on 20 December 2021, by clause 22(1) & (2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 9.22(2): amended, on 21 September 2012, by clause 12 of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

### *Official conservation campaign*

## **9.23 System operator commences official conservation campaign**

(1) The **system operator** must commence an **official conservation campaign** for the South Island—

(a) when a comparison of storage in the South Island hydro lakes with the South Island electricity risk curves, as that term is defined in the **security of supply forecasting and information policy**,—

(i) shows a risk of shortage for the South Island of 10% or more; and

(ii) forecasts that the risk of shortage for the South Island will be 10% or more for 1 week or more; or

(ab) when hydro storage in the South Island hydro lakes is, and the **system operator** forecasts will remain for 1 week or more, equal to or less than—

(i) that part of available hydro storage in the South Island hydro lakes that, as **published** by the **system operator** under the **security of supply forecasting and information policy**, may only be used during an **official conservation campaign**; plus

(ii) the buffer, as that term is defined in the **security of supply forecasting and information policy**; or

(b) despite paragraphs (a) and (ab), if it has agreed a date with the **Authority** for an **official conservation campaign** to commence for the South Island, on that date.

(2) The **system operator** must commence an **official conservation campaign** for New Zealand—

- (a) when a comparison of storage in New Zealand’s hydro lakes with the electricity risk curves, as that term is defined in the **security of supply forecasting and information policy**,—
- (i) shows a risk of shortage for New Zealand of 10% or more; and
  - (ii) forecasts that the risk of shortage for New Zealand will be 10% or more for 1 week or more; or
- (ab) when hydro storage in the New Zealand hydro lakes is, and the **system operator** forecasts will remain for 1 week or more, equal to or less than—
- (i) that part of available hydro storage in the New Zealand hydro lakes that, as **published** by the **system operator** under the **security of supply forecasting and information policy**, may only be used during an **official conservation campaign**; plus
  - (ii) the buffer, as that term is defined in the **security of supply forecasting and information policy**; or
- (b) despite paragraphs (a) and (ab), if it has agreed a date with the **Authority** for an **official conservation campaign** to commence for New Zealand, on that date.
- (3) The **system operator** must use reasonable endeavours to give each **participant** and the **Authority** at least 2 weeks’ notice of an **official conservation campaign** commencing.
- (4) During the period of an **official conservation campaign**, the **system operator** must regularly review the steps that it must take, and encourage **participants** to take, under the **emergency management policy**.
- (5) If the **system operator** and the **Authority** agree under subclause (1)(b) or (2)(b) that an **official conservation campaign** will commence, the **system operator** must **publish** the reasons for agreeing that the **official conservation campaign** will commence.
- (6) *[Revoked]*
- Clause 9.23: inserted, on 1 April 2011, by clause 5 of the Electricity Industry Participation (Customer Compensation Schemes) Code Amendment 2011.
- Clause 9.23(4)(b)(i): amended, on 21 September 2012, by clause 13 of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.
- Clause 9.23(5): amended, on 5 October 2017, by clause 151 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.
- Clause 9.23(1)(a): amended, on 1 August 2019, by clause 4(1) of the Electricity Industry Participation Code Amendment (Official Conservation Campaign) 2019.
- Clause 9.23(1)(ab): inserted, on 1 August 2019, by clause 4(2) of the Electricity Industry Participation Code Amendment (Official Conservation Campaign) 2019.
- Clause 9.23(1)(b): amended, on 1 August 2019, by clause 4(3) of the Electricity Industry Participation Code Amendment (Official Conservation Campaign) 2019.
- Clause 9.23(2)(a): amended, on 1 August 2019, by clause 4(4) of the Electricity Industry Participation Code Amendment (Official Conservation Campaign) 2019.
- Clause 9.23(2)(ab): inserted, on 1 August 2019, by clause 4(5) of the Electricity Industry Participation Code Amendment (Official Conservation Campaign) 2019.
- Clause 9.23(2)(b): amended, on 1 August 2019, by clause 4(6) of the Electricity Industry Participation Code Amendment (Official Conservation Campaign) 2019.
- Clause 9.23(4): replaced, on 1 August 2019, by clause 4(7) of the Electricity Industry Participation Code Amendment (Official Conservation Campaign) 2019.
- Clause 9.23(6): revoked, on 1 August 2019, by clause 4(8) of the Electricity Industry Participation Code Amendment (Official Conservation Campaign) 2019.

### 9.23A System operator ends official conservation campaign

- (1) If the **system operator** has commenced an **official conservation campaign** under clause 9.23, it must end the **official conservation campaign**—

- (a) for an **official conservation campaign** for the South Island—
    - (i) when a comparison of hydro storage in the South Island hydro lakes with the South Island electricity risk curves, as that term is defined in the **security of supply forecasting and information policy**, shows a risk of shortage for the South Island of less than 8%; and
    - (ii) the amount of hydro storage in the South Island hydro lakes is greater than the amount of hydro storage determined under subparagraphs (i) and (ii) of clause 9.23(1)(ab); or
  - (b) for an **official conservation campaign** for New Zealand—
    - (i) when a comparison of hydro storage in the New Zealand hydro lakes with the New Zealand electricity risk curves, as that term is defined in the **security of supply forecasting and information policy**, shows a risk of shortage for New Zealand of less than 8%; and
    - (ii) the amount of hydro storage in the New Zealand hydro lakes is greater than the amount of hydro storage determined under subparagraphs (i) and (ii) of clause 9.23(2)(ab); or
  - (c) despite paragraphs (a) and (b), if it has agreed a date with the **Authority** for an **official conservation campaign** to end, on that date.
- (2) The **system operator** must, as soon as practicable after ending an **official conservation campaign**, give notice to each **participant** and the **Authority** of the date on which the **official conservation campaign** ended.

Clause 9.23A: inserted, on 1 August 2019, by clause 5 of the Electricity Industry Participation Code Amendment (Official Conservation Campaign) 2019.

#### *Default customer compensation scheme*

### **9.24 Requirements of default customer compensation schemes**

- (1) A **retailer's default customer compensation scheme** must provide for the **retailer**—
- (a) during an **official conservation campaign** for the South Island, to pay each of its **qualifying customers** in the South Island at least the minimum weekly amount of compensation determined by the **Authority** under clause 9.25, at a pro rata daily rate for each day of the **official conservation campaign** that the **qualifying customer** is the **retailer's** customer; and
  - (b) at any other time during an **official conservation campaign**, to pay each of its **qualifying customers** at least the minimum weekly amount of compensation determined by the **Authority** under clause 9.25, at a pro rata daily rate for each day of the **official conservation campaign** that the **qualifying customer** is the **retailer's** customer; and
  - (c) to pay at least the minimum weekly amount, at a pro rata daily rate, for each day of an **official conservation campaign** that the **qualifying customer** is the **retailer's** customer—
    - (i) to each of its **qualifying customers** in the South Island or New Zealand (as the case may be), for each of the **qualifying customer's ICPs** described in clause 9.21(1)(b):

- (ii) no later than the end of 2 **billing periods** after the last day of an **official conservation campaign**.
  - (2) *[Revoked]*
  - (3) For the purposes of this clause—
    - (a) compensation includes—
      - (i) money;
      - (ii) a credit on the **qualifying customer's electricity** account with the **retailer**; and
    - (b) the form of the compensation is to be determined by the **retailer**.
- Clause 9.24: inserted, on 1 April 2011, by clause 5 of the Electricity Industry Participation (Customer Compensation Schemes) Code Amendment 2011.
- Clause 9.24(1)(a): amended, on 28 June 2018, by clause 5(1) of the Electricity Industry Participation Code Amendment (Customer Compensation Scheme) 2018.
- Clause 9.24(1)(b): amended, on 28 June 2018, by clause 5(2) of the Electricity Industry Participation Code Amendment (Customer Compensation Scheme) 2018.
- Clause 9.24(1)(a), (b), (c) & (c)(2): amended, on 20 December 2021, by clause 23(1) to (4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.
- Clause 9.24(1)(c): amended, on 28 June 2018, by clause 5(3) of the Electricity Industry Participation Code Amendment (Customer Compensation Scheme) 2018.
- Clause 9.24(1)(c)(ii): amended, on 5 October 2017, by clause 152 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.
- Clause 9.24(2): revoked, on 28 June 2018, by clause 5(4) of the Electricity Industry Participation Code Amendment (Customer Compensation Scheme) 2018.

*Minimum weekly amount of compensation*

**9.25 Authority must determine minimum weekly amount**

- (1) In determining the minimum weekly amount that each **retailer** must pay to its **qualifying customers**, the **Authority** must take into account—
  - (a) the estimated value, in dollars/MWh, of the savings that the **Authority** expects all **qualifying customers** in the South Island or New Zealand, as the case may be, of all **retailers**, will achieve during an **official conservation campaign**; and
  - (b) any other factors that the **Authority** considers relevant.
- (2) The **Authority** must—
  - (a) **publish** the minimum weekly amount; and
  - (b) review the minimum weekly amount—
    - (i) after each **official conservation campaign** ends; and
    - (ii) at least once every 3 years; and
  - (c) following a review under paragraph (b), ensure that it gives **participants** at least 3 months' notice if it determines a new minimum weekly amount.

Clause 9.25: inserted, on 1 April 2011, by clause 5 of the Electricity Industry Participation (Customer Compensation Schemes) Code Amendment 2011.

Clause 9.25(2)(a): amended, on 5 October 2017, by clause 153(a) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9.25(2)(b)(i) amended, on 20 December 2021, by clause 24 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 9.25(2)(b)(ii): amended, on 5 October 2017, by clause 153(b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

*Additional customer compensation schemes*

**9.26 Retailer may have additional customer compensation schemes**

A **retailer** may have 1 or more **additional customer compensation schemes**.

Clause 9.26: inserted, on 1 April 2011, by clause 5 of the Electricity Industry Participation (Customer Compensation Schemes) Code Amendment 2011.

**9.27 Qualifying customer may elect to be covered by additional customer compensation scheme**

- (1) If a **retailer** has 1 or more **additional customer compensation schemes**, each of the **retailer's qualifying customers** is covered by—
  - (a) 1 of the **retailer's additional customer compensation schemes** only if the **qualifying customer** elects to be covered by the **additional customer compensation scheme**; or
  - (b) in the absence of an election, the **retailer's default customer compensation scheme**.
- (2) Before accepting a **qualifying customer's** election, a **retailer** must ensure that it informs the **qualifying customer** of—
  - (a) the details of the **additional customer compensation scheme**; and
  - (b) the differences between the **retailer's default customer compensation scheme** and the **additional customer compensation scheme**.
- (3) A **retailer** must keep a record of each **qualifying customer's** election.
- (4) A **qualifying customer's** election must not—
  - (a) be part of the contract between the **qualifying customer** and the **retailer** for the supply of **electricity**; or
  - (b) affect the tariff options that the **retailer** offers to the **qualifying customer**; or
  - (c) be affected by the tariff option in the **qualifying customer's** contract with the **retailer**.

Clause 9.27: inserted, on 1 April 2011, by clause 5 of the Electricity Industry Participation (Customer Compensation Schemes) Code Amendment 2011.

**9.28 Publishing description of additional customer compensation schemes**

A **retailer** who has 1 or more **additional customer compensation schemes** must—

- (a) **publish** and keep **published** a description of its **additional customer compensation schemes**; and
- (b) on request from one of the **retailer's** customers, provide a written description of the **additional customer compensation schemes**.

Clause 9.28: inserted, on 1 April 2011, by clause 5 of the Electricity Industry Participation (Customer Compensation Schemes) Code Amendment 2011.

Clause 9.28(a): amended, on 5 October 2017, by clause 154 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9.28(b): amended, on 1 November 2018, by clause 19 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

*Certification of compliance*

Cross heading: replaced, on 5 October 2017, by clause 155 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**9.29 Each retailer must provide certification**

- (1) Each **retailer** must certify to the **Authority** that—
  - (a) the **retailer's customer compensation scheme** complies with this subpart; and
  - (b) the **retailer** has provided compensation to its **qualifying customers**, to the extent required by this subpart.
- (2) The certification provided under subclause (1) must be—
  - (a) *[Revoked]*
  - (b) in the form specified by the **Authority**; and
  - (c) signed and dated by a director of the **retailer** and either—
    - (i) another director of the **retailer**; or
    - (ii) the **retailer's** chief financial officer, or a person holding an equivalent position; or
    - (iii) the **retailer's** chief executive officer, or a person holding an equivalent position.
- (3) A **retailer** must provide certifications as follows:
  - (a) within 7 months of the end of an **official conservation campaign**;
  - (b) within 1 month of receiving a request to do so by the **Authority**.
- (4) *[Revoked]*

Clause 9.29: inserted, on 1 April 2011, by clause 5 of the Electricity Industry Participation (Customer Compensation Schemes) Code Amendment 2011.

Heading: amended, on 5 October 2017, by clause 156(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9.29(1): amended, on 5 October 2017, by clause 156(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9.29(2): amended, on 5 October 2017, by clause 156(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9.29(3): amended, on 5 October 2017, by clause 156(4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9.29(3)(a) amended, on 20 December 2021, by clause 25 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 9.29(4): revoked, on 5 October 2017, by clause 156(5) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

*Audit*

**9.30 Audit of compliance**

- (1) The **Authority** may, in its discretion, carry out an **audit** to determine whether a **retailer** has complied with this subpart.
- (2) If the **Authority** decides to **audit** a **retailer** under subclause (1), the **Authority** must require the **retailer** to nominate an appropriate **auditor**.
- (3) The **retailer** must nominate an **auditor** within a reasonable timeframe, and the **Authority** must appoint the nominated **auditor**.
- (4) If the **retailer** fails to nominate an appropriate **auditor** within a reasonable timeframe, the **Authority** may appoint an **auditor** of its own choice.

Clause 9.30: inserted, on 1 April 2011, by clause 5 of the Electricity Industry Participation (Customer Compensation Schemes) Code Amendment 2011.

### 9.31 Retailer must provide information to auditor

- (1) A **retailer** subject to an **audit** under this subpart must, on request from the **auditor**, provide the **auditor** with information relating to its compliance with this subpart in the previous 12 months or such other period specified by the **auditor**.
- (2) The **retailer** must provide the information within 20 **business days** after receiving a request from the **auditor**.

Clause 9.31: inserted, on 1 April 2011, by clause 5 of the Electricity Industry Participation (Customer Compensation Schemes) Code Amendment 2011.

### 9.32 Auditor must provide audit report

- (1) The **retailer** must ensure that the **auditor** provides the **Authority** with an **audit** report on the **retailer's** compliance with this subpart that has been prepared in accordance with this clause.
- (2) The **audit** report must include any comments from the **retailer** on any non-compliance found by the **auditor** if the **retailer** provided the comments to the **auditor** within a time specified by the **auditor**.
- (3) *[Revoked]*
- (4) The **audit** report must not contain any of the information provided by the **retailer** to the **auditor** under clause 9.31 unless requested by the **Authority**.

Clause 9.32: inserted, on 1 April 2011, by clause 5 of the Electricity Industry Participation (Customer Compensation Schemes) Code Amendment 2011.

Clause 9.32(1): amended, on 1 February 2016, by clause 24(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 9.32(2): substituted, on 1 February 2016, by clause 24(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 9.32(3): revoked, on 1 February 2016, by clause 24(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 9.32(4): amended, on 1 February 2016, by clause 24(4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

### 9.33 Payment of auditor's costs

- (1) If an **audit** establishes, to the **Authority's** reasonable satisfaction, that a **retailer** has not complied with this subpart (whether or not the **Authority** appoints an investigator to investigate the alleged breach), the **retailer** must pay the **auditor's** costs.
- (2) If the **Authority** considers that the **retailer's** non-compliance is minor or relates to some (but not all) of the clauses in this subpart, the **Authority** may, in its discretion, determine the proportion of the **auditor's** costs that the **retailer** must pay, and the **retailer** must pay those costs.
- (3) If an **audit** establishes to the **Authority's** reasonable satisfaction that a **retailer** has complied with this subpart, the **Authority** must pay the **auditor's** costs.

Clause 9.33: inserted, on 1 April 2011, by clause 5 of the Electricity Industry Participation (Customer Compensation Schemes) Code Amendment 2011.

## Part 10 Metering

### Contents

- 10.1 Contents of this Part
  - Subpart 1—Preliminary provisions
- 10.2 Authority's discretion and powers
- 10.3 Use of contractors
- 10.4 Participant obligations
- 10.5 References to timing
- 10.6 Participant to provide accurate information
- 10.7 Access to premises in which metering installation located
- 10.8 Requirements for information to be recorded, given, produced, or received
- 10.9 Demarcation of responsibility between metering equipment provider and reconciliation participant
- 10.10 Standards used
  - Metering installations*
- 10.11 Categories of metering installation
- 10.12 Interference with metering installation
- 10.13 Electricity conveyed
- 10.13A Metering installation must record imported electricity separately from exported electricity
  - Unmetered load*
- 10.14 Unmetered load
  - Metering data*
- 10.15 Security of metering data
- 10.16 Metering data exchange timing and formats
  - Audits*
- 10.17 *[Revoked]*
- 10.17A Metering equipment providers and ATHs to arrange for regular audits
- 10.17B Authority and participant requested audits
  - Subpart 2—Ongoing obligations
  - Metering equipment providers*
- 10.18 Category 1 metering installations and higher categories of metering installations must have metering equipment provider
- 10.19 Metering equipment provider
- 10.20 Obligations of metering equipment provider
- 10.21 When metering equipment provider's obligations come into effect
- 10.22 Change of metering equipment provider
- 10.23 Termination of metering equipment provider responsibility
- 10.23A Decommissioning of metering installation at ICP

*Responsibility for ensuring there are metering installations*

- 10.24 Responsibility for ensuring there is metering installation for ICP that is not also NSP
- 10.25 Responsibility for ensuring there is metering installation for NSP that is not point of connection to grid
- 10.26 Responsibility for ensuring there is metering installation for point of connection to grid
- 10.27 Change in responsibility for ensuring metering installation for point of connection to grid

*Connecting and electrically connecting points of connection*

- 10.28 *[Revoked]*
- 10.29 When grid owner may connect point of connection to grid
- 10.29A When grid owner may temporarily electrically connect point of connection to grid
- 10.29B Grid owner may electrically connect point of connection to grid

*Disconnecting and electrically disconnecting points of connection to the grid*

- 10.29C Grid owner may electrically disconnect or disconnect point of connection to grid
- 10.30 When local network owner or embedded network owner may connect NSP that is not point of connection to grid
- 10.30A When local network owner or embedded network owner may temporarily electrically connect NSP that is not point of connection to grid
- 10.30B When distributor may electrically connect NSP that is not point of connection to grid

*Disconnecting and electrically disconnecting NSPs*

- 10.30C Distributor may electrically disconnect or disconnect NSP that is not point of connection to grid
- 10.31 When distributor may connect ICP that is not NSP
- 10.31A When distributor may temporarily electrically connect ICP that is not NSP
- 10.31B When distributor may electrically connect ICP that is not NSP

*Disconnecting and electrically disconnecting ICPs*

- 10.31C Distributor may electrically disconnect or disconnect ICP that is not an NSP
- 10.32 Reconciliation participant requesting connection of point of connection
- 10.33 When trader may temporarily electrically connect a point of connection
- 10.33A When trader may electrically connect point of connection

*Disconnecting and electrically disconnecting points of connection*

- 10.33B Trader must not disconnect or electrically disconnect ICP for which it is not responsible
- 10.33C When trader may bridge meter at ICP

*General metering installation requirements*

- 10.34 Installation and modification of metering installations
- 10.35 Physical location of metering installations
- 10.36 Reconciliation participant to have arrangement with metering equipment provider

*Active and reactive energy metering*

- 10.37 Active and reactive measuring and recording requirements

*Certification of metering installations*

- 10.38 Certification of metering installations

*Metering infrastructure*

- 10.39 Responsibility for metering infrastructure integration

*Approved test houses and ATHs*

- 10.40 General requirements for approval as ATH
- 10.41 Requirements applying to ATHs
- 10.42 ATH's functions and ongoing obligations
  - Metering installations that are inaccurate, defective, or not fit for purpose*
- 10.43 Metering installations that are inaccurate, defective, or not fit for purpose to be investigated
- 10.44 Metering installations that are inaccurate, defective, or not fit for purpose to be tested
- 10.45 Investigation and testing costs
- 10.46 Statement of situation
- 10.46A Timeframe for correcting defects and inaccuracies in metering installation
- 10.47 ATH to keep records of modifications to correct defects and inaccuracies in metering installation
- 10.48 Correction of defects and inaccuracies in raw meter data
  - NSP table*
- 10.49 NSP table
  - Dispute resolution*
- 10.50 Dispute resolution
  - Transitional provisions*

*Certification stickers*  
*Onsite calibration and certification*

---

## 10.1 Contents of this Part

This Part provides for—

- (a) ensuring the accuracy of the clearing and settlement of **electricity** trading in the wholesale **electricity** market by regulating how existing and new **metering installations** are used to accurately measure and record **electricity** conveyed; and
- (b) the responsibility for ensuring a **metering installation** is in place; and
- (c) the responsibility for ensuring the compliance of **metering installations**; and
- (d) the processes and procedures that apply to testing, **calibrating**, and **certifying metering installations**; and
- (e) *[Revoked]*
- (f) the processes and procedures that apply to approving **ATHs**; and
- (g) regulating the data use, handling, storage, and transmission processes associated with **metering installations** and **metering data**; and
- (h) regulating **metering installations** that are used for **electricity** trading; and
- (i) the processes and procedures relating to the **registry** and information for the purposes of Part 15; and
- (j) related matters, processes, and procedures.

Clause 10.1(e): revoked, on 1 June 2017, by clause 5 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Audits) 2016.

## Subpart 1—Preliminary provisions

## 10.2 Authority's discretion and powers

- (1) A clause in this Part that gives the **Authority** a discretion or power—
  - (a) confers an absolute discretion to the **Authority**—
    - (i) taking into account any specific requirements set out in the clause; and

- (ii) observing the principles of natural justice; and
- (b) to approve an application by a person to carry out an activity under this Part, may be exercised by—
  - (i) granting the application; or
  - (ii) declining the application; or
  - (iii) granting the application with any conditions that the **Authority** considers appropriate in the circumstances.
- (2) The **Authority**, when exercising a discretion or power under this Part, must act in a timely manner.
- (3) The **Authority** must give an applicant reasons for its decision if the **Authority**—
  - (a) declines an application for approval to carry out an activity under this Part; or
  - (b) grants an application for approval to carry out an activity under this Part with any conditions that the **Authority** considers appropriate in the circumstances.
- (4) Nothing in this Part limits any of the **Authority's** rights and obligations under the **Act**.  
Heading: amended, on 5 October 2017, by clause 157(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 10.2(1), (2) and (3): amended, on 5 October 2017, by clause 157(2) and (3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 10.3 Use of contractors

- (1) A **participant** may perform its obligations and exercise its rights under this Part by using a contractor.
- (2) A **participant** who uses a contractor to perform the **participant's** obligation under this Part—
  - (a) remains responsible and liable for, and is not released from, the obligation, or any other obligation under this Part; and
  - (b) cannot assert that it is not responsible or liable for the obligation on the ground that the contractor—
    - (i) has done or not done something; or
    - (ii) has failed to meet a relevant standard; and
  - (c) must ensure that the contractor has at least the specified level of skill, expertise, experience, or qualification that the **participant** would be required to have if it were performing the obligation itself.
- (3) If a **participant** is a party to a contract or arrangement containing a provision, or part of a provision, which is inconsistent with this Part, the provision, or part of the provision, has no effect.

### 10.4 Participant obligations

- (1) If this Part provides that a **participant** must obtain a **consumer's** consent, approval, or authorisation, the **participant** must, if relevant, ensure that the consent, approval, or authorisation extends, for the full term of the contract or arrangement in relation to which the consent, approval, or authorisation is given, to any **participant** who may be expected to rely on that consent, approval, or authorisation to remain in compliance with this Part.
- (2) If a **participant** (**participant A**) incorrectly populates the **registry**, causing another

**participant (participant B)** to breach an obligation under this Code, and **participant B** relies, in good faith, on the incorrect information in the **registry**, **participant B** has not breached its obligation.

- (3) A **participant** must comply with all applicable enactments.
- (4) A **participant** is, unless it is specified otherwise in this Part, responsible for all costs of its compliance with this Part.
- (5) A reference in this Part to a **participant** knowing, or being or becoming aware of, a fact, includes reference to when a **participant** should have, in the circumstances, known, or been or become aware of, the fact.

Clause 10.4(2): amended, on 5 October 2017, by clause 158 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 10.5 References to timing

- (1) If an event is described in this Part as taking place on, or an obligation becoming effective from, a date, it takes place on, or becomes effective from, the beginning of the first **trading period** on the date, unless specified otherwise.
- (2) If a time period is expressed in this Part as—
  - (a) commencing on a date, it commences at the beginning of the first **trading period** on the date, unless specified otherwise:
  - (b) ending on a date, it ends at the close of the final **trading period** on the date, unless specified otherwise.

### 10.6 Participant to provide accurate information

- (1) A **participant** must take all practicable steps to ensure that information that it provides under this Part is—
  - (a) complete and accurate:
  - (b) not misleading or deceptive:
  - (c) not likely to mislead or deceive.
- (2) If a **participant** becomes aware that the information the **participant** provided under this Part does not comply with subclause (1)(a) to (c), even if the **participant** has taken all practicable steps to ensure that the information complies, the **participant** must, except if clause 10.43 applies, as soon as practicable provide such further information, or corrected information, as is necessary to ensure that the information complies with subclause (1)(a) to (c).

Clause 10.6(2): substituted, on 19 December 2014, by clause 20 of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.

### 10.7 Access to premises in which metering installation located

- (1) In this clause, access to a **metering installation**—
  - (a) means physical access to the premises in which the **metering installation** is located; but
  - (b) does not include access to the following, which are dealt with in Schedule 10.6:
    - (i) **raw meter data** from the **metering installation**; and
    - (ii) the **metering installation** itself and its **metering components**.
- (2) A **reconciliation participant** must, upon receiving a request from 1 of the following parties, arrange access to a **metering installation** for which it is responsible:

- (a) the **Authority**;
  - (b) an **ATH**;
  - (c) an **auditor**;
  - (d) a **metering equipment provider**;
  - (e) a **gaining metering equipment provider**.
- (3) A party listed in subclause (2) may only request access to the **metering installation** for the purposes of exercising the party's rights and performing the party's obligations under this Code or any relevant regulations in relation to 1 or more of the following:
- (a) the party's **audit** functions;
  - (b) the party's administration functions;
  - (c) the party's testing functions;
  - (d) the provision of **metering components**.
- (4) A **reconciliation participant** who is required to give a party listed in subclause (2) access to a **metering installation** must use its best endeavours to do so—
- (a) in accordance with the authorisation, and any conditions or restrictions contained in the authorisation, referred to in subclause (5); and
  - (b) subject to and to the extent allowed by the authorisation, in a manner and within a timeframe which are appropriate in the circumstances, to enable the party to exercise the party's rights, or perform the party's obligations, that are dependent, either directly or indirectly, on access being given.
- (5) If the **reconciliation participant** referred to in subclause (2) is a **trader** responsible for an **ICP** that—
- (a) has a **consumer**, the **trader** must have obtained the authorisation from the **consumer** to access the **metering installation** before arranging access; or
  - (b) does not have a **consumer**, the **trader** must arrange for access to the **metering installation**.
- (6) The **reconciliation participant** must arrange for the party listed in subclause (2) to be provided with any necessary facilities, codes, keys, or other means to enable the party to obtain access to the **metering installation** by the most practicable means.
- Clause 10.7(3): amended, on 5 October 2017, by clause 159 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 10.7(3): amended, on 20 December 2021, by clause 26 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

### 10.8 Requirements for information to be recorded, given, produced, or received

- (1) In this Part, a **participant** who must record, give, produce, or receive information, must do so in accordance with 1 or more of the following requirements **published** or **notified** by the **Authority**:
- (a) requirements providing for particular electronic technology;
  - (b) requirements providing for the use of a particular kind of **data storage device**;
  - (c) requirements providing for the use of a particular kind of electronic **communication**.
- (2) Subpart 3 of Part 4 of the Contract and Commercial Law Act 2017 does not, because of section 218(2)(a) of that Act, apply to this Part.
- (3) The **Authority** must act reasonably when determining the requirements referred to in subclause (1).

Clause 10.8(2): amended, on 1 November 2018, by clause 20(a) and (b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

### 10.9 Demarcation of responsibility between metering equipment provider and reconciliation participant

- (1) The demarcation of the responsibility of a **metering equipment provider** under this Part and a **reconciliation participant** under Part 15, is at the **services access interface**.
- (2) A **metering equipment provider** is responsible for providing and maintaining the **services access interface**.
- (3) The **services access interface** for a **metering installation** is—
  - (a) determined by the **ATH certifying the metering installation** under clause 10 of Schedule 10.4; and
  - (b) recorded in the **metering installation certification report** under clause 10 of Schedule 10.4.

### 10.10 Standards used

In this Part a reference to compliance with a standard, including an AS/NZS or IEC standard, is a reference to—

- (a) the version of the standard existing as at 29 August 2013; or
- (b) any amendment to or replacement of the standard incorporated by the **Authority** in accordance with section 131B of the **Act**; or
- (c) any equivalent standard incorporated by reference in this Code by the **Authority**.

Clause 10.10(a): amended, on 29 August 2013, by clause 11 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 10.10(b): amended, on 1 August 2023, by clause 38(1) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 10.10(c): amended, on 1 August 2023, by clause 38(2) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

### *Metering installations*

### 10.11 Categories of metering installation

- (1) An **ATH** must, before it **certifies a metering installation**, determine the category of the **metering installation** by reference to the characteristics of the **metering installation**, in accordance with clauses 5 and 6 of Schedule 10.7.
- (2) A **metering installation** used solely for **unmetered load** is category 0.
- (3) The category of each **metering installation**, other than a category 0 **metering installation**, is for all purposes of this Part—
  - (a) determined by the **ATH certifying the metering installation** under clauses 5 and 6 of Schedule 10.7; and
  - (b) recorded in the **metering installation certification report** under clause 8(4) of Schedule 10.7.

### 10.12 Interference with metering installation

Subject to clause 48 of Schedule 10.7, a **participant** must not directly or indirectly interfere with a **metering installation** for which it is not the **metering equipment provider**, unless—

- (a) it is instructed or permitted to do so by the **metering equipment provider** responsible for the **metering installation**; or
- (b) the **participant** has an arrangement with the **trader** responsible for the **metering installation** as the **gaining metering equipment provider** who will be responsible for the **metering installation**.

Clause 10.12: amended, on 1 February 2021, by clause 5 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

### 10.13 Electricity conveyed

- (1) A **participant** must use the quantity of **electricity** measured by a **metering installation** for a **point of connection** as the **raw meter data** for the quantity of **electricity** conveyed through the **point of connection**.
- (2) Subclause (1) does not apply to **electricity** that is—
  - (a) estimated in accordance with this Code; or
  - (b) supplied by an **embedded generator** who has given notice to the **reconciliation manager** under clause 15.13.
- (3) A **metering equipment provider** must, for each **point of connection** at which it is the **metering equipment provider**, ensure that all **electricity** conveyed through the **point of connection** is measured by a **metering installation** or **metering installations**, in accordance with this Part.
- (4) Despite subclause (3), a **metering equipment provider** is not required to measure **electricity** conveyed through a **point of connection** if the **electricity** is—
  - (a) **unmetered load**; or
  - (b) supplied by an **embedded generator** who has given notice to the **reconciliation manager** under clause 15.13.

Clause 10.13(2)(b): amended, on 1 November 2018, by clause 21(a) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 10.13(4)(b): amended, on 1 November 2018, by clause 21(b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

### 10.13A Metering installation must record imported electricity separately from exported electricity

- (1) A **metering equipment provider** must, for each **point of connection** at which it is the **metering equipment provider**, ensure that, if a **category 1 metering installation** or **category 2 metering installation** is capable of importing and exporting **electricity**,—
  - (a) the **metering installation** measures and records the imported **electricity** separately from the exported **electricity**; and
  - (b) the **metering installation** measures and records the imported **electricity** and exported **electricity** separately for each connected phase if the **metering installation** contains multiple phases.
- (2) A **metering equipment provider** for a category 3 or higher **metering installation** must ensure that the **metering installation** measures and records the imported **electricity** separately from the exported **electricity**.
- (3) Despite subclauses (1) and (2), if the **metering installation** contains multiple phases, the **metering equipment provider** for the **metering installation**—
  - (a) may aggregate together—
    - (i) the amounts of imported **electricity** recorded on different phases; or

- (ii) the amounts of exported **electricity** recorded on different phases; but
  - (b) must not aggregate together imported and exported **electricity**.
- Clause 10.13A: inserted, on 1 February 2021, by clause 6 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

### *Unmetered load*

#### **10.14 Unmetered load**

- (1) This clause applies to a **retailer** who is recorded in the **registry** as being responsible for an **ICP**.
- (2) A **retailer**—
  - (a) must quantify any **unmetered load** at the **ICP** in accordance with Parts 11 and 15; and
  - (b) may, subject to subclause (3), only treat load as **unmetered load** if it reasonably expects, in any rolling 12 month period, the load to be not greater than—
    - (i) 3,000 kWh; or
    - (ii) 6,000 kWh if the load is predictable load of a type approved and **published** by the **Authority**.
- (3) Subclause (2)(b) does not apply to **distributed unmetered load** managed in accordance with Part 15.
- (4) If the load during a rolling 12 month period exceeds the applicable limit under subclause (2)(b), the **retailer** breaches this clause from the date on which the limit was, or was calculated or estimated to have been, first exceeded.
- (5) A **retailer** described in subclause (4) must—
  - (a) as soon as reasonably practicable, but no later than 20 **business days** after the limit was calculated or estimated to have been first exceeded, commence corrective measures to ensure that it complies with this Part; and
  - (b) within 20 **business days** of commencing the corrective measures referred to in paragraph (a), complete the corrective measures so that it complies with this Part; and
  - (c) as soon as reasonably practicable, but no later than 10 **business days** after it becomes aware of the limit having been calculated or estimated to have been first exceeded, advise each **participant** who is, or would reasonably be expected to be, affected, of—
    - (i) the date on which the limit was calculated or estimated to have been first exceeded; and
    - (ii) the details of the corrective measures that the **retailer** proposes to take, has taken, or is taking, to reduce the **unmetered load**.

Clause 10.14(5)(c)(ii): amended, on 29 August 2013, by clause 12 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

### *Metering data*

#### **10.15 Security of metering data**

- (1) This clause applies to—
  - (a) a **participant** who has the right to collect, obtain, use, or store **metering data**;

and

- (b) the **Authority**.
- (2) A person to whom this clause applies must take security measures, as are reasonable in the circumstances, to protect **metering data** against loss or unauthorised access, use, modification, or disclosure.
- (3) Subclause (2) is subject to—
- (a) the person's obligations under any other enactment; and
  - (b) the person being otherwise compelled by law; and
  - (c) any applicable material that the **Authority** incorporates by reference into this Code.

Clause 10.15(3): amended, on 1 August 2023, by clause 39 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

### 10.16 Metering data exchange timing and formats

- (1) A **participant** (other than a **market operation service provider**) must, if it is under an obligation to provide **metering data** under this Part, provide the **metering data** to the relevant person—
- (a) in the absence of any timeframe specified in this Code, within a reasonable timeframe specified by the **Authority**; and
  - (b) in the format the **Authority** specifies to **participants** from time to time.
- (2) The **Authority** must provide reasonable notice of any changes to the format the **Authority** specifies under subclause (1)(b).
- (3) Despite subclause (1)(b), a **participant** may provide the **metering data** in an alternative format if it has an arrangement with the recipient to use the alternative format.
- (4) Despite subclause (3), the **participant** must be able to comply with any format requirements the **Authority** specifies under subclause (1)(b), within 1 **business day** of ceasing to have an arrangement with the recipient under subclause (3).
- (5) Despite using an alternative format under subclause (3), a **participant** must still comply with all other obligations in this Code.

Clause 10.16(1)(a) amended, on 1 November 2018, by clause 22(a) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 10.16(1)(b): amended, on 1 November 2018, by clause 22(b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 10.16(2) amended, on 1 November 2018, by clause 22(c) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 10.16(4): amended, on 1 November 2018, by clause 22(d) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

### *Audits*

#### 10.17 [Revoked]

Clause 10.17(1): revoked, on 1 February 2016, by clause 25 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 10.17(1): inserted, on 1 May 2016, by clause 5(1) of the Electricity Industry Participation Code Amendment (Minor Code Amendments) 2016.

Clause 10.17(2): revoked, on 1 May 2016, by clause 5(2) of the Electricity Industry Participation Code Amendment (Minor Code Amendments) 2016.

Clause 10.17: revoked, on 1 June 2017, by clause 6 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Audits) 2016.

### 10.17A Metering equipment providers and ATHs to arrange for regular audits

Each **metering equipment provider** and each **ATH** must arrange to be **audited** regularly in accordance with Part 16A in respect of the **metering equipment provider's** or **ATH's** obligations under this Part.

Clause 10.17A: inserted, on 1 June 2017, by clause 7 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Audits) 2016.

### 10.17B Authority and participant requested audits

- (1) The **Authority** may at any time carry out, or appoint an **auditor** to carry out, an **audit** of a **participant** in respect of the **participant's** obligations under this Part.
- (2) If a **participant** considers that another **participant** may not have complied with this Part, the **participant** may request that the **Authority** carry out, or appoint an **auditor** to carry out, an **audit** of the other **participant**.
- (3) Part 16A applies to an **audit** carried out under this clause.

Clause 10.17B: inserted, on 1 June 2017, by clause 7 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Audits) 2016.

## Subpart 2—Ongoing obligations

### *Metering equipment providers*

### 10.18 Category 1 metering installations and higher categories of metering installations must have metering equipment provider

- (1) A **participant** who is responsible under Part 15 for providing **submission information** to the **reconciliation manager** for a **point of connection** must ensure that, for each **metering installation** for the **point of connection** used for an activity regulated under this Code, there is a **metering equipment provider**.
- (2) A **participant** must not use, and must not permit any person to use, a **category 1 metering installation**, or higher category of **metering installation**, for a **point of connection** for an activity regulated under this Code unless, at the time of such use, there is a **metering equipment provider** for the **metering installation**.
- (3) Despite subclauses (1) and (2), a **point of connection** at which all **electricity** conveyed is **unmetered load**—
  - (a) does not require a **metering equipment provider**; and
  - (b) may be used for an activity regulated under this Code.
- (4) If there is more than 1 **metering installation** for a **point of connection**, the **metering equipment provider** for each **metering installation** must be the same **participant**.

### 10.19 Metering equipment provider

- (1) The **metering equipment provider** for each existing **category 1 metering installation**, or higher category of **metering installation**, being used on 29 August 2013 for an activity regulated under this Code, for a **point of connection**—
  - (a) that is an **ICP** and not also an **NSP**, is the **participant**, or a **consumer**, who is identified in the **registry** as being the primary metering contact at 2400 hours on 28 August 2013;
  - (b) that is an **NSP** and not also a **point of connection** to the **grid**—
    - (i) is the **participant** who owns the **meter** for the **point of connection**:

- (ii) if there is more than 1 **meter** for the **point of connection**, is the **participant** who is appointed by the **meter** owners for the **point of connection**, or failing agreement, appointed by the **Authority**:
  - (c) to the **grid**, is the **participant** responsible for **metering** as set out in the **NSP** table on the **Authority's** website at 2400 hours on 28 August 2013.
- (2) The **metering equipment provider** for each **category 1 metering installation**, or higher category of **metering installation** for a **point of connection**, other than a **metering installation** referred to in subclause (1),—
- (a) that is an **ICP** and not also an **NSP**, is the person recorded in the **registry** as accepting responsibility as the **metering equipment provider** under clause 1(1)(a)(ii) of Schedule 11.4:
  - (b) that is an **NSP** and not also a **point of connection** to the **grid**, is—
    - (i) the **network** owner referred to in clause 10.25(2)(a)(i); or
    - (ii) if a person has contracted with the **network** owner under clause 10.25(2)(a)(ii), that person:
  - (c) that is a **point of connection** to the **grid**, is—
    - (i) the **participant** referred to in clause 10.26(7)(b); or
    - (ii) if a person has contracted with the **participant** responsible for providing a **metering installation** under clause 10.26(7)(b), that person.

Clause 10.19(1): amended, on 29 August 2013, by clause 13(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 10.19(1)(a): amended, on 29 August 2013, by clause 13(2) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 10.19(1)(b)(ii): amended, on 5 October 2017, by clause 160(a) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 10.19(1)(c): amended, on 29 August 2013, by clause 13(3) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 10.19(2)(a): amended, on 5 October 2017, by clause 160(b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 10.20 Obligations of metering equipment provider

A **metering equipment provider** must—

- (a) *[Revoked]*
- (b) comply with all of its obligations in this Code including the obligations under Schedules 10.6, 10.7, and 10.8.

Clause 10.20(a): revoked, on 1 June 2017, by clause 8 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Audits) 2016.

## 10.21 When metering equipment provider's obligations come into effect

- (1) The obligations under this Part of a person who assumes responsibility, or is appointed to be responsible, as the **metering equipment provider**, under clauses 10.19(2) or 10.22, for a **metering installation**, commence,—
  - (a) for an **ICP** that is not also an **NSP**, on the date that is recorded in the **registry** as being the date on which the **metering installation equipment** was installed; or
  - (b) for an **NSP**, on the effective date set out in the **NSP** table on the **Authority's** website.
- (2) Despite subclause (1), if a person fails to become the **metering equipment provider** due solely to an administrative failure or similar reason, the **Authority** may determine

the date that the person becomes the **metering equipment provider**.

Clause 10.21(1)(a): substituted, on 29 August 2013, by clause 14 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

## 10.22 Change of metering equipment provider

- (1) The **metering equipment provider** for a **metering installation** may change only if the **participant** responsible for ensuring there is a **metering installation** under clause 10.24, 10.25, or 10.26 enters into an arrangement with another person to become the **metering equipment provider** for the **metering installation** and—
  - (a) in the case of a **metering installation** for an **ICP** that is not also an **NSP**—
    - (i) the **trader** for the **metering installation** records the name of the **gaining metering equipment provider** in the **registry** in accordance with Part 11; and
    - (ii) the **gaining metering equipment provider** records in the **registry** that it accepts becoming the **metering equipment provider** (including the effective date from which the **gaining metering equipment provider** assumes its responsibility as **metering equipment provider** for the **metering installation**) in accordance with Part 11; or
  - (b) in the case of a **metering installation** for an **NSP**, the **participant** responsible for the provision of the **metering installation** under clause 10.25 advises the **reconciliation manager** of the **gaining metering equipment provider**.
- (1A) The **losing metering equipment provider** must within 40 **business days** of the **gaining metering equipment provider** assuming responsibility for a **metering installation**—
  - (a) calculate any proportion of costs described in subclauses (3) and (4); and
  - (b) notify the **gaining metering equipment provider** in writing of those costs.
- (1B) The **losing metering equipment provider** does not need to comply with subclause (1A) if the **losing metering equipment provider** does not wish to charge the **gaining metering equipment provider** a proportion of costs.
- (1C) If the **losing metering equipment provider** does not carry out the calculation and notify the **gaining metering equipment provider** under subclause 1(A) within the time frame in that subclause, the **gaining metering equipment provider** does not need to comply with subclause (2).
- (2) The **gaining metering equipment provider** must, within 20 **business days** of receiving a notice provided under subclause (1A), pay the **losing metering equipment provider** the proportion of the costs described in subclause (3) and subclause (4).
- (3) The costs payable under subclause (2) are those directly and solely attributable to the **certification tests** and **calibration tests** of—
  - (a) the **metering installation**; or
  - (b) any **metering components** in the **metering installation**.
- (4) However, when calculating the costs payable under subclause (2)—
  - (a) no costs are payable for a **metering component** in a **metering installation** if the **gaining metering equipment provider**, within three **business days** of assuming responsibility for the **metering installation**,—
    - (i) replaces the **metering component**; or
    - (ii) removes the **metering component** from use; or
    - (iii) **recertifies** the **metering component**; and

- (b) no costs are payable for a **metering installation** if the **gaining metering equipment provider**, within three **business days** of assuming responsibility for the **metering installation**,—
    - (i) replaces the **metering installation**; or
    - (ii) removes the **metering installation** from use; or
    - (iii) **recertifies** the **metering installation**; and
  - (c) the costs for a **metering component** must be prorated for the remainder of the **certification** validity period for the **metering component**; and
  - (d) the costs for a **metering installation** are the sum of the prorated costs payable under this clause for each **metering component** in the **metering installation**.
- (5) Despite subclause (2), a **gaining metering equipment** provider is not required to pay the costs if—
- (a) it has agreed in writing with the **losing metering equipment provider** that the **gaining metering equipment provider** is not required to pay costs under this clause; or
  - (b) the **losing metering equipment provider** has failed to provide notice of the costs to the **gaining metering equipment provider** in accordance with subclause (1A).

Clause 10.22(1)(a)(i) and (ii): amended, on 5 October 2017, by clause 161(a) and (b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 10.22(1A), (1B) and (1C): inserted, on 1 February 2021, by clause 7(1) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 10.22(2): amended, on 1 February 2021, by clause 7(2) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 10.22(3): replaced, on 1 February 2021, by clause 7(3) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 10.22(4) and (5): inserted, on 1 February 2021, by clause 7(4) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

### 10.23 Termination of metering equipment provider responsibility

- (1) Subject to subclause (2), a **metering equipment provider's** obligations under this Part for a **metering installation** terminate only when—
- (a) for an **ICP** that is not also an **NSP**, the **metering equipment provider** changes under clause 10.22(1)(a), in which case the **metering equipment provider's** obligations terminate from the date on which the **gaining metering equipment provider** assumes responsibility, set out in clause 10.21(1)(a); or
  - (b) for an **NSP**, the **metering equipment provider** changes under clause 10.22(1)(b), in which case the **metering equipment provider's** obligations terminate from the date on which the **gaining metering equipment provider** assumes responsibility, set out in clause 10.21(1)(b); or
  - (c) the **metering installation** is no longer required for the purposes of Part 15 and the **point of connection** for the **metering installation** has been **decommissioned**; or
  - (d) the **ICP** for the **metering installation** is converted to be used solely for **unmetered load** in accordance with this Code.
- (2) Despite subclause (1), a **metering equipment provider** must either—
- (a) comply with its continuing obligations, including record keeping obligations, which—
    - (i) are expressed in this Part as having minimum time periods, until that period expires; or
    - (ii) by their nature extend beyond the date or event referred to in subclause (1);

or

- (b) before its obligations terminate under subclause (1), enter into an arrangement with a **participant** to assume its obligations referred to in paragraph (a).

#### 10.23A Decommissioning of metering installation at ICP

- (1) If a **metering installation** at an **ICP** is to be **decommissioned**, but the **ICP** is not being **decommissioned**, the **metering equipment provider** that is responsible for **decommissioning** the **metering installation** must,—
  - (a) if the **metering equipment provider** is responsible for **interrogating** the **metering installation**—
    - (i) arrange for a final **interrogation** to take place before the **metering installation** is **decommissioned**; and
    - (ii) provide the **raw meter data** from the **interrogation** to the **trader** that is recorded in the **registry** as being responsible for the **ICP**; or
  - (b) if another **participant** is responsible for **interrogating** the **metering installation**, advise the other **participant** not less than 3 **business days** before the **decommissioning**—
    - (i) of the date and time of the **decommissioning**; and
    - (ii) that the **participant** must carry out a final **interrogation**.
- (2) To avoid doubt, if a **metering installation** at an **ICP** is to be **decommissioned** because the **ICP** is being **decommissioned**—
  - (a) the **metering equipment provider** is not responsible for arranging a final **interrogation** of the **metering installation**; and
  - (b) the **trader** that is recorded in the **registry** as being responsible for the **ICP** must arrange for a final **interrogation** of the **metering installation** under clause 11.18(3).

Clause 10.23(A): inserted, on 1 November 2018, by clause 23 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

#### *Responsibility for ensuring there are metering installations*

#### 10.24 Responsibility for ensuring there is metering installation for ICP that is not also NSP

A **trader** must, for each **electrically connected ICP** that is not also an **NSP**, and for which it is recorded in the **registry** as being responsible, ensure that—

- (a) there is 1 or more **metering installations**; and
- (b) all **electricity** conveyed is quantified in accordance with this Code; and
- (c) it does not use subtraction to determine **submission information** for the purposes of Part 15.

Clause 10.24: amended, on 5 October 2017, by clause 162 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### 10.25 Responsibility for ensuring there is metering installation for NSP that is not point of connection to grid

- (1) A **distributor** must, for each **NSP** that is not a **point of connection** to the **grid**, and for which it is recorded in the **NSP** table on the **Authority's** website as being responsible, ensure that—
  - (a) there is 1 or more **metering installations**; and

- (b) all **electricity** conveyed is quantified in accordance with this Code:
- (2) A **distributor** must, if it proposes the creation of a new **NSP** that is not a **point of connection** to the **grid**,—
- (a) for each **metering installation** for the **NSP**, either—
- (i) assume responsibility for being the **metering equipment provider**; or
- (ii) contract with a person who, in that contract, assumes responsibility for being the **metering equipment provider**; and
- (b) within 20 **business days** after assuming responsibility or entering into the contract under paragraph (a), advise the **reconciliation manager** of—
- (i) the **reconciliation participant** for the **NSP**;
- (ii) *[Revoked]*
- (c) within 5 **business days** after the date of **certification** of each **metering installation**, advise the **reconciliation manager** of—
- (i) the **participant identifier** of the **metering equipment provider** for the **metering installation**; and
- (ii) the **certification** expiry date of the **metering installation**.
- (3) In relation to an **NSP** of the type described in subclause (1), a **distributor** must, no later than 20 **business days** after a **metering installation** for such an **NSP** is **recertified**, advise the **reconciliation manager** of the following:
- (a) the **reconciliation participant** for the **NSP**;
- (b) the **participant identifier** of the **metering equipment provider** for the **metering installation**;
- (c) the **certification** expiry date of the **metering installation**.

Clause 10.25(1): amended, on 29 August 2013, by clause 15(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 10.25(2): amended, on 29 August 2013, by clause 15(2) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 10.25(2)(b)(ii): amended, on 29 August 2013, by clause 15(3) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 10.25(2)(b)(ii): amended, on 1 February 2016, by clause 26(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 10.25(2)(c): amended, on 1 February 2016, by clause 26(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 10.25(3): inserted, on 1 February 2016, by clause 26(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 10.25(2)(b): amended, on 1 February 2021, by clause 8(1)(a) and (b) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 10.25(2)(b)(ii): revoked, on 1 February 2021, by clause 8(1)(c) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 10.25(2)(c): replaced, on 1 February 2021, by clause 8(2) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 10.25(2)(c) and (2)(c)(ii): amended, on 1 March 2024, by clause 36 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

## 10.26 Responsibility for ensuring there is metering installation for point of connection to grid

- (1) A **grid owner** must, for each **GXP** which connects to its **grid**, ensure that there is 1 or more **certified metering installations** for the **GXP**.
- (2) An **asset owner** must, for each **GIP** which connects to the **grid**, ensure that there is 1 or more **certified metering installations** for the **GIP**.
- (3) A **participant** who proposes to connect to the **grid** at a new **point of connection** must take all practicable steps and use its best endeavours to agree with the **grid owner** and

- any other affected **participants**, on which **participant** will provide the **metering installation** for the proposed new **point of connection**.
- (4) If the **participants** cannot agree, within 60 **business days** of the **grid owner** first being advised of the proposed new **point of connection** to the **grid**, on the **participant** to be responsible for providing the **metering installation**,—
- (a) any affected **participant** may advise the **Authority**—
    - (i) that agreement has not been reached; and
    - (ii) of the identity of all affected **participants**; and
    - (iii) of the reasons (if and to the extent known) that agreement was not reached; and
  - (b) the **Authority** must determine which **participant** must provide the **metering installation**; and
  - (c) the **Authority** must advise—
    - (i) the relevant **participant** of its responsibility to provide the **metering installation**; and
    - (ii) the **participant** intending to connect to the **grid** of its determination; and
    - (iii) the **grid owner** of its determination.
- (5) When determining which **participant** is responsible for providing the **metering installation**, the **Authority** must, unless it is satisfied that there is good reason not to do so, do so on the basis that—
- (a) the **grid owner** is responsible if the **Authority** anticipates that the **point of connection** is a **GXP**; and
  - (b) the **participant** connecting **assets** to the **grid** at the **point of connection** is responsible if the **Authority** anticipates that the **point of connection** is a **GIP**.
- (6) The **participant** responsible for providing the **metering installation** (unless the **participant** is a **grid owner**) must also, for each proposed new **metering installation** for a **point of connection** to the **grid**,—
- (a) provide a copy of the **metering installation** design to the **grid owner** before ordering equipment; and
  - (b) provide the **grid owner** with at least 3 months to review and comment on the **metering installation** design; and
  - (c) respond, within 3 **business days** of receipt, to any request from the **grid owner** for additional details or required changes to the **metering installation**; and
  - (d) ensure that any reasonable changes to the **metering installation** or the **metering installation** configuration requested by the **grid owner** are carried out.
- (7) The **participant** responsible for providing the **metering installation** must—
- (a) advise the **reconciliation manager** of the **certification** expiry date of the **metering installation** no later than 10 **business days** after **certification** of the **metering installation**; and
  - (b) assume responsibility for being the **metering equipment provider** for the **metering installation** or contract with a person to assume responsibility for being the **metering equipment provider** for the **metering installation**; and
  - (c) advise the **reconciliation manager** of the **participant identifier** of the **metering equipment provider** under paragraph (b) by no later than 20 **business days** after,—
    - (i) if it is appointed under a contract, entering into the contract under

- paragraph (b); or
- (ii) if it assumes responsibility for being the **metering equipment provider**, other than under a contract, assuming responsibility.
- (8) The **participant** responsible for providing the **metering installation** (unless the **participant** is a **grid owner**) must, in the case of a proposed modification to an existing **metering installation** under clause 19 of Schedule 10.7—
- (a) provide a copy of the **metering installation** design to the **grid owner** before ordering equipment or carrying out the modification to the **metering installation** design; and
- (b) provide the **grid owner** with at least 3 months to review and comment on the **metering installation** design; and
- (c) respond, within 3 **business days** of receipt, to any request from the **grid owner** for additional details or required changes to the **metering installation** or its configuration; and
- (d) ensure that any reasonable changes to the **metering installation** or the **metering installation** configuration requested by the **grid owner** are carried out.
- (9) If the **grid owner** considers, acting reasonably, that a proposed new **metering installation**, or a proposed change to an existing **metering installation**, or its configuration, requires subtraction or a **loss compensation** or **error compensation** process to determine **submission information** for the purposes of Part 15, the **grid owner** must, unless an **error compensation** process is to be applied to the **metering installation** that is already within the applicable accuracy tolerances set out in Table 1 of Schedule 10.1—
- (a) provide all relevant details to the **Authority**, in the **prescribed form**, at least 20 **business days** before—
- (i) the proposed date for installing the **metering installation**; or
- (ii) the proposed date for changing the **metering installation** or **metering installation's** configuration; and
- (b) respond, within 3 **business days** of receipt, to any request from the **Authority** for additional details; and
- (c) ensure that any reasonable changes to the **metering installation** or its configuration requested by the **Authority** are carried out.
- (10) A **metering equipment provider** must ensure that the quantity of **electricity** conveyed through a **point of connection** to the **grid** for which there is a **metering installation** for which it is responsible is measured using a **half-hour metering installation**.
- (11) If a **metering installation** for a **point of connection** to the **grid** is **recertified**, the **participant** responsible for providing the **metering installation** must, within 10 **business days** of the date of **recertification**, advise the **reconciliation manager** of the **metering installation's** new **certification** expiry date.

Clause 10.26(1): amended, on 29 August 2013, by clause 16(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 10.26(2): amended, on 29 August 2013, by clause 16(2) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 10.26(3): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 10.26(4)(c)(ii): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 10.26(5)(b): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 10.26(3), (4), (5) and 9: amended, on 5 October 2017, by clause 163 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### **10.27 Change in responsibility for ensuring metering installation for point of connection to grid**

- (1) If a **participant** considers, on the basis of historical **metering data**, that there has been a change in the overall net flow of **electricity** at a **point of connection** to the **grid** over any 12 month period, the **participant** who is responsible for ensuring there is a **metering installation** may initiate the process under clauses 10.26(3) to 10.26(5) with all necessary amendments, in order to change the **participant** responsible for providing the **metering installation**.
- (2) If the **participant** who is responsible for ensuring there is a **metering installation** changes under subclause (1), the responsibility for providing **submission information** to the **reconciliation manager** under Part 15 changes.

#### *Connecting and electrically connecting points of connection*

Heading: amended, on 29 August 2013, by clause 17(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Heading: amended, on 5 October 2017, by clause 164 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### **10.28 [Revoked]**

Clause 10.28: substituted, on 29 August 2013, by clause 17 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 10.28(2)(a), (2)(b) and (3): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 10.28: revoked, on 5 October 2017, by clause 165 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### **10.29 When grid owner may connect point of connection to grid**

- (1A) Only a **grid owner** may connect a **point of connection** to the **grid**.
- (1) Despite subclause (1A), a **grid owner** must not connect a **point of connection** to the **grid** unless it has—
  - (a) ensured that the processes described in clause 10.26 have been carried out; and
  - (b) requested, in the **prescribed form**, not less than 20 **business days** before the proposed connection date, authorisation from the **Authority**, to connect the **point of connection**; and
  - (c) obtained the authorisation referred to in paragraph (b) from the **Authority**.
- (2) The **grid owner** must, within 5 **business days** of connecting a **point of connection** to the **grid**, advise the **reconciliation manager** of—
  - (a) the **point of connection** that has been connected; and
  - (b) the connection date.

Heading: amended, on 5 October 2017, by clause 166(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 10.29(1A): inserted, on 5 October 2017, by clause 166(2)(a) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 10.29(1) and (2): amended, on 5 October 2017, by clause 166(2)(b) to (d) of the Electricity Industry

Participation Code Amendment (Code Review Programme) 2017. Clause 10.29: substituted, on 29 August 2013, by clause 18 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 10.29: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

**10.29A When grid owner may temporarily electrically connect point of connection to grid**

- (1) Subject to clause 10.33, only a **grid owner** may temporarily electrically connect a **point of connection** to the **grid**.
- (2) A **grid owner** may temporarily electrically connect a **point of connection** to the **grid** that is to be quantified with a **category 1 metering installation**, or higher category of **metering installation**, only if a **metering equipment provider** requests that the **grid owner** temporarily electrically connect the **point of connection** to the **grid** for the purposes of—
  - (a) **certifying a metering installation** at the **point of connection** to the **grid**; or
  - (b) maintaining, repairing, testing, or **commissioning a metering installation** at the **point of connection** to the **grid**.
- (3) Despite subclause (2), a **metering equipment provider** must not request that a **grid owner** temporarily electrically connect a **point of connection** to the **grid** unless—
  - (a) the **grid owner** responsible for the **point of connection** has authorised the **metering equipment provider** to do so; and
  - (b) the **metering equipment provider** has an arrangement with that **grid owner** to provide **metering services**.

Clause 10.29A: inserted, on 5 October 2017, by clause 167 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**10.29B Grid owner may electrically connect point of connection to grid**

- (1) Subject to clause 10.33A, only a **grid owner** may electrically connect a **point of connection** to the **grid** that it owns or operates.
- (2) A **grid owner** may only electrically connect a **point of connection** under subclause (1) if—
  - (a) in the case of the **electrical connection** of a **direct consumer** or **grid connected generator**, there is a **trader** identified as responsible under Part 15 for the delivery of **submission information** for the **electricity** conveyed at the **point of connection** from the time of **electrical connection**; or
  - (b) in the case of the **electrical connection** of a **local network** that has one or more **consumers** connected to the **local network** or to an **embedded network** that is connected to the **local network** (either directly or through another **embedded network**), one or more **traders** are identified as responsible under Part 15 for the delivery of **submission information** for the **electricity** conveyed at the **point of connection** from the time of **electrical connection**; or
  - (c) in the case of the **electrical connection** of a **local network** that has no **consumers** connected to the **local network** or to any **embedded network** that is connected to the **local network** (either directly or through another **embedded network**), if the **distributor** for that **local network** is identified as responsible under Part 15 for the delivery of **submission information** for the **electricity** conveyed at the **point of connection** from the time of **electrical connection**.

Clause 10.29B: inserted, on 1 February 2021, by clause 9 of the Electricity Industry Participation Code Amendment

(Metering and Related Registry Processes) 2020.

*Disconnecting and electrically disconnecting points of connection to the grid*

**10.29C Grid owner may electrically disconnect or disconnect point of connection to grid**

- (1) Subject to subclause (2), only a **grid owner** may—
  - (a) **electrically disconnect a point of connection to the grid**; or
  - (b) **disconnect a point of connection to the grid**.
- (2) A **grid owner** may disconnect or **electrically disconnect a point of connection to the grid** that it owns or operates only if the action is required for the **grid owner** to meet its obligations—
  - (a) under an enactment, including this Code; or
  - (b) under its contract with the party identified in clause 10.29B(2) as responsible in accordance with Part 15 for the delivery of **submission information** for the **electricity** conveyed at the **point of connection to the grid**.

Clause 10.29C: inserted, on 1 February 2021, by clause 9 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

**10.30 When local network owner or embedded network owner may connect NSP that is not point of connection to grid**

- (1A) Only a **local network** owner that initiates, under Part 11, the creation of an **NSP** on its **local network** that is not a **point of connection to the grid** may connect the **NSP** to—
  - (a) an **embedded network**, but only if the **embedded network** owner has agreed to the connection; or
  - (b) another **local network**, but only if the owner of the other **local network** has agreed to the connection.
- (1B) Only an **embedded network** owner that initiates, under Part 11, the creation of an **NSP** on its **embedded network**—
  - (a) may connect the **NSP** to another **embedded network**; but
  - (b) can only do so if the other **embedded network** owner has agreed to the connection.
- (1) A **local network** owner or an **embedded network** owner must not connect an **NSP** on its **network** under subclause (1A) or (1B) unless requested to do so by the **reconciliation participant** responsible for ensuring there is a **metering installation** for the **NSP**.
- (2) A **local network** owner or an **embedded network** owner that initiates the creation of an **NSP** under Part 11 on the owner's **network** and connects the **NSP** under this clause must, within 5 **business days** of connecting the **NSP**, advise the **reconciliation manager** of the following:
  - (a) that the **NSP** has been connected; and
  - (b) the connection date; and
  - (c) the **participant identifier** of the **metering equipment provider** for each **metering installation** for the **NSP**; and
  - (d) the **certification** expiry date of each **metering installation** for the **NSP**.

Clause 10.30: substituted, on 29 August 2013, by clause 19 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 10.30: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 10.30: replaced, on 5 October 2017, by clause 168 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 10.30: replaced, on 1 February 2021, by clause 10 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

**10.30A When local network owner or embedded network owner may temporarily electrically connect NSP that is not point of connection to grid**

- (1) Subject to clause 10.33, only a **local network** owner that initiates, under Part 11, the creation of an **NSP** on its **local network** that is not a **point of connection** to the **grid** may temporarily **electrically connect** the **NSP** to—
  - (a) an **embedded network**, but only if the **embedded network** owner has agreed to the temporary **electrical connection**; or
  - (b) another **local network**, but only if the owner of the other **local network** has agreed to the temporary **electrical connection**.
- (2) Subject to clause 10.33, only an **embedded network** owner that initiates, under Part 11, the creation of an **NSP** on its **embedded network**—
  - (a) may temporarily **electrically connect** the **NSP** to another **embedded network**; but
  - (b) can only do so if the other **embedded network** owner has agreed to the temporary **electrical connection**.
- (3) A **local network** owner or an **embedded network** owner may only temporarily **electrically connect** an **NSP** under subclause (1) or (2) if a **metering equipment provider** requests that the **local network** owner or **embedded network** owner temporarily **electrically connect** the **NSP** for the purposes of—
  - (a) **certifying** a **metering installation** at the **NSP**; or
  - (b) maintaining, repairing, testing, or **commissioning** a **metering installation** at the **NSP**.
- (4) Despite subclause (3), a **metering equipment provider** must not request that a **local network** owner or an **embedded network** owner temporarily **electrically connect** an **NSP** under subclause (1) or (2) unless—
  - (a) the **reconciliation participant** responsible for the **NSP** authorises the **metering equipment provider** to do so; and
  - (b) the **metering equipment provider** has an arrangement with that **reconciliation participant** to provide **metering** services.

Clause 10.30A: inserted, on 5 October 2017, by clause 169 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 10.30A: replaced, on 1 February 2021, by clause 10 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

**10.30B When distributor may electrically connect NSP that is not point of connection to grid**

- (1) Subject to clause 10.33A, only a **distributor** may, on its **network**, **electrically connect** an **NSP** that is not a **point of connection** to the **grid**.
- (2) A **distributor** may only **electrically connect** an **NSP** under subclause (1) that is not an **interconnection point** between two **local networks** if—
  - (a) each **distributor** whose **network** is directly connected to the **NSP** has agreed to the **electrical connection**; and
  - (b) 1 or more **traders** are identified as responsible under Part 15 for the delivery of **submission information** for the **electricity** conveyed at the **NSP** from the time of **electrical connection** and that **trader** or those **traders** have—
    - (i) requested the **electrical connection**; and

- (ii) confirmed to the **distributor** that the **metering installation** at the **NSP** is **certified** and operational.
  - (3) A **distributor** may only **electrically connect** an **NSP** under subclause (1) that is an **interconnection point** between two **local networks** if the **reconciliation participant** responsible for the delivery of **submission information** for the **NSP**—
    - (a) has requested the **electrical connection**; and
    - (b) has confirmed the **metering installation** at the **NSP** is **certified** and operational.
- Clause 10.30B: inserted, on 1 February 2021, by clause 11 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

*Disconnecting and electrically disconnecting NSPs*

**10.30C Distributor may electrically disconnect or disconnect NSP that is not point of connection to grid**

- (1) Subject to subclause (2), only a **distributor** may, on its **network**—
  - (a) **electrically disconnect** an **NSP** that is not a **point of connection** to the **grid**; or
  - (b) **disconnect** an **NSP** that is not a **point of connection** to the **grid**.
- (2) A **distributor** may take one of the actions under subclause (1) only if the action is required for the **distributor** to meet its obligations—
  - (a) under an enactment, including this Code; or
  - (b) under its contract with the **trader** or **traders** responsible for the delivery of **submission information** under Part 15 for the **electricity** conveyed at the **NSP**.

Clause 10.30C: inserted, on 1 February 2021, by clause 11 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

**10.31 When distributor may connect ICP that is not NSP**

- (1) Only a **distributor** may, on its **network**, connect an **ICP** that is not an **NSP**.
- (2) Despite subclause (1), a **distributor** must not connect an **ICP** that is not an **NSP** unless—
  - (a) the **trader** trading at the **ICP** has requested the connection; or
  - (b) in the following circumstances:
    - (i) there is only **shared unmetered load** at the **ICP**; and
    - (ii) in accordance with clause 11.14, the **distributor** has—
      - (A) assigned the **shared unmetered load**; and
      - (B) advised each **trader**, that is responsible under clause 11.18(1) for the **ICPs** across which the **unmetered load** is shared, of that assignment.

Clause 10.31: substituted, on 29 August 2013, by clause 20 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 10.31(a): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 10.31: replaced, on 5 October 2017, by clause 170 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 10.31(1): amended, on 1 November 2018, by clause 24(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 10.31(2): replaced, on 1 November 2018, by clause 24(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

**10.31A When distributor may temporarily electrically connect ICP that is not NSP**

- (1) Subject to clause 10.33, only a **distributor** may, on its **network**, temporarily **electrically connect** an **ICP** that is not an **NSP**.

- (2) A **distributor** may only temporarily **electrically connect** an **ICP** that is not an **NSP**—
- (a) if a **metering equipment provider** requests that the **distributor** temporarily **electrically connect** the **ICP** for the purposes of—
- (i) **certifying a metering installation** at the **ICP**; or
- (ii) maintaining, repairing, testing, or **commissioning a metering installation** at the **ICP**; or
- (b) in the following circumstances:
- (i) there is only **shared unmetered load** at the **ICP**; and
- (ii) in accordance with clause 11.14, the **distributor** has—
- (A) assigned the **shared unmetered load**; and
- (B) advised each **trader**, that is responsible under clause 11.18(1) for the **ICPs** across which the **unmetered load** is shared, of that assignment; and
- (iii) the **distributor** has advised those **traders** of the **distributor's** intention to temporarily **electrically connect** the **ICP**.
- (3) Despite subclause (2)(a), a **metering equipment provider** must not request that a **distributor** temporarily **electrically connect** an **ICP** that is not an **NSP** unless—
- (a) the **trader** responsible for the **ICP** has authorised the **metering equipment provider** to do so; and
- (b) the **metering equipment provider** has an arrangement with that **trader** to provide **metering** services.
- (4) Despite subclause (2)(b), the **distributor** need not advise the **traders** of the **distributor's** intention to temporarily **electrically connect** the **ICP** if—
- (a) advising all **traders** would impose a material cost on the **distributor**; and
- (b) in the **distributor's** reasonable opinion, advising the **traders** would not result in any material benefit to any of the **traders**.
- Clause 10.31A: inserted, on 5 October 2017, by clause 171 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 10.31A(1): amended, on 1 November 2018, by clause 25(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.  
Clause 10.31A(2): replaced, on 1 November 2018, by clause 25(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.  
Clause 10.31A(3): amended, on 1 November 2018, by clause 25(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.  
Clause 10.31A(4): inserted, on 1 November 2018, by clause 25(4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

### **10.31B When distributor may electrically connect ICP that is not NSP**

- (1) A **distributor** may **electrically connect** an **ICP** that is not an **NSP** only if—
- (a) there is only **shared unmetered load** at the **ICP**; and
- (b) in accordance with clause 11.14, the **distributor** has—
- (i) assigned the **shared unmetered load**; and
- (ii) advised each **trader**, that is responsible under clause 11.18(1) for the **ICPs** across which the **unmetered load** is shared, of that assignment; and
- (c) the **distributor** has advised those **traders** of the **distributor's** intention to **electrically connect** the **ICP**.
- (2) Despite subclause (1)(c), the **distributor** need not advise the **traders** of the **distributor's** intention to **electrically connect** the **ICP** if—
- (a) the **distributor** is doing so following a maintenance outage; and
- (b) advising all **traders** would impose a material cost on the **distributor**; and
- (c) in the **distributor's** reasonable opinion, advising the **traders** would not result in

any material benefit to any of the **traders**.

Clause 10.31B: inserted, on 1 November 2018, by clause 26 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 10.31B(2): amended, on 20 December 2021, by clause 27 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

*Disconnecting and electrically disconnecting ICPs*

**10.31C Distributor may electrically disconnect or disconnect ICP that is not an NSP**

- (1) Subject to subclause (2), only a **distributor** may, on its **network**,—
  - (a) **electrically disconnect** an **ICP** that is not an **NSP**; or
  - (b) **disconnect** an **ICP** that is not an **NSP**.
- (2) A **distributor** may take one of the actions under subclause (1) only if the action is required for the **distributor** to meet its obligations—
  - (a) under an enactment, including this Code; or
  - (b) under its contract with the **trader** recorded in the **registry** as being responsible for the **ICP**; or
  - (c) under its contract with the **consumer** at the **ICP**.

Cross heading and clause 10.31C: inserted, on 1 February 2021, by clause 12 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

**10.32 Reconciliation participant requesting connection of point of connection**

For the purposes of clauses 10.30(1) and 10.31(2), a **reconciliation participant** must only request the connection of a **point of connection** if the **reconciliation participant**—

- (a) accepts responsibility for the **reconciliation participant's** obligations in this Part and Parts 11 and 15 for the **point of connection**; and
- (b) has an arrangement with a **metering equipment provider** to provide 1 or more **metering installations** for the **point of connection**.

Clause 10.32 Heading: amended, on 29 August 2013, by clause 21(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 10.32 Heading: amended, on 5 October 2017, by clause 172(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 10.32: amended, on 29 August 2013, by clause 21(2) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 10.32: amended, on 5 October 2017, by clause 172(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**10.33 When trader may temporarily electrically connect a point of connection**

- (1) A **trader** may temporarily **electrically connect** a **point of connection**, or a **metering equipment provider** authorised by a **trader** under subclause (2) may temporarily **electrically connect** a **point of connection** only if—
  - (aa) for an **NSP** that is a **point of connection** to the **grid**, the **grid owner** has approved—
    - (i) the **trader** temporarily **electrically connecting** the **point of connection**; or
    - (ii) the **trader** authorising the temporary **electrical connection** of the **point of connection**;
  - (ab) for an **NSP** that is not a **point of connection** to the **grid**, the **distributor** that gave notice to the **reconciliation manager** under clause 25 of Schedule 11.1 has approved—
    - (i) the **trader** temporarily **electrically connecting** the **point of connection**; or
    - (ii) the **trader** authorising the temporary **electrical connection** of the **point of**

**connection:**

- (a) for a **point of connection** that is an **ICP**, but which is not an **NSP**,—
- (i) either:
- (A) the **trader** is recorded in the **registry** as being responsible for the **ICP**; or
- (B) if the **ICP** has been **electrically disconnected**, the **trader**—
- (1) has an arrangement with a customer or **embedded generator** at the **ICP**; and
- (2) initiates a switch under one of clauses 2, 9, or 14 of Schedule 11.3 within 2 **business days** of the date of **electrical connection**; and
- (3) accepts responsibility to provide **submission information** under Part 15 or for the losing **trader's** direct costs for the **electricity** conveyed at the **ICP**, from the date of **electrical connection**; and
- (ii) if the **ICP** has metered load, 1 or more operational **certified metering installations** are connected at the **ICP** in accordance with this Part; and
- (iii) if the **ICP** has not previously been **electrically connected**, the owner of the **network** to which the **point of connection** is connected has given written approval to the temporary **electrical connection**.
- (b) *[Revoked]*
- (c) *[Revoked]*
- (2) A **trader** described in subclause (1) may authorise a **metering equipment provider**, with which the **trader** has an arrangement, to request the temporary **electrical connection** of a **point of connection** only for the purposes of—
- (a) **certifying a metering installation** at the **point of connection**; or
- (b) maintaining, repairing, testing, or **commissioning a metering installation** at the **point of connection**.
- (3) *[Revoked]*
- (4) *[Revoked]*

Clause 10.33: replaced, on 1 February 2021, by clause 13 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Heading: amended, on 5 October 2017, by clause 173(a) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 10.33: substituted, on 29 August 2013, by clause 22 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 10.33(1): amended, on 5 October 2017, by clause 173(b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 10.33(1)(aa) and (ab): inserted, on 1 November 2018, by clause 27(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 10.33(1)(a): replaced, on 1 November 2018, by clause 27(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 10.33(1)(b) and (c): revoked, on 1 November 2018, by clause 27(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 10.33(1)(c): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 10.33(1)(c): amended, on 1 February 2016, by clause 27 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 10.33(2): replaced, on 5 October 2017, by clause 173(c) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 10.33(2): amended, on 1 November 2018, by clause 27(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 10.33(3) and (4): revoked, on 5 October 2017, by clause 173(d) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 10.33A When trader may electrically connect point of connection

- (1) A trader may electrically connect a point of connection, or another participant authorised by a trader may electrically connect a point of connection, only if—
- (aa) for an NSP that is a point of connection to the grid, the grid owner has approved—
    - (i) the trader electrically connecting the point of connection to the grid that the grid owner owns or operates; or
    - (ii) the trader authorising the electrical connection of the point of connection to the grid that the grid owner owns or operates:
  - (ab) for an NSP that is not a point of connection to the grid, the distributor that gave notice to the reconciliation manager under clause 25 of Schedule 11.1 has approved—
    - (i) the trader electrically connecting the point of connection to the network that the distributor owns or operates; or
    - (ii) the trader authorising the electrical connection of the point of connection to the network that the distributor owns or operates:
  - (a) for a point of connection that is an ICP, but which is not an NSP,—
    - (i) either—
      - (A) the trader is recorded in the registry as being responsible for the ICP; or
      - (B) if the ICP has been electrically disconnected, the trader—
        - (1) has an arrangement with a customer or embedded generator at the ICP; and
        - (2) initiates a switch under clause 2, 9, or 14 of Schedule 11.3 within 2 business days of the date of electrical connection; and
        - (3) accepts responsibility to provide submission information in accordance with Part 15 or for the losing trader's direct costs for the electricity conveyed at the ICP from the date of electrical connection; and
    - (ii) if the ICP has metered load, 1 or more operational certified metering installations are connected at the ICP in accordance with this Part; and
    - (iii) if the ICP has not previously been electrically connected, the owner of the network to which the point of connection is connected has given written approval of the electrical connection:
  - (b) *[Revoked]*
  - (c) *[Revoked]*
  - (d) the point of connection supplies electricity to a load that is assigned to multiple ICPs as shared unmetered load and the distributor to whose network the point of connection is connected has advised all traders that are assigned the shared unmetered load of the trader's intention to electrically connect the point of connection.
- (2) Further to subclause (1), a trader described in subclause (1)(a)(i)—
- (a) may authorise the electrical connection of an ICP if—
    - (i) a metering installation is in place at the ICP; and

- (ii) the **metering installation** is operational but not **certified**; and
    - (iii) the **trader** arranges for the **certification** of the **metering installation** to be completed within 5 **business days** of the **ICP** being **electrically connected**;  
or
  - (b) may **electrically connect** an **ICP** if the **point of connection** is solely for **unmetered load**.
- (3) A **trader** must not **electrically connect** or authorise the **electrical connection** of a **point of connection** in any of the following circumstances—
- (a) a **distributor** has **electrically disconnected** the **point of connection** for safety reasons, and has not subsequently approved the **electrical connection** of the **point of connection**;
  - (b) **electrically connecting** the **point of connection** would breach the Electricity (Safety) Regulations 2010;
  - (c) a switch described in subclause (1)(a)(i)(B)(2) has been withdrawn or reversed.
- (4) No **participant** may **electrically connect** a **point of connection**, or authorise the **electrical connection** of a **point of connection**, other than—
- (a) a **trader** in the circumstances described in subclauses (1) to (3); or
  - (b) a **distributor** in the circumstances described in clause 10.31B.
- (5) Under subclause (1)(a)(i), if a **trader** or a person **authorised** by a **trader** **electrically connects** an **electrically disconnected point of connection** in error, or prior to the switch being withdrawn or reversed, the **trader** must—
- (a) **electrically disconnect** the **ICP**—
    - (i) using the same method of **electrical disconnection** as the losing **trader** used; or
    - (ii) by, if the method of **electrical connection** was bypass, removing the bypass; and
  - (b) reimburse the losing **trader** for any direct costs the losing **trader** incurred because of the **electrical connection** of the **point of connection**—
    - (i) in error; or
    - (ii) prior to the switch being withdrawn or reversed.

Clause 10.33A: replaced, on 1 February 2021, by clause 13 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 10.33A: inserted, on 5 October 2017, by clause 174 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 10.33A(1)(aa) and (ab): inserted, on 1 November 2018, by clause 28(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 10.33A(1)(a): replaced, on 1 November 2018, by clause 28(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 10.33A(1)(b) and (c): revoked, on 1 November 2018, by clause 28(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 10.33A(2): amended, on 1 November 2018, by clause 28(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 10.33A(4): replaced, on 1 November 2018, by clause 28(4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

### *Disconnecting and electrically disconnecting points of connection*

#### **10.33B Trader must not disconnect or electrically disconnect ICP for which it is not responsible**

Unless a **trader** is recorded in the **registry** as being responsible for an **ICP** or is meeting its obligation under clause 10.33A(5)(a) in respect of an **ICP**, the **trader** must

not—

- (a) **electrically disconnect** the ICP; or
- (b) **disconnect** the ICP; or
- (c) authorise a **metering equipment provider**—
  - (i) to **electrically disconnect** the ICP; or
  - (ii) to **disconnect** the ICP.

Cross Heading and Clause 10.33B: inserted, on 1 February 2021, by clause 14 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 10.33B(a): amended, on 1 March 2024, by clause 37 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

### 10.33C When trader may bridge meter at ICP

- (1) Subject to subclause (2), only a **trader** that is responsible for an ICP or a **metering equipment provider** authorised by the **trader** or a **distributor** authorised by the **trader**, in **electrically connecting** an ICP, may **electrically connect** the ICP in a way that bypasses the **meter** or **meters** that are in place to record the **electricity** flowing through the ICP (“bridge” a **meter**).
- (2) A **trader** may authorise a **metering equipment provider** or **distributor** under subclause (1)—
  - (a) generally for all or some of the ICPs that the **trader** is responsible for; or
  - (b) for a specific ICP that the **trader** is responsible for.
- (3) A **trader** that is responsible for an ICP, or a **metering equipment provider** authorised by the **trader** or a **distributor** authorised by the **trader**, may only bridge a **meter** at the ICP if—
  - (a) the **metering equipment provider** responsible for the **meter**, despite best endeavours,—
    - (i) is unable to remotely **electrically connect** the ICP so that **electricity** flows through the **meter**; or
    - (ii) cannot, because of safety issues, repair a fault with the **meter** that prevents **electricity** flowing through the **meter** at the ICP; and
  - (b) the **consumer** at the ICP will likely be without **electricity** for a period of time that will cause significant disadvantage to the **consumer**.
- (4) If a **meter** is bridged under subclause (1) by the **metering equipment provider** or **distributor**, the **metering equipment provider** or **distributor** (as the case may be) must, within 1 **business day**, advise the **trader** responsible for the ICP that the **meter** is bridged and include the date that bridging occurred in its advice.
- (5) If a **meter** is bridged under subclause (1), in all cases, the **trader** responsible for the ICP must—
  - (a) determine, in accordance with clause 2A of Schedule 15.2, the quantity of **electricity** conveyed through the ICP for the period of time the **meter** is bridged; and
  - (b) submit that estimated quantity of **electricity** to the **reconciliation manager** in accordance with clause 15.4; and
  - (c) within 1 **business day** of being advised that the **meter** is bridged, notify the **metering equipment provider** responsible for the bridged **meter** that it is

required to reinstate the **meter** so that all **electricity** flowing into the **ICP** flows through a certified **metering installation**.

- (6) The **metering equipment provider** receiving the notice under subclause (5)(c) must reinstate the **meter** so that all electricity flowing into the **ICP** flows through a certified **metering installation** within 5 **business days** of receiving the notice.”

Clause 10.33C: inserted, on 1 February 2021, by clause 14 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

#### *General metering installation requirements*

### **10.34 Installation and modification of metering installations**

- (1) This clause applies to a **metering equipment provider** that proposes to install or modify a **metering installation** at a **point of connection** other than a **point of connection** to the **grid**.
- (2) The **metering equipment provider** must consult with the **distributor** and the **trader** for the **point of connection** on the matters specified in subclause (2A), before—
- (a) finalising the design of a **metering installation** for the **point of connection**; or
  - (b) modifying the design of a **metering installation** installed at the **point of connection**; or
  - (c) finalising or modifying the design of a **metering installation** when replacing a **metering component** or **metering installation** with a new **metering component** or new **metering installation**, even if the new **metering component** or **metering installation** has the same or similar design and functionality as the existing **metering component** or **metering installation**.
- (2A) The **metering component's** or matters referred to in subclause (2) are the **metering installation's**—
- (a) required functionality; and
  - (b) terms of use; and
  - (c) required interface format; and
  - (d) integration of the ripple receiver and the **meter**; and
  - (e) functionality for controllable load.
- (2B) In addition to subclause (2), any consultation carried out under subclause (2), and any agreement that may be reached in that consultation, does not affect the application of clause 19 of Schedule 10.7.
- (2C) Despite subclause (2), the **metering equipment provider** does not need to consult with—
- (a) the **distributor** if the **metering equipment provider** has already consulted with the **distributor** on the design of—
    - (i) a **metering component** or **metering installation** that has the same or similar design and functionality as the replacement **metering component** or **metering installation**; or
    - (ii) the new **metering installation**; or
  - (b) the **trader** if the **metering equipment provider** has already consulted with the **trader** on the design of—
    - (i) a **metering component** or **metering installation** that has the same or similar design and functionality as the replacement **metering component** or

- metering installation; or**
- (ii) the new **metering installation**.
- (2D) To avoid doubt, subclause (2C) is intended to permit a **metering equipment provider** to re-use the design of a **metering component** or **metering installation** if—
- (a) the **metering equipment provider** has already consulted the **distributor** and **trader** in accordance with subclause (2); and
- (b) the **metering equipment provider** will re-use the design of the **metering component** or **metering installation**—
- (i) on the **distributor's network**; and
- (ii) at an **ICP** for which the **trader** is responsible.
- (3) Each **participant** involved in the consultation referred to in subclause (2) must—
- (a) use its best endeavours to reach agreement; and
- (b) act reasonably and in good faith.
- (4) If the **participants** referred to in subclause (2) cannot agree, within 20 **business days** of the **distributor** first being advised of the proposed new or modified **metering installation**, on the **metering installation's** requirements set out in subclause (2A)(a) to (e)—
- (a) an affected **participant** may refer the matter to the **Authority** under clause 10.50 by advising the **Authority**—
- (i) that agreement has not been reached; and
- (ii) of the identity of all affected **participants**; and
- (iii) the reasons (if and to the extent known) why agreement was not reached; and
- (b) the **Authority**—
- (i) may, at its discretion, determine the **metering installation** requirements; and
- (ii) must, if it determines the **metering installation** requirements,—
- (A) do so in accordance with clause 10.50(4); and
- (B) advise each affected **participant** of the determination it has made

Clause 10.34(1) and (2): substituted, on 1 February 2016, by clause 28(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 10.34(2): amended, on 1 May 2016, by clause 6 of the Electricity Industry Participation Code Amendment (Minor Code Amendments) 2016.

Clause 10.34(2)(b): amended, on 1 February 2021, by clause 15(1)(a) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 10.34(2)(c): inserted, on 1 February 2021, by clause 15(1)(b) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 10.34(2A): inserted, on 1 February 2016, by clause 28(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 10.34(2A): amended, on 1 February 2021, by clause 15(2) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 10.34(2B), (2C) and (2D): inserted, on 1 February 2021, by clause 15(3) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 10.34(4): amended, on 1 February 2016, by clause 28(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

### 10.35 Physical location of metering installations

- (1) A **reconciliation participant** responsible for ensuring there is a **category 1 metering installation** or **category 2 metering installation** must ensure that the **metering installation** is located as physically close to a **point of connection** as practical in the

circumstances.

- (2) A **reconciliation participant** responsible for ensuring there is a category 3 or higher **metering installation** must,—
  - (a) if practical in the circumstances, ensure that the **metering installation** is located at a **point of connection**; or
  - (b) if it is not practical in the circumstances to locate the **metering installation** at the **point of connection**, calculate the quantity of **electricity** conveyed through the **point of connection** using a **loss compensation** process approved by the **certifying ATH**.
- (3) If a calculation is carried out under subclause (2)(b), the certifying **ATH** must record in the **metering installation certification report**—
  - (a) the details of the calculation; and
  - (b) any assumption used; and
  - (c) any measurement used.
- (4) This clause does not apply to an existing **metering installation** that is in place on 29 August 2013.

Clause 10.35(3): amended, on 29 August 2013, by clause 23(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 10.35(4): amended, on 29 August 2013, by clause 23(2) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

### 10.36 Reconciliation participant to have arrangement with metering equipment provider

A **reconciliation participant** must, before accepting responsibility to be the **reconciliation participant** for a **point of connection**, enter into an arrangement with a **metering equipment provider**—

- (a) for the **reconciliation participant** to provide the **metering equipment provider** with physical access to the **metering installation** for the **point of connection** and the premises at which it is situated; and
- (b) arranging for the **electrical disconnection** of the **point of connection**, if required by the **metering equipment provider** to enable the **metering equipment provider** to comply with its obligations under this Part; and
- (c) for the **metering equipment provider** to provide the **reconciliation participant** with access at the **services access interface** to the **metering data** from the **metering installation** for the **point of connection**, in accordance with an authorisation from—
  - (i) in the case of an **ICP**, the **consumer**; or
  - (ii) in the case of an **NSP**, the **network** owner.

Clause 10.36(b): amended, on 5 October 2017, by clause 175 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### *Active and reactive energy metering*

### 10.37 Active and reactive measuring and recording requirements

- (1) A **metering equipment provider** must ensure that each **half-hour metering installation** that is a **category 3 metering installation**, or higher category of **metering installation**, certified after 29 August 2013, measures and separately records, in accordance with this Part,—

- (a) if the measuring and recording requirement is for consumption only—
    - (i) import **active energy**; and
    - (ii) import **reactive energy**; and
    - (iii) export **reactive energy**; or
  - (b) if the measuring and recording requirement is for consumption and generation, or generation only—
    - (i) import **active energy**; and
    - (ii) export **active energy**; and
    - (iii) import **reactive energy**; and
    - (iv) export **reactive energy**.
- (1A) A **metering equipment provider** must ensure that each **half-hour metering installation** that is a **category 2 metering installation, certified** after 29 August 2013, is capable of measuring and recording—
- (a) import **active energy**; and
  - (b) export **active energy**; and
  - (c) import **reactive energy**; and
  - (d) export **reactive energy**.
- (1B) A **metering equipment provider** must ensure that each **half-hour metering installation** that is a **category 2 metering installation, certified** after 29 August 2013, measures and separately records, in accordance with this Part,—
- (a) if the measuring and recording requirement is for consumption only, import **active energy**; or
  - (b) if the measuring and recording requirement is for consumption and generation, or generation only—
    - (i) import **active energy**; and
    - (ii) export **active energy**.
- (2) Despite subclauses (1)(a) and (1B)—
- (a) each **metering installation**, for a **point of connection** to the **grid, certified** after 29 August 2013, must measure and separately record—
    - (i) import **active energy**; and
    - (ii) export **active energy**; and
    - (iii) import **reactive energy**; and
    - (iv) export **reactive energy**; and
  - (b) the accuracy of each local service **metering installation** for **electricity** used in and by a **grid** substation must be within the applicable accuracy tolerances set out in Table 1 of Schedule 10.1.

Clause 10.37: amended, on 29 August 2013, by clause 24 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 10.37(1): amended, on 1 February 2016, by clause 29(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 10.37(1A) and (1B): inserted, on 1 February 2016, by clause 29(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 10.37(2): amended, on 1 February 2016, by clause 29(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

### *Certification of metering installations*

### 10.38 Certification of metering installations

A **metering equipment provider** must—

- (a) obtain and maintain **certification** in accordance with this Part—
  - (i) for each **metering installation** for which it is responsible; and
  - (ii) for each **metering component** in a **metering installation** for which it is responsible; and
- (b) ensure that any tests required for **certification** under paragraph (a) are conducted in accordance with this Code including the obligations under Schedule 10.7 or 10.8 (whichever is applicable) by an **ATH** contracted by the **metering equipment provider**.

*Metering infrastructure*

### 10.39 Responsibility for metering infrastructure integration

- (1) A **metering equipment provider** must ensure that—
  - (a) for each **metering installation** for which it is responsible, an appropriately designed **metering infrastructure** is in place; and
  - (b) in each **metering installation** for which it is responsible,—
    - (i) each **metering component** is compatible with, and will not cause any interference with the operation of, any other **metering component** in the **metering installation**; and
    - (ii) collectively, all **metering components** integrate to provide a functioning system; and
  - (c) each **metering installation** for which it is responsible is correctly and accurately integrated within the associated **metering infrastructure**.
- (2) Subclause (1) does not apply to an **electrically disconnected metering installation** for an **ICP**.

Clause 10.39(2): amended, on 5 October 2017, by clause 176 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

*Approved test houses and ATHs*

### 10.40 General requirements for approval as ATH

- (1) A person wishing to be approved as an **ATH**, or an **ATH** wishing to renew its approval, must apply to the **Authority**—
  - (a) at least 2 months before the intended effective date of the approval or renewal; and
  - (b) in writing; and
  - (c) in the **prescribed form**; and
  - (d) in accordance with Schedule 10.3.
- (2) A person making an application must satisfy the **Authority** (providing, where appropriate, suitable evidence) that the person—
  - (a) has the facilities and procedures to reliably meet, for the requested term of the approval, the minimum requirements of this Code for the class or classes of **ATH** for which it is seeking approval; and
  - (b) has had an **audit** under Part 16A; and

- (c) is a fit and proper person for approval.
- (3) Any **approved test house** operated solely by an **ATH** is, for all purposes of this Code and the **Act**, deemed to be approved in accordance with the procedures in the Code.
- Clause 10.40(2)(b): amended, on 1 June 2017, by clause 9 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Audits) 2016.

#### 10.41 Requirements applying to ATHs

An **ATH** must, when carrying out activities under this Part,—

- (a) only carry out activities for which it has been approved by the **Authority**; and
- (b) exercise a degree of skill, diligence, prudence, foresight, and economic management, taking into account the technological complexity of the **metering components** and **metering installations** being tested—
  - (i) determined by reference to good industry practice; and
  - (ii) that would reasonably be expected from a skilled and experienced **ATH** engaged in the management and operation of an **approved test house**; and
- (c) comply with all applicable safety, employment, environmental, and other enactments; and
- (d) exercise any discretion given to it under this Part by—
  - (i) taking into account the relevant circumstances of the particular instance; and
  - (ii) acting professionally; and
- (e) record the manner in which it carried out its activities and its reasons for carrying the activities out in that manner.

#### 10.42 ATH's functions and ongoing obligations

- (1) An **ATH** must comply with this Code including Schedules 10.4, 10.7, and 10.8.
- (2) An **ATH** must, if this Part requires an **ATH** to complete a function or activity before a **metering installation** is **certified**, complete the function or activity as part of the process undertaken to obtain **certification** for the **metering installation**.

*Metering installations that are inaccurate, defective, or not fit for purpose*

#### 10.43 Metering installations that are inaccurate, defective, or not fit for purpose to be investigated

- (1) For the purposes of this clause and clauses 10.44 to 10.48, a **metering installation** is—
  - (a) accurate, if it is within the applicable accuracy tolerances set out in Table 1 of Schedule 10.1;
  - (b) inaccurate, if it is outside the applicable accuracy tolerances set out in Table 1 of Schedule 10.1.
- (2) A **participant** must comply with this clause and clauses 10.44 to 10.48 if—
  - (a) in the case of a **metering equipment provider**, it is advised under subclause (3)(a); or
  - (b) it becomes aware of an event or circumstance that leads it to believe a **metering installation** is or could be—
    - (i) inaccurate; or
    - (ii) defective; or

- (iii) not fit for purpose.
- (3) A **participant** referred to in subclause (2)(b), other than the **metering equipment provider** responsible for the **metering installation**, must—
  - (a) advise the **metering equipment provider** responsible for the **metering installation** that it has become aware of an event or circumstance that leads it to believe the **metering installation** is or could be—
    - (i) inaccurate; or
    - (ii) defective; or
    - (iii) not fit for purpose; and
  - (b) include, with the advice (if and to the extent they are known), all relevant details.
- (4) A **metering equipment provider** must, if it is advised under subclause (3)(a), or becomes aware as referred to in subclause (2)(b), within the period set out in subclause (5),—
  - (a) investigate—
    - (i) if it is advised under subclause (3)(a), the event or circumstance that it is advised of; or
    - (ii) if it becomes aware as referred to in subclause (2)(b), the event or circumstance that leads it to believe the **metering installation** is or could be—
      - (A) inaccurate; or
      - (B) defective; or
      - (C) not fit for purpose; and
  - (b) complete, or arrange the completion of, a report that contains details of the **metering equipment provider's** investigation, its conclusion, and the reasons for its conclusion; and
  - (c) provide the report to all affected **participants**.
- (5) The time period for the purposes of subclause (4) is as soon as reasonably practicable, but no later than—
  - (a) 20 **business days** after becoming aware of the event or circumstance, for a **category 1 metering installation**;
  - (b) 10 **business days** after becoming aware of the event or circumstance, for a **category 2 metering installation**;
  - (c) 5 **business days** after becoming aware of the event or circumstance, for a category 3 or higher **metering installation**.

#### **10.44 Metering installations that are inaccurate, defective, or not fit for purpose to be tested**

- (1) A **metering equipment provider** must, if a report provided under clause 10.43(4)(c) demonstrates that a **metering installation** for which it is responsible is inaccurate, defective, or not fit for purpose—
  - (a) arrange testing of the **metering installation** by an **ATH**; and
  - (b) arrange the provision of a statement of situation referred to in clause 10.46 by the **ATH**.
- (2) If the report demonstrates that a **metering installation** is accurate, not defective, and fit

- for purpose, a **participant** who believes that the **metering installation** is inaccurate, defective, or not fit for purpose, may require testing of the **metering installation** by—
- (a) advising the **metering equipment provider** responsible for the **metering installation**, within 5 **business days** of receiving the report, of—
    - (i) its reasons for requiring testing; and
    - (ii) the scope of the testing required; and
  - (b) using its best endeavours to agree with the **metering equipment provider** on an **ATH** who will test the **metering installation** and provide a statement of situation under subclause (1).
- (3) A **metering equipment provider** who has been advised under subclause (2)(a) that a **participant** believes that a **metering installation**, for which the **metering equipment provider** is responsible, requires testing, must arrange for an **ATH**—
- (a) to test the **metering installation**; and
  - (b) to provide the **metering equipment provider** with a statement of situation under subclause (1)(b) within 5 **business days** of—
    - (i) becoming aware that a **metering installation** for which it is responsible may be inaccurate, defective, or not fit for purpose under subclause (1); or
    - (ii) reaching an agreement with the **participant** under subclause (2)(b).
- (4) If the **metering equipment provider** and the **participant** requesting the test under subclause (2) cannot, within 5 **business days** of the **metering equipment provider** being advised under subclause (2)(a), agree on an **ATH**, either **participant** may advise the **Authority**, including the reasons, if and to the extent known, why agreement was not reached.
- (5) The **Authority** must, within 5 **business days** of being advised under subclause (4), advise the **metering equipment provider** of the **ATH** that it must instruct to carry out the testing and to provide a statement of situation under subclause (1)(b).
- (6) The **metering equipment provider** must instruct the **ATH** referred to in subclause (5) within 5 **business days** of being advised by the **Authority**.
- (7) The **metering equipment provider** must ensure that the **ATH**, as soon as practicable after being contracted under subclause (1) or subclause (5), carries out the required testing and delivers the statement of situation to the **metering equipment provider**.
- (8) Despite anything else in this Code, a **participant** is in breach of this Code from when the tests carried out by an **ATH** under this clause demonstrate that a **metering installation** is—
- (a) inaccurate; or
  - (b) defective; or
  - (c) not fit for purpose.

Clause 10.44(4), (5) and (6): amended, on 5 October 2017, by clause 177 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### 10.45 Investigation and testing costs

The **ATH**'s costs incurred by the **metering equipment provider** under clause 10.44 must be borne by—

- (a) the **metering equipment provider**, if the investigation or test demonstrates that the **metering installation** is—

- (i) defective; or
  - (ii) inaccurate; or
  - (iii) not fit for purpose; or
- (b) the **participant** who required that the **metering installation** be investigated or tested, if the investigation or test demonstrates that the **metering installation** is—
- (i) not defective; and
  - (ii) accurate; and
  - (iii) fit for purpose.

#### 10.46 Statement of situation

- (1) A statement of situation provided by an **ATH** under clause 10.44(1)(b) must include—
- (a) details of the tests carried out; and
  - (b) results of the tests carried out; and
  - (c) full details of what was found; and
  - (d) conclusions of whether the **metering installation** is—
    - (i) accurate;
    - (ii) defective;
    - (iii) fit for purpose; and
  - (e) the reasons for the conclusions in paragraph (d); and
  - (f) an assessment of the risk to the completeness and accuracy of the **raw meter data**; and
  - (g) the details of any remedial action proposed or undertaken; and
  - (h) any correction factors to apply to **raw meter data** to ensure that the **volume information** is accurate; and
  - (i) the period over which the correction factor must be applied to the **raw meter data**.
- (2) A **metering equipment provider** must, within 3 **business days** of receiving the statement of situation, provide copies of it—
- (a) to the relevant affected **participants** for all **metering installations**; and
  - (b) to the **Authority**—
    - (i) for all category 3 and above **metering installations**; and
    - (ii) if requested by the **Authority**, for each **category 1 metering installation** and each **category 2 metering installation**.

Clause 10.46(2): substituted, on 15 May 2014, by clause 13 of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

Clause 10.46(2) (b): amended, on 5 October 2017, by clause 178 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### 10.46A Timeframe for correcting defects and inaccuracies in metering installation

- (1) This clause applies to a **metering equipment provider** that becomes aware, or is advised under clause 10.43, that a **metering installation** for which it is responsible, is—
- (a) inaccurate; or
  - (b) defective; or
  - (c) not fit for purpose.

- (2) A **metering equipment provider** to which this clause applies—
- (a) must undertake remedial action to make the **metering installation**—
    - (i) accurate; and
    - (ii) not defective; and
    - (iii) fit for purpose; and
  - (b) must use its best endeavours to complete the remedial action under paragraph (a) no later than 10 **business days** after the date on which it is required to provide a report to all affected **participants** under clause 10.43(4)(c).”

Clause 10.46(A): inserted, on 1 February 2021, by clause 16 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

#### **10.47 ATH to keep records of modifications to correct defects and inaccuracies in metering installation**

An **ATH** must, when taking action to remedy an inaccuracy or defect within a **metering installation**, ensure that records of any modifications that are carried out to the **metering installation** are kept for each **metering component** of the **metering installation** in the **metering records** and in a manner reasonable in the circumstances to ensure that further investigation can be carried out.

Clause 10.47 Heading: amended, on 1 February 2021, by clause 17 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

#### **10.48 Correction of defects and inaccuracies in raw meter data**

- (1) A **participant** may, within 40 **business days** of receiving a statement of situation under clause 10.46(2), advise the **metering equipment provider** of any questions, or requests for clarification, it has in relation to the corrections needed to the **raw meter data** from the **metering installation**.
- (2) A **metering equipment provider** must, within 10 **business days** of being advised under subclause (1), respond in detail to the questions or requests for clarification.
- (3) A **metering equipment provider** must, within 10 **business days** of being advised under subclause (1), advise the **reconciliation participant** responsible for providing **submission information** for the **point of connection**, of the correction factors referred to in clause 10.46(1)(h) and the period referred to clause 10.46(1)(i).
- (4) The **reconciliation participant** must apply the correction factors advised under subclause (3), for the period advised under subclause (3), to the **raw meter data** to obtain more accurate information as required under clause 15.12.

*NSP table*

#### **10.49 NSP table**

- (1) The **Authority** must **publish** an **NSP table**.
- (2) The **reconciliation manager** must advise the **Authority** of any change to the information contained in the **NSP table** within 1 **business day** of becoming aware of such change.
- (3) The **Authority** must update the **NSP table** within 2 **business days** of being advised by the **reconciliation manager** under subclause (2).

Clause 10.49(1): replaced, on 5 October 2017, by clause 179(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 10.49(2) and (3): amended, on 5 October 2017, by clause 179(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### *Dispute resolution*

#### **10.50 Dispute resolution**

- (1) A **participant** must, in good faith, use its best endeavours to resolve any dispute with any other person about a matter dealt with in this Part.
- (2) A **participant** may refer any dispute or failure to reach agreement within the required timeframe in this Part to the **Authority** for determination.
- (3) If a complaint is not resolved under subclause (1), or by determination of the **Authority** under subclause (2), the **Authority** or a **participant** may refer the complaint to the **Rulings Panel** in accordance with subpart 4 of Part 2 of the **Act** and the regulations.
- (4) When determining a dispute, or failure to reach agreement, under subclause (2), the **Authority** must do so in a way that—
  - (a) is consultative with the parties involved; and
  - (b) encourages the parties, where possible, to work together on matters that are agreed; and
  - (c) takes into account the costs to be borne by, and the benefits that would accrue to, the **participants** involved; and
  - (d) maximises the use of informal means to resolve the dispute or conclude an agreement.
- (5) The existence of a dispute or failure to reach agreement does not excuse a **participant** from complying with this Code.
- (6) A **participant's** obligations in this clause are subject to the **Act** and the regulations.

Clause 10.50(3): amended, on 20 December 2021, by clause 28(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 10.50(6): amended, on 20 December 2021, by clause 28(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

### *Transitional provisions*

#### **10.51 Transitional provisions**

- (1) In this clause—
  - (a) Part 10 means Part 10 of the Code that was effective prior to 29 August 2013; and
  - (b) reference to a COP means a **code of practice** under Part 10.
- (2) The intent of this clause is—
  - (a) as far as practicable, to preserve the effect of Part 10, prior to 29 August 2013; and
  - (b) to clarify that a breach of Part 10 will subsist as a breach of the Code, despite the coming into force of this Part; and
  - (c) to clarify that disputes and complaints about breaches under Part 10 must be resolved under this Part, and to provide the procedure to ensure that will happen; and
  - (d) to clarify that certain exemptions, authorisations, and **code of practice** 10.5 variations under Part 10 will remain in force in accordance with their terms, as if they had been made under this Part; and

- (e) to clarify the effect of certain contractual arrangements after this Part comes into force; and
  - (f) to clarify the effect of a **participant** being in compliance with certain of the provisions in Part 10, after this Part comes into force.
- (3) A **certification**, as at 28 August 2013, of—
- (a) a **metering installation**—
    - (i) as a **category 1 metering installation** that had interim **certification** under Part 10, continues under this Part until 1 April 2015; and
    - (ii) as a category 6 **metering installation**, continues as a category 5 **metering installation** and otherwise in accordance with the terms of the **certification**; and
    - (iii) as any other category, continues under this Part in accordance with the terms of the **certification**; and
  - (b) a **metering component** continues under this Part in accordance with the terms of the **certification**.
- (4) An **audit** that was carried out under the Code by an **auditor**, that was completed, immediately prior to 29 August 2013, continues to have the effect and status of an **audit** under this Part.
- (5) The following persons **certified** and approved by the Electricity Commission or the **Authority**, under the Code, immediately prior to 29 August 2013, remain, for all purposes of this Part, **certified** and approved by the **Authority**, in accordance with the terms and scope of the relevant **certification** and approval as if such **certification** and approval had been issued under this Part:
- (a) an **auditor**; and
  - (b) an **approved test house**, which will be approved as an **ATH** under this Part.
- (6) The following continue in effect despite anything else in, or the coming into force of, this Part, to the extent that they relate to or concern the same, or similar, obligations under this Part, and will apply to a **participant's** obligations under or compliance with, the relevant obligation under this Part:
- (a) an approval for an alternative quality management system previously issued under clauses 4(4) and 6(12) of COP 10.2:
  - (b) an approval for an alternative standard previously issued under clause 3(4) of COP 10.2 and clause 2 of COP 10.2 and 10.3:
  - (c) a variation under clause 3(15) or 4(7) to 4(9) of COP 10.3:
  - (d) a temporary **certification** under clause 9(17) of COP 10.3:
  - (e) an alternative standard that an **approved test house** has used in the **certification** of a **metering installation** under clause 2 of COP 10.3 and clause 2 of COP 10.4:
  - (f) a variation approved by the market administrator under COP 10.5:
  - (g) a statistical sampling process under clause 5(18) of COP 10.3:
  - (h) an exemption under section 11 of the **Act**.
- (7) An **ATH** must, if it has **certified a metering installation** using an alternative standard referred to in subclause (6)(e), in accordance with Part 10, advise the **Authority** of that alternative standard within 3 **business days** of 29 August 2013.
- (8) The following continue in effect, despite anything else in, or the coming into force of,

- this Part, to the extent that they relate to or concern the same, or similar, obligations under this Part, and apply to a **participant's** obligations under or compliance with, the relevant obligation under this Part:
- (a) **calibration** intervals referred to in clause 6(1) of COP 10.2; and
  - (b) the maximum intervals between inspections referred to in clause 9(2) of COP 10.3, provided that if the date by which the next inspection would, under this Part, be later, then such later date will apply.
- (9) Despite anything else in, or the coming into force of, this Part—
- (a) clause 10.4 and clauses 10.12 to 10.15 of Part 10 continue to apply insofar as they relate to all **raw meter data interrogated** and processed under Part 10, on which **submission information** is based that is still subject to the reconciliation process under Part 15, until the reconciliation process for the **submission information** has been concluded in accordance with Part 15; and
  - (b) clauses 10.7(b) and (c) of Part 10 continue to apply in relation to all **raw meter data** recorded before 29 August 2013; and
  - (c) an **approved test house's** obligations under clauses 5(16) and 5(17) of COP 10.2 and clause 4(12) of COP 10.3 will continue in accordance with their terms in relation to all records created before 29 August 2013.
- (10) If a **participant** is a party to an arrangement, assignment, or contract (including an agency agreement) previously entered into under clauses 10.2, 10.3, or 10.6 of Part 10 in relation to a **participant's** responsibilities under Part 10 and a provision in that arrangement, assignment, or contract is inconsistent with this Part, the provision ceases to be effective from 29 August 2013, but this is without prejudice to any existing disputes under such arrangements, assignments, or contracts, that must be resolved between the relevant persons concerned in accordance with the arrangement, assignment, or contract as if it remained effective.
- (11) Despite anything else in, or the coming into force of, this Part—
- (a) any dispute concerning a **metering installation, metering data, raw meter data,** and all related matters that were in existence immediately before 29 August 2013,—
    - (i) remain in existence; and
    - (ii) may be resolved under clause 10.50; and
  - (b) any breaches or alleged breaches of Part 10, and investigations of rule breaches or alleged rule breaches under Part 10, are unaffected and must be concluded as if the relevant provisions alleged to have been breached, under Part 10, and the relevant Part 10 definitions remain in force; and
  - (c) any rule breaches or alleged rule breaches described in paragraph (b) will be dealt with by the **Authority** and the **Rulings Panel** under clause 10.50 and the **Act**.
- (12) Despite anything else in, or the coming into force of, this Part, subclause (13) applies to a **participant** who was immediately prior to 29 August 2013 responsible under Part 10 for—
- (a) measuring the quantity of **electricity** at any **metering installation**; or
  - (b) estimating the quantity of **unmetered load**.
- (13) A **participant** described in subclause (12), who is responsible for **volume information**

which has not, at 29 August 2013, been submitted to the **reconciliation manager** in accordance with Part 15 must complete the submission of the **volume information** to the **reconciliation manager** in accordance with Part 10, as if that Part remained effective.

- (14) Despite anything else in, or the coming into force of, this Part, a **participant** who is responsible for a **metering installation** under Part 10, immediately prior to 29 August 2013 must remain in compliance with—
- (a) clauses 10.7(b) and 10.7(c) of Part 10, in respect of **raw meter data** kept before 29 August 2013, and does not breach any of the corresponding obligations in this Part, provided that the **participant** keeps the **raw meter data** in compliance with clauses 10.7(b) and 10.7(c) of Part 10; and
  - (b) clause 10 of COP 10.3, in respect of records kept before 29 August 2013, and does not breach any of the corresponding obligations in this Part, provided that the **participant** keeps the records in compliance with rule 10 of COP 10.3.
- (15) The following procedures commenced before, but not completed by, 29 August 2013 are not valid unless they are completed in compliance with this Part:
- (a) **metering installation** tests; and
  - (b) **audits** of an **approved test house** under Part 10 (which must be completed as an **audit** of an **ATH** under this Part).
- (16) The obligations of a **metering equipment provider** expressed in this Part as applying in relation to arranging **certification** of a **metering installation** or a **metering component** after 29 August 2013 do not apply to—
- (a) a **metering installation** referred to in subclause (3)(a):
  - (b) a **metering component** referred to in subclause 3(b).

Clause 10.51: amended, on 29 August 2013, by clause 25 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 10.51(6)(f): amended, on 5 October 2017, by clause 180 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**Schedule 10.1  
Tables**

cls 10.37 and 10.43

**Table 1: Metering installation characteristics and associated requirements**

Defining Characteristics				Associated Requirements of active energy metering							
Metering installation category	Primary voltage (V)	Primary current (I)	Measuring transformers	Metering installation certification type	Maximum meter class for installation category	Accuracy tolerances		Selected component metering installation minimum IEC class (more accurate components may be used)		Metering installation certification and inspection	
						Maximum permitted error	Maximum site uncertainty	Meter	Current Transformer	Maximum metering installation certification validity period	Maximum inspection period
1	V < 1kV	I ≤ 160A	None	NHH or HHR	Class 2.0	± 2.5%	0.6%	2	N/A	180 months	126 months
2	V < 1kV	I ≤ 500A	CT and where applicable, VT	NHH or HHR	Class 2.0	± 2.5%	0.6%	2	1	120 months	126 months
3	V < 1kV	500A < I ≤ 1200A	CT	HHR only	Class 1.0	± 1.25%	0.3%	1	0.5	120 months	63 months
	V < 1kV	500A < I ≤ 1200A	VT & CT		Class 0.5			N/A	N/A		
	1kV ≤ V ≤ 11kV	I ≤ 100A			N/A			N/A			
	11kV < V ≤ 22kV	I ≤ 50A			N/A			N/A			
4	V < 1kV	I > 1200A	CT	HHR only	Class 0.5	± 1.25%	0.3%	N/A	N/A	60 months	33 months
	V < 1kV	I > 1200A	VT & CT								
	1kV ≤ V ≤ 6.6kV	100A < I ≤ 400A									
	6.6kV < V ≤ 11kV	100A < I ≤ 200A									
	11kV < V ≤	50A < I ≤									

**Electricity Industry Participation Code 2010  
Schedule 10.1**

	22kV	100A									
5	$1kV \leq V \leq 6.6kV$	$I > 400A$	VT & CT	HHR only	Class 0.2	$\pm 0.75\%$	0.2%	N/A	N/A	36 months	19 months
	$6.6kV < V \leq 11kV$	$I > 200A$									
	$V > 11kV$	$I > 100A$									
	$V > 22kV$	Any current									

Schedule 10.1, Table 1: replaced, on 1 February 2021, by clause 18 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Electricity metering equipment (AC) – Tariff and load control – Part 11: Particular requirements for electronic ripple control receivers	IEC 62054-11
Electricity metering equipment (AC) – Tariff and load control – Part 21: Particular requirements for time switches	IEC 62054-21

Table 5: row 1 amended, on 15 May 2014, by clause 15 of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

**Table 6: Standards of accuracy and overall uncertainty for active and reactive meter calibration and testing**

Value of Current %	Power Factor	Maximum Overall Uncertainty %	Percentage Error Limits of Meter, Including Uncertainty
<b>Class of meter 2.0 and 2.0S</b>			
5 to 120	1	±0.4	±1.9
10 to 120	0.5 lagging	±0.6	±1.9
10 to 120	0.8 leading	±0.6	±1.9
<b>Class of meter 1.0 and 1.0S</b>			
5 to 120	1	±0.2	±0.9
10 to 120	0.5 lagging	±0.25	±0.9
10 to 120	0.8 leading	±0.25	±0.9
<b>Class of meter 0.5 and 0.5S</b>			
5 to 120	1	±0.1	±0.5
10 to 120	0.5 lagging	±0.12	±0.6
10 to 120	0.8 leading	±0.12	±0.6
<b>Class of meter 0.2S</b>			
5 to 120	1	±0.06	±0.2
10 to 120	0.5 lagging	±0.09	±0.3
10 to 120	0.8 leading	±0.09	±0.3
<b>Class of meter 3.0 reactive</b>			
20 to 120	Zero	±1.0	±3.0
20 to 120	0.8 leading	±1.5	±3.5
20 to 120	0.8 lagging	±1.5	±3.5
<b>Class of meter 2.0 reactive</b>			
20 to 120	Zero	±0.5	±2.0
20 to 120	0.8 leading	±1.0	±2.5
20 to 120	0.8 lagging	±1.0	±2.5

**Table 7: Voltage, current, and phase displacement parameters for polyphase meters**

Polyphase meters	Class of meter			
	0.2 and 0.5	1.0	2.0	3.0
Each of the voltages between line and neutral or between any 2 <b>lines</b> will not differ from the average corresponding voltage by more than:	±0.1%	±1.0%	±1.0%	±1.0%
Each of the currents in the conductors will not differ from the average current by more than:	±1.0%	±2.0%	±2.0%	±2.0%
The phase displacements of each of these currents from the corresponding line-to-neutral voltage, irrespective of the power factor, will not differ from each other by more than:	2°	2°	2°	2°

Schedule 10.1, Table 7: amended, on 1 February 2016, by clause 30 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

**Table 8: Required minimum sample size for category 1 metering installation inspections required under clause 45(2)(c) of Schedule 10.7**

<b>Number of metering installations identified</b>	<b>Minimum sample size</b>
1	1
2-8	2
9-15	3
16-25	5
26-50	8
51-90	13
91-150	20
151-280	32
281-500	50
501-1200	80
1201-3200	125
3201-10,000	200
10,001-35,000	315
35,001-150,000	500
150,001+	800

## Schedule 10.3

cl 10.40

### ATHs – approval, expiry, cancellation, and renewal of approval

#### 1 Applications for approval and renewal of approval

- (1) A person wishing to be approved as an **ATH**, or an **ATH** wishing to renew its approval, must apply, in the **prescribed form**, to the **Authority** at least 2 months before the intended effective date of the approval or renewal.
- (2) An applicant must—
  - (a) include in its application—
    - (i) the final **audit** report obtained under Part 16A, together with its responses to the report; and
    - (ii) a copy of any quality management certificates it holds; and
    - (iii) a copy of its most recent quality management audit report; and
    - (iv) the class of **ATH** for which it is seeking approval; and
    - (v) the functions under clauses 3(2) and 4(2) for which it is seeking approval; and
    - (vi) the **calibration** expiry date of each of its **working standards** and **reference standards**; and
  - (b) provide promptly any other information or documentation the **Authority** may reasonably request.
- (3) The **Authority** must, within 2 months of receiving an application, advise the applicant of—
  - (a) the approval of the application, if the applicant satisfies the **Authority** that it has met the requirements set out in clause 10.40; or
  - (b) the declination of the application, providing reasons, if the **Authority** considers that—
    - (i) the information supplied by the applicant is incomplete or unsatisfactory; or
    - (ii) the applicant otherwise fails to demonstrate that it would be, and would remain for the period and functions for which the application is made, compliant with the requirements set out in clause 10.40.
- (4) If an application is approved, the **Authority** must issue a certificate of approval specifying the—
  - (a) period of the term of approval, which must not exceed 12 months from the date of approval; and
  - (b) functions that the applicant has been approved to carry out; and
  - (c) *[Revoked]*
  - (d) date of approval.

Clause 1(2)(a)(i): amended, on 1 June 2017, by clause 11(1) of the Electricity Industry Participation Code Amendment (Requirements and Processes for Audits) 2016.

Clause 1(4)(a): amended, on 5 October 2017, by clause 181 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1(4)(c): revoked, on 1 June 2017, by clause 11(2) of the Electricity Industry Participation Code Amendment (Requirements and Processes for Audits) 2016.

**2** *[Revoked]*

Clause 2: revoked, on 1 June 2017, by clause 12 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Audits) 2016.

**3 Approval of class A ATHs**

- (1) An applicant applying for approval, or renewal of approval, as a **class A ATH** must, as part of its application, confirm that—
- (a) it holds and complies with AS/NZS ISO 17025 accreditation, for at least the requested term of the approval; and
  - (b) the scope of its AS/NZS ISO 17025 accreditation covers the activities that it undertakes, or proposes to undertake; and
  - (c) it complies, and will be likely to continue to comply during the requested term of the approval, with any requirements of its ISO accreditation; and
  - (d) if it proposes to carry out field work—
    - (i) it is certified to the relevant AS/NZS ISO 9001:2008 or AS/NZS ISO 9001:2016 and will remain certified during the requested term of the approval; and
    - (ii) the scope of its AS/NZS ISO 17025 accreditation has been extended to cover the carrying out of the field work.
- (2) The **Authority** may approve an applicant to be, or renew an applicant's approval as, a **class A ATH** to carry out 1 or more of the following functions:
- (a) **calibration** of—
    - (i) **working standards**;
    - (ii) **metering components** (other than a **calibration** referred to in paragraph (c));
    - (iii) **metering installations**;
  - (b) issuing **calibration reports**;
  - (c) **calibration** of **metering components** onsite;
  - (d) installation and modification of **metering installations**;
  - (e) installation and modification of **metering components**;
  - (f) **certification** of all categories of **metering installations** under this Code, and issuing of **certification reports**;
  - (g) testing of **metering installations** under clause 10.44 and production of statements of situation under clause 10.46;
  - (h) inspection of **metering installations**.
- (3) A **class A ATH** may only carry out 1 or more of the functions listed in subclause (2), subject to—
- (a) the current scope of its approval under subclause (2); and
  - (b) any limitations that may be specified in the **class A ATH's** AS/NZS ISO 17025 accreditation or the relevant AS/NZS ISO 9001:2008 or AS/NZS ISO 9001:2016 certification.
- (4) The **Authority** may decline an application for approval as a **class A ATH** even if the applicant—
- (a) has obtained the necessary ISO accreditation or certification; or

(b) has obtained or satisfied any other pre-requisite to approval.

Clause 3(1)(b): amended, on 29 August 2013, by clause 26 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 3(1)(d)(i) and 3(3)(b) amended, on 1 June 2017, by clause 13 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Audits) 2016.

#### 4 Approval of class B ATHs

- (1) An applicant applying for approval, or renewal of approval, as a **class B ATH** must, as part of its application to the **Authority**, confirm that—
- (a) it holds and complies with AS/NZS ISO 9001:2016 certification for at least the term of the requested approval; and
  - (b) the scope of its AS/NZS ISO 9001:2016 certification covers the activities that it undertakes, or proposes to undertake; and
  - (c) it will develop and at all times during the term of the requested approval maintain a conflict of interest policy in compliance with AS/NZS ISO 17025.
- (1A) Despite subclause (1), an applicant may apply to the **Authority** for approval as a **class B ATH** without confirming that it holds and complies with AS/NZS ISO 9001:2016 certification for at least the term of the requested approval, provided the applicant confirms as part of its application that—
- (a) it holds and complies with AS/NZS ISO 9001:2016 certification at the time of the application and that certification expires during the approval period; and
  - (b) it has in place appropriate plans to ensure that it renews its AS/NZS ISO 9001:2016 certification for the term of the requested approval, so that its AS/NZS ISO 9001:2016 certification remains in place continuously throughout the approval period.
- (2) The **Authority** may approve an applicant to be, or renew an applicant's approval as, a **class B ATH** to carry out 1 or more of the following functions:
- (a) **calibration** of class 0.5 **meters**, class 1 **meters** and class 2 **meters**, and class 0.5 current transformers and class 1.0 current transformers, provided that the **calibrations** are carried out under their approved quality certification and in accordance with this Part, and included within the **ATH audit** for approval:
  - (b) installation and modification of **metering installations**:
  - (c) installation and modification of **metering components**:
  - (d) **calibration** of **metering components** onsite:
  - (e) **certification**, using the **selected component certification** method, of—
    - (i) **category 1 metering installations**:
    - (ii) **category 2 metering installations**:
    - (iii) category 3 **metering installations** with a primary voltage of less than 1kV:
  - (f) **certification**, using the **fully calibrated certification** method, of—
    - (i) **category 1 metering installations**:
    - (ii) **category 2 metering installations**:
    - (iii) category 3 **metering installations** with a primary voltage of less than 1kV:
  - (g) **certification**, using the **comparative recertification** method, of **category 2 metering installations**:
  - (h) issuing of **certification reports** in respect of **certifications** of **metering**

- installations** under paragraphs (e) to (g):
- (i) inspection of—
    - (i) **category 1 metering installations:**
    - (ii) **category 2 metering installations:**
    - (iii) **category 3 metering installations** with a primary voltage of less than 1kV.
  - (3) A **class B ATH** may only carry out 1 or more of the functions listed in subclause (2), subject to—
    - (a) the current scope of its approval under subclause (2); and
    - (b) any limitations that may be specified in the relevant AS/NZS ISO 9001:2008 or AS/NZS ISO 9001:2016 certification.
  - (4) The **Authority** may decline an application for approval as a **class B ATH** even if the applicant—
    - (a) has obtained the necessary ISO certification; or
    - (b) has obtained or satisfied any other pre-requisite to approval.
- Clause 4(1)(a) and (b) amended, on 1 June 2017, by clause 14 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Audits) 2016.  
Clause 4(1)(b): amended, on 29 August 2013, by clause 27 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).  
Clause 4(1)(a), (b) and (c): amended, on 1 February 2021, by clause 21(1)(a) and (b) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.  
Clause 4(1A): inserted, on 1 February 2021, by clause 21(2) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.  
Clause 4(3)(b) amended, on 1 June 2017, by clause 14 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Audits) 2016.

#### **4A Incorporation of AS/NZS ISO 9001:2008 and AS/NZS ISO 9001:2016 by reference**

- (1) The New Zealand Standards AS/NZS ISO 9001:2008 and AS/NZS ISO 9001:2016 are incorporated by reference in this Code.
  - (2) *[Revoked]*
  - (3) *[Revoked]*
- Clause 4A inserted, on 1 June 2017, by clause 15 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Audits) 2016.  
Clause 4A(1): amended, on 1 August 2023, by clause 40(1) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.  
Clauses 4A(2) and 4A(3): revoked, on 1 August 2023, by clause 40(2) and 40(3) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

#### **5 Expiry and cancellation of approval**

- (1) If the **Authority** believes that an **ATH** is or was in breach of this Part the **Authority** may cancel the approval of the **ATH** with immediate effect by advising the **ATH**.
- (2) An **ATH** must not, at any time after the expiry or cancellation of its approval, display or use its certificate of approval.

#### **6 Changes that affect approval**

- (1) If an **ATH** intends to make a material change to any of its facilities, processes, or procedures, or the scope of the **ATH's** ISO accreditation is reduced during the term of its approval, the **ATH** must, at least 5 **business days** before the change is to take place or reduction in scope is effected,—
  - (a) advise the **Authority** of all relevant details of the change or reduction in scope;

and

- (b) in the case of a material change, submit to the **Authority** an **audit** report confirming that, after the change has come into effect, the **ATH** will continue to meet the requirements under clause 10.40(2)(a).
- (2) An **ATH's** approval is automatically cancelled from the date of the change or reduction in scope under subclause (1), if the **ATH** fails to advise the **Authority** under subclause (1)(a).
- (3) The **Authority** may, if it is advised by an **ATH** under subclause (1), either—
  - (a) cancel an **ATH's** approval from the date that the **Authority** advises the **ATH** that the **Authority** is not satisfied that the **ATH** will continue to meet the requirements under clause 10.40(2)(a) after the change or reduction in scope has come into effect; or
  - (b) revise the scope of the **ATH's** approval.

#### **7 Notice of cancellation, expiry, or revision of scope of ATH approval**

- (1) The **Authority** must give written notice to all **metering equipment providers** if—
  - (a) an **ATH's** approval expires and the **Authority** does not renew it;
  - (b) the **Authority** cancels an **ATH's** approval under clause 5;
  - (c) an **ATH's** approval is cancelled under clause 6(2) or 6(3)(a);
  - (d) the scope of an **ATH's** approval has been revised under clause 6(3)(b).
- (2) The **Authority** must include with the notice under subclause (1) the date on which the approval expired or was cancelled, or the scope of the approval was revised.
- (3) A **metering equipment provider** given notice under subclause (1) must treat all **metering installations certified** by the **ATH** during the period during which it was not validly approved, or was performing activities outside its scope of approval, as being defective from the date of which the **Authority** gave notice under subclause (2) and follow the procedures set out in clauses 10.43 to 10.48.
- (4) Despite subclause (3), the **Authority** may give a **metering equipment provider** written notice that the **metering equipment provider** must treat a **metering installation certified** by the **ATH** as being defective and follow the procedures set out in clauses 10.43 to 10.48.

Clause 7 Heading: amended, on 1 November 2018, by clause 29 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 7: amended, on 5 October 2017, by clause 182 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### **8 Register of ATHs**

- (1) The **Authority** must, keep, maintain, and **publish** a register of approved **ATHs**.
- (2) The **Authority** must remove an **ATH's** details from the register if the **ATH's** approval—
  - (a) expires and the **Authority** does not renew it; or
  - (b) is cancelled.

## Schedule 10.4 ATH ongoing functions and obligations

cl 10.42

### 1 Accommodation and environment

An **ATH** must, for each **approved test house** that it operates,—

- (a) maintain a list of personnel who are authorised to access and use its laboratory and storage facilities; and
- (b) restrict access to its laboratory and storage facilities to—
  - (i) the personnel specified under paragraph (a); and
  - (ii) the **Authority**; and
  - (iii) an **auditor** conducting an **audit**; and
  - (iv) any other person who is, at all times, directly supervised by a member of personnel specified under paragraph (a); and
- (c) restrict access to its **metering records** to—
  - (i) the relevant **metering equipment provider**;
  - (ii) the **Authority**;
  - (iii) an **auditor** conducting an **audit**;
  - (iv) the relevant **metering component** owner; and
- (d) ensure that the environment in which its activities are undertaken does not, or could not reasonably be expected to, invalidate test results or adversely affect the required accuracy of measurement; and
- (e) monitor and record the environmental conditions within its **approved test house's** laboratory and storage facilities; and
- (f) comply with the specific requirements of the applicable standard listed in Table 5 of Schedule 10.1 for the **calibrations** or tests being carried out.

Clause 1(c)(iv): amended, on 29 August 2013, by clause 28 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

### 2 Equipment

- (1) An **ATH** must, at all times, ensure that—
  - (a) it has access to all items of equipment required for the performance of the **calibrations** and tests it is approved to undertake under this Part; and
  - (b) each item of equipment it uses is maintained in accordance with the manufacturer's recommendations and this Code (but if there is any inconsistency or contradiction between the manufacturer's recommendations and this Code, this Code takes precedence); and
  - (c) it maintains records about each item of its equipment, including—
    - (i) details of—
      - (A) maintenance history; and
      - (B) the **ATH's** maintenance programme; and
    - (ii) **calibration reports**, including before and after **adjustment** results; and
    - (iii) in-service checks; and
    - (iv) a history of any damage, malfunction, modification, or repair.

- (2) A **class B ATH** must have and maintain procedures for the purchase of test equipment and associated consumables.

### 3 Reference standards and working standards

- (1) An **ATH** must not use a **reference standard** or **working standard** for any activity regulated under this Part unless—
- (a) in the case of—
- (i) a **reference standard**, the **reference standard** has been **calibrated** by an **approved calibration laboratory**; or
  - (ii) a **working standard**, the **working standard** has been **calibrated** by an **approved calibration laboratory** or a **class A ATH**; and
- (b) the current **calibration report** for the **reference standard** or **working standard** confirms that it—
- (i) performs within the manufacturer’s accuracy specifications; and
  - (ii) has been **calibrated** under subclause (2) at an interval not exceeding the **calibration** intervals set out in the following table.

**Table 1: Calibration intervals**

Standard		Initial calibration interval (months beginning from the date of the first calibration)	Maximum calibration interval (months beginning from the date of the current calibration report)
<b>Reference standard or working standard (other than a working standard used for on-site calibration)</b>	Measuring transformers	36	60
	Comparator bridges	36	60
	Meters	12	24
	Power factor, voltage and current meters	12	24
<b>Working standard used for on-site calibration</b>	All	2	12

- (2) An **ATH** must ensure that a **reference standard** or **working standard** is **calibrated**—
- (a) for the first time, within the applicable initial **calibration** interval set out in Table 1 of subclause (1); and
- (b) for each subsequent **calibration**, within the applicable maximum **calibration** interval set out in Table 1 of subclause (1).

- (3) A **class A ATH** must ensure that—
  - (a) in all cases of **calibration** of its **reference standards**, the **uncertainties** given in the **reference standard calibration report** are sufficiently small so that the overall **uncertainty** in the measurements used to test a **metering installation** does not exceed one third of the maximum permitted error set out in Table 1 of Schedule 10.1 for the category of **metering installation** that the **reference standard** will be used to **calibrate**; and
  - (b) it does not use a **working standard** on a system operating at a voltage of 33kV or above between active conductors, unless the **working standard** has been **calibrated** by an **approved calibration laboratory**; and
  - (c) it does not use a **reference standard**, other than a standard **measuring transformer**, unless it is maintained at the appropriate reference conditions set out in the **reference standard's current calibration report**.
- (4) If appropriate reference conditions under subclause (3)(c) cannot be achieved, the **class A ATH** must calculate and apply adjustments in accordance with the processes and procedures under subclause (5) so that the **reference standard** achieves the errors and uncertainties set out in the **reference standard's current calibration report**.
- (5) An **ATH** must develop and maintain processes and procedures for calculating and applying adjustments to a **reference standard's** errors and uncertainties to compensate for deviations from the reference conditions contained in the **reference standard's current calibration report**.
- (6) An **ATH** must retain a copy of the current **calibration report** for each of its **reference standards** and **working standards**.

#### 4 Metering component testing systems

An **ATH** may use a complete **calibrated metering component** testing system (also known as a test bench) as an alternative to a separately **calibrated working standard** only if—

- (a) the **ATH calibrates** the complete **calibrated metering component** testing system under clause 3 as if it was a **working standard**; and
- (b) before completing the **calibration report**, the **ATH** carries out a testing system accuracy test, using approved **reference standards**.

#### 5 Calibration errors

- (1) For the purposes of this clause, a **reference standard** or **working standard** has a **calibration error** if it is performing outside of the manufacturer's accuracy specifications.
- (2) An **ATH** must not use a **reference standard** or **working standard** for **calibration**, if it believes, or should reasonably be expected in the circumstances to believe, that the **reference standard** or **working standard** has a **calibration error**.
- (3) An **ATH** must, as soon as reasonably practicable, but no more than 3 months after becoming aware of a **calibration error**—
  - (a) investigate the error; and

- (b) ensure the cause of the error is recorded in a **calibration report**; and
  - (c) if the investigation indicates that the **reference standard** or **working standard** performs outside the manufacturer's accuracy specifications, advise each **ATH** that has used any equipment that was **calibrated** using the **reference standard** or **working standard** since the previous **calibration**, of the error.
- (4) An **ATH** must, if a **reference standard** or a **working standard** has a **calibration** error,—
- (a) treat each **metering installation** that it has **calibrated** using the **reference standard** or **working standard** as outside the applicable accuracy tolerances set out in Table 1 of Schedule 10.1; and
  - (b) comply with clause 10.43.
- (5) For the purposes of this clause, a **working standard** includes a complete **calibrated metering component** testing system referred to in clause 4.

## 6 Measurement traceability

An **ATH** must document, maintain, and comply with, a system that ensures, whenever it undertakes a **calibration** test or measurement,—

- (a) it keeps sufficient records to enable the **ATH** to replicate the test or measurement in every respect should the need arise; and
- (b) the results of the measurements are **traceable**.

### *Requirements for calibration of metering components*

## 7 Calibration methods

- (1) An **ATH** must, before it **certifies** a **metering installation** or **metering component**, ensure that 1 of the following persons has **calibrated** the **metering components** under this Part:
- (a) an **approved calibration laboratory**; or
  - (b) an **ATH** with the appropriate approval under Schedule 10.3.
- (2) An **ATH** must, before it **certifies** a **metering component**, ensure that the **metering component** is **calibrated** or **adjusted** under—
- (a) the appropriate physical and electrical reference conditions detailed in the standard listed in Table 5 of Schedule 10.1; or
  - (b) conditions which permit the **ATH** to calculate the results and their **uncertainty** at the reference conditions detailed in the standard listed in Table 5 of Schedule 10.1.
- (3) A **class B ATH** must, when **calibrating** a **metering component**,—
- (a) follow all relevant requirements of NZ/AS ISO 17025 for **calibration**; and
  - (b) only use the relevant methodologies that have been **audited** in the **class B ATH's** most recent **audit** for approval.
- (4) If an **ATH** **calibrates** a **metering component**, it must ensure that the individual test points that it uses are—
- (a) no less than the minimum set out in the standards listed in Table 5 of Schedule 10.1; or

- (b) sufficient and appropriate in the circumstances to ensure that the **calibration** allows calculation of the **metering installation** error as set out in clause 22 of Schedule 10.7.
- (5) An **ATH** must, when **calibrating a metering component**,—
  - (a) if necessary, **adjust** and document the **error compensation**; and
  - (b) ensure that any **adjustment** carried out under paragraph (a) is appropriate to achieve an error as close as practicable to zero; and
  - (c) ensure that the **uncertainty** of measurement during the **calibration** of the **metering component** does not exceed one third of the maximum permitted error in the relevant standard listed in Table 5 of Schedule 10.1; and
  - (d) if the **metering component** is intended for a **metering installation** which is to be **certified** using the **selected component certification** method, ensure that the **ATH** records the errors of a current transformer from 5% to 120% of rated primary current.
- (6) An **ATH** must ensure that—
  - (a) it has documented instructions on the use and operation of all relevant equipment it uses for **calibration**; and
  - (b) it has documented **calibration** procedures that it must make available to, and ensure are followed by, its staff carrying out the **calibration**; and
  - (c) its **calibration** procedures are aligned with the standards listed in Table 5 of Schedule 10.1.
- (7) An **ATH**—
  - (a) may select a test point other than those specified in the relevant standard listed in Table 5 of Schedule 10.1, or at a lower burden than specified in the standard; but
  - (b) must, if it does this, document its reasons for the selection of these test points in the **calibration report**.

## 8 Compensation factors

An **ATH** must, if it is approved to **certify metering installations**, have a documented process for determining **compensation factors**.

## 9 Seals

An **ATH** must have a documented system for applying seals to a **metering installation**, that—

- (a) meets the requirements of clause 47 of Schedule 10.7; and
- (b) is appropriate in the circumstances to ensure—
  - (i) the **ATH's** ability to monitor the **metering installation's** continued integrity; and
  - (ii) the relevant **metering equipment provider** is alerted as soon as practicable to any unauthorised access to the **metering installation**.

## 10 Services access interface

An **ATH** must, when preparing a **metering installation certification report**,

determine, and record in the **certification report**,—

- (a) all **services access interfaces**; and
- (b) the conditions under which each **services access interface** may be used.

Clause 10: replaced, on 1 February 2021, by clause 22 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

## 11 Certification and calibration reports

- (1) An **ATH** must, for each **metering installation** that it **certifies**, produce a **certification report** in accordance with Schedule 10.7.
- (2) An **ATH** must, for each **metering component**—
  - (a) that it **calibrates**, produce a **calibration report** in accordance with Schedule 10.8; and
  - (b) that it **certifies**, produce a **certification report** in accordance with Schedule 10.8.

## 12 ATH record keeping and documentation

- (1) An **ATH** must ensure it documents and maintains a record system for all records, certificates, and reports for any activity regulated under this Part.
- (2) An **ATH** must ensure that—
  - (a) all its records, certificates, and reports are stored securely; and
  - (b) each of its test records for a **metering installation** is identified by a unique identifier; and
  - (c) all of its records, certificates, and reports are sufficiently detailed to enable verification of all aspects of all tests it carries out, including the following:
    - (i) test conditions; and
    - (ii) specific test equipment used; and
    - (iii) personnel carrying out the tests.

## 13 Retention of ATH records relating to metering components

- (1) An **ATH** must, for each activity regulated under this Part in relation to a **metering component** that it **calibrates** or **certifies**, retain the following records relating to that **metering component** for at least 48 months after the **certification** expiry date of the **metering component**,—
  - (a) all of the **ATH**'s records, certificates, and reports; and
  - (b) all **certification reports** produced by the **ATH**; and
  - (c) all **calibration reports** produced by the **ATH**.
- (2) If an **ATH** intends to cease being an **ATH**, the **ATH** must transfer the records described in subclause (1) to the **metering equipment provider** either—
  - (a) recorded in the **registry** as being responsible for the **metering installation** where the **metering component** is installed; or
  - (b) identified in the **metering records** provided to the **reconciliation manager** under clause 10.26(7)(c) or 10.30(2)(c).

Clause 13: replaced, on 1 March 2024, by clause 38 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

### 13A Retention of ATH records relating to metering installations

- (1) An ATH must, for each activity regulated under this Part in relation to a **metering installation** that the ATH certifies, retain the following records relating to that **metering installation** for at least 48 months after the **certification** expiry date of the **metering installation**:
  - (a) all of the ATH's records, certificates, and reports:
  - (b) all **certification reports** produced by the ATH.
- (2) If an ATH intends to cease being an ATH, the ATH must transfer the records described in subclause (1) to the **metering equipment provider** either—
  - (a) recorded in the **registry** as being responsible for the **metering installation**; or
  - (b) identified in the **metering records** provided to the **reconciliation manager** under clause 10.26(7)(c) or 10.30(2)(c).

Clause 13A: inserted, on 1 March 2024, by clause 39 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

### 14 Making available of ATH records

An ATH must, within 5 **business days** of creating a record, certificate, or report for a **metering installation** that it certifies,—

- (a) send, in electronic form or such other form as may be agreed between the parties, a copy of the record, certificate, or report to the **metering equipment provider** responsible for the **metering installation**; and
- (b) ensure that the **metering equipment provider** receives the record, certificate, or report.

### 15 ATH organisation and management

- (1) An ATH must ensure that—
  - (a) it has managerial staff who, unless otherwise permitted in the relevant approval, all have the authority and resources needed to discharge their duties; and
  - (b) the responsibilities, authority, and functional relationships of all its personnel are fully and accurately specified and recorded in the ATH's records.
- (2) An ATH must appoint—
  - (a) a technical manager (however named) with overall responsibility for technical operations, who must have appropriate engineering qualifications and experience in the operation of an **approved test house**; and
  - (b) a quality manager (however named), with responsibility for the quality management certification and the implementation of the quality management system.
- (3) An ATH must ensure that all staff who perform or supervise work or activities regulated under this Part are technically competent, experienced, qualified, and trained for the functions they perform.

### 16 Quality management system

An ATH must establish, document, implement, maintain, and comply with a quality management system which records its processes and procedures to ensure compliance with this Part.

**17 Field work**

A **class A ATH** must, if it arranges for another person to carry out field work, ensure that person is certified to the relevant AS/NZS ISO 9001:2008 or AS/NZS ISO 9001:2016 at all times while the person carries out the work.

Clause 17 amended, on 1 June 2017, by clause 16 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Audits) 2016.

**Schedule 10.5**

cl 10.20

*[Revoked]*

Schedule 10.5: revoked, on 1 June 2017, by clause 17 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Audits) 2016.

## Schedule 10.6

cl 10.20

### Metering equipment provider ongoing obligations and functions

#### 1 Metering equipment provider must provide access to raw meter data

- (1) A **metering equipment provider** must, within 10 **business days** of receiving a request from a **trader** with whom it has an arrangement to access **raw meter data** from a **metering installation** for which the **metering equipment provider** is responsible, give remote or onsite access at the **services access interface** to the **trader** to collect, obtain, and use **raw meter data** from the **metering installation**.
- (2) A **metering equipment provider** may, if it receives a request from a person with whom it has an arrangement, other than a **trader** under subclause (1), to access **raw meter data** from a **metering installation** for which the **metering equipment provider** is responsible, give remote or onsite access at the **services access interface** to the person to collect, obtain, and use **raw meter data** from the **metering installation**.
- (3) A **metering equipment provider** must only give access to a **trader** under subclause (1), or a person under subclause (2), if the **trader** or person has entered into a contract to collect, obtain, and use the **raw meter data**, with the **consumer** whose **electricity** is measured or estimated, or whose load is controlled at the **metering installation**.
- (4) A **metering equipment provider** must, within 10 **business days** of receiving a request from 1 of the following parties, give the party access to **raw meter data** from a **metering installation** for which it is responsible:
  - (a) a relevant **reconciliation participant** with whom it has an arrangement, other than a **trader**;
  - (b) the **Authority**;
  - (c) an **ATH**;
  - (d) an **auditor**.
- (5) A party listed in subclause (4) may only request access to **raw meter data** for the purposes of exercising the party's rights and performing the party's obligations under this Code or any relevant regulations in relation to 1 or more of the following:
  - (a) the party's **audit** functions;
  - (b) the party's administration functions;
  - (c) the party's testing functions;
  - (d) the provision of **submission information** to the **reconciliation manager**.
- (6) The **metering equipment provider** must provide a **trader** under subclause (1) or a party under subclause (4) with—
  - (a) the **raw meter data**; or
  - (b) any necessary facilities, codes, keys, or other means to enable the **trader** or party to access the **raw meter data** by the most practicable means.
- (7) The **metering equipment provider** must, when complying with subclause (6), or when providing access to a person under subclause (2), use appropriate procedures to ensure that—
  - (a) the **raw meter data** is received only by—
    - (i) the **trader**, person, or party; or

- (ii) a contractor to a **trader**, person, or party; and
  - (b) the security of the **raw meter data** and the **metering installation** is maintained; and
  - (c) access to **raw meter data** under subclauses (1) to (6) is limited to only the specific **raw meter data**—
    - (i) authorised by a contract described in subclause (3), in the case of a **trader** under subclause (1) or a person under subclause (2); or
    - (ii) required for the purposes of exercising the party's rights and performing the party's obligations under this Code, any relevant regulations, or the **Act** in relation to the party's **audit**, administration, and testing functions, in the case of a party referred to in subclause (4).
- (8) Nothing in this Part affects proprietary interests in **metering data**.  
Clause 1(5) and (7)(c)(ii): amended, on 5 October 2017, by clause 183 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 1(5) and (7)(c)(ii): amended, on 20 December 2021, by clause 29 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

## 2 Restrictions on use of raw meter data

- (1) A **metering equipment provider** must not give a **trader** under clause 1(1), a person under clause 1(2), or a party under clause 1(3), access to **raw meter data** from a **metering installation** for which it is responsible, if to do so would, or would reasonably be expected to,—
- (a) breach any regulatory or legal requirement; or
  - (b) prejudice the maintenance and monitoring of this Code, including the prevention, investigation, and detection of Code breaches and the right to a fair hearing before the **Authority** or the **Rulings Panel**; or
  - (c) result in the **metering equipment provider** breaching an obligation of confidentiality; or
  - (d) interfere with the privacy of a natural person; or
  - (e) create an improper gain or improper advantage for any **participant** or person; or
  - (f) commercially disadvantage the **metering equipment provider** or any other **participant** or person, in a material manner; or
  - (g) prejudice the future supply of **raw meter data** that is required by a **market operation service provider** to perform an obligation under this Code.
- (2) A **metering equipment provider** must not limit or restrict a person's or party's right to access information from a **metering installation** for which the **metering equipment provider** is responsible, if the right of access is provided for in this Part.

## 3 Metering equipment provider must provide access to metering installation

- (1) A **metering equipment provider** must, within 10 **business days** of receiving a request from 1 of the following parties, arrange physical access to each **metering component** in a **metering installation** for which it is responsible:
- (a) a relevant **reconciliation participant** with whom it has an arrangement, other than a **trader**;
  - (b) the **Authority**;
  - (c) an **ATH**;

- (d) an **auditor**;
  - (e) a **gaining metering equipment provider**.
- (2) A party listed in subclause (1) may only request physical access to a **metering component** in the **metering installation** for the purposes of exercising the party's rights and performing the party's obligations under this Code or any relevant regulations in relation to 1 or more of the following:
- (a) the party's **audit** functions;
  - (b) the party's administration functions;
  - (c) the party's testing functions;
  - (d) the provision of **metering components**.
- (3) The **metering equipment provider** must arrange for a party under subclause (1) to be provided with any necessary facilities, codes, keys, or other means to enable the party to obtain physical access to all **metering components** in the **metering installation** by the most practicable means.
- (4) In complying with subclause (3), the **metering equipment provider** must use appropriate procedures to ensure that—
- (a) the security of the **metering installation** is maintained; and
  - (b) physical access to the **metering installation** under subclause (1) is limited to only the physical access required for the purposes of exercising the party's rights and performing the party's obligations under this Code or any relevant regulations in relation to the party's **audit**, administration, and testing functions.
- (5) If a party referred to in subclause (1) requires urgent physical access to a **metering installation**, it must advise the relevant **metering equipment provider**, giving all relevant particulars of the physical access required and the reason for the urgency, and the **metering equipment provider** must use its best endeavours to arrange physical access in accordance with the requested urgency.

Clause 3(2) and (4)(b): amended, on 5 October 2017, by clause 184 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 3(2) and (4)(b): amended, on 20 December 2021, by clause 30 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

#### 4 **Metering equipment provider record keeping and documentation**

- (1) A **metering equipment provider** must—
- (a) for each **metering installation** for which it is responsible, keep accurate and complete records as specified in Table 1 of Schedule 11.4; and
  - (b) for each **metering installation** for which it is responsible other than an **interim certified metering installation**, keep accurate and complete records of—
    - (i) the **certification** expiry date of each **metering component** in the **metering installation**; and
    - (ii) all equipment used in relation to the **metering installation**, including serial numbers and details of the equipment's manufacturer; and
    - (iii) the manufacturer's, or if different the most recent, test certificate for each **metering component** in the **metering installation**; and
    - (iv) the **metering installation** category for the **metering installation**; and
    - (v) all **certification reports** and **calibration reports** showing dates tested, tests carried out, and test results for all **metering components** in the **metering**

- installation; and**
  - (vi) the contractor who installed each **metering component** in the **metering installation; and**
  - (vii) the **certification sticker**, or equivalent details, for each **metering component** that is **certified** under Schedule 10.8 in the **metering installation; and**
  - (viii) seal identification information under clause 47 of Schedule 10.7 relating to the **metering installation; and**
  - (ix) any applicable **compensation factors; and**
  - (x) the owner of each **metering component** within the **metering installation; and**
  - (xi) any applications installed within each **metering component** within the **metering installation; and**
  - (xii) the signed inspection report under clause 44 of Schedule 10.7, confirming that the **metering installation** continues to comply with the requirements of this Part.
- (2) A **metering equipment provider** must, within 10 **business days** of receiving a request from a **participant** for a signed inspection report prepared under clause 44 of Schedule 10.7, make a copy of the report available to the **participant**.
- (3) A **metering equipment provider** must retain **metering records** relating to a **metering component** in a **metering installation** for which it is or was responsible, for at least 48 months after the **metering component** is removed from the **metering installation**, even if—
  - (a) the **metering installation** is subsequently **decommissioned; or**
  - (b) the **metering equipment provider** ceases to be responsible for the **metering installation.**
- (4) A **metering equipment provider** must retain **metering records** relating to a **metering installation** for which it is or was responsible, unless—
  - (a) the **metering installation** is **decommissioned; or**
  - (b) the **metering equipment provider** ceases to be responsible for the **metering installation; or**
  - (c) the **metering installation** has been **recertified** in accordance with clause 11 of Schedule 10.7 or clause 13 of Schedule 10.7.
- (5) If subclause (4)(a), 4(b) or 4(c) applies, the **metering equipment provider** must retain the **metering records** for at least 48 months after the event described in those subclauses.

Clause 4(3): substituted, on 1 February 2016, by clause 31 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 4(3): replaced, on 1 March 2024, by clause 40(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Clause 4(4) and (5): inserted, on 1 March 2024, by clause 40(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

#### **4A Transfer of metering records**

- (1) A **metering equipment provider** that intends to cease being a **metering equipment provider** (MEP A) must transfer its **metering records** to the **metering equipment provider** (MEP B) that is taking responsibility for every **metering component** or **metering installation** that MEP A is responsible for.

- (2) If a **metering equipment provider** (MEP B in subclause (1)) receives **metering records** under subclause (1), it must retain those **metering records** in accordance with clause 4.

Clause 4A: inserted, on 1 March 2024, by clause 41 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

#### **4B Metering equipment provider retention of ATH records**

If a **metering equipment provider** receives an **ATH** record under clause 13(2) of Schedule 10.4 or clause 13A(2) of Schedule 10.4, the **metering equipment provider** must retain that record for at least 48 months after the date of expiry of the **certification** of the **metering installation** or **metering component** to which the record relates.

Clause 4B: inserted, on 1 March 2024, by clause 41 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

### **5 Metering equipment provider to provide access to metering records**

- (1) A **gaining metering equipment provider** may request that a **losing metering equipment provider** provide it with access to **metering records** required for the **gaining metering equipment provider** to exercise its rights and perform its obligations under this Code or any relevant regulations in relation to its respective **auditing**, administration, and testing functions.
- (2) The **losing metering equipment provider** must, within 10 **business days** of receiving a request under subclause (1), provide the **gaining metering equipment provider** with—
- (a) the **metering records**; or
  - (b) any necessary facilities, codes, keys, or other means to enable the **gaining metering equipment provider** to obtain access to the **metering records** by the most practicable means.
- (3) In complying with subclause (2), the **losing metering equipment provider** must use appropriate procedures to ensure that—
- (a) the **metering records** are received only by the **gaining metering equipment provider** or its contractor; and
  - (b) the security of the **metering records** is maintained; and
  - (c) it only provides access to the specific **metering records** required for the purposes of the **gaining metering equipment provider** exercising its rights and performing its obligations under this Code or any relevant regulations in relation to its **auditing**, administration, and testing functions.

Clause 5(1) and (3)(c): amended, on 5 October 2017, by clause 185 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 5(1) and (3)(c): amended, on 20 December 2021, by clause 31 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

### **6 Provision of metering records when ATH recertifying metering installation**

- (1) This clause applies if—
- (a) a **metering equipment provider** contracts with an **ATH** to **recertify a metering installation** for which the **metering equipment provider** is responsible; and
  - (b) the **ATH** did not perform the previous **certification** of the **metering installation**.
- (2) If this clause applies, the **metering equipment provider** must, no later than 10 **business days** after the effective date of the contract, provide the **ATH** with a copy of all relevant **metering records**.

**7 Metering equipment provider must use participant identifier**

- (1) A **metering equipment provider** must—
  - (a) ensure that it has a unique **participant identifier** for its activities as **metering equipment provider** under this Code; and
  - (b) use its **participant identifier**, if required under this Code, to correctly identify its information.
- (2) A **metering equipment provider** must apply to the **Authority** in the **prescribed form** for a **participant identifier** at least **5 business days** before the **metering equipment provider** requires the **participant identifier**.
- (3) The **Authority** may change a **metering equipment provider's participant identifier**.
- (4) If the **Authority** changes a **metering equipment provider's participant identifier**—
  - (a) it must advise the **metering equipment provider** of the date on which the change takes effect at least 3 months before the date; and
  - (b) the new **participant identifier** becomes effective from the date advised under paragraph (a).

**8 Electronic interrogation of metering installation**

- (1) This clause applies when **raw meter data** can only be obtained from a **metering equipment provider's back office**.
- (2) A **metering equipment provider** must—
  - (a) ensure that the **interrogation cycle** for each **metering installation** that it electronically **interrogates** does not exceed the maximum **interrogation cycle** in the **registry**; and
  - (b) **interrogate** a **metering installation** for which it is responsible at least once in each maximum **interrogation cycle** in the **registry**; and
  - (c) when electronically **interrogating** a **metering installation**, ensure that the **interrogation** and processing system electronically monitors and corrects its internal clocks against a time source with a verifiable standard, at a frequency sufficient, and no longer than 1 week, to ensure the internal clock is accurate, when carrying out an **interrogation**, to within  $\pm 5$  seconds of—
    - (i) **New Zealand standard time**; or
    - (ii) **New Zealand daylight time**.
- (3) A **metering equipment provider** must, for each **metering installation** for which it is responsible, record in the processing system log, the time, the date, and the extent of any change in the internal clock setting in the **metering installation**.
- (4) A **metering equipment provider** must ensure that a **data storage device** in a **metering installation** for which it is responsible for **interrogating** does not exceed the maximum time error set out in Table 1 of subclause (5).
- (5) A **metering equipment provider** must, when **interrogating** a **metering installation**,—
  - (a) compare the time on the internal clock of the **data storage device** with the time on the **interrogation** and processing system clock; and
  - (b) calculate the time error for the **data storage device**; and
  - (c) if the time error calculated under paragraph (b) is equal to or less than the

- applicable time error set out in Table 1, correct the clock of the **data storage device**; and
- (d) if the time error calculated under paragraph (b) is greater than the applicable time error set out in Table 1,—
    - (i) correct the clock of the **data storage device**; and
    - (ii) compare the time of the clock with the time of the **interrogation** and processing system clock; and
    - (iii) advise the affected **reconciliation participant** for the **point of connection**, within **5 business days** of correcting the clock, of any affected **raw meter data**; and
    - (iv) comply with the requirements of clause 10.43; and
  - (e) download the **event log**; and
  - (f) check the **event log** for any evidence of an event that may affect the integrity or operation of the **metering installation** such as malfunctioning or tampering.

**Table 1: Maximum permitted time errors**

<b>Metering installation category</b>	<b>Half-hour metering installations (seconds)</b>	<b>Non half-hour metering installations (seconds)</b>
1	±30	±60
2	±10	±60
3	±10	NA
4	±10	NA
5	±5	NA

- (5A) A **metering equipment provider** must, if it finds an event that may affect the integrity or operation of a **metering installation**,—
  - (a) investigate and remediate the event; and
  - (b) advise the relevant **reconciliation participant** that it is investigating and remediating the event; and
  - (c) advise the relevant **reconciliation participant** of any corrections to the **raw meter data** required; and
  - (d) advise the relevant **reconciliation participant** of any event that does not affect the integrity or operation of the **metering installation** but which may affect the accuracy of the **raw meter data**.
- (6) The **metering equipment provider** must, when **interrogating** a **metering installation**, ensure that all **raw meter data** downloaded as part of the **interrogation**, and used for submitting information for the purposes of Part 15, is archived—
  - (a) for no less than 48 months after the **interrogation** date; and
  - (b) in a form that cannot be modified without an audit trail being created; and
  - (c) in a form that is secure and prevents access by any unauthorised person; and
  - (d) in a form that is accessible to authorised personnel.
- (7) A **metering equipment provider** must, when **interrogating** a **metering installation**,—

- (a) ensure that for all **metering information**, an **interrogation** log is generated by the **interrogation software** to record details of each **interrogation**; and
- (b) review the **event log** either manually or by an automated **software** function which flags exceptions and—
  - (i) take appropriate action where problems are apparent; and
  - (ii) pass relevant **event log** entries to the **reconciliation participant** for the **metering installation**; and
- (c) ensure that the **interrogation** log forms part of the **interrogation** audit trail and contains the following as a minimum:
  - (i) the date of **interrogation**; and
  - (ii) the time of commencement of **interrogation**; and
  - (iii) the operator of the **interrogation** system identification (where available); and
  - (iv) the unique identifier of the **data storage device** being **interrogated**; and
  - (v) any clock errors outside the range specified in Table 1 of subclause (5) and the extent of any change in the internal clock setting; and
  - (vi) the method of **interrogation**; and
  - (vii) the identifier of the reading device used for **interrogation** (if applicable).
- (8) Subclause (9) applies when—
  - (a) a **metering equipment provider** interrogates a **half-hour metering installation** which is a **category 1 metering installation** or a **category 2 metering installation**; and
  - (b) the **certifying ATH** confirmed, as a part of the **metering installation's** most recent **certification**, that the **metering equipment provider's back office** processes include, for each **interrogation** cycle, a comparison of—
    - (i) the increment of the accumulating **meter** registers; and
    - (ii) the sum of the **half-hour metering raw meter data** for the same period.
- (9) When this subclause applies, the **metering equipment provider** must ensure that each electronic **interrogation** of the **metering installation** that retrieves **half hour raw meter data** compares the sum of that data against the increment of the **metering installation's** accumulating **meter** registers for the same period.
- (10) A **metering equipment provider** must not, when **interrogating** a **metering installation**, apply the **compensation factor** recorded in the **registry** for that **metering installation** to any **raw meter data** downloaded as part of the **interrogation**.
- (11) If an electronic **interrogation** of a **metering installation** by a **metering equipment provider** does not download all of the **raw meter data** as part of the **interrogation**, the **metering equipment provider** must—
  - (a) investigate the reasons for the failure, restore communications, and download all of the **raw meter data** as soon as possible but no later than the time specified in subclause (12); or
  - (b) in accordance with clause 3(c) of Schedule 11.4, update the **registry metering records** to show that the **metering component** is no longer an advanced metering infrastructure device.
- (12) If a **metering equipment provider** decides to take the actions specified in subclause (11)(a), the **metering equipment provider** must complete those actions by the earlier

of—

- (a) the number of full days that equate to no more than 25% of the maximum **interrogation** cycle for the **metering installation** from the date of the last successful **interrogation**; and
  - (b) 30 days from the date of the last successful **interrogation**.
- (13) If the **metering equipment provider** does not complete investigating, restoring communications, and downloading all of the **raw meter data** in accordance with subclause (11)(a) within the time specified in subclause (12) or determines at any time during the time period specified in subclause (12) that it will not be able to complete those tasks within that time frame, the **metering equipment provider** must update the **registry metering records** in accordance with clause 3(d) of Schedule 11.4 to show that the **metering component** is no longer an advanced metering infrastructure device.
- Clause 8(3): amended, on 1 February 2021, by clause 23(1) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.
- Clause 8(5)(f): replaced, on 1 February 2021, by clause 23(2) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.
- Clause 8(5A): inserted, on 1 February 2021, by clause 23(3) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.
- Clause 8(6)(b): amended, on 1 November 2018, by clause 30(a) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.
- Clause 8(7)(c): amended, on 1 November 2018, by clause 30(b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.
- Clause 8(7)(c)(v): amended, on 1 February 2021, by clause 23(4) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.
- Clause 8(8)(b): replaced, on 1 February 2021, by clause 23(5) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.
- Clause 8(9): amended, on 1 February 2021, by clause 23(6) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.
- Clause 8(10), (11), (12) and (13): inserted, on 1 February 2021, by clause 23(7) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

## 9 Contracting with ATH

A **metering equipment provider** must, when contracting with an **ATH** in relation to the required activities for the **certification** of a **metering installation** for which it is responsible, ensure that an **ATH** contracted to perform work under this Part has the appropriate scope of approval for such work.

## Schedule 10.7 cls 10.11, 10.20, 10.26, 10.38 and 10.42

### Metering installation requirements

#### *Metering installation general requirements*

#### 1 Maintenance and repair of metering installations

- (1) A **metering equipment provider** must comply with subclause (2)—
  - (a) for each **metering installation** for which it is responsible; and
  - (b) for each **metering component** in a **metering installation** for which it is responsible.
- (2) A **metering equipment provider** must ensure that—
  - (a) it carries out regular maintenance, including battery monitoring and replacement, in accordance with the applicable requirements in the **metering records**; and
  - (b) it carries out all necessary repairs; and
  - (c) if it is not possible to repair a **metering installation** or **metering component** so that it complies with the applicable requirements in this Part, it is—
    - (i) replaced with a **metering installation** or **metering component** that complies with the applicable requirements in this Part; or
    - (ii) in the case of a **metering installation**, **decommissioned**; and
  - (d) it documents in the **metering records** all maintenance, repairs, or replacements it carries out at the time it carries out the maintenance, repairs, or replacement.

#### *Metering installation design reports*

#### 2 Design reports for metering installations

- (1) A **metering equipment provider** must obtain a design report under this clause for—
  - (a) a proposed new **metering installation** for which it will be responsible, before it installs the **metering installation**; and
  - (b) a modification to an existing **metering installation** for which it is responsible before the modification commences.
- (2) The **metering equipment provider** must ensure that a design report is prepared by a person with an appropriate level of skill, expertise, experience, and qualification.
- (3) The **metering equipment provider** must ensure that a design report includes—
  - (a) a schematic drawing of the **metering installation** for use by an **ATH**; and
  - (b) details of the configuration scheme that programmable **metering components** are to include; and
  - (c) confirmation that the configuration scheme has been approved by an **approved test laboratory**; and
  - (d) for each **services access interface**, the maximum **interrogation** cycle specified in clause 36(4); and
  - (e) any **compensation factor** arrangements; and
  - (f) the method of **certification** required under this Part to be used for the **metering installation**; and

- (g) the name and signature of the person who prepared the design report and the date on which it was signed.
- (4) The **metering equipment provider** must provide the design report to the **certifying ATH** before the **ATH** installs or modifies—
  - (a) the **metering installation**; or
  - (b) a **metering component** in the **metering installation**.

Clause (2)(3)(d): amended, on 1 February 2021, by clause 24 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

### 3 **ATH design report obligations**

- (1) A **certifying ATH** must, before it **certifies** a new or modified **metering installation**, check and approve, in writing, the design report provided under clause 2 (including the configuration scheme and the schematic drawing), to ensure that the proposed new or modified **metering installation**—
  - (a) will function correctly; and
  - (b) will provide the required accuracy and **raw meter data**; and
  - (c) complies with this Part.
- (2) The **certifying ATH** must, within 10 **business days** of the date on which it **certifies** the **metering installation**—
  - (a) update the design report with any changes to the **metering installation** design; and
  - (b) provide a copy of the updated design report to the **metering equipment provider** responsible for the **metering installation**.

### 4 **Metering equipment provider obligations**

- (1) A **metering equipment provider** must, for each **metering installation** for which it is responsible,—
  - (a) ensure that the sum of the measured error and **uncertainty** does not exceed the maximum permitted error set out in Table 1 of Schedule 10.1 for the category of the **metering installation**; and
  - (b) ensure that the design of the **metering installation**, including its **data storage device** and **interrogation** system, will ensure that the sum of the measured error and the smallest possible increment of the energy value of the **raw meter data** obtained from the **metering installation** does not exceed the maximum permitted error set out in Table 1 of Schedule 10.1 for the category of the **metering installation**; and
  - (c) comply with the requirements applying to the **metering equipment provider** in the design report provided under clause 2; and
  - (d) ensure that the **metering installation** complies with—
    - (i) the design report provided under clause 2; and
    - (ii) this Part.
- (2) A **metering equipment provider** must ensure that, for each **metering installation** for which it is responsible for an **ICP** that is not also an **NSP**,—
  - (a) the **metering installation** configuration does not use subtraction to determine **submission information** used for the purposes of Part 15; and

- (b) which is a category 3 or higher **metering installation**, is a **half-hour metering installation**.
- (3) A **metering equipment provider** must ensure that, for each **metering installation** for which it is responsible for an **NSP** that is not a **point of connection** to the **grid**,—
  - (a) the **metering installation** configuration does not use subtraction to determine **submission information** used for the purposes of Part 15; and
  - (b) it is a **half-hour metering installation**.
- (4) A **metering equipment provider** must, for each **metering installation** for which it is responsible, ensure that it is appropriate having regard to the physical and electrical characteristics of the **point of connection**.

*Determination of metering installation categories*

**5 Determination of metering installation category**

An **ATH** must, before it **certifies** a **metering installation**, determine the category of the **metering installation** in accordance with the following:

- (a) subject to clause 6, if the **metering installation** incorporates a current transformer, its category must be determined according to the primary current rating of the current transformer and the connected voltage set out in Table 1 of Schedule 10.1:
- (b) if the **metering installation** does not incorporate a current transformer and the quantity of **electricity** conveyed is measured by a **meter**, it must be category 1.

Clause 5(a): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 5(a): amended, on 5 October 2017, by clause 186 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**6 Determining metering installation incorporating current transformer to be lower category**

- (1) When determining the category of a **metering installation** under clause 5(a), an **ATH** may under subclause (2) determine the category of a **metering installation** to be lower than would otherwise be the case under clause 5(a) only in 1 of the following circumstances:
  - (a) if a protection device, including a fuse or a **circuit breaker**, is installed that limits the maximum current of the **metering installation**:
  - (b) if the **metering equipment provider**, acting reasonably on the basis of historical **metering data**, believes that the maximum current to be conveyed through the **point of connection** will, at all times during the intended **certification** period, be lower than the current setting of the protection device for the category for which the **metering installation**—
    - (i) is **certified**; or
    - (ii) is required to be **certified** by this Code:
  - (c) if the **metering installation** uses less than 0.5 GWh in any 12 month period:
  - (d) if the **metering equipment provider**, acting reasonably on the basis of historical **metering data**, believes that the **metering installation** (including, for example, a **metering installation** for an emergency fire pump or flood pump) will use less

- than 0.5 GWh in any 12 month period.
- (2) An **ATH** may determine the category of a **metering installation** to be lower than would otherwise be the case under clause 5(a) of this Schedule, provided that,—
- (a) if the circumstance in subclause (1)(a) applies, when **certifying the metering installation**, determine the category of the **metering installation** by reference to the maximum current setting of the protection device and, when doing so, the **ATH** must—
    - (i) confirm the suitability and operational condition of the protection device; and
    - (ii) record, in the **metering records**, the rating and setting of the protection device; and
    - (iii) seal the protection device under clause 47; and
    - (iv) apply, if practicable, a warning tag to the seal under clause 47(6):
  - (b) if the circumstance in subclause (1)(b) applies, the **ATH** must, when **certifying the metering installation**, determine the **metering installation** category according to the **metering installation's** expected maximum current but only—
    - (i) at the request of the **metering equipment provider**; and
    - (ii) if the **ATH** considers it appropriate in the circumstances:
  - (c) if the circumstance in subclause (1)(c) or subclause (1)(d) applies and the primary voltage is less than 1 kV, when **certifying the metering installation**, the **ATH** must determine the **metering installation** as category 2:
  - (d) if the circumstance in subclause (1)(c) or subclause (1)(d) applies and the primary voltage is greater than or equal to 1 kV, when **certifying the metering installation**, the **ATH** must determine the **metering installation** as category 3.
- (2A) If when **certifying a metering installation** an **ATH** determines the category of a **metering installation** under—
- (a) subclause (2)(b), then the **metering equipment provider** responsible for the **metering installation** must, each month, obtain a report from the **participant interrogating the metering installation** which details the maximum current conveyed through the **metering installation** for the prior month:
  - (b) subclause (2)(c), then the **metering equipment provider** responsible for the **metering installation** must, each month during the **certification** period, obtain a report from the **participant interrogating the metering installation** which details the total kWh consumption of the **metering installation** for the prior 12 months.
- (2B) For the purposes of subclause (2A)(a), the **metering equipment provider** must determine the maximum current from **raw meter data** from the **metering installation** either:
- (a) by calculation from the kVA by **trading period** if available; or
  - (b) from a maximum current indicator if fitted in the **metering installation**.
- (2C) If a **metering equipment provider** does not receive the report under subclause (2A)(a) in any month, or the report demonstrates that the maximum current conveyed through the **point of connection** at any time during the previous month exceeded the maximum permitted current for the **metering installation** category as **certified, certification** for

- the **metering installation** to which the report relates is automatically cancelled from—
- (a) the date on which the **metering equipment provider** should have received the report; or
  - (b) the date on which the **metering equipment provider** received the report if earlier.
- (2D) If a **metering equipment provider** does not receive the report under subclause (2A)(b) in any month, or the report identifies that the **electricity** conveyed through the **point of connection** exceeded 0.5 GWh during the previous 12 month period, the **certification** for the **metering installation** to which the report relates is automatically cancelled from—
- (a) the date on which the **metering equipment provider** should have received the report; or
  - (b) the date on which the **metering equipment provider** received the report if earlier.
- (3) The **ATH** must, before it determines a **metering installation** to be a lower category under this clause, visit the site of the **metering installation** to ensure that the installation is suitable for the **metering installation** to be determined to be a lower category.
- (4) If an **ATH** determines a **metering installation** to be a lower category under this clause the **metering installation certification report** must include all information required to demonstrate, as at the **certification date**, compliance with this clause.

Clause 6 Heading: amended, on 1 February 2021, by clause 25(1) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 6(1)(b): amended, on 29 August 2013, by clause 30(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 6(2)(b)(i): amended, on 29 August 2013, by clause 30(2) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 6(2)(c): amended, on 29 August 2013, by clause 30(3) and (4) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 6(2)(c)(iii): amended, on 29 August 2013, by clause 30(5) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 6(1) and (2): replaced, on 1 February 2021, by clause 25(2) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 6(2A), (2B), (2C) and (2D): inserted, on 1 February 2021, by clause 25(2) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

### *Certification of metering installation*

#### **7 Method of certification**

- (1) An **ATH** must, when **certifying a metering installation**, only use—
  - (a) the **selected component certification** method under clause 11, if the **metering installation** is a **category 1 metering installation**, a **category 2 metering installation** or a **category 3 metering installation**; or
  - (b) the **fully calibrated certification** method under clause 13.
- (2) Despite subclause (1), an **ATH** may **recertify**—
  - (a) a **category 1 metering installation** using statistical sampling under clause 16; or
  - (b) a **category 2 metering installation** using the approved **comparative recertification** method under clause 12.
- (3) If an **ATH** uses statistical sampling under subclause (2)(a), it must use the applicable

method described in subclause (1)(a) and (1)(b) to **certify** each **metering installation** in the sample.

## **8 Metering installation certification requirements**

- (1) An **ATH** must not **certify** a **metering installation** unless the **metering installation** complies with this Part.
- (2) An **ATH** must, when **certifying** a **metering installation**,—
  - (a) prepare a **certification report** for the **metering installation**; and
  - (b) specify in the **certification report** whether the **metering installation** is —
    - (i) **half hour**; or
    - (ii) **non half hour**; or
    - (iii) **half hour** and **non half hour**; and
  - (c) determine the **services access interfaces** for the **metering installation** under clause 10 of Schedule 10.4 and record in the **metering installation certification report**—
    - (i) each **services access interface**; and
    - (ii) the conditions under which each **services access interface** may be used; and
  - (d) ensure that each **metering component** in the **metering installation** functions correctly.
- (3) An **ATH** may only **certify** a **metering installation** as category 3 or higher if the **metering installation** incorporates a **half hour meter** or **half hour data storage device** to quantify the **electricity** conveyed.
- (4) An **ATH** must, when preparing a **metering installation certification report**, record the category of the **metering installation**.

Clause 8(2)(b)(ii) and (iii): amended, on 1 February 2021, by clause 26(a) and (b) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 8(2)(b)(iii): inserted, on 1 February 2021, by clause 26(c) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 8(2)(c): replaced, on 1 February 2021, by clause 26(d) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 8(3): amended, on 29 August 2013, by clause 31 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

## **8A ATH amends certification reports**

- (1) Subject to subclause (2), an **ATH** may amend a **certification report** for a **metering installation** prepared under this Schedule, or a **certification report** for a **metering component** prepared under Schedule 10.8, if—
  - (a) the **ATH** prepared the **certification report**; and
  - (b) the **ATH**—
    - (i) receives, or becomes aware of, new information relevant to the **certification**; or
    - (ii) becomes aware of a change to the **metering installation** or **metering component**, other than a change that affects the accuracy of the **metering installation** or **metering component**; and
  - (c) the new information or change would have caused the **ATH** to reach a different conclusion in its **certification report**.
- (2) An amendment under subclause (1) must not—
  - (a) change the **category** of the **metering installation**:

- (b) extend the **expiry date** in the **certification report**;
- (c) change a **calibration report** in the **certification report**.
- (3) If an **ATH** amends a **certification report** under subclause (1)—
  - (a) the **ATH** must advise the relevant **metering equipment provider** of the changes to the **certification report**; and
  - (b) the **metering equipment provider** must, upon being advised under paragraph (a), update the **registry** in accordance with Part 11.
- (4) Despite anything else in this Part, if an **ATH** amends a **certification report** under this clause, the **certification** of the **metering installation** or **metering component** remains valid to the extent of the amendment.

Clause 8A: inserted, on 12 January 2018, by clause 4 of the Electricity Industry Participation Code Amendment (Amendments to Certification Reports) 2017 and expired on 12 October 2018.

Clause 8A: inserted, on 13 October 2018, by clause 4 of the Electricity Industry Participation Code Amendment (Amendments to Certification Reports) 2018.

## 9 Certification tests

- (1) An **ATH**, when carrying out a test set out in Table 3 or Table 4 of Schedule 10.1,—
  - (a) to carry out a prevailing load test on a **metering installation** or **metering component**, must do so by using a **working standard** connected to the **metering installation**;
  - (b) to carry out an installation or component configuration test on a **metering installation** or **metering component**, must ensure that the actual configuration scheme is the same as the scheme for the **metering installation** or **metering component** recorded in the design report;
  - (c) to carry out a **raw meter data** output test for a **category 1 metering installation** or **category 2 metering installation**, must do so by—
    - (i) applying a load on each phase that is—
      - (A) greater than 5% of the **meter's** maximum rated current for a **category 1 metering installation**; or
      - (B) 10 amps on each phase for a **category 2 metering installation**; and
    - (ii) using either the **working standard** referred to in subclause (1)(a) or an ammeter in good working order with an accuracy range of +/- 5% to measure the load applied to the **metering installation** and—
      - (A) recording the resulting increment of the **meter** register value over a measured period of time; or
      - (B) recording the resulting accumulation of pulses from the load over a measured period of time; and
    - (iii) ensuring that the change in the **meter** register that occurs under subclause (ii)(A) or subclause (ii)(B) is at least "1" in the least significant digit, or one mark if the least significant digit does not have numerical markings; and
    - (iv) if the **meter** is a Ferraris disc **meter**, undertaking two **raw meter data** output tests in which the second test must have a load applied to the **meter** that is at least double the load applied to the **meter** in the test carried out in accordance with subparagraph (c)(i) and measuring:
      - (A) the increment of the sum of the **meter** registers; or
      - (B) the accumulation of pulses resulting from the increase in load;

- (d) to carry out a **raw meter data** output test for a **half-hour metering installation** which is a **category 1 metering installation** or for a **half-hour metering installation** which is a **category 2 metering installation**, must either—
    - (i) compare the output from a **working standard** to the **raw meter data** from the **metering installation** for a minimum of 1 **trading period**; or
    - (ii) if the **raw meter data** is to be used for the purposes of Part 15, confirm that the **metering equipment provider's back office** processes include a comparison of:
      - (A) the increment of the accumulating **meter** registers; and
      - (B) the sum of the **half-hour metering raw meter data** for the same period:
  - (e) to carry out a **raw meter data** output test for a category 3 or higher **half-hour metering installation**, must compare the output of a **working standard** to the **raw meter data** from the **metering installation** for a minimum of 1 **trading period**:
  - (f) to carry out a **raw meter data** output test for a **non half-hour metering installation** which is a **category 2 metering installation**, must do so by comparing the output of a **working standard** to the increment of the sum of the **meter** registers.
- (1A) If an **ATH** performs a **raw meter data** output test under subclause (1)(c) or subclause (1)(d), for a **metering installation** that will be **certified** for remote **meter** reading, the **ATH** must—
- (a) obtain the **raw meter data** from the **back office** system where the **raw meter data** is held; or
  - (b) ensure that the **metering equipment provider** responsible for the **metering installation** has a process to validate a **meter** reading taken at the time of the **metering installation certification** with a **meter** reading from the **metering equipment provider's back office** system.
- (2) If an **ATH** performs a test under subclause (1) that requires a comparison between 2 quantities, the **ATH** must not **certify** the **metering installation** unless the **metering installation** passes the test.
- (3) For the purposes of subclause (2), a **metering installation** passes if the test demonstrates that the difference between the 2 quantities is within the applicable accuracy tolerances set out in Table 1 of Schedule 10.1.
- Clause 9(1): amended, on 1 February 2021, by clause 27(a) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.
- Clause 9(1): amended, on 29 August 2013, by clause 32(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).
- Clause 9(1)(c): replaced, on 1 February 2021, by clause 27(b) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.
- Clause 9(1)(c)(i) and (ii): inserted, on 29 August 2013, by clause 32(2) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).
- Clause 9(1)(d)(ii): replaced, on 1 February 2021, by clause 27(c) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.
- Clause 9(1A): inserted, on 29 August 2013, by clause 32(3) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

## 10 Test results

- (1) An **ATH** must, before it **certifies a metering installation** or any of a **metering installation's metering components**, review the relevant test results for each of the **metering installation's metering components** to ensure that—
  - (a) the **metering component** passed all the tests; and
  - (b) the **metering installation** meets the requirements for **certification**.
- (2) If the **ATH** considers that the test results show that the requirements in this Part for **certification** of the **metering installation** are not met, it must—
  - (a) within 5 **business days** of reviewing the tests, advise the relevant **metering equipment provider** providing detailed reasons; and
  - (b) not **certify the metering installation**.

#### **11 Selected component certification of metering installation**

- (1) This clause applies only when an **ATH** uses the **selected component certification** method.
- (2) An **ATH** may use the **selected component certification** method to **certify a metering installation** only for the categories of **metering installation** for which the stated requirements are set out in Table 1 of Schedule 10.1.
- (3) An **ATH** must only use the **selected component certification** method to **certify a metering installation**—
  - (a) by carrying out the tests set out in Table 3 of Schedule 10.1; and
  - (b) if an **ATH** or an **approved test laboratory** or an **approved calibration laboratory** has **calibrated** each of the following **metering components** in the **metering installation** in accordance with clause 1(1)(a)(ii) or 1(1)(b) of Schedule 10.8:
    - (i) **meter**;
    - (ii) **measuring transformer**; and
  - (c) if each **data storage device** in the **metering installation** has been **certified** in accordance with clause 5 of Schedule 10.8.
- (4) An **ATH** must, before it uses the **selected component certification** method,—
  - (a) check the design report of the **metering installation** to—
    - (i) confirm the **metering installation** functions in accordance with the design report; and
    - (ii) ensure the **metering installation** complies with this Part; and
  - (b) ensure that each **metering component** in the **metering installation** is used only in a permitted combination as set out in Table 1 of Schedule 10.1; and
  - (c) check and confirm that the **metering installation** is correctly wired in accordance with all applicable requirements and enactments; and
  - (d) ensure that each **metering component** in the **metering installation** is fit for purpose.
- (5) An **ATH** must, when it **certifies a metering installation** under this clause, ensure that the **metering installation certification report** includes confirmation that the **ATH** has—
  - (a) checked the design report of the **metering installation** to—
    - (i) confirm the **metering installation** functions in accordance with the design

- report; and
- (ii) ensure the **metering installation** complies with this Part; and
- (b) ensured that each **metering component** in the **metering installation** has been **calibrated** and **certified** as required in this Part; and
  - (c) ensured that the **metering installation** has passed the relevant tests and checks set out in Table 3 of Schedule 10.1; and
  - (d) checked and confirmed that the **metering installation** is correctly wired in accordance with all applicable requirements and enactments; and
  - (e) carried out any tests and checks required to confirm the integrity of the **metering installation** and recorded these and their results in the **metering installation certification report**.
- (6) An **ATH** must, when it **certifies a metering installation** under this clause, include in the **metering installation certification report**—
- (a) any **compensation factors** that must be applied; and
  - (b) how the **compensation factors** must be applied under clause 2 of Schedule 15.3.

Clause 11(3)(b): substituted, on 29 August 2013, by clause 33(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 11(3)(b): amended, on 15 May 2014, by clause 18 of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

Clause 11(3)(c): inserted, on 29 August 2013, by clause 33(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 11(5)(e): amended, on 29 August 2013, by clause 33(2) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

## 12 Comparative recertification

- (1) This clause only applies when an **ATH** uses the **comparative recertification** method.
- (1A) The **comparative recertification** method may only be used to recertify a **category 2 metering installation**.
- (2) An **ATH** may only use the **comparative recertification** method to **recertify a category 2 metering installation** in accordance with this Part if—
- (a) the **certification** of the current transformers in the **metering installation** expires before the **meter certification** expiry date; and
  - (b) each of the following **metering components** in the **metering installation** is **certified** at the date of **recertification** in accordance with Schedule 10.8:
    - (i) **data storage device**;
    - (ii) **meter**.
- (2A) For the avoidance of doubt, an **ATH** may use the **comparative recertification** method to **recertify a category 2 metering installation** in accordance with this Part if the **certification** of the current transformers in the **metering installation** has expired.
- (3) An **ATH** must, when **recertifying a category 2 metering installation** under this clause, ensure that—
- (a) the **metering installation** has passed the tests set out in Table 3 of Schedule 10.1, using a **working standard** connected to the **metering installation**; and
  - (b) the current measurement sensor connected around the cables or bus-bars adjacent to the **metering installation** is sufficiently accurate so that the sum of the measured **metering installation** accuracy, the **uncertainty** of the **metering**

- installation**, and the **uncertainty** of the current measurement sensor does not exceed the maximum permitted error set out in Table 1 of Schedule 10.1 for the category of the **metering installation**; and
- (c) the overall **metering installation** accuracy meets the requirements of Table 1 of Schedule 10.1.
- (4) An **ATH** must, before it uses the **comparative recertification** method—
- (a) check the design report of the **metering installation** to—
- (i) confirm the **metering installation** functions in accordance with the design report; and
- (ii) ensure the **metering installation** complies with this Part; and
- (b) check and confirm that the **metering installation** is correctly wired in accordance with all applicable requirements and enactments; and
- (c) carry out any tests and checks required to confirm the integrity of the **metering installation** and record these and their results in the **metering installation certification report**.
- (5) An **ATH** must, for each **metering installation** it **certifies** under this clause,—
- (a) prepare a **certification report**; and
- (b) ensure that each **metering component** in the **metering installation** is fit for purpose.

Clause 12(1A): inserted, on 1 February 2021, by clause 28(a) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 12(2)(b): amended, on 1 February 2021, by clause 28(b) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 12(2A): inserted, on 1 February 2021, by clause 28(c) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

### 13 Fully calibrated metering installation certification

- (1) This clause only applies when an **ATH** uses the **fully calibrated certification** method.
- (2) An **ATH** may only use the **fully calibrated certification** method to **certify** a **category 1 metering installation**, or higher category of **metering installation**.
- (3) An **ATH** must use the **fully calibrated certification** method to **certify** a **metering installation**—
- (a) by carrying out the tests set out in Table 4 of Schedule 10.1; and
- (b) only if each of the following **metering components** in the **metering installation** has been **certified** in accordance with Schedule 10.8:
- (i) **data storage device**;
- (ii) **meter**;
- (iii) **measuring transformer**.
- (4) An **ATH** must ensure that each **metering component** in a **metering installation** which is **certified** under this clause has a current **certification report** that—
- (a) complies with the requirements of this Part; and
- (b) if the **metering component** is a **calibrated metering component**, includes a **calibration report** that—
- (i) confirms that the **metering component** complies with the requirements of its accuracy class set out in Table 1 of Schedule 10.1; and
- (ii) includes the **certification** date of the **metering component**.

- (5) An **ATH** must, when preparing a **metering installation certification report** under this clause, include confirmation that the **ATH** has—
- (a) checked the design report of the **metering installation** to—
    - (i) confirm the **metering installation** functions in accordance with the design report; and
    - (ii) ensure the **metering installation** complies with this Part; and
  - (b) ensured that each **metering component** in the **metering installation** has been **calibrated** and **certified** as required in this Part; and
  - (c) ensured that the relevant tests and checks set out in Table 4 of Schedule 10.1 have been passed; and
  - (d) checked and confirmed that the **metering installation** is correctly wired in accordance with all applicable requirements and enactments; and
  - (e) carried out any tests and checks required to confirm the integrity of the **metering installation**.
- (6) An **ATH** must, when it **certifies** a **metering installation** under this clause, include in the **metering installation certification report**—
- (a) any **compensation factors** that must be applied; and
  - (b) how the **compensation factors** must be applied under clause 2 of Schedule 15.3.
- (7) An **ATH** must, before it **certifies** a **metering installation** under this clause, ensure that the **ATH** uses the manufacturer's **meter** class accuracy, and not the **meter's** actual tested accuracy, to determine whether the **metering installation** is within the relevant maximum permitted error set out in Table 1 of Schedule 10.1.

#### 14 **Insufficient load for metering installation certification tests**

- (1) This clause only applies if there is insufficient **electricity** conveyed through a **point of connection** to allow an **ATH** to complete a prevailing load test for a **metering installation** that is being **certified** as a **half-hour metering installation**.
- (2) When this clause applies, the **ATH** must, when **certifying** the **metering installation**, ensure that—
- (a) it performs an additional integrity check of the **metering installation** wiring, and records the results of this check in the **certification report**; and
  - (b) it records in the **certification report** that the **metering installation** is **certified** under this clause.
- (3) A **metering equipment provider** must, for each **metering installation** for which it is responsible, and that is **certified** under this clause, obtain and monitor **raw meter data** from the **metering installation** at least once each month during the period of **certification** to determine if load during the month is sufficient for a prevailing load test to be completed.
- (4) Despite subclause (1), the **metering equipment provider** must, if **raw meter data** obtained under subclause (3) demonstrates, at any time, that there is sufficient **electricity** conveyed through the **point of connection** for a prevailing load test to be completed, ensure that the **certifying ATH** makes a subsequent visit to the **metering installation** as soon as practicable, but no later than 20 **business days** after the **metering equipment provider** has obtained the **raw meter data**, to carry out and

complete the tests set out in Table 4 of Schedule 10.1.

- (5) The **certifying ATH** must, if the tests referred to in subclause (4) demonstrate that the **metering installation** performs within the relevant maximum permitted error set out in Table 1 of Schedule 10.1,—
- (a) update the **metering installation certification report**, within 5 **business days** of completing the tests, to include the results of the tests carried out; and
  - (b) leave the original **metering installation certification** expiry date unchanged.
- (6) If the tests referred to in subclause (4) demonstrate that the **metering installation** does not perform within the relevant maximum permitted error set out in Table 1 of Schedule 10.1—
- (a) the **metering installation certification** is automatically cancelled from the date of the tests; and
  - (b) the **certifying ATH** must advise the **metering equipment provider** of the cancellation within 1 **business day** of carrying out the tests; and
  - (c) the **metering equipment provider** must follow the procedure set out in clauses 10.43 to 10.48.

Clause 14(1): amended, on 29 August 2013, by clause 34 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 14(3): amended, on 5 October 2017, by clause 187 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 15 Recertification programme

- (1) A **metering equipment provider** must have a **recertification** programme for all **metering installations** for which it is responsible to ensure that each **metering installation** is **recertified** prior to the expiry date of its then current **certification** if the **metering installation** is not **decommissioned**.
- (2) Subclause (1) does not apply to an **electrically disconnected metering installation** for an **ICP**.

Clause 15(2): amended, on 5 October 2017, by clause 188 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### *Statistical sampling recertification*

## 16 Recertification of group of category 1 metering installations by statistical sampling

- (1) A **metering equipment provider** may arrange for an **ATH** to **recertify** a group of **category 1 metering installations** for which the **metering equipment provider** is responsible using a statistical sampling process set out in subclause (2).
- (2) To **recertify** a group of **category 1 metering installations**, an **ATH** must—
- (a) select a sample from the group, using a statistical sampling process—
    - (i) prescribed in AS/NZS 1284.13:2002; or
    - (ii) that is approved and **published** by the **Authority**; and
  - (aa) use the pass/fail criteria in AS/NZS 1284.13:2002 to evaluate whether the group meets the **recertification** requirements of this Part; and
  - (ab) if the group meets the **recertification** requirements of this Part use the appropriate maximum validity period set out in Table 5 of AS/NZS 1284.13:2002 as the **certification** validity period for each **metering installation** in the group, except

- that if a class 1 static (electronic) **meter** sample is within the accuracy tolerance of  $\pm 1.5\%$ , the appropriate maximum validity period for that group is 7 years; and
- (b) **recertify** each **metering component** in the **metering installation** in the sample using—
    - (i) the **fully calibrated certification** method; or
    - (ii) the **selected component certification** method; and
  - (c) advise the **metering equipment provider** as soon as reasonably practicable, if the group—
    - (i) meets the **recertification** requirements of this Part; or
    - (ii) fails to meet the **recertification** requirements of this Part.
- (3) An **ATH** must, when selecting a sample from the group under subclause (2)(a),—
- (a) document the process it follows and any assumptions it makes; and
  - (b) keep records in accordance with clause 13 of Schedule 10.4, of—
    - (i) each step in the process; and
    - (ii) each **metering installation** in the sample; and
    - (iii) each **metering installation** in the group that is **recertified** using this process.
- (4) The **recertification** of a **metering installation** in the group—
- (a) commences from the date of the advice referred to in subclause (2)(c)(i) if the sample meets the **recertification** requirements of this Part;
  - (b) is automatically cancelled from the date of the advice referred to in subclause (2)(c)(ii) if the sample fails to meet the **recertification** requirements of this Part.
- (5) The **metering equipment provider** must, upon being advised under subclause (2)(c), update the **registry** in accordance with Part 11.
- (6) Despite clause 41(1), an **ATH** who **recertifies** a group of **metering installations** using a statistical sampling process is not required to apply a **certification sticker** to a **metering installation** in the group that was not part of the sample.

Clause 16(2)(a)(i): amended, on 29 August 2013, by clause 35(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 16(2)(aa): inserted, on 29 August 2013, by clause 35(3) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 16(2)(ab): inserted, on 1 February 2021, by clause 29 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 16(2)(b): substituted, on 29 August 2013, by clause 35(4) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 16(2)(c): amended, on 29 August 2013, by clause 35(5) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 16(2)(a)(i), (aa) and (ab): amended, on 1 March 2024, by clause 42(1) and (2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

### *Certification validity periods*

## **17 Determination of expiry dates for certification of metering components and metering installations**

- (1) An **ATH** must, when **certifying a metering installation**,—
- (a) determine, in accordance with this clause, the date on which the **metering installation's certification** will expire; and
  - (b) record the expiry date in the **metering installation certification report**.

- (2) The expiry date for a **metering installation's certification** is the earliest of—
- (a) the date falling after the date of its **commissioning** by the number of months equivalent to the maximum **metering installation certification** validity period for the relevant category of **metering installation**, as set out in Table 1 of Schedule 10.1; and
  - (b) the earliest **certification** expiry date of a **metering component** in the **metering installation**; and
  - (c) a date determined by the **ATH** taking into account—
    - (i) the condition of each **metering component** in the **metering installation**; and
    - (ii) all relevant circumstances relating to the **metering installation**.
- (3) Despite subclause (2), the expiry date for each **metering installation** in a group of **metering installations recertified** under clause 16, that does not form a part of the sample, is the earliest expiry date of the **metering installations** in the sample.

### 18 Interim certified metering installations

A **metering equipment provider** must ensure that each **interim certified metering installation** on 28 August 2013 is **certified** under this Part by no later than 1 April 2015.

Clause 18: amended, on 29 August 2013, by clause 36 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

### 19 Modification of metering installations

- (1) If a **metering installation** is modified, the **certification** of the **metering installation** is automatically cancelled with effect from—
- (a) the date the modification began; or
  - (b) if the **metering equipment provider** responsible for the **metering installation** does not know the date in subclause (a), the date on which the **metering equipment provider** became aware of, or would reasonably have been expected to have become aware of, the modification.
- (2) For the purposes of this Part, a modification of a **metering installation** includes, any 1 or more of the following:
- (a) any change to the **software**, ROM, or firmware in the **metering installation** that may affect the operation of the **metrology layer** unless the change is made under subclause (3):
  - (b) replacement, installation, removal, repair, or modification, of a **metering component** in the **metering installation**, other than the temporary connection of testing or monitoring equipment by using a **test facility**:
  - (ba) replacing a **metering installation** with a new **metering installation**:
  - (c) any change to the burdening of a **measuring transformer** in the **metering installation**, unless changed under clause 31(6):
  - (d) reconfiguration of any wiring (but not straight replacement of wiring in a **category 1 metering installation**):
  - (e) relocation of a **metering component** in the **metering installation** or the **metering installation** enclosure:

- (f) any interference with the **metering installation** that affects the accuracy of the **metering installation**.
- (2A) For the purposes of subclause (1), and despite subclause (2), a modification of a **metering installation** does not include the replacement of a modem in the **metering installation** by the **ATH** that is responsible for **certifying the metering installation**.
- (2B) To avoid doubt, replacing a **metering component** or a **metering installation** is a modification of a **metering installation** under subclause (2) including when—
  - (a) the replacement **metering component** or **metering installation** has the same or similar design and functionality as the existing **metering component** or **metering installation**; or
  - (b) the **metering equipment provider** did not need to consult with a **distributor** or **trader** because clause 10.34(2C) applied.
- (3) Despite subclauses (1) and (2)(a), the **certification** of a **metering installation** is not cancelled if—
  - (a) an **approved test laboratory** has tested and confirmed under clause 39 that the integrity of the measurement and logging of a **data storage device** in the **metering installation** would be unaffected by the change; and
  - (b) the change does not, or would not be considered by the **ATH** who most recently **certified the metering installation** to, affect—
    - (i) the accuracy of the **raw meter data** obtained from the **metering installation**; or
    - (ii) the accuracy of the **metrology layer** of the **metering installation**; or
    - (iii) a **compensation factor** programmed into any **metering component** in the **metering installation**; and
  - (c) the **ATH** who most recently **certified the metering installation** approves, in advance, the process of changing the **software**, ROM, or firmware in the **metering installation**; and
  - (d) the change is carried out in accordance with a documented methodology that has been **audited** under this Part; and
  - (e) the **metering equipment provider** responsible for the **metering installation** records in the **metering records** the details of the change, including the time and date; and
  - (f) any change of the **metering installation's** parameters does not affect the **metrology layer**; and
  - (g) *[Revoked]*
  - (h) clause 8A(1) applies.
- (3A) Despite subclauses (1) and (2)(b), the **certification** of a **metering installation** is not cancelled if—
  - (aa) a **control device** that does not switch **meter** registers has malfunctioned and been replaced with a **certified control device**; and
  - (a) the replacement **control device** has the same characteristics as the **control device** it replaces and—
    - (i) is **certified** in accordance with this Part; and

- (ii) will not adversely affect the operation of any other **metering components** or connections to those **metering components**; and
  - (iii) is likely to receive control signals, as required by clause 34; and
  - (iv) is correctly connected and programmed; and
- (b) the **metering equipment provider** responsible for the **metering installation** has in place—
  - (i) an appropriate agreement with the **approved test house** that is responsible for the **certification** of the **metering installation**, to record the replacement in its **metering installation certification** records; and
  - (ii) appropriate procedures for ensuring that replacements are carried out only by persons authorised by the **metering equipment provider**; and
- (c) the **metering equipment provider** updates—
  - (i) the **metering records** with the details of the replacement, including the date; and
  - (ii) the **registry metering records**.
- (3B) In setting a procedure under subclause (3A)(b)(ii), a **metering equipment provider** must ensure that, within 10 **business days** of the replacement occurring, the person carrying out the replacement provides the notice and **metering records** for the replaced **control device** and the replacement **control device** to—
  - (a) the **metering equipment provider**; and
  - (b) the **approved test house** that is responsible for the **certification** of the **metering installation**.
- (3C) Despite subclauses (1) and (2)(b), the **certification** of a **metering installation** is not cancelled, if clause 48(1A) to (1H) applies.
- (4) Despite subclause (2)(e), the **certification** of a **metering installation** continues if—
  - (a) there is a minor repositioning of 1 of the following in a **category 1 metering installation** which does not involve disconnection of wiring:
    - (i) the **meter** in the existing **metering installation** enclosure; or
    - (ii) the existing **metering installation** enclosure; or
  - (b) the relocation does not cause, directly or indirectly, the **metering installation** to be—
    - (i) outside the applicable accuracy tolerances set out in Table 1 of Schedule 10.1; or
    - (ii) defective; or
    - (iii) not fit for purpose.
- (5) *[Revoked]*.
- (6) *[Revoked]*
- (7) *[Revoked]*.

Clause 19(2): amended, on 1 February 2021, by clause 30(a) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 19(2)(b): amended, on 1 February 2021, by clause 30(b) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 19(2)(ba): inserted, on 1 February 2021, by clause 30(c) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 19(2A): inserted, on 29 August 2013, by clause 37(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 19(2B): inserted, on 1 February 2021, by clause 30(d) of the Electricity Industry Participation Code

Amendment (Metering and Related Registry Processes) 2020.

Clause 19(3)(f): amended, on 29 August 2013, by clause 37(2) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 19(3)(f): amended, on 1 February 2016, by clause 32(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 19(3)(f): amended, on 13 October 2018, by clause 5(1) of the Electricity Industry Participation Code Amendment (Amendments to Certification Reports) 2018.

Clause 19(3)(g): revoked, on 1 February 2016, by clause 32(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 19(3)(g): inserted, on 29 August 2013, by clause 37(3) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 19(3)(h): inserted, on 13 October 2018, by clause 5(2) of the Electricity Industry Participation Code Amendment (Amendments to Certification Reports) 2018.

Clause 19(3A): amended, on 1 February 2016, by clause 32(3)(a) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 19(3A)(aa): inserted, on 1 February 2016, by clause 32(3)(b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 19(3A) and 19(3B): inserted, on 29 August 2013, by clause 37(3) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 19(3B): amended, on 1 November 2018, by clause 31(a), (b) and (c) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 19(3C): inserted, on 1 February 2021, by clause 30(e) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 19(5), (6) & (7): revoked, on 20 December 2021, by clause 32 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

## **20 Cancellation of certification of metering installations**

- (1) The **certification of a metering installation** is automatically cancelled on the date on which any 1 of the following events takes place:
- (a) the **metering installation** is modified otherwise than under clause 19(3), 19(3A), or 19(3C);
  - (b) the **metering installation** is classed as outside the applicable accuracy tolerances set out in Table 1 of Schedule 10.1, defective, or not fit for purpose under—
    - (i) this Part; or
    - (ii) any **audit**;
  - (c) an **ATH** advises the **metering equipment provider** responsible for the **metering installation** of—
    - (i) a **reference standard** or **working standard** used to **certify the metering installation** not being compliant with this Part when it was used to **certify the metering installation**; or
    - (ii) the failure of a group of **meters** in the statistical sampling **recertification** process for the **metering installation**; or
    - (iii) the failure of a **certification** test for the **metering installation**;
  - (d) the manufacturer of a **metering component** in the **metering installation** determines that the **metering component** does not comply with the standards to which the **metering component** was tested;
  - (e) an inspection of the **metering installation**, that is required under this Part, is not carried out in accordance with the relevant clauses of this Part;
  - (f) if under clause 6(2) the **metering installation** has been determined to be a lower category, and:
    - (i) the **metering equipment provider** has not received, in any month, the report referred to in clause 6(2A)(a); or

- (ii) the report referred to in clause 6(2A)(a) demonstrates that the maximum current conveyed through the **metering installation**, at any time during the previous month, exceeded the maximum permitted current for the **metering installation** category as **certified**; or
  - (iii) the **metering equipment provider** has not received, in any month, the report referred to in clause 6(2A)(b); or
  - (iv) the report referred to in clause 6(2A)(b) identifies that the **electricity** conveyed through the **point of connection** exceeded 0.5 GWh during the previous 12 month period:
- (g) the **metering installation**—
- (i) is **certified** under clause 14 and sufficient load is available for full **certification** testing; and
  - (ii) has not been retested under clause 14(4):
- (h) a **control device** in the **metering installation certification** is, and remains for a period of at least 10 **business days**, bridged out under clause 35(1):
- (i) the **metering equipment provider** responsible for the **metering installation** is advised by an **ATH** under clause 48(6)(b) that a seal has been removed or broken and the accuracy and continued integrity of the **metering installation** has been affected.
- (j) the **metering installation** is a **half-hour metering installation** and was **certified** after 29 August 2013, the **service access interface** is the **metering equipment provider's back office**, and the **metering equipment provider**—
- (i) fails to comply with clause 8(2)(b) of Schedule 10.6; or
  - (ii) fails to comply with clause 8(9) of Schedule 10.6; or
  - (iii) performs the comparison in clause 8(9) of Schedule 10.6 but—
    - (A) the difference between the sum of the **half hour metering raw meter data** and the increment of the **metering installation's** accumulating **meter** registers is greater than 1kWh; and
    - (B) the **metering equipment provider** has failed to remediate the issue causing the difference and provide the correct data within three **business days**.
- (2) A **metering equipment provider** must, within 10 **business days** of becoming aware that 1 of the events in subclause (1) has occurred in relation to a **metering installation** for which it is responsible—
- (a) update the **metering installation's certification** expiry date in the **registry**; and
  - (b) if any one of the events in subclause (1)(j) has occurred, update the **metering installation's** AMI flag to “N” in the registry.

- (3) The obligations in subclause (2) do not apply if the **metering installation** is **recertified** within the 10 **business days** specified in subclause (2).

Clause 20(1): amended, on 1 February 2016, by clause 33(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 20(1)(a): amended, on 1 February 2016, by clause 33(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 20(1)(a): amended, on 1 February 2021, by clause 31(1)(a) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 20(1)(f): inserted, on 1 February 2021, by clause 31(1)(b) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 20(1)(j): inserted, on 1 February 2021, by clause 31(2) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 20(2): replaced, on 1 February 2021, by clause 31(3) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 20(3): inserted, on 1 February 2021, by clause 31(3) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

### *Accuracy and error calculation*

## **21 Metering installation accuracy**

An **ATH** must not **certify a metering installation** if the **metering installation** exceeds the maximum permitted error for the relevant **metering installation** category set out in Table 1 of Schedule 10.1, after the application of any external **compensation factors**.

## **22 Error Calculation**

- (1) An **ATH** must, before it **certifies a metering installation** under clauses 12 or 13, calculate the error of the **metering installation** in accordance with the following:
  - (a) the **ATH** must calculate the percentage error of the **metering installation** using appropriate mathematical methods, taking account of—
    - (i) all sources of measurement error; and
    - (ii) the estimated total quantity of **electricity** to be conveyed through the **metering installation** over the next 12 months; and
  - (b) the error calculation must include **uncertainty** in measurement; and
  - (c) for the purposes of paragraph (b), the **ATH** must calculate **uncertainty** at a 95% level of confidence and in compliance with JCGM 100:2008.
- (2) The **ATH** must not **certify the metering installation** if—
  - (a) the **uncertainty** for the **metering installation** is greater than the relevant maximum site **uncertainty** set out in Table 1 of Schedule 10.1; and
  - (b) the sum of the measured error and the **uncertainty** of the **metering installation** is greater than the relevant maximum permitted error set out in Table 1 of Schedule 10.1.
- (3) The **ATH** must record the calculation under subclause (1)(a) in the **metering installation certification report**.

## **23 Time keeping requirements**

A **metering equipment provider** must, if a time keeping device that is not remotely monitored and corrected controls the switching of a **meter** register in a **metering installation** for which it is responsible, ensure that the time keeping device—

- (a) has a time keeping error of not greater than an average of 2 seconds per day over a period of 12 months; and
- (b) is monitored and corrected at least once every 12 months.

## **24 Compensation factors**

- (1) An **ATH** must, before it **certifies a metering installation** that requires a **compensation factor**—
  - (a) advise the **metering equipment provider** responsible for the **metering**

- installation of the compensation factor; and**
- (b) ensure that the **compensation factor**, whether internally or externally applied, is only applied as follows:
- (i) for **ratio compensation**, on a **category 1 metering installation**, or higher category of **metering installation**; or
  - (ii) for **error compensation**, on a **metering installation** that quantifies **electricity** conveyed through a **point of connection** to the **grid**; or
  - (iii) for **loss compensation**, only on a category 3 or higher **metering installation**.
- (2) An **ATH** must, when it prepares a **certification report** for a **metering installation** that requires a **compensation factor**, record the methodology, assumptions, measurements, calculation, and details of—
- (a) each **compensation factor** that is included within the internal configuration of the **metering installation**; and
  - (b) each **compensation factor** that must be applied to the **raw meter data**.
- (3) A **metering equipment provider** must, for a **metering installation** in relation to which an external **compensation factor** must be applied,—
- (a) if the **metering installation** is for a **point of connection** that is an **NSP**, advise the **reconciliation participant** responsible for the **metering installation** of the **compensation factor** within 10 **business days** of the date on which the **metering installation** is **certified**; or
  - (b) in all other cases, update the **compensation factor** recorded in the **registry** in accordance with Table 1 of Schedule 11.4.

Clause 24(1): amended, on 1 February 2021, by clause 32(a)(i) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 24(1)(b): amended, on 1 February 2021, by clause 31(a)(ii) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 24(3): amended, on 1 February 2021, by clause 31(b)(i) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 24(3)(b): amended, on 1 February 2021, by clause 31(b)(ii) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 24(3)(b): amended, on 5 October 2017, by clause 189 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### *Installation of metering components in metering installations*

## **25 Installation of metering components**

- (1) An **ATH** must, before it **certifies** a **metering installation**, ensure that installation of—
- (a) **measuring transformers**, and associated burden if required, **test facilities**, potential fuses, and switchboard wiring, was carried out by—
    - (i) a suitably qualified person (for example by a switchboard manufacturer); or
    - (ii) an **ATH**; and
  - (b) each **metering component** in the **metering installation**, other than a **metering component** referred to in paragraph (a), is carried out by an **ATH**.
- (2) An **ATH** must, before it **certifies** a **metering installation**, ensure that each **metering component** in the **metering installation** has been installed in accordance with the design report under clause 2.

## 26 Requirements for metering installation incorporating meter

- (1) A **metering equipment provider** must ensure that each **meter** in a **metering installation** for which it is responsible is **certified** in accordance with this Part.
- (2) An **ATH** must, unless clause 43(2) applies, before it **certifies a metering installation** incorporating a **meter**, if the **meter** had previously been used in another **metering installation**, ensure that the **meter** has been **recalibrated** since it was removed from the previous **metering installation**, by—
  - (a) an **approved calibration laboratory**; or
  - (b) an **ATH**.
- (3) The **ATH** must, before it **certifies a metering installation** incorporating a **meter**, document in the **metering records**—
  - (a) any regular maintenance required for the **meter** in accordance with the manufacturer's recommendations; and
  - (b) any maintenance that has been carried out on the **meter** (for example battery monitoring and replacement).
- (4) An **ATH** must, before it **certifies a metering installation** incorporating a **meter**, record in the **metering installation certification report**, the maximum **interrogation** cycle for the **metering installation**.
- (5) The maximum **interrogation** cycle for a **metering installation** referred to in subclause (4) is the period of memory availability given the **meter** configuration.
- (6) Subclause (4) does not apply to a **metering installation** incorporating both a **meter** and a **data storage device** (see clause 36 of Schedule 10.7).

Clause 26(2): amended, on 1 February 2016, by clause 34(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 26(6): substituted, on 1 February 2016, by clause 34(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

## 27 Meter certification expiry date

- (1) An **ATH** must, before it **certifies a metering installation** incorporating a **meter**, determine the **meter certification** expiry date for each **meter** in the **metering installation** in accordance with this clause.
- (2) The **meter certification** expiry date must be the earliest end date of the following periods, calculated from the date of **commissioning** of the **metering installation**:
  - (a) the maximum **metering installation certification** validity period set out in Table 1 of Schedule 10.1 for the relevant category of **metering installation**; or
  - (b) [*Revoked*]
  - (c) the **certification** period specified in the **meter certification report**.
- (3) Despite subclause (2), the **meter certification** expiry date for a **meter** that has been **certified** and subsequently installed in, but then removed from, a **category 1 metering installation**, remains the **meter certification** expiry date determined for that **meter** when it was installed in the **category 1 metering installation**.
- (4) Despite subclauses (2) and (3), if **meter** is not installed in a **metering installation** within 24 months of the date of the **meter's certification report**, the **meter** must be **recertified** before it is installed.
- (5) The **ATH** must record the **certification** expiry date for each **meter** in a **metering installation** in—

- (a) the **metering installation certification report**; and
- (b) the **meter certification report**.

Clause 27(2)(b): revoked, on 1 February 2021, by clause 33(a) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 27(3): amended, on 29 August 2013, by clause 38 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 27(4): amended, on 1 February 2021, by clause 33(b) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

## **28 Requirements for metering installation incorporating measuring transformer**

- (1) A **metering equipment provider** must ensure that each **measuring transformer** in a **metering installation** for which it is responsible is **certified** in accordance with this Part.
- (2) An **ATH** must, before it **certifies** a **metering installation** which includes a **measuring transformer** that had previously been used in another **metering installation**, ensure that the **measuring transformer** has been **recalibrated**, since it was removed from the previous **metering installation**, by—
  - (a) an **approved calibration laboratory**; or
  - (b) an **ATH**.
- (3) The **ATH** must, before it **certifies** a **metering installation** incorporating a **measuring transformer**, document in the **metering records**—
  - (a) any regular maintenance required for the **measuring transformer** in accordance with the manufacturer's recommendations; and
  - (b) any maintenance that has been carried out on the **measuring transformer**.
- (4) An **ATH** must, before it **certifies** a **metering installation** incorporating a **measuring transformer**,—
  - (a) ensure that—
    - (i) the **measuring transformer** is connected to a **meter** through a **test facility** that has provision for isolation; and
    - (ia) the **test facility** and the provision for isolation are installed as physically close to the **meter** as practicable in the circumstances; and
    - (ii) the **test facility** has a transparent cover that is not obscured; and
  - (b) using the **fully calibrated certification** method or the **comparative recertification** method, ensure that the **ATH** calculates the maximum permitted error in accordance with clause 22; and
  - (c) carry out primary injection tests on the **measuring transformer** if it considers it is appropriate in the circumstances; and
  - (d) ensure that the **measuring transformer** is—
    - (i) mounted securely; and
    - (ii) if practicable, in an enclosure that is sealed in accordance with clause 47 against unauthorised access; and
  - (e) ensure that any voltage supply from a voltage transformer to a **meter**, or other equipment in the **metering installation**, is protected by appropriately rated fuses or **circuit breakers** dedicated to the supply; and
  - (f) ensure that all fuses and **circuit breakers** are sealed or located in sealed enclosures under clause 47; and

- (g) ensure that, if an enclosure also contains fuses or **circuit breakers** supplying other circuits, those supplying **metering** circuits are individually sealed; and
  - (h) ensure that if the **measuring transformer's** secondary circuit in the **metering installation** is earthed, it is earthed at no more than 1 point; and
  - (i) ensure that the total in-service burden (magnitude and phase angle, where appropriate) on the **measuring transformer** complies with clause 31.
    - (i) *[Revoked]*
    - (ii) *[Revoked]*.
- (5) Despite subclause (4)(d)(ii), if access to the enclosure is required by a person other than an employee or subcontractor of an **ATH**, the **ATH** may use alternative sealing arrangements (for example, terminal studs drilled so that sealing wire can be passed through the holes to secure the connections, or the use of sealing paint applied to terminal screws).

Clause 28(4)(a): substituted, on 29 August 2013, by clause 39 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 28(4)(b): replaced, on 1 February 2021, by clause 34(a) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 28(4)(i): amended, on 1 February 2021, by clause 34(b)(i) and (ii) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 28(4)(i)(i) and (ii): revoked, on 1 February 2021, by clause 34(b)(iii) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

## 29 Measuring transformer certification expiry date

- (1) An **ATH** must, before it **certifies** a **metering installation** incorporating a **measuring transformer**, determine the **measuring transformer certification** expiry date for each **measuring transformer** in the **metering installation** in accordance with this clause.
- (2) The **measuring transformer certification** expiry date must be no later than the last day of the **measuring transformer certification** validity period specified in the **measuring transformer certification report**, after the date of **commissioning**.
- (3) The **ATH** must record the **measuring transformer certification** expiry date for each **measuring transformer** in a **metering installation** in—
  - (a) the **certification report** for the **metering installation**; and
  - (b) the **certification report** for the **measuring transformer**.

## 30 Other equipment using measuring transformer

- (1) A **metering equipment provider** must not permit a **measuring transformer**, in a **metering installation** for which it is responsible, to be connected to equipment used at any time for a purpose other than **metering**, unless it is not practical for the equipment to have a separate **measuring transformer**.
- (2) An **ATH** must, before it **certifies** a **metering installation** incorporating a **measuring transformer** used by—
  - (a) another **metering installation**, ensure, where voltage transformers are connected to more than 1 **meter**, that—
    - (i) the **meters** are included in the **metering installation** being **certified**; and
    - (ii) appropriate fuses or **circuit breakers** are provided to protect the **metering** circuit from short circuits or overloads affecting the other **meter**:
  - (b) equipment referred to in subclause (1), ensure that—

- (i) the accuracy of the **metering installation** remains within the maximum permitted error for the relevant **metering installation** category set out in Table 1 of Schedule 10.1; and
- (ii) the **metering installation certification report** confirms that the accuracy of the **metering installation** remains within the maximum permitted error for the relevant **metering installation** set out in Table 1 of Schedule 10.1; and
- (iii) any wiring between the equipment and any part of the **metering installation** has no intermediate joints; and
- (iv) the equipment referred to in subclause (1) is labelled appropriately, including with any restrictions regarding being **electrically disconnected**; and
- (v) the connection details of the equipment referred to in subclause (1) are recorded in the **metering installation** design report; and
- (vi) appropriate fuses or **circuit breakers** are provided to protect the voltage transformer and **metering** circuit from short circuits or overloads affecting the other equipment; and
- (vii) the wiring referred to in subparagraph (iii) is **certified** as part of the **metering installation**.

(3) *[Revoked]*

Clause 30(2)(b)(iv): amended, on 5 October 2017, by clause 190 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 30(2)(b)(vi): amended, on 29 August 2013, by clause 40(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 30(2)(b)(vii): inserted, on 29 August 2013, by clause 40(2) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 30(3): revoked, on 29 August 2013, by clause 40(3) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

### 31 Measuring transformer burden and compensation requirements

- (1) An **ATH** may **certify** a **metering installation** for a **point of connection** to the **grid** that includes **error compensation** factors as an alternative to the use of burden resistors, only if the **ATH** is satisfied the **error compensation** factors will provide a more accurate result than the use of burden resistors.
- (2) A **metering equipment provider** must ensure that a change to, or addition of, a **measuring transformer** burden or **compensation factor** related to a **measuring transformer**, in a **metering installation** for which it is responsible, is only carried out by:
  - (a) the **ATH** who most recently **certified** the **metering installation**; or
  - (b) if the **metering installation** is for a **point of connection** to the **grid**, a suitably qualified person approved by both—
    - (i) the **metering equipment provider** responsible for the **metering installation**; and
    - (ii) the **ATH** who most recently **certified** the **metering installation**.
- (3) An **ATH** must, before it may add or change any burden or **compensation factor** detailed in the design report referred to in clause 2,—
  - (a) obtain the approval of the **metering equipment provider** responsible for the **metering installation**, which may be withheld in the **metering equipment**

- provider's** absolute discretion; and
- (b) if it obtains the approval referred to in paragraph (a), record in the **metering records** the reason for the proposed addition or change.
- (4) A **metering equipment provider** must, before it may approve the addition of, or change to, the burden or **compensation factor** of a **measuring transformer** in a **metering installation** for which it is responsible, consult with the **ATH** who carried out the most recent **certification** of the **metering installation**.
- (5) If the **metering equipment provider** approves the addition of, or change to, the burden or **compensation factor** under subclause (4), it must ensure that the **metering installation**, other than a **metering installation** for a **point of connection** to the **grid**, is **recertified** by an **ATH** for the addition of or change to the burden or **compensation factor** before the addition or change becomes effective.
- (6) Despite subclause (3)(a), an **ATH** may change the burden on a voltage transformer, without obtaining the approval of the **metering equipment provider**, if the **ATH** confirms in the **certification report** that the difference between the new burden and the burden at the time of the most recent **metering installation certification** is—
- (a) less than or equal to one thirtieth of the rating, in VA, of the voltage transformer if the voltage transformer is rated at less than 30 VA; or
- (b) no greater than 1 VA, if the voltage transformer is rated at equal to or greater than 30 VA.
- (7) An **ATH** must, before it **certifies a metering installation** incorporating a **measuring transformer**,—
- (a) ensure that the in-service burden (magnitude and phase angle, where appropriate) on the **measuring transformer** does not exceed the upper limit of the range specified for the **measuring transformer** if specified in the design report for the **metering installation**; and
- (b) ensure that the in-service burden on the **measuring transformer** is within the range specified in the **certification report** for the **measuring transformer** by installing burdening resistors to increase the in-service burden if necessary; or
- (c) confirm that—
- (i) if the primary voltage of the **measuring transformer** is greater than 1kV, a **class A ATH** has confirmed by **calibration** that the accuracy of the **measuring transformer** will not be adversely affected by the in-service burden being less than the lowest burden test point specified in the standard; or
- (ii) the **measuring transformer's** manufacturer has confirmed that the accuracy of the **measuring transformer** will not be adversely affected by the in-service burden being less than the lowest burden test point specified in the standard.

Clause 31(7): replaced, on 1 February 2021, by clause 35 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 31(7): substituted, on 29 August 2013, by clause 41 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 31(7)(b): amended, on 15 May 2014, by clause 19 of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

Clause 31(7)(b): substituted, on 19 December 2014, by clause 22 of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.

**32 Alternative certification requirements for metering installation incorporating measuring transformer**

- (1) An **ATH** may, if it cannot comply with the requirements of clause 2 of Schedule 10.8 due solely to its inability to obtain physical access to test an installed **measuring transformer** in a **metering installation**, **certify the metering installation** for a period not exceeding 24 months, if—
  - (a) the **measuring transformer** has not previously been **certified** under this clause; and
  - (b) the **ATH** is satisfied, having made due enquiry, that the **metering installation** will comply with the applicable accuracy requirements as set out in Table 1 of Schedule 10.1; and
  - (c) the **ATH** has advised the **metering equipment provider** responsible for the **metering installation** that this clause applies; and
  - (d) in the case of an **ICP** that is not an **NSP**, the **metering equipment provider** has updated the **metering installation's certification** in the **registry**.
- (2) The **metering equipment provider** must, if a **metering installation** for which it is responsible has been **certified** under subclause (1),—
  - (a) by no later than 10 **business days** after the date of **certification** of the **metering installation**, advise the **Authority** in the **prescribed form** of—
    - (i) all relevant details of the **metering installation**; and
    - (ii) the reason or reasons why the **ATH** could not obtain physical access to the **measuring transformer**; and
    - (iii) the reason or reasons why the accuracy of the **metering installation** cannot be outside of the applicable accuracy requirements set out in Table 1 of Schedule 10.1; and
    - (iv) the **metering installation certification** expiry date; and
  - (b) respond, within 5 **business days**, to any requests from the **Authority** for additional information; and
  - (c) ensure that all of the details are recorded in the **metering installation certification report**.
- (3) If an **ATH** **certifies** a **metering installation** under subclause (1), the **metering equipment provider** responsible for the **metering installation** must take all steps to ensure that the **metering installation** is **certified**, before the **metering installation certification** expiry date referred to in subclause (2)(a)(iv), in accordance with all other applicable requirements of this Part.
- (4) If the **Authority** subsequently determines that the **ATH** could have obtained physical access to test an installed **measuring transformer** in the **metering installation**, the **metering installation** is deemed to be defective and the **metering equipment provider** responsible for the **metering installation** must comply with clauses 10.43 to 10.48.

Clause 32(1)(d): amended, on 1 February 2021, by clause 36 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 32(1)(d), (2) and (4): amended, on 5 October 2017, by clause 191 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 33 Requirements for metering installation incorporating control device

- (1A) A **reconciliation participant** that is responsible for a **point of connection** must advise the **metering equipment provider** responsible for the **metering installation** at the **point of connection** if a **control device** in the **metering installation** is to be used by the **reconciliation participant** for any purpose under Part 15 to do either of the following:
- (a) control a load;
  - (b) switch **meter** registers.
- (1) A **reconciliation participant** must ensure that a **control device** is **certified** under this Part by an **ATH** before the **reconciliation participant** uses any **raw meter data** that depends on the operation of the **control device**, for any purpose under Part 15.
- (2) An **ATH** must, before it **certifies** a **metering installation** incorporating a **control device** that must be **certified** under subclause (1),—
- (a) determine the **control device certification** expiry date for each **control device** contained in the **metering installation** as being the same as the **metering installation certification** expiry date; and
  - (b) record the expiry date, for each **control device**, in the **metering installation certification report**; and
  - (c) if the **metering installation** contains a **control device** that had previously been used in another **metering installation**, ensure that the **control device** has been **certified** in accordance with Schedule 10.8 after it was removed from the other **metering installation**; and
  - (d) ensure that the **metering installation certification report** includes confirmation that—
    - (i) the **control device** complies with any applicable standards listed in Table 5 of Schedule 10.1; and
    - (ii) the **control device** is fit for purpose; and
  - (e) check that the **control device** is—
    - (i) likely to receive control signals, as required under clause 34; and
    - (ii) correctly connected; and
    - (iii) correctly programmed.

Clause 33(1A): inserted, on 29 August 2013, by clause 42(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 33(1): substituted, on 29 August 2013, by clause 42(2) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

### 34 Control device reliability requirements

- (1) An **ATH** must, before it **certifies** a **metering installation** incorporating a **control device** that is required to be **certified** under clause 33, determine, in consultation with the relevant **distributor** if appropriate, if the likelihood of the **control device** not receiving control signals would affect the accuracy or completeness of the information for the purposes of Part 15.
- (2) A control signal provider, if it is a **participant**, must respond in a timely manner to any

- requests from the **ATH** referred to in subclause (1).
- (3) The **ATH** must, if it determines under subclause (1) that the likelihood of the **control device** not receiving control signals would affect the accuracy or completeness of the information for the purposes of Part 15, advise the **metering equipment provider** responsible for the **metering installation** of its determination, including all relevant details, within 3 **business days** of making its determination.
- (4) If subclause (3) applies—
- (a) the **ATH** may **certify** the **metering installation** excluding the **control device**; and
- (b) the **ATH** must not **certify** the **control device**.
- (5) The **metering equipment provider** must, as soon as reasonably practicable, and at least within 3 **business days** after being advised under subclause (3), advise the following parties of the **ATH's** determination, including all relevant details:
- (a) the **reconciliation participant** for the **point of connection** for the **metering installation**; and
- (b) the control signal provider.

Clause 34(4)(a): substituted, on 29 August 2013, by clause 43 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

### **35 Control device bridged out**

- (1) A **participant** must, within 10 **business days** of bridging out a **control device**, or becoming aware of a **control device** being bridged out, advise the following persons:
- (a) the **reconciliation participant** for the **point of connection** for the **metering installation**; and
- (b) the **metering equipment provider** responsible for the **metering installation** incorporating the **control device**.
- (2) A **metering installation** incorporating a **control device** referred to in subclause (1) is defective for the purposes of clause 10.43 if it is used for the purposes of providing information for the purposes of Part 15.

### **36 Requirements for metering installation incorporating data storage device**

- (1) A **metering equipment provider** must ensure that each **data storage device** incorporated in a **metering installation** for which it is responsible, is **certified** in accordance with this Part.
- (2) An **ATH** must, before it **certifies** a **metering installation** incorporating a **data storage device** that had previously been used in another **metering installation**, ensure that the **data storage device** has been **recalibrated** since it was removed from the previous **metering installation**, by—
- (a) an **approved calibration laboratory**; or
- (b) an **approved test laboratory**; or
- (c) an **ATH**.
- (3) An **ATH** must, before it **certifies** a **metering installation** incorporating a **data storage device** (including a **metering installation** incorporating both a **meter** and a **data storage device**), record in the **metering installation certification report**, the maximum **interrogation** cycle for the **data storage device**.

- (4) The maximum **interrogation** cycle for each **services access interface** for a **metering installation** incorporating a **data storage device** is the shortest of the following periods:
- (a) the period of inherent data loss protection for the **metering installation**; and
  - (b) the period of memory availability given the **data storage device** configuration; and
  - (c) the longest period in which the accumulated drift of a **data storage device** clock is expected to remain in compliance with the maximum time error set out in Table 1 of clause 2 of Schedule 15.2 for the category of the **metering installation**.

Clause 36(3): amended, on 29 August 2013, by clause 44 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 36(3): amended, on 1 February 2016, by clause 35 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 36(4): amended, on 1 February 2021, by clause 37 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

### **37 Data storage device certification expiry date**

- (1) An **ATH** must, before it **certifies a metering installation** incorporating a **data storage device**—
- (a) determine, in accordance with this clause, the **data storage device certification expiry date** for each **data storage device** contained in the **metering installation**; and
  - (b) record the expiry date in the **metering installation certification report**.
- (2) The **data storage device certification expiry date** must—
- (a) for a **data storage device** that is integral to a **meter**, be no later than the **meter certification expiry date**; or
  - (b) for a **data storage device** that is not integral to a **meter**, be no later than the earlier of—
    - (i) the date falling the number of days equivalent to the **data storage device certification validity period** specified in the **data storage device certification report**, after the **commissioning date**; and
    - (ii) the **meter certification expiry date**.
- (3) The **ATH** must record the **data storage device certification expiry date** for a **data storage device** in a **metering installation** in—
- (a) the **certification report** for the **metering installation**; and
  - (b) the **certification report** for the **data storage device**.

### **38 Requirements for certification of metering installation incorporating data storage device**

- (1) An **ATH** must, before it **certifies a metering installation**, ensure that each **data storage device** in the **metering installation**—
- (a) is installed so that onsite **interrogation** is possible without the need to interfere with seals; and
  - (b) has a dedicated power supply unless the **data storage device** is integrated with another **metering component**.
- (2) An **ATH** must, before it **certifies a metering installation**,—

- (a) ensure that each **data storage device** in the **metering installation**—
    - (i) is compatible with each other **metering component** of the **metering installation**; and
    - (ii) is suitable for the electrical and environmental site conditions in which it is installed; and
    - (iii) has been **certified** under Schedule 10.8; and
    - (iv) has appropriate electrical separation between all of its outputs and inputs, and all of its outputs and inputs are rated for purpose; and (v) has no outputs that will interfere with the operation of the **metering installation**; and
    - (vi) records periods of data identifiable or deducible by both date and time on **interrogation**; and
  - (b) check and confirm in the **metering installation certification report** that each **data storage device** in the **metering installation**—
    - (i) has memory capacity and functionality that is suitable for the proposed functions of the **data storage device** specified in the design report for the **metering installation**; and
    - (ii) has availability of memory for a period that is suitable for the proposed functions as set out in the design report for the **metering installation**, and for a minimum continuous period of 15 days.
- (3) An **ATH** must, before it **certifies** a **metering installation** incorporating a **data storage device**, document in the **metering records**—
- (a) any regular maintenance required for the **data storage device** in accordance with the manufacturer's recommendations; and
  - (b) any maintenance that has been carried out on the **data storage device** (for example battery monitoring and replacement).

Heading: amended, on 1 February 2016, by clause 36 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 38(2)(a)(iv): replaced, on 5 October 2017, by clause 192 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### **39 Changes to data storage device software, ROM, or firmware**

- (1) A **metering equipment provider** must, if it proposes to change the **software**, ROM, or firmware of a **data storage device** installed in a **metering installation** for which it is responsible, ensure that, before the change is carried out, an **approved test laboratory**—
  - (a) tests and confirms that the integrity of the measurement and logging of the **data storage device** would be unaffected by the proposed change; and
  - (b) documents the methodology and conditions necessary to implement the proposed change; and
  - (c) advises the **ATH** that **certified** the **metering installation** of any change that would, or would be likely to, affect the accuracy of the **data storage device**.
- (2) A **metering equipment provider** must, when implementing a proposed change described in subclause (1),—
  - (a) carry out the change in accordance with the documented methodology and conditions referred to in subclause (1)(b); and

- (b) keep a list of **data storage devices** to which the change was made; and
- (c) update the **metering records** for each **metering installation** referred to in subclause (1) with details of the change and the methodology referred to in subclause (1)(b).

#### 40 **Communication equipment requirements**

A **metering equipment provider** must ensure that the use of its **communication equipment** complies with the compatibility and connection requirements of any communication network operator to whose communication network the **metering equipment provider** has **communication equipment** connected.

#### 41 **Certification stickers**

- (1) An **ATH** must, except as provided for in clause 16(6) and subclause (4), if it has **certified** a **metering installation** under this Part, confirm the **certification** by attaching a **metering installation certification sticker** as physically close as practicable to (including, if practicable, on) the **meter** while maintaining reasonable visibility of the **certification sticker** and the **meter**.
- (2) An **ATH** attaching a **metering installation certification sticker** must ensure that it shows—
  - (a) the name of the **ATH** who **certified** the **metering installation**; and
  - (b) the most recent **certification date** of the **metering installation**; and
  - (c) the **metering installation** category for which the **metering installation** has been **certified**; and
  - (d) the **ICP identifier** for the **metering installation**; and
  - (e) the **certification** number for the **metering installation**; and
  - (f) any other information that the **Authority** may, from time to time, specify by giving reasonable notice.
- (3) An **ATH** must, when **certifying** a **metering installation** that includes a **metering component** that does not have a **certification sticker** attached—
  - (a) obtain the **metering component certification sticker** required under clause 8 of Schedule 10.8; and
  - (b) attach it next to the **metering installation certification sticker**.
- (4) Despite subclauses (1) and (3)(b), the **ATH** must, if attaching a **metering installation certification sticker** as required under subclause (1) is not practicable,—
  - (a) devise and use an alternative means of documenting, providing, and maintaining information in a manner at least equivalent in its effect to that required under subclause (1); and
  - (b) keep any **metering component certification sticker** with the information referred to in paragraph (a).
- (5) If an **ATH** **certifies** a **metering component** of a **metering installation** on the same day that the **ATH** **certifies** the **metering installation**, the **ATH** may combine the **metering installation certification sticker** under subclause (1) with the **metering component certification sticker** under clause 8(1) of Schedule 10.8.
- (6) If an **ATH** combines a **metering installation certification sticker** with the **metering component certification sticker** under subclause (5), the **ATH** must—

- (a) ensure that the combined sticker shows all the information required by subclause (2) and clause 8(2) of Schedule 10.8; and
  - (b) meet the requirements of subclauses (1), (3) and (4), as if the combined sticker were a **metering installation certification sticker**.
- (7) The combined sticker under subclause (5) is immediately invalid if—
- (a) the **metering installation** certification expiry date changes; or
  - (b) a **metering component** to which the combined **certification sticker** relates is removed from the **metering installation**.
- (8) For the avoidance of doubt, the **certification** of any **metering component** that is not removed from the **metering installation** does not become invalid under subclause (7).
- (9) An **ATH** must, when attaching a **metering installation certification sticker** under subclause (1), remove or obscure any invalid or expired **certification stickers**.
- Clause 41(2)(f): amended, on 1 November 2018, by clause 32 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.  
Clause 41(5) to (9): inserted, on 1 February 2021, by clause 38 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

## 42 Enclosures

An **ATH** must, before it **certifies** a **metering installation**, ensure that, if a **metering component** in the **metering installation** is housed in a separate enclosure from the **meter** enclosure, the enclosure is—

- (a) appropriate to the environment in which it is located; and
- (b) has a warning label attached stating that the enclosure houses a **metering component**.

### *Certification of metering components*

## 43 Metering components must be certified

- (1) An **ATH** must, before it **certifies** a **metering installation**, ensure that each **metering component** that is required to be **certified** under this Part and which is in the **metering installation**—
- (a) is **certified** by an **ATH** in accordance with this Part; and
  - (b) since **certification**, has been appropriately stored and not used.
- (2) Despite subclause (1) and clause 26(2), an **ATH** may **certify** a **category 1 metering installation** that contains a **meter** which has been removed from another **category 1 metering installation** (the "previous **metering installation**") if the **ATH**—
- (a) is satisfied that external factors have not affected the accuracy of the **meter**; and
  - (b) has confirmed that it has been no more than 12 months since the **meter** was installed in the previous **metering installation**; and
  - (c) has confirmed that the **meter** was **calibrated** or **recalibrated** before being installed in the previous **metering installation** and after being removed from any other **metering installation** in which the **meter** was previously installed.

Clause 43(1): amended, on 1 February 2016, by clause 37(1) of the Electricity Industry Participation Code

Amendment (Code Review Programme) 2015.  
Clause 43(2): substituted, on 1 February 2016, by clause 37(2) of the Electricity Industry Participation Code  
Amendment (Code Review Programme) 2015.

*Inspection requirements*

**44 General inspection requirements**

- (1) An **ATH** must, when carrying out an inspection of a **metering installation**,—
  - (a) check and confirm that the **data storage device** in the **metering installation** operates in accordance with the requirements of this Part; and
  - (b) check and confirm that the expected remaining lifetime of each battery in the **metering installation** will be reasonably likely to meet or exceed the **metering installation certification** expiry date; and
  - (c) ensure that no modifications under clause 19 have been made to the **metering installation** without the change having been documented and **certification** requirements satisfied; and
  - (d) visually inspect all seals, enclosures, **metering components**, and wiring of the **metering installation** for evidence of damage, deterioration, or tampering; and
  - (e) ensure that the **metering installation** and its **metering components** carry appropriate **certification stickers** in accordance with clause 41; and
  - (f) in the case of a **category 1 metering installation** incorporating a **data storage device**, check and confirm there is no difference between the volume of **electricity** recorded by the master accumulation register of a **data storage device**, and the sum of the **meter** registers.
- (2) An **ATH** must, for each inspection of a **metering installation** that it carries out, prepare an inspection report that details—
  - (a) the checks that were carried out; and
  - (b) the results of the checks; and
  - (c) the **metering installation certification** expiry date; and
  - (d) the serial numbers of each **metering component** in the **metering installation**; and
  - (e) any instances of non-compliance with this Part, and the actions taken to remedy such a breach; and
  - (f) the name and signature of the person who carried out the inspection and the date on which it was signed.
- (3) The **ATH** must, within 10 **business days** of carrying out the inspection, provide the inspection report to the **metering equipment provider** who is responsible for the **metering installation**.
- (4) If an **ATH** has not performed an inspection of a **metering installation** within the specified timeframe under clauses 45(1) or 46(1), the **certification** of the **metering installation** is automatically cancelled on the date by which the **metering installation** was required to have been inspected.
- (5) A **metering equipment provider** must, within 20 **business days** of receiving the inspection report,—
  - (a) undertake a comparison of—

- (i) the information recorded under subclauses (2)(c) and (d); and
- (ii) the information in its own records; and
- (b) investigate and correct any discrepancies found under paragraph (a); and
- (c) update the **registry** with the relevant changes.

Clause 44(4): amended, on 20 December 2021, by clause 33 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 44(5)(c): amended, on 5 October 2017, by clause 193 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**45 Category 1 metering installation inspection requirements**

- (1) A **metering equipment provider** must ensure that—
  - (a) an **ATH** has completed an inspection of each **category 1 metering installation** for which the **metering equipment provider** is responsible within the period set out in Table 1 of Schedule 10.1, starting from the date of the **metering installation's** most recent **certification** or inspection; or
  - (b) if the **metering equipment provider** is responsible for any **category 1 metering installations** that were **certified** more than 84 months ago, the **metering equipment provider** inspects a sample of all **category 1 metering installations**.
- (1A) When inspecting a sample of **category 1 metering installations** under subclause (1)(b), the **metering equipment provider** must—
  - (a) complete the inspections each 12 month calendar year between 1 January and 31 December; and
  - (b) perform the first inspection in the same calendar year the oldest **metering installation** reaches 84 months since certification.
- (2) A **metering equipment provider** must, for the purposes of subclause (1)(b), select a sample by—
  - (a) producing a list of all **ICP identifiers** of each **category 1 metering installation** for which it is responsible; and
  - (b) removing from the list of **ICP identifiers**, any **ICP identifier** for a **metering installation** that has been **certified** or inspected in the 84 months prior to 31 December in the year in which the list was produced; and
  - (c) identifying the applicable required minimum sample size set out in Table 8 of Schedule 10.1, based on the number of **metering installations** identified in the list of **ICP identifiers** in produced in accordance with paragraphs (a) and (b); and
  - (d) randomly selecting a sample, of the size required under paragraph (c), from the list produced in accordance with paragraphs (a) and (b).
- (3) A **metering equipment provider** must, before it carries out inspections under subclause (1)(b),—
  - (a) submit a documented process for randomly selecting a sample to the **Authority** at least 2 months before the first date on which it proposes to carry out the inspections; and
  - (b) provide promptly any other information or documentation the **Authority** may reasonably request.
- (4) The **Authority** must, within 2 months of receiving the documented process under subclause (3), advise the **metering equipment provider** that the documented process—
  - (a) has been approved; or
  - (b) has not been approved, providing reasons.

- (5) A **metering equipment provider** must not inspect a sample under this clause unless the **Authority** has approved the documented process.
- (6) A **metering equipment provider** must, for each inspection of a **category 1 metering installation** conducted under subclause (1)(b), keep records that detail—
- (a) any defects identified that have affected the accuracy or integrity of the **raw meter data** recorded by the **metering installation**; and
  - (b) any discrepancies identified under clause 44(5)(b); and
  - (c) relevant characteristics, sufficient to enable reporting that identifies any correlations or relationships between inaccuracy and characteristics (for example the **meter** make, model, and **network** area, for each **metering installation**); and
  - (d) the procedure used, and the lists generated, to select a sample under subclause (2).
- (7) A **metering equipment provider** must, if it believes that a **metering installation** that an **ATH** has inspected under this clause is or could be outside the applicable accuracy tolerances set out in Table 1 of Schedule 10.1, defective, or not fit for purpose,—
- (a) comply with clause 10.43;
  - (b) arrange for an **ATH** to **recertify** the **metering installation** under this Schedule, if the **metering installation** is found to be—
    - (i) outside the applicable accuracy tolerances set out in Table 1 of Schedule 10.1; or
    - (ii) defective; or
    - (iii) not fit for purpose.
- (8) A **metering equipment provider** must, by 1 April in each year, provide to the **Authority** a report in the **prescribed form** that states whether the **metering equipment provider** has, for the previous 1 January to 31 December period, arranged for an **ATH** to inspect each **category 1 metering installation** for which it is responsible—
- (a) under subclause (1)(a), in which case the report must also include, for the period—
    - (i) a list showing the **ICP identifier** for each **ICP** which has a **metering installation** that was due for inspection, the dates by which the **metering installation** was due for inspection, and the date on which it was inspected; and
    - (ii) a summary of the instances of non-compliance of each **category 1 metering installation** inspected; and
    - (iii) the detailed records required under subclauses (6)(a) and (6)(b); or
  - (b) under subclause (1)(b), in which case the report must also include, for the period—
    - (i) the number of **metering installations** identified under subclause (2)(a) to (2)(c); and
    - (ii) a summary of the instances of non-compliance of each **category 1 metering installation** inspected; and
    - (iii) the detailed records required under subclauses (6)(a) and (6)(b).
- (9) The **Authority** may, if it considers that the report provided under subclause (8) indicates that there is a statistically significant number of **metering installations** in the sample which are outside the applicable accuracy tolerances set out in Table 1 of

Schedule 10.1, defective, or not fit for purpose, despite subclause (1)(b), advise the **metering equipment provider** that it must select another sample in accordance with subclause (2) and comply with the applicable requirements of this clause in respect of the sample.

- (10) The **metering equipment provider** must select the additional sample under subclause (9), carry out the required inspections and report to the **Authority** under subclause (8), within 40 **business days** of being advised by the **Authority** under subclause (9).

Clause 45(1)(a) and (b): replaced, on 1 February 2021, by clause 39(1) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 45(1A): inserted, on 1 February 2021, by clause 39(2) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 45(2)(a): amended, on 1 February 2021, by clause 39(3)(a) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 45(2)(b): amended, on 1 February 2016, by clause 38(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 45(2)(b): replaced, on 1 February 2021, by clause 39(3)(b) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 45(2)(c): amended, on 1 February 2016, by clause 38(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 45(2)(d): amended, on 1 February 2016, by clause 38(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 45(10): amended, on 29 August 2013, by clause 45 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

#### 46 **Category 2 metering installation or higher category of metering installation inspection requirements**

- (1) A **metering equipment provider** must ensure that each **category 2 metering installation**, or higher category of **metering installation**, for which it is responsible is inspected by an **ATH** at least once within the applicable period set out in Table 1 of Schedule 10.1 starting from the date of the **metering installation's** most recent **certification**.
- (2) An **ATH** must, when conducting an inspection of a **category 2 metering installation**, or higher category of **metering installation**, and in addition to complying with clause 44, conduct the following checks:
- (a) a visual inspection of each **metering component** in the **metering installation** for damage, tampering, or defect; and
  - (b) if the current transformer can be safely accessed, check the position of the current transformer tap to ensure it is still appropriate for the expected maximum current for the **metering installation**; and
  - (c) check for the presence of appropriate voltages at the **metering installation**; and
  - (d) check the voltage circuit alarms and fault indicators.

#### *Sealing*

#### 47 **Sealing requirements**

- (1) For the purposes of this clause and clause 48, a reference to something being sealed includes being contained in a sealed enclosure.
- (2) An **ATH** must, before it **certifies** a **metering installation**, ensure that each **metering component** in the **metering installation** that could reasonably be expected to affect the

- accuracy or reliability of the **metering installation**, is sealed.
- (3) An **ATH** must, before leaving a **metering installation** unattended, ensure that each part and connection of a **data storage device** that is contained in, or attached to, the **metering installation** is sealed.
  - (4) Subclause (3) does not apply to a port for on-site reading that is not capable of carrying out any other function.
  - (5) An **ATH** must, before it **certifies** a **metering installation**, ensure that the main switch cover is sealed if the main switch—
    - (a) is on the supply side of the **metering installation**; and
    - (b) has provision for sealing.
  - (6) An **ATH** must, when applying a seal to a **metering component** in an enclosure, attach a label in a prominent position inside the enclosure, warning—
    - (a) of the presence of a sealed **metering component** in the enclosure; and
    - (b) that care must be taken not to disturb the connections to the **metering component**.
  - (7) An **ATH** must use a sealing system that enables the following information to be determined:
    - (a) the **ATH** who affixed the seal; and
    - (b) the person (or the sealing tool) who applied the seal; and
    - (c) when the seal was applied.

#### **48 Removal or breakage of seals**

- (1) A **participant** who removes or breaks a seal without authorisation of the **metering equipment provider** responsible for the **metering installation**, other than in accordance with subclauses (1A) to (1F), must, within 10 **business days** of removing or breaking the seal,—
  - (a) advise the **metering equipment provider** of—
    - (i) the removal or breakage; and
    - (ii) the reason for the removal or breakage; and
  - (b) reimburse the **metering equipment provider** for the cost of reinstating the seal and **recertification** if required by the **metering equipment provider**.
- (1A) A **distributor** may interfere with a **metering installation** without authorisation of the **metering equipment provider** responsible for the **metering installation** to reset a load control switch contained within a load control device or bridge or unbridge a load control switch if—
  - (a) the load control switch does not control a **time block meter channel**; and
  - (b) the **distributor** provides the load control signal to the load control device.
- (1B) A **distributor** that removes or breaks a seal in accordance with subclause (1A) must—
  - (a) ensure that the personnel it uses to remove or break the seal are qualified or trained to a level sufficient to ensure they can safely remove or break the seal, bridge and unbridge the load control switch, and replace the seal in accordance with this Code; and
  - (b) replace the seal with its own seal and have a process for tracing the new seal to the personnel that removed or broke the seal for the **distributor**; and

- (c) advise the **trader** and **metering equipment provider** responsible for the **ICP** at which the **metering installation** is located if the load control switch has been bridged or unbridged.
- (1C) A **trader** that is advised under subclause (1B)(c) must, if the **profile** code has changed, advise the **registry manager** of the updated **profile** code for the **ICP** in accordance with clause 10 of Schedule 11.1.
- (1D) A **trader** may remove or break a seal without authorisation of the **metering equipment provider** responsible for the **metering installation** to reset a load control switch or bridge or unbridge a load control switch if the load control switch does not control a **time block meter channel**.
- (1E) A **trader** may remove or break a seal in a **metering installation** without authorisation of the **metering equipment provider** responsible for the **metering installation**—
  - (a) to **electrically connect** the load or **generation** measured by the **meter** if the load or **generation** has been **electrically disconnected** at the **meter**; or
  - (b) to **electrically disconnect** the load or **generation** measured by the **meter** if the **trader** has exhausted all other appropriate methods of **electrical disconnection**; or
  - (c) to bridge the **meter**.
- (1F) A **trader** that removes or breaks a seal in accordance with subclause (1D) or (1E) must—
  - (a) ensure that the personnel it uses to remove or break the seal are qualified or trained to a level sufficient to ensure they can safely remove or break the seal, perform the permitted work described in subclause (1D) or (1E), and replace the seal, in accordance with this Code; and
  - (b) replace the seal with its own seal and have a process for tracing the new seal to the personnel that removed or broke the seal for the **trader**; and
  - (c) if the **profile** code has changed, advise the **registry manager** of the updated **profile** code for the **ICP** in accordance with clause 10 of Schedule 11.1; and
  - (d) advise the **metering equipment provider** that is responsible for the **metering installation** in which the seal is located that the seal has been broken and what permitted work has been performed.
- (1G) A **metering equipment provider** that has been advised under subclause (1B)(c) or (1F)(d) must advise the **registry manager** of the updated **meter** register content code for the relevant **meter** channel if required.
- (2) A **participant** who is required under subclause (1)(b) to reimburse the cost of reinstating and **recertifying** a seal, must do so within 10 **business days** of the **metering equipment provider** advising the **participant** of the cost.
- (3) A **participant** who becomes aware that another person has removed or broken a seal, must, within 3 **business days** of becoming aware, advise the **metering equipment provider** who is responsible for the **metering installation**.
- (4) A **metering equipment provider** must, if it is advised under subclauses (1) or (3)—
  - (a) use all reasonable endeavours to ascertain—
    - (i) who removed or broke the seal; and
    - (ii) the reason for the removal or breakage; and

- (b) arrange for an **ATH** to carry out, as soon as practicable, an inspection of the removal or breakage, and to determine any work required to remedy the removal or breakage.
- (5) A **metering equipment provider** must make the arrangements required under subclause (4)(b) within—
- (a) 3 **business days** of being advised under subclauses (1) or (3), if the **metering installation** is category 3 or higher; or
  - (b) 10 **business days** of being advised under subclauses (1) or (3), if the **metering installation** is a **category 2 metering installation**; or
  - (c) 20 **business days** of being advised under subclauses (1) or (3), if the **metering installation** is a **category 1 metering installation**.
- (6) An **ATH** must, when investigating an unauthorised removal or breakage under subclause (4)(b), assess the accuracy and continued integrity of the **metering installation** and—
- (a) if, in its opinion, the accuracy and continued integrity is unaffected, replace the removed or broken seals; or
  - (b) if, in its opinion, the accuracy and continued integrity is affected, replace the removed or broken seal and advise the **metering equipment provider** under clause 10.43.
- (7) If subclause (6)(b) applies, the **certification** of the **metering installation** is automatically cancelled from the date on which a **participant** became aware, or should have become aware, of the removed or broken seal.
- (8) If a person removes or breaks a seal without authorisation of the **metering equipment provider** responsible for the **metering installation** in which the seal is located or not in accordance with subclauses (1A) to (1F), the **metering equipment provider** or the **ATH** responsible for **certifying** the **metering component** are not liable for any breach of this Code that results from the person's actions, provided the **metering equipment provider** or **ATH** can prove the seal had not been removed or broken when the **metering equipment provider** or **ATH** last performed work at the **metering installation**.

Clause 48(1): amended, on 1 February 2021, by clause 40(1) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clauses 48(1A) to (1G): inserted, on 1 February 2021, by clause 40(2) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 48(8): inserted, on 1 February 2021, by clause 40(3) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

---

## Schedule 10.8 Metering component requirements

cl 10.20, 10.38 and 10.42

### *Meters*

#### 1 Meter certification requirements

- (1) An **ATH** must, before it **certifies** a **meter**, ensure that—
  - (a) an **approved test laboratory** has—
    - (i) conducted **type-testing** that the **ATH** considers appropriate for the model and version of **meter**; and
    - (ii) produced a **type-test** certificate that—
      - (A) confirms the **meter's** technical characteristics; and
      - (B) confirms the range of environmental conditions within which the **meter** has been proven accurate and reliable; and
      - (C) confirms that the **meter** performs the functions for which it was designed; and
      - (D) confirms that the **meter** complies with the requirements of this Part; and
      - (E) records the tests undertaken by the **approved test laboratory** and the reasons why the **ATH** considers that they are appropriate; and
  - (b) the **meter** has a current **calibration report** issued by an **approved calibration laboratory** or an **ATH** approved to carry out **calibration** under Schedule 10.3; and
  - (c) the **meter calibration report**—
    - (i) confirms that the **meter** complies with the standards listed in Table 5 of Schedule 10.1; and
    - (ii) records any tests the **ATH** has performed to confirm compliance under subparagraph (i) and the results of those tests; and
    - (iii) confirms that the **meter** has passed the tests; and
    - (iv) records any recommendations on **error compensation**; and
    - (v) includes any manufacturer's **calibration** test reports; and
  - (d) it produces a **meter certification report** that includes—
    - (i) the date on which it **certified** the **meter**; and
    - (ii) the **certification** validity period for the **meter** for each category of **metering installation** that the **meter** may be used in; and
    - (iia) if the **certification** validity period referred to in subparagraph (ii) is less than the maximum **certification** validity period permitted under Table 1 of Schedule 10.1, the reasons for the shorter **certification** validity period; and
    - (iii) the maintenance requirements for the **meter**; and
    - (iv) the **meter calibration report**; and
    - (v) whether the **certification** was based on batch test certificates; and
    - (vi) if the **certification** was based on batch test certificates, confirmation that the manufacturer's batch testing facility is, in the **ATH's** opinion, of an

- acceptable standard; and
- (e) the percentage values of current set out in Table 6 or Table 7 of Schedule 10.1, as applicable, are relative to the **meter's** base or rated current ( $I_b$  or  $I_n$ ) as appropriate, and this current is selected at a level appropriate for the **metering installation** in which the **meter** is to be installed.
- (2) The **certification** validity period referred to in subclause (1)(d)(ii) must not be greater than the maximum **certification** validity period set out in Table 1 of Schedule 10.1 for the relevant categories of **metering installations** in which the **meter** may be used.
- Clause 1(1)(b): amended, on 19 December 2014, by clause 23(1) of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.
- Clause 1(1)(c)(ii): amended, on 19 December 2014, by clause 23(2) of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.
- Clause 1(d)(iia): inserted, on 1 February 2021, by clause 41(a) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.
- Clause 1(2): amended, on 1 February 2021, by clause 41(b) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

### *Measuring transformers*

## **2 Measuring transformer certification requirements**

- (1) An **ATH** must, before it **certifies** a **measuring transformer**,—
- (a) ensure, by testing, that a current **calibration report** sets out the **measuring transformer's** errors at a range of primary values at their rated burdens; and
- (b) that is a multi-tap current transformer, carry out the **calibration** tests and only **certify** the transformer for the ratios that have been **calibrated** if the test is passed; and
- (c) *[Revoked]*
- (d) determine the **measuring transformer certification** validity period under clause 3(c)(ii); and
- (e) determine the range, including highest and lowest values, that the in-service burden must be within to ensure the **measuring transformer** remains accurate, by using one or more of the following:
- (i) the **measuring transformer's** nameplate rating;
- (ii) the **calibration report** for the **measuring transformer**;
- (iii) the manufacturer's documentation for the **measuring transformer**;
- (iv) the standard set out in Table 5 of Schedule 10.1 the **measuring transformer** was manufactured to.
- (2) An **ATH** must, before it **certifies** an epoxy insulated current transformer, ensure that the **certification** tests allow for, and the **metering installation certification report** shows, the current transformer's age, temperature, and batch.

Clause 2(1)(c): amended, on 29 August 2013, by clause 46 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 2(1)(c): substituted, on 19 December 2014, by clause 24 of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.

Clause 2(1)(c): revoked, on 1 February 2021, by clause 42(a) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 2(1)(d): amended, on 1 February 2021, by clause 42(b) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 2(1)(e): inserted, on 1 February 2021, by clause 42(c) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

### 3 Measuring transformer certification report

An **ATH** must, before it **certifies** a **measuring transformer**, ensure that—

- (a) the **measuring transformer** has a current **calibration report** issued by an **approved calibration laboratory** or an **ATH** approved to carry out **calibration** under Schedule 10.3; and
- (b) the **measuring transformer calibration report**—
  - (i) confirms that the **measuring transformer** complies with the standards listed in Table 5 of Schedule 10.1; and
  - (ii) records any tests the **ATH** has performed to confirm compliance under subparagraph (i) and the results of those tests; and
  - (iii) confirms that the **measuring transformer** has passed the tests; and
  - (iv) records any recommendations made by the **ATH** on **error compensation**; and
  - (v) includes any manufacturer's **calibration** test reports; and
- (c) it produces a **measuring transformer certification report** that includes—
  - (i) the date on which it **certified** the **measuring transformer**; and
  - (ii) the **certification** validity period for the **measuring transformer** which must be no more than 120 months; and
  - (iii) the **measuring transformer calibration report**; and
  - (iv) whether the **certification** was based on batch test certificates; and
  - (v) if the **certification** was based on batch test certificates, confirmation that the manufacturer's batch testing facility is, in the **ATH's** opinion, of an acceptable standard; and
  - (vi) the range, including highest and lowest values, that the in-service burden must be within; and
- (d) it confirms that it has inspected the manufacturer's test certificates, and carried out any additional tests it considers necessary, to satisfy itself that the **measuring transformer** meets the accuracy requirements of this Part.

Clause 3(a): amended, on 19 December 2014, by clause 25(1) of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.

Clause 3(b)(ii): amended, on 19 December 2014, by clause 25(2) of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.

Clause 3(c)(vi): inserted, on 1 February 2021, by clause 43 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

### *Control devices*

#### 4 Control device certification report

- (1) An **ATH** must, before it **certifies** a new **control device**, produce a **certification report** that—
  - (a) confirms that the **control device** complies with the applicable standards listed in Table 5 of Schedule 10.1; and
  - (b) includes the details and results of any test that the **ATH** has carried out to confirm compliance under paragraph (a); and
  - (c) confirms that the **control device** has passed such tests.
- (2) An **ATH** must, before it **certifies** an existing installed **control device**, produce a **certification report** that—

- (a) confirms that the **control device** is fit for purpose; and
- (b) confirms the **control device certification** validity period that the **ATH** considers appropriate, which must be no more than 180 months.

Clause 4: substituted, on 29 August 2013, by clause 47 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 4(1)(b): amended, on 15 May 2014, by clause 20 of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

### *Data storage devices*

## **5 Data storage device certification requirements**

- (1) An **ATH** must, before it **certifies** a **data storage device** used for storing information that is used for the purposes of Part 15, ensure that—
  - (a) an **approved test laboratory** has—
    - (i) conducted **type-testing** that the **ATH** considers appropriate for the model and version of **data storage device**; and
    - (ii) produced a **type-test** certificate that—
      - (A) confirms the **data storage device's** technical characteristics; and
      - (B) confirms the range of environmental conditions within which the **data storage device** has been proven accurate and reliable; and
      - (C) confirms that the **data storage device** performs the functions for which it was designed; and
      - (D) confirms that the **data storage device** complies with this Part; and
      - (E) records the tests undertaken by the **approved test laboratory** to confirm compliance under sub-subparagraph (D) and the reasons why the **ATH** considers that they are appropriate; and
  - (b) it produces a **certification report** that—
    - (i) confirms the **data storage device** complies with the applicable standards listed in Table 5 of Schedule 10.1; and
    - (ii) records the tests the **ATH** has performed to confirm compliance with subparagraph (i) and the results of those tests; and
    - (iii) confirms that the **data storage device** has passed the tests; and
    - (iv) includes the date on which it **certified** the **data storage device**; and
    - (v) includes the **certification** validity period for the **data storage device** for each category of **metering installation** in which the **data storage device** may be used; and
    - (vi) records the maintenance requirements for the **data storage device**; and
    - (vii) confirms that each period of data is identifiable or deducible by both date and time on **interrogation**; and
    - (viii) confirms that the time and date of the following event conditions are recorded in an **event log**:
      - (A) a loss of the power supply to the **data storage device**; and
      - (B) critical internal alarms such as memory integrity checking, battery low, battery failed, and tampering; and
      - (C) phase failure to the **meter**, if the **data storage device** is integral to the

identified, by the use of any 1 or more of the following:

- (i) colour coding;
  - (ii) marker ferrules;
  - (iii) conductor numbering.
- (3) For the purposes of subclause (2)(c), if it is not practicable to exclude intermediate joints for any **measuring transformer** circuits, the **ATH** must ensure that the intermediate joints are—
- (a) sealed or in a sealed enclosure; and
  - (b) located in a secure position; and
  - (c) recorded in the **metering installation certification report**.
- (4) The **ATH** must, if the wiring is in a **metering installation** and does not comply with subclause (2)(d)—
- (a) ensure, by testing, that the wiring has been correctly installed; and
  - (b) record the nature of the test or the tests, and the results of the test or tests, in the **metering installation certification report**.

#### *Fuses and circuit breakers*

### **7 Fuses and circuit breakers**

An **ATH** must, before it **certifies** a **metering installation**, ensure that all fuses and **circuit breakers** that are part of the **metering installation** are—

- (a) appropriately rated for the electrical duty and discrimination required; and
- (b) clearly labelled and—
  - (i) sealed; or
  - (ii) located in sealed enclosures.

#### *Certification stickers*

### **8 Metering component certification stickers**

- (1) An **ATH** must, when **certifying** a **metering component** under this Part, confirm the **certification** by attaching a **metering component certification sticker** to the **metering component** or, if not practicable, provide the sticker with the **metering component**.
- (2) An **ATH** referred to in subclause (1) must ensure that a **metering component certification sticker** shows—
- (a) the name of the **metering component** owner (if available); and
  - (b) if the **metering component** is a **meter** or a **measuring transformer**, the name of the **ATH** or the **approved calibration laboratory** who **calibrated** the **metering component**; and
  - (c) the name of the **ATH** who **certified** the **metering component**; and
  - (d) the date on which the **metering component** was **certified**; and
  - (e) the initials or other unique identifier of the person who carried out the **certification** of the **metering component**.
- (3) An **ATH** must ensure that a **certification sticker** is—
- (a) made of weather-proof material; and
  - (b) permanently attached; and

- (c) filled out using permanent markings.
- (4) If an **ATH** certifies the **metering component** on the same day it certifies the **metering installation** that the **metering component** is installed in, the **ATH** may combine the **metering component certification sticker** under subclause (1) and the **metering installation certification sticker** under clause 41 of Schedule 10.7 and attach it to the **metering installation** in accordance with clause 41 of Schedule 10.7.

Clause 8(4): inserted, on 1 February 2021, by clause 44 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

### *Onsite calibration and certification*

## **9 Onsite calibration and certification**

- (1) A **certifying ATH** may only **calibrate** a **metering component** onsite—
- (a) in the **metering component's** normal working environment; and
  - (b) by—
    - (i) measuring the influence of all onsite variables and including their estimated effects in the **uncertainty** calculation; and
    - (ii) ensuring that—
      - (A) the effects of any departures from the **reference conditions** specified in the relevant standards listed in Table 5 of Schedule 10.1 can accurately and reliably be calculated; and
      - (B) the **metering installation**, in which the **metering component** is incorporated, is within the applicable accuracy tolerances set out in Table 1 of Schedule 10.1 after taking into account all known influences including temperature and temperature co-efficient measurements.
- (2) If an **ATH** **calibrates** a **metering component** onsite using manual methods, computers, or automated equipment for the capture, processing, manipulation, recording, reporting, storage, or retrieval of **calibration** data, it must ensure that its computer **software**—
- (a) is documented in the **ATH's** procedures; and
  - (b) can manipulate the variables that affect the performance of the **metering component** in a manner that will produce results that would correctly indicate the level of compliance of the **metering component** with this Code.
- (3) An **ATH** who **certifies** a **metering component** onsite must include in the **metering component certification report** confirmation that—
- (a) it has calculated the **uncertainty** of measurement taking into account all environmental factors for both the **metering component** being **calibrated** and the **working standards**; and
  - (b) the calculation of the **uncertainty** referred to in paragraph (a) comprises all **uncertainties** in the chain of **calibration**; and
  - (c) the **ATH** has used a **calibration** procedure to **calibrate** the **metering component** that—
    - (i) was included in the **ATH's** most recent **audit**; and
    - (ii) is appropriate for onsite **calibration**; and
    - (iii) includes the methodologies, calculations, and assumptions used by the **ATH**

- in determining the **uncertainty**; and
- (d) the **ATH** believes the methodologies, calculations, and assumptions are appropriate, including reasons for that belief.

# Electricity Industry Participation Code 2010

## Part 11 Registry information management

### Contents

- 11.1 Contents of this Part
- 11.2 Requirement to provide complete and accurate information
- 11.2A Use of contractors
- 11.3 Certain points of connection must have ICP identifiers
- 11.4 Distributors must create ICP identifiers for ICPs
- 11.5 Participants may request that distributors create ICP identifiers for ICPs
- 11.6 ICP status
- 11.7 Provision of ICP information
- 11.8 Provision of and changes to ICP information and NSP information by participants
- 11.8A Metering equipment providers to provide registry metering records to registry manager
- 11.8B Metering equipment providers to arrange for regular audits
- 11.9 *[Revoked]*
- 11.10 Distributors to arrange for regular audits
- 11.11 Authority and participant requested audits
- 11.12 *[Revoked]*
- 11.13 *[Revoked]*
- 11.14 Process for maintaining shared unmetered load
- 11.15 Process for customer or embedded generator switching
- 11.15AA Restrictions during switch protected period
- 11.15AB Retailer may communicate with customers for certain purposes
- 11.15AC Restrictions on use of customer information by retailer prior to or during switch protected period
- 11.15AD *[Revoked]*
- 11.15A Application of Schedule 11.4
- 11.15B Trader contracts with customers to permit assignment by Authority
- 11.15C Process for trader events of default
- 11.16 Trader to ensure arrangements for distribution services and metering
- 11.17 Connecting ICP that is not also NSP
- 11.18 Trader responsibility for ICP
- 11.18A Registry manager to advise metering equipment providers
- 11.18B Metering equipment provider responsibility for metering installation for ICP
- 11.19 Authority to specify timeframes and formats of information
- 11.20 Registry must be available between 0730 and 1930 each day
- 11.21 Confirmation of receipt of data
- 11.22 Registry manager must maintain register of information
- 11.23 Reports from registry manager
- 11.24 Registry manager delivers reports to specific participants
- 11.25 Reports to clearing manager, system operator or reconciliation manager
- 11.26 Reports to reconciliation manager
- 11.27 Reports to Authority

- 11.28 Access to registry
- 11.29 Registry information change
- 11.30 Use of ICP identifier on invoices
- 11.30A Provision of information on dispute resolution scheme
- 11.30B Provision of information on electricity plan comparison site
- 11.30C Specific requirements for information provided on websites and by other electronic means
- 11.30D Limitations on required information disclosure under clause 11.30A and 11.30B
- 11.30E Meaning of “related entity”
- 11.31 Customer and embedded generator queries
- 11.32 Reliance on registry
- Access by consumers to information about their own electricity consumption*
- 11.32A Retailers must give information about consumer electricity consumption
- 11.32B Requests for information
- 11.32C Retailers must give written notice to consumers of availability of information
- 11.32D Information security
- 11.32E Agents
- 11.32EA Retailer actions on receipt of requests from agents
- 11.32EB Decisions on requests
- 11.32EC Requirements for agents who are participants
- 11.32ED Additional requirements on retailers for authorisations in prescribed form and requests received through the EIE System
- 11.32EE Requirements for written authorities under Schedule 11.6
- 11.32EF Revocation of authority
- 11.32EG Authority may prescribe EIE system
- 11.32F Authority to publish procedures for responding to requests for consumption information
- 11.32G Retailers must provide information about generally available retail tariff plans
- 11.33 *[Expired]*
- 11.34 *[Expired]*
- 11.35 *[Expired]*
- 11.36 *[Expired]*

### **Schedule 11.1**

#### **Creation and management of ICPs, ICP identifiers and NSPs**

##### *ICPs and ICP identifiers*

##### *Provision of ICP Information to the registry manager*

##### *Management of ICP status*

##### *Updating registry standing information*

### **Schedule 11.2**

#### **Transfer of ICPs between distributors' networks**

### **Schedule 11.3**

#### **Switching**

##### *Standard switching process*

##### *Switch move process*

*Half-hour switching process*  
*Withdrawing a switch request*  
*Exchange of information*

**Schedule 11.4**

**Metering equipment provider switching and registry metering records**

**Schedule 11.5**

**Process for trader event of default**

**Schedule 11.6**

**Forms for authorisation of an Agent to request consumption information**

---

## 11.1 Contents of this Part

This Part—

- (a) provides for the management of information in the **registry**; and
- (b) prescribes a process for switching **ICPs** between **traders**; and
- (ba) prescribes a period of protection for **gaining retailers** during which a **losing retailer** may not approach a customer to persuade the customer to stay with the **losing retailer** or to switch back to the **losing retailer**; and
- (bb) imposes restrictions on the use of customer information held by a **losing retailer** during a **switch protected period**; and
- (c) prescribes a process for a **distributor** to change the record in the **registry** of an **ICP** so that the **ICP** is recorded as being usually connected to an **NSP** in the **distributor's network**; and
- (d) prescribes a process for switching responsibility for **metering installations** for **ICPs** between **metering equipment providers**; and
- (e) prescribes a process for dealing with **trader events of default**; and
- (f) requires **retailers** to give **consumers** information about their own consumption of **electricity**; and
- (g) requires **retailers** to give information about their **generally available retail tariff plans** to any person on request.

Compare: Electricity Governance Rules 2003 rule 1 part E

Clause 11.1(a) and (c): amended, on 5 October 2017, by clause 194 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11.1(b): amended, on 1 November 2018, by clause 33 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 11.1(ba) and (bb): inserted, on 31 March 2020, by clause 5 of the Electricity Industry Participation Code Amendment (Prohibition of Save and Win-Back Approaches by Losing Retailers During a Switch Protected Period) 2020.

Clause 11.1(c): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 11.1(d): inserted, on 29 August 2013, by clause 6 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 11.1(e): inserted, on 16 December 2013, by clause 5 of the Electricity Industry Participation (Managing Retailer Default Situations) Code Amendment 2013.

Clause 11.1(e): amended, on 28 February 2015, by clause 5 of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

Clause 11.1(e): amended, on 1 February 2016, by clause 4(1) of the Electricity Industry Participation Code Amendment (Access to Retail Data) 2014.

Clause 11.1(f): inserted, on 1 February 2016, by clause 4(2) of the Electricity Industry Participation Code Amendment (Access to Retail Data) 2014.

Clause 11.1(f): amended, on 1 February 2016, by clause 5(1) of the Electricity Industry Participation Code Amendment (Access to Retail Tariff Information) 2015.

Clause 11.1(g): inserted, on 1 February 2016, by clause 5(2) of the Electricity Industry Participation Code Amendment (Access to Retail Tariff Information) 2015.

## **11.2 Requirement to provide complete and accurate information**

- (1) A **participant** must take all practicable steps to ensure that information that the **participant** is required to provide to any person under this Part (including customers) is—
  - (a) complete and accurate; and
  - (b) not misleading or deceptive; and
  - (c) not likely to mislead or deceive.
- (2) If a **participant** becomes aware that the information the **participant** provided under this Part does not comply with subclause (1)(a) to (c), even if the **participant** has taken all practicable steps to ensure that the information complies, the **participant** must, as soon as practicable, provide such further information as is necessary to ensure that the information complies with subclause (1)(a) to (c).

Compare: Electricity Governance Rules 2003 rule 1A part E

Clause 11.2(1): amended, on 31 March 2020, by clause 6 of the Electricity Industry Participation Code Amendment (Prohibition of Save and Win-Back Approaches by Losing Retailers During a Switch Protected Period) 2020.

Clause 11.2(2): substituted, on 19 December 2014, by clause 26 of the Electricity Industry Participation Code Amendment (Minor Code Amendments) (No 3) 2014.

### **11.2A Use of contractors**

- (1) A **participant** may perform its obligations and exercise its rights under this Part by using a contractor.
- (2) A **participant** who uses a contractor to perform the **participant's** obligation under this Part—
  - (a) remains responsible and liable for, and is not released from the obligation or any other obligation under this Part; and
  - (b) cannot assert that it is not responsible or liable for the obligation on the ground that the contractor—
    - (i) has done or not done something; or
    - (ii) has failed to meet a relevant standard; and
  - (c) must ensure that the contractor has at least the specified level of skill, expertise, experience, or qualification that the **participant** would be required to have if it were performing the obligation itself.
- (3) If a **participant** is a party to a contract or arrangement containing a provision, or part of a provision, which is inconsistent with this Part, the provision, or part of the provision, has no effect.

Clause 11.2A: inserted, on 29 August 2013, by clause 7 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

## **11.3 Certain points of connection must have ICP identifiers**

- (1) This clause applies to the following:
  - (a) a **trader** who has agreed to purchase **electricity** from an **embedded generator** or sell **electricity** to a **consumer**;
  - (b) an **embedded generator** who sells **electricity** directly to the **clearing manager**;

- (c) a **direct purchaser** connected to a **local network** or an **embedded network**:
  - (d) an **embedded network** owner in relation to a **point of connection** on an **embedded network** that is settled by differencing:
  - (e) a **network** owner in relation to a **shared unmetered load point of connection** to the **network** owner's **network**:
  - (f) a **network** owner in relation to a **point of connection** between the **network** owner's **network** and an **embedded network**.
- (2) A **participant** to whom this clause applies must, before the **participant** assumes responsibility for a **point of connection** described in subclause (3) on a **local network** or **embedded network**, obtain an **ICP identifier** for the **point of connection**.
- (3) The **points of connection** for which **ICP identifiers** must be obtained under subclause (2) are **points of connection** at which any of the following occurs:
- (a) a **consumer** purchases **electricity** from a **trader**:
  - (b) a **trader** purchases **electricity** from an **embedded generator**:
  - (c) a **direct purchaser** purchases **electricity** from the **clearing manager**:
  - (d) an **embedded generator** sells **electricity** directly to the **clearing manager**:
  - (e) a **network** is settled by differencing:
  - (f) there is a **distributor** status **ICP**—
    - (i) at the **point of connection** between an **embedded network** and the **distributor's network**; or
    - (ii) at the **point of connection** of **shared unmetered load**.

Compare: Electricity Governance Rules 2003 rule 2 part E  
Clause 11.3(1)(c): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.  
Clause 11.3(1)(c): amended, on 5 October 2017, by clause 195 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### 11.4 Distributors must create ICP identifiers for ICPs

- (1) Each **distributor** must create an **ICP identifier** in accordance with clause 1 of Schedule 11.1 for each **ICP** on each **network** for which the **distributor** is responsible.
- (2) A **distributor** must create an **ICP identifier** for the **point of connection** at which an **embedded network** connects to the **distributor's network** in accordance with subclause (1).
- (3) An **ICP identifier** for an **ICP** may not be changed.

Compare: Electricity Governance Rules 2003 rule 3 part E

#### 11.5 Participants may request that distributors create ICP identifiers for ICPs

- (1) A **participant** to whom clause 11.3 applies may request that a **distributor** create an **ICP identifier** for an **ICP** on a **network** for which the **distributor** is responsible.
- (2) A **participant** that is a **trader** may make a request under subclause (1) only if the **trader** has,—
  - (a) in the case of a **trader** to whom Schedule 12A.1 or Schedule 12A.3 of Part 12A applies, a **distributor agreement** with the **distributor** in accordance with clause 11.16; or
  - (b) for all other **traders**, an arrangement with the **distributor** for **distribution** services in accordance with clause 11.6.

- (3) A **distributor** to whom a request is made must, within 3 **business days** of receiving the request, create a new **ICP identifier** for each **ICP** to which the request relates in accordance with clause 1 of Schedule 11.1, or advise the **participant** of the **distributor's** reasons for not complying with the request.

Compare: Electricity Governance Rules 2003 rule 4 part E

Clause 11.5(2): amended, on 1 February 2016, by clause 39 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 11.5(2): replaced, on 20 July 2020, by clause 5 of the Electricity Industry Participation Code Amendment (Default Distributor Agreement) 2020.

### 11.6 ICP status

The **participant** specified in clause 12 of Schedule 11.1 must manage the status of an **ICP** in accordance with clause 12 of Schedule 11.1.

Compare: Electricity Governance Rules 2003 rule 5 part E

### 11.7 Provision of ICP information

- (1) A **distributor** whose **network** includes 1 or more **ICPs** must provide information about each of those **ICPs** to the **registry manager** in accordance with Schedule 11.1.
- (2) A **trader** must provide information about each **ICP** at which the **trader** trades **electricity** to the **registry manager** in accordance with Schedule 11.1.

Compare: Electricity Governance Rules 2003 rule 6 part E

Clause 11.7(1) and (2): amended, on 5 October 2017, by clause 196 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 11.8 Provision of and changes to ICP information and NSP information by participants

- (1) This clause applies if—
- (a) an **NSP** is to be created or **decommissioned**; or
  - (b) a **distributor** wishes to change the record in the **registry** of an **ICP** that is not recorded as being usually connected to an **NSP** in the **distributor's network**, so that the **ICP** is recorded as being usually connected to an **NSP** in the **distributor's network**.
- (2) The **participant** specified in clause 25(3) of Schedule 11.1 must give the notice required by clause 25(1) of Schedule 11.1.
- (3) A **distributor** to whom subclause (1)(b) applies must comply with clause 25(2) of Schedule 11.1.
- (4) The **participants** specified in clauses 25 to 27 of Schedule 11.1 must comply with those clauses.
- (5) If a **network** owner acquires all or part of an existing **network**, the **network** owner must give the notice required by clause 29 of Schedule 11.1.

Compare: Electricity Governance Rules 2003 rule 8 part E

Clause 11.8(1)(a) and (b): amended, on 5 October 2017, by clause 197 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11.8(1)(b): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 11.8(1)(b): amended, on 20 December 2021, by clause 34 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 11.8(2) and (5): amended, on 1 November 2018, by clause 34 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

### 11.8A Metering equipment providers to provide registry metering records to registry manager

- (1) A **metering equipment provider** must, for each **metering installation** described in subclause (2) for which it is responsible,—
  - (a) provide to the **registry manager** the **registry metering records** for the **metering installation** in the **prescribed form**; and
  - (b) update the **registry metering records** in accordance with Schedule 11.4.
- (2) Subclause (1) applies to a **metering installation** that is—
  - (a) a **category 1 metering installation**, or higher category of **metering installation**; and
  - (b) for an **ICP** that is not also an **NSP**.

Clause 11.8A Heading: amended, on 5 October 2017, by clause 198(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11.8A: inserted, on 29 August 2013, by clause 8 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 11.8A(1)(a): amended, on 5 October 2017, by clause 198(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 11.8B Metering equipment providers to arrange for regular audits

Each **metering equipment provider** must arrange to be **audited** regularly in accordance with Part 16A in respect of the **metering equipment provider's** obligations under this Part.

Clause 11.8B: inserted, on 29 August 2013, by clause 8 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 11.8B: replaced, on 1 June 2017, by clause 18 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Audits) 2016.

### 11.9 *[Revoked]*

Compare: Electricity Governance Rules 2003 rule 8 part E

Clause 11.9: revoked, on 29 August 2013, by clause 9 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

### 11.10 Distributors to arrange for regular audits

Each **distributor** must arrange to be **audited** regularly in accordance with Part 16A in respect of the **distributor's** obligations under this Part.

Compare: Electricity Governance Rules 2003 rule 10 part E

Clause 11.10(1)(c): substituted, on 29 August 2013, by clause 5(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

Clause 11.10(1A): inserted, on 29 August 2013, by clause 5(2) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

Clause 11.10: replaced, on 1 June 2017, by clause 19 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Audits) 2016.

### 11.11 Authority and participant requested audits

- (1) The **Authority** may at any time carry out, or appoint an **auditor** to carry out, an **audit** of a **participant** in respect of the **participant's** obligations under this Part.
- (2) If a **participant** considers that another **participant** may not have complied with this Part, the **participant** may request that the **Authority** carry out, or appoint an **auditor** to carry out, an **audit** of the other **participant**.
- (3) Part 16A applies to an **audit** carried out under this clause.

Compare: Electricity Governance Rules 2003 rule 10A part E

Clause 11.11: replaced, on 1 June 2017, by clause 20 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Audits) 2016.

### 11.12 *[Revoked]*

Compare: Electricity Governance Rules 2003 rule 10B part E  
Clause 11.12: revoked, on 1 June 2017, by clause 21 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Audits) 2016.

### 11.13 *[Revoked]*

Compare: Electricity Governance Rules 2003 rule 10C part E  
Clause 11.13: revoked, on 1 June 2017, by clause 22 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Audits) 2016.

### 11.14 Process for maintaining shared unmetered load

- (1) This clause applies if **shared unmetered load** is connected to a **distributor's network**.
- (2) The **distributor** must give written notice to the **registry manager**, and each **trader** responsible under clause 11.18(1) for the **ICPs** across which the **unmetered load** is shared, of the **ICP identifiers** of those **ICPs**.
- (3) A **trader** who receives written notice under subclause (2) must give written notice to the **distributor** if it wishes to add an **ICP** to or omit an **ICP** from the **ICPs** across which the **unmetered load** is shared.
- (3A) A **trader** giving notice under subclause (3) must give a notice to add or omit an **ICP** only to—
  - (a) add an **ICP** if the **consumer** at the **ICP** benefits from the **shared unmetered load**; or
  - (b) omit an **ICP** if the **consumer** at the **ICP** no longer receives benefit from the **shared unmetered load**.
- (4) A **distributor** who receives written notice under subclause (3) must give written notice to the **registry manager** and each **trader** responsible for any of the **ICPs** across which the **unmetered load** is shared of the addition or omission of the **ICP**.
- (5) If a **distributor** becomes aware of a change to the capacity of an **ICP** across which the **unmetered load** is shared or that an **ICP** across which the **unmetered load** is shared is decommissioned, it must give written notice to all **traders** who receive written notice under subclause (2) of the change or decommissioning as soon as practicable after the change or decommissioning.
- (6) A **trader** who receives written notice under subclause (5) must, as soon as practicable after receiving the written notice, adjust the **unmetered load** information for each **ICP** for which it is responsible, so that the **unmetered load** is shared equally across each of those **ICPs**.
- (7) A **trader** must take responsibility for **shared unmetered load** assigned to an **ICP** for which the **trader** becomes responsible as a result of a switch in accordance with this Part.
- (8) A **trader** must not relinquish responsibility for **shared unmetered load** assigned to an **ICP** if there would then be no **ICPs** left across which the load could be shared.
- (9) A **trader** who changes the status of an **ICP** across which the **unmetered load** is shared to inactive in accordance with clause 19 of Schedule 11.1 is not required to give written notice to the **distributor** of the change under subclause (3). The amount of **electricity** attributable to that **ICP** becomes **UFE**.

Compare: Electricity Governance Rules 2003 rule 14 part E  
Clause 11.14(1): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.  
Clause 11.14(1), (2), (3), (4), (5) and (9): amended, on 5 October 2017, by clause 199 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 11.14(3), (4), (5) and (6): amended, on 1 November 2018, by clause 35 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.  
Clause 11.14(3A): inserted, on 1 March 2024, by clause 43 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

### **11.15 Process for customer or embedded generator switching**

- (1) This clause applies if a **trader** (“the gaining **trader**”) has an arrangement with a customer or **embedded generator** to—
  - (a) commence trading **electricity** with the customer or **embedded generator** at an **ICP** at which another **trader** (“the losing **trader**”) trades **electricity** with the customer or **embedded generator**; or
  - (b) assume responsibility under clause 11.18(1) for such an **ICP**.
- (2) The gaining **trader** and the losing **trader** must comply with Schedule 11.3.

Compare: Electricity Governance Rules 2003 rule 15 part E  
Clause 11.15(1): amended, on 1 November 2018, by clause 36 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

### **11.15AA Restrictions during switch protected period**

A **losing retailer** must not, by any means, including by using a third party or agent acting on its behalf, contact any customer who is switching from the **losing retailer** to a **gaining retailer** to attempt to persuade the customer to terminate the arrangement with the **gaining retailer** during the **switch protected period**, including by –

- (a) making a counter-offer to the customer; or
- (b) offering an enticement to the customer.

Clause 11.15AA: inserted, on 12 January 2015, by clause 4 of the Electricity Industry Participation Code Amendment (Switch Saving Protection) 2014.

Clause 11.15AA(2) and (3): amended, on 5 October 2017, by clause 200 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11.15AA: replaced, on 31 March 2020, by clause 7 of the Electricity Industry Participation Code Amendment (Prohibition of Save and Win-Back Approaches by Losing Retailers During a Switch Protected Period) 2020.

### **11.15AB Retailer may communicate with customers for certain purposes**

- (1) Despite clause 11.15AA, a **losing retailer** may contact a customer who is switching to a **gaining retailer** for any or all of the following purposes -
  - (a) to contact the customer to advise the customer of any termination fees that the customer is required to pay as a result of the customer ceasing to trade with the **losing retailer**; or
  - (b) to contact a customer regarding administrative matters, including –
    - (i) any fees the customer owes the **losing retailer**;
    - (ii) the customer’s final meter reading;
    - (iii) how the **losing retailer** will return any keys it holds on the customer’s behalf;
    - (iv) the effect of the customer ceasing to buy **electricity** from the **losing retailer** on other contracts between the customer and the **losing retailer**, for example, for the supply of gas; or

- (c) to provide a factual response to a question asked by a customer; or
  - (d) to make a counter-offer or offer an enticement to a customer where the customer has:
    - (i) contacted the **losing retailer** without the **losing retailer** having first prompted the customer to do so; and
    - (ii) invited the **losing retailer** to attempt to persuade the customer not to complete the **switch** to the **gaining retailer** but to remain with or return to the **losing retailer** instead; or
  - (e) to offer an enticement to a customer as part of a general marketing campaign; or
  - (f) to contact the customer to address network fault issues or to follow up customer complaints.
- (2) If a **losing retailer** contacts a customer under subclause (1), the **losing retailer** must not communicate with the customer for any other purpose other than a purpose specified in subclause (1).
- (3) Without limiting any of its other obligations, a **retailer** (whether a **gaining retailer** or a **losing retailer**) must not harass or coerce a customer.
- Clause 11.15AB: inserted, on 12 January 2015, by clause 4 of the Electricity Industry Participation Code Amendment (Switch Saving Protection) 2014.
- Clause 11.15AB(2), (3) and (4): amended, on 1 November 2018, by clause 37 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.
- Clause 11.15AB: replaced, on 31 March 2020, by clause 8 of the Electricity Industry Participation Code Amendment (Prohibition of Save and Win-Back Approaches by Losing Retailers During a Switch Protected Period) 2020.

### **11.15AC Restrictions on use of customer information by retailer prior to or during switch protected period**

- (1) A **losing retailer** must not use information relating to a customer that it obtained prior to or during the **switch protected period**, including information that may be used to contact the customer, during the **switch protected period** to do any of the following:
- (a) contact the customer for any purpose other than a purpose specified in clause 11.15AB;
  - (b) include the customer in a marketing campaign other than a general marketing campaign; or
  - (c) enable any other **retailer**, except the **gaining retailer**, to contact the customer.
- (2) This clause does not limit any other requirement to maintain the confidentiality of any information relating to a customer that is imposed by the contract entered into between the **losing retailer** and the customer or otherwise by law.

Clause 11.15AC: inserted, on 12 January 2015, by clause 4 of the Electricity Industry Participation Code Amendment (Switch Saving Protection) 2014.

Clause 11.15AC: amended, on 1 November 2018, by clause 38 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 11.15AC: replaced, on 31 March 2020, by clause 9 of the Electricity Industry Participation Code Amendment (Prohibition of Save and Win-Back Approaches by Losing Retailers During a Switch Protected Period) 2020.

### **11.15AD [Revoked]**

Clause 11.15AD: inserted, on 12 January 2015, by clause 4 of the Electricity Industry Participation Code Amendment (Switch Saving Protection) 2014.

Clause 11.15AD: revoked, on 31 March 2020, by clause 10 of the Electricity Industry Participation Code Amendment (Prohibition of Save and Win-Back Approaches by Losing Retailers During a Switch Protected Period) 2020.

### 11.15A Application of Schedule 11.4

The following parties must comply with Schedule 11.4:

- (a) a **trader** that gives written notice to the **registry manager** of the **gaining metering equipment provider** responsible for each **metering installation** for an **ICP**;
- (b) the **registry manager**;
- (c) the **gaining metering equipment provider**.

Clause 11.15A: inserted, on 29 August 2013, by clause 10 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 11.15A(a) and (b): amended, on 5 October 2017, by clause 201 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 11.15B Trader contracts with customers to permit assignment by Authority

- (1) Each **trader** must at all times ensure that the terms of each contract under which a customer of the **trader** purchases **electricity** from the **trader** permit—
  - (a) the **Authority** to assign the rights and obligations of the **trader** under the contract to another **trader** if the **trader** commits an **event of default** under paragraph (a) or (b) or (f) or (h) of clause 14.41(1); and
  - (b) the terms of the assigned contract to be amended on such an assignment to—
    - (i) the standard terms that the recipient **trader** would normally have offered to the customer immediately before the **event of default** occurred; or
    - (ii) such other terms that are more advantageous to the customer than the standard terms, as the recipient **trader** and the **Authority** agree; and
  - (c) the terms of the assigned contract to be amended on such an assignment to include a minimum term in respect of which the customer must pay an amount for cancelling the contract before the expiry of the minimum term; and
  - (d) the **trader** to provide information about the customer to the **Authority** and for the **Authority** to provide the information to another **trader** if required under Schedule 11.5; and
  - (e) the **trader** to assign the rights and obligations of the **trader** to another **trader**.
- (2) The terms specified in subclause (1) must—
  - (a) be expressed to be for the benefit of the **Authority** for the purposes of subpart 1 of Part 2 of the Contract and Commercial Law Act 2017; and
  - (b) not be able to be amended without the consent of the **Authority**.
- (3) *[Revoked]*

Clause 11.15B: inserted, on 16 December 2013, by clause 6 of the Electricity Industry Participation (Managing Retailer Default Situations) Code Amendment 2013.

Heading clause 11.15B: amended, on 28 February 2015, by clause 6(1) of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

Clause 11.15B(1): amended, on 28 February 2015, by clause 6(2)(a) of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

Clause 11.15B(1): amended, on 1 November 2018, by clause 39(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 11.15B(1)(a): amended, on 28 February 2015, by clause 6(2)(b) of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

Clause 11.15B(1)(a): amended, on 1 February 2016, by clause 40 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.  
Clause 11.15B(1)(a): amended, on 5 October 2017, by clause 202 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 11.15B(2)(a): amended, on 1 November 2018, by clause 39(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.  
Clause 11.15B(3): revoked, on 28 August 2015, by clause 6(3) of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

### **11.15C Process for trader events of default**

- (1) This clause applies if the **Authority** is satisfied that a **trader** has committed an **event of default** under paragraph (a) or (b) or (f) or (h) of clause 14.41(1).
- (2) The **Authority** and each **participant** must comply with Schedule 11.5.
- (3) This clause ceases to apply, and the **Authority** and each **participant** must cease to comply with Schedule 11.5, if the **Authority** is advised under clause 14.41(2), 14.43(3B), or 14.43(4A) that the relevant **participant** considers that the **event of default** has been remedied.

Clause 11.15C: inserted, on 16 December 2013, by clause 6 of the Electricity Industry Participation (Managing Retailer Default Situations) Code Amendment 2013.  
Heading, clause 11.15C: amended, on 28 February 2015, by clause 7(1) of the Electricity Industry Participation Code Amendment (Trader Default) 2014.  
Clause 11.15C(1): amended, on 28 February 2015, by clause 7(2) of the Electricity Industry Participation Code Amendment (Trader Default) 2014.  
Clause 11.15C(1): amended, on 24 March 2015, by clause 5 of the Electricity Industry Participation Code Amendment (Settlement and Prudential Security) 2014.  
Clause 14.15C(1): amended, on 20 December 2021, by clause 35 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.  
Clause 11.15C(2): amended, on 15 May 2014, by clause 21 of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.  
Clause 11.15C(3): inserted, on 1 February 2016, by clause 41 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

### **11.16 Trader to ensure arrangements for distribution services and metering**

Before providing the **registry manager** with information in accordance with clause 11.7(2) or clause 11.18(4), a **trader** must have—

- (a) either,—
  - (i) if the **trader** is a **trader** to whom Schedule 12A.1 or Schedule 12A.3 of Part 12A applies, a **distributor agreement** with the **distributor** on whose **network** the **ICP** is located; or
  - (ii) in all other cases, entered into an arrangement for the provision of **distribution** services in relation to the **ICP** with the **distributor**; and
- (b) entered into an arrangement with a **metering equipment provider** to be responsible for each **metering installation** for the **ICP**.

Compare: Electricity Governance Rules 2003 rule 15 part E  
Clause 11.16: substituted, on 29 August 2013, by clause 11 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.  
Clause 11.16: amended, on 5 October 2017, by clause 203 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 11.16: replaced, on 20 July 2020, by clause 6 of the Electricity Industry Participation Code Amendment (Default Distributor Agreement) 2020.  
Clause 11.16(a): amended, on 1 February 2016, by clause 42 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 11.16(a): amended, on 1 November 2018, by clause 40 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

### 11.17 Connecting ICP that is not also NSP

- (1A) A **distributor** must, when connecting an **ICP** that is not also an **NSP**, follow the connection process set out in clause 10.31.
- (1) A **distributor** must not connect an **ICP** across which **unmetered load** is shared unless a **trader** is recorded in the **registry** as accepting responsibility for the **shared unmetered load**.
- (2) A **distributor** must not connect an **ICP** of any other kind unless a **trader** is recorded in the **registry** as accepting responsibility for the **ICP**.
- (3) Subclause (2) does not apply to an **ICP** that is—
- (a) the **point of connection** between a **network** and an **embedded network**; or
  - (b) the **point of connection of shared unmetered load**.

Compare: Electricity Governance Rules 2003 rule 17 part E

Clause 11.17: heading amended, on 29 August 2013, by clause 12(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 11.17: heading amended, on 29 August 2013, by clause 5 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 11.17 Heading: amended, on 5 October 2017, by clause 204(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11.17(1A): inserted, on 29 August 2013, by clause 12 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 11.17(1A): substituted, on 29 August 2013, by clause 5 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011 Amendment 2013 (No 2).

Clause 11.17(1A), (1) and (2): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 11.17(1A), (1) and (2): amended, on 5 October 2017, by clause 204(2) and (3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 11.18 Trader responsibility for ICP

- (1) If a **trader** is recorded in the **registry** as accepting responsibility for an **ICP identifier** that is not also an **NSP**, the **trader** is responsible for all obligations in this Part that—
- (a) apply to **traders**; and
  - (b) relate to an **ICP** that is not also an **NSP**.
- (2) A **trader** ceases to be responsible for obligations in this Part relating to an **ICP** that is not also an **NSP** if—
- (a) another **trader** is recorded in the **registry** as being responsible for the **ICP identifier**; or
  - (b) the **ICP** is **decommissioned** in accordance with clause 20 of Schedule 11.1.
- (3) If an **ICP** is to be **decommissioned**, the **trader** who is responsible for the **ICP identifier** must—
- (a) arrange for a final **interrogation** to take place before or on removal of the **meter**; and
  - (b) advise the **metering equipment provider** responsible for each **metering installation** for the **ICP** that it is to be **decommissioned**.
- (4) A **trader** who is responsible for an **ICP identifier**, other than an **ICP** at which there is only **unmetered load**, must ensure that a **metering equipment provider** is recorded in the **registry** as being responsible for each **metering installation** for the **ICP**.

- (5) The **trader** must not trade at an **ICP** if a **metering equipment provider** is not recorded in the **registry** as being responsible for each **metering installation** for the **ICP**, unless the **trader** trades only **unmetered load** at that **ICP**.

Compare: Electricity Governance Rules 2003 rule 17 part E

Clause 11.18: substituted, on 29 August 2013, by clause 13 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 11.18(5): amended, on 15 May 2014, by clause 22 of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

Clause 11.18(1): amended, on 31 October 2023, by clause 4(1) of the Electricity Industry Participation Code Amendment (Clarification of Trader Obligations) 2023.

Clause 11.18(2): amended, on 31 October 2023, by clause 4(2) of the Electricity Industry Participation Code Amendment (Clarification of Trader Obligations) 2023.

Clause 11.18(3): amended, on 31 October 2023, by clause 4(3) of the Electricity Industry Participation Code Amendment (Clarification of Trader Obligations) 2023.

Clause 11.18(4): amended, on 31 October 2023, by clause 4(4) of the Electricity Industry Participation Code Amendment (Clarification of Trader Obligations) 2023.

### 11.18A Registry manager to advise metering equipment providers

The **registry manager** must, within 1 **business day** of being advised by a **trader** of a **metering equipment provider's participant identifier** for an **ICP identifier**, —

- (a) if there is not already a **metering equipment provider** assigned to the **ICP identifier**, advise the **gaining metering equipment provider** that the **registry manager** has been advised that it is the **gaining metering equipment provider** for each **metering installation** for the **ICP**; or
- (b) if there is a **losing metering equipment provider**, advise both the **gaining metering equipment provider** and the **losing metering equipment provider** of the advice.

Clause 11.8A Heading: amended, on 5 October 2017, by clause 205(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11.18A: inserted, on 29 August 2013, by clause 13 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 11.18A: amended, on 5 October 2017, by clause 205(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 11.18B Metering equipment provider responsibility for metering installation for ICP

- (1) This clause applies to a **metering equipment provider** who assumes responsibility, or is appointed to be responsible, as the **metering equipment provider** for an **ICP**.
- (2) The obligations under this Part, of a **metering equipment provider** to whom this clause applies,—
- (a) commence at the same time as the **metering equipment provider's** obligations under clause 10.21(1);
- (b) terminate when the **metering equipment provider's** obligations under Part 10 terminate under clause 10.23.
- (3) *[Revoked]*

Clause 11.18B: inserted, on 29 August 2013, by clause 13 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 11.18B(3): revoked, on 1 November 2018, by clause 41 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018

### 11.19 Authority to specify timeframes and formats of information

- (1) Subject to subclause (3), subclause (2) applies if a **participant** is required to provide information under this Part, but this Code does not specify any 1 or more of the following:
  - (a) the time by which, or the period within which, the information must be provided:
  - (b) the format in which the information must be provided:
  - (c) the method by which the information must be provided.
- (2) The **participant** must provide the information in accordance with requirements as to those matters specified by the **Authority**.
- (3) Unless otherwise specified in this Part, information or notices that must be provided under this Part by the **registry manager** or to the **registry manager**, must be provided using the **registry**.

Compare: Electricity Governance Rules 2003 rule 20 part E  
Clause 11.19(1): amended, on 5 October 2017, by clause 206(a) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 11.19(3): inserted, on 5 October 2017, by clause 206(b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 11.20 Registry must be available between 0730 and 1930 each day

- (1) The **registry manager** must ensure that the **registry** is available to receive and provide information under this Part between 0730 hours and 1930 hours each day.
- (2) Information provided to the **registry manager** after 1930 hours is deemed to be provided at 0730 the next day.

Compare: Electricity Governance Rules 2003 rule 21 part E  
Clause 11.20 Heading: amended, on 5 October 2017, by clause 207(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 11.20: amended, on 5 October 2017, by clause 207(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 11.21 Confirmation of receipt of data

- (1) Information provided to the **registry manager** is deemed, for the purposes of this Part, not to have been received until the **registry manager** has confirmed receipt in accordance with this clause.
- (2) The **registry manager** must confirm receipt of information received by it in accordance with this Part within 4 hours of the information being provided to it.
- (3) In determining whether the **registry manager** has confirmed receipt within the time specified in subclause (2), no account is to be taken of any period during which the **registry** is not required to be available under clause 11.20.
- (4) If the **participant** providing the information does not receive confirmation that the **registry manager** has received the **participant's** information, the **participant** must contact the **registry manager** to check whether the **registry manager** has received the information.
- (5) If the **registry manager** has not received the information, the **participant** must re-send the information. This process must be repeated until the **registry manager** has confirmed receipt of the information in accordance with this clause.

Compare: Electricity Governance Rules 2003 rules 22.1 and 22.2 part E

Clause 11.21(1), (2), (4) and (5): amended, on 5 October 2017, by clause 208(1) and (3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11.21(3): replaced, on 5 October 2017, by clause 208(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### **11.22 Registry manager must maintain register of information**

- (1) The **registry manager** must maintain a register of information received by it and updated in accordance with this Code.
- (2) The **registry manager** must ensure that a complete audit trail exists for all information received by it in accordance with this Code.

Compare: Electricity Governance Rules 2003 rule 22.3 part E

Clause 11.22 Heading: amended, on 5 October 2017, by clause 209(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11.22: amended, on 5 October 2017, by clause 209(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11.22(2): amended, on 1 November 2018, by clause 42 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

### **11.23 Reports from registry manager**

By 1600 hours on the 6<sup>th</sup> **business day** of each **reconciliation period**, the **registry manager** must **publish** a report containing the following information:

- (a) the number of **ICPs** in the **registry** at the end of the immediately preceding **consumption period**;
- (b) the number of notifications received by the **registry manager** in accordance with clause 2 of Schedule 11.3 during the previous **reconciliation period**;
- (c) such other information as may be agreed from time to time between the **registry manager** and the **Authority**.

Compare: Electricity Governance Rules 2003 rule 23 part E

Clause 11.23 Heading: amended, on 5 October 2017, by clause 210(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11.23: amended, on 5 October 2017, by clause 210(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11.23(a): amended, on 1 November 2018, by clause 43 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

### **11.24 Registry manager delivers reports to specific participants**

The **registry manager** must deliver the reports specified in clauses 11.25 to 11.27 in the manner specified in those clauses.

Compare: Electricity Governance Rules 2003 rule 24.1A part E

Clause 11.24 Heading: amended, on 5 October 2017, by clause 211(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11.24: amended, on 5 October 2017, by clause 211(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### **11.25 Reports to clearing manager, system operator or reconciliation manager**

- (1) The **clearing manager**, or the **system operator**, or the **reconciliation manager** may request in writing, no later than 5 **business days** before the last day of the month before the 1<sup>st</sup> month for which the report is requested, a report that includes any or all of the following information:

- (a) all active **NSPs** connected to a **local network** during the immediately preceding 14 calendar months:

- (b) all active **NSPs** connected to a **network** for which a **trader** is, and has over the immediately preceding 14 calendar months been, responsible:
  - (c) the dates on which each **trader's** responsibility under this Code at an **NSP** commenced and ceased.
- (2) The **system operator** may at any time request, in writing, a report that sets out every switch made under clauses 2, 9 or 14 of Schedule 11.3, the effect of which is that a **trader** has commenced trading at an **NSP** or a **trader** has ceased trading at an **NSP**.
  - (3) A request made under subclauses (1) or (2) may—
    - (a) be a one-off request; or
    - (b) specify a frequency over a particular period; or
    - (c) specify a frequency over an indefinite period until terminated by the requesting person.
  - (4) If the request is received by the time specified in this clause, the **registry manager** must provide the report by 1000 hours on the 1<sup>st</sup> **business day** of the month following the month in which the request was made, or if the request for the report specifies a later date, by the later date.
  - (5) The person who requested the report may vary any of the details set out in the request, by giving notice to the **registry manager** of the relevant details in writing by no later than 5 **business days** before the last day of the month before the 1<sup>st</sup> month for which the person requests the variation.
  - (6) The **registry manager** must comply with a request made in accordance with subclause (5) by 1000 hours on the 1<sup>st</sup> **business day** of the month following the month in which the request was made.

Compare: Electricity Governance Rules 2003 rule 24.1 part E

Clause 11.25 Heading: amended, on 5 October 2017, by clause 212(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11.25(1)(a) and (b): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 11.25(1), (4), (5) and (6): amended, on 5 October 2017, by clause 212(2) to (4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11.25(5): amended, on 1 November 2018, by clause 44 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

### 11.26 Reports to reconciliation manager

By 1600 hours on the 4<sup>th</sup> **business day** of each calendar month, in respect of the immediately preceding **consumption period**, and by 1600 hours on the 13<sup>th</sup> **business day** of each calendar month in respect of the immediately preceding 14 **consumption periods**, the **registry manager** must deliver the following reports to the **reconciliation manager**:

- (a) a report identifying the number of **ICP days** per **NSP**, differentiated by **half-hour metering** type or non **half-hour metering** type (for the purpose of this clause, **half-hour metering** type on the **registry** must be reported as **half hour**, and all other metering types must be reported as non **half hour**) attributable to each **trader** for those **NSPs** that are recorded on the **registry** as consuming **electricity** at any time during, as the case may be, that **consumption period** or any of those **consumption periods**:

- (b) a report detailing the **loss factor** values for each **loss category** code recorded in the **registry** in respect of all **trading periods**:
- (c) a report detailing the **balancing area** to which each **NSP** belongs recorded in the **registry** in respect of all **trading periods** (including any changes during that month):
- (d) a report detailing the **half hour ICP identifiers** and the **NSPs** to which they are assigned for each individual **trader** (including any changes during that month):
- (e) a report that sets out every switch made under clauses 2, 9 or 14 of Schedule 11.3, the effect of which is that a **trader** has commenced trading at an **NSP** or a **trader** has ceased trading at an **NSP**.

Compare: Electricity Governance Rules 2003 rule 24.2 part E

Clause 11.26 Heading: amended, on 5 October 2017, by clause 213(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11.26: amended, on 5 October 2017, by clause 213(2) and (3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 11.27 Reports to Authority

By 1600 hours on the 1<sup>st</sup> **business day** of each calendar month, the **registry manager** must deliver to the **Authority** a report summarising the number of events—

- (a) that a **participant** has not notified to the **registry manager** within the timeframes specified in this Part; and
- (b) of which the **registry manager** is aware, despite the **participant** not having notified the **registry manager**.

Compare: Electricity Governance Rules 2003 rule 24.3 part E

Clause 11.27 Heading: amended, on 5 October 2017, by clause 214(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11.27: amended, on 5 October 2017, by clause 214(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11.27: amended, on 1 November 2018, by clause 45 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

### 11.28 Access to registry

- (1) A **participant** that requires access to the **registry** must apply to the **Authority** to have access to the **registry**.
- (1A) The **Authority** must specify and **publish** the terms and conditions that apply to **participants** that are granted access to the **registry**.
- (1B) For the avoidance of doubt, the terms and conditions specified and **published** by the **Authority** for access to the **registry** as at 18 April 2019—
  - (a) are the terms and conditions for the purposes of subclause (1A); and
  - (b) apply to a **participant** that has access to the **registry** as at 18 April 2019.
- (2) If the **Authority** grants a **participant's** application,—
  - (a) the **registry manager** must provide the **participant** with access to the **registry** in accordance with the terms and conditions specified and **published** by the **Authority** under subclause (1A):
  - (b) the **participant** must comply with the terms and conditions specified and **published** by the **Authority** under subclause (1A), including any amendments under subclause (2A):

- (c) the **Authority** may restrict or suspend a **participant's** access to the **registry** if the **participant** does not comply with those terms and conditions, even though such a restriction or suspension may affect a **participant's** ability to meet its obligations under this Code.
- (2A) The **Authority** may, from time to time, specify and **publish** amendments to the terms and conditions under which the **Authority** grants access to the **registry**. Such amendments will apply—
- (a) to those **participants** the **Authority** has already granted access to the **registry**; and
- (b) to future applications for access to the **registry**.
- (3) The **Authority** must consult with the **participants** referred to in subclause (2A)(a) on any proposed amendments to the terms and conditions specified and **published** by the **Authority** under subclause (1A).
- (4) If the **Authority** grants a **participant** access to information in the **registry**, and the **participant** requests a report, the **registry manager** must provide the report to the **participant** within 4 hours of receiving the request.
- (5) In determining whether the **registry manager** has provided the report within the time specified in subclause (4), no account is to be taken of any period during which the **registry** is not required to be available under clause 11.20.

Compare: Electricity Governance Rules 2003 rule 25 part E

Clause 11.28(1): replaced, on 18 April 2019, by clause 4(1) of the Electricity Industry Participation Code Amendment (Terms and Conditions for Access to Registry and WITS) 2019.

Clause 11.28(1A) and (1B): inserted, on 18 April 2019, by clause 4(2) of the Electricity Industry Participation Code Amendment (Terms and Conditions for Access to Registry and WITS) 2019.

Clause 11.28(2): replaced, on 18 April 2019, by clause 4(3) of the Electricity Industry Participation Code Amendment (Terms and Conditions for Access to Registry and WITS) 2019.

Clause 11.28(1), (2), (3) and (5): amended, on 5 October 2017, by clause 215(1) to (3) and (5) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11.28(2A): inserted, on 29 August 2013, by clause 14(2) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 11.28(2A): replaced, on 18 April 2019, by clause 4(4) of the Electricity Industry Participation Code Amendment (Terms and Conditions for Access to Registry and WITS) 2019.

Clause 11.28(3): replaced, on 18 April 2019, by clause 4(5) of the Electricity Industry Participation Code Amendment (Terms and Conditions for Access to Registry and WITS) 2019.

Clause 11.28(4): replaced, on 5 October 2017, by clause 215(4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 11.29 Registry information change

If a change to **registry** information is provided in accordance with clause 11.7, the **registry manager** must, within 1 **business day** of receiving the information, advise affected **participants** of the change.

Compare: Electricity Governance Rules 2003 rule 26 part E

Clause 11.29: substituted, on 29 August 2013, by clause 15 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 11.29: amended, on 5 October 2017, by clause 216 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 11.30 Use of ICP identifier on invoices

Each **trader** must ensure that the relevant **ICP identifier** is printed on every invoice or associated document relating to the sale of **electricity** rendered by the **trader**, and that the **ICP identifier** is clearly labelled "ICP" on the invoice.

Compare: Electricity Governance Rules 2003 rule 27 part E

### 11.30A Provision of information on dispute resolution scheme

- (1) Each **retailer** and **distributor** must provide information in the circumstances specified in subclauses (2) and (3) about the dispute resolution scheme identified under clause 3 of Schedule 4 of the **Act**.
- (2) The information required by subclause (1) must be clearly and prominently published on any website that—
  - (a) is maintained by, or on behalf of, the **retailer** or **distributor**; and
  - (b) deals with, describes or offers the supply of **electricity** or **line function services** by the **retailer** or **distributor**, or by an agent or related entity of the **retailer** or the **distributor**.
- (3) The information required by subclause (1) must also be clearly and prominently provided—
  - (a) as part of or accompanying any communication personalised for a specific named **consumer** (whether in print, electronic or other medium) from the **retailer** or **distributor**, or by an agent or related entity of the **retailer** or **distributor**, about—
    - (i) billing or charges to, or payments owed by or made by, the **consumer** for the supply of **electricity** or **line function services**, including any invoice, request for payment or statement of account; or
    - (ii) the terms and conditions for the supply of **electricity** or **line function services** to the **consumer**, including the prices, tariffs, energy plan, price plan, tariff plan and terms of service for the **consumer**; and
  - (b) in association with or in the course of the **retailer** or **distributor**, or any person on behalf of the **retailer** or **distributor**, responding in any form, to any query from a **consumer**, including—
    - (i) in association with or in the course of any telephone call from a **consumer**; or
    - (ii) in any emails.
- (4) A **retailer** or **distributor** may meet the requirement in sub-paragraph (3)(b)(i) by providing the information as part of initial automatic answering systems or call holding systems, provided in each case the information is reasonably likely to come to the attention of the **consumer**.

Clause 11.30A: inserted, on 1 April 2021, by clause 4 of the Electricity Industry Participation Code Amendment (Requirements to Improve Awareness of Dispute Resolution Scheme and the Electricity Plan Comparison Site) 2020.  
Clause 11.30A(1): amended, on 1 March 2024, by clause 44 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

### 11.30B Provision of information on electricity plan comparison site

- (1) Each **retailer** that supplies **electricity** at any **ICP** for which the relevant business classification code for the purposes of clause 9(1)(k) of Schedule 11.1 is “000000” or “Residential” must provide clear information in the circumstances specified in subclauses (2) to (4) about the electricity plan comparison website or other platform, as identified on the **Authority’s** website.

- (2) The information required by subclause (1) must be clearly and prominently published on any website that—
  - (a) is maintained by, or on behalf of, the **retailer**; and
  - (b) deals with, describes or offers the supply of **electricity** at any such **ICP** by the **retailer**, or by an agent or related entity of the **retailer**.
- (3) The information required by subclause (1) must also be clearly and prominently provided as part of or accompanying any communication personalised to a specific named **consumer** (whether in print, electronic or other medium) from the **retailer**, or by an agent or related entity of the **retailer**, about—
  - (a) billing or charges to, or payments owed or made by, the **consumer** for the supply of **electricity** at any such **ICP**, including any invoice, request for payment or statement of account; or
  - (b) the terms and conditions for the supply of **electricity** at any such **ICP**, including the prices, tariffs, energy plan, price plan, tariff plan and terms of service for the **consumer**.
- (4) The information required by subclause (1) must also be clearly and prominently provided at least once every calendar year to each customer the **retailer** supplies **electricity** to at an **ICP** referred to in subclause (1).
- (5) If the **Authority** changes the web address of the electricity plan comparison website, establishes a new platform to perform the same purpose, or changes that platform or its location descriptor, each **retailer** must change the information published or provided under clause 11.30A to refer to the new address, platform or location descriptor as soon as reasonably possible and no later than 3 months from the date the change is notified on the **Authority's** website.

Clause 11.30B: inserted, on 1 April 2021, by clause 4 of the Electricity Industry Participation Code Amendment (Requirements to Improve Awareness of Dispute Resolution Scheme and the Electricity Plan Comparison Site) 2020.  
Clause 11.30B(4): amended, on 1 March 2024, by clause 45 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

### **11.30C Specific requirements for information provided on websites and by other electronic means**

The information provided under clauses 11.30A(2) and 11.30B(2)—

- (a) must be prominently provided on, or linked to, a page or pages of the **retailer's** or **distributor's** website, which a **consumer** seeking information on or in relation to the supply of **electricity** or **line function services**, or on the complaint processes of the **retailer** or **distributor**, is reasonably likely to view; but
- (b) does not need to be provided on every such page or every part, provided a **consumer** seeking such information is reasonably likely to come across the information in the course of visiting the website.

Clause 11.30C: inserted, on 1 April 2021, by clause 4 of the Electricity Industry Participation Code Amendment (Requirements to Improve Awareness of Dispute Resolution Scheme and the Electricity Plan Comparison Site) 2020.

### **11.30D Limitations on required information disclosure under clause 11.30A and 11.30B**

- (1) If a **retailer** or a **distributor** has provided the information required by clause 11.30A or 11.30B to a **consumer**—

- (a) in a **consumer** communication under clause 11.30A(3)(a) or 11.30B(3), the **retailer** or **distributor** does not need to continue to provide the information in any subsequent **consumer** communication on the same matter; or
  - (b) in response to any query under clause 11.30A(3)(b), the **retailer** or **distributor** does not need to continue to provide the information in any further responses to the same or related queries.
- (2) Under subclause (1):
- (a) an invoice and any request for payment, reminder notice, notice of late payment, demand, or disconnection notice in respect of the amount in the invoice are on the same matter; but
  - (b) invoices that apply to different periods are not on the same matter.

Clause 11.30D: inserted, on 1 April 2021, by clause 4 of the Electricity Industry Participation Code Amendment (Requirements to Improve Awareness of Dispute Resolution Scheme and the Electricity Plan Comparison Site) 2020.

### 11.30E Meaning of “related entity”

For the purposes of clause 11.30A and 11.30B, the term “related entity” has the meaning set out in section 2(3) of the Companies Act 1993, where the reference in that section to “company” is read as if it referred to either a “company” or a “body corporate”.

Clause 11.30E: inserted, on 1 April 2021, by clause 4 of the Electricity Industry Participation Code Amendment (Requirements to Improve Awareness of Dispute Resolution Scheme and the Electricity Plan Comparison Site) 2020.

### 11.31 Customer and embedded generator queries

- (1) If a **trader** receives a request from a customer of the **trader** or a person authorised by a customer of the **trader** for the customer’s **ICP identifier**, the **trader** must provide that information no later than 3 **business days** after receiving the request.
- (2) If a **distributor** receives a request from a customer or **embedded generator** whose **ICP** is connected to the **distributor’s network** for the customer’s or **embedded generator’s ICP identifier**, or a person authorised by such a customer or **embedded generator**, the **distributor** must provide that information no later than 3 **business days** after receiving the request.

Compare: Electricity Governance Rules 2003 rule 28 part E

Clause 11.31(1): amended, on 1 November 2018, by clause 46(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 11.31(2): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 11.31(2): amended, on 5 October 2017, by clause 217 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11.31(2): amended, on 1 November 2018, by clause 46(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

### 11.32 Reliance on registry

A **participant** does not breach this Code just because the **participant** does something relying on an incorrect record in the **registry**.

Compare: Electricity Governance Rules 2003 rule 29 part E

*Access by consumers to information about their own electricity consumption*

Cross Heading: inserted, on 1 February 2016, by clause 5 of the Electricity Industry Participation Code Amendment (Access to Retail Data) 2014.

**11.32A Retailers must give information about consumer electricity consumption**

- (1) Each **retailer** must, if requested by a **consumer** with whom the **retailer** has a contract to supply **electricity**, or with whom the **retailer** has had such a contract in the last 24 months, give the **consumer** any of the information specified in subclause (2) that the **consumer** requests.
- (2) The information referred to in subclause (1) is information relating to any period in the 24 months preceding the request—
  - (a) about the **consumer's** consumption of **electricity** relating to each **ICP** at which the **retailer** supplied **electricity** to the **consumer**; and
  - (b) used by the **retailer** to—
    - (i) calculate the amount of **electricity** consumed by the **consumer** at each **ICP**; or
    - (ii) provide any service to the **consumer**.

Clause 11.32A: inserted, on 1 February 2016, by clause 5 of the Electricity Industry Participation Code Amendment (Access to Retail Data) 2014.

**11.32B Requests for information**

- (1) A **retailer** to which a request is made must give the information to the **consumer** no later than 5 **business days** after the date on which the request is made.
- (2) In responding to a request, the **retailer** must comply with the procedures, and any relevant **EIEP, published** by the **Authority** under clause 11.32F.
- (3) A **retailer** must not charge a fee for responding to a request, but if 4 requests in respect of a **consumer's** information have been made in a 12 month period, the **retailer** may impose a reasonable charge for further requests in that 12 month period.

Clause 11.32B: inserted, on 1 February 2016, by clause 5 of the Electricity Industry Participation Code Amendment (Access to Retail Data) 2014.

Clause 11.32B(2): amended, on 1 February 2016, by clause 43 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 11.32B(2): amended, on 5 October 2017, by clause 218 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**11.32C Retailers must give written notice to consumers of availability of information**

Each **retailer** must give written notice to each **consumer** with whom it has a contract to supply **electricity** of the **consumer's** ability to make a request to the **retailer** under clause 11.32B, so that the **consumer** is given written notice at least once in each year.

Clause 11.32C Heading: amended, on 5 October 2017, by clause 219(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11.32C: inserted, on 1 February 2016, by clause 5 of the Electricity Industry Participation Code Amendment (Access to Retail Data) 2014.

Clause 11.32C: amended, on 5 October 2017, by clause 219(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 11.32D Information security

A **retailer** that receives a request for information under clause 11.32B—

- (a) must not give access to that information unless it is satisfied as to the identity of the **consumer** making the request; and
- (b) must ensure, by the adoption of appropriate procedures, that any information intended for a **consumer** is received—
  - (i) only by the **consumer**; or
  - (ii) where the request is made by an agent of the **consumer**, only by the **consumer** or the **consumer's** agent.

Clause 11.32D: inserted, on 1 February 2016, by clause 5 of the Electricity Industry Participation Code Amendment (Access to Retail Data) 2014.

### 11.32E Agents

If a **consumer** authorises an agent to request information under clause 11.32B on behalf of the **consumer**, a **retailer** must deal with any request from the agent for information about the **consumer** under clause 11.32B in accordance with:

- (a) clauses 11.32A and 11.32EB;
- (b) clause 11.32ED, if a request:
  - (i) includes a statement from the agent that the agent has obtained, or the request is accompanied by, a written authority from the **consumer** in the form and containing the information required by Schedule 11.6; and
  - (ii) the request is made through the **EIE System**; and
- (c) the Privacy Act 2020, where applicable.

Clause 11.32E: inserted, on 1 February 2016, by clause 5 of the Electricity Industry Participation Code Amendment (Access to Retail Data) 2014.

Clause 11.32E: amended, on 1 March 2020, by clause 5(a) and (b) of the Electricity Industry Participation Code Amendment (Requirements and Processes for Information Requests by Agents) 2020.

Clause 11.32E(c): amended, on 1 March 2024, by clause 46 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

### 11.32EA Retailer actions on receipt of requests from agents

- (1) A **retailer**, after receiving a request under clause 11.32B from an agent on behalf of a **consumer**, must:
  - (a) make a decision on the request, and advise the agent of that decision, as soon as reasonably practicable; and
  - (b) provide the information requested within the timeframe required by clause 11.32B unless there are grounds for refusing the request under clause 11.32EB.
- (2) If the **retailer** considers, in accordance with subclause (1), that there are grounds for refusing the request, the **retailer** must, before refusing the request:
  - (a) consider whether any further information could reasonably be provided by the agent to satisfy the **retailer**; and
  - (b) request any such further information from the agent, specifying the further information required in detail.
- (3) If further information is provided under subclause (2)(b), the **retailer** upon receiving the further information must:

- (a) make a final decision on the request, and advise the agent of that decision, as soon as reasonably practicable; and
  - (b) provide the information requested within the timeframe required by clause 11.32B as calculated from the time the **retailer** receives the further information, unless there are grounds for refusing the request under clause 11.32EB.
- (4) If a **retailer** decides to refuse a request, in advising the agent of that decision, the **retailer** must:
- (a) indicate the ground or grounds under clause 11.32EB(1) that the **retailer** is relying on to refuse the request; and
  - (b) provide the agent with the detailed reasons as to why that ground or grounds applies or apply.
- (5) If a **retailer** decides to grant a request in full, the **retailer** meets the obligation to advise the agent of that decision by providing the information to the agent in accordance with subclauses (1)(b) and (3)(b).
- (6) The obligations in subclauses (1)(a) and (3)(a) do not detract from the obligations in subclauses (1)(b) and (3)(b), respectively.

Clause 11.32EA: inserted, on 1 March 2020, by clause 6 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Information Requests by Agents) 2020.

### 11.32EB Decisions on requests

- (1) A **retailer** that receives a request under clause 11.32B from an agent on behalf of a **consumer** must grant the request and provide the information unless the **retailer** believes on reasonable grounds:
- (a) that the **consumer** has not authorised the request;
  - (b) that complying with the request would otherwise cause the **retailer** to breach its obligations under the Privacy Act 2020 (where it applies); or
  - (c) that:
    - (i) if the request is accompanied by a written authority in the form and containing the information required by Schedule 11.6 or the agent subsequently provides a copy of such an authority, any of the information required by Schedule 11.6 is incorrect in a material way, such that the **retailer** cannot be satisfied of the matters in paragraphs (a) or (b) or is unable to identify the **consumer** the request relates to; or
    - (ii) in any other situation, the **retailer** is unable to identify the **consumer** the request relates to.
- (2) A **retailer** may not refuse a request under clause 11.32B from an agent on behalf of a **consumer** on the basis that the request or any authorisation relating to the request is not in a particular form, or does not follow a particular process.

Clause 11.32EB: inserted, on 1 March 2020, by clause 6 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Information Requests by Agents) 2020.

Clause 11.32EB(1)(b): amended, on 1 March 2024, by clause 47 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

### 11.32EC Requirements for agents who are participants

- (1) This clause applies to each **participant** who wishes to make or who makes a request for information to a **retailer** under clause 11.32B as an agent on behalf of a **consumer**.

- (2) Before making the request, the **participant** must obtain an authorisation from the **consumer** for the **participant** to request the transfer of the information to the agent on behalf of the **consumer**.
- (3) The **participant** must:
  - (a) retain a copy of the authorisation under subclause (2) or otherwise retain evidence that the **consumer** has provided the authorisation required by subclause (2); and
  - (b) provide a copy of the authorisation or other evidence to the **retailer**, if requested by the **retailer**.

Clause 11.32EC: inserted, on 1 March 2020, by clause 6 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Information Requests by Agents) 2020.

### **11.32ED Additional requirements on retailers for authorisations in prescribed form and requests received through the EIE System**

- (1) This clause applies where an agent requests information from a **retailer** on behalf of a **consumer** under clause 11.32B and:
  - (a) subject to clause 11.32EE, either:
    - (i) the request includes a statement from the agent that the agent has obtained a written authority from the **consumer** in the form and containing the information required by Schedule 11.6 (being an authority that remains in force at the date the request is made); or
    - (ii) the agent separately provides a written authority in the form and containing the information required by Schedule 11.6 or a copy of such a written authority (being an authority that remains in force at the date the request is made); and
  - (b) the request is made through the **EIE System**.
- (2) If this clause applies:
  - (a) the **retailer** must use all reasonable endeavours to take the steps in clauses 11.32EA(1)(a) and 11.32EA(2), as applicable, within 2 **business days** of the later of:
    - (i) receiving the request; or
    - (ii) receiving a copy of a written authority under subparagraph (1)(a)(ii); and
  - (b) where clause 11.32EA(3) applies, the **retailer** must use all reasonable endeavours, within 2 **business days** of receiving further information from the agent, to take the steps in clause 11.32EA(3)(a).
- (3) Where clause 11.32EA(2) applies, the request may include a request that the agent provide a copy of the written authority referred to in subclause (1)(a), if not provided with the request.
- (4) If a request is made through the **EIE System**, but the **retailer** believes on reasonable grounds that the request does not meet the requirements of the **EIEP**, subclauses (2) and (3) do not apply but, for the avoidance of doubt, the **retailer** must still comply with clauses 11.32B, 11.32EB and 11.32EC.

Clause 11.32ED: inserted, on 1 March 2020, by clause 6 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Information Requests by Agents) 2020.

### 11.32EE Requirements for written authorities under Schedule 11.6

- (1) Each written authority, for the purposes of clause 11.32ED, must include or be accompanied by:
  - (a) if the **consumer** is an individual (being a natural person), an **electronic signature** or physical signature of the **consumer** or of a person on behalf of the **consumer** (in which case, evidence of that person's authority to sign on behalf of the **consumer** is required) or other evidence that the **consumer** has approved the authority; or
  - (b) if the **consumer** is not an individual (not being a natural person), an **electronic signature** or physical signature of an authorised representative of the **consumer** or other evidence that the **consumer** has approved the authority.
- (2) Each **electronic signature**, for the purposes of subclause (1), must meet the requirements of sections 226 and 228 of the Contract and Commercial Law Act 2017.  
Clause 11.32EE: inserted, on 1 March 2020, by clause 6 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Information Requests by Agents) 2020.

### 11.32EF Revocation of authority

- (1) If a **retailer** receives notification from a **consumer** that the **consumer** has revoked an authority, the **retailer** must notify the agent within 2 **business days** of receiving the notification that the authority is revoked.
- (2) If an agent that is a **participant** receives notification from a **consumer** that the **consumer** has revoked the agent's authority, the agent must notify the **retailer** within 2 **business days** of receiving the notification that the authority is revoked.  
Clause 11.32EF: inserted, on 1 March 2020, by clause 6 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Information Requests by Agents) 2020.

### 11.32EG Authority may prescribe EIE System

- (1) The **Authority** may prescribe a system for the purpose of clauses 11.32E to 11.32ED for the:
  - (a) exchange of information between **participants**;
  - (b) the provision of information by **participants** to other **participants** or other persons; and
  - (c) the making of requests for information by **participants** or other persons to **participants**.
- (2) The **Authority** must advise **participants** and other parties of any system it prescribes under subclause (1) by posting a notice of the prescribed system on the **Authority's** website.  
Clause 11.32EG: inserted, on 1 March 2020, by clause 6 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Information Requests by Agents) 2020.

### 11.32F Authority to publish procedures for responding to requests for consumption information

- (1) The **Authority** must—
  - (a) **publish**, and keep **published**, procedures under which a **retailer** must respond to a request from a **consumer** under clause 11.32B; and
  - (b) prescribe 1 or more **EIEPs** with which a **retailer** must comply when responding to such a request.

- (1A) The **Authority** must **publish** an **EIEP** it prescribes under subclause (1).
- (2) The procedures **published** by the **Authority** must specify the manner in which information must be given to **consumers**.
- (3) Each **EIEP** prescribed by the **Authority** must specify 1 or more formats in which information must be given to **consumers**.
- (4) Before the **Authority** prescribes an **EIEP** under subclause (1), or amends an **EIEP** that it has prescribed under subclause (1), it must consult with the **participants** that the **Authority** considers are likely to be affected by the **EIEP**.
- (5) The **Authority** need not comply with subclause (4) if it proposes to amend an **EIEP** prescribed under subclause (1) if the **Authority** is satisfied that—
  - (a) the nature of the amendment is technical and non-controversial; or
  - (b) there has been adequate prior consultation so that the **Authority** has considered all relevant views.

Clause 11.32F Heading: amended, on 5 October 2017, by clause 220(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11.32F: inserted, on 1 February 2016, by clause 5 of the Electricity Industry Participation Code Amendment (Access to Retail Data) 2014.

Clause 11.32F: substituted, on 1 February 2016, by clause 44 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 11.32F(1): replaced, on 5 October 2017, by clause 220(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11.32F(1A): inserted, on 5 October 2017, by clause 220(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 11.32F(2) to (5): amended, on 5 October 2017, by clause 220(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### **11.32G Retailers must provide information about generally available retail tariff plans**

- (1) If any person asks a **retailer** to provide information about 1 or more of the **retailer's** current **generally available retail tariff plans**, the **retailer** must give the requested information to the person no later than **5 business days** after receiving the request.
- (2) If the person requests that information be provided under subclause (1) in a manner or format that differs from the manner or format the **retailer** typically uses to provide such information, the **retailer** may impose a reasonable charge for providing the information in the manner or form requested.

Clause 11.32G: inserted, on 1 February 2016, by clause 6 of the Electricity Industry Participation Code Amendment (Access to Retail Tariff Information) 2015.

### **11.33 Authority may direct registry to be suspended *[Expired]***

Clause 11.33: inserted, from 24 May 2013 to 29 December 2013, by clause 4 of the Electricity Industry Participation (Transitional Provisions for New Metering Arrangements) Code Amendment 2013.

### **11.34 Registry manager, distributors, and traders not required to comply with obligations when registry suspended *[Expired]***

Clause 11.34: inserted, from 24 May 2013 to 29 December 2013, by clause 4 of the Electricity Industry Participation (Transitional Provisions for New Metering Arrangements) Code Amendment 2013.

### **11.35 Registry manager and traders not required to comply with specified provisions after registry resumes operation *[Expired]***

Clause 11.35: inserted, from 24 May 2013 to 29 December 2013, by clause 4 of the Electricity Industry Participation (Transitional Provisions for New Metering Arrangements) Code Amendment 2013.

**11.36 Clauses to expire *[Expired]***

Clause 11.36: inserted, from 24 May 2013 to 29 December 2013, by clause 4 of the Electricity Industry Participation (Transitional Provisions for New Metering Arrangements) Code Amendment 2013.

---

cl 11.7

**Schedule 11.1**  
**Creation and management of ICPs, ICP identifiers and NSPs**

*ICPs and ICP identifiers*

**1 ICP identifiers**

- (1) A **distributor** must create an **ICP identifier** for each **ICP** on each **network** for which the **distributor** is responsible in accordance with the following format:

yyyyyyyyyyxxccc

where

yyyyyyyyyy is a numerical sequence provided by the **distributor**

xx is a code assigned by the **Authority** to the issuing **distributor** that ensures the **ICP** is unique

ccc is a checksum generated according to the algorithm provided by the **Authority**.

- (2) The **ICP identifier** must be used by a **participant** in all communications with the **registry manager** to identify—
- (a) the point at which a **trader** is deemed to convey **electricity** to a **consumer** or from an **embedded generating station**; and
  - (b) the **point of connection** between an **embedded network** and its parent **network**, or the **point of connection** between a **shared unmetered load** and its **network**.
- (3) Despite any clause to the contrary, only the obligations in this clause and clauses 2, 6 and 7(1)(a) to (e), (l) and (m) apply if an **ICP identifier** is used to **identify** a—
- (a) **point of connection** between an **embedded network** and its parent **network**; or
  - (b) **point of connection** between **shared unmetered load** and its **network**.
- (4) If an **ICP identifier** is used in the management of the status of the **ICP**, the obligations in clauses 13, 16 and 20 also apply.

Compare: Electricity Governance Rules 2003 clause 1.1 schedule E1  
Clause 1(1) and (2): amended, on 5 October 2017, by clause 221 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**2 Address**

- (1) Each **ICP identifier** must have a location address that allows the **ICP** to be readily located.
- (2) Despite subclause (1), the address of an **ICP identifier** for **distributed unmetered load** may be the location of the **distributed unmetered load** database.

Compare: Electricity Governance Rules 2003 clause 1.2 schedule E1

Clause 2(2): inserted, on 29 August 2013, by clause 6 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

### **3 Electrically disconnecting**

- (1) Subject to subclause (2), a **distributor** must not create an **ICP identifier** or connect an **ICP** created after 7 October 2002 unless—
  - (a) the **ICP identifier** is for an **ICP** that can be **electrically disconnected** without **electrically disconnecting** another **ICP**; and
  - (b) the **ICP** can be **electrically disconnected** without **electrically disconnecting** another **ICP**.
- (2) Subclause (1) does not apply if the **ICP** is—
  - (a) the **point of connection** between a **network** and an **embedded network**; or
  - (b) an **ICP** that represents the consumption calculated by the difference between the total consumption for the **embedded network** and all other **ICPs** on the **embedded network**.
- (3) A **distributor** must not—
  - (a) connect a new **ICP** to an existing **ICP** in series unless the existing **ICP** is of the type described in subclause (2)(a) or (2)(b); or
  - (b) create a new **ICP identifier** for a new or existing **ICP** in series with an existing **ICP** unless the existing **ICP** is of the type described in subclause (2)(a) or (2)(b) and the **distributor** is responsible for both the new and existing **ICPs**.

Compare: Electricity Governance Rules 2003 clause 1.3 schedule E1

Clause 3 Heading: replaced, on 5 October 2017, by clause 222(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 3: amended, on 5 October 2017, by clause 222(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 3: replaced, on 1 March 2024 by clause 48 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

### **4 Authority may grant dispensation**

The **Authority** may, by giving written notice, grant a dispensation from the requirements of clause 3 for an **ICP** that cannot be **electrically disconnected** without **electrically disconnecting** another **ICP**.

Compare: Electricity Governance Rules 2003 clause 1.4 schedule E1

Clause 4: amended, on 5 October 2017, by clause 223 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 4: amended, on 1 November 2018, by clause 47 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

### **5 Electrical load**

The electrical load associated with an **ICP** is deemed to be supplied through 1 **network supply point** only.

Compare: Electricity Governance Rules 2003 clause 1.5 schedule E1

### **6 Loss category**

An **ICP** must have a single **loss category** code that is referenced in such a way as to identify the associated **loss factors**.

Compare: Electricity Governance Rules 2003 clause 1.6 schedule E1

*Provision of ICP information to the registry manager*

Cross heading: amended, on 5 October 2017, by clause 224 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**7 Distributors to provide ICP information to registry manager**

- (1) A **distributor** must, for each **ICP** on the **distributor's network**, provide the following information to the **registry manager**:
- (a) the location address of the **ICP identifier**:
  - (b) subject to subclause (4), the **NSP identifier** of the **NSP** to which the **ICP** is usually connected:
  - (c) the **installation type** code assigned to the **ICP**:
  - (d) the **reconciliation type** code assigned to the **ICP**:
  - (e) the **loss category** code and **loss factors** for each **loss category** code assigned to the **ICP**:
  - (f) if the **ICP** connects the **distributor's network** to an **embedded generating station** that has a capacity of 10 **MW** or more, the information required by subclause (6), in accordance with subclause (7):
  - (g) the **price category** code assigned to the **ICP**, which may be a placeholder **price category** code only if the **distributor** is unable to assign the actual **price category** code because the capacity or **volume information** required to assign the actual **price category** code cannot be determined before **electricity** is traded at the **ICP**:
  - (h) if the **price category** code assigned under paragraph (g) requires one or more values for the capacity of the **ICP**, the **chargeable capacity** of the **ICP**, as follows:
    - (i) if the **chargeable capacity** cannot be determined before **electricity** is traded at the **ICP**, a placeholder **chargeable capacity**:
    - (ii) if the capacity value or values can be determined for a **billing period** from the **metering information** collected for that **billing period**, no **chargeable capacity**:
      - (iia) if there is more than one capacity value at the **ICP**, and one or more, but not all, of those capacity values can be determined for a **billing period** from the **metering information** collected for that **billing period**—
        - (A) no capacity value recorded in the **registry** field for the **chargeable capacity**; and
        - (B) either the term "POA" or all other capacity values, recorded in the **registry** field in which the **distributor** installation details are also recorded:
      - (iib) if there is more than one capacity value at the **ICP**, and none of those capacity values can be determined for a **billing period** from the **metering information** collected for that **billing period**—
        - (A) the annual capacity value recorded in the **registry** field for the **chargeable capacity**; and
        - (B) either the term "POA" or all other capacity values, recorded in the **registry** field in which the **distributor** installation details are also recorded:
    - (iii) in any other case, the actual **chargeable capacity**:

- (i) the **distributor** installation details of the **ICP** determined by the **price category** code assigned to the **ICP** (if any), which may be placeholder **distributor** installation details only if the **distributor** is unable to assign the actual **distributor** installation details because the capacity or **volume information** required to assign the actual **distributor** installation details cannot be determined before **electricity** is traded at the **ICP**;
  - (j) the **participant identifier** of the first **trader** who has entered into an arrangement with a customer or an **embedded generator** to sell or purchase **electricity** at the **ICP** (only if the information is provided by the first **trader**);
  - (k) the status of the **ICP** determined in accordance with clauses 12 to 20;
  - (l) designation of the **ICP** as "Dedicated" if the **ICP** is located in a **balancing area** that has more than 1 **NSP** located within it, and—
    - (i) the **ICP** will be supplied only from the **NSP** with the **NSP identifier** provided under paragraph (b); or
    - (ii) the **ICP** is a **point of connection** between a **network** and an **embedded network**;
  - (m) if **unmetered load**, other than **distributed unmetered load**, is associated with the **ICP**, the type and capacity in kW of the **unmetered load** (if the **distributor** knows that information);
  - (n) if **shared unmetered load** is associated with the **ICP**, a list of the **ICP identifiers** of the **ICPs** that are associated with the **unmetered load**;
  - (o) if the **ICP** connects the **distributor's network** to **distributed generation**,—
    - (i) the **nameplate capacity** of the **distributed generation**; and
    - (ii) the generation fuel type of the **distributed generation**;
  - (p) the date on which the **ICP** is initially **electrically connected**.
- (1A) For the purposes of subclause (1)(h), if the **price category** assigned to the **ICP** requires information additional to **chargeable capacity** to unambiguously define the line charges, the additional information may be contained in the **distributor** installation details field of the **registry**.
- (2) The **distributor** must provide the information specified in subclauses (1)(a) to (1)(o) to the **registry manager** as soon as practicable after the **ICP identifier** for the **ICP** to which the information relates is created, and before **electricity** is traded at the **ICP**.
- (2A) The **distributor** must provide the information specified in subclause (1)(p) to the **registry manager** no later than 10 **business days** after the date on which the **ICP** is initially **electrically connected**.
- (2B) Despite subclause (2A), the **distributor** is not required to provide the information specified in subclause (1)(p) if the date on which the **ICP** is initially **electrically connected** is earlier than 29 August 2013.
- (3) The **distributor** must provide the following information to the **registry manager** no later than 10 **business days** after the trading of **electricity** at the **ICP** commences:
- (a) the actual **price category** code assigned to the **ICP**;
  - (b) the actual **chargeable capacity** of the **ICP** determined by the **price category** code assigned to the **ICP** (if any):

- (c) the actual **distributor** installation details of the **ICP** determined by the **price category** code assigned to the **ICP** (if any).
- (4) If a **distributor** cannot identify the **NSP** that is connected to an **ICP**, the **distributor** must nominate the **NSP** that the **distributor** thinks is most likely to be connected to the **ICP**, taking into account the flow of **electricity** within the **distributor's network**.
- (5) An **ICP** is deemed to be connected to the **NSP** nominated by the **distributor** under subclause (1)(b).
- (6) If a **distributor** assigns a **loss category** code to an **ICP** on the **distributor's network** that connects the **distributor's network** to an **embedded generating station** that has a capacity of 10MW or more—
- (a) the **loss category** code assigned to the **ICP** must be unique and must not be assigned to any other **ICP** on the **distributor's network**; and
- (b) the **distributor** must provide the following information to the **reconciliation manager**:
- (i) the unique **loss category** code assigned to the **ICP**;
- (ii) the **ICP identifier** of the **ICP**;
- (iii) the **NSP identifier** of the **NSP** to which the **ICP** is connected;
- (iv) the plant name of the **embedded generating station**.
- (7) The **distributor** must provide the information in subclause (6) no later than 5 **business days** before the **distributor** assigns the **loss category** code.
- (8) A **distributor** may provide the **registry manager** with global positioning system coordinates for each **ICP** on the **distributor's network**.
- (9) If a **distributor** provides the global positioning system coordinates of an **ICP** to the **registry manager** under subclause (8), it must provide the coordinates—
- (a) as New Zealand Transverse Mercator 2000 (NZTM2000) coordinates as defined in Land Information New Zealand's LINZS25002 standard (Standard for New Zealand Geodetic Datum 2000 Projections); or
- (b) in a format specified by the **Authority**.

Compare: Electricity Governance Rules 2003 clause 2 schedule E1

Clause 7(1) Heading: amended, on 5 October 2017, by clause 225(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 7(1): amended, on 15 May 2014, by clause 23 of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

Clause 7(1), (2), (2A), (3), (8) and (9): amended, on 5 October 2017, by clause 225(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 7(1)(a): amended, on 29 August 2013, by clause 16 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 7(1)(b): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 7(1)(b), (4), (5) and (6)(b)(iii): amended, on 5 October 2017, by clause 225(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 7(1)(h): substituted, on 29 August 2013, by clause 7(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

Clause 7(1)(h): amended, on 1 February 2019, by clause 48(1)(a) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 7(1)(h)(ii): replaced, on 1 February 2019, by clause 48(1)(b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 7(1)(h)(iia): inserted, on 1 February 2019, by clause 48(1)(b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 7(1)(h)(iib): inserted, on 1 February 2019, by clause 48(1)(b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 7(1)(j): amended, on 1 November 2018, by clause 48(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 7(1)(o) and (p): inserted, on 29 August 2013, by clause 5(1) of the Electricity Industry Participation (Additional Registry Fields) Code Amendment 2012.

Clause 7(1)(p), (2A) and (2B): amended, on 5 October 2017, by clause 225(4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 7(1A): inserted, on 29 August 2013, by clause 7(2) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

Clause 7(2): amended, on 29 August 2013, by clause 5(2) of the Electricity Industry Participation (Additional Registry Fields) Code Amendment 2012.

Clause 7(2A) and (2B): inserted, on 29 August 2013, by clause 5(3) of the Electricity Industry Participation (Additional Registry Fields) Code Amendment 2012.

Clause 7(4): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 7(5): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 7(6): amended, on 21 September 2012, by clause 15(1) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

Clause 7(6)(b)(iii): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 7(8) and (9): inserted, on 29 August 2013, by clause 5(4) of the Electricity Industry Participation (Additional Registry Fields) Code Amendment 2012.

## **8 Distributors to change ICP information provided to registry manager**

- (1) If information about an **ICP** provided to the **registry manager** in accordance with clause 7 changes, the **distributor** in whose **network** the **ICP** is located must give written notice to the **registry manager** of the change.
- (2) Subject to subclause (2A), the **distributor** must give the notice—
  - (a) in the case of a change to the information referred to in clause 7(1)(b) (other than a change that is the result of the **commissioning** or **decommissioning** of an **NSP**), no later than **8 business days** after the change takes effect; and
  - (aa) in the case of a change to the information provided under clauses 7(1)(g), 7(1)(h) and 7(1)(i), where the change is backdated, no later than **3 business days** after the **distributor** and the **trader** responsible for the **ICP** have agreed on the change; and
  - (ab) in the case of **decommissioning** an **ICP**, by the later of—
    - (i) **3 business days** after the **registry manager** has advised the **distributor** under clause 11.29 that the **ICP** is ready to be **decommissioned**; and
    - (ii) **3 business days** after the **distributor** has **decommissioned** the **ICP**; and
  - (b) in every other case, no later than **3 business days** after the change takes effect.
- (2A) Where the functioning of the **registry** prevents the **distributor** from updating the **registry** until after a **metering equipment provider** has completed its obligations relating to the **ICP** in accordance with Schedule 11.4, the timeframes in subclause (2) start from the day the **metering equipment provider** completes those obligations.
- (3) A **distributor** is not required to give written notice if information provided in accordance with clause 7(1)(b) changes, and applies for less than **10 business days**.
- (4) If information provided under clause 7(1)(b) changes, and applies for **10 business days** or more, the **distributor** must—
  - (a) give the notice under subclause (1) no later than **13 business days** after the change takes effect; and
  - (b) include in the notice the date the change occurred as the effective date for the change.

Compare: Electricity Governance Rules 2003 clause 2A schedule E1  
Clause 8 Heading: amended, on 5 October 2017, by clause 226(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 8(1): amended, on 5 October 2017, by clause 226(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 8(2): amended, on 5 October 2017, by clause 226(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 8(2): amended, on 1 March 2024, by clause 49(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024  
Clause 8(2)(a): amended, on 1 November 2018, by clause 49(1)(a) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.  
Clause 8(2)(a): amended, on 1 March 2024, by clause 49(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.  
Clause 8(2)(aa): inserted, on 31 November 2021, by clause 36 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.  
Clause 8(2)(aa): amended, on 1 March 2024, by clause 49(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.  
Clause 8(2)(ab): inserted, on 1 November 2018, by clause 49(1)(b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.  
Clause 8(2)(ab)(ii): amended, on 1 March 2024, by clause 49(4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.  
Clause 8(2A): inserted, on 1 March 2024, by clause 49(5) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.  
Clause 8(3): amended, on 1 August 2019, by clause 49(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.  
Clause 8(3): amended, on 5 October 2017, by clause 226(4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 8(4): replaced, on 1 August 2019, by clause 49(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

## **9 Traders to provide ICP information to registry manager**

- (1) Each **trader** must provide the following information to the **registry manager** for each **ICP** for which it is recorded in the **registry** as having responsibility:
- (a) the **participant identifier** of the **trader**;
  - (b) the **profile** code of each **profile** at that **ICP** approved by the **Authority** in accordance with clause 13 of Schedule 15.5;
  - (c) the **participant identifier** of the **metering equipment provider** for each **category 1 metering installation**, or higher category **metering installation**, for the **ICP**;
  - (d) *[Revoked]*
  - (e) *[Revoked]*
  - (ea) the type of **submission information** that the **trader** will provide to the **reconciliation manager** for the **ICP**;
  - (f) if the settlement type UNM is assigned to the **ICP**—
    - (i) if the load is profiled through an engineering **profile** in accordance with **profile class 2.1**, the code ENG; or
    - (ii) in all other cases, the daily average **unmetered load** in kWh at the **ICP**;
  - (g) the type and capacity of the **unmetered load** at the **ICP** (if any);
  - (h) *[Revoked]*
  - (i) *[Revoked]*
  - (j) the status of the **ICP** determined in accordance with clauses 12 to 20.
  - (k) except as provided in subclause (1A), the relevant business classification code applicable to the customer at the **ICP**, in accordance with business classification codes **published** by the **Authority**.

- (1A) A **trader** must not provide the information specified in subclause (1)(k) if—
  - (a) the **ICP** exists for the purpose of reconciling **embedded network** residual load; or
  - (b) the **ICP** has "Distributor" status as specified in clause 16.
- (2) The **trader** must provide the information specified in subclause (1)(a) to subclause (1)(j) to the **registry manager** no later than 5 **business days** after the **trader** commences trading at the **ICP** to which the information relates.
- (3) The **trader** must provide the information specified in subclause (1)(k) to the **registry manager** no later than 20 **business days** after the **trader** commences trading at the **ICP** to which the information relates.

Compare: Electricity Governance Rules 2003 clause 3 schedule E1

Clause 9 Heading: amended, on 5 October 2017, by clause 227(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9(1): amended, on 29 August 2013, by clause 8(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

Clause 9(1): amended, on 5 October 2017, by clause 227(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9(1)(c): amended, on 29 August 2013, by clause 8(2) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

Clause 9(1)(d): substituted, on 1 December 2011, by clause 14 of the Electricity Industry Participation Code (Distributor Use-of-System Agreements and Distributor Tariffs) Amendment 2011.

Clause 9(1)(d): amended, on 21 September 2012, by clause 15(2) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

Clause 9(1)(d): revoked, on 29 August 2013, by clause 8(3) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

Clause 9(1)(e): revoked, on 15 May 2014, by clause 24 of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

Clause 9(1)(ea): inserted, on 29 August 2013, by clause 8(5) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

Clause 9(1)(f): amended, on 29 August 2013, by clause 8(6) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

Clause 9(1)(h) and (i): revoked, on 29 August 2013, by clause 8(7) and (8) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

Clause 9(1)(k): inserted, on 29 August 2013, by clause 5(5) of the Electricity Industry Participation (Additional Registry Fields) Code Amendment 2012 and Clause 8(9) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

Clause 9(1)(k): amended, on 1 November 2018, by clause 50 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 9(1A): inserted, on 29 August 2013, by clause 8(9) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

Clause 9(2): amended, on 29 August 2013, by clause 8(10) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

Clause 9(2) and (3): amended, on 5 October 2017, by clause 227(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9(3): inserted, on 29 August 2013, by clause 8(11) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

## **10 Traders to change ICP information provided to registry manager**

- (1) If information about an **ICP** provided to the **registry manager** in accordance with clause 9 changes, the **trader** who trades at the **ICP** must give written notice to the **registry manager** of the change.
- (2) Subject to subclause (2A) the **trader** must give the notice no later than 5 **business days** after the change.
- (2A) Where the functioning of the **registry** prevents the **trader** from updating the **registry** until after the **metering equipment provider** has completed its obligations relating to the **ICP** in accordance with Schedule 11.4, the timeframes in subclause (2) start from the day the **metering equipment provider** has completed those obligations.

(3) *[Revoked]*

(4) *[Revoked]*

Compare: Electricity Governance Rules 2003 clause 3A schedule E1

Clause 10 Heading: amended, on 5 October 2017, by clause 228(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 10(1): amended, on 5 October 2017, by clause 228(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 10(2): amended, on 1 March 2024, by clause 50(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Clause 10(2A): inserted, on 1 March 2024, by clause 50(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Clause 10(2) and (3): amended, on 5 October 2017, by clause 228(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 10(3) and (4): inserted, on 29 August 2013, by clause 9 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013 and expire on 26 September 2013.

Clauses 10(3) and (4): revoked, on 1 March 2024, by clause 50(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

## **11 Correction of errors in the registry**

(1) By 0900 hours on the 1<sup>st</sup> **business day** of each **reconciliation period**, the **registry manager** must provide to each **participant** who is required to submit **submission information**, the following:

(a) a list of the **ICPs** at which the **participant** is recorded on the **registry** as **trading** during each **consumption period** being revised in the **reconciliation period**:

(b) all information associated with the **participant's participant identifier**, including the **profiles** for each **ICP**.

(2) If there is an error in the information provided under subclause (1), the **participant** must change the information in the **registry** as soon as practicable after becoming aware of the error.

Compare: Electricity Governance Rules 2003 clause 3B schedule E1

Clause 11(1): amended, on 5 October 2017, by clause 229 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### *Management of ICP status*

## **12 Management of ICP status by distributors and traders**

The status of an **ICP**, as recorded on the **registry**, must be managed by **distributors** and **traders** in accordance with clauses 13 to 20.

Compare: Electricity Governance Rules 2003 clause 4 schedule E1

## **13 “New” status**

The **ICP** status of “New” must be managed by the relevant **distributor** and indicates that—

(a) the associated **electrical facilities** are in the construction phase; and

(b) the **ICP** is not ready for the **trader** to authorise the **electrical connection** of the **ICP**.

Compare: Electricity Governance Rules 2003 clause 4.1 schedule E1

Clauses 13(a): amended, on 1 March 2024, by clause 51 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Clause 13(b): amended, on 5 October 2017, by clause 230 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### 14 “Ready” status

- (1) The **ICP** status of “Ready” must be managed by the relevant **distributor** and indicates that—
  - (a) the associated **electrical facilities** are ready for connecting to the **electricity** supply; or
  - (b) the **ICP** is ready for the **trader** to authorise the **electrical connection** of the **ICP**.
- (2) Before an **ICP** is given the "Ready" status, the relevant **distributor** must—
  - (a) identify the **trader** that has taken responsibility for the **ICP**; and
  - (b) ensure that the **ICP** has a single **price category** code.

Compare: Electricity Governance Rules 2003 clauses 4.2 and 4.3 schedule E1

Clause 14(1): amended, on 5 October 2017, by clause 231 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 14(1)(a): amended, on 15 May 2014, by clause 25 of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

Clause 14(1)(a): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 14(1)(a): amended, on 1 March 2024, by clause 52 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

#### 15 "New" or "Ready" status for 24 months or more

- (1) Subclause (2) applies if—
  - (a) an **ICP** has had the status of "New" for 24 months or more; or
  - (b) an **ICP** has had the status of "Ready" for 24 months or more.
- (2) The **distributor** must—
  - (a) ask the **trader** who intends to trade at the **ICP** whether the **ICP** should continue to have that status; and
  - (b) **decommission** the **ICP** if the **trader** advises that the **ICP** should not continue to have that status.

Compare: Electricity Governance Rules 2003 clause 4.3A schedule E1

Clause 15 Heading: amended, on 5 October 2017, by clause 232 (1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 15: substituted, on 15 May 2014, by clause 26 of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

Clause 15(1): amended, on 5 October 2017, by clause 232(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 15(2)(b): amended, on 5 October 2017, by clause 232(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### 16 “Distributor” status

- (1) The **ICP** status of “Distributor” must be managed by the relevant **distributor** and indicates that the **ICP** record represents a **shared unmetered load** installation or the **point of connection** between an **embedded network** and its parent **network**.
- (2) A **trader** cannot change the status of an **ICP** record with the **ICP** status of “Distributor”.

Compare: Electricity Governance Rules 2003 clause 4.4 schedule E1

#### 17 “Active” status

- (1) The **ICP identifier** status of “Active” must be managed by the relevant **trader** and indicates that—

- (a) the associated **electrical facilities** are **electrically connected**; and
  - (b) a **trader** must provide information related to the **ICP identifier**, in accordance with Part 15, to the **reconciliation manager** for the purpose of compiling **reconciliation information**.
- (2) Before an **ICP** is given the “Active” status, the **trader** must ensure that—
- (a) the **ICP identifier** has only 1 **embedded generator**, **direct purchaser**, or customer of a **retailer**; and
  - (b) the **electricity** consumed is quantified by a **metering installation** or a method of calculation approved by the **Authority**.

Compare: Electricity Governance Rules 2003 clauses 4.5 and 4.6 schedule E1

Clause 17(1)(a): amended, on 29 August 2013, by clause 18 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 17(1)(a): amended, on 5 October 2017, by clause 233 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 17(2)(a): amended, on 1 November 2018, by clause 51 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 17(1): amended, on 31 October 2023, by clause 5 of the Electricity Industry Participation Code Amendment (Clarification of Trader Obligations) 2023.

Clause 17(2)(a): amended, on 31 October 2023, by clause 5 of the Electricity Industry Participation Code Amendment (Clarification of Trader Obligations) 2023.

Clause 17(1)(a): amended, on 1 March 2024, by clause 53 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

## 18 *[Revoked]*

Compare: Electricity Governance Rules 2003 clause 4.6A schedule E1

Clause 18: revoked, on 29 August 2013, by clause 5(7) of the Electricity Industry Participation (Additional Registry Fields) Code Amendment 2012.

## 19 “Inactive” status

(1) Except as provided in subclause (2), the ICP status of “Inactive” must be managed by the relevant trader and indicates that—

- (a) the **ICP** is **electrically disconnected**; or
- (b) **submission information** related to the **ICP** is not required by the **reconciliation manager** for the purpose of compiling **reconciliation information**.

(2) The ICP status of “Inactive” may be managed by the relevant distributor only to indicate that—

- (a) there has been an interruption in electricity supply affecting the ICP; or
- (b) the ICP cannot be electrically disconnected following a request for electrical disconnection.

Compare: Electricity Governance Rules 2003 clause 4.7 schedule E1

Clause 19(a): substituted, on 29 August 2013, by clause 20 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

Clause 19(a): amended, on 5 October 2017, by clause 234 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 19: replaced, on 25 November 2024, by clause 5 of the Electricity Industry Participation Code Amendment (Distributor Agreement Amendments) 2024.

## 20 “Decommissioned” status

(1) The **ICP** status of “Decommissioned” must be managed by the relevant **distributor** and indicates that the **ICP** is permanently removed from future switching and reconciliation processes.

- (2) **Decommissioning** occurs when—
- (a) **electrical facilities** associated with the **ICP** are physically removed; or
  - (b) there is a change in the allocation of electrical loads between **ICPs** with the effect of making the **ICP** obsolete; or
  - (c) in the case of a **distributor-only ICP** for an **embedded network**, the **embedded network** no longer exists.

Compare: Electricity Governance Rules 2003 clause 4.8 schedule E1

Clause 20(2): amended, on 5 October 2017, by clause 235 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 20(2)(a): amended, on 1 March 2024, by clause 54 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

### *Updating registry standing information*

## **21 Updating table of loss category codes**

- (1) Each **distributor** must keep up to date the table in the **registry** of the **loss category** codes that may be assigned to **ICPs** on each **distributor's network**, by entering in the table any new **loss category** codes that may be assigned to an **ICP** on the **distributor's network**.
- (2) Each entry in the table must specify the date on which each **loss category** code takes effect.
- (3) The date that a **loss category** code takes effect must not be earlier than 2 months after the date on which the **loss category** code is entered in the table.
- (4) A **loss category** code takes effect on the specified date.
- (5) To avoid doubt, subclause (3) does not apply to the creation of an **ICP** or to the transfer of an **ICP** from 1 **distributor's network** to another **distributor's network**.

Compare: Electricity Governance Rules 2003 clause 5 schedule E1

## **22 Updating loss factors for loss category codes**

- (1) A **distributor** must enter **loss factors** in the **registry** for each **loss category** code entered on the table in the **registry** under clause 21.
- (2) A **distributor** must ensure that—
  - (a) each **loss category** code has no more than 2 **loss factors** in a calendar month; and
  - (b) each **loss factor** covers a range of **trading periods** within that month so that all **trading periods** have a single applicable **loss factor**.
- (3) A **distributor** who wishes to replace an existing **loss factor** on the table in the **registry** must enter the replaced **loss factor** on the table in the **registry**.
- (4) Each entry in the table must specify the date on which the replaced **loss factor** takes effect.
- (5) The date that a **loss factor** takes effect must not be earlier than 2 months after the date on which the **loss factor** is entered in the table.
- (6) A replaced **loss factor** takes effect on the specified date.
- (7) To avoid doubt, subclause (5) does not apply to the creation of an **ICP** or to the transfer of an **ICP** from 1 **distributor's network** to another **distributor's network**.

- (8) The **registry manager** must **publish** an updated schedule of all **loss category** codes and the **loss factors** for each **loss category** code no later than 1 **business day** after receiving notice of a change.

Compare: Electricity Governance Rules 2003 clause 5A schedule E1

Clause 22(1): amended, on 5 October 2017, by clause 236(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 22(8): amended, on 21 September 2012, by clause 15(3) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

Clause 22(8): amended, on 5 October 2017, by clause 236(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### **23 Updating table of price category codes**

- (1) Each **distributor** must keep up to date the table in the **registry** of the **price category** codes that may be assigned to **ICPs** on each **distributor's network**, by entering in the table any new **price category** codes that may be assigned to an **ICP** on the **distributor's network**.
- (2) Each entry in the table must specify the date on which each **price category** code takes effect.
- (3) The date that a **price category** code takes effect must not be earlier than 2 months after the date on which the **price category** code is entered in the table.
- (4) A **price category** code takes effect on the specified date.
- (5) To avoid doubt, subclause (3) does not apply to the creation of an **ICP** or to the transfer of an **ICP** from 1 **distributor's network** to another **distributor's network**.

Compare: Electricity Governance Rules 2003 clause 6 schedule E1

### **24 Balancing area information**

- (1) A **distributor** must give written notice to the **reconciliation manager** of the establishment of a **balancing area** associated with an **NSP** supplying the **distributor's network**, in accordance with clause 26.
- (2) A **distributor** must give written notice to the **reconciliation manager** of any change to the information provided under subclause (1).
- (3) The notice must—
- specify the date and **trading period** from which the change takes effect; and
  - be given no later than 3 **business days** after the change takes effect.
- (4) The **reconciliation manager** must give written notice to the **registry manager** of changes to **balancing areas** within 1 **business day** after receiving the notice.
- (5) The **registry manager** must **publish** an updated schedule of the mapping between **NSPs** and **balancing areas** within 1 **business day** after receiving the notice.
- (6) The schedule must specify the date and **trading period** from which the change took effect.

Compare: Electricity Governance Rules 2003 clause 7 schedule E1

Clause 24(1), (2) and (4): amended, on 5 October 2017, by clause 237(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 24(3), (4) and (5): amended, on 5 October 2017, by clause 237(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 24(4) and (5): amended, on 5 October 2017, by clause 237(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**25 Creation and decommissioning of NSPs and transfer of ICPs from 1 distributor's network to another distributor's network**

- (1) If an **NSP** is to be created or **decommissioned**,—
  - (a) the **participant** specified in subclause (3) in relation to the **NSP** must give written notice to the **reconciliation manager** of the creation or **decommissioning**; and
  - (b) the **reconciliation manager** must give written notice to the **Authority** and affected **reconciliation participants** of the creation or **decommissioning** no later than 1 **business day** after receiving the notice in paragraph (a).
- (2) If a **distributor** wishes to change the record in the **registry** of an **ICP** that is not recorded as being usually connected to an **NSP** in the **distributor's network**, to transfer the **ICP** so that it is recorded as being usually connected to an **NSP** in the **distributor's network**, the **distributor** must give written notice to the **reconciliation manager**, the **Authority**, and each affected **reconciliation participant** of the transfer.
- (3) The notice required by subclause (1) must be given by—
  - (a) the **grid owner**, if—
    - (i) the **NSP** is a **point of connection** between the **grid** and a **local network**; or
    - (ii) if the **NSP** is a **point of connection** between a **generator** and the **grid**; or
  - (b) the **distributor** for the **local network** who initiated the creation or **decommissioning**, if the **NSP** is an **interconnection point** between 2 **local networks**; or
  - (c) the **embedded network** owner who initiated the creation or **decommissioning**, if the **NSP** is an **interconnection point** between 2 **embedded networks**; or
  - (d) the **distributor** for the **embedded network**, if the **NSP** is a **point of connection** between an **embedded network** and another **network**.
- (4) A **distributor** who is required to give written notice of a transfer under subclause (2) or subclause (3)(d) must comply with Schedule 11.2.
- (5) The **participant** required to give notice under subclause (1) must give notice no later than 30 days prior to the intended date of creation or **decommissioning** of the **NSP**.
- (6) If a **participant** changes the intended date of creation or **decommissioning** after giving notice under subclause (1), the **participant** must give a replacement notice advising the new intended date of creation or **decommissioning**, as soon as possible after the **participant** decides to change the intended date.
- (7) An **embedded network** owner must not give written notice of **decommissioning** an **NSP** under subclause (3)(c) or subclause (3)(d) unless—
  - (a) the **embedded network** owner has changed the status in the **registry** of all **ICPs** recorded as being usually connected to the **NSP** to 'Decommissioned'; or
  - (b) a **distributor** has changed the record in the **registry** of each **ICP** previously recorded as being usually connected to the **NSP**, and with a status in the **registry** of 'Active' or 'Inactive', to record the **ICP** as being usually connected to an **NSP** in the **distributor's network**; or
  - (c) a combination of the changes described in paragraphs (a) and (b) has occurred, so that no **ICP** with a status in the **registry** of 'Active' or 'Inactive' is recorded as being connected to the **NSP** that is to be **decommissioned**.

Compare: Electricity Governance Rules 2003 clause 8 schedule E1  
Clause 25(1), (2), (3) and (4): amended, on 5 October 2017, by clause 238(1) to (6) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 25(2): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 25(2): amended, on 1 March 2022, by clause 37(1)(a) and (b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 25(5) and 25(6): inserted, on 1 February 2021, by clause 45 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 25(7): inserted, on 1 March 2022, by clause 37(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

## **26 Information to be provided if NSPs are created or ICPs are transferred from 1 distributor's network to another distributor's network**

- (1) If a **participant** gives notice under clause 25(1) or (2) of the creation of an **NSP** or the transfer of an **ICP** from 1 **distributor's network** to another **distributor's network**, the **participant** must request that the **reconciliation manager** create a unique **NSP identifier** for the **NSP**.
- (2) The **participant** must make the request—
  - (a) in the case of notice given under clause 25(3)(b) or (c), at least 10 **business days** before the **NSP** is **electrically connected**; and
  - (b) in every other case, at least 1 month before the **NSP** is **electrically connected** or the **ICP** is transferred.
- (3) If a **participant** gives notice under clause 25(1) of the creation of an **NSP**, the **distributor** on whose **network** the **NSP** is located must give the **reconciliation manager** the following information:
  - (a) if the **NSP** is to be located in a new **balancing area** to be created—
    - (i) all relevant details necessary for the **balancing area** to be created; and
    - (ii) notice that the **NSP** to be created is to be assigned to the new **balancing area**; and
  - (b) in every other case, notice of the **balancing area** in which the **NSP** is located.
- (4) If a **participant** gives notice under clause 25(1) or (2) of a creation or transfer that relates to an **NSP** between a **network** and an **embedded network**, the **distributor** who owns the **embedded network** must give written notice to the **reconciliation manager** of the following:
  - (a) the **network** on which the **NSP** will be located after the creation or transfer;
  - (b) the **ICP identifier** for the **ICP** that connects the **network** and the **embedded network**;
  - (c) the date on which the creation or transfer will take effect.
- (5) The **distributor** must give the notice at least 1 month before the creation or transfer.

Compare: Electricity Governance Rules 2003 clause 9 schedule E1

Clause 26(1): amended, on 5 October 2017, by clause 239(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 26(2): amended, on 5 October 2017, by clause 239(2) and (3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 26(2)(a) and (b): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 26(3): amended, on 21 September 2012, by clause 15(4) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

Clause 26(3): amended, on 5 October 2017, by clause 239(4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 26(4): amended, on 5 October 2017, by clause 239(1) and (5) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 26(5): amended, on 5 October 2017, by clause 239(3) and (6) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 27 Information to be provided if ICPs become NSPs

- (1) If a transfer for which notice is given under clause 25 results in an **ICP** becoming an **NSP** at which an **embedded network** connects to a **network**, or in an **ICP** becoming an **NSP** that is an **interconnection point**, the **distributor** who owns the **network** on which the **NSP** will be located after the change must give written notice to any **trader** trading at the **ICP** of the transfer.
- (2) The **distributor** must give the notice at least 1 month before the transfer.

Compare: Electricity Governance Rules 2003 clause 10 schedule E1

Clause 27(1): amended, on 5 October 2017, by clause 240(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 27(2): amended, on 5 October 2017, by clause 240(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 28 Reconciliation manager to allocate new identifiers

The **reconciliation manager** must, within 1 **business day** of receiving notice under clause 25(1) or (2), allocate a unique **NSP identifier** to each **point of connection** or **interconnection point** to which the notice relates in accordance with the following format:

bbbqqqz nnnn

where

bbbqqqz is, in the case of a **local network**, the code for the **GXP** or **GIP** or, in the case of an **embedded network** or the **point of connection** between 2 **local networks**, the code for the **point of connection** to its parent **network**

where

bbb is a combination of 3 alpha characters that form a unique location identifier

qqq is the voltage in kV of the supply bus

z is a numeral allocated to distinguish it from any other supply bus of the same voltage at the same location

nnnn is a **participant identifier** for the **network** owner who from time to time owns the **network** being supplied.

Compare: Electricity Governance Rules 2003 clause 11 schedule E1

Clause 28: amended, on 5 October 2017, by clause 241 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 29 Obligations concerning change in network owner

- (1) If a **network** owner acquires all or part of an existing **network**, the **network** owner must give written notice to the following of the acquisition:
  - (a) the previous **network** owner;
  - (b) the **reconciliation manager**;
  - (c) the **Authority**;
  - (d) every **reconciliation participant** who trades at an **ICP** connected to the **network** or part of the **network** acquired.
- (2) The **network** owner must give the notice at least 1 month before the acquisition.
- (3) The notice must specify—
  - (a) the **ICP identifiers** for which the **network** owner's **participant identifier** must be amended to reflect the acquisition of the **network** or part of the **network** by the **network** owner; and
  - (b) the effective date of the acquisition.
- (4) A **network** owner who acquires all or part of an existing **network** must comply with Schedule 11.2.

Compare: Electricity Governance Rules 2003 clause 12 schedule E1

Clause 29(1): amended, on 5 October 2017, by clause 242(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 29(1)(d): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 29(2): amended, on 5 October 2017, by clause 242(2) and (3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 29(3): amended, on 5 October 2017, by clause 242(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 30 Reconciliation manager to advise registry manager

- (1) The **reconciliation manager** must—
  - (a) advise the **registry manager** of any new or deleted **NSP identifier** no later than 1 **business day** after receiving notice of its creation or deletion; and
  - (b) advise the **registry manager** of any changes to supporting **NSP** information provided by a **distributor** in accordance with clause 26(4) no later than 1 **business day** after receiving the notice.
- (2) The **registry manager** must **publish** an updated schedule of all **NSP identifiers** and supporting information within 1 **business day** of receiving notice in accordance with subclause (1).

Compare: Electricity Governance Rules 2003 clause 13 schedule E1

Clause 30 Heading: amended, on 5 October 2017, by clause 243(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 30(1): amended, on 5 October 2017, by clause 243(2) and (3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 30(2): amended, on 5 October 2017, by clause 243(3) and (4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## Schedule 11.2

cls 25 and 29 of Schedule 11.1

### Transfer of ICPs between distributors' networks

- 1 This Schedule applies if a **distributor** (the applicant **distributor**) wishes to change the record in the **registry** of an **ICP** that is not recorded as being usually connected to an **NSP** in the **distributor's network**, to transfer the **ICP** so that it is recorded as being usually connected to an **NSP** in the applicant **distributor's network**.

Compare: Electricity Governance Rules 2003 clause 1 schedule E1A

Clause 1: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 1: amended, on 5 October 2017, by clause 244 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1: amended, on 1 March 2022, by clause 38(1)(a) and (b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

- 2 The applicant **distributor** must give written notice to the **Authority** of the transfer.

Compare: Electricity Governance Rules 2003 clause 2 schedule E1A

Clause 2: amended, on 5 October 2017, by clause 245 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

- 3 The notice must be in the **prescribed form**.

Compare: Electricity Governance Rules 2003 clause 3 schedule E1A

Clause 3: amended, on 5 October 2017, by clause 246 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

- 4 The notice must be given no later than 3 **business days** before the transfer takes effect.

Compare: Electricity Governance Rules 2003 clause 4 schedule E1A

Clause 4: amended, on 5 October 2017, by clause 247 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

- 5 The applicant **distributor** must give the **Authority** confirmation that the applicant **distributor** has received written consent to the proposed transfer from—

- (a) the **distributor** whose **network** is associated with the **NSP** to which the **ICP** is recorded as being connected immediately before the notice, except if the notice relates to the creation of an **embedded network**; and
- (b) every **trader** who trades **electricity** at any **ICP** nominated at the time of notice as being supplied from the same **NSP** to which the notice relates.

Compare: Electricity Governance Rules 2003 clause 5 schedule E1A

Clause 5(a): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 5: amended, on 5 October 2017, by clause 248 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

- 5A For the purposes of clause 5, the **distributor** (under subclause 5(a)) or the **trader** (under subclause 5(b)) is deemed to have consented to the proposed transfer if the applicant **distributor** has requested in writing the **distributor's** or **trader's** written consent and—

- (a) the **distributor** or **trader** (as the case may be)—

- (i) has not provided written consent; and
- (ii) has not indicated in writing that it refuses to give written consent; and
- (b) more than 40 **business days** (or such other period as the applicant **distributor** agrees with the **distributor** or **trader**) have passed since the applicant **distributor** requested the **distributor's** or **trader's** written consent; and
- (c) during the 40 **business days** (or such other period as the applicant **distributor** agrees with the **distributor** or **trader**) the applicant **distributor** has—
  - (i) checked the **registry** to ensure it has sought consent from the correct **distributor** or **trader**; and
  - (ii) made reasonable endeavours to contact the **distributor** or **trader** and obtain a response.

Clause 5A: inserted, on 1 March 2022, by clause 38(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

- 5B For the purposes of clause 5, the **distributor** (under subclause 5(a)) or the **trader** (under subclause 5(b)) must not unreasonably withhold consent to the proposed transfer.
- Clause 5B: inserted, on 1 March 2022, by clause 38(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

- 6 If a notice relates to an **embedded network**, it must relate to every **ICP** on the **embedded network**.

Compare: Electricity Governance Rules 2003 clause 6 schedule E1A

Clause 6: amended, on 5 October 2017, by clause 249 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

- 7 The **Authority** must not authorise the change of any information in the **registry** if clauses 2 to 5 are not complied with.

Compare: Electricity Governance Rules 2003 clause 7 schedule E1A

Clause 7: amended, on 29 August 2013, by clause 10 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

Clause 7: amended, on 15 May 2014, by clause 27 of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

Clause 7: amended, on 5 October 2017, by clause 250 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

- 7A Despite clause 7, the **Authority** may authorise the change if the applicant **distributor** has not given written notice to the **Authority** within the time frame required under clause 4, if—

- (a) the applicant **distributor** has complied with clauses 2, 3 and 5; and
- (b) the **Authority** considers that it has not been materially disadvantaged by the applicant **distributor's** failure to comply with clause 4.

Clause 7A: inserted, on 15 May 2014, by clause 28 of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

Clause 7A: amended, on 5 October 2017, by clause 251 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

- 8 The notice must include any information requested by the **Authority** from time to time.

Compare: Electricity Governance Rules 2003 clause 8 schedule E1A

Clause 8: amended, on 5 October 2017, by clause 252 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

- 9 The **registry manager** must remove from the **registry** any information the **registry manager** has received under clause 7 of Schedule 11.1 if the information—
- (a) relates to an **ICP** for which an applicant **distributor** has given written notice of a transfer under this Schedule; and
  - (b) was to come into effect after the date on which the **Authority** authorises the change of information in the **registry** under this Schedule.

Compare: Electricity Governance Rules 2003 clause 9 schedule E1A  
Clause 9: replaced, on 5 October 2017, by clause 253 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

- 10 A transfer may take effect on a date that is before the date on which the notice is given only with the consent of the **Authority**.

Compare: Electricity Governance Rules 2003 clause 10 schedule E1A  
Clause 10: amended, on 5 October 2017, by clause 254 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

- 11 Each **reconciliation participant** must take a **validated meter reading** or **permanent estimate** on the date a transfer becomes effective for use in the creation of the **reconciliation participant's** submission file, unless the **Authority** authorises the **reconciliation manager** to provide additional **seasonal adjustment shapes** under clause 12.

Compare: Electricity Governance Rules 2003 clause 11 schedule E1A

- 12 The **Authority** may authorise the **reconciliation manager** to provide additional **seasonal adjustment shapes** for use in the creation of each **reconciliation participant's** submission file.

Compare: Electricity Governance Rules 2003 clause 12 schedule E1A

## Schedule 11.3 Switching

cl 11.15

### *Overview*

Cross heading: inserted on 9 October 2015, by clause 5(1) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

### **1A Application of Schedule**

- (1) This Schedule prescribes 3 processes for switching **ICPs** as follows:
  - (a) a standard switch process that applies in the circumstances described in clause 1(1):
  - (b) a switch move process that applies in the circumstances described in clause 8(1):
  - (c) a gaining **trader** switch process that applies in the circumstances described in clause 13(1).
- (2) If a **trader** proposes switching an **ICP**, the **trader** must use one of the switch processes set out in this Schedule.

Clause 1A Heading: amended, on 1 November 2018, by clause 52(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 1A: inserted on 9 October 2015, by clause 5(2) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 1A(2): inserted, on 1 November 2018, by clause 52(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

### *Standard switch process*

Cross heading: amended on 9 October 2015, by clause 6 of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

### **1 Standard switch process for ICPs**

- (1) A standard switch process applies only when a **trader** (the "gaining **trader**") has an arrangement with a customer or **embedded generator** to commence trading **electricity** with the customer or **embedded generator** at, or to otherwise assume responsibility under clause 11.18(1) for, an **ICP** at which another **trader** (the "losing **trader**") trades **electricity**, and the gaining **trader** switch process under clauses 13 to 16 does not apply.
- (1A) This clause and clauses 2 to 7 apply to a standard switch process.
- (2) If subpart 2 of Part 4A of the Fair Trading Act 1986 applies to an arrangement described in subclause (1),—
  - (a) the gaining **trader** must identify the period within which the customer or **embedded generator** may cancel the arrangement in accordance with section 36M of the Fair Trading Act 1986; and
  - (b) for the purpose of this Schedule, the arrangement is deemed to come into effect on the day after the expiry of the period.

Compare: Electricity Governance Rules 2003 clauses 1.1A and 1.1B schedule E2

Clause 1 Heading: amended, on 29 August 2013, by clause 11(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

Clause 1 Heading: amended on 9 October 2015, by clause 7(1) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 1(1) and 1(1A): substituted on 9 October 2015, by clause 7(2) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 1(1): amended, on 1 November 2018, by clause 53(1) and (2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 1(1)(a): substituted, on 29 August 2013, by clause 11(2) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

Clause 1(2): amended, on 6 November 2014, by clause 7(3) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 1(2)(a): amended, on 6 November 2014, by clause 7(4) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 1(2)(a): amended, on 1 November 2018, by clause 53(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

## **2 Gaining trader advises registry manager of standard switch request**

(1) For each **ICP** to which a switch relates, the gaining **trader** must advise the **registry manager** of the switch no later than **2 business days** after the arrangement to trade **electricity** with the customer or the **embedded generator** comes into effect.

(2) The gaining **trader** must include in its advice to the **registry manager**—

(a) *[Revoked]*

(b) that the switch type is TR; and

(c) 1 or more **profile** codes of a **profile** at the **ICP**.

Compare: Electricity Governance Rules 2003 clause 1.1 schedule E2

Clause 2 Heading: substituted on 9 October 2015, by clause 8(1) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 2 Heading: amended, on 5 October 2017, by clause 255(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 2(1) and (2): amended, on 5 October 2017, by clause 255(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 2(1): amended, on 1 November 2018, by clause 54 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 2(2): inserted on 9 October 2015, by clause 8(2) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 2(2)(a): revoked on 9 October 2015, by clause 4 of the Electricity Industry Participation Code Amendment (ICP Switching) 2015.

## **3 Losing trader response to standard switch request**

No later than **3 business days** after the date on which the **registry manager**, under clause 22(a), makes written notice of a switch request available to the losing **trader**, the losing trader must,—

(a) either—

(i) acknowledge the switch request by providing the following information to the **registry manager**:

(A) the proposed **event date**; and

(B) a valid switch response code approved by the **Authority**; or

(ii) provide the final information specified in clause 5(a) to (c) to complete the switch; or

(b) *[Revoked]*

(c) request that the switch be withdrawn in accordance with clause 17.

Compare: Electricity Governance Rules 2003 clause 1.2 schedule E2

Clause 3: substituted on 9 October 2015, by clause 9 of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 3: amended, on 5 October 2017, by clause 256 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017

Clause 3: amended, on 1 March 2022, by clause 39(a) & (b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 3(a): substituted on 9 October 2015, by clause 5(1) of the Electricity Industry Participation Code Amendment (ICP Switching) 2015.

Clause 3(b): revoked on 9 October 2015, by clause 5(2) of the Electricity Industry Participation Code Amendment (ICP Switching) 2015.

#### **4 Event dates**

- (1) The **losing trader** must establish **event dates** so that—
- (a) no **event date** is more than **10 business days** after the date on which the **registry manager**, under clause 22(a), makes written notice available to the **losing trader**; and
  - (b) in any 12 month period at least 50% of the **event dates** established by the **losing trader** are no more than **5 business days** after the date on which the **registry manager**, under clause 22(a), makes written notice available to the **losing trader**.
- (2) For the purpose of determining whether it complies with subclause (1)(b), the **losing trader** may disregard every **event date** it has established for an **ICP** for which, on the date on which the **registry manager**, under clause 22(a), made written notice available to the **losing trader**, the **losing trader** had been responsible for less than 2 months.

Compare: Electricity Governance Rules 2003 clause 1.2A schedule E2

Clause 4: replaced, on 1 March 2022, by clause 40 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 4(1): amended on 9 October 2015, by clause 6 of the Electricity Industry Participation Code Amendment (ICP Switching) 2015.

Clause 4(1): amended, on 5 October 2017, by clause 257(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 4(1)(a): amended, on 15 May 2014, by clause 29 of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

Clause 4(2): amended on 9 October 2015, by clause 10 of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 4(2): amended, on 5 October 2017, by clause 257(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 4(2): replaced, on 1 November 2018, by clause 55 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

#### **5 Losing trader must provide final information**

If the **losing trader** has provided information under clause 3(a)(i) rather than under clause 3(a)(ii), no later than **5 business days** after the **event date**, the **losing trader** must complete the switch by providing final information to the **registry manager**, including—

- (a) the **event date**; and
- (b) a **switch event meter reading** as at the **event date** for each **meter** or **data storage device** that is recorded in the **registry** with an accumulator type of C and a settlement indicator of Y; and
- (c) if the **switch event meter reading** is not a **validated meter reading**, the date of the last **meter reading** of the **meter** or **data storage device** described in paragraph (b).

Compare: Electricity Governance Rules 2003 clause 1.3 schedule E2

Clause 5: substituted on 9 October 2015, by clause 11 of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 5: amended on 9 October 2015, by clause 7 of the Electricity Industry Participation Code Amendment (ICP Switching) 2015.

Clause 5: amended, on 5 October 2017, by clause 258 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 6 Traders must use same reading

- (1) The losing **trader** and the gaining **trader** must both use the same **switch event meter reading** for the **event date** as determined by the following procedure:
  - (a) if the **switch event meter reading** provided by the losing **trader** differs by less than 200 kWh from a value established by the gaining **trader**, the gaining **trader** must use the losing **trader's switch event meter reading**; or
  - (b) if the **switch event meter reading** provided by the losing **trader** differs by 200 kWh or more from a value established by the gaining **trader**, the gaining **trader** may dispute the **switch event meter reading**.
- (2) Despite subclause (1), subclause (3) applies if—
  - (a) the losing **trader** trades **electricity** at the **ICP** through a **metering installation** with a submission type of non **half hour** in the **registry**; and
  - (b) the gaining **trader** will trade **electricity** at the **ICP** through a **metering installation** with a submission type of **half hour** in the **registry**, as a result of the gaining **trader's** arrangement to trade **electricity** with the customer or the **embedded generator**; and
  - (c) a **switch event meter reading** provided by the losing **trader** under subclause (1) has not been obtained from an **interrogation** of a **certified metering installation** with an AMI flag of Y in the **registry**.
- (3) No later than 5 **business days** after the date on which the **registry manager**, under clause 22(d), makes written notice of switch completion information available to the gaining **trader**—
  - (a) the gaining **trader** may provide the losing **trader** with a **switch event meter reading** obtained from an **interrogation** of a **certified metering installation** with an AMI flag of Y in the **registry**; and
  - (b) the losing **trader** must use that **switch event meter reading**.

Compare: Electricity Governance Rules 2003 clause 1.4 schedule E2

Clause 6: amended on 9 October 2015, by clause 12(1) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 6(a): amended on 9 October 2015, by clause 12(2) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 6(b): substituted on 9 October 2015, by clause 12(3) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 6(2) and (3): inserted on 9 October 2015, by clause 8 of the Electricity Industry Participation Code Amendment (ICP Switching) 2015.

Clause 6(2)(b): amended, on 1 November 2018, by clause 56 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 6(3): amended, on 5 October 2017, by clause 259 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 6(3): amended, on 1 March 2022, by clause 41 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

### 6A Gaining trader disputes reading

- (1) If a gaining **trader** disputes a **switch event meter reading** under clause 6(1)(b), the gaining **trader** must, no later than 4 months after the date on which the **registry manager** made written notice under clause 22(d) of switch completion information

available to the gaining **trader**, provide to the losing **trader** a revised **switch event meter reading** supported by 2 **validated meter readings**.

- (2) On receipt of a revised **switch event meter reading** from the gaining **trader** under subclause (1), the losing **trader** must either,—
- (a) if the losing **trader** accepts the revised **switch event meter reading**, or does not respond to the gaining **trader**, use the revised **switch event meter reading**; or
  - (b) if the losing **trader** does not accept the revised **switch event meter reading**, advise the gaining **trader** (giving all relevant details) no later than 5 **business days** after receiving the revised **switch event meter reading**.

Clause 6A: inserted on 9 October 2015, by clause 13 of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 6A Heading: amended on 9 October 2015, by clause 9(a) of the Electricity Industry Participation Code Amendment (ICP Switching) 2015.

Clause 6A: amended on 9 October 2015, by clause 9(b) and (c) of the Electricity Industry Participation Code Amendment (ICP Switching) 2015.

Clause 6A: replaced, on 5 October 2017, by clause 260 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 6A(1): amended, on 1 February 2019, by clause 57 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 6A(1): replaced, on 1 March 2022, by clause 42 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

## 7 Disputes

- (1) A losing **trader** or a gaining **trader** may give written notice to the other **trader** that it disputes a **switch event meter reading** provided under clauses 1 to 6.
- (2) The dispute must be resolved in accordance with the disputes procedure in clause 15.29 (with all necessary amendments).

Compare: Electricity Governance Rules 2003 clause 1.5 schedule E2

Clause 7(1): amended on 9 October 2015, by clause 14 of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 7(1): amended, on 5 October 2017, by clause 261 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### *Switch move process*

## 8 Switch move process for ICPs

- (1) A standard switch process applies only when a **trader** (the “gaining **trader**”) has an arrangement with a customer or **embedded generator** to commence trading **electricity** with the customer or **embedded generator** at, or to otherwise assume responsibility under clause 11.18(1) for, an **ICP** for which no **trader** has an agreement to trade **electricity** and the gaining **trader** switch process under clauses 13 to 16 does not apply.
- (1A) This clause and clauses 9 to 12 apply to a switch move process.
- (2) If subpart 2 of Part 4A of the Fair Trading Act 1986 applies to an arrangement described in subclause (1)—
  - (a) the gaining **trader** must identify the period within which the customer or **embedded generator** may cancel the arrangement in accordance with section 36M of the Fair Trading Act 1986; and
  - (b) for the purpose of this Schedule, the arrangement is deemed to come into effect on the day after the expiry of the period.

Compare: Electricity Governance Rules 2003 clauses 2.1A and 2.1B schedule E2

Clause 8 Heading: amended, on 29 August 2013, by clause 12(1) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

Clause 8(1) and 8(1A): substituted on 9 October 2015, by clause 15 of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 8(1)(a): substituted, on 29 August 2013, by clause 12(2) of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

Clause 8(1): amended, on 1 November 2018, by clause 58(1) and (2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 8(2): amended, on 6 November 2014, by clause 15(2) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 8(2)(a): amended, on 6 November 2014, by clause 15(3) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 8(2)(a): amended, on 1 November 2018, by clause 58(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

## **9 Gaining trader informs registry manager of switch request**

- (1) For each **ICP** to which a switch relates, the gaining **trader** must advise the **registry manager** of the switch request no later than **2 business days** after the arrangement to trade **electricity** with the customer or the **embedded generator** comes into effect.
- (2) The gaining **trader** must include in its advice to the **registry manager**—
  - (a) a proposed **event date**; and
  - (b) that the switch type is **MI**; and
  - (c) **1** or more **profile** codes of a **profile** at the **ICP**.

Compare: Electricity Governance Rules 2003 clause 2.1 schedule E2

Clause 9 Heading: amended, on 5 October 2017, by clause 262(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 9(1): amended, on 9 October 2015, by clause 16(1)(a) and 16(1)(b) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 9(1): amended, on 1 November 2018, by clause 59 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 9(2): inserted, on 9 October 2015, by clause 16(2) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 9(1) and (2): amended, on 5 October 2017, by clause 262(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## **10 Losing trader response to switch move request**

- (1) The **trader** that is recorded in the **registry** as being responsible for an **ICP** that is subject to a switch request (the “losing **trader**”) must, no later than **5 business days** after the date on which the **registry manager** makes written notice under clause 22(a) of the switch request available to the losing **trader**,—
  - (a) if the losing **trader** accepts the event date proposed by the gaining **trader**, complete the switch by providing to the **registry manager**—
    - (i) *[Revoked]*
    - (ia) confirmation of the **event date**; and
    - (ib) a valid switch response code approved by the **Authority**; and
    - (ii) final information in accordance with clause 11; or
  - (b) if the losing **trader** does not accept the **event date** proposed by the gaining **trader**, acknowledge the switch request to the **registry manager** and determine a different **event date** that—
    - (i) is not earlier than the gaining **trader’s** proposed **event date**; and

- (ii) is no later than 10 **business days** after the date on which the **registry manager**, under clause 22(a), made written notice of the switch request available to the losing **trader**; or
  - (c) request that the switch be withdrawn in accordance with clause 17.
- (2) If the losing **trader** determines a different **event date** under subclause (1)(b), the losing **trader** must, no later than 10 **business days** after the date on which the **registry manager** made written notice referred to in subclause (1) available to the losing **trader**, also complete the switch by providing to the **registry manager** the information described in subclause (1)(a), but in that case the **event date** is the **event date** determined by the losing **trader**.

Compare: Electricity Governance Rules 2003 clause 2.2 schedule E2

Clause 10: substituted, on 9 October 2015, by clause 17 of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 10(1): amended, on 9 October 2015, by clause 10(1) of the Electricity Industry Participation Code Amendment (ICP Switching) 2015.

Clause 10(1): amended, on 5 October 2017, by clause 263(1), (2) and (3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 10(1)(a)(i): revoked, on 9 October 2015, by clause 10(2)(a) of the Electricity Industry Participation Code Amendment (ICP Switching) 2015.

Clause 10(1)(a)(ia) and (ib): inserted, on 9 October 2015, by clause 10(2)(b) of the Electricity Industry Participation Code Amendment (ICP Switching) 2015.

Clause 10(1)(b): amended, on 9 October 2015, by clause 10(3) of the Electricity Industry Participation Code Amendment (ICP Switching) 2015.

Clause 10(1)(c): amended, on 9 October 2015, by clause 10(4) of the Electricity Industry Participation Code Amendment (ICP Switching) 2015.

Clause 10(2): amended, on 5 October 2017, by clause 263(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 10(2): amended, on 1 November 2018, by clause 60 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 10: replaced, on 1 March 2022, by clause 43 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

## 11 **Losing trader must provide final information**

The losing **trader** must provide final information to the **registry manager** for the purposes of clause 10(1)(a)(ii), including—

- (a) the **event date**; and
- (b) a **switch event meter reading** as at the **event date** for each **meter** or **data storage device** that is recorded in the **registry** with an accumulator type of C and a settlement indicator of Y; and
- (c) if the **switch event meter reading** is not a **validated meter reading**, the date of the last **meter reading** of the **meter** or **data storage device** described in paragraph (b).

Compare: Electricity Governance Rules 2003 clause 2.3 schedule E2

Clause 11: substituted, on 9 October 2015, by clause 17 of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 11: amended, on 9 October 2015, by clause 11 of the Electricity Industry Participation Code Amendment (ICP Switching) 2015.

Clause 11: amended, on 5 October 2017, by clause 264 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 12 **Gaining trader may change switch event meter reading**

- (1) The gaining **trader** may use the **switch event meter reading** supplied by the losing **trader** or may, at its own cost, obtain its own **switch event meter reading**.

- (2) If the gaining **trader** elects to use the new **switch event meter reading**, the gaining **trader** must advise the losing **trader** of the new **switch event meter reading** and the **event date** to which it refers as follows:
- (a) if the **switch event meter reading** established by the gaining **trader** differs by less than 200 kWh from that provided by the losing **trader**, both **traders** must use the **switch event meter reading** provided by the gaining **trader**; or
  - (b) if the **switch event meter reading** provided by the losing **trader** differs by 200 kWh or more from a value established by the gaining **trader**, the gaining **trader** may dispute the **switch event meter reading**.
- (2A) Despite subclauses (1) and (2), subclause (2B) applies if—
- (a) the losing **trader** trades **electricity** at the **ICP** through a **metering installation** with a submission type of non **half hour** in the **registry**; and
  - (b) the gaining **trader** will trade **electricity** at the **ICP** through a **metering installation** with a submission type of **half hour** in the **registry**, as a result of the gaining **trader's** arrangement with the customer or **embedded generator**; and
  - (c) a **switch event meter reading** provided by the losing **trader** under subclause (1) has not been obtained from an **interrogation** of a **certified metering installation** with an AMI flag of Y in the **registry**.
- (2B) No later than 5 **business days** after the date on which the **registry manager**, under clause 22(d), makes written notice,—
- (a) the gaining **trader** may provide the losing **trader** with a **switch event meter reading** obtained from an **interrogation** of a **certified metering installation** with an AMI flag of Y in the **registry**; and
  - (b) the losing **trader** must use that **switch event meter reading**
- (3) If the gaining **trader** disputes a **switch event meter reading** under subclause (2)(b), the gaining **trader** must, no later than 4 months after the date on which the **registry manager**, under clause 22(d), made written notice of switch completion information available to the gaining **trader**, provide to the losing **trader** a revised **validated meter reading** or a **permanent estimate** supported by 2 **validated meter readings**, and the losing **trader** must either,—
- (a) no later than 5 **business days** after receiving the **switch event meter reading** from the gaining **trader**, the losing **trader**, if it does not accept the **switch event meter reading**, must advise the gaining **trader** (giving all relevant details), and the losing **trader** and the gaining **trader** must use reasonable endeavours to resolve the dispute in accordance with the disputes procedure contained in clause 15.29 (with all necessary amendments); or
  - (b) if the losing **trader** advises its acceptance of the **switch event meter reading** received from the gaining **trader**, or does not provide any response, the losing **trader** must use the **switch event meter reading** supplied by the gaining **trader**.

Compare: Electricity Governance Rules 2003 clause 2.4 schedule E2

Clause 12 Heading: amended, on 9 October 2015, by clause 18(1) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 12(1) and (3): amended, on 9 October 2015, by clause 18(2) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 12(2): substituted, on 9 October 2015, by clause 18(3) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 12(2), (2B) and (3): amended, on 5 October 2017, by clause 265 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12(2A) and (2B): inserted, on 9 October 2015, by clause 12 of the Electricity Industry Participation Code Amendment (ICP Switching) 2015.

Clause 12(2A)(b): amended, on 1 November 2018, by clause 61(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 12(2B): amended, on 1 March 2022, by clause 44(1)(a) and (b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 12(3): amended, on 9 October 2015, by clause 18(4) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 12(3): amended, on 1 February 2019, by clause 61(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 12(3): amended, on 1 March 2022, by clause 44(2)(a), (b) and (c) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 12(3)(a): amended, on 9 October 2015, by clause 18(5) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 12(3)(b): amended, on 9 October 2015, by clause 18(6) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

### *Gaining trader switch process*

Cross heading: amended, on 9 October 2015, by clause 19 of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

## **13 Gaining trader switch processes**

- (1) A gaining **trader** switch process applies only when a **trader** (the “gaining **trader**”) has an arrangement with a customer or **embedded generator** to—
- (a) trade **electricity** with the customer or **embedded generator** at an **ICP** at which another **trader** (the “losing **trader**”) trades **electricity** with the customer or **embedded generator**, and one of subparagraphs (i) to (iii) applies—
    - (i) at the **ICP**, the gaining **trader** will trade **electricity** through a **half-hour metering installation** that is a category 3 or higher **metering installation**;  
or
    - (ii) at the **ICP**—
      - (A) the gaining **trader** will trade **electricity** through a **half-hour metering installation**, and in the **registry** the **ICP** will have a submission type of **half hour** and an AMI flag of “N”; and
      - (B) the losing **trader** trades **electricity** through a non **half-hour metering installation**, and in the **registry** the **ICP** has a submission type of non **half hour** and an AMI flag of “N”; or
    - (iii) at the **ICP**—
      - (A) the gaining **trader** will trade **electricity** through a non **half-hour metering installation**, and the **ICP** will have a submission type of non **half hour** in the **registry**; and
      - (B) the losing **trader** trades **electricity** through a **half-hour metering installation**, and in the **registry** the **ICP** has a submission type of **half hour** and an AMI flag of “N”; or
  - (b) assume responsibility under clause 11.18(1) for an **ICP** described in subparagraph (a)(i), (a)(ii), or (a)(iii).
- (1A) This clause and clauses 14 to 16 apply to a gaining **trader** switch process.
- (2) If subpart 2 of Part 4A of the Fair Trading Act 1986 applies to an arrangement described in subclause (1)—

- (a) the gaining **trader** must identify the period within which the customer or **embedded generator** may cancel the arrangement in accordance with section 36M of the Fair Trading Act 1986; and
- (b) for the purpose of this Schedule, the arrangement is deemed to come into effect on the day after the expiry of the period.

Compare: Electricity Governance Rules 2003 clauses 3.1 and 3.1A schedule E2

Clause 13 Heading: amended, on 9 October 2015, by clause 20(1) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 13(1): amended, on 9 October 2015, by clause 20(2) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 13(1): amended, on 1 November 2018, by clause 62(1)(a) and (b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 13(1)(a): substituted, on 29 August 2013, by clause 13 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

Clause 13(1)(a): replaced, on 1 February 2019, by clause 62(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 13(1)(a)(i): amended, on 9 October 2015, by clause 13(a) and (b) of the Electricity Industry Participation Code Amendment (ICP Switching) 2015.

Clause 13(1)(a)(i) and (1)(a)(ii): amended, on 5 October 2017, by clause 266 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 13(1)(b): amended, on 9 October 2015, by clause 20(3) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 13(1)(b): amended, on 1 February 2019, by clause 62(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 13(1A): inserted, on 9 October 2015, by clause 20(4) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 13(2): amended, on 6 November 2014, by clause 20(5) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 13(2)(a): amended, on 6 November 2014, by clause 20(6) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 13(2)(a): amended, on 1 November 2018, by clause 62(4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

#### 14 Gaining trader informs registry manager of switch request

- (1) For each **ICP** to which a switch relates, the gaining **trader** must advise the **registry manager** of the switch request no later than 3 **business days** after the arrangement to trade **electricity** with the customer or the **embedded generator** comes into effect.
- (2) The gaining **trader** must include in its advice to the **registry manager**—
  - (a) a proposed **event date**; and
  - (b) that the switch type is **HH**.
- (3) Unless subclause (4) applies, the proposed **event date** must be a date that is after the date on which the gaining **trader** advises the **registry manager**.
- (4) The proposed **event date** may be a date that is before the date on which the gaining **trader** advises the **registry manager**, if—
  - (a) the proposed **event date** is in the same month as the date on which the gaining **trader** advises the **registry manager**; or
  - (b) the proposed **event date** is no more than 90 days before the date on which the gaining **trader** advises the **registry manager**, and the losing **trader** and gaining **trader** agree on the proposed **event date**.

Compare: Electricity Governance Rules 2003 clause 3.2 schedule E2

Clause 14 Heading: amended, on 5 October 2017, by clause 267(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 14: amended, on 5 October 2017, by clause 267(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 14(1): amended, on 1 November 2018, by clause 63 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.  
Clause 14(1): amended, on 9 October 2015, by clause 21(1) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.  
Clause 14(2), (3), and (4): inserted, on 9 October 2015, by clause 21(2) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

## **15 Losing trader provides information**

No later than 3 **business days** after the date on which the **registry manager**, under clause 22(a), makes written notice available to the losing **trader**, must—

- (a) provide the **registry manager** with a valid switch response code approved by the **Authority**; or
- (b) request that the switch be withdrawn in accordance with clause 17.

Compare: Electricity Governance Rules 2003 clause 3.3 schedule E2  
Clause 15: amended, on 9 October 2015, by clause 22(1) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.  
Clause 15: amended, on 9 October 2015, by clause 14 of the Electricity Industry Participation Code Amendment (ICP Switching) 2015.  
Clause 15: amended, on 5 October 2017, by clause 268 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 15: amended, on 1 March 2022, by clause 45(1) and (2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.  
Clause 15(a): amended, on 9 October 2015, by clause 22(2) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.  
Clause 15(b): amended, on 9 October 2015, by clause 22(3) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

## **16 Gaining trader obligations**

- (1) The gaining **trader** must complete the switch by advising the **registry manager** of the **event date** no later than 3 **business days** after the date on which the **registry manager**, under clause 22(c), makes written notice of a valid switch response code available to the gaining **trader**.
- (2) If the **ICP** is being **electrically disconnected** or if **metering** equipment is being removed, the gaining **trader** must either—
  - (a) give the losing **trader** or the **metering equipment provider** for the **ICP** an opportunity to **interrogate** the **metering installation** immediately before the **ICP** is **electrically disconnected** or the **metering** equipment is removed; or
  - (b) carry out an **interrogation** and, no later than 5 **business days** after the **metering installation** is **electrically disconnected** or removed, advise the losing **trader** of—
    - (i) the results of the **interrogation**; and
    - (ii) the **metering component** numbers for each data channel in the **metering installation**.

Compare: Electricity Governance Rules 2003 clause 3.4 schedule E2  
Clause 16 Heading: amended, on 9 October 2015, by clause 23(1) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.  
Clause 16(1): amended, on 9 October 2015, by clause 23(2) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.  
Clause 16(1): amended, on 9 October 2015, by clause 15 of the Electricity Industry Participation Code Amendment (ICP Switching) 2015.

Clause 16(1): amended, on 1 March 2022, by clause 46(a) and (b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 16(1) and (2): amended, on 5 October 2017, by clause 269 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 16(2): inserted, on 9 October 2015, by clause 23(3) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

### *Withdrawing a switch request*

## **17 Withdrawal of switch requests**

A losing **trader** or gaining **trader** may request that a switch request be withdrawn at any time until the expiry of 2 months after the **event date**.

Compare: Electricity Governance Rules 2003 clause 3A schedule E2

Clause 17: amended, on 9 October 2015, by clause 24 of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

## **18 Withdrawing a switch request**

If a **trader** requests the withdrawal of a switch under clause 17, the following provisions apply:

- (a) the **Authority** must determine the valid codes for withdrawing a switch request (“withdrawal advisory codes”);
- (b) the **Authority** must **publish** the withdrawal advisory codes;
- (c) for each **ICP**, the **trader** withdrawing the switch request must provide the **registry manager** with the following information:
  - (i) the **participant identifier** of the **trader**; and
  - (ii) the withdrawal advisory code **published** by the **Authority** in accordance with paragraph (b);
- (d) no later than 5 **business days** after the date on which the **registry manager**, under clause 22(b), makes written notice available to the **trader** receiving the withdrawal, the **trader** must advise the **registry manager** that the switch withdrawal request is accepted or rejected. A switch withdrawal request must not become effective until accepted by the **trader** who received the withdrawal;
- (e) on receipt of a rejection notice from the **registry manager** in accordance with paragraph (d), a **trader** may re-submit a switch withdrawal request for an **ICP** in accordance with paragraph (c). All switch withdrawal requests must be resolved no later than 10 **business days** after the date of the initial switch withdrawal request;
- (f) if a **trader** requests that a switch request be withdrawn and the resolution of that switch withdrawal request results in the switch proceeding, no later than 2 **business days** after the date on which the **registry manager**, under clause 22(b), makes written notice available to the losing **trader**, the losing **trader** must comply with clauses 3, 5, 10 and 11 (whichever is appropriate) and the gaining **trader** must comply with clause 16.

Compare: Electricity Governance Rules 2003 clause 4 schedule E2

Clause 18(b): amended, on 21 September 2012, by clause 16(1) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

Clause 18(c)(i): amended, on 21 September 2012, by clause 16(2) of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

Clause 18(c) to (f): amended, on 5 October 2017, by clause 270 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 18(d): amended, on 1 March 2022, by clause 47(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.  
Clause 18(d), (e), and (f): amended, on 9 October 2015, by clause 25 of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.  
Clause 18(f): amended, on 1 March 2022, by clause 47(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

### *Exchange of information*

## **19 Participants to use file formats**

**Participants** who exchange information in accordance with this Schedule must use the file formats determined and **published** by the **Authority**.

Compare: Electricity Governance Rules 2003 clause 5.1 schedule E2

## **20 Method of exchanging files**

- (1) The **Authority** may, from time to time, after consultation with **participants**, do all or any of the following:
- (a) determine the method by which **participants** exchange information:
  - (b) determine the file formats that **participants** must use to exchange information:
  - (c) alter the file formats or the method by which **participants** exchange information.
- (2) The **Authority** must **publish** the file formats.

Compare: Electricity Governance Rules 2003 clause 5.2 schedule E2

Clause 20(1): substituted, on 15 May 2014, by clause 30 of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

## **21 Metering information**

For each **interrogation** or **switch event meter reading** carried out in accordance with this Schedule,—

- (a) the **trader** who carries out the **interrogation** or **switch event meter reading** must ensure that the **interrogation** is as accurate as possible, or that the **switch event meter reading** is fair and reasonable (as the case may be); and
- (b) the cost of each **interrogation** or **switch event meter reading** must be met as follows:
  - (i) for each **interrogation** or **switch event meter reading** carried out in accordance with clauses 5(b) or 11(b) or (c), the cost must be met by the losing **trader**; and
  - (ii) in every other case, the cost must be met by the gaining **trader**.

Compare: Electricity Governance Rules 2003 clause 5.3 schedule E2

Clause 21: amended, on 9 October 2015, by clause 26(1) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 21(a): amended, on 9 October 2015, by clause 26(2) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

Clause 21(b), and (c): substituted, on 9 October 2015, by clause 26(3) of the Electricity Industry Participation Code Amendment (ICP Switching) 2014.

## 22 Registry manager notices

The **registry manager** must provide notice to **participants** required by this Schedule as follows:

- (a) on receipt of information about a switch request in accordance with clauses 2, 9 and 14, the **registry manager** must make written notice available to the losing **trader** of the information received:
- (b) on receipt of information about a withdrawal request in accordance with clauses 18(c) and (d), the **registry manager** must make written notice available to the other relevant **trader** of the information received:
- (c) on receipt of information about a switch acknowledgement in accordance with clauses 3(a) and 15, the **registry manager** must make written notice available to the gaining **trader** of the information received:
- (d) on receipt of information about a switch completion in accordance with clauses 3(a)(ii), 5, 10 and 16, the **registry manager** must make written notice available to the gaining **trader**, the losing **trader**, the **metering equipment provider**, and the relevant **distributor** of the information received.

Compare: Electricity Governance Rules 2003 clause 5.4 schedule E2

Clause 22 Heading: amended, on 5 October 2017, by clause 271(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 22: amended, on 5 October 2017, by clause 271(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 22(a), (b), (c) and (d): amended, on 1 March 2022, by clause 48 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 22(d): amended, on 29 August 2013, by clause 14 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2013.

Clause 22(d): amended, on 9 October 2015, by clause 16 of the Electricity Industry Participation Code Amendment (ICP Switching) 2015.

## Schedule 11.4

cls 11.8A and 11.15A

### Metering equipment provider switching and registry metering records

Schedule 11.4: inserted on 29 August 2013, by clause 22 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011.

#### 1 Metering equipment provider receives notice for ICP identifier

- (1) Within 10 **business days** of being advised by the **registry manager** under clause 11.18A, a **gaining metering equipment provider**,—
  - (a) must, if it intends to accept responsibility for each **metering installation** for the **ICP**—
    - (i) enter into an arrangement with the **trader**; and
    - (ii) advise the **registry manager** in the **prescribed form** that it accepts responsibility for each **metering installation** for the **ICP** and of the proposed date on which the **metering equipment provider** will assume responsibility for each **metering installation** for the **ICP**; or
  - (b) may, if it intends to decline responsibility for each **metering installation** for the **ICP**, advise the **registry manager** in the **prescribed form** that it declines to accept responsibility for each **metering installation** for the **ICP**.
- (2) The **registry manager** must, within 1 **business day** of a **metering equipment provider** advising under subclause (1)(b) that it declines to accept responsibility for each **metering installation** for the **ICP**, advise the **trader** of the declinature.
- (3) The **registry manager** must, within 1 **business day** of a **gaining metering equipment provider** advising of acceptance under subclause (1)(a), advise the following **participants** for the **ICP** of the acceptance and proposed date on which the **gaining metering equipment provider** will assume responsibility for each **metering installation** for the **ICP**:
  - (a) the **trader**; and
  - (b) the **distributor**; and
  - (c) if relevant, the **losing metering equipment provider**.

Clause 1 Heading: amended, on 5 October 2017, by clause 272(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1: amended, on 5 October 2017, by clause 272(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 1(1): amended, on 29 August 2013, by clause 49 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 1(1)(b): amended, on 1 November 2018, by clause 64 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

#### 2 Gaining metering equipment provider to advise registry manager of registry metering records

If the **metering equipment provider** who is responsible for a **metering installation** for an **ICP** changes, the **metering equipment provider** must, within 15 **business days** of becoming the **metering equipment provider** for the **metering installation**, advise the **registry manager** of the **registry metering records** for the **metering installation**.

Clause 2 Heading: amended, on 5 October 2017, by clause 273(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 2: amended, on 5 October 2017, by clause 273(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### **3 Metering equipment provider to advise registry manager of changes to registry metering records**

If a **metering equipment provider** has an arrangement with a **trader** at an **ICP** that is not also an **NSP**, the **metering equipment provider** must advise the **registry manager** of the **registry metering records**, or any change to the **registry metering records**, for each **metering installation** for which it is responsible at the **ICP**, no later than—

- (a) *[Revoked]*
- (b) *[Revoked]*
- (c) if updating the **registry metering records** in accordance with clause 8(11)(b) of Schedule 10.6, 10 **business days** following the most recent unsuccessful **interrogation**; or
- (d) if updating the **registry metering records** in accordance with clause 8(13) of Schedule 10.6, 3 **business days** following—
  - (i) the expiry of the time period under clause 8(12) of Schedule 10.6; or
  - (ii) the date on which the **metering equipment provider** determines in an investigation under clause 8(11)(a) of Schedule 10.6 that it cannot restore communications or fully download the **raw meter data**; or
- (e) in all other cases, 10 **business days** following:
  - (i) the **electrical connection** of an **ICP** that is not also an **NSP**; or
  - (ii) any subsequent change in any matter covered by the **metering records** other than a change to which subparagraphs (c) and (d) apply.

Clause 3 Heading: amended, on 5 October 2017, by clause 274(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 3: amended, on 5 October 2017, by clause 274(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 3 amended, on 1 November 2018, by clause 65(a), (b) and (c) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 3 amended, on 1 February 2021, by clause 46(1) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 3(a): amended, on 29 August 2013, by clause 50 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

Clause 3(a): amended, on 1 November 2018, by clause 65(d) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 3(a) revoked, on 1 February 2021, by clause 46(2) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 3(b): amended, on 1 November 2018, by clause 65(e) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 3(b) revoked, on 1 February 2021, by clause 46(2) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

Clause 3(c), (d) and (e) inserted, on 1 February 2021, by clause 46(3) of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

### **4 Registry manager requirement to advise**

The **registry manager** must, within 1 **business day** of being advised—

- (a) under clauses 2 or 3, advise the **trader** and **distributor** of the **registry metering records**;
- (b) under clauses 3 or 6, advise—

- (i) the **trader and distributor** of the details of the change to the **registry metering records**; and
- (ii) the **losing metering equipment provider** of the date of change of the **metering equipment provider for the ICP identifier**.

Clause 4 Heading: amended, on 5 October 2017, by clause 275(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 4: amended, on 5 October 2017, by clause 275(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 5 Changes to registry metering records for ICP identifier

The **registry manager** must, within 1 **business day** of being advised of 1 or more of the following changes relating to an **ICP identifier** record, advise the **metering equipment provider** of the change:

- (a) the **trader participant identifier**;
- (b) the **distributor participant identifier**;
- (c) the settlement type;
- (d) the status of the **ICP**.

Clause 5 Heading: amended, on 5 October 2017, by clause 276(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 5: amended, on 5 October 2017, by clause 276(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## 6 Correction of errors in registry

- (1) A **metering equipment provider** must, by 0900 hours on the 13<sup>th</sup> **business day** of each **reconciliation period**, obtain the following information from the **registry**:
  - (a) a list of the **ICP identifiers** for the **ICPs** for the **metering installations** for which the **metering equipment provider** is recorded in the **registry** as being responsible; and
  - (b) the **registry metering records** for each **ICP identifier** obtained under paragraph (a).
- (2) A **metering equipment provider** must, as soon as reasonably practicable but not later than 5 **business days** after it obtains the information under subclause (1), compare the information obtained with its own records.
- (3) If the **metering equipment provider** finds a discrepancy between the information obtained under subclause (1) and its own records, the **metering equipment provider** must, within 5 **business days** of becoming aware of the discrepancy,—
  - (a) correct its records that are in error; and
  - (b) advise the **registry manager** of any necessary changes to the **registry metering records**.

Clause 6(3)(b): amended, on 5 October 2017, by clause 277 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 6(3)(b): amended, on 1 November 2018, by clause 66 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

**7 Metering equipment provider to provide registry metering records to registry manager**

- (1) A **metering equipment provider** must, if required under this Part, provide to the **registry manager** the information indicated in Table 1 as being "Required", in the **prescribed form**, for each **metering installation** for which it is responsible.
- (1A) Despite subclause (1) a **metering equipment provider** is not required to provide to the **registry manager** the information indicated in rows 23 to 30 of Table 1 as being "Required", if the information is used only for the purpose of a **distributor** direct billing **consumers** on its **network**.

Clause 7(1A) inserted, on 1 February 2021, by clause 47 of the Electricity Industry Participation Code Amendment (Metering and Related Registry Processes) 2020.

- (2) Despite anything to the contrary in this Code (except clause 11.2) the **metering equipment provider** must—
- (a) provide the information set out in Table 1 indicated as being required for **interim certified metering installations** to the **registry manager** for all **category 1 metering installations** for which it is responsible; and
  - (b) ensure that the **registry metering records** provided in accordance with this clause are, for not less than 50% of the **category 1 metering installations** for which it is responsible, complete, accurate, not misleading or deceptive, and not likely to mislead or deceive, by no later than 1 October 2014; and
  - (c) ensure that the **registry metering records** provided in accordance with this clause are, for each **category 1 metering installation** for which it is responsible, complete, accurate, not misleading or deceptive, and not likely to mislead or deceive, by no later than 1 April 2015.
- (3) The **metering equipment provider** must derive the information provided under subclause (2)(a) from—
- (a) the **metering equipment provider's metering records**; or
  - (b) the **metering records** contained within the current **trader's** system.

Clause 7 Heading: amended, on 5 October 2017, by clause 278(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 7(1) and 2(a): amended, on 5 October 2017, by clause 278(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 7(2): amended, on 29 August 2013, by clause 51 of the Electricity Industry Participation (Metering Arrangements) Code Amendment 2011, Amendment 2013 (No 2).

**Table 1: Registry metering records**

The following table sets out the **registry metering records**:

No	Registry term	Description	Fully certified metering installation	Interim certified metering installation
<b>For each ICP identifier</b>				
1	the <b>metering equipment provider participant identifier</b>	<b>participant identifier</b>	Required	Required
<b>For each metering installation for an ICP</b>				
2	<b>metering installation number</b>	a sequential number that is unique to the <b>ICP's identifier</b> , to identify the <b>metering installation</b>	Required	Required
3	highest <b>metering category</b>	the category recorded in the <b>metering installation certification report</b>	Required	Required
4	<b>metering installation location code</b>	a code from the list of codes in the <b>registry</b> , that identifies the location of the <b>metering installation</b> on a premises	Required	Required
5	the <b>ATH participant identifier</b>	the <b>participant identifier</b> of the <b>ATH</b> who <b>certified</b> the <b>metering installation</b>	Required	Optional

No	Registry term	Description	Fully certified metering installation	Interim certified metering installation
6	<b>metering installation certification type</b>	the <b>certification type</b> of the <b>metering installation</b> which must be <b>half hour</b> or non <b>half hour</b> as identified in the <b>metering installation certification report</b> or, where both <b>half hour</b> and non <b>half hour</b> are specified as the <b>certification type</b> in the <b>metering installation certification report</b> , must be one of those <b>certification types</b> .	Required	Required
7	<b>metering installation certification date</b>	the effective <b>certification date</b> identified in the <b>metering installation certification report</b>	Required	Optional

Electricity Industry Participation Code 2010  
Schedule 11.4

No	Registry term	Description	Fully certified metering installation	Interim certified metering installation
8	the <b>metering installation certification</b> expiry date	the <b>metering installation certification</b> expiry date, identified in the <b>metering installation certification report</b> , or the date that the <b>metering installation certification</b> is cancelled	Required	Required
9	<b>control device certification</b>	confirmation that the <b>control device</b> used in the <b>metering installation</b> is included in the <b>metering installation certification report</b>	Required	Optional

No	Registry term	Description	Fully certified metering installation	Interim certified metering installation
10	<b>certification variations</b>	(a) Does an exemption under the <b>Act</b> for the <b>metering installation</b> apply?  (b) Has the alternate <b>measuring transformer certification</b> process been used?	Required	Optional
11	<b>certification variations</b> expiry date	the earlier of the expiry date of any <b>certification</b> variation under item 10	Required	Optional
12	<b>certification number</b>	the <b>certification</b> number assigned to a <b>metering installation's certification</b>	Required	Optional
13	maximum <b>interrogation cycle</b>	the maximum <b>interrogation cycle</b> for the <b>metering installation</b> included in its <b>certification report</b>	Required	Required

No	Registry term	Description	Fully certified metering installation	Interim certified metering installation
14	price code	if the <b>metering equipment provider</b> considers it relevant, an identifier that may be used to indicate the price that would apply to a lease for the use of the <b>metering installation</b>	Optional	Optional
The following details for each <b>metering component</b> in the <b>metering installation</b> for each <b>ICP</b>				
15	<b>metering component type</b>	an identifier used to identify the type of <b>metering component</b> in the <b>metering installation</b> selected from the list of codes in the <b>registry</b>	Required	Required
16	<b>metering component identifier</b>	an identifier visible on the installed <b>metering component</b> that is either the manufacturer's serial number or the owner's component asset number	Required	Required for <b>meter or data storage device</b> .  Optional for all other <b>metering components</b> .

No	Registry term	Description	Fully certified metering installation	Interim certified metering installation
17	<b>meter or data storage device type</b>	an identifier used to identify the type of <b>meter or data storage device</b> in the <b>metering installation</b> , which may be <b>half hour</b> , non <b>half hour</b> , or prepay selected from the list of codes in the <b>registry</b>	Required for <b>meter or data storage device</b> .	Required for <b>meter or data storage device</b> .
18	AMI type	an identifier to identify if the <b>metering component</b> is an advanced metering infrastructure device and the <b>metering equipment provider's back office</b> is the <b>services access interface</b>	Required for <b>meter or data storage device</b> .  Optional for all other <b>metering components</b> .	Required for <b>meter or data storage device</b> .  Optional for all other <b>metering components</b> .
19	<b>registry compensation factor</b>	the mathematical product of all <b>compensation factors</b> that the <b>trader</b> must apply to transform the <b>raw meter data</b> into <b>volume information</b>	Required for <b>meter or data storage device</b> . Optional for all other <b>metering components</b> .	Required for <b>meter or data storage device</b> . Optional for all other <b>metering components</b> .

No	Registry term	Description	Fully certified metering installation	Interim certified metering installation
20	owner of a <b>metering component</b>	a free text field to identify the owner of a <b>metering component</b> , which may be a <b>participant identifier</b> if the owner is a <b>participant</b>	Optional	Optional
21	removal date of a <b>meter</b> or <b>data storage device</b>	a date that a <b>meter</b> or <b>data storage device</b> is removed	Optional for <b>meter</b> or <b>data storage device</b>	Optional for <b>meter</b> or <b>data storage device</b>
The following details for each <b>metering component</b> identified in rows 15 to 21 above				
22	<b>metering component</b> type	the <b>metering component</b> type identifier selected from the list of codes in the <b>registry</b>	Required for <b>meter</b> or <b>data storage device</b> that returns any 1 or more of the following values as a result of an <b>interrogation</b> : (a) <b>active energy</b> : (b) <b>reactive energy</b> : (c) <b>apparent energy</b> : (d) <b>apparent power</b> .  Optional for all other <b>metering components</b> .	Required for <b>meter</b> or <b>data storage device</b> that returns any 1 or more of the following values as a result of an <b>interrogation</b> : (a) <b>active energy</b> : (b) <b>reactive energy</b> : (c) <b>apparent energy</b> : (d) <b>apparent power</b> .  Optional for all other <b>metering components</b> .

Electricity Industry Participation Code 2010  
Schedule 11.4

No	Registry term	Description	Fully certified metering installation	Interim certified metering installation
23	register number	a sequential number that identifies each data channel that is present in the <b>metering component</b>	<p>Required (except where clause 7(1A) of this Schedule applies) for <b>meter</b> or <b>data storage device</b> that returns any 1 or more of the following values as a result of an <b>interrogation</b>:</p> <ul style="list-style-type: none"> <li>(a) <b>active energy</b>:</li> <li>(b) <b>reactive energy</b>:</li> <li>(c) <b>apparent energy</b>:</li> <li>(d) <b>apparent power</b>.</li> </ul> <p>Optional for all other <b>metering components</b>.</p>	<p>Required (except where clause 7(1A) of this Schedule applies) for <b>meter</b> or <b>data storage device</b> that returns any 1 or more of the following values as a result of an <b>interrogation</b>:</p> <ul style="list-style-type: none"> <li>(a) <b>active energy</b>:</li> <li>(b) <b>reactive energy</b>:</li> <li>(c) <b>apparent energy</b>:</li> <li>(d) <b>apparent power</b>.</li> </ul> <p>Optional for all other <b>metering components</b>.</p>

## Schedule 11.5

cl 11.15C

### Process for trader event of default

Schedule 11.5: inserted, on 16 December 2013, by clause 7 of the Electricity Industry Participation (Managing Retailer Default Situations) Code Amendment 2013.

Schedule 11.5, heading: amended, on 28 February 2015, by clause 8 of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

#### 1 Purpose

The purpose of this Schedule is to set out the process that the **Authority** and each **participant** must comply with when the **Authority** is satisfied that a **trader** has committed an **event of default** under paragraph (a) or (b) or (f) or (h) of clause 14.41.

Clause 1: amended, on 28 February 2015, by clause 9 of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

Clause 1: amended, on 24 March 2015, by clause 6 of the Electricity Industry Participation Code Amendment (Settlement and Prudential Security) 2014.

#### 2 Notice to trader who has committed event of default

(1) If the **Authority** is satisfied that a **trader** ("defaulting trader") has committed an **event of default** under paragraph (a) or (b) or (f) or (h) of clause 14.41 the **Authority** must give written notice to the defaulting **trader** that—

(a) the defaulting **trader** must—

(i) remedy the **event of default**; or

(ii) assign its rights and obligations under every contract under which a customer of the defaulting **trader** purchases **electricity** from the defaulting **trader** to another **trader**, and assign to another **trader** all **ICPs** for which the defaulting **trader** is recorded in the **registry** as being responsible; and

(b) if the defaulting **trader** does not comply with the requirements set out in paragraph (a) within 7 days of the notice, clause 4 will apply.

(2) The **Authority** may give written notice to the defaulting **trader** requiring the defaulting **trader** to provide to the **Authority**, within a time specified by the **Authority**, information about the defaulting **trader's** customers.

(3) The defaulting **trader** must provide the information requested by the **Authority** under subclause (2) within the time specified by the **Authority**.

Clause 2, heading: amended, on 28 February 2015, by clause 10(1) of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

Clause 2(1): amended, on 28 February 2015, by clause 10(2) of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

Clause 2(1): amended, on 24 March 2015, by clause 7 of the Electricity Industry Participation Code Amendment (Settlement and Prudential Security) 2014.

Clause 2(1) and (2): amended, on 5 October 2017, by clause 280 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 2(1)(a)(ii): amended, on 1 November 2018, by clause 67(a) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 2(2): amended, on 28 February 2015, by clause 10(3) of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

Clause 2(2): amended, on 1 November 2018, by clause 67(b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 2(3): amended, on 28 February 2015, by clause 10(4) of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

### **3 Authority may require distributor, registry manager, and metering equipment provider to provide information**

- (1) The **Authority** may, by notice in writing to a **distributor** on whose **network** a defaulting **trader** trades **electricity**, require the **distributor** to provide to the **Authority** the information specified in the notice about the defaulting **trader's** customers within the period specified in the notice.
- (2) If the **distributor** holds the information, the **distributor** must provide the information to the **Authority** within the time specified by the **Authority**.
- (3) The **Authority** may, by notice in writing to the **registry manager**, require the **registry manager** to provide to the **Authority** the information, specified in the notice, about **ICPs** for which a defaulting **trader** is recorded in the **registry** as being responsible, within the period specified in the notice.
- (4) If the **registry manager** holds the information, the **registry manager** must provide the information to the **Authority** within the time specified by the **Authority**.
- (5) The **Authority** may, by notice in writing to a **metering equipment provider** who is recorded in the **registry** as the **metering equipment provider** for an **ICP** for which a defaulting **trader** is responsible, require the **metering equipment provider** to provide to the **Authority** the information, specified in the notice, about the **ICPs** for which the defaulting **trader** is recorded in the **registry** as being responsible, within the period specified in the notice.
- (6) If the **metering equipment provider** holds the information, the **metering equipment provider** must provide the information to the **Authority** within the time specified by the **Authority**.

Clause 3 Heading: amended, on 5 October 2017, by clause 281(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 3 Heading: amended, on 7 September 2020, by clause 4(1) of the Electricity Industry Participation Code Amendment (Improving Trader Default Process) 2020.

Clause 3(1): amended, on 28 February 2015, by clause 11(1) of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

Clause 3(1): amended, on 1 November 2018, by clause 68 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 3(1): amended, on 7 September 2020, by clause 4(2) of the Electricity Industry Participation Code Amendment (Improving Trader Default Process) 2020.

Clause 3(2): amended, on 7 September 2020, by clause 4(3) of the Electricity Industry Participation Code Amendment (Improving Trader Default Process) 2020.

Clause 3(3): amended, on 28 February 2015, by clause 11(2) of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

Clause 3(3) and (4): replaced, on 7 September 2020, by clause 4(4) and (5) of the Electricity Industry Participation Code Amendment (Improving Trader Default Process) 2020.

Clause 3(3) and (4): amended, on 5 October 2017, by clause 281(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 3(5) and (6): inserted, on 7 September 2020, by clause 4(6) of the Electricity Industry Participation Code Amendment (Improving Trader Default Process) 2020.

### **4 Failure by defaulting trader to remedy event of default**

- (1) This clause applies if—
  - (a) 7 days or more have elapsed since the **Authority** gave notice to the defaulting **trader** under clause 2(1); and
  - (b) the **Authority** considers that—
    - (i) the defaulting **trader** has not remedied the **event of default** or, in the case of an **event of default** under clause 14.41(b) in respect of which there is an

- unresolved invoice dispute under clause 14.25, has not reached an agreement with the **Authority** to resolve the **event of default**; and
- (ii) the defaulting **trader** still has 1 or more contracts under which a customer of the defaulting **trader** purchases **electricity** from the defaulting **trader** or is still recorded in the **registry** as being responsible for 1 or more **ICPs**.
- (2) The **Authority** must—
- (a) give written notice to the defaulting **trader** that the **Authority** considers that this clause applies; and
- (b) unless the **Authority** considers there is good reason not to, attempt to advise customers of the defaulting **trader** that the defaulting **trader** has committed an **event of default** and one or more of the following:
- (i) *[Revoked]*
- (ii) the customer should enter into a contract for the purchase of **electricity** with another **trader** by the date that is 14 days after the day on which the **Authority** gave written notice to the defaulting **trader** under clause 2(1):
- (iii) if the customer fails to enter into a contract with another **trader** by that date, the **Authority** may assign the defaulting **trader's** rights and obligations under the customer's contract with the defaulting **trader** to another **trader** under clause 5:
- (iv) any other information the **Authority** considers appropriate.
- (3) *[Revoked]*
- (4) *[Revoked]*
- Clause 4, heading: amended, on 28 February 2015, by clause 12(1) of the Electricity Industry Participation Code Amendment (Trader Default) 2014.
- Clause 4(1): amended, on 28 February 2015, by clause 12(2) of the Electricity Industry Participation Code Amendment (Trader Default) 2014.
- Clause 4(1)(a): amended, on 7 September 2020, by clause 5(1) of the Electricity Industry Participation Code Amendment (Improving Trader Default Process) 2020.
- Clause 4(1)(b)(i): amended, on 24 March 2015, by clause 8 of the Electricity Industry Participation Code Amendment (Settlement and Prudential Security) 2014.
- Clause 4(1)(b)(ii): amended, on 1 November 2018, by clause 69(a) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.
- Clause 4(2)(a): amended, on 28 February 2015, by clause 12(3)(a) of the Electricity Industry Participation Code Amendment (Trader Default) 2014.
- Clause 4(2)(a) and (b): amended, on 5 October 2017, by clause 282 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.
- Clause 4(2)(b): substituted, on 28 February 2015, by clause 12(3)(b) of the Electricity Industry Participation Code Amendment (Trader Default) 2014.
- Clause 4(2)(b): amended, on 1 November 2018, by clause 69(b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.
- Clause 4(2)(b): replaced, on 7 September 2020, by clause 5(2) of the Electricity Industry Participation Code Amendment (Improving Trader Default Process) 2020.
- Clause 4(2)(b)(ii) and (iii): amended, on 1 November 2018, by clause 69(c) and (d) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.
- Clause 4(3) and 4(4): revoked, on 28 August 2015, by clause 12(4) of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

#### **4A Trader to provide information about NSPs and ICPs at which it cannot trade**

- (1) If the **Authority** gives written notice to a **trader** under clause 4, the **Authority** must give written notice to each **trader** (except the defaulting **trader**) that it must provide the

information specified in subclause (2) to the **registry manager** by no later than 1600 on the **business day** following the day on which the notice under this subclause was given.

- (2) The information that a **trader** must provide to the **registry manager** is—
- (a) the **NSPs** at which the **trader** cannot trade because it does not have an arrangement with the relevant **distributor** on whose network the **NSPs** are located to trade at the **NSP**; and
  - (b) the **ICPs** at which the **trader** cannot trade for any of the following reasons:
    - (i) the type of each **meter** at the **ICPs** (for example, **half hour**, non **half hour**, or prepay);
    - (ii) the **price category code** assigned to the **ICPs**;
    - (iii) the **metering installation** category of the **metering installation** at the **ICPs**;
    - (iv) the **installation type** code assigned to the **ICPs**; and
  - (c) the reasons, being 1 or more reasons specified in paragraph (a) and (b), for the **trader** being unable to trade at the **NSPs** or **ICPs**.
- (3) A **trader** must comply with a notice given to it under subclause (1).

Clause 4A: inserted, on 28 August 2015, by clause 13 of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

Clause 4A(1): amended, on 5 October 2017, by clause 283 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### **4B Authority may direct registry manager not to process certain ICP switching activities**

- (1) If the **Authority** gives written notice to a **trader** under clause 2, the **Authority** may, by written notice to the **registry manager**, direct the **registry manager** not to—
- (a) process the initiation or completion of the switch of any **ICP** to the defaulting **trader**; or
  - (b) process a switch withdrawal request under clauses 17 and 18 of Schedule 11.3 if processing the switch withdrawal request would mean the defaulting **trader** retained responsibility for the **ICP** to which the switch withdrawal request applies.
- (2) If the **Authority** gives written notice under subclause (1), the **registry manager** must comply with the notice.

Clause 4B: replaced, on 7 September 2020, by clause 6 of the Electricity Industry Participation Code Amendment (Improving Trader Default Process) 2020.

Clause 4B Heading: amended, on 5 October 2017, by clause 284(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 4B: amended, on 5 October 2017, by clause 284(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 4B: inserted, on 28 August 2015, by clause 13 of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

#### **5 Authority may assign contracts and ICPs**

- (1) This clause applies if, by the end of the 17<sup>th</sup> day after the defaulting **trader** was given notice under clause 2(1),—
- (a) the defaulting **trader** has not remedied the **event of default** or, in the case of an **event of default** under clause 14.41(b) in respect of which there is an unresolved invoice dispute under clause 14.25, has not reached an agreement with the **Authority** to resolve the **event of default**; and

- (b) the defaulting **trader** continues to have 1 or more contracts under which a customer of the defaulting **trader** purchases **electricity** from the defaulting **trader** or the defaulting **trader** is still recorded in the **registry** as being responsible for 1 or more **ICPs**.
- (2) The **Authority** may—
  - (a) exercise its right under a contract under which a customer purchases **electricity** from the defaulting **trader** to assign the rights and obligations of the defaulting **trader** under the contract to a recipient **trader** in accordance with the contract; and
  - (b) assign an **ICP** to a recipient **trader** and direct the **registry manager** to amend the record in the **registry** so that the recipient **trader** is recorded as being responsible for the **ICP**; and
  - (c) specify the recipient **trader** to whom the rights and obligations under the contract or the **ICP** will be assigned.
- (2A) When determining an assignment under subclause (2), the **Authority** may do 1 or both of the following:
  - (a) exercise its discretion to determine the recipient **trader** without going through a tender or other competitive process;
  - (b) undertake a tender or other competitive process to determine the recipient **trader**.
- (3) The **Authority** must, by notice in writing to each recipient **trader**, direct the recipient **trader** to accept an assignment under subclause (2).
- (4) Before the **Authority** gives notice to a recipient **trader** under subclause (3), the **Authority** may decide not to assign rights and obligations of the defaulting **trader** under a contract or an **ICP** to a recipient **trader** if the recipient **trader** satisfies the **Authority** that the assignment would pose a serious threat to the financial viability of the recipient **trader**.
- (5) A recipient **trader** must comply with a direction given to it under subclause (3).
- (6) The **registry manager** must comply with a direction given to it under subclause (2).
- (7) Before the **Authority** exercises its right to assign rights and obligations or an **ICP** under subclause (2), the **Authority** must, if the **Authority** considers it is practicable, consult with the defaulting **trader** as to the need for the notice.

Clause 5, heading: amended, on 28 February 2015, by clause 14(1) of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

Clause 5(1): amended, on 28 February 2015, by clause 14(2) of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

Clause 5(1)(a): amended, on 24 March 2015, by clause 9 of the Electricity Industry Participation Code Amendment (Settlement and Prudential Security) 2014.

Clause 5(1)(b): amended, on 1 November 2018, by clause 70 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 5(2) to (8): amended, on 28 February 2015, by clause 14(3) of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

Clause 5(2)(a): amended, on 1 November 2018, by clause 70 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 5(2)(b): amended, on 5 October 2017, by clause 285(a) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 2A: inserted, on 7 September 2020, by clause 7(1) of the Electricity Industry Participation Code Amendment (Improving Trader Default Process) 2020.

Clause 5(6): amended, on 5 October 2017, by clause 285(b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 5(8): deleted, on 7 September 2020, by clause 7(2) of the Electricity Industry Participation Code Amendment (Improving Trader Default Process) 2020.

## 5A Effect of assignment

If the **Authority** assigns an **ICP** to a recipient **trader** under clause 5, and at the time of the assignment the recipient **trader** does not comply with clause 10.24(a) in relation to the **ICP**, the recipient **trader** is excused from complying with that clause for the first 3 months after the assignment.

Clause 5A: inserted, on 28 August 2015, by clause 15 of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

## 6 Authority must provide information to recipient trader

If the **Authority** exercises its right to assign rights and obligations or an **ICP** under clause 5(2), the **Authority** must provide the following information to each recipient **trader**:

- (a) the number of customer contracts (to the extent that the **Authority** has the information) and **ICPs** assigned to the **trader**; and
- (b) any information that the **Authority** holds about the customers and **ICPs** assigned to the **trader**.

Clause 6, heading: amended, on 28 February 2015, by clause 16(1) of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

Clause 6: amended, on 28 February 2015, by clause 16(2) of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

Clause 6(a) and (b): amended, on 1 November 2018, by clause 71(a) and (b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

## 7 Authority may direct registry manager to process certain ICP switching activities

(1) If the **Authority** gives written notice to a defaulting **trader** under clause 2, the **Authority** may, by written notice to the **registry manager**, even if the defaulting **trader** has not complied with its obligations under Schedule 11.3, direct the **registry manager** to—

- (a) initiate and complete the switch of an **ICP** away from the defaulting **trader**; or
- (b) process the initiation or completion of the switch of an **ICP** away from the defaulting **trader**; or
- (c) cancel the switch of an **ICP** to the defaulting **trader**; or
- (d) process the completion of a switch withdrawal request under clauses 17 and 18 of Schedule 11.3 for an **ICP** that is being switched to the defaulting **trader**; or
- (e) cancel a switch withdrawal request made under clauses 17 and 18 of Schedule 11.3 for an **ICP** that is being switched away from the defaulting **trader**.

(2) The **registry manager** must, as soon as possible, comply with a direction given by the **Authority** in a written notice.

Clause 7: replaced, on 7 September 2020, by clause 8 of the Electricity Industry Participation Code Amendment (Improving Trader Default Process) 2020.

Clause 7 Heading: amended, on 5 October 2017, by clause 286(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 7: amended, on 28 February 2015, by clause 17 of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

Clause 7: amended, on 5 October 2017, by clause 286(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**8 Terms of assigned contract**

- (1) If the **Authority** exercises its right to assign rights and obligations under clause 5(2), the **Authority** must attempt to advise the customer that the terms of the contract may be amended on assignment.
- (2) The recipient **trader** must use reasonable endeavours to advise the customer of those terms.

Clause 8(1) and (2): amended, on 1 November 2018, by clause 72 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 8(2): amended, on 28 February 2015, by clause 18 of the Electricity Industry Participation Code Amendment (Trader Default) 2014.

## Schedule 11.6

### Forms for authorisation of an Agent to request consumption information

Schedule 11.6 inserted, on 1 March 2020, by clause 7 of the Electricity Industry Participation Code Amendment (Requirements and Processes for Information Requests by Agents) 2020.

#### Form 1: Form for authorisation by an individual (being a natural person)

Consumer: [Consumer full name]

Property: [property address (es)]

Customer number<sup>1</sup>: [customer number]

Installation Control Points (ICP(s)) Identifier(s): [List all ICPs]

Retailer: [name of Retailer]

Agent: [full name of Agent and contact details]

Period of authority: [enter period of authorisation to Agent]

I (being the Consumer named above) confirm that I own or occupy the Property identified above (or owned or occupied that property at the relevant time) or otherwise am or was responsible for the consumption of electricity at the Property.

I confirm that I am or have been a customer of the Retailer identified above in relation to the Property and ICP(s) identified above.

I authorise:

- (a) the Agent identified above to request, receive and hold information on my behalf about electricity consumption for the Property or the ICP(s); and
- (b) the Retailer to transfer information on my behalf about electricity consumption for the Property or ICP(s) to the Agent.

[Signature/electronic signature of Consumer or of a person on behalf of the Consumer (in which case, evidence of that person's authority to sign on behalf of the Consumer is required) or other evidence of Consumer's agreement]

---

<sup>1</sup> This is the customer number assigned to the Customer by the Retailer to whom the request is being made.

**Form 2: Form for authorisation by a non-individual (not being a natural person)**

Consumer: [Consumer full name]

Authorised Representative of Consumer: [Full name and title/position with Consumer]

Property: [property address (es)]

Customer number<sup>2</sup>: [customer number]

Installation Control Points (ICP(s)) Identifier(s): [List all ICPs]

Retailer: [name of Retailer]

Agent: [full name of Agent and contact details]

Period of authority [enter period of authorisation to Agent]

The Consumer identified above owns or occupies the Property identified above (or owned or occupied that property at the relevant time) or otherwise is or was responsible for the consumption of electricity at the Property.

The Consumer is or has been a customer of the Retailer identified above in relation to the Property and, ICP(s) identified above.

The Consumer authorises:

(a) the Agent identified above to request, receive and hold information on the Consumer's behalf about electricity consumption for the Property or the ICP(s); and

(b) the Retailer to transfer information on the Consumer's behalf about electricity consumption for the Property or ICP(s) to the Agent.

In signing this form as the Authorised representative of the Consumer, I warrant that I am authorised to sign this form and agree to the matters above on behalf of the Consumer.

[Signature/electronic signature of Authorised Representative].

---

<sup>2</sup> This is the customer number assigned to the Customer by the Retailer to whom the request is being made.

# Electricity Industry Participation Code 2010

## Part 11A Consumer Care

Part 11A and Schedule 11A.1: inserted on 1 January 2025, by the Electricity Industry Participation Code Amendment (Consumer Care Obligations) 2024

### Contents

- 11A.1 Purpose of this Part
- 11A.2 Interpretation
- 11A.3 Participants subject to Consumer Care Obligations
- 11A.4 Retailer must report compliance with Consumer Care Obligations
- 11A.5 Retailers and distributors to provide certain information upon request
- 11A.6 Retention of records
- 11A.7 Authority may require independent review
- 11A.8 Nomination of independent person to undertake review
- 11A.9 Factors relevant to direction under clause 11A.8
- 11A.10 Carrying out of review by independent person
- 11A.11 Payment of review costs

### Schedule 11A.1 Consumer Care Obligations

---

#### *Purpose and interpretation*

#### **11A.1 Purpose of this Part**

The purpose of this Part is to impose a set of minimum standards on **retailers** requiring them to:

- (a) adopt behaviours and processes that foster positive relationships with residential consumers;
- (b) support residential consumers in accessing and maintaining an affordable and constant **electricity** supply suitable for their needs; and
- (c) help minimise harm to residential consumers caused by insufficient access to **electricity** or by payment difficulties.

#### **11A.2 Interpretation**

In this Part, unless the context otherwise requires,—

**alternate contact person** means any person authorised by a customer, or by a medically dependent consumer who permanently or temporarily resides at a customer's premises, to operate as an alternate contact person if a **retailer** is unable to contact the customer or medically dependent consumer, provided any alternate contact person is independent of the customer's **retailer**

**bond** means an upfront payment of a lump sum to provide security to a **retailer** for the performance of a customer's obligations under their contract with the **retailer**

**conditional discount** means the amount by which a price payable by a customer is reduced, or would be reduced, as a consequence of the customer satisfying a payment condition

**confirmation of status form** means a form, which may be in the **prescribed form**, completed by a health practitioner with an appropriate scope of practice, which confirms the status of a person as a medically dependent consumer

**Consumer Care Obligations** means the obligations set out in Schedule 11A.1

**consumer care policy** is the policy a **retailer** is required to **publish** under clause 3(1) of Schedule 11A.1

**customer** means a residential consumer who has entered into a contract with a **retailer** for the supply of **electricity** to the residential consumer's premises, where the **electricity** supplied is used fully or partly for residential purposes

**electricity plan comparison platform** means an electricity plan comparison website or other platform prescribed by the **Authority** and **published** on the **Authority's** website

**fee** means an amount that a **retailer** charges a customer in connection with the supply of **electricity** other than a rate which constitutes a pricing plan, and includes a break fee for a fixed term contract or a fee for **electrical disconnection** or reconnection

**health practitioner** has the meaning given to it by section 5 of the Health Practitioners Competence Assurance Act 2003

**invoice** means an invoice issued by a **retailer** to a post-pay customer in relation to the supply of **electricity** to that customer

**medically dependent consumer** means a residential consumer who depends on mains **electricity** for critical medical support, such that loss of **electricity** supply may result in loss of life or serious harm, including a residential consumer who depends on medical or other electrical equipment to support a medical treatment regime (which may include use of a microwave to heat fluids for renal dialysis and similar use of electrical equipment)

**payment condition** means a provision that relates to the timing or method of payment or delivery of an invoice

**payment options** means the payment methods and options offered by a **retailer** in relation to a product offering or contract

**payment support plan** means an agreed plan between a **retailer** and a customer who is anticipating or experiencing payment difficulty, for payment in relation to the supply of **electricity** to that customer

**post-pay** means a product offering or contract where the **retailer** charges the customer for **electricity** after it has been consumed and includes pay-ahead plans, being pricing plans under which a customer can purchase an amount of **electricity** in advance with the **retailer** then managing under- and over-payments as required

**prepay** means a product offering or contract where the customer pays the **retailer** for **electricity** before the **electricity** is consumed, and the customer is **electrically disconnected** if the customer's pre-paid credit expires or any approved arrears limit is reached

**pricing plan** means the rate or rates charged for **electricity** supplied to the customer under their contract or offered as part of a product offering, and includes rates charged per kWh (such as night, daily, anytime rates), any fixed rates or fixed or variable charges (such as a daily fixed charge), as well as any costs related to the supply of **electricity** which are passed through to the customer

**product offering** means an offer for the supply of **electricity** at an **ICP** offered by a **retailer**

**reconfirmation form** means a form, which may be in the **prescribed form**, which a **retailer** may request to be completed by a health practitioner with an appropriate scope of practice, which reconfirms the status of a person as a medically dependent consumer

**reconnection** means an **electrical connection** following an **electrical disconnection**

**residential consumer** means a person who uses **electricity** in respect of residential premises

**residential premises** means any premises used or intended for occupation by any person as a place of residence

**support agency** means a government or non-government agency that provides assistance to low-income residential consumers or residential consumers facing payment difficulties, including agencies providing financial mentoring services or advice on the efficient use of **electricity**

**support person** means any person authorised by a customer, or by a residential consumer with whom a **retailer** interacts, to assist the customer or residential consumer to engage with the **retailer**, provided any support person is independent of the customer's **retailer**

**uncontracted premises** means any residential premises where the **retailer** is recorded in the **registry** as accepting responsibility for the **ICP**, but for which the **retailer** does not have a contract with a customer

*Application of the Consumer Care Obligations*

**11A.3 Participants subject to Consumer Care Obligations**

- (1) Every **retailer** who sells **electricity** to residential consumers must comply with the Consumer Care Obligations described in column 1 from the date set out in column 2:

<b>Column 1 – Consumer Care Obligations</b>	<b>Column 2 – Date</b>
Clauses 37 and 68 of the Consumer Care Obligations	1 January 2025
All remaining clauses of the Consumer Care Obligations	1 April 2025

- (2) Every **distributor** must comply with clauses 35 and 60(1) of the Consumer Care Obligations from 1 April 2025.
- (3) Every **trader** must comply with clauses 51(2), 51(3) and 61 of the Consumer Care Obligations from 1 April 2025.

*Reporting and record-keeping*

**11A.4 Retailer must report compliance with Consumer Care Obligations**

- (1) Each **retailer** who sells **electricity** to residential consumers in a year beginning 1 July must submit a compliance report to the **Authority** in respect of that year within 3 months of the end of that year.
- (2) Each compliance report must be in the **prescribed form** and contain the following information for the year in respect of which the compliance report is submitted:
  - (a) all versions of the **retailer's** consumer care policy which were in force at any time during that year;
  - (b) a statement as to whether or not the **retailer** complied with all requirements in the Consumer Care Obligations during that year;
  - (c) a summary of any instances of non-compliance identified by the **retailer** and any remedial action taken; and
  - (d) any other information required by the **Authority**.
- (3) The **retailer** must take all practicable steps to ensure that the information contained in the compliance report is:
  - (a) complete and accurate;
  - (b) not misleading or deceptive; and
  - (c) not likely to mislead or deceive.
- (4) Each compliance report must be accompanied by a certification signed and dated by a director or the chief executive officer of the **retailer**, or a person holding a position equivalent to one of those positions, that the person considers, on reasonable grounds and to the best of that person's belief, that the compliance report is a complete and accurate record of the matters stated in the compliance report.
- (5) If the **retailer** becomes aware that any information the **retailer** provided in the compliance report is not complete or accurate, is misleading or deceptive, or is likely to mislead or deceive, the **retailer** must as soon as practicable provide to the **Authority** such further information as is necessary to ensure that the information provided is complete and accurate, is not misleading or deceptive and is not likely to mislead or deceive, even if the certification under subclause (4) has previously been issued on reasonable grounds.
- (6) Notwithstanding anything else in this clause, a **retailer** is not required to include in the compliance report any information in respect of which the **retailer** claims legal professional privilege.
- (7) The **Authority** may **publish** any information submitted to it in a compliance report, and the certification provided under subclause (4).
- (8) For the avoidance of doubt, a **retailer** who sells **electricity** to residential consumers in the period between this clause coming into force and 30 June 2025 must submit a

compliance report under subclause (1) covering at least that period within 3 months of 30 June 2025.

#### **11A.5 Retailers and distributors to provide certain information upon request**

Each **retailer** and **distributor** to whom clause 11A.3 applies must, if required to do so by the **Authority**, provide, within the timeframe specified by the **Authority**:

- (a) a description of the policies (other than a consumer care policy), procedures and processes the **retailer** or **distributor** has implemented for the purpose of complying with 1 or more of the Consumer Care Obligations; and
- (b) in relation to a **retailer**, such other supporting evidence the **retailer** has relied on to make the compliance report as the **Authority** may require.

#### **11A.6 Retention of records**

- (1) A **retailer** must ensure it maintains records of any activity regulated under the Consumer Care Obligations, including records of:
  - (a) communications with customers (including information and advice provided to the customer under the Consumer Care Obligations);
  - (b) applications to be recorded as a medically dependent consumer and associated matters; and
  - (c) **electrical disconnections** and reconnections.
- (2) A **retailer** must retain records under subclause (1) for a period of 5 years from, as applicable:
  - (a) the date the relevant customer contract is terminated; or
  - (b) the date the uncontracted premises are disconnected.

#### **11A.7 Authority may require independent review**

The **Authority** may, at its discretion, require a review by an independent person of whether a **retailer** has complied with its obligations under clause 11A.4.

#### **11A.8 Nomination of independent person to undertake review**

- (1) If the **Authority** requires a review under clause 11A.7—
  - (a) the **Authority** must require the **retailer** to nominate an appropriate independent person to undertake the review; and
  - (b) the **retailer** must provide that nomination within a reasonable timeframe.
- (2) The **Authority** may direct the **retailer** to appoint the person nominated under subclause (1) or to nominate another person for approval.
- (3) If the **retailer** fails to nominate an appropriate person under subclause (1) within 5 **business days**, the **Authority** may direct the **retailer** to appoint a person of the **Authority's** choice.
- (4) The **retailer** must appoint a person to undertake the review in accordance with a direction made under subclause (2) or subclause (3).

#### **11A.9 Factors relevant to direction under clause 11A.8**

- (1) In making a direction under clause 11A.8(2) or clause 11A.8(3), the **Authority** may have regard to any factors it considers relevant in the circumstances, including the following:

- (a) the degree of independence between the **retailer** and the person nominated under clause 11A.8(1);
  - (b) the expected quality of the review; and
  - (c) the expected costs of the review.
- (2) For the purpose of subclause (1)(a), the **Authority** may have regard to the special definition of independent under clause 1.4 but is not bound by that definition.

#### **11A.10 Carrying out of review by independent person**

- (1) A **retailer** subject to a review under clause 11A.7 must, on request from the person undertaking the review, provide that person with such information as the person reasonably requires in order to carry out the review.
- (2) The **retailer** must provide the information no later than 15 **business days** after receiving a request from the person for the information.
- (3) The **retailer** must ensure that the person undertaking the review—
  - (a) produces a report on whether, in the opinion of that person, the **retailer** may not have complied with clause 11A.4; and
  - (b) submits the report to the **Authority** within the timeframe specified by the **Authority**.
- (4) The report produced under subclause (3)(a) must include any other information that the **Authority** may reasonably require.
- (5) Before the report is submitted to the **Authority**, any identified failure of the **retailer** to comply with clause 11A.4 must be referred back to the **retailer** for comment.
- (6) The comments of the **retailer** must be included in the report.
- (7) The **retailer** may require that the person undertaking the review does not provide the **Authority** with a copy of any information that the **retailer** has provided to the person in accordance with subclause (2).

#### **11A.11 Payment of review costs**

- (1) If a report received under clause 11A.10(3)(a) establishes, to the **Authority's** reasonable satisfaction, that the **retailer** may not have complied with clause 11A.4, the **retailer** must pay the costs of the person who undertook the review.
- (2) Despite subclause (1), if a report establishes, to the **Authority's** reasonable satisfaction that any non-compliance of the **retailer** is minor, the **Authority** may, at its discretion, determine the proportion of the person's costs that the **retailer** must pay, and the **retailer** must pay those costs.
- (3) If a report establishes to the **Authority's** reasonable satisfaction that the **retailer** has complied with clause 11A.4, the **Authority** must pay the person's costs.

# Schedule 11A.1

## Consumer Care Obligations

cl 11A.3

### Part 1 Interpretation

#### 1 Interpretation

In the **Consumer Care Obligations**, words and phrases appear in bold to alert the reader to the fact that they are defined in clause 1.1 or 11A.2.

### Part 2 Consumer Care Policy and related matters

#### 2 Purpose of this Part

This Part of the **Consumer Care Obligations** requires **retailers** to **publish** their **consumer care policy** and other information, and sets expectations as to **retailers'** communication with **customers** and **residential consumers**, in order to promote the purpose in clause 11A.1.

#### 3 Consumer care policy

- (1) Each **retailer** must develop and **publish** a **consumer care policy** which sets out the **retailer's** policies in relation to **residential consumer** care, including the matters covered in the **Consumer Care Obligations**.
- (2) Without limiting subclause (1), the **consumer care policy** must explain, in clear and accessible language:
  - (a) that **electricity** supply makes an essential contribution to the wellbeing of **residential consumers**;
  - (b) that the **retailer** will work with its **customers** in a respectful, collaborative and constructive manner;
  - (c) that the **retailer** will communicate with its **customers** and other **residential consumers** it interacts with in a manner which is understandable, timely, clear and accessible;
  - (d) how the **retailer** can assist **customers** to understand the most suitable pricing plan for their circumstances;
  - (e) that a **customer** can request access to information about their consumption of **electricity** in accordance with this Code, including clause 11.32A, to help them make decisions about which **pricing plan** suits them;
  - (f) how the **retailer** will work with **customers** experiencing payment difficulties to resolve those payment difficulties as far as possible;
  - (g) how the **retailer** will work with **post-pay customers** experiencing payment difficulties to ensure that **electrical disconnection** is a measure of last resort;
  - (h) how the **retailer** will reflect on any issues which arise in relation to **residential consumer** care and use those experiences to continually improve the extent to which its policies promote the purpose in clause 11A.1; and

- (i) the information required in relation to **fees, conditional discounts and bonds** under clause 65.
- (3) When developing its **consumer care policy**, a **retailer** must seek to avoid disparate outcomes arising from differences in language, ethnicity, educational achievement, culture, gender, disability, age, health, income and wealth.
- (4) A **retailer** must review, and if the **retailer** considers it necessary or desirable update, its **consumer care policy** at least every 2 years.

#### **4 Communications with customers and residential consumers**

- (1) Each **retailer** must use reasonable endeavours to:
  - (a) work with its **customers** in a respectful, collaborative and constructive manner; and
  - (b) communicate with its **customers** and any other **residential consumers** it interacts with in a manner which is understandable, timely, clear and accessible.
- (2) Each **retailer** must use reasonable endeavours to adapt its communications based on the needs of the **customers** or **residential consumers** receiving them.
- (3) If a **customer** or **residential consumer** is not sufficiently familiar with the English language to communicate without assistance, a **retailer** may meet the requirement in subclause (1)(b) by ensuring the **customer** or **residential consumer** has the opportunity to nominate and use a **support person** to assist them with understanding and communicating with the **retailer**.

#### **5 Working with support agencies and health practitioners**

Each **retailer** must:

- (a) have in place processes for, where a **customer** may be experiencing payment difficulties, or where otherwise required by these **Consumer Care Obligations**:
  - (i) seeking that **customer's** consent to refer that **customer** to 1 or more **support agencies**; and
  - (ii) having obtained consent, referring that **customer** to the **support agency** or **agencies**, within 5 **business days**; and
- (b) use reasonable endeavours to work with any **support agencies** and **health practitioners** it liaises with in accordance with these **Consumer Care Obligations** in a cooperative, constructive and timely manner.

#### **6 Customer-facing website requirements**

Each **retailer** must clearly and prominently **publish** the following information in a dedicated section of their **customer-facing** website:

- (a) a statement that the **retailer** has a **consumer care policy** which complies with the **Consumer Care Obligations**;
- (b) the **retailer's consumer care policy** or a direct hyperlink to it;
- (c) how to contact the **retailer** with any questions regarding the **retailer's consumer care policy** or the **retailer's** compliance with the **Consumer Care Obligations**;
- (d) a hyperlink to the page of the **Authority's** website prescribed for the purposes of this clause; and
- (e) information, including hyperlinks to the websites and contact details of:

- (i) one or more **support agencies** offering advice on the efficient use of **electricity**;
- (ii) one or more **support agencies** offering financial mentoring services; and
- (iii) the dispute resolution scheme identified under clause 3 of Schedule 4 of the **Act**.

### Part 3

## Signing up customers and contract denials

### 7 Purpose of this Part

This Part of the **Consumer Care Obligations** sets out requirements for **retailers** when signing up a **customer** or when a **residential consumer** enquiring with the **retailer** is denied a contract, for the purpose of ensuring **residential consumers** are fully informed before and after contracting with a **retailer** and that **residential consumers** who may be denied a contract are supported.

#### *Information to be provided prior to sign up*

### 8 Information to be provided prior to sign up

- (1) Before signing up a **residential consumer** as a new **customer**, a **retailer** must ensure that either:
  - (a) in the course of an oral communication, that person receives:
    - (i) advice regarding the **retailer's** available **product offerings** and related **pricing plans** that are relevant to that person's current household circumstances; and
    - (ii) assistance to understand the most suitable **product offering** for that person's current household circumstances, including any conditions the person must meet in order to obtain the greatest benefit from the **product offering** and the drawbacks of any particular **product offering**, including any **fees** the person may incur or **bonds** the person may be required to pay; or
  - (b) where that person is engaging with an online platform, that person has easy access to information about the **retailer's** available **product offerings** and related **pricing plans**, any conditions which must be met in order to obtain the greatest benefit from a **product offering** and the drawbacks of any particular **product offering**, including any **fees** the person may incur or **bonds** the person may be required to pay.
- (2) A **retailer** must ensure that a **residential consumer** considering becoming a **customer** of that **retailer** has:
  - (a) the option to review the **retailer's** terms and conditions; and
  - (b) easy access to information about the **retailer's** available **payment options**.
- (3) A **retailer** must ensure that its terms and conditions are provided in plain English.

**9 Information to be provided before entering prepay contracts**

Before a **retailer** enters into a new **prepay** contract, the **retailer** must confirm with the **residential consumer** seeking the contract that they are aware:

- (a) of any differences between **fees, bonds** and the rate or rates charged for **electricity** under relevant **post-pay** and **prepay product offerings** offered by the **retailer** or any related **retailer**;
- (b) that when credit under a **prepay** contract reduces to zero or any approved arrears limit is reached, **electrical disconnection** will occur;
- (c) of the warnings the **customer** will receive prior to the credit for the **meter** expiring; and
- (d) of how to purchase additional or emergency credit under the **prepay** contract.

*Considering and declining contracts*

**10 Declining to enter into a contract**

If a **retailer** decides not to enter into a **prepay** or **post-pay** contract with a **residential consumer** seeking such a contract, the **retailer** must provide the person with:

- (a) information about 1 or more **electricity plan comparison platforms**;
- (b) reasons for the **retailer's** decision; and
- (c) information, including hyperlinks to the websites and contact details, of 1 or more **support agencies** from which the **residential consumer** could seek assistance.

*Information to be provided to new customers*

**11 Information to be provided to new customers**

A **retailer** must advise any new **customer** of:

- (a) the existence of the **retailer's consumer care policy** and provide a copy of the **consumer care policy** or a direct hyperlink to it;
- (b) the **retailer's** available **payment options**; and
- (c) the importance of notifying the **retailer** if they, or another **residential consumer** who permanently or temporarily resides at the premises, is a **medically dependent consumer** and where to obtain information on how to apply to be recorded as a **medically dependent consumer**.

**Part 4**

**Information and records relating to customer care**

**12 Purpose of this Part**

This Part of the **Consumer Care Obligations** imposes obligations on **retailers** regarding the collection, recording, and use of information relating to **customer** care for the purpose of enabling **retailers** to proactively and effectively support their **customers**, including those who may experience payment difficulties.

### 13 Retailers to request communication information from customers

- (1) A **retailer** must request the following information relating to communication from each new **customer**:
  - (a) contact information for at least 2 communication channels, which may include email, post, phone, text message, or the use of in-app messages;
  - (b) any other information the **customer** wishes to provide which may be relevant to engaging with that **customer**;
  - (c) whether the **customer** wishes to use an **alternate contact person** and, if so, the **alternate contact person's** contact information; and
  - (d) whether, and if so, when, the **customer** wishes to use a **support person**.
- (2) Whenever a **customer** provides the information specified in subclause (1), the **retailer** must use the **customer's** information to inform the **retailer's** communication practices with that **customer** to the extent reasonably possible.
- (3) A **retailer** must, if it has not already done so, request the information in subclause (1) from existing **customers** when first contacting that **customer** under clause 16.

#### *Alternate contact persons*

### 14 Alternate contact person

- (1) If a **customer** nominates an **alternate contact person**, the **retailer** may contact that **alternate contact person** if the **retailer** is unable to contact the **customer**.
- (2) If at any time a **customer's** nominated **alternate contact person** advises the **retailer** that they no longer agree to act in that capacity, the **retailer** must record that information and, when liaising with the **customer** for the first time after being so advised by the nominated **alternate contact person**, notify the **customer**.

## Part 5

### Business-as-usual account management

### 15 Purpose of this Part

This Part of the **Consumer Care Obligations** imposes obligations on **retailers** regarding business-as-usual account management for the purpose of ensuring that **customers** remain informed, in order to promote the purpose in clause 11A.1.

### 16 Retailers to contact customers at least annually

At least once a year, a **retailer** must contact each of its **customers** to:

- (a) advise the **customer** that they can request access to information about their consumption of **electricity** in accordance with this Code, including clause 11.32A;
- (b) advise the **customer** of the existence of the **retailer's consumer care policy** and provide a copy of the **consumer care policy** or a direct hyperlink to it; and
- (c) ask the **customer** to confirm the **customer's** information, as recorded by the **retailer** in accordance with Part 4 and Part 8 of the **Consumer Care Obligations**, remains accurate.

**17 Retailers to provide further information prior to customers making changes**

- (1) If a **customer** enquires with the **retailer** about changing a **pricing plan** or signing up to a different **product offering**, before making any change the **retailer** must:
  - (a) advise the **customer** of the **retailer's** available **product offerings**, and related **pricing plans** and **payment options** that are relevant to the **customer's** current household circumstances;
  - (b) use reasonable endeavours to assist the **customer** in understanding the most suitable option for the **customer's** current household circumstances, including any conditions the **customer** must meet in order to obtain the greatest benefit from a **product offering** and the drawbacks of any particular option including any **fees** the person may incur; and
  - (c) provide information about 1 or more **electricity plan comparison platforms**.
- (2) Subclause (1) does not apply to **customer** changes made through an online platform, provided the **customer** has easy access to information about the **retailer's** available **product offerings** and related **pricing plans** and **payment options** that may be relevant to the **customer's** current household circumstances.

*Account management for post-pay customers*

**18 Retailers to use meter readings for invoicing**

A **retailer** must use **meter readings** and not **estimated readings** for invoicing whenever practicable, unless otherwise agreed by the **customer** for the purpose of their preferred **payment option** (such as Smooth Pay or redirection of income) or **payment support plan**.

**19 Information required on invoices**

In addition to any applicable requirements in clauses 11.30 to 11.30B, a **retailer** must clearly set out on each **invoice**:

- (a) a breakdown of the total amount owed, distinguishing between the current invoicing period and any overdue amounts;
- (b) the due date or dates for payment;
- (c) available **payment options**, or advice on where to find information regarding available **payment options** in supporting documentation (which may include the **retailer's** website or app); and
- (d) if bundled goods or services have been received by the **customer**, the amounts owing for each good or service.

*Account management for prepay customers*

**20 Retailers to notify prepay customers when credit balance reaches a certain level**

- (1) A **retailer** must notify a **prepay customer** immediately after the **prepay customer's** credit balance decreases below the equivalent of a reasonable estimation of 2 days of standard usage for the **prepay customer**.
- (2) A **retailer** must ensure that the notification to a **customer** in accordance with subclause (1) includes:

- (a) the **customer's** current credit balance;
- (b) a recommendation that the **customer** top-up the **customer's** account to avoid interruption in the supply of **electricity**; and
- (c) a statement that when credit reduces to zero or any approved arrears limit is reached, **electrical disconnection** will occur.

## Part 6

### When payment difficulties are anticipated or arise

#### 21 Purpose of this Part and knowledge of payment difficulties

- (1) This Part of the **Consumer Care Obligations** requires a **retailer** to take specific actions when a **customer** is in arrears or the **retailer** knows that the **customer** may be experiencing payment difficulties for the purpose of supporting those **customers** in accessing and maintaining an affordable and constant **electricity** supply suitable for their needs.
- (2) For the purposes of these **Consumer Care Obligations**, a **retailer** is deemed to know that a **customer** may be experiencing payment difficulties when:
  - (a) a **customer** tells the **retailer** that they anticipate challenges in meeting **invoice** due dates due to factors such as reduced income, upcoming financial commitments, or shifts in their financial circumstances;
  - (b) a **customer** fails to pay an **invoice** by the **invoice** due date for more than 1 billing cycle in a 6-month period; or
  - (c) the **retailer** becomes aware of information that a reasonable **retailer** would consider indicates anticipated or actual payment difficulty.
- (3) Each **retailer** must record and use information relevant to the matters listed in subclause (2), to identify **customers** who may be experiencing payment difficulties.
- (4) Information under subclause (2)(c) may include information provided by the **customer** or information gathered by the **retailer** through the use of a methodology or process to identify when **customers** may be experiencing payment difficulties based on information such as payment history and changes in consumption.
- (5) A **retailer** is not required to treat a **customer** as experiencing payment difficulties if the **customer** confirms that they are not experiencing payment difficulties, unless the **retailer** subsequently becomes aware of new information that meets one of subclauses (2)(a) to (c).

#### 22 Retailers' obligations if customer fails to pay invoice

- (1) Each **retailer** must take reasonable steps to support **customers** who fail to pay an **invoice** to resolve payment issues and avoid **electrical disconnection**.
- (2) The steps under subclause (1) must include:
  - (a) issuing a reminder notice to a **customer** who fails to pay an **invoice** by the **invoice** due date as soon as reasonably practicable after the **invoice** becomes overdue; and
  - (b) if payment has not been made within 14 days of the **invoice** being issued, making further attempts to contact the **customer** or the **customer's alternate contact**

**person** (if applicable and as appropriate) for the purpose of seeking payment and avoiding **electrical disconnection**.

- (3) Any notice issued under subclause (2)(a) must include:
  - (a) a statement that the **retailer** has a **consumer care policy**; and
  - (b) a copy of the **consumer care policy** or a direct hyperlink to it.
- (4) Any contact attempts under subclause (2)(b) involving written communication, and any successful contact attempts involving oral communication, made 4 days or more after the initiation of contact attempts under subclause (2)(b), must include an offer to discuss with the **customer payment support plans** that appear suitable to the **customer's** circumstances.
- (5) A **retailer** must make at least 3 separate contact attempts under subclause (2)(b), spread over 7 or more days, before initiating the disconnection for non-payment process in clause 31.

### 23 Retailers to engage with customers experiencing payment difficulties

Where a **retailer** knows that a **post-pay customer** not on a **payment support plan** may be experiencing payment difficulties, the **retailer** must:

- (a) use best endeavours to engage with the **customer** for the purposes of resolving the payment difficulties;
- (b) communicate the steps the **retailer** will follow to assist the **customer** to resolve their payment difficulties and the timeframes for those steps;
- (c) remind the **customer** that:
  - (i) they may nominate a **support person** or an **alternate contact person**; and
  - (ii) the **retailer** has a **consumer care policy**, which explains what the **retailer** can and will do to support the **customer**;
- (d) provide the **customer** with relevant information to assist them to improve energy efficiency at their premises, or the information referred to in clause 6(e)(i);
- (e) offer advice, and if the **customer** agrees, advise on changes that could be made to:
  - (i) the **customer's** consumption profile (which may include increasing the proportion of **electricity** used at off-peak times); or
  - (ii) the metering at the **customer's** premises (which may include taking steps to support changes to the **customer's** consumption profile, or to enable load control),  
that might reasonably be expected to reduce the amount of the **customer's** future **invoices**, after accounting for the cost of implementing such changes (which may include the cost of changing the **metering** at the **customer's** premises);
- (f) consider whether, based on the **customer's** consumption over the past 12 months, and any advice given under paragraph (e), the **retailer** has 1 or more **pricing plans** that could provide a lower cost of **electricity** to the **customer** and, if so:
  - (i) advise the **customer** of that plan or those plans that the **retailer** reasonably considers are most suitable for that **customer's** current household circumstances (provided that the **retailer** does not need to advise the **customer** of more than 3 **pricing plans**), any conditions the person must meet in order to obtain the greatest benefit from any **pricing plan** and the

- drawbacks of any particular plan including any **fees** the person may incur;  
and
- (ii) where the **retailer** advises the **customer** of more than 1 **pricing plan**, identify the **pricing plan** which the **retailer** reasonably considers is the lowest cost option for the **customer**, taking into account those aspects of the **customer's** circumstances of which the **retailer** has knowledge;
- (g) provided the **customer** has engaged with the **retailer**:
- (i) satisfy itself, acting reasonably, that the **customer** is aware or has been reminded of the availability of financial assistance, financial mentoring services and **electricity** efficiency advice from **support agencies**; and
  - (ii) offer to refer the **customer** to any of those **support agencies** where appropriate, with the **customer's** agreement;
- (h) if a referral is made under paragraph (g) or a **customer** advises the **retailer** that they have contacted a **support agency** directly:
- (i) advise the **customer** of the option to pause further steps in respect of any unpaid **invoices** but that, if the **customer** selects this option, any pause could cause the **customer** to go into more debt with the **retailer**;
  - (ii) if the **customer** opts to pause further steps, wait at least 7 days before taking any further steps under clauses 22 or 31; and
  - (iii) if, the **retailer** is satisfied that the **customer** is making reasonable efforts to engage with the **support agency** or **agencies**, wait a further period of at least 7 days after the initial period has elapsed; and
- (i) offer to discuss, and, if the **customer** agrees, discuss with the **customer payment support plans** that appear suitable to the **customer's** circumstances, including 1 or more **payment support plans** that a reasonable **retailer** would consider:
- (i) offer the best way for the **customer** to pay off any debt owed to the **retailer** while accommodating the **customer's** expected ongoing **electricity** use;  
and
  - (ii) are most likely to help avoid the **customer** falling into debt, or further into debt, with the **retailer**.

#### **24 No unilateral change to payment support plan**

A **retailer** with a **customer** on a **payment support plan** must not unilaterally change the **customer's payment support plan**, other than in accordance with the **retailer's** terms and conditions.

#### **25 Retailer's obligations in respect of customers on payment support plans**

- (1) If a **retailer** identifies a significant and sudden increase in consumption by a **customer** on a **payment support plan** that is not explained by circumstances of which the **retailer** is aware (including seasonal factors), the **retailer** must:
- (a) notify the **customer** of the change in consumption in order to avoid bill shock;  
and
  - (b) if appropriate, advise the **customer** of any **pricing plans** that the **retailer** reasonably expects would reduce the amount of the **customer's invoices** taking into account the increased consumption and any change in circumstances.

- 
- (2) A **retailer** must, for a **customer** on a **payment support plan**, monitor the **customer's** debt repayments at a frequency appropriate to the **payment support plan**.
  - (3) A **retailer** must contact a **customer** on a **payment support plan**:
    - (a) if a part payment has been made, to assess whether the **payment support plan** should be reviewed; and
    - (b) on a regular basis, and not less than once every 6 months, to discuss with the **customer** whether their current **payment support plan** is meeting their needs.
  - (4) If a **customer** on a **payment support plan** indicates they are experiencing payment difficulties, the **retailer** must offer to:
    - (a) discuss with the **customer** what the **customer** can afford in terms of repayments;
    - (b) based on the discussion in paragraph (a), review the **payment support plan**; and
    - (c) refer the **customer** to 1 or more **support agencies** offering financial assistance, financial mentoring services or **electricity** efficiency advice where appropriate, with the **customer's** consent.
  - (5) A **retailer** must, within 5 **business days** of a **customer** on a **payment support plan** falling behind in their repayments, contact the **customer**, and:
    - (a) inform the **customer** that they have fallen behind in their repayments;
    - (b) offer to discuss with the **customer** what the **customer** can afford and to review the **payment support plan** if the **customer's** circumstances have changed;
    - (c) offer to refer the **customer** to 1 or more **support agencies** offering financial assistance, financial mentoring services or **electricity** efficiency advice where appropriate, with the **customer's** agreement; and
    - (d) explain the next steps if repayment is not made.
  - (6) If a referral is made under subclause (4)(c) or (5)(c), or a **customer** advises the **retailer** that they have contacted a **support agency** directly, the **retailer** must:
    - (a) advise the **customer** of the option to pause further steps in respect of any **payment support plan** repayments but that, if the **customer** selects this option, any pause could cause the **customer** to go into more debt with the **retailer**;
    - (b) if the **customer** opts to pause further steps, wait 7 days before initiating the disconnection for non-payment process in clause 31; and
    - (c) if the **retailer** is satisfied that the **customer** is making reasonable efforts to engage with the **support agency** or **agencies**, wait a further period of at least 7 days after the initial period has elapsed.

## 26 Retailer obligations in respect of representatives

A **retailer** must ensure its representatives who engage with **customers** about invoicing or debt repayments:

- (a) receive appropriate training that includes:
  - (i) building rapport with **customers**; and
  - (ii) recognising signs of anticipated or actual payment difficulties when interacting with **customers**, including through review of changes in consumption as well as account history data; and
- (b) are able to provide targeted assistance to **customers** to help them avoid payment arrears or resolve payment difficulties as far as possible, including in relation to the matters specified in clause 23.

---

*Obligations in respect of prepay customers*

**27 Retailers to monitor the frequency and duration of prepay electrical disconnections**

A **retailer** must monitor the frequency and duration of **electrical disconnections** of **prepay customers'** premises.

**28 Retailers to contact prepay customers**

- (1) This clause applies if a **retailer** has a **prepay customer** and:
  - (a) the **retailer** identifies a significant and sudden increase in consumption that is not explained by circumstances of which the **retailer** is aware (including seasonal factors); or
  - (b) the **prepay customer** runs out of credit frequently (for example, on average 1 day in 7 days) or for relatively long durations (for example, for several days at a time).
- (2) Where this clause applies, a **retailer** must contact the **customer** and offer to:
  - (a) discuss options with the **customer** that may reduce or avoid instances of **electrical disconnection**; and
  - (b) refer the **customer** to 1 or more **support agencies** offering financial assistance, financial mentoring services or **electricity** efficiency advice where appropriate, with the **customer's** agreement.

**Part 7**

**Disconnection and reconnection of residential premises**

**29 Purpose of this Part**

This Part of the **Consumer Care Obligations** sets out obligations on **retailers** before, at and after **electrical disconnection of residential premises**, for the purpose of minimising harm to **residential consumers** caused by insufficient access to **electricity**.

*Disconnecting post-pay customers for non-payment of invoices*

**30 Disconnection a measure of last resort**

A **retailer** must use best endeavours to ensure that **electrical disconnection** of a **post-pay customer's** premises for non-payment of **invoices** is a measure of last resort.

**31 Conditions for disconnection for non-payment**

- (1) A **retailer** must not **electrically disconnect** a **post-pay customer's** premises for non-payment of an **invoice**, unless:
  - (a) the **retailer** has the right to **electrically disconnect** the premises under its contract with the **customer**;
  - (b) the **retailer** has complied with all relevant and applicable obligations in Part 6 of the **Consumer Care Obligations**;
  - (c) if any unpaid **invoice** uses an **estimated reading**, the conditions in clause 32 are met;

- (d) the **customer**:
    - (i) has not agreed to a **payment support plan**; or
    - (ii) is not substantially adhering to a **payment support plan**;
  - (e) the **retailer** has used its best endeavours to satisfy itself that the **customer**, and any **residential consumer** who permanently or temporarily resides at the **customer's** premises, is not a **medically dependent consumer**;
  - (f) the **retailer** has:
    - (i) made at least 5 separate attempts to contact the **customer**;
    - (ii) issued the **customer** with an initial notice of disconnection, no earlier than 28 days after the **invoice** was issued;
    - (iii) issued the **customer** with a final notice of disconnection, which must be issued:
      - (A) only after an initial disconnection notice has been issued and the **retailer** has not received payment in full, or in accordance with a **payment support plan**;
      - (B) no earlier than 44 days after the **invoice** was issued;
      - (C) no less than 24 hours or more than 10 days before **electrical disconnection**; and
    - (iv) in the case of a physical **electrical disconnection**, ensured that information on how to contact the **retailer** to **reconnect** the premises is provided to the **customer**, or left at the **customer's** premises, by the person visiting the premises to action the **electrical disconnection**; and
  - (g) following the contact attempts required by paragraph (f)(i), the **retailer** has not received payment in full for the **invoice** or **invoices**.
- (2) The contact attempts required under subclause (1)(f)(i):
- (a) may comprise up to 3 attempts made under clause 22(2)(b); and
  - (b) except for the contact attempts made under clause 22(2)(b), must:
    - (i) seek to explain the pending **electrical disconnection** of the **customer's** premises and the potential consequences of not responding to the **retailer's** contact attempts in a manner the **customer** is reasonably likely to understand, having regard to any relevant communication information recorded about the **customer** under clause 13; and
    - (ii) use communication channels that are reasonable in the circumstances and which the **retailer** reasonably considers are most likely to result in the relevant information being communicated to the **customer**, which may include phone calls, emails, posted letters or a representative of the **retailer** visiting the **customer's** premises, subject to any health and safety risks to the representative, the **customer** or any other person at the premises.

### 32 Additional conditions for invoices using estimated readings

- (1) A **retailer** must not **electrically disconnect** a **post-pay customer's** premises for non-payment of an **invoice** that uses an **estimated reading** unless the **retailer** is reasonably satisfied that:
  - (a) the **estimated** reading used in that **invoice** is a reasonable estimation of actual consumption; and

- (b) at least 1 of the following applies:
  - (i) a **meter reading** is not available due to:
    - (A) the **customer** obtaining **electricity** by or involving deception;
    - (B) vandalism; or
    - (C) an issue with the **metering installation**;
  - (ii) the **retailer** cannot obtain a **meter reading** due to its, or another person's, obligations under the Health and Safety at Work Act 2015; or
  - (iii) both of the following apply:
    - (A) the **customer** has, for at least 20 **business days**, failed to respond to or refused requests from the **retailer**, or the **retailer's** agent, for access to a **metering installation** at the **customer's** premises for the purpose of obtaining a **meter reading** or carrying out a **metering installation** repair, replacement or certification; and
    - (B) the **retailer** does not accept any meter reading provided by the **customer** because any of the circumstances in subclause (2) apply.
- (2) The circumstances referred to in subclause (1)(b)(iii)(B) are:
  - (a) the **meter reading** does not lie within an acceptable range compared with the expected pattern, previous pattern or trend of consumption;
  - (b) the **meter reading** does not relate to that **customer**;
  - (c) the **customer** does not provide sufficient information to enable the **retailer** to identify the **meter**; or
  - (d) the **customer** supplies a cumulative **meter** register reading when the **retailer** requires absolute half-hourly **meter readings** that are only available electronically.

### 33 Failure to disconnect within timeframe

If a **retailer** does not **electrically disconnect** a **customer's** premises within the timeframe set out in a final notice of disconnection, the **retailer** must:

- (a) before **electrically disconnecting** the premises, issue a further final notice of disconnection; and
- (b) issue that notice no less than 24 hours or more than 10 days before **electrical disconnection**.

### 34 Notices issued to a post-pay customer

- (1) Any notice issued to a **post-pay customer** under this Part of the **Consumer Care Obligations** must be in writing and include information about how to contact the **retailer** to discuss payment of the debt.
- (2) The following information must be included in at least 1 notice issued under this Part:
  - (a) a statement that, if the **customer** makes contact with the **retailer** before the point of **electrical disconnection**, the **retailer** will actively work with them to resolve any payment difficulties and avoid **electrical disconnection** occurring, even if the **customer** has failed to act on prior attempts by the **retailer** to engage with them;
  - (b) information regarding **payment options** available (which may include Smooth Pay or redirection of income);

- (c) information regarding the **retailer's** internal dispute resolution process and the dispute resolution scheme identified under clause 3 of Schedule 4 of the **Act**;
- (d) details of all **fees** that must be paid:
  - (i) in the event of **electrical disconnection**; and
  - (ii) if **electrical disconnection** occurs, in order for the **customer's** premises to be **reconnected**;
- (e) contact details of Work and Income; and
- (f) where to obtain information on how to apply to be recorded as a **medically dependent consumer** and a summary of what it means to be a **medically dependent consumer**.

### **35 Restriction on disconnection for non-payment by distributor**

- (1) This clause applies if a **distributor** directly invoices **residential consumers** for **distribution** services.
- (2) A **distributor** must not **electrically disconnect** a **residential consumer's** premises for non-payment in respect of **distribution** services if that **distributor** has been notified of an application or a decision to record a person as a **medically dependent consumer** in relation to those premises under clause 51.
- (3) A **distributor** must not otherwise **electrically disconnect** a **residential consumer's** premises for non-payment in respect of **distribution** services unless the **distributor** has provided at least 5 **business days'** notice to the **retailer** who is the **trader** recorded in the **registry** as being responsible for the relevant **ICP**.

#### *Disconnecting uncontracted premises*

### **36 Disconnection of uncontracted premises**

- (1) A **retailer** must not **electrically disconnect uncontracted premises**, unless:
  - (a) the **retailer** has confirmed that the premises are not being switched to another **retailer**;
  - (b) the **retailer** has issued a notice to any **residential consumers** at the premises encouraging them to contact a **retailer** to sign up as a new **customer**;
  - (c) the **retailer** has given any **residential consumers** at the premises no less than 7 days' notice of **electrical disconnection**;
  - (d) the **electrical disconnection** is to be carried out at a time that would not endanger the wellbeing of any **residential consumer** at the premises (which may require **electrical disconnection** to occur at times other than just before nightfall or during a severe weather event) or at a time at which it would be unreasonably difficult for any **residential consumer** to seek rapid **reconnection** (which may require **electrical disconnection** to occur at times other than after midday on the day before a non-**business day**, on a non-**business day**, at night, during a severe weather event or during a civil emergency); and
  - (e) in the case of remote **electrical disconnection** of the premises, the **electricity meter** or disconnection device to be used can safely **electrically disconnect** the premises.
- (2) A **retailer** need not comply with subclause (1)(b) or (1)(c) if:

- (a) the **retailer electrically disconnects** the **uncontracted premises** within 48 hours of a **customer** vacating the property; or
  - (b) half-hour metered **electricity** consumption data is available for the premises and analysis of that data does not indicate a **residential consumer** resides at the premises.
- (3) The notices required under subclauses (1)(b) and (1)(c):
- (a) may be provided in the same notice or in separate notices at different times;
  - (b) must be in writing and delivered to the **uncontracted premises**; and
  - (c) must include information about how to contact the **retailer** to discuss signing up as a new **customer**.
- (4) If a **retailer** is notified that a **medically dependent consumer** may be permanently or temporarily residing at an **uncontracted premises**, the **retailer** must use its best endeavours to:
- (a) encourage **residential consumers** residing at that premises to sign up with a **retailer** and avoid **electrical disconnection**; and
  - (b) if the **retailer** has been unsuccessful in encouraging a **residential consumer** to sign up as a **customer**, ensure that **electrical disconnection** occurs in a way that does not endanger the wellbeing of any **medically dependent consumer** residing at that premises.

*Restrictions on disconnecting post-pay customers*

**37 Restrictions on disconnecting medically dependent consumers**

- (1) Notwithstanding anything else in these **Consumer Care Obligations**, a **retailer** must not **electrically disconnect** a **post-pay customer's** premises at which the **retailer** knows a **medically dependent consumer** may be permanently or temporarily residing.
- (2) Subclause (1) does not apply to emergency **electrical disconnections**.
- (3) A **retailer** must notify the **Authority** in the **prescribed form** as soon as it becomes aware of an **electrical disconnection** resulting in a person being without **electricity** in the circumstances described in subclause (1).

**38 Restrictions on disconnecting premises**

- (1) Notwithstanding anything else in these **Consumer Care Obligations**, a **retailer** must not **electrically disconnect** a **post-pay customer's** premises in any of the following circumstances:
  - (a) the **retailer** has failed to comply with any relevant obligations in this Part of the **Consumer Care Obligations** in relation to that **customer**;
  - (b) the **electrical disconnection** is to be carried out at a time that would endanger the wellbeing of the **customer** or any **residential consumer** at the premises (which may include just before nightfall or during a severe weather event) or at a time at which it would be unreasonably difficult for the **customer** or **residential consumer** to seek rapid **reconnection** (which may include after midday on the day before a non-**business day**, on a non-**business day**, at night, during a severe weather event or during a civil emergency);

- (c) in the case of remote **electrical disconnection** of the premises, the **electricity meter** or disconnection device to be used cannot safely **electrically disconnect** and/or **reconnect** the premises;
  - (d) in the case of **electrical disconnection** for non-payment of an **invoice**, the debt does not relate to **electricity** supply (which may include because it relates to telephone or broadband services); and
  - (e) in the case of **electrical disconnection** for non-payment of an **invoice**, the **customer** disputes the charges relating to the **electricity** supply and:
    - (i) the **customer** is engaging with the **retailer's** internal dispute resolution process and/or the dispute resolution scheme identified under clause 3 of Schedule 4 of the **Act** in good faith;
    - (ii) the dispute is unresolved; and
    - (iii) the **customer** has paid all other charges and parts of any charges relating to **electricity** supply that are not disputed (the **retailer** having credited, with the **customer's** agreement, any part-payment to the **electricity** supply portion of its **invoice** to a **customer's** non-disputed debt first).
- (2) Subclause (1) does not apply to emergency **electrical disconnections**.

*General requirements for reconnection of post-pay customers*

**39 Reconnection required**

A **retailer** that **electrically disconnects** a **post-pay customer's** premises must **reconnect** those premises as soon as possible and at no cost if:

- (a) the **electrical disconnection** was inadvertent; or
- (b) the **electrical disconnection** of the premises (whether intentional or not) has resulted in a person being without **electricity** who:
  - (i) is recorded by that **retailer** as having **medically dependent consumer** status under clause 49; or
  - (ii) has made an application (in any form) for **medically dependent consumer** status, and the **retailer** has not yet decided the application.

**40 Remote reconnection**

A **retailer** should not authorise or carry out remote **reconnection** of a **post-pay customer's** premises unless the **retailer** is reasonably satisfied that the premises can be safely **reconnected** remotely (which may include ensuring that the **retailer** is satisfied that ovens and heaters are turned off).

*Process for reconnection of post-pay customers*

**41 Reconnection for payment**

A **retailer** must **reconnect** a **post-pay customer** whose premises were **electrically disconnected** under this Part of the **Consumer Care Obligations** as soon as reasonably practicable after:

- (a) the **customer** has paid the debt in full; or
- (b) the **customer** has otherwise satisfied the **retailer's** reasonable requirements for **reconnection**.

#### 42 **Customer care following disconnection**

If a **retailer electrically disconnects** a **post-pay customer** for non-payment of **invoices**, the **retailer** must:

- (a) continue to be responsive if the **customer** contacts the **retailer** seeking further assistance and information on **reconnection**; and
- (b) if the **customer** is still contracted to the **retailer** and has not **reconnected** **5 business days** after **electrical disconnection**, contact the **customer** for the purpose of offering assistance and information on **reconnection**, including:
  - (i) reminding the **customer** of the financial mentoring services and **electricity** efficiency advice available from 1 or more **support agencies**; and
  - (ii) where appropriate, offering to refer the **customer**, with the **customer's** agreement, to a **support agency** from which the **customer** could seek assistance with arranging payment of the debt.

#### 43 **Steps following reconnection**

Following the **reconnection** of a **post-pay customer** who is **electrically disconnected** for non-payment of **invoices**, the **retailer** must undertake the steps in clause 23 with appropriate modifications.

#### *Disconnecting prepay customers*

#### 44 **Restrictions on disconnecting a prepay customer's premises**

A **retailer** must ensure a **prepay customer** is not **electrically disconnected** for running out of credit, unless:

- (a) the **electrical disconnection** occurs at a time:
  - (i) that does not endanger the wellbeing of the **customer** or any **residential consumer** at the premises (which may require **electrical disconnection** to occur at times other than just before nightfall or during a severe weather event); and
  - (ii) at which it would be reasonably easy for the **customer** to seek rapid **reconnection** (which may require **electrical disconnection** to occur at times other than after midday on the day before a non-**business day**, on a non-**business day**, at night, during a severe weather event or during a civil emergency);
- (b) the **prepay** service can safely **electrically disconnect** and **reconnect** the premises;
- (c) the expiry of the pre-paid credit relates to the supply of **electricity** (and does not relate to other matters such as telephone or broadband); and
- (d) either of the following apply:
  - (i) the **customer** has not disputed the charges through the **retailer's** internal dispute resolution process or the dispute resolution scheme identified under clause 3 of Schedule 4 of the **Act**; or
  - (ii) if the **customer** has disputed the charges, the **customer** has not paid all other charges and parts of any charges relating to **electricity** supply that are not disputed, the **retailer** having credited, with the **customer's** agreement,

any part-payment to the **electricity** supply portion of the **invoice** to the non-disputed charges first.

*Reconnecting prepay customers*

**45 Reconnecting a prepay customer's premises**

- (1) A **retailer** must ensure that **reconnection** of a **prepay customer** occurs as soon as reasonably practicable after the **customer** has completed their purchase transaction for new credit.
- (2) Subclause (1) requires that **reconnection** take place within 30 minutes of the **customer** completing their purchase transaction for new credit, unless:
  - (a) remote **reconnection** fails due to connectivity issues which would require sending a technician to the premises; or
  - (b) the **meter** owner has system issues; or
  - (c) the **retailer** is waiting on confirmation from the **customer** that the premises can be safely **reconnected**.

**Part 8**

Obligations in relation to medically dependent consumers

**46 Purpose of this Part and knowledge of medically dependent consumers residing at customers' premises**

- (1) This Part of the **Consumer Care Obligations** requires **retailers** and **distributors** to take specific actions in relation to **customers** and any other **residential consumers** permanently or temporarily residing at a **customer's** premises who are, or may be, **medically dependent consumers**, for the purpose of ensuring that:
  - (a) any **customer** premises at which **medically dependent consumers** reside are not **electrically disconnected** by their **retailer**; and
  - (b) **medically dependent consumers** receive appropriate care and consideration in relation to planned and unplanned outages.
- (2) For the purpose of these **Consumer Care Obligations**, a **retailer** is deemed to know that a **medically dependent consumer** may be permanently or temporarily residing at a **customer's** premises if:
  - (a) the **retailer** has recorded that the **customer**, or any other **residential consumer** who permanently or temporarily resides at the premises, has medically dependent consumer status under clause 49 of these **Consumer Care Obligations**;
  - (b) the **retailer** has received an application (in any form) from the **customer** or any other **residential consumer** who permanently or temporarily resides at the premises for **medically dependent consumer** status, and the **retailer** has not yet decided the application; or
  - (c) the **retailer** becomes aware of information that a reasonable **retailer** would consider indicates that a **medically dependent consumer** may be residing at those premises.

*Information about medically dependent consumers*

**47 Retailers to request and record information about medically dependent consumers**

- (1) A **retailer** must request information which the **retailer** reasonably requires to identify whether a **customer** or any other **residential consumer** who permanently or temporarily resides at the **customer's** premises may be a **medically dependent consumer** when:
  - (a) first signing up a **customer**;
  - (b) contacting a **customer** under clause 16; and
  - (c) communicating with a **customer** who may be experiencing payment difficulties under clause 23.
- (2) A **retailer** may request information under subclause (1) at any other time the **retailer** reasonably considers it appropriate.
- (3) If a **retailer** knows that a **customer** or any other **residential consumer** who permanently or temporarily resides at the **customer's** premises may be a **medically dependent consumer**, the **retailer** must request the following information:
  - (a) the name of that **customer** or **residential consumer**; and
  - (b) for **residential consumers**, their communication information as listed under clause 13.
- (4) Whenever a **retailer** receives the information under this clause, the **retailer** must:
  - (a) record such information as is necessary for the **retailer** to perform its obligations under this Part; and
  - (b) only use the information to inform the **retailer's** performance of its obligations under this Part.

*Recording and verifying medically dependent consumer status*

**48 Retailer must request application for medically dependent consumer status**

- (1) A **retailer** must, as soon as practicable after it becomes aware of information that a reasonable **retailer** would consider indicates that a **customer** or **residential consumer** who permanently or temporarily resides at a **customer's** premises may be a **medically dependent consumer**, use best endeavours to request that they make an application (in any form) for **medically dependent consumer** status with the **retailer**.
- (2) The **retailer** must advise the **customer** or **residential consumer** under subclause (1) that if the **retailer** does not receive an application (in any form) within a period specified by the **retailer**, which must be least 21 **business days**, the **retailer** may decide to no longer regard that **customer** or **residential consumer** as someone who may be a **medically dependent consumer**.
- (3) Subclause (2) does not apply if the **retailer** records the **customer** or **residential consumer** as a **medically dependent consumer** under clause 49.

**49 Recording medically dependent consumer status**

- (1) Subject to subclause (2), a **retailer** may, at its discretion, record that a **customer**, or **residential consumer** who permanently or temporarily resides at a **customer's** premises, has **medically dependent consumer** status, having regard to the information

gathered by the **retailer** in accordance with these **Consumer Care Obligations** or otherwise provided by a **customer**, **residential consumer**, or any third party.

- (2) A **retailer** must record that a **customer**, or **residential consumer** who permanently or temporarily resides at a **customer's** premises, has **medically dependent consumer** status if the **retailer** receives a valid **confirmation of status form** or **reconfirmation form** in relation to that person.

#### **50 Retailer's obligations after receiving application for medically dependent consumer status**

- (1) Upon receipt of an application (in any form) for **medically dependent consumer** status in relation to a **customer** or **residential consumer** residing at a **customer's** premises, the **retailer**:
- (a) must record that the application has been received;
  - (b) must advise the applicant that the **retailer** will:
    - (i) record and hold relevant information relating to the application for the purposes described in clauses 46(1)(a) and (b); and
    - (ii) share where necessary information with the relevant **distributor**, **metering equipment provider** and **trader** recorded in the **registry** as being responsible for a relevant **ICP** (unless the **retailer** is itself the relevant **trader**);
  - (c) may, if appropriate to do so, take reasonable steps to confirm that the applicant is permanently or temporarily resident at the premises;
  - (d) may ask the applicant for a **confirmation of status form** if one has not been provided with the application, provided that, if the **retailer** requests a **confirmation of status form**, it must provide the applicant with the **confirmation of status form** prescribed by the **Authority** and advise the applicant that it may decline the application if the applicant fails to provide a valid form; and
  - (e) may, where applicable and if appropriate to do so, take reasonable steps to confirm the validity of the **confirmation of status form**.
- (2) If a **retailer** receives an application for **medically dependent consumer** status but the application does not relate to a **customer's** premises, the **retailer** must, as soon as reasonably practicable:
- (a) use reasonable endeavours to determine who the current **retailer** is for the premises;
  - (b) inform the applicant, or the **health practitioner** who completed the **confirmation of status form** (if a form has been received by the **retailer**), that:
    - (i) the **retailer** is not responsible for the supply of **electricity** to the premises; and
    - (ii) if the **retailer** has determined who the responsible **retailer** is under paragraph (a), that **retailer's** name and contact details; and
  - (c) encourage the applicant to contact the responsible **retailer** as soon as practicable.

## **51 Retailer's obligations to share information about medically dependent consumers**

- (1) If a **retailer** receives an application under clause 50, or otherwise decides to record a **customer** or **residential consumer** as a **medically dependent consumer**, the **retailer** must:
  - (a) if the **retailer** is the **trader** recorded in the **registry** as being responsible for the relevant **ICP**, advise the relevant **distributor**, using the relevant **EIEP** published by the **Authority** under clause 52, of:
    - (i) as applicable, the application, at the time the **retailer** receives the application;
    - (ii) the **retailer's** decision regarding whether to record the applicant as a **medically dependent consumer**, as soon as practicable once the **retailer** has made that decision; and
    - (iii) any subsequent change in **medically dependent consumer** status; and
  - (b) if the **retailer** is not the **trader** recorded in the **registry** as being responsible for the relevant **ICP**, advise that **trader**, using the relevant **EIEP** published by the **Authority** under clause 52, of the matters in subparagraph (a)(i) to (iii).
- (2) If a **trader** receives advice under subclause (1)(b), the **trader** must record that information and advise the relevant **distributor** as soon as practicable, using the relevant **EIEP** published by the **Authority** under clause 52, of the matters in subclause (1)(a)(i) to (iii).
- (3) If a **trader** authorises a **metering equipment provider** to undertake any work at a **customer's** premises, it must notify the **metering equipment provider** if the **trader** knows a **medically dependent consumer** may reside at the premises.
- (4) A **retailer** must, if it has not already done so, comply with subclause (1) (with all necessary modifications) in respect of any **medically dependent consumers** as recorded by that **retailer** at the time this clause comes into effect.

## **52 Authority to publish procedures for sharing information about medically dependent consumers**

- (1) The **Authority** must prescribe and **publish** 1 or more **EIEPs** with which a **retailer** must comply when providing information to a **distributor** under clause 51(1)(a) or a **trader** under clause 51(1)(b).
- (2) Before the **Authority** prescribes an **EIEP** under subclause (1), or amends an **EIEP** that it has prescribed under subclause (1), it must consult with the participants that the **Authority** considers are likely to be affected by the **EIEP**.
- (3) The **Authority** need not comply with subclause (2) if it proposes to amend an **EIEP** prescribed under subclause (1) if the **Authority** is satisfied that—
  - (a) the nature of the amendment is technical and non-controversial; or
  - (b) there has been adequate prior consultation so that the **Authority** has considered all relevant views.

## **53 Retailer's obligations in respect of confirmation of status forms**

- (1) Where the **retailer** has received a **confirmation of status form**, the **retailer** must record the following information in respect of that **confirmation of status form** and any subsequent **reconfirmation form** received:

- (a) when the form was received;
  - (b) the name of the **health practitioner** who completed the form;
  - (c) the date on which the form was completed by the **health practitioner**; and
  - (d) the time period to which the **health practitioner's** confirmation given in the form applies, if any period is specified.
- (2) If a **retailer** does not receive a valid **confirmation of status form** after a period of at least 21 **business days** after making a request under clause 50(1)(d), and is considering declining the application under subclause (4), the **retailer** must advise the applicant that:
- (a) the applicant must provide a valid **confirmation of status form** as soon as practicable;
  - (b) if the **retailer** does not receive a **confirmation of status form** within a period specified by the **retailer**, which must be at least 10 **business days**, the **retailer** may decide to decline the application; and
  - (c) the applicant should, as soon as practicable, contact the **retailer** if they are unable to provide a **confirmation of status form** within the period specified in paragraph (b).
- (3) A **retailer** may request the **confirmation of status form** directly from the **health practitioner** who completed the form, if authorised to do so by the applicant.
- (4) If a **retailer** has advised the applicant of the information specified in subclause (2), and has still not received a valid **confirmation of status form** within the period specified in subclause (2)(b), the **retailer** may, after considering any information provided under subclause (2)(c), decline the application to record the applicant has **medically dependent consumer** status.

#### **54 Further obligations before declining an application**

- (1) Before declining an application for **medically dependent consumer** status, other than on grounds that the applicant does not permanently or temporarily reside at a **customer's** premises, a **retailer** must request from the applicant a **confirmation of status form** under clause 50(1)(d).
- (2) Before declining an application for **medically dependent consumer** status on grounds that the **confirmation of status form** is not valid, the **retailer** must take reasonable steps to confirm the validity of the form under clause 50(1)(e).

#### **55 No response to questions**

If a **retailer** receives an application for **medically dependent consumer** status but the applicant does not respond to any questions from the **retailer** communicated to the applicant using the applicant's communication information recorded under clause 13 or 47, and does not otherwise communicate with the **retailer** within a period of at least 21 **business days**, the **retailer** may decline the application to record the applicant has **medically dependent consumer** status.

## 56 Obligations if retailer declines application for medically dependent consumer status

If a **retailer** declines an application for **medically dependent consumer** status, the **retailer** must:

- (a) notify the applicant as soon as practicable of the **retailer's** decision;
- (b) inform the applicant of how to reapply to be recorded as a **medically dependent consumer**;
- (c) inform the applicant of the dispute resolution process they may follow, including:
  - (i) making a complaint to the **retailer** through the **retailer's** internal dispute resolution process; or
  - (ii) making a complaint to the dispute resolution scheme identified under clause 3 of Schedule 4 of the **Act**; and
- (d) if a complaint is made under paragraph (c), and the **customer** or **residential consumer** is engaging with the **retailer's** internal dispute resolution process and/or the dispute resolution scheme identified under clause 3 of Schedule 4 of the **Act** in good faith, treat the **customer** or **residential consumer** as if they are a **medically dependent consumer** while the dispute is unresolved.

### *Reviewing medically dependent consumer status*

## 57 Review of medically dependent consumer status

- (1) A **retailer** may review whether a **customer** or **residential consumer** should continue to be recorded as having **medically dependent consumer** status no more than once in any 12-month period.
- (2) If a **retailer** decides to undertake a review under subclause (1), the **retailer** must contact the **customer** or **residential consumer** to:
  - (a) ask them to advise the **retailer** if:
    - (i) they continue to reside at the premises; and
    - (ii) they still consider themselves a **medically dependent consumer**; and
  - (b) give them an opportunity to provide any further information that they wish to provide regarding whether or not they should continue to be recorded as having **medically dependent consumer** status.
- (3) A **retailer** is not required to comply with subclause (2)(a)(ii) if the **retailer** is satisfied that the **customer** or **residential consumer's** medical dependency on mains **electricity** is permanent.
- (4) If having made contact under subclause (2), the **retailer** is informed that the **customer** or **residential consumer** continues to reside at the premises and, if applicable, still considers themselves a **medically dependent consumer**, clauses 50 to 55 apply with all necessary modifications.
- (5) If a **retailer** has previously been provided with a **confirmation of status form** or **reconfirmation form** for that **medically dependent consumer**, the **retailer** may, as part of a review under subclause (1) and if it reasonably considers it appropriate in the circumstances, request that a **medically dependent consumer** provide the **retailer** with a **reconfirmation form** and provide the applicant with the **reconfirmation form** prescribed by the **Authority**.

- 
- (6) If a **retailer** requests a **reconfirmation form** under subclause (5), and a valid **reconfirmation form** is provided, the **retailer** must meet the **customer's** or **residential consumer's** reasonable costs of obtaining that **reconfirmation form**, unless the earlier **confirmation of status form** or **reconfirmation form** had specified a time period to which the **health practitioner's** confirmation given in the form applied, and that period has ended.
- (7) Upon completion of any review under subclause (1), the **retailer** must:
- (a) notify the **customer** or **residential consumer** of the outcome of that review; and
  - (b) if the **retailer** decides that the **customer** or **residential consumer** should no longer be recorded as having **medically dependent consumer** status:
    - (i) inform them of the matters in clauses 56(b) and (c);
    - (ii) provide them with 2 weeks' notice before removing their **medically dependent consumer** status; and
    - (iii) if a complaint is made through the **retailer's** internal dispute resolution process or to the dispute resolution scheme identified under clause 3 of Schedule 4 of the **Act** and the **customer** or **residential consumer** is engaging with that process in good faith, treat them as if they are a **medically dependent consumer** while the dispute is unresolved.

*Providing advice in relation to medically dependent consumers*

**58 Advice regarding individual emergency response plans**

As soon as a **retailer** knows that a **customer**, **residential consumer** considering entering into a contract with the **retailer**, or any other **residential consumer** who permanently or temporarily resides at the premises of such persons may be a **medically dependent consumer**, the **retailer** must:

- (a) advise the **customer** or **residential consumer**:
  - (i) that the supply of **electricity** cannot be guaranteed; and
  - (ii) of the importance of the **customer** or **residential consumer** arranging for the development of an individual emergency response plan; and
- (b) direct the **customer** or **residential consumer** to the **Authority's** website for resources to support the development of an individual emergency response plan.

*Medically dependent consumers and prepayment services*

**59 Prepay product offerings for medically dependent consumer**

- (1) A **retailer** must not recommend a **prepay product offering** in relation to any **residential premises** if the **retailer** knows that a **medically dependent consumer** may permanently or temporarily reside at the premises.
- (2) If a **customer**, or a **residential consumer** considering becoming a **customer**, requests a **prepay product offering** for premises at which the **retailer** knows that a **medically dependent consumer** may permanently or temporarily reside, the **retailer** must, before agreeing to provide that service:
  - (a) use its best endeavours to encourage the **customer** or **residential consumer** to choose a **post-pay product offering**, including encouraging them to engage with

- 1 or more **support agencies** who may assist them in meeting any requirements of a **post-pay** contract;
- (b) advise the **customer** or **residential consumer** that any **medically dependent consumers** residing at the premises should first discuss the **prepay product offering** with a **health practitioner** with an appropriate scope of practice; and
  - (c) inform the **customer** or **residential consumer** and, if the **retailer** has contact details for any **medically dependent consumers** residing at that premises, those **medically dependent consumers**, of the risk of there being no **electricity** supply if the **prepay** service runs out of credit.

*Retailers' arrangements with distributors and metering equipment providers*

**60 Coordinating planned service interruption or electrical disconnection**

- (1) Where a **retailer** has advised a **distributor** of an application or a decision to record a person as a **medically dependent** consumer under clause 51, the **retailer** and the **distributor** must use reasonable endeavours to agree processes to coordinate with each other on planned service interruptions and **electrical disconnections** that will affect those **medically dependent consumers**.
- (2) Each **retailer** that has an arrangement with a **metering equipment provider** under Part 10 of this Code must use reasonable endeavours to ensure their service level agreements with **metering equipment providers** prevent the **metering equipment provider**, having regard to any applicable health and safety requirements, from:
  - (a) **electrically disconnecting** the **retailer's customer** without explicit instruction or agreement from the **retailer**; or
  - (b) as far as reasonably practicable, varying the date or materially varying the time of an agreed **electrical disconnection** or **reconnection**.

**61 Coordinating planned service interruption or electrical disconnection with other retailers**

Where a **retailer** has **customers** at an **ICP** for which it is not the responsible **trader** as recorded in the **registry**, the **retailer** and the **trader** for that **ICP** must use reasonable endeavours to agree processes to coordinate with each other on planned service interruptions and **electrical disconnections** that will affect any person who is the subject of a notification under clause 51.

*When a residential consumer nominates an alternate contact person*

**62 Retailers to contact alternate contact person**

If a **residential consumer** nominates an **alternate contact person** under clause 47(3)(b), the **retailer** may contact that **alternate contact person** if the **retailer** is unable to contact the **residential consumer**.

---

*When a person may no longer be considered a medically dependent consumer*

**63 Circumstances where customer or residential consumer may no longer be considered a medically dependent consumer**

- (1) A **retailer** may no longer regard a **customer** or **residential consumer** as someone who may be a **medically dependent consumer** in any of the following circumstances:
- (a) where the **customer** or **residential consumer** requests that they no longer be regarded as a **medically dependent consumer**;
  - (b) where the **customer** or **residential consumer** no longer receives **electricity** from the **retailer**;
  - (c) where a **retailer** has complied with clause 48, and has not received an application (in any form) for **medically dependent consumer** status within at least 21 **business days** of attempts to contact that **customer** or **residential consumer**; and
  - (d) where the **retailer** has validly declined an application for **medically dependent consumer** status under this Part of the **Consumer Care Obligations**.
- (2) If a **retailer** no longer regards a **customer** or **residential consumer** as someone who may be **medically dependent consumer** in the circumstances listed in subclause (1)(a), (b) or (c), the **retailer** must:
- (a) notify the **customer** and/or **residential consumer** as soon as practicable of the **retailer**'s decision; and
  - (b) inform them of the matters in clauses 56(b) and (c).

Part 9  
Fees and bonds

**64 Purpose of this Part**

This Part of the **Consumer Care Obligations** imposes obligations on **retailers** concerning **fees**, **bonds** and **conditional discounts** to ensure they are reasonable.

**65 Requirement to disclose information on fees, conditional discounts and bonds**

Each **retailer** must clearly disclose:

- (a) information on all **fees**, **conditional discounts** and **bonds** that may be available to or payable by **customers**; and
- (b) if applicable, the method or calculation and the maximum limit of that **fee** under clause 67.

*Fees*

**66 Retailers to make customers aware of fee amounts**

A **retailer** must only charge a **customer** a **fee** where the **retailer** is reasonably satisfied, before charging that **fee**, that the **customer** is aware of the amount of the **fee**.

**67 Fees to have maximum limit**

Any **fee** which a **retailer** determines via a method or calculation must where practicable include a stated maximum limit.

**68 Fees must be reasonable**

- (1) Any **fee** charged by a **retailer** to a **customer** must:
  - (a) not exceed reasonable estimates of the costs the **fee** is identified as contributing to; and
  - (b) otherwise be reasonable, taking into account the need to strike an appropriate balance between precision, and administrative and practical efficiency.
- (2) A **fee** must not:
  - (a) be used to offset future costs; or
  - (b) attempt to recover any deficit that may have arisen because of previous under recovery.

*Conditional Discounts*

**69 Retailers to make customers aware of conditional discounts**

A **retailer** must use reasonable endeavours to ensure that **customers** are aware of the amount of any **conditional discount** available and how a **customer** can receive that **conditional discount**.

**70 Conditional discounts must be reasonable**

Any **conditional discount** offered by a **retailer** to a **customer** must reflect a reasonable estimate of the costs incurred, or likely to be incurred, by the **retailer** as a result of a **customer** not meeting the **payment conditions**.

*Bonds*

**71 Retailer's obligations regarding bonds**

- (1) Any **bond** required by a **retailer** must be reasonable, taking into account a reasonable estimate of the **customer's** expected invoice amount for a billing cycle.
- (2) A **retailer** must refund any **bond** no later than after the expiry of a 12-month period of the **customer** paying all **invoices** on time.

# Electricity Industry Participation Code 2010

## Part 12 Transport

### Contents

#### Subpart 1—General

- 12.1 Contents of this Part
- Discretion to waive Code requirements
- 12.2 Interaction between Parts 7 and 8 and this Part
- 12.3

#### Subpart 2—Transmission agreements

- 12.4 Contents of this subpart
- 12.5 Structure for transmission agreements *[Revoked]*
- 12.6 Review of structure for transmission agreements *[Revoked]*
- 12.7 Categories of participants required to enter into transmission agreements
- Transpower and designated transmission customers must enter transmission agreements*
- 12.8 Obligation to enter transmission agreements
- 12.9 When designated transmission customer must enter into transmission agreement
- 12.10 Default transmission agreements
- 12.11 Subsequent transmission agreements
- 12.12 Changes to connection assets under default transmission agreements
- 12.13 Expiry or termination of transmission agreements

#### *Content of transmission agreements*

- 12.14 Transmission agreements to be consistent with default transmission agreement template and grid reliability standards
- 12.15 Transpower to publish information about transmission agreements and provide them on request

#### *Connection Code*

- 12.16 Connection Code *[Revoked]*
- 12.17 Purpose of Connection Code
- 12.18 Review of Connection Code
- 12.19 Transpower to submit Connection Code
- 12.20 Required content of Connection Code
- 12.21 Principles for developing Connection Code
- 12.22 Authority may initially approve proposed Connection Code or refer back to Transpower
- 12.23 Amendment of proposed Connection Code by Authority
- 12.24 Authority must consult on proposed Connection Code
- 12.25 Decision on Connection Code
- 12.26 Incorporation of Connection Code by reference *[Revoked]*

#### *Default transmission agreement template*

- 12.27 Benchmark agreement *[Revoked]*
- 12.28 Authority may initiate review *[Revoked]*
- 12.29 Purpose of default transmission agreement template
- 12.30 Principles for default transmission agreement template
- 12.31 Contents of default transmission agreement template
- 12.32 Authority must consult on draft benchmark agreement *[Revoked]*
- 12.33 Decision on benchmark agreement *[Revoked]*
- 12.34 Incorporation of benchmark agreement by reference *[Revoked]*

*Variations from default transmission agreement template and grid reliability standards and enhancement and removal of connection assets*

- 12.35 Increased service levels and reliability
- 12.36 Decreased service levels and reliability
- 12.37 Variations that may increase or decrease reliability
- 12.38 Other variations from terms of default transmission agreement template
- 12.39 Customer specific value of expected unserved energy
- 12.40 Replacement and enhancement of shared connection assets
- 12.41 Removal of shared connection assets from service
- 12.42 Reconfiguration of shared connection assets
- 12.43 Net benefits test
- 12.44 Request to the Commerce Commission to request an investment proposal be submitted

*Resolutions of disputes*

- 12.45 Certain disputes relating to transition agreements may be referred to Rulings Panel
- 12.46 Rulings Panel has discretion to determine dispute
- 12.47 Determinations by Rulings Panel
- 12.48 Status of default transmission agreement while Rulings Panel determining dispute

*Existing agreements not affected*

- 12.49 Existing agreements
- 12.50 Copies of other agreements to be provided to the Authority
- 12.51 Application to Rio Tinto agreements *[Revoked]*

Subpart 3—Grid reliability and industry information

- 12.52 Contents of this subpart
- 12.53 Purpose of the reliability and industry information clauses
- 12.54 Obligations to provide information

*Grid reliability standards*

- 12.55 Authority determines grid reliability standards
- 12.56 Purpose of grid reliability standards
- 12.57 Principles of grid reliability standards
- 12.58 Content of grid reliability standards

*Review of grid reliability standards*

- 12.59 Interested parties may request review of grid reliability standards
- 12.60 Authority review of grid reliability standards
- 12.61 Authority must publish draft grid reliability standards
- 12.62 Decision on grid reliability standards

*Core grid determination*

- 12.63 Authority determines core grid determination
- 12.64 Purpose of core grid determination
- 12.65 Objectives of core grid determination

*Review of core grid determination*

- 12.66 Interested parties may request review of core grid determination
- 12.67 Authority review of grid determination
- 12.68 Authority must publish draft core grid determination
- 12.69 Decision on core grid determination

*Investment contracts*

- 12.70 Purpose
- 12.71 Investment contracts

*Centralised data set [Revoked]*

- 12.72 Authority to establish and maintain centralised data set *[Revoked]*
- 12.73 Purpose of centralised data set *[Revoked]*
- 12.74 Contents of centralised data set *[Revoked]*
- 12.75 Public access to centralised data set *[Revoked]*

*Grid reliability reporting*

- 12.76 Transpower to publish grid reliability report

*Subpart 4—Transmission pricing methodology*

- 12.77 Recovery of investment costs by Transpower
- 12.78 Purpose for establishing transmission pricing methodology
- 12.79 Main statutory objective
- 12.80 Application and interpretation of pricing principles *[Revoked]*
- 12.81 Authority must prepare an issues paper
- 12.82 Authority must consult on issues paper
- 12.83 Authority must publish process and guidelines for development of transmission pricing methodology

*Development of transmission pricing methodology by Transpower*

- 12.84 Transmission pricing methodology

*Review of an approved transmission pricing methodology*

- 12.85 Review by Transpower
- 12.86 Review by Authority
- 12.87 Process for review
- 12.88 Transpower to submit methodology
- 12.89 Form of proposed transmission pricing methodology
- 12.90 Authority may decline to consider proposed transmission pricing methodology

*Process for Authority determination of transmission pricing methodology*

- 12.91 Authority may approve proposed transmission pricing methodology or refer back to Transpower
- 12.92 Authority must publish proposed transmission pricing methodology
- 12.93 Decision on transitional pricing methodology
- 12.94 Authority to determine commencement date

- 12.94A            *Amending the transmission pricing methodology*  
Amending the transmission pricing methodology  
                  *Application of approved transmission pricing methodology*
- 12.95            Charges to comply with transmission pricing methodology
- 12.96            Development of transmission prices  
                  *Audit of transmission prices*
- 12.97            Audit of transmission prices
- 12.98            Transpower may respond to auditor's report
- 12.99            Final auditor report to the Authority
- 12.100           Transpower to redetermine transmission prices
- 12.101           Auditor's costs
- 12.102           Enforcement of transmission charges  
                  *Information for calculating transmission charges*
- 12.102A          Information held by system operator may be used to calculate charges
- 12.102B          Information about embedded electricity
- 12.102C          Authority may provide information  
                  Subpart 5—Financial transmission rights [*Revoked*]
- 12.103           Contents of this subpart [*Revoked*]
- 12.104           Design [*Revoked*]  
                  Subpart 6—Interconnection asset services
- 12.105           Purpose of this subpart
- 12.106           Interconnection asset capacity and grid configuration
- 12.107           Transpower to identify interconnection branches, and propose service measures  
and levels
- 12.108           Consultation on proposed interconnection asset capacity and grid configuration
- 12.109           Decision on interconnection asset capacity and grid configuration
- 12.110           Incorporation of interconnection asset capacity and grid configuration by  
reference
- 12.111           Transpower to make interconnection branches and other assets available and keep  
grid configuration
- 12.112           Exceptions to clause 12.111
- 12.113           Transpower to maintain interconnection assets  
                  *Transpower to propose investments*
- 12.114           Investments to meet the grid reliability standards
- 12.115           Other investments
- 12.116           Information on capacities of individual interconnection assets
- 12.116AA          Temporary removal of interconnection assets from service or temporary grid  
reconfiguration
- 12.116AB          [*Expired*]
- 12.116AC          Information to be published
- 12.116A          [*Expired*]
- 12.116B          [*Expired*]
- 12.116C          [*Expired*]
- 12.117           Permanent removal of interconnection assets from service or permanent grid  
reconfiguration
- 12.118           Transpower to provide and publish annual report on interconnection asset

capacity and grid configuration

*Reporting on availability and reliability*

- 12.119 Index measures for availability and reliability
- 12.120 Updating of availability and reliability index measures
- 12.121 Transpower to submit draft index measures for availability and reliability
- 12.122 Requirements for index measures
- 12.123 Authority may initially approve proposed index measures or refer back to Transpower
- 12.124 Amendment of proposed index measures by the Authority
- 12.125 Authority must consult on proposed index measures
- 12.126 Decision on index measures
- 12.127 Transpower to report on availability and reliability
- 12.128 Transpower and designated transmission customers may agree on other requirements

*Subpart 7—Preparation of Outage Protocol*

- 12.129 Purpose of this subpart
- 12.130 Definition of outage
- 12.131 Outage protocol

*Review of Outage Protocol*

- 12.132 Review of Outage Protocol
- 12.133 Transpower to submit proposed Outage Protocol

*Principles and required content of Outage Protocol*

- 12.134 Principles for developing Outage Protocol
- 12.135 Required content of Outage Protocol
- 12.136 Planning for outages
- 12.137 Transpower and designated transmission customers to act reasonably and in good faith
- 12.138 Reconsideration of planned outages
- 12.139 Variations to planned outages
- 12.140 Net benefit principle, requirements and methodologies
- 12.141 Consideration of likely effects of planned outages
- 12.142 Planned outages required in order to give effect to an investment or required by the Act
- 12.143 Required content of Outage Protocol in relation to unplanned outages
- 12.144 Reporting on compliance with Outage Protocol

*Decisions on Outage Protocol*

- 12.145 Authority may initially approve the proposed Outage Protocol or refer back to Transpower
- 12.146 Reconsideration of revised Outage Protocol by the Authority
- 12.147 Authority must consult on the proposed Outage Protocol
- 12.148 Authority may undertake additional consultation
- 12.149 Decision on Outage Protocol
- 12.150 Incorporation of Outage Protocol by reference

*Complying with Outage Protocol*

- 12.151 Compliance with Outage Protocol

**Schedule 12.1**  
**Categories of designated transmission customers**

**Schedule 12.6**  
**Default transmission agreement template**

---

Subpart 1—General

**12.1 Contents of this Part**

This Part relates to the following aspects of transmission:

- (a) **transmission agreements** (subpart 2):
- (b) **grid** reliability and industry information (subpart 3):
- (c) the **transmission pricing methodology** (subpart 4):
- (d) *[Revoked]*
- (e) **interconnection asset** services (subpart 6):
- (f) the **Outage Protocol** (subpart 7).

Compare: Electricity Governance Rules 2003 rule 1 section I part F

Clause 12.1(d): revoked, on 1 October 2011, by clause 5 of the Electricity Industry Participation (Financial Transmission Rights) Code Amendment 2011.

**12.2 Discretion to waive Code requirements**

- (1) The **Authority** may agree to waive Code requirements under this Part if, before the commencement of an amendment to this Part,—
  - (a) **Transpower** or any other **participant** required to complete actions under this

Code has in substance done what it would have been required to do under this Code; and

- (b) the **Authority** is satisfied that the actions have been completed.
- (2) If the **Authority** agrees to waive Code requirements under subclause (1), the **Authority** must **publish** its decision and reasons for agreeing to waive Code requirements.

Compare: Electricity Governance Rules 2003 rule 2 section I part F

### 12.3 Interaction between Parts 7 and 8 and this Part

- (1) The **principal performance obligations** in relation to the real time delivery of **common quality and dispatch** under Part 7 relate to the functions and obligations of the **system operator**.
- (2) When it is exercising its functions and powers under this Part, the **Authority** must have regard to the desirability of Parts 7 and 8 and this Part operating in an integrated and consistent manner.
- (3) The performance or non-performance of a function or obligation of the **system operator** under Parts 7 or 8, and a claim against the **system operator** under Parts 7 or 8, is without prejudice to the functions and obligations of **Transpower** under this Part.
- (4) The performance or non-performance of a function or obligation of **Transpower** under this Part, and any claim against **Transpower** under this Part or a **transmission agreement**, is without prejudice to the functions and obligations of the **system operator** under Parts 7 or 8.

Compare: Electricity Governance Rules 2003 rule 3 section I part F

## Subpart 2—Transmission agreements

### 12.4 Contents of this subpart

This subpart deals with **transmission agreements**, and provides for the following:

- (a) *[Revoked]*
- (b) the categories of **participants** that must enter into **transmission agreements**:
- (c) an obligation on **Transpower** and **designated transmission customers** to enter into **transmission agreements**:
- (d) matters to be included in **transmission agreements**:
- (e) provisions relating to the **default transmission agreement template**, which—
- (i) provides the basis for the negotiation of **transmission agreements**; or
- (ii) provides the basis for a **default transmission agreement**:
- (f) a process for the **Authority** to determine a **Connection Code** that forms part of the **default transmission agreement template**:
- (g) a process for variations in **transmission agreements** from the **default transmission agreement template**:
- (h) a process for resolving disputes arising from the negotiation of **transmission agreements** and the failure to agree to the terms of **default transmission agreements**:
- (i) existing agreements.

Compare: Electricity Governance Rules 2003 rule 1 section II part F

Clause 12.4(a): revoked, on 1 October 2023, by clause 5(1) of the Electricity Industry Participation Code Amendment

(Default Transmission Agreement) 2023.

Clauses 12.4(e) to 12.4(h): amended, on 1 October 2023, by clause 5(2) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

### **12.5 Structure for transmission agreements *[Revoked]***

Compare: Electricity Governance Rules 2003 rule 2.1.2 section II part F

Clause 12.5: revoked, on 1 October 2023, by clause 6 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

### **12.6 Review of structure for transmission agreements *[Revoked]***

Compare: Electricity Governance Rules 2003 rules 2.1.3 to 2.1.5 section II part F

Clause 12.6(3): amended, on 1 November 2018, by clause 73 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 12.6: revoked, on 1 October 2023, by clause 7 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

### **12.7 Categories of participants required to enter into transmission agreements**

- (1) The categories of **designated transmission customers** required to enter into **transmission agreements** with **Transpower** under clause 12.8 are as specified in Schedule 12.1.
- (2) The **Authority** must record in the **register** whether a **registered participant** is a **designated transmission customer**.
- (3) Registration has no effect on a **participant's** status as a **designated transmission customer**.

Compare: Electricity Governance Rules 2003 rule 2.2 section II part F

*Transpower and designated transmission customers must enter transmission agreements*

### **12.8 Obligation to enter transmission agreements**

**Transpower** and **designated transmission customers** must enter into **transmission agreements**.

Compare: Electricity Governance Rules 2003 rule 3.1.1 section II part F

### **12.9 When designated transmission customer must enter into transmission agreement**

A **participant** who becomes a **designated transmission customer** must enter into a **transmission agreement** with **Transpower** within 2 months after the **participant** becomes a **designated transmission customer**.

Compare: Electricity Governance Rules 2003 rule 3.1.2.3 section II part F

### **12.10 Default transmission agreements**

- (1) Subject to clause 12.49 the terms in the **default transmission agreement template** (other than incomplete terms) apply as a **default transmission agreement** as soon as a **participant** becomes a **designated transmission customer**.
- (1A) Subject to clause 12.49, if, at the expiry of 2 months after a **participant** becomes a **designated transmission customer**, the **designated transmission customer** and **Transpower** have not entered into a **transmission agreement** in accordance with clause 12.9, the **designated transmission customer** and **Transpower** must comply with the process specified in this clause.

- (2) If this clause applies:
- (a) within 10 **business days** of the date that is 2 months after the **participant** became a **designated transmission customer**, the **designated transmission customer** must provide **Transpower**, at the address for service for **Transpower** registered at the New Zealand Companies Office, with—
    - (i) the **designated transmission customer's** full name; and
    - (ii) the **designated transmission customer's** physical address, postal address and electronic address to which notices under the **default transmission agreement** are to be sent; and
    - (iii) the name of the contact person of the **designated transmission customer** to whom such notices should be addressed:
  - (b) by the date 20 **business days** after the receipt of the **designated transmission customer's** details under paragraph (a), **Transpower** must provide the **designated transmission customer** with a draft **default transmission agreement** completed in accordance with the **default transmission agreement template**, which must include the following:
    - (i) the **designated transmission customer's** details as provided under paragraph (a):
    - (ii) **Transpower's** physical address, postal address and electronic address to which notices under the **default transmission agreement** are to be sent:
    - (iii) the contact person to whom notices under the **default transmission agreement** should be addressed:
    - (iv) **Transpower's** designated bank account for the purposes of receiving payments under the **default transmission agreement**:
    - (v) draft Schedules 1 and 2, which set out the **connection locations, points of service** and **points of connection** of the **assets** owned or operated by the **designated transmission customer** to the **grid**:
    - (vi) a draft Schedule 4 setting out, in the same form as the diagram in Schedule 4 of the **default transmission agreement template**, the configuration of the **connection assets** in relation to each **connection location** listed in Schedule 1:
    - (vii) a draft Schedule 5 setting out proposed service levels for each **connection location** listed in Schedule 1 determined in accordance with subclause (3):
    - (viii) if applicable, a draft Schedule 6, including identifying the facilities, facilities area, and land that are to be subject to the access and occupation terms set out in the schedule and the licence charges under the schedule:
  - (c) the **designated transmission customer** and **Transpower** may discuss the schedules proposed under paragraph (b)(v) to (viii), as a result of which **Transpower** may amend any of the schedules:
  - (d) the **designated transmission customer** must advise **Transpower** in writing no later than 20 **business days** after receiving the draft **default transmission agreement** under paragraph (b) whether—
    - (i) it accepts the schedules as proposed by **Transpower** under paragraph (b)(v) to (viii); or

- (ii) if **Transpower** has amended any of those schedules under paragraph (c), it accepts the schedules as amended.
- (3) The service levels set out in Schedule 5 of a **default transmission agreement** must be determined on the following basis:
  - (a) the capacity service levels for each **branch** must be consistent with—
    - (i) the capacities of the **branch** or component **assets** in the most recent **asset capability statement** provided by **Transpower** under clause 2(5) of **Technical Code A** of Schedule 8.3; or
    - (ii) if the relevant information is not contained in the **asset capability statement**, the **manufacturer's specification** for the component **assets**:
  - (b) the service levels for the voltage range specified in the capacity service measures for each **branch** must be consistent with,—
    - (i) for **assets** of voltages of 50kV or above,—
      - (A) the voltage ranges for the component **assets** specified in the **AOPOs**, if any; or
      - (B) the voltage range specified in any **equivalence arrangement** approved or any **dispensation** granted under clauses 8.29 to 8.31 in respect of any **asset** that does not comply with the voltage range specified in the **AOPOs**; or
    - (ii) for assets of voltages less than 50kV, the normal operating voltage of the component **assets**:
  - (c) **Transpower** must ensure that each **connection asset** is included in a **branch**:
  - (d) the availability and reliability service levels must—
    - (i) be set at a level equivalent to the average annual availability and reliability at each **point of service** subject to the **default transmission agreement** over the 5 year period (being years ending 30 June) immediately before the date that is 2 months after the **participant** became a **designated transmission customer**; or
    - (ii) if a **point of service** subject to the **default transmission agreement** has not been in existence for 5 years (being years ending 30 June) before the date referred to in subparagraph (i), reflect a reasonable estimate of the expected availability and reliability at the **point of service** having regard to the performance data available for the **point of service** and average annual availability and reliability of **assets** similar to the **connection assets** at the **connection location** at which the **point of service** is located:
  - (e) the reporting and response service levels must be consistent with **Transpower's** practices existing on the date that is 2 months after the **participant** became a **designated transmission customer**, including **Transpower's** documented policies and procedures, and must not result in changes to the management or operation of the **grid** that could materially affect **Transpower** or any other **participant** or end use customer, or require **Transpower** to materially alter the level of its normal on-going **grid** expenditure.
- (4) If the **designated transmission customer** accepts the schedules as proposed by **Transpower** under subclause (2)(b)(v) to (viii), or as amended by **Transpower** under

subclause (2)(c), the draft **default transmission agreement** proposed under subclause (2)(b)(v) to (viii), or as amended by **Transpower** under subclause (2)(c), (as applicable) is deemed to apply as a **default transmission agreement** from the date the **participant** became a **designated transmission customer**.

- (5) If **Transpower** and a **designated transmission customer** are unable to agree on the terms of any of the schedules proposed by **Transpower** under subclause (2)(b)(v) to (viii), or as amended by **Transpower** under subclause (2)(c), either party may refer the matter to the **Rulings Panel** for determination under clauses 12.45 to 12.48.
- (6) If a dispute is referred to the **Rulings Panel**, under subclause (5)—
- (a) the **default transmission agreement** as determined by the **Rulings Panel** in accordance with clauses 12.45 to 12.48 is deemed to apply between **Transpower** and the **designated transmission customer** from the date the **participant** became a **designated transmission customer**; and
  - (b) until the **Rulings Panel** makes a determination, the draft **default transmission agreement** proposed under subclause (2)(b)(v) to (viii), or as amended by **Transpower** under subclause (2)(c), (as applicable) is deemed to apply as a **default transmission agreement** from the date the **participant** became a **designated transmission customer**.

Compare: Electricity Governance Rules 2003 rule 3.1.3 section II part F

Clause 12.10 Heading: amended, on 1 October 2023, by clause 8(1) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.10(1): amended, on 16 December 2013, by clause 5 of the Electricity Industry Participation (Revocation of Part 16) Code Amendment 2013.

Clause 12.10(1): amended, on 1 October 2023, by clause 8(2) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.10(1A): inserted, on 1 October 2023, by clause 8(2) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.10(2)(a)(ii) and (b)(ii): amended, on 5 October 2017, by clause 287 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.10(2): amended, on 1 October 2023, by clause 8(3) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.10(3): amended, on 1 October 2023, by clause 8(3) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.10(4): amended, on 1 October 2023, by clause 8(4) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.10(4): amended, on 1 March 2024, by clause 55(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Clause 12.10(5): amended, on 1 October 2023, by clause 8(5) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.10(6)(a): amended, on 1 October 2023, by clause 8(6) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.10(6)(b): amended, on 1 October 2023, by clause 8(7) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.10(6): replaced, on 1 March 2024, by clause 55(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

## 12.11 Subsequent transmission agreements

If a **default transmission agreement** applies, it may be superseded by a subsequent **transmission agreement** entered into by **Transpower** and the **designated transmission customer**.

Compare: Electricity Governance Rules 2003 rule 3.1.4 section II part F

Clause 12.11: amended, on 1 October 2023, by clause 9 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

### 12.12 Changes to connection assets under default transmission agreements

- (1) If **Transpower** reconfigures, replaces, enhances, or permanently removes a **connection asset** from service in accordance with the provisions of a **default transmission agreement**—
  - (a) within 20 **business days**, to the extent necessary, **Transpower** must provide the **designated transmission customer** who is a party to that agreement with a revised Schedules 1 and 2, a revised Schedule 4, and a revised Schedule 5, and a revised Schedule 6 for that agreement, reflecting any changes to the description of the **connection locations, points of service, or points of connection** in Schedules 1 and 2, the diagram in Schedule 4, the service levels specified in Schedule 5, or the information in Schedule 6 resulting from the replacement or enhancement of the **connection asset**; and
  - (b) the **designated transmission customer** and **Transpower** may discuss the revised schedules, as a result of which **Transpower** may amend any of the revised schedules; and
  - (c) the **designated transmission customer** must advise **Transpower** within 20 **business days** of receiving the revised schedules under paragraph (a) whether—
    - (i) it accepts the revised schedules as proposed by **Transpower** under paragraph (a); or
    - (ii) if **Transpower** has amended any of those revised schedules under paragraph (b), it accepts the revised schedules as amended; and
  - (d) the revised schedules apply under the **default transmission agreement** from the date that acceptance is received by **Transpower** under paragraph (c).
- (2) If the **designated transmission customer** does not accept the revised schedules under subclause (1)(c), either party may refer the matter to the **Rulings Panel** for determination under clauses 12.45 to 12.48.
- (3) If a dispute is referred to the **Rulings Panel** in accordance with subclause (2)—
  - (a) the revised schedules proposed by **Transpower** under subclause (1)(a) apply from the date on which **Transpower** provides the **designated transmission customer** with the revised schedules under subclause (1)(a) until the date on which the **Rulings Panel** makes its determination or the determination comes into effect; and
  - (b) the revised schedules as determined by the **Rulings Panel** under clauses 12.45 to 12.48 apply under the **default transmission agreement** from the date determined by the **Rulings Panel**.

Compare: Electricity Governance Rules 2003 rule 3.1.5 section II part F  
Clause 12.12: amended, on 1 October 2023, by clause 10(1) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023. Clause 12.12(1) and (1)(a): amended, on 1 October 2023, by clause 10(2) and 10(3) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

### 12.13 Expiry or termination of transmission agreements

If a **participant** and **Transpower** are party to an existing **transmission agreement** or written agreement to which clause 12.49 applies, and do not enter into a new **transmission agreement** before the existing agreement expires or terminates, upon expiry or termination of the existing agreement the provisions in clause 12.10 apply

with all necessary modifications.

Compare: Electricity Governance Rules 2003 rule 3.1.6 section II part F

Clause 12.13: amended, on 1 October 2023, by clause 11(1) and 11(2) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.13(a)(ii) and (b)(ii): amended, on 5 October 2017, by clause 288 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.13(b)(v): amended, on 1 October 2023, by clause 11(3) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.13(e): amended, on 1 October 2023, by clause 11(4) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.13(g)(i): amended, on 1 October 2023, by clause 11(5) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.13(g)(ii): amended, on 1 October 2023, by clause 11(6) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.13: replaced, on 1 March 2024, by clause 56 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

### *Content of transmission agreements*

#### **12.14 Transmission agreements to be consistent with default transmission agreement template and grid reliability standards**

Subject to clauses 12.35 to 12.38, a **transmission agreement** entered into between **Transpower** and a **designated transmission customer** under clause 12.8 must be consistent in all material respects with—

- (a) the **default transmission agreement template**; and
- (b) the **grid reliability standards**,—

as at the date the **transmission agreement** is entered into.

Compare: Electricity Governance Rules 2003 rule 3.2.1 section II part F

Clause 12.14 Heading: amended, on 1 October 2023, by clause 12(1) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.14(a): amended, on 1 October 2023, by clause 12(2) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

#### **12.15 Transpower to publish information about transmission agreements and provide them on request**

- (1) **Transpower** must **publish** and update annually a list of all **transmission agreements** it has with **designated transmission customers** that includes, in respect of each **transmission agreement** contained in the list, the following information:

- (a) the full name of the **designated transmission customer** that is a party to the **transmission agreement**; and
- (b) the date on which the **transmission agreement** was executed; and
- (c) whether the **transmission agreement** includes any material variations from the **default transmission agreement**; and
- (d) if the **transmission agreement** includes any material variations from the **default transmission agreement**; a description of the variations; and
- (e) if any schedule to the **transmission agreement** has been revised in accordance with clause 12.12, the date from which the revised schedule began to apply.

- (2) A person may request from **Transpower** a copy of a **transmission agreement** that **Transpower** has with a **designated transmission customer**, and **Transpower** must provide a copy to the person as soon as practicable after receiving the request.
- (3) Despite subclause (2), **Transpower** may refuse to provide information from a **transmission agreement** if it considers that there would be grounds for withholding the information under the Official Information Act 1982.  
Compare: Electricity Governance Rules 2003 rule 3.2.2 section II part F  
Clause 12.15: substituted, on 1 February 2016, by clause 46 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.  
Clause 12.15(1): amended, on 1 October 2023, by clause 13 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

### *Connection Code*

#### **12.16 Connection Code [Revoked]**

Clause 12.16: revoked, on 1 October 2023, by clause 14 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

#### **12.17 Purpose of Connection Code**

The purpose of the **Connection Code** is to set out the technical requirements and standards that **designated transmission customers** must meet in order to be connected to the **grid** and that **Transpower** and **designated transmission customers** must comply with under **transmission agreements**.

Compare: Electricity Governance Rules 2003 rule 3.3.1 section II part F  
Clause 12.17: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.  
Clause 12.17: amended, on 5 October 2017, by clause 289 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 12.17: amended, on 1 October 2023, by clause 15 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

#### **12.18 Review of Connection Code**

- (1) The **Authority** may review the **Connection Code** at any time.
- (2) Clauses 12.19 to 12.25 apply to any such review.  
Compare: Electricity Governance Rules 2003 rule 3.3.10 section II part F

#### **12.19 Transpower to submit Connection Code**

- (1) **Transpower** must submit a proposed **Connection Code** to the **Authority** within 90 days (or such longer period as the **Authority** may allow) of receipt of a written request from the **Authority**. The **Authority** may issue such a request at any time. The proposed **Connection Code** must provide for the matters set out in clause 12.20 and give effect to the principles set out in clause 12.21.
- (2) With its proposed **Connection Code**, **Transpower** must submit to the **Authority** an explanation of the proposed **Connection Code** and a **statement of proposal** for the proposed **Connection Code**.  
Compare: Electricity Governance Rules 2003 rule 3.3.2 section II part F

#### **12.20 Required content of Connection Code**

The **Connection Code** must provide for the following matters:

- (a) connection requirements for **designated transmission customers**:

- (b) technical requirements for **assets**, including **assets** owned by **Transpower**, and for other equipment and plant that is connected to a **local network** or an **embedded network** or that forms part of an **embedded network** or **embedded generating station** if the operation of that equipment and plant could affect the **grid assets**:
- (c) operating standards for equipment that is owned by a **designated transmission customer**, used in relation to the conveyance of **electricity**, and that is situated on land owned by **Transpower**:
- (d) information requirements to be met by **designated transmission customers** before equipment is connected to the **grid** and before changes are made to the equipment:
- (e) an obligation on **Transpower** to provide a 10 year forecast of the expected maximum fault level of each point of service to **designated transmission customers** set out in the **transmission agreement** between **Transpower** and each **designated transmission customer**.

Compare: Electricity Governance Rules 2003 rule 3.3.3 section II part F

Clause 20.20: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 12.20(a): amended, on 5 October 2017, by clause 290(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.20(b) and (d): amended, on 5 October 2017, by clause 290(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.20(c): amended, on 5 October 2017, by clause 290(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.20(e): amended, on 5 October 2017, by clause 290(4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 12.21 Principles for developing Connection Code

The **Connection Code** must give effect to the following principles:

- (a) the principles of the **default transmission agreement template** in clause 12.30:
- (b) the desirability of the **Connection Code** and Part 8 operating in an integrated and consistent manner, if possible:
- (c) the need to ensure that the **grid owner** can meet all obligations placed on it by the **system operator** for the purpose of meeting common security and power quality requirements under Part 8:
- (d) the need to ensure that the safety of all personnel is maintained:
- (e) the need to ensure that the safety and integrity of equipment is maintained.

Compare: Electricity Governance Rules 2003 rule 3.3.4 section II part F

Clause 12.21: amended, on 1 October 2023, by clause 16 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

### 12.22 Authority may initially approve proposed Connection Code or refer back to Transpower

- (1) After consideration of **Transpower's** proposed **Connection Code**, and accompanying explanation and **statement of proposal**, the **Authority** may—
  - (a) provisionally approve the proposed **Connection Code** having regard to the matters set out in clause 12.20 and the principles in clause 12.21; or
  - (b) refer the proposed **Connection Code** and accompanying explanation and **statement of proposal** back to **Transpower** if, in the **Authority's** view,—

- (i) the proposed **Connection Code** does not contain the matters set out in clause 12.20; or
  - (ii) the proposed **Connection Code** does not adequately provide for the principles in clause 12.21; or
  - (iii) the explanation or **statement of proposal** provided with the proposed **Connection Code** in accordance with clause 12.19(2) is inadequate.
- (2) **Transpower** may, no later than 20 **business days** (or such longer period as the **Authority** may allow) after the **Authority** advises **Transpower** of its decision under subclause (1), consider the **Authority's** concerns and resubmit its proposed **Connection Code** and accompanying explanation and **statement of proposal** for consideration by the **Authority**.

Compare: Electricity Governance Rules 2003 rule 3.3.5 section II part F

Clause 12.22(2): amended, on 1 November 2018, by clause 74 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

### 12.23 Amendment of proposed Connection Code by Authority

If the **Authority** considers that the **Connection Code** resubmitted by **Transpower** under clause 12.22(b) does not adequately provide for the matters set out in clause 12.20 or adequately give effect to the principles in clause 12.21, the **Authority** may make any amendments to the proposed **Connection Code** it considers necessary.

Compare: Electricity Governance Rules 2003 rule 3.3.6 section II part F

### 12.24 Authority must consult on proposed Connection Code

- (1) The **Authority** must **publish** the proposed **Connection Code**, either as provisionally approved by the **Authority** or as amended by the **Authority**, as soon as practicable, for consultation with any person that the **Authority** thinks is likely to be materially affected by the proposed **Connection Code**.
- (2) As well as the consultation required under subclause (1), the **Authority** may undertake any other consultation it considers necessary.

Compare: Electricity Governance Rules 2003 rules 3.3.7 and 3.3.8 section II part F

### 12.25 Decision on Connection Code

When the **Authority** has completed its consultation on the proposed **Connection Code** it must decide whether to amend the **Connection Code**.

Compare: Electricity Governance Rules 2003 rule 3.3.9 section II part F

Clause 12.25(2): amended, on 1 August 2023, by clause 41 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 12.25(1) and 12.25(2): amended, on 1 October 2023, by clause 17 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

### 12.26 Incorporation of Connection Code by reference *[Revoked]*

Clause 12.26(1): amended, on 5 October 2017, by clause 291 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.26(1): amended, on 1 August 2023, by clause 42(1) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 12.26(2): revoked, on 1 August 2023, by clause 42(2) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 12.26: revoked, on 1 October 2023, by clause 18 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

*Default transmission agreement template*

Cross heading: amended, on 1 October 2023, by clause 19 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

**12.27 Benchmark agreement [Revoked]**

Clause 12.27(1)(e): amended, on 1 February 2016, by clause 47 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 12.27: revoked, on 1 October 2023, by clause 20 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

**12.28 Authority may initiate review [Revoked]**

Compare: Electricity Governance Rules 2003 rule 7 section II part F

Clause 12.28: revoked, on 1 October 2023, by clause 20 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

**12.29 Purpose of default transmission agreement template**

The purpose of **default transmission agreement template** is to—

- (a) facilitate commercial arrangements between **Transpower** and **designated transmission customers** by providing a basis for negotiating **transmission agreements** required under clause 12.8 that meet the particular requirements of **Transpower** and **designated transmission customers**; and
- (b) provide the basis for **default transmission agreements**

Compare: Electricity Governance Rules 2003 rule 4.1 section II part F

Clause 12.29 heading and clause: amended, on 1 October 2023, by clause 21(1) and (2) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.29(b): amended, on 1 October 2023, by clause 21(3) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

**12.30 Principles for default transmission agreement template**

The **default transmission agreement template** should—

- (a) reflect a fair and reasonable balance between the requirements of **designated transmission customers** and the legitimate interests of **Transpower** as **asset owner**; and
- (b) reflect the interests of end use customers; and
- (c) reflect the reasonable requirements of **designated transmission customers** at the **grid injection points** and **grid exit points**, and the ability of **Transpower** to meet those requirements; and
- (d) reflect the differing needs of different classes of **designated transmission customers**; and
- (e) be appropriate to the technical requirements of services provided at the **point of connection** to the **grid**, but not duplicate requirements that are more appropriately included in the **grid reliability standards**; and
- (f) establish common standards for a common configuration based on factors such as size of connection and voltage level; and
- (g) encourage efficient and effective processes for enforcement of obligations and dispute resolution.

Compare: Electricity Governance Rules 2003 rule 4.2 section II part F

Clause 12.30(f): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 12.30(f): amended, on 5 October 2017, by clause 292 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.30 heading and clause: amended, on 1 October 2023, by clause 22(1) and (2) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

### 12.31 Contents of default transmission agreement template

- (1) The **default transmission agreement template** must include—
- (a) an obligation on the parties to design, construct, maintain and operate all relevant plant and equipment in accordance with—
    - (i) relevant laws; and
    - (ii) the requirements of this Code (including obligations on **designated transmission customers** to provide information to facilitate system planning, as set out in clause 12.54); and
    - (iii) **good electricity industry practice** and applicable New Zealand technical and safety standards; and
  - (b) an obligation on **designated transmission customers** to comply with **Transpower's** reasonable technical connection and safety requirements; and
  - (c) an obligation on **designated transmission customers** to pay prices calculated in accordance with the **transmission pricing methodology** approved by the **Authority** under subpart 4; and
  - (d) arbitration or mediation processes for resolving disputes; and
  - (e) service definitions, service levels, and service measures to the extent practicable for transmission services, other than the services to which the clauses in subpart 6 apply; and
  - (f) the charging of a fee by **Transpower** to recover its **settlement residue** processing costs from **designated transmission customers**; and
  - (g) the recovery of any negative **settlement residue** by **Transpower** from **designated transmission customers**.
- (2) The **default transmission agreement template** must be consistent in all material respects with the **grid reliability standards**.

Compare: Electricity Governance Rules 2003 rule 4.3 section II part F

Clause 12.31(1)(b): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 12.31(1)(b): amended, on 5 October 2017, by clause 293 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.31 heading: amended, on 1 October 2023, by clause 23(1) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.31(1) and (1)(e): amended, on 1 October 2023, by clause 23(2) and (3) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.31(1)(f) and (g): inserted, on 1 October 2023, by clause 23(4) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.31(2): amended, on 1 October 2023, by clause 23(5) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

### 12.32 Authority must consult on draft benchmark agreement *[Revoked]*

Compare: Electricity Governance Rules 2003 rules 4.4 and 4.5 section II part F

Clause 12.32(2): amended, on 1 November 2018, by clause 75 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 12.32: revoked, on 1 October 2023, by clause 24 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

### 12.33 Decision on benchmark agreement *[Revoked]*

Compare: Electricity Governance Rules 2003 rule 4.6 section II part F

Clause 12.33(2): amended, on 1 August 2023, by clause 43 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 12.33: revoked, on 1 October 2023, by clause 24 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

### 12.34 Incorporation of benchmark agreement by reference *[Revoked]*

Clause 12.34(1): amended, on 5 October 2017, by clause 294 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.34(1): amended, on 1 August 2023, by clause 44(1) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 12.34(2): revoked, on 1 August 2023, by clause 44(2) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 12.34: revoked, on 1 October 2023, by clause 24 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

### *Variations from default transmission agreement template and grid reliability standards and enhancement and removal of connection assets*

Cross heading: amended, on 1 October 2023, by clause 25 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

### 12.35 Increased service levels and reliability

(1) This clause applies if—

- (a) a proposed **transmission agreement** is not consistent in all material respects with the **default transmission agreement template** because it increases the service levels above those in the template; or
- (b) subject to clause 12.39, a proposed **transmission agreement** or other agreement between **Transpower** and a **designated transmission customer** increases the level of reliability above the **grid reliability standards** for a particular **grid injection point** or **grid exit point**.

(2) If this clause applies, the parties to the proposed **transmission agreement** must confirm in writing to the **Authority** that—

- (a) they have consulted with affected end use customers in relation to—
  - (i) the proposed service levels or the proposed increase in reliability; and
  - (ii) any resulting price implications; and
- (b) there are no material unresolved issues affecting the interests of those end use customers.

Compare: Electricity Governance Rules 2003 rule 5.1 section II part F

Clause 12.35 Heading: amended, on 15 May 2014, by clause 32(a) of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

Clause 12.35(1)(a): amended, on 15 May 2014, by clause 32(b) of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

Clause 12.35(1)(a): amended, on 1 October 2023, by clause 26 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.35(2): replaced, on 5 October 2017, by clause 295 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 12.36 Decreased service levels and reliability

(1) This clause applies if—

- (a) a proposed **transmission agreement** is not consistent in all material respects with the **default transmission agreement template** because it decreases the service levels below those in the template; or
  - (b) subject to clause 12.39, a proposed **transmission agreement** or other agreement between **Transpower** and a **designated transmission customer** decreases the level of reliability below the **grid reliability standards** for a particular **grid injection point** or **grid exit point**.
- (2) If this clause applies, the parties must obtain the **Authority's** approval of the proposed service levels or the lower level of reliability.
- (3) The parties must satisfy the **Authority** that the **Authority** should grant an approval under subclause (2), having regard to any potential material adverse impacts of the proposed service levels or the lower level of reliability on—
- (a) current and future service levels or reliability for any affected **designated transmission customer** or end use customer; and
  - (b) the price paid for transmission or distribution services, or **electricity**, by any affected **designated transmission customer** or end use customer.

Compare: Electricity Governance Rules 2003 rule 5.2 section II part F

Clause 12.36 Heading: amended, on 15 May 2014, by clause 33(a) of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

Clause 12.36(1)(a): amended, on 15 May 2014, by clause 33(b) of the Electricity Industry Participation (Minor Code Amendments) Code Amendment 2014.

Clause 12.36(1)(a): amended, on 1 October 2023, by clause 27 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

### 12.37 Variations that may increase or decrease reliability

If it is uncertain whether, subject to clause 12.39, a proposed **transmission agreement** or other agreement increases or decreases the service levels from those that would apply if the **default transmission agreement template** applied, or whether a proposed **transmission agreement** or other agreement increases or decreases the level of reliability above or below the **grid reliability standards**, for a particular **grid injection point** or **grid exit point**, the parties must obtain the **Authority's** approval described in clause 12.36(2).

Compare: Electricity Governance Rules 2003 rule 5.3 section II part F

Clause 12.37: amended, on 1 October 2023, by clause 28 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

### 12.38 Other variations from terms of default transmission agreement template

- (1) This clause applies if a proposed **transmission agreement** to be entered into by **Transpower** and a **designated transmission customer** under clause 12.8 is not consistent in all material aspects with the **default transmission agreement template**, other than a situation to which clauses 12.35 to 12.37 apply.
- (2) If this clause applies, the parties must obtain the **Authority's** approval to the proposed variation from the **default transmission agreement template**. The parties to the proposed **transmission agreement** must satisfy the **Authority** that they have consulted with any affected end use customers and **designated transmission customers** in relation to the proposed variation, and there are no material unresolved issues affecting the interests of those persons.

Compare: Electricity Governance Rules 2003 rule 5.4 section II part F

Clause 12.38 heading: amended, on 1 October 2023, by clause 29(1) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.38: amended, on 1 October 2023, by clause 29(2) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

### 12.39 Customer specific value of expected unserved energy

- (1) *[Revoked]*
- (2) **Transpower** or a **designated transmission customer** may apply to the **Authority**—
  - (a) if permitted under a **transmission agreement**, for provisional approval to use a different **value of expected unserved energy** than the value specified in clause 4 of Schedule 12.2 for the purposes of determining whether to replace or enhance **connection assets** as provided for under that **transmission agreement**; or
  - (b) for approval to use a different **value of expected unserved energy** than the value specified in clause 4 of Schedule 12.2 for the purposes of applying the **grid reliability standards** under clauses 12.35 to 12.37 for a **grid injection point** or **grid exit point**, regardless of whether **Transpower** or the **designated transmission customer** has applied for the **Authority's** provisional approval under subclause (4).
- (3) An application under subclause (2) must be made in writing to the **Authority**—
  - (a) in the case of an application under subclause (2)(a), within 20 **business days** of the **designated transmission customer** proposing that different value to **Transpower** under the **transmission agreement**; and
  - (b) in the case of an application under subclause (2)(b), within 20 **business days** of the **designated transmission customer** reaching an agreement with **Transpower** to which clauses 12.35 to 12.37 apply.
- (4) If **Transpower** or a **designated transmission customer** applies for approval of a different **value of expected unserved energy** under subclause (2)(a), the **Authority** may provisionally approve that value if the **Authority** considers that the value is a reasonable estimate of the **value of expected unserved energy** in respect of the **grid injection point** or **grid exit point** for the **designated transmission customer** concerned.
- (5) If **Transpower** or a **designated transmission customer** applies for approval of a different **value of expected unserved energy** under subclause (2)(b) the **Authority**—
  - (a) may approve that value if the **Authority** considers that the value is a reasonable estimate of the **value of expected unserved energy** in respect of the **grid injection point** or **grid exit point** for the **designated transmission customer** concerned; and
  - (b) may decline to approve that value despite having provisionally approved that value under subclause (4).
- (6) If the **Authority** approves the **value of expected unserved energy** proposed by **Transpower** or the **designated transmission customer** under subclause (2)(b), that **value of expected unserved energy** applies for the purposes of applying the **grid reliability standards** under clauses 12.35 to 12.37 for the **grid injection point** or **grid exit point** instead of the **value of expected unserved energy** specified under clause 4 of Schedule 12.2.

- (7) If the **Authority** does not approve the **value of expected unserved energy** proposed by **Transpower** or the **designated transmission customer** under subclause (2)(b), the **value of expected unserved energy** under clause 4 of Schedule 12.2 applies for the purposes of applying the **grid reliability standards** under clauses 12.35 to 12.37 for the **grid injection point** or **grid exit point**.

Compare: Electricity Governance Rules 2003 rule 5.5 section II part F

Clause 12.39 Heading: amended, on 1 February 2016, by clause 48(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 12.39: amended, on 1 February 2016, by clause 48(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 12.39(1): revoked, on 1 February 2016, by clause 48(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 12.39(2)(b): amended, on 1 February 2016, by clause 48(4) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 12.39(4): amended, on 1 February 2016, by clause 48(5) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 12.39(6): amended, on 1 February 2016, by clause 48(6) and (7) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 12.39(7): amended, on 1 February 2016, by clause 48(8) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

#### 12.40 Replacement and enhancement of shared connection assets

- (1) If 2 or more **designated transmission customers** are connected to a **point of connection** and **Transpower** has advised those **designated transmission customers**, in accordance with the provisions of a **transmission agreement** between **Transpower** and each of the **designated transmission customers**, that a **grid reliability report published** by **Transpower** in accordance with clause 12.76 sets out that the power system is not reasonably expected to meet the **N-1 criterion** at all times over the next 5 years because of a **connection asset** related to that **point of connection**, **Transpower** must—
- as soon as practicable after advising the **designated transmission customers**, investigate whether the **connection asset** meets the **grid reliability standards**; and
  - if it finds that the **connection asset** does not meet the **grid reliability standards**, develop proposals for investment in the **grid** to ensure that the **connection asset** meets the **grid reliability standards** and propose them to the **designated transmission customers** as soon as reasonably possible after **publication** of the **grid reliability report**.
- (2) **Transpower** and the **designated transmission customers** advised under subclause (1) must attempt in good faith, within 6 months of the date on which **Transpower** makes its proposals to the **designated transmission customers** under subclause (1)(b), or such longer period as the **Authority** may allow, to reach an agreement for an investment or other solution that will have the effect of—
- maintaining the level of reliability for the **connection asset** at the level of reliability in the **grid reliability standards**; or
  - increasing or decreasing the level of reliability for the **connection asset** above or below the **grid reliability standards**, so long as **Transpower** and the **designated transmission customers** have complied with clauses 12.35 to 12.37 and 12.39.
- (3) **Transpower** may undertake an investment proposed under subclause (2) only—

- (a) if the **designated transmission customers** unanimously agree with the proposal in accordance with subclause (2); or
- (b) if the **designated transmission customers** do not unanimously agree or none of the **designated transmission customers** agree with the proposed investment, if—
  - (i) the proposal has been approved under a grid upgrade plan requested by the Electricity Commission in accordance with rule 5.10 of section II of part F of the **rules** before this Code came into force; or
  - (ii) the proposal is approved by the Commerce Commission under an investment proposal requested by the Commerce Commission in accordance with clause 12.44(1); or
  - (iii) the proposal is permitted under an input methodology determined by the Commerce Commission under section 54S of the Commerce Act 1986.

Compare: Electricity Governance Rules 2003 rule 5.6 section II part F

Clause 12.40(1): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 12.40(1): amended, on 5 October 2017, by clause 296 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.40(1) and (2): amended, on 1 November 2018, by clause 76(a) and (b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

#### 12.41 Removal of shared connection assets from service

- (1) If 2 or more **designated transmission customers** are connected to a **point of connection**, and **Transpower** is required by a **transmission agreement** between **Transpower** and each of those **designated transmission customers** to provide the **connection assets** at the **point of connection**, **Transpower** may **decommission a connection asset** at that **point of connection** from service only—
  - (a) if the **designated transmission customers** unanimously agree with the **decommissioning** and clauses 12.35 to 12.37 (if applicable) are complied with; or
  - (b) if the **designated transmission customers** do not unanimously agree, or none of the **designated transmission customers** agree, with the **decommissioning**, if the **decommissioning** results in a net benefit, as calculated under the test set out in clause 12.43.
- (2) To avoid doubt, this clause applies only if **Transpower** proposes to remove a **connection asset** from service and not replace the **asset** with another **connection asset**.

Compare: Electricity Governance Rules 2003 rule 5.7 section II part F

Clause 12.41(1): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 12.41(1): amended, on 5 October 2017, by clause 297 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### 12.42 Reconfiguration of shared connection assets

If 2 or more **designated transmission customers** are connected to a **point of connection**, and **Transpower** is required by a **transmission agreement** between **Transpower** and each of those **designated transmission customers** to provide the **connection assets** in the configuration specified in each of those **transmission agreements**, **Transpower** may only change that configuration—

- (a) if the **designated transmission customers** unanimously agree with the reconfiguration and clauses 12.35 to 12.37 (if applicable) are complied with; or

- (b) if the **designated transmission customers** do not unanimously agree, or none of the **designated transmission customers** agree with the reconfiguration, if the reconfiguration results in a net benefit, as calculated under the test set out in clause 12.43.

Compare: Electricity Governance Rules 2003 rule 5.8 section II part F

Clause 12.42: amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 12.42: amended, on 5 October 2017, by clause 298 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 12.43 Net benefits test

- (1) When **Transpower** is required to apply a net benefit test, **Transpower** must—
- (a) estimate the following costs:
- (i) any additional fuel costs incurred by a **generator** in respect of any **generating units** that will be **dispatched** or are likely to be **dispatched** during or after the removal of the **connection asset** or the reconfiguration of the **connection assets**, arising as a result of the removal or reconfiguration:
  - (ii) any direct labour and material costs that will be incurred by **Transpower** and the **designated transmission customers** undertaking the removal of the **connection asset** or the reconfiguration of the **connection assets**:
  - (iii) any increase in the estimate of **expected unserved energy** in MWh multiplied by the value per MWh of that **expected unserved energy**, arising as a result of the removal of the **connection asset** or the reconfiguration of the **connection assets**:
  - (iv) any of the following costs, if the cost is to a person that produces, transmits, retails, or consumes **electricity** in New Zealand:
    - (A) changes in fuel costs of **existing assets, committed projects and modelled projects**:
    - (B) changes in the value of involuntary **demand** curtailment:
    - (C) changes in the costs of **demand**-side management:
    - (D) changes in costs resulting from deferral of capital expenditure on **modelled projects**:
    - (E) changes in costs resulting from differences in the amount of capital expenditure on **modelled projects**:
    - (F) changes in costs resulting from differences in operations and maintenance expenditure on **existing assets, committed projects, and modelled projects**:
    - (G) changes in costs for **ancillary services**:
    - (H) changes in **losses**, including **local losses**:
    - (I) subsidies or other benefits provided under or arising pursuant to all applicable laws, regulations and administrative determinations:
    - (J) the value of the expected change in economic surplus due to a change in competition among **participants** arising as a result of the removal of the **connection asset** or the reconfiguration of the **connection assets**, excluding any expected change in economic surplus due to a change in another cost in this net benefit test:

- (v) any other relevant cost to a person that produces, transmits, retails or consumes **electricity** in New Zealand; and
  - (b) estimate the following benefits:
    - (i) any reduction in maintenance costs arising as a result of the removal of the **connection asset** or the reconfiguration of the **connection assets** (including **Transpower's** and any **designated transmission customer's** costs):
    - (ii) any reduction in fuel costs incurred by a **generator** in respect of any **generating units**, arising or likely to arise during or after the removal of the **connection asset** or the reconfiguration of the **connection assets**, as a result of the removal or reconfiguration:
    - (iii) any decrease in the estimate of **expected unserved energy** in MWh multiplied by the value per MWh of that **expected unserved energy**, arising as a result of the removal of the **connection asset** or the reconfiguration of the **connection assets**:
    - (iv) any of the following benefits, if the benefit is to a person that produces, transmits, retails or consumes **electricity** in New Zealand:
      - (A) changes in fuel costs of **existing assets, committed projects and modelled projects**:
      - (B) changes in the value of involuntary **demand** curtailment:
      - (C) changes in the costs of **demand**-side management:
      - (D) changes in costs resulting from the deferral of capital expenditure on **modelled projects**:
      - (E) changes in costs resulting from differences in the amount of capital expenditure on **modelled projects**:
      - (F) changes in costs resulting from differences in operations and maintenance expenditure on **existing assets, committed projects, and modelled projects**:
      - (G) changes in costs for **ancillary services**:
      - (H) changes in **losses**, including **local losses**:
      - (I) subsidies or other benefits provided under or arising pursuant to all applicable laws, regulations and administrative determinations:
      - (J) the value of the expected change in economic surplus due to a change in competition among **participants** arising as a result of the removal of the **connection asset** or the reconfiguration of the **connection assets**, excluding any expected change in economic surplus due to a change in another benefit in this net benefit test:
    - (v) any other relevant benefit to a person that produces, transmits, retails or consumes **electricity** in New Zealand; and
  - (c) deduct the costs estimated under paragraph (a) from the benefits estimated under paragraph (b) to determine the net benefit of the proposed removal of the **connection asset** or the reconfiguration of the **connection assets**.
- (2) **Transpower** may apply the test under this clause at differing levels of rigour in different circumstances, which may include taking into account the number of **assets** to

- be removed or reconfigured, the value of the **assets** involved, and the size of the load served by the **assets**.
- (3) **Transpower** is only required to—
- (a) make a reasonable estimate of the costs and benefits identified in subclause (1), based on information reasonably available to it at the time it undertakes the test, and taking into account the proposed number of **assets** to be removed or reconfigured, the value of the **assets** involved, and the size of the load served by the **assets**; and
  - (b) take account of events that can be reasonably foreseen.
- (4) **Transpower's** estimate of fuel costs under subclause (1) must—
- (a) in relation to thermal **generating stations**, be a reasonable estimate of the fuel costs, based on the economic value of the fuel required for the relevant thermal **generating station**, and justified by **Transpower** with reference to opinions on the economic value of the fuel, provided by 1 or more independent and suitably qualified persons; and
  - (b) in relation to hydroelectric **generating stations**—
    - (i) be a reasonable estimate of the fuel costs, based on the economic value of the water stored at a hydroelectric **generating station**, provided by a suitably qualified person other than—
      - (A) **Transpower**; or
      - (B) an employee of **Transpower**; and
    - (ii) be **published**, as provided for in the **Outage Protocol**.
- (5) The direct labour costs of **Transpower** and **designated transmission customers** under subclause (1)(a) may include any amounts paid to contractors, but must not include any apportionment of the overheads or office costs of **Transpower** or **designated transmission customers**.
- (6) The material costs of **Transpower** and **designated transmission customers** under subclause (1)(a) are the costs of the materials used in carrying out the work during the removal of the **connection asset** or the reconfiguration of the **connection assets**.
- (7) In assessing costs and benefits under subclause (1), **Transpower** must consider any reasonably expected operating conditions, forecasts in the **system security forecast**, likely fuel costs, and any other reasonable assumptions.
- (8) The estimate of **expected unserved energy** in MWh multiplied by the value per MWh of that **expected unserved energy** under subclause (1) must be based on—
- (a) the estimated amount and value of the **expected unserved energy** as agreed between **Transpower** and each affected **designated transmission customer**; or
  - (b) if **Transpower** and a **designated transmission customer** cannot agree on the amount and value of the **expected unserved energy** under paragraph (a), the **value of expected unserved energy** in clause 4 of Schedule 12.2 and **Transpower's** estimate of the **expected unserved energy** in respect of each affected **designated transmission customer** and end use customer.

Compare: Electricity Governance Rules 2003 rule 5.9 section II part F

Clause 12.43: substituted, on 16 December 2013, by clause 5 of the Electricity Industry Participation (Urgent Temporary Grid Reconfiguration) Code Amendment 2013.

Clause 12.43(8)(b): amended, on 1 February 2016, by clause 49 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 12.43(8)(b): amended, on 1 November 2018, by clause 77 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

#### **12.44 Request to the Commerce Commission to request an investment proposal be submitted**

- (1) **Transpower** may request in writing that the Commerce Commission request that **Transpower** submit an investment proposal to the Commerce Commission—
  - (a) for the purposes of clause 12.40(3); or
  - (b) if permitted by a **transmission agreement**.
- (2) Unless requested to do so by the Commerce Commission, **Transpower** must not submit an investment proposal to the Commerce Commission for approval in respect of an investment that has been proposed by **Transpower** in accordance with a **transmission agreement** or clause 12.40(3).

Compare: Electricity Governance Rules 2003 rules 5.10 section II, and 12.2.2 section III part F

#### *Resolutions of disputes*

#### **12.45 Certain disputes relating to transmission agreements may be referred to Rulings Panel**

If a dispute between **Transpower** and a **designated transmission customer** concerning—

- (a) the customer specific terms of a **transmission agreement** being negotiated between those parties; or
- (b) a requested variation of any of the terms of a **default transmission agreement** (other than a variation under clause 12.12) that applies between **Transpower** and the **designated transmission customer** in accordance with clauses 12.10 to 12.13 (including a requested variation from the services described in the **default transmission agreement**); or
- (c) the schedules proposed by **Transpower** under clauses 12.10(2)(b)(v) to (viii), or as amended by **Transpower** under clause 12.10(2)(c) or
- (d) any revision to Schedule 4 or Schedule 5 of a **default transmission agreement** proposed by **Transpower** under clause 12.12; or
- (e) the schedules proposed or amended by **Transpower** under clause 12.13 on the expiry or termination of a **transmission agreement**—

is not resolved within a reasonable time, either party may refer the matter to the **Rulings Panel** for determination.

Compare: Electricity Governance Rules 2003 rule 6.1 section II part F

Clause 12.45(b), (c), and (d): amended, on 1 October 2023, by clause 30(1) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.45(c): amended, on 1 October 2023, by clause 30(2) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.45(e): amended, on 1 October 2023, by clause 30(3) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

#### **12.46 Rulings Panel has discretion to determine dispute**

- (1) The **Rulings Panel** may, in its discretion, decide whether or not to undertake the determination of a dispute under clause 12.45(a) or (b).
- (2) If the **Rulings Panel** decides not to undertake the determination of the dispute, the

**Rulings Panel** must inform **Transpower** or the **designated transmission customer**—

- (a) that the **Rulings Panel** intends to do no more in relation to the matter; and
- (b) of the reasons for that intention.

Compare: Electricity Governance Rules 2003 rule 6.2 section II part F

#### 12.47 Determinations by Rulings Panel

- (1) In determining a dispute under this clause, the **Rulings Panel** must take into account—
  - (a) the principles for the **default transmission agreement template** in clause 12.30; and
  - (b) the desirability of consistent treatment of **designated transmission customers** except if special circumstances justify a departure; and
  - (c) the potential impact of a decision on the contents of other **transmission agreements** or existing agreements as described in clauses 12.49 and 12.50.
- (2) The **Rulings Panel** must not determine disputes relating to the interpretation or enforcement of a **transmission agreement**.
- (3) The **Rulings Panel** must give notice to the parties of its determination, as soon as reasonably practicable.

Compare: Electricity Governance Rules 2003 rules 6.3 and 6.4 section II part F

Clause 12.47(1)(c): amended, on 16 December 2013, by clause 6 of the Electricity Industry Participation (Revocation of Part 16) Code Amendment 2013.

Clause 12.47(1)(a): amended, on 1 October 2023, by clause 31(1) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.47(2): amended, on 1 October 2023, by clause 31(2) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

#### 12.48 Status of default transmission agreement while Rulings Panel determining dispute

Nothing in clauses 12.45 to 12.47 overrides the application of a **default transmission agreement** pending a determination of the **Rulings Panel**.

Compare: Electricity Governance Rules 2003 rule 6.5 section II part F

Clause 12.48: amended, on 1 October 2023, by clause 32 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

*Existing agreements not affected*

#### 12.49 Existing agreements

- (1) Except as provided for by clauses 12.50B and 12.95, this Part does not apply to or affect the rights, powers or obligations of a **participant** or **Transpower** under a written agreement entered into between that **participant** and **Transpower** for connection to and/or use of the **grid** that is—
  - (a) entered into before 29 October 2003; or
  - (b) based on **Transpower's** standard connection contract and entered into before 28 June 2007.
- (2) The exceptions from this Part in subclause (1) do not apply to a right, power or obligation of a **participant** that arises because of the variation of an agreement described in subclause (1).
- (3) To avoid doubt, the posted terms and conditions of **Transpower** do not constitute a written agreement.

Compare: Electricity Governance Rules 2003 rule 8.1 section II part F

Clause 12.49(1): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 12.49(1): amended, on 5 October 2017, by clause 299 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.49(1): amended, on 1 October 2023, by clause 33(1) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

Clause 12.49(2): amended, on 1 October 2023, by clause 33(2) of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

### **12.50 Copies of other agreements to be provided to Authority**

If requested to do so by the **Authority**, **Transpower** or a **participant** must provide a copy of any written agreement for connection to and/or use of the grid that **Transpower** or the **participant** is a party to and that was entered into before 28 June 2007, including any amendments.

Compare: Electricity Governance Rules 2003 rule 8.2 section II part F

Clause 12.50(1): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 12.50(1): amended, on 5 October 2017, by clause 300 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.50: amended, on 1 October 2023, by clause 34 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

#### **12.50A Amending default transmission agreement template**

- (1) An amendment of the **default transmission agreement template** must have regard to the purpose, principles, and content of the **default transmission agreement template** in clause 12.29 to 12.31.
- (2) An amendment of the **Connection Code** must be carried out in accordance with clause 12.18.
- (3) For the purpose of this clause and clause 12.50B an amendment of the **default transmission agreement template** includes a replacement of the agreement.

Clause 12.50A: inserted, on 1 October 2023, by clause 35 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

#### **12.50B Effect of amendment of default transmission agreement template on existing agreements**

- (1) This clause applies when the **Authority** amends the **default transmission agreement template**.
- (2) Subject to subclause (3), all **transmission agreements** and agreements referred to in clause 12.49(1) are deemed to be amended to the extent necessary to make them consistent with an amendment to the **default transmission agreement template**, from the date of the amendment.
- (3) Subclause (2) applies except where an amendment to the **default transmission agreement template** provides otherwise.

Clause 12.50B: inserted, on 1 October 2023, by clause 35 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023.

#### **12.50C Effect of first default transmission agreement template**

Despite anything else in this Code, agreements referred to in clause 12.49(1) are deemed to be amended in respect of the first **default transmission agreement template** inserted into this Code, only to the extent necessary to make them consistent with Part D of that template.

Clause 12.50C: inserted, on 1 October 2023, by clause 35 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023

### 12.51 Application to Rio Tinto agreements *[Revoked]*

Compare: Electricity Governance Rules 2003 rule 8.3 section II part F

Clause 12.51: revoked, on 16 December 2013, by clause 7 of the Electricity Industry Participation (Revocation of Part 16) Code Amendment 2013.

## Subpart 3— Grid reliability and industry information

### 12.52 Contents of this subpart

This subpart relates to—

- (a) **grid reliability standards**; and
- (b) **investment contracts**; and
- (c) *[Revoked]*
- (d) **grid reliability reporting**.

Compare: Electricity Governance Rules 2003 rule 1 section III part F

Clause 12.52(c): revoked, on 1 February 2016, by clause 50 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

### 12.53 Purpose of the reliability and industry information clauses

The purposes of this subpart are to—

- (a) facilitate **Transpower's** ability to develop and implement long term plans (including timely securing of land access and resource consents) for investment in the **grid**; and
- (b) assist **participants** to identify and evaluate investments in **transmission alternatives**; and
- (c) facilitate efficient investment in generation; and
- (d) facilitate any processes pursuant to Part 4 of the Commerce Act 1986.

Compare: Electricity Governance Rules 2003 rule 2 section III part F

### 12.54 Obligations to provide information

- (1) Each **participant** must provide information reasonably required by the **Authority** for the purposes of this subpart and respond to requests from the **Authority** under this subpart promptly and accurately.
- (2) Each **participant** must use reasonable endeavours to provide accurate information.
- (3) The **Authority** is not liable for the accuracy of information provided by a **participant**.
- (4) Subject to the Official Information Act 1982, the **Authority** may at its discretion, or on the application of an affected party, withhold **publication** of confidential aspects of the information provided by a **participant** to the **Authority** if the **Authority** reasonably considers that there is good reason for withholding it.

Compare: Electricity Governance Rules 2003 rule 3 section III part F

### *Grid reliability standards*

### 12.55 Authority determines grid reliability standards

- (1) The **Authority** must determine the most appropriate **grid reliability standards**.

- (2) The **Authority** must consider and determine **grid reliability standards**, having regard to the purposes set out in clause 12.56 and the principles set out in clause 12.57.
- (3) The **grid reliability standards** that apply at the commencement of this Code are the **grid reliability standards** in Schedule 12.2.

Compare: Electricity Governance Rules 2003 rule 4.1 section III part F

### 12.56 Purpose of grid reliability standards

The purpose of the **grid reliability standards** is to provide a basis for **Transpower** and other parties to appraise opportunities for transmission investments and **transmission alternatives**.

Compare: Electricity Governance Rules 2003 rule 4.2 section III part F

### 12.57 Principles of grid reliability standards

The **grid reliability standards** should—

- (a) take into account that transmission investments are long-lived assets and require a long-term planning perspective; and
- (b) reflect the public interest in reasonable stability in planning, having regard to the long term nature of investment in transmission assets; and
- (c) be consistent with **good electricity industry practice**; and
- (d) provide flexibility to allow the form of the standards to evolve over time, reflecting any changes in **good electricity industry practice**.

Compare: Electricity Governance Rules 2003 rule 4.3 section III part F

### 12.58 Content of grid reliability standards

- (1) The **grid reliability standards** must contain 1 or more standards for reliability of the **grid**, which may include without limitation a primary reliability standard and other reliability standards.
- (2) The reliability standards set out in the **grid reliability standards** may differ to reflect differing circumstances in different regions supplied by the **grid**.
- (3) The **grid reliability standards** may include 1 or more standards for reliability of the **core grid**.
- (4) The **grid reliability standards** may contain supporting information, such as information summarising economic assessments balancing different levels of reliability and the expected value of energy at risk.

Compare: Electricity Governance Rules 2003 rule 4.4 section III part F

### *Review of grid reliability standards*

### 12.59 Interested parties may request review of grid reliability standards

- (1) 1 or more interested parties may request a review by the **Authority** of the **grid reliability standards**. The request must be in the form of a written submission to the **Authority** describing—
  - (a) the nature of the interest of each party seeking the review; and
  - (b) how the review might enable the **grid reliability standards** to better reflect the purpose and principles set out in clauses 12.56 and 12.57

- (2) In addition to receiving written submissions, the **Authority** may elect to hear 1 or more oral submissions.
- (3) The **Authority** must either undertake a review of the **grid reliability standards**, or decline to review the **grid reliability standards** and **publish** reasons for declining.

Compare: Electricity Governance Rules 2003 rule 5.1 section III part F

### 12.60 Authority review of grid reliability standards

The **Authority** may initiate a review of the **grid reliability standards** for any reason consistent with the main objective of the **Authority** in section 15 of the **Act** and the purpose and principles set out in clauses 12.56 and 12.57.

Compare: Electricity Governance Rules 2003 rule 5.2 section III part F

Clause 12.60: amended, on 1 March 2024, by clause 57 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024

### 12.61 Authority must publish draft grid reliability standards

- (1) This clause applies if the **Authority** undertakes a review of the **grid reliability standards** under clauses 12.59 or 12.60.
- (2) The **Authority** must **publish** draft **grid reliability standards**.
- (3) At the time the **Authority** publishes the draft **grid reliability standards** the **Authority** must **publish** the date by which submissions on the draft **grid reliability standards** are to be received by the **Authority**. The date must be no earlier than 15 **business days** from the date of **publication** of the draft **grid reliability standards**.
- (4) Each submission on the draft **grid reliability standards** must be made in writing to the **Authority** and be received on or before the **submission expiry date**. In addition to receiving written submissions, the **Authority** may elect to hear 1 or more oral submissions.

Compare: Electricity Governance Rules 2003 rules 4.5 and 4.6 section III part F

Clause 12.61(3): amended, on 5 October 2017, by clause 301 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 12.62 Decision on grid reliability standards

Within 20 **business days** of the **submission expiry date** (or such longer period as the **Authority** may allow), the **Authority** must complete its consideration of all submissions it receives on the draft **grid reliability standards** and consider whether to include the **grid reliability standards** as a schedule to this Part, in accordance with the **Act**.

Compare: Electricity Governance Rules 2003 rule 4.7 section III part F

### *Core grid determination*

### 12.63 Authority determines core grid determination

- (1) The **Authority** must determine the most appropriate **core grid determination**.
- (2) The **core grid** specified in the **core grid determination** must include—
  - (a) at a minimum, those **assets** that comprise the main elements of the **grid**; and
  - (b) at most, all **assets** that form part of the **grid** and operate at nominal voltages of 66kV and above.
- (3) In determining the most appropriate **core grid determination**, and in a subsequent

review of the **core grid determination**, the **Authority** must have regard to—

- (a) the purposes set out in clause 12.64; and
  - (b) the principles set out in clause 12.57 for the **grid reliability standards**; and
  - (c) the objectives set out in clause 12.65.
- (4) In determining the most appropriate **core grid determination**, the **Authority** may engage **Transpower** or any other person to assist in the preparation of all or part of the **core grid determination**.
- (5) The **core grid determination** that applies at the commencement of this Code is the **core grid determination** in Schedule 12.3.

Compare: Electricity Governance Rules 2003 rule 5A.1 section III part F

### 12.64 Purpose of core grid determination

The purpose of the **core grid determination** is to provide a basis for—

- (a) the **Authority** to determine the **grid reliability standards**; and
- (b) **Transpower** and other parties to appraise opportunities for transmission investment and **transmission alternatives**.

Compare: Electricity Governance Rules 2003 rule 5A.2 section III part F

### 12.65 Objectives of core grid determination

The **Authority** must have regard to the following objectives in determining, and in any subsequent review of, the **core grid determination**:

- (a) avoiding the failure or removal from service of any **asset** forming part of the **core grid**, if the failure or removal from service of that **asset** may result in cascade failure;
- (b) providing flexibility to allow the **core grid** to evolve over time, reflecting any changes in the **grid**;
- (c) reflecting the public interest in reasonable stability in planning for transmission.

Compare: Electricity Governance Rules 2003 rule 5A.3 section III part F

### *Review of core grid determination*

### 12.66 Interested parties may request review of core grid determination

- (1) 1 or more interested parties may request a review by the **Authority** of the **core grid determination**. The request must be in the form of a written submission to the **Authority** describing—
- (a) the nature of the interest of each party seeking the review; and
  - (b) how the review might enable the **core grid determination** to better reflect the purpose and objectives set out in clauses 12.64 and 12.65 respectively.
- (2) In addition to receiving written submissions, the **Authority** may elect to hear 1 or more oral submissions.
- (3) The **Authority** must either undertake a review of the **core grid determination**, or decline to review the **core grid determination** and **publish** reasons for declining.

Compare: Electricity Governance Rules 2003 rule 5B.1 section III part F

### 12.67 Authority review of grid determination

The **Authority** may initiate a review of the **core grid determination** for any reason consistent with the main objective of the **Authority** in section 15 of the **Act** and the purpose and objectives set out in clauses 12.64 and 12.65 respectively.

Compare: Electricity Governance Rules 2003 rule 5B.2 section III part F

Clause 12.67: amended, on 1 March 2024, by clause 58 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

### 12.68 Authority must publish draft core grid determination

- (1) This clause applies if the **Authority** undertakes a review of the **core grid determination** in accordance with clauses 12.66 or 12.67.
- (2) The **Authority** must **publish** a draft **core grid determination**.
- (3) When the **Authority publishes** the draft **core grid determination** the **Authority** must **publish** the date by which submissions on the draft **core grid determination** are to be received by the **Authority**. The date must be no earlier than 15 **business days** from the date of publication of the draft **core grid determination**.
- (4) Each submission on the draft **core grid determination** must be made in writing to the **Authority** and be received on or before the **submission expiry date**. In addition to receiving written submissions, the **Authority** may elect to hear 1 or more oral submissions.

Compare: Electricity Governance Rules 2003 rules 5A.4 and 5A.5 section III part F

Clause 12.68(3): amended, on 5 October 2017, by clause 302 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 12.69 Decision on core grid determination

Within 20 **business days** of the **submission expiry date** (or such longer period as the **Authority** may allow), the **Authority** must complete its consideration of all submissions it receives on the draft **core grid determination** and consider whether to include the **core grid determination** in a schedule to this Part.

Compare: Electricity Governance Rules 2003 rule 5A.6 section III part F

## *Investment contracts*

### 12.70 Purpose

Clause 12.71 provides for **investment contracts** to be agreed between **designated transmission customers** and **Transpower**, and establishes a process to manage any potential implications for **grid reliability standards**.

Compare: Electricity Governance Rules 2003 rule 8.1 section III part F

### 12.71 Investment contracts

**Transpower** may enter into an **investment contract** with implications for **grid reliability standards** only if—

- (a) the **investment contract** is consistent with the **grid reliability standards** or the proposed investment has been approved by the **Authority** under clause 12.36(2), and clause 12.36(2) will apply as if the **investment contract** was a **transmission**

**agreement; and**

(b) **Transpower** advises the **Authority** of the proposed **investment contract**.

Compare: Electricity Governance Rules 2003 rule 8.2 section III part F

Clause 12.71(b): amended, on 1 November 2018, by clause 78 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

#### *Centralised data set [Revoked]*

Cross Heading: revoked, on 1 February 2016, by clause 51(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

#### **12.72 Authority to establish and maintain centralised data set [Revoked]**

Compare: Electricity Governance Rules 2003 rule 11.1 section III part F

Clause 12.72: revoked, on 1 February 2016, by clause 51(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

#### **12.73 Purpose of centralised data set [Revoked]**

Compare: Electricity Governance Rules 2003 rule 11.2 section III part F

Clause 12.73: revoked, on 1 February 2016, by clause 51(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

#### **12.74 Contents of centralised data set [Revoked]**

Compare: Electricity Governance Rules 2003 rule 11.3 section III part F

Clause 12.74: revoked, on 1 February 2016, by clause 51(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

#### **12.75 Public access to centralised data set [Revoked]**

Compare: Electricity Governance Rules 2003 rule 11.4 section III part F

Clause 12.75: revoked, on 1 February 2016, by clause 51(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

#### *Grid reliability reporting*

#### **12.76 Transpower to publish grid reliability report**

- (1) **Transpower** must **publish a grid reliability report** setting out—
  - (a) a forecast of **demand** at each **grid exit point** over the next 10 years; and
  - (b) a forecast of **supply** at each **grid injection point** over the next 10 years; and
  - (c) whether the power system is reasonably expected to meet the **N-1 criterion**, including in particular whether the power system would be in a **secure state** at each **grid exit point**, at all times over the next 10 years; and
  - (d) proposals for addressing any matters identified in accordance with paragraph (c).
- (2) **Transpower** must **publish a grid reliability report** no later than 2 years after the date on which it **published** the previous **grid reliability report**, or such other date as determined by the **Authority** (having consulted with **Transpower**).
- (3) If there is a material change in the forecast **demand** at a **grid exit point** or in the forecast **supply** at a **grid injection point** in the period to which the most recent **grid reliability report** relates, **Transpower** must **publish** a revised **grid reliability report** as soon as reasonably practicable after the material change.

Compare: Electricity Governance Rules 2003 rule 12A section III part F

Clause 12.76(2): amended, on 21 September 2012, by clause 17 of the Electricity Industry Participation (Minor Amendments) Code Amendment 2012.

Clause 12.76(1): amended, on 5 October 2017, by clause 303 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## Subpart 4—Transmission pricing methodology

### 12.77 Recovery of investment costs by Transpower

The costs incurred by **Transpower** (irrespective of when they are incurred) in relation to an **approved investment** are recoverable by **Transpower** from **designated transmission customers** on the basis of the **transmission pricing methodology** and must be paid by **designated transmission customers** accordingly.

Compare: Electricity Governance Rules 2003 rule 17.1 section III part F

### 12.78 Purpose for establishing transmission pricing methodology

The purpose of the **transmission pricing methodology** is to ensure that, subject to Part 4 of the Commerce Act 1986, the full economic costs of **Transpower's** services are allocated in accordance with the **Authority's** main objective in section 15 of the **Act**.

Compare: Electricity Governance Rules 2003 rule 1 section IV part F

Clause 12.78: amended, on 1 June 2011, by clause 4 of the Electricity Industry Participation (Transmission Pricing) Code Amendment 2011.

Clause 12.78: amended, on 1 March 2024, by clause 59 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

### 12.79 Main statutory objective

**Transpower**, in developing the **transmission pricing methodology**, and the **Authority**, in approving the **transmission pricing methodology**, must assess the **transmission pricing methodology** against the **Authority's** main objective in section 15 of the **Act**.

Compare: Electricity Governance Rules 2003 rule 2 section IV part F

Clause 12.79: substituted, on 1 June 2011, by clause 5 of the Electricity Industry Participation (Transmission Pricing) Code Amendment 2011.

Clause 12.79: Heading: amended, on 1 March 2024, by clause 60(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

Clause 12.79: amended, on 1 March 2024, by clause 60(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

### 12.80 Application and interpretation of pricing principles *[Revoked]*

Compare: Electricity Governance Rules 2003 rule 3 section IV part F

Clause 12.80: revoked, on 1 June 2011, by clause 6 of the Electricity Industry Participation (Transmission Pricing) Code Amendment 2011.

### 12.81 Authority must prepare an issues paper

- (1) The **Authority** must prepare an issues paper on—
  - (a) the process for development and approval of the **transmission pricing methodology**; and
  - (b) the guidelines to be followed by **Transpower** in preparing a methodology for allocating **Transpower's** revenues to **designated transmission customers**.
- (2) The process and guidelines must be developed in accordance with the **Authority's** main objective in section 15 of the **Act**.

Compare: Electricity Governance Rules 2003 rule 4 section IV part F

Clause 12.81: substituted, on 1 June 2011, by clause 7 of the Electricity Industry Participation (Transmission Pricing) Code Amendment 2011.

Clause 12.81(2): amended, on 1 March 2024, by clause 61 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

### 12.82 Authority must consult on issues paper

- (1) When the **Authority publishes** the issues paper, the **Authority** must **publish** of the date by which submissions are to be received by the **Authority**. The date must be no earlier than 15 **business days** from the date of **publication** of the issues paper.
- (2) Each submission on the issues paper must be made in writing to the **Authority** and received on or before the **submission expiry date**. In addition to receiving written submissions, the **Authority** may elect to hear one or more oral submissions.
- (3) Within 20 **business days** of the **submission expiry date** (or such longer period as the **Authority** may allow), the **Authority** must complete its consideration of all submissions it receives on the issues paper.

Compare: Electricity Governance Rules 2003 rule 5 section IV part F

Clause 12.82(1): amended, on 5 October 2017, by clause 304 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 12.83 Authority must publish process and guidelines for development of transmission pricing methodology

After consideration of submissions in clause 12.82(3), the **Authority** must, as soon as reasonably practicable, **publish**—

- (a) the process for the development of the **transmission pricing methodology**; and
- (b) any guidelines that **Transpower** must follow in developing the **transmission pricing methodology**.

Compare: Electricity Governance Rules 2003 rule 6 section IV part F

Clause 12.83: heading amended, on 1 June 2011, by clause 8(1) of the Electricity Industry Participation (Transmission Pricing) Code Amendment 2011.

Clause 12.83(b): amended, on 1 June 2011, by clause 8(2) of the Electricity Industry Participation (Transmission Pricing) Code Amendment 2011.

#### *Development of transmission pricing methodology by Transpower*

### 12.84 Transmission pricing methodology

The **transmission pricing methodology** that applies at the commencement of this Code is the **transmission pricing methodology** in Schedule 12.4.

Clause 12.83(b): amended, on 1 June 2011, by clause 8(2) of the Electricity Industry Participation (Transmission Pricing) Code Amendment 2011.

Clause 12.84 heading: amended, on 20 December 2021, by clause 49 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

#### *Review of an approved transmission pricing methodology*

Heading: amended, on 1 June 2011, by clause 9 of the Electricity Industry Participation (Transmission Pricing) Code Amendment 2011.

### 12.85 Review by Transpower

At any time, **Transpower** may submit to the **Authority** a proposed variation of its **transmission pricing methodology**, provided that the submission is made at least 12 months after the last **Authority** approval of the **transmission pricing methodology**.

Compare: Electricity Governance Rules 2003 rule 11.1 section IV part F

### 12.86 Review by Authority

The **Authority** may review an approved **transmission pricing methodology** if it considers that there has been a material change in circumstances.

Compare: Electricity Governance Rules 2003 rule 11.2 section IV part F

Clause 12.86 heading: amended, on 20 December 2021, by clause 50 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

### 12.87 Process for review

A review of the **transmission pricing methodology** must take into account the requirements of clauses 12.79 and 12.89(1). The **Authority** must follow the processes outlined in clauses 12.91 to 12.94 when reviewing a **transmission pricing methodology**.

Compare: Electricity Governance Rules 2003 rule 11.3 section IV part F

### 12.88 Transpower to submit methodology

- (1) **Transpower** must submit a proposed **transmission pricing methodology** to the **Authority** within 90 days (or such longer period as the **Authority** may allow) of receipt of a written request from the **Authority**.
- (2) The **Authority** may, after **publishing** the process described in clause 12.83(a) and the guidelines described in clause 12.83(b), issue such a request.

Compare: Electricity Governance Rules 2003 rule 7.1 section IV part F

### 12.89 Form of proposed transmission pricing methodology

- (1) **Transpower** must develop its proposed **transmission pricing methodology** consistent with—
  - (a) any determination made under Part 4 of the Commerce Act 1986; and
  - (b) the **Authority's** main objective in section 15 of the **Act**; and
  - (c) any guidelines **published** under clause 12.83(b).
- (2) **Transpower's** proposed **transmission pricing methodology** must include indicative prices to allow the **Authority** and interested parties to understand the impact of the methodology on **designated transmission customers**.

Compare: Electricity Governance Rules 2003 rule 7.2 section IV part F

Clause 12.89 (1)(b): substituted, on 1 June 2011, by clause 10 of the Electricity Industry Participation (Transmission Pricing) Code Amendment 2011.

Clause 12.89(1)(b): amended, on 1 March 2024, by clause 62 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024..

### 12.90 Authority may decline to consider proposed transmission pricing methodology

- (1) The **Authority** may decline to consider the proposed **Transpower transmission pricing methodology** if, in the **Authority's** view, **Transpower** has not provided sufficient information for the **Authority** to make an informed assessment of the matters referred to in clauses 12.91 to 12.94.
- (2) If the **Authority** so declines, the **Authority** must advise **Transpower** of the extra information required, and **Transpower** must provide a revised **transmission pricing methodology** by a date specified by the **Authority**.

Compare: Electricity Governance Rules 2003 rule 7.3 section IV part F

*Process for determination of transmission pricing methodology*

**12.91 Authority may approve proposed transmission pricing methodology or refer back to Transpower**

- (1) After consideration of **Transpower's** proposed **transmission pricing methodology**, the **Authority** may either—
  - (a) approve the proposed **transmission pricing methodology** having regard to the requirements of clause 12.89(1); or
  - (b) refer the proposed **transmission pricing methodology** back to **Transpower** if in the **Authority's** view the proposed **transmission pricing methodology** does not adequately conform to the requirements of clause 12.89(1) and **Transpower** will have 20 **business days** to consider the **Authority's** concerns and to resubmit its proposed **transmission pricing methodology** for consideration by the **Authority**.
- (2) If the **Authority** considers that the **transmission pricing methodology** resubmitted by **Transpower** under subclause (1)(b) does not conform to the requirements of clause 12.89(1), the **Authority** may make any amendments it considers necessary to ensure that the proposed **transmission pricing methodology** adequately conforms to the requirements of clause 12.89(1).

Compare: Electricity Governance Rules 2003 rule 8.1 section IV part F

**12.92 Authority must publish proposed transmission pricing methodology**

- (1) The **Authority** must **publish** the proposed **transmission pricing methodology** as soon as practicable.
- (2) At the time the **Authority publishes** the proposed **transmission pricing methodology** the **Authority** must **publish** the date by which submissions are to be received by the **Authority**. The date must be no earlier than 15 **business days** from the date of **publication** of the proposed **transmission pricing methodology**.
- (3) Each submission on the proposed **transmission pricing methodology** must be made in writing to the **Authority** and received on or before the **submission expiry date**. In addition to receiving written submissions, the **Authority** may elect to hear 1 or more oral submissions.

Compare: Electricity Governance Rules 2003 rules 8.2 and 8.3 section IV part F

Clause 12.92(2): amended, on 5 October 2017, by clause 305 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

**12.93 Decision on transmission pricing methodology**

Within 40 **business days** of the **submission expiry date** (or such longer period as the **Authority** may allow), the **Authority** must complete its consideration of all submissions it receives on a proposed **transmission pricing methodology** and consider whether to include the **transmission pricing methodology** in a schedule to this Part and, if so, the date that the **transmission pricing methodology** will take effect.

Compare: Electricity Governance Rules 2003 rule 8.4 section IV part F

**12.94 Authority to determine commencement date**

In determining a date on which the **transmission pricing methodology** must take

effect, the **Authority** must consult with **Transpower**.

Compare: Electricity Governance Rules 2003 rule 8.5 section IV part F

*Amending the transmission pricing methodology*

Cross Heading: inserted, on 25 July 2022, by clause 4 of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Related Amendments) 2022.

**12.94A Amending the transmission pricing methodology**

- (1) Despite anything else in this Code, the **Authority** may amend the **transmission pricing methodology** under section 38 of the **Act** if—
  - (a) the **Authority** complies with section 39(1) of the **Act**; or
  - (b) the **Authority** is satisfied on reasonable grounds regarding any of the matters in section 39(3)(a), (b) or (c) of the **Act** (in which case sections 39(1)(b) and (c) of the **Act** will not apply to the amendment); or
  - (cc) section 40 of the **Act** applies (in which case section 39(1) of the **Act** will not apply to the amendment).
- (2) When consultation is required on an amendment to the **transmission pricing methodology** under subsection (1), the **Authority** must include an explanation of whether it considers the amendment to be consistent with the intent of the most recent guidelines **published** under clause 12.83(b), and if it does not consider the amendment to be consistent, the reasons why the **Authority** considers the amendment to nevertheless be consistent with section 32(1) of the **Act**.

Clause 12.94A: inserted, on 25 July 2022, by clause 4 of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Related Amendments) 2022.

Clause 12.94A: replaced, on 17 June 2024, by clause 4 of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Related Amendments) 2024.

*Application of approved transmission pricing methodology*

**12.95 Charges to comply with transmission pricing methodology**

**Transpower** must charge for those transmission services affected only in accordance with the **transmission pricing methodology**.

Compare: Electricity Governance Rules 2003 rule 9.1 section IV part F

Clause 12.95(1): amended, on 16 December 2013, by clause 8(1) of the Electricity Industry Participation (Revocation of Part 16) Code Amendment 2013.

Clause 12.95(2): revoked, on 16 December 2013, by clause 8(2) of the Electricity Industry Participation (Revocation of Part 16) Code Amendment 2013.

Clause 12.95: replaced, on 1 April 2023, by clause 5 of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Related Amendments) (No 2) 2022.

**12.96 Development of transmission prices**

After approval of the **transmission pricing methodology**, **Transpower** must—

- (a) develop and **publish** transmission prices consistent with the **transmission pricing methodology** based on its total revenue requirement for connection to or use of the **grid**; and
- (b) demonstrate to the **Authority** that the prices are consistent with the **transmission pricing methodology**.

Compare: Electricity Governance Rules 2003 rule 9.2 section IV part F

Clause 12.96(a): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Clause 12.96(a): amended, on 5 October 2017, by clause 306 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### *Audit of transmission prices*

#### **12.97 Audit of transmission prices**

- (1) The **Authority** may appoint an **auditor** to confirm whether **Transpower's** transmission prices have been calculated in accordance with the **transmission pricing methodology**.
- (2) **Transpower** must ensure that the **auditor's** report includes the **auditor's** view on whether the application of the **transmission pricing methodology** by **Transpower** contains errors or inconsistencies that may have a material impact on the prices of any individual **designated transmission customers**, or **designated transmission customers** in general.
- (3) **Transpower** must provide the **auditor** with all relevant information required by the **auditor** to complete its review.

Compare: Electricity Governance Rules 2003 rule 9.3 section IV part F

Clause 12.97(2): amended, on 1 February 2016, by clause 52 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

#### **12.98 Transpower may respond to auditor's report**

**Transpower** must ensure that the **auditor's** report includes any comments that **Transpower** provided to the **auditor** within 15 **business days** of **Transpower** receiving a draft of the report.

Compare: Electricity Governance Rules 2003 rule 9.4 section IV part F

Clause 12.98: substituted, on 1 February 2016, by clause 53 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

#### **12.99 Final auditor report to the Authority**

- (1) **Transpower** must ensure that, within 10 **business days** after the **auditor** receives **Transpower's** response under clause 12.98, the **auditor** provides a report to the **Authority** certifying that either—
  - (a) **Transpower** had applied correctly the approved **transmission pricing methodology**; or
  - (b) material errors remained in **Transpower's** application of the **transmission pricing methodology**.
- (2) Within 5 **business days** of receiving the report, the **Authority** must **publish** the **auditor's** report.

Compare: Electricity Governance Rules 2003 rules 9.5 and 9.6 section IV part F

Clause 12.99(1): amended, on 1 February 2016, by clause 54 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

#### **12.100 Transpower to redetermine transmission prices**

If the **auditor** concludes that there are material errors in **Transpower's** application of the **transmission pricing methodology**, **Transpower** must recalculate and **publish** revised transmission prices to correct identified errors.

Compare: Electricity Governance Rules 2003 rule 9.7 section IV part F

### 12.101 Auditor's costs

**Transpower** must meet the actual and reasonable expenses of the **auditor**.

Compare: Electricity Governance Rules 2003 rule 9.8 section IV part F

### 12.102 Enforcement of transmission charges

- (1) The approved **transmission pricing methodology** must be incorporated in **transmission agreements** between **Transpower** and **designated transmission customers**.
- (2) The amount payable by a **designated transmission customer** under a **transmission agreement** under subclause (1)—
  - (a) is recoverable in any court of competent jurisdiction as a debt due to **Transpower**; and
  - (b) may be challenged in any proceedings to recover the debt on the ground that **Transpower** has incorrectly applied the **transmission pricing methodology** in a manner that is adverse to the **designated transmission customer** but the **transmission pricing methodology** itself may not be challenged.

Compare: Electricity Governance Rules 2003 rule 10 section IV part F

#### *Information for calculating transmission charges*

Cross Heading: inserted, on 25 July 2022, by clause 5 of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Related Amendments) 2022.

### 12.102A Information held by system operator may be used to calculate charges

- (1) The **system operator** may provide to **Transpower** any information the **system operator** holds that the **system operator** or **Transpower** considers **Transpower** reasonably needs to calculate charges under the **transmission pricing methodology**.
- (2) **Transpower** may use any information provided to it by the **system operator** under this clause to calculate charges under the **transmission pricing methodology**. **Transpower** must not use the information for any other purpose except—
  - (a) as provided for in this Code; or
  - (b) as required by law; or
  - (c) if the information is or becomes publicly available; or
  - (d) if the information is or has been provided to **Transpower** other than under this clause and without restriction as to **Transpower's** use of it for the other purpose; or
  - (e) otherwise as may be agreed with the **participant** or other person who is the subject of the information.

Clause 12.102A: inserted, on 25 July 2022, by clause 5 of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Related Amendments) 2022.

### 12.102B Information about embedded electricity

- (1) In this clause, “AMDR”, “capacity”, “consuming plant”, “difference cap”, “embedded electricity”, and “generating plant” have the meanings given to those terms in the **transmission pricing methodology**.

- (2) This clause applies where the **Authority** or **Transpower** reasonably considers a **participant** owns generating plant with a total capacity of 10 MW or more directly or indirectly connected to the same **point of connection** in respect of which **Transpower** holds insufficient information to calculate embedded electricity under the **transmission pricing methodology**.
- (3) If subclause (2) applies, the **Authority** or **Transpower** may request that the **participant** provide the information specified in subclause (5) to **Transpower** in a format reasonably requested by the **Authority** or **Transpower**.
- (4) The **Authority** or **Transpower** (as applicable) must withdraw a request made under subclause (3) if the **participant** satisfies the **Authority** or **Transpower** (as applicable) within 10 **business days** (or such longer period as provided for by the **Authority** or **Transpower**) of the request that—
  - (a) the **participant** does not own the generating plant referred to in subclause (2); or
  - (b) the generating plant does not have a total capacity of 10 MW or more directly or indirectly connected to the same **point of connection**; or
  - (c) the total capacity of any consuming plant supplied or potentially supplied by the generating plant, without that **electricity** first flowing through a **point of connection**, is 1 MW or less.
- (5) The information referred to in subclause (3) is any information about the **electricity** generated by the **participant's** generating plant referred to in subclause (2) (whether **metered** or estimated) for any **trading period** or **trading periods** specified by the **Authority** or **Transpower** from (and including) **trading period 1** on 1 July 2014 to (and including) **trading period 48** on the day immediately before the date of the request under subclause (3).
- (6) **Transpower** may use any information provided to it by a **participant** under this clause to calculate charges under the **transmission pricing methodology**. **Transpower** must not use the information for any other purpose except—
  - (a) as provided for in this Code; or
  - (b) as required by law; or
  - (c) if the information is or becomes publicly available; or
  - (d) if the information is or has been provided to **Transpower** other than under this clause and without restriction as to **Transpower's** use of it for the other purpose; or
  - (e) otherwise as may be agreed with the **participant**.
- (7) Subject to subclause (9), if—
  - (a) a **participant** does not provide to **Transpower** any or all of the information requested by the **Authority** or **Transpower** under subclause (5) within 20 **business days** (or such longer period as provided for by the **Authority** or **Transpower**) of the date of the request under subclause (3); or
  - (b) any or all of the information provided is not provided in the requested format or another format **Transpower** can reasonably use for calculating charges under the **transmission pricing methodology**; or
  - (c) **Transpower** reasonably considers any or all of the information provided

is not sufficiently reliable for calculating charges under the **transmission pricing methodology**,

**Transpower** must use the values specified in subclause (8) to calculate charges under the **transmission pricing methodology** in place of the information that is not provided, is not in the requested format or another format **Transpower** can reasonably use, or is not sufficiently reliable.

- (8) The values referred to in subclause (7) are, for calculating the relevant **designated transmission customer's** AMDR and difference cap under the **transmission pricing methodology**, a value or values of **electricity** generated by the generating plant calculated as if it were operating at its capacity.
- (9) Subclause (7) is subject to any requirement on **Transpower** in this Code to use information from a specific source to calculate charges under the **transmission pricing methodology**.

Clause 12.102B: inserted, on 25 July 2022, by clause 5 of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Related Amendments) 2022.

#### 12.102C Authority may provide information

Subject to any applicable law including any other provision of this Code, the **Authority** may provide to **Transpower** any information it holds for the purpose of enabling **Transpower** to calculate transmission charges. The **Authority** may provide the information subject to any conditions the **Authority** considers appropriate.

Clause 12.102C: inserted, on 17 June 2024, by clause 5 of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Related Amendments) 2024.

### Subpart 5—Financial transmission rights *[Revoked]*

Subpart 5: revoked, on 1 October 2011, by clause 6 of the Electricity Industry Participation (Financial Transmission Rights) Code Amendment 2011.

#### 12.103 Contents of this subpart *[Revoked]*

Compare: Electricity Governance Rules 2003 rule 1 section V part F

Clause 12.103: revoked, on 1 October 2011, by clause 6 of the Electricity Industry Participation (Financial Transmission Rights) Code Amendment 2011.

#### 12.104 Design *[Revoked]*

Compare: Electricity Governance Rules 2003 rule 2 section V part F

Clause 12.104: revoked, on 1 October 2011, by clause 6 of the Electricity Industry Participation (Financial Transmission Rights) Code Amendment 2011.

### Subpart 6—Interconnection asset services

#### 12.105 Purpose of this subpart

The purpose of this subpart is to—

- (a) create incentives on **Transpower**, through enforceable service measures, to provide **interconnection assets** at the capacity ratings required by **designated transmission customers** and other **grid** users; and
- (b) ensure that **Transpower** provides information on the capacity of **interconnection assets**, and their reliability and availability, to enable **grid** users to monitor the capacity and performance of **interconnection assets**; and
- (c) establish processes for the identification of investments in the **grid**, and

alternatives to such investments, to ensure efficient decision-making on the use of and upgrades to the **grid**; and

- (d) specify the circumstances in which **Transpower** may permanently or temporarily remove **interconnection assets** from service or reconfigure the **grid**.

Compare: Electricity Governance Rules 2003 rule 1 section VI part F

Clause 12.105(d): amended, from 2 March 2012 to 3 December 2012, by clause 4 of the Electricity Industry Participation (Temporary Grid Reconfiguration) Code Amendment 2012.

Clause 12.105(d): amended, from 15 March 2013 to 15 December 2013, by clause 4 of the Electricity Industry Participation (Temporary Grid Reconfiguration) Code Amendment 2013.

Clause 12.105(d): amended, 16 December 2013, by clause 6 of the Electricity Industry Participation (Urgent Temporary Grid Reconfiguration) Code Amendment 2013.

### 12.106 Interconnection asset capacity and grid configuration

- (1) The interconnection asset capacity and grid configuration set out in schedule F6 of section VI of part F of the **rules** immediately before this Code came into force, continues in force and is deemed to be the interconnection asset capacity and grid configuration that applies at the commencement of this Code.
- (2) Clause 12.110 applies to the interconnection asset capacity and grid configuration.

### 12.107 Transpower to identify interconnection branches, and propose service measures and levels

- (1) **Transpower** must provide the **Authority** with the information set out in subclause (4) and a diagram showing the configuration of the **grid**, other than **connection assets**.
- (2) **Transpower** must provide the information and diagram referred to in subclause (1) to the **Authority** in the form specified by the **Authority**.
- (3) The interconnection asset capacity and grid configuration referred to in subclause (1) must be provided within 3 months of the date on which the **Authority**, in accordance with subclause (2), sets the form in which the interconnection asset capacity and grid configuration must be provided.
- (4) The information required under subclause (1) is—
- (a) for each **interconnection circuit branch**, the following service measures and service levels:
- (i) the overall continuous capacity rating of the **interconnection circuit branch**, for both summer and winter periods in MVA and amperes:
- (ii) the level of impedance of the interconnection **circuit branch** both **resistive** and **reactive** and for **assets** arranged in both **shunt** and **series** in PU, using a base of 100 MVA, provided the impedance of the **interconnection circuit branch** is equal to or more than 0.0001 PU, using 100 MVA as the base:
- (iii) the nominal high voltage rating of each interconnection **circuit branch** in kV:
- (iv) the high voltage range that each **interconnection circuit branch** can be operated over in kV, specified as a maximum and a minimum; and
- (b) for each **interconnection transformer branch**, the following information:
- (i) the overall 24 hour post contingency capacity rating of the **interconnection transformer branch**, for both the summer and winter period, in amperes and MVA as follows:

- (A) for 2 Winding **interconnection transformer branches**, the overall 24 hour post contingency capacity rating:
  - (B) for 3 Winding **interconnection transformer branches**, the overall 24 hour post contingency capacity rating, at HV, MV, and LV:
- (ii) the continuous capacity rating of the **interconnection transformer branch** in amperes and MVA as follows:
  - (A) for 2 Winding **interconnection transformer branches**, the continuous capacity rating:
  - (B) for 3 Winding **interconnection transformer branches**, the continuous capacity rating, at HV, MV, and LV:
- (iii) the level of impedance of the **interconnection transformer branch**, both **resistive** and **reactive** and for **assets** arranged in both **shunt** and in **series** in PU, using a base of 100 MVA, as follows:
  - (A) for 2 Winding **interconnection transformer branches**, the level of impedance of the **interconnection transformer branch**:
  - (B) for 3 Winding **interconnection transformer branches**, the level of impedance of the **interconnection transformer branch**, at HV, MV, and LV:
- (iv) the nominal high voltage rating of the interconnection **transformer branch** in kV:
- (v) the high voltage range that the interconnection **transformer branch** can be operated over in kV, specified as a maximum, and a minimum:
- (vi) in respect of the tapping steps and ranges of the **interconnection transformer branch**:
  - (A) the tap voltage range in volts, specified as a maximum and a minimum:
  - (B) the **number** of tapping steps:
  - (C) the size of each tapping step as a percentage of the operational voltage range:
  - (D) whether the tapping step is on-load or off-load:
  - (E) whether on-load tapping capacity is automatic or manual;
  - (F) if on-load tapping capacity is automatic, whether it is auto-selected:
  - (G) if on-load tapping capacity is manual, the tap step it is normally set to, which for the purposes of this clause is the actual or expected position at winter peak demand; and
- (c) the transfer capacity in the North and South transfer for each **HVDC link configuration** expressed as follows:
  - (i) DC sent in **MW**:
  - (ii) AC received in **MW**; and
- (d) for each **shunt asset**, the following service measures and service levels:
  - (i) the overall capacity rating, in MVA<sub>r</sub>, in terms of both absorption or provision:
  - (ii) the nominal voltage rating of the **shunt asset** in kV:
  - (iii) the maximum and minimum voltage range in kV that the **shunt asset** can

- operate over; and
- (e) in addition to the information required under paragraph (d) in relation to **shunt assets**:
    - (i) whether each **shunt asset** is dynamic or static;
    - (ii) if the **shunt asset** is dynamic, whether it is an SVC or synchronous compensator;
    - (iii) any **shunt assets** that may directly affect the capacity of the **HVDC link** as set out in paragraph (c) and the likely magnitude of such effect; and
  - (f) the dates for the summer and winter periods or other such defined periods as may apply for the purposes of paragraphs (a) and (b).
- (5) The information provided under subclause (4) must,—
- (a) in the case of information provided under subclause (4)(a), (c) and (d), be consistent with the information disclosed by **Transpower** in the most recent **asset capability statement** provided by **Transpower** under clause 2(5) of **Technical Code A** of Schedule 8.3; and
  - (b) in the case of information provided under subclause (4)(b), be consistent with the **manufacturer's specification** for the component **assets** and the information disclosed by **Transpower** in the most recent **asset capability statement** provided under clause 2(5) of **Technical Code A** of Schedule 8.3, if this differs from the **manufacturer's specifications**;
  - (c) in the case of information provided under subclause (4)(a), be consistent with the thermal design rating of each **interconnection branch**; and
  - (d) cover every **interconnection asset**, either as part of an **interconnection circuit branch**, **interconnection transformer branch**, the **HVDC link** or as a **shunt asset**.
- (6) After reviewing the interconnection asset capacity and grid configuration provided under subclause (1), the **Authority** may request **Transpower** to reconsider whether any of the interconnection asset capacity and grid configuration, is accurate, and require **Transpower** to resubmit the interconnection asset capacity and grid configuration to the **Authority** for reconsideration.

Compare: Electricity Governance Rules 2003 rules 2.1 to 2.6 section VI part F

Clause 12.107(2): replaced, on 5 October 2017, by clause 307(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.107(4): amended, on 5 October 2017, by clause 307(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.107(4)(c): amended, on 20 December 2021, by clause 51 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019. Clause 12.107(5): amended, on 5 October 2017, by clause 307(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.107(4)(c): amended, on 1 March 2024, by clause 63 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

### **12.108 Consultation on proposed interconnection asset capacity and grid configuration**

- (1) If the **Authority** is provisionally satisfied that the interconnection asset capacity and grid configuration provided under clause 12.107(1) or resubmitted under clause 12.107(6) are correct, the **Authority** must **publish** the proposed interconnection asset capacity and grid configuration as soon as practicable for consultation with any person that the **Authority** thinks is likely to be materially affected by the incorporation of the proposed interconnection asset capacity and grid configuration by reference in

this Code.

- (2) As well as the consultation required under subclause (1), the **Authority** may undertake any other consultation it considers necessary.

Compare: Electricity Governance Rules 2003 rules 2.7 and 2.8 section VI part F

### 12.109 Decision on interconnection asset capacity and grid configuration

- (1) When the **Authority** has completed its consultation on the proposed interconnection asset capacity and grid configuration, it must consider whether to incorporate the proposed interconnection asset capacity and grid configuration by reference in this Code.
- (2) If the **Authority** decides to incorporate the interconnection asset capacity and grid configuration by reference in this Code, the **Authority** must determine a date on which the incorporation by reference takes effect.

Compare: Electricity Governance Rules 2003 rule 2.9 section VI part F

Clause 12.109(2): amended, on 1 August 2023, by clause 45 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

### 12.110 Incorporation of interconnection asset capacity and grid configuration by reference

- (1) The interconnection asset capacity and grid configuration is incorporated by reference in this Code.
- (2) *[Revoked]*

Clause 12.110(1): amended, on 5 October 2017, by clause 308 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.110(1): amended, on 1 August 2023, by clause 46(1) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 12.110(2): revoked, on 1 August 2023, by clause 46(2) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

### 12.111 Transpower to make interconnection branches and other assets available and keep grid configuration

- (1) **Transpower** must make each **interconnection circuit branch**, **interconnection transformer branch**, the **HVDC link**, and each **shunt asset** identified in the interconnection asset capacity and grid configuration available for use by the **system operator** for the conveyance of **electricity**—
- (a) at least at the service levels specified in the interconnection asset capacity and grid configuration in accordance with clause 12.107(4); and
- (b) in accordance with **good electricity industry practice** and relevant health and safety standards.
- (2) **Transpower** must keep the **grid** in the configuration set out in the interconnection asset capacity and grid configuration.
- (3) **Transpower** is not required to comply with subclauses (1)(a) or (2) if clause 12.112(1) applies.

Compare: Electricity Governance Rules 2003 rule 3 section VI part F

### 12.112 Exceptions to clause 12.111

- (1) **Transpower** is not required to comply with clause 12.111(1)(a) or (2) if—
- (a) permitted under the **Outage Protocol** made under subpart 7; or

- (b) an **interconnection asset** that forms part of an interconnection **branch** or the **HVDC link**, or a **shunt asset**—
    - (i) is permanently removed from service, the **grid** is permanently reconfigured, or the transmission capacity of such an **asset** is reduced, and the decision to remove the **asset** from service or reconfigure the **grid** or reduce the transmission capacity of the **asset** takes into account the effect of the removal of the **asset**, reconfiguration of the **grid**, or the reduction in transmission capacity of the **asset**, on other materially affected parties, and is undertaken—
      - (A) in order to maintain the health and safety of any person; or
      - (B) in order to maintain the safety and integrity of equipment; or
      - (C) in accordance with demonstrably prudent economic criteria; or
    - (iaa) has been temporarily removed from service, or the **grid** has been temporarily reconfigured, in accordance with clause 12.116AA; or
    - (ia) *[Expired]*
    - (ii) has been permanently removed from service, or the **grid** has been permanently reconfigured, in accordance with clause 12.117; or
  - (c) a modification to an **interconnection branch**, the **HVDC link**, a **shunt asset** or to the configuration of the **grid**, has been made as a result of an investment in the **grid**; or
  - (d) a modification to an **interconnection branch**, the **HVDC link**, a **shunt asset** or to the configuration of the **grid** has been made as a result of an investment made under an **investment contract** entered into in accordance with clauses 12.70 and 12.71; or
  - (e) the voltage range specified in the **AOPOs** for an **interconnection asset** that forms part of an **interconnection branch** is modified, or any **equivalence arrangement** is approved or **dispensation** is granted under clauses 8.29 to 8.31 in respect of the **asset**; or
  - (ea) in relation to the **HVDC link**—
    - (i) the **HVDC owner** is operating the **HVDC link** in accordance with—
      - (A) a **commissioning** plan agreed with the **system operator** under clause 2(6) to (9) of **Technical Code A** of Schedule 8.3; or
      - (B) a test plan provided to the **system operator** under clause 2(6) to (9) of **Technical Code A** of Schedule 8.3; and
    - (ii) the **HVDC link configuration** is—
      - (A) Pole 3 and Pole 2 bipole **round power**; or
      - (B) Pole 3 and Pole 2 bipole not **round power**; or
  - (f) **Transpower** and a **designated transmission customer** have agreed otherwise in accordance with clause 12.128.
- (2) If subclause (1)(c) to (e) applies, or the **grid** is reconfigured under subclause (1)(b)(i) or (ii), **Transpower** must—
- (a) make the **interconnection branch**, the **HVDC link** or the **shunt asset** available to the **system operator** at least at its modified capacity rating, and at its modified service levels; and

- (b) keep the **grid** in its modified configuration.
- (2AA) Subclause (2AB) applies—
- (a) if subclause (1)(b)(iaa) applies; and
- (b) while—
- (i) an **interconnection asset** that forms part of an **interconnection branch** or the **HVDC link**, or a **shunt asset**, has been temporarily removed; or
- (ii) the **grid** has been temporarily reconfigured.
- (2AB) **Transpower** must make the **interconnection branch**, the **HVDC link** or the **shunt asset** available to the **system operator** at least at its modified capacity rating, and at its modified service levels.
- (2A) *[Expired]*
- (2B) *[Expired]*
- (3) If a decision to remove an **asset**, or reconfigure the **grid**, or reduce the transmission capacity of an **asset** has been made under subclause (1)(b)(i) or (ii), **Transpower** must as soon as reasonably possible **publish** the analysis it undertook in accordance with subclause (1)(b)(i) or (ii), or a summary of that analysis.

Compare: Electricity Governance Rules 2003 rule 4 section VI part F

Clause 12.112(1)(b): amended, from 2 March 2012 to 3 December 2012, by clause 5(1) of the Electricity Industry Participation (Temporary Grid Reconfiguration) Code Amendment 2012.

Clause 12.112(1)(b)(i): amended, from 15 March 2013 to 15 December 2013, by clause 5(1)(a) of the Electricity Industry Participation (Temporary Grid Reconfiguration) Code Amendment 2013.

Clause 12.112(1)(b)(i): amended, on 16 December 2013, by clause 7(1) of the Electricity Industry Participation (Urgent Temporary Grid Reconfiguration) Code Amendment 2013.

Clause 12.112(1)(b)(iaa): inserted, from 15 March 2013 to 15 December 2013, by clause 5(1)(b) of the Electricity Industry Participation (Temporary Grid Reconfiguration) Code Amendment 2013.

Clause 12.112(1)(b)(iaa): inserted, on 16 December 2013, by clause 7(2) of the Electricity Industry Participation (Urgent Temporary Grid Reconfiguration) Code Amendment 2013.

Clause 12.112(1)(b)(ii): amended, from 15 March 2013 to 15 December 2013, by clause 5(1)(c) of the Electricity Industry Participation (Temporary Grid Reconfiguration) Code Amendment 2013.

Clause 12.112(1)(b)(ii): amended, on 16 December 2013, by clause 7(3) of the Electricity Industry Participation (Urgent Temporary Grid Reconfiguration) Code Amendment 2013.

Clause 12.112(1)(ea): inserted, on 26 September 2013, by clause 4 of the Electricity Industry Participation (HVDC Link Bipole Control System Testing) Code Amendment 2013.

Clause 12.112(1)(ea)(i)(A): amended, on 5 October 2017, by clause 309(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.112(2): amended, from 2 March 2012 to 3 December 2012, by clause 5(2) of the Electricity Industry Participation (Temporary Grid Reconfiguration) Code Amendment 2012.

Clause 12.112(2): amended, from 15 March 2013 to 15 December 2013, by clause 5(2) of the Electricity Industry Participation (Temporary Grid Reconfiguration) Code Amendment 2013.

Clause 12.112(2): amended, on 16 December 2013, by clause 7(4) of the Electricity Industry Participation (Urgent Temporary Grid Reconfiguration) Code Amendment 2013.

Clause 12.112(2): amended, on 5 October 2017, by clause 309(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.112(2AA) and (2AB): inserted, from 15 March 2013 to 15 December 2013, by clause 5(3) of the Electricity Industry Participation (Temporary Grid Reconfiguration) Code Amendment 2013.

Clause 12.112(2AA) and (2AB): inserted, on 16 December 2013, by clause 7(5) of the Electricity Industry Participation (Urgent Temporary Grid Reconfiguration) Code Amendment 2013.

Clause 12.112(2A) and (2B): inserted, from 2 March 2012 to 3 December 2012, by clause 5(3) of the Electricity Industry Participation (Temporary Grid Reconfiguration) Code Amendment 2012.

Clause 12.112(3): amended, from 15 March 2013 to 15 December 2013, by clause 5(4) of the Electricity Industry Participation (Temporary Grid Reconfiguration) Code Amendment 2013.

Clause 12.112(3): amended, on 16 December 2013, by clause 7(6) of the Electricity Industry Participation (Urgent Temporary Grid Reconfiguration) Code Amendment 2013.

Clause 12.112(3): amended, on 5 October 2017, by clause 309(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.112(1)(ea)(ii): amended, on 1 March 2024, by clause 63 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2024.

### 12.113 Transpower to maintain interconnection assets

**Transpower** must design, construct, maintain and operate all **interconnection assets** in accordance with **good electricity industry practice**.

Compare: Electricity Governance Rules 2003 rule 5 section VI part F  
Clause 12.113: amended, on 20 December 2021, by clause 52 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

#### *Transpower to propose investments*

### 12.114 Investments to meet the grid reliability standards

- (1) If a **grid reliability report** identifies, in accordance with clause 12.76(1)(c), that the power system is not reasonably expected to meet the **N-1 criterion** at a **grid exit point** at all times over the 5 years following the date on which the report is **published** and that this is due to an **interconnection asset**, **Transpower** must—
  - (a) as soon as practicable, investigate whether the **interconnection asset** meets the **grid reliability standards**; and
  - (b) if the **interconnection asset** does not **meet** the **grid reliability standards**, consider reasonably practicable options for ensuring that the **grid reliability standards** can be met in respect of that asset; and
  - (c) if **Transpower** considers that 1 or more investments are required in respect of that **interconnection asset** in order to meet the **grid reliability standards**, submit an investment proposal to the Commerce Commission—
    - (i) in sufficient time to avoid a breach of the **grid reliability standards**; or
    - (ii) if the **grid reliability standards** have already been breached, within 6 months, or such longer period as the **Authority** may allow, after the publication of the **grid reliability report** that sets out the investment or investments that **Transpower** proposes to make; and
  - (d) if it considers that an investment is not necessary, **publish** the reasons for this and any alternative measures that **Transpower** proposes to undertake.
- (2) If an investment proposal submitted under this clause is approved by the Commerce Commission under section 54R of the Commerce Act 1986 or permitted under an input methodology determined under section 54S of that Act, **Transpower** must undertake the investment—
  - (a) before the **grid** falls below the **grid reliability standards** for the reason referred to in subclause (1); or
  - (b) if the **grid** had already fallen below the **grid reliability standards**, or if it is not reasonably practicable to undertake the investment as provided in paragraph (a), as soon as reasonably practicable.
- (3) **Transpower** does not need to submit an investment proposal under subclause (1)(c) if the investment to which the proposal relates has previously been included in an investment proposal submitted to, and considered—
  - (a) before this Code came into force, by the Electricity Commission under section III of part F of the **rules**; or
  - (b) after this Code came into force, by the Commerce Commission under section 54R or

section 54S of the Commerce Act 1986.

Compare: Electricity Governance Rules 2003 rule 6.1 section VI part F

### 12.115 Other investments

- (1) **Transpower** must publish a **grid economic investment report** on whether there are investments that it considers, other than the investments identified under clause 12.114, could be made in respect of the **interconnection assets**.
- (2) **Transpower** must publish a **grid economic investment report** no later than 2 years after the date on which it published the previous **grid economic investment report**, or such other date as determined by the **Authority**.
- (3) If a **grid economic investment report** identifies that there are investments that could be made, **Transpower** must **publish** within 6 months a report setting out a proposed timetable for **Transpower** to consider whether to submit 1 or more investment proposals to the Commerce Commission in respect of those possible investments.
- (4) The **grid economic investment report** does not need to report on possible investments that have been previously included in an investment proposal submitted to, and considered,—
  - (a) before this Code came into force, by the Electricity Commission under section III of part F of the **rules**; or
  - (b) after this Code came into force, by the Commerce Commission under section 54R or section 54S of Part 4 of the Commerce Act 1986.

Compare: Electricity Governance Rules 2003 rule 6.2 section VI part F

### 12.116 Information on capacities of individual interconnection assets

- (1) **Transpower** must **publish** the following information in respect of each **interconnection asset**:
  - (a) for each transformer that is an **interconnection asset**, the overall 24 hour post contingency capacity rating of the **asset** in amperes and MVA, for both the summer and winter periods;
  - (b) for all other **interconnection assets**, the overall capacity rating of the **asset** in amperes and MVA and, if the **interconnection assets** are circuits, for both the summer and winter periods.
- (2) The information required under subclause (1)—
  - (a) must be consistent with the **manufacturer's specification** for the **asset** or with the most recent **asset capability statement** provided by **Transpower** under clause 2(5) of **Technical Code A** of Schedule 8.3, if this differs from the **manufacturer's specification**; and
  - (b) must be in a form that allows the **branch** to which each **asset** belongs to be easily identified; and
  - (c) must be **published** in the form determined by the **Authority** as soon as reasonably practicable after the **Authority** has determined the form.

Compare: Electricity Governance Rules 2003 rule 7 section VI part F

Clause 12.116(1): amended, on 5 October 2017, by clause 310(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.116(2)(b): amended, on 5 October 2017, by clause 310(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.116(2)(c): substituted, on 1 February 2016, by clause 55 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

### 12.116AA Temporary removal of interconnection assets from service or temporary grid reconfiguration

- (1) **Transpower** must temporarily remove 1 or more **interconnection assets** from service, or temporarily reconfigure the **grid** as permitted under clause 12.112(1)(b)(iaa), if—
  - (a) the removal or reconfiguration is requested by the **system operator** in accordance with clause 9.13B; and
  - (b) the removal or reconfiguration will result in a net benefit, as calculated under the test set out in clause 12.117.
- (2) If **Transpower** temporarily removes **interconnection assets** from service or temporarily reconfigures the **grid** in response to a notice given under clause 9.13B, **Transpower** must, as soon as is reasonably practicable after the circumstances specified in that notice cease to exist—
  - (a) restore the **interconnection assets** to service; or
  - (b) restore the **grid** to its original configuration.

Clause 12.116AA: inserted, from 15 March 2013 to 15 December 2013, by clause 6 of the Electricity Industry Participation (Temporary Grid Reconfiguration) Code Amendment 2013.

Clause 12.116AA: inserted, on 16 December 2013, by clause 8 of the Electricity Industry Participation (Urgent Temporary Grid Reconfiguration) Code Amendment 2013.

Clause 12.116AA(1): amended, on 5 October 2017, by clause 311 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 12.116AB *[Expired]*

Clause 12.116AB: inserted, from 15 March 2013 to 15 December 2013, by clause 6 of the Electricity Industry Participation (Temporary Grid Reconfiguration) Code Amendment 2013.

### 12.116AC Information to be published

If **Transpower** receives a notice given in accordance with clause 9.13B, **Transpower** must **publish**,—

- (a) as soon as practical, a copy of the notice; and
- (b) by no later than 5 **business days** after receiving the notice, a summary of **Transpower's** application of the net benefit test that relates to the exceptional circumstances stated in the notice.

Clause 12.116AC Heading: amended, on 5 October 2017, by clause 312(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.116AC: inserted, from 15 March 2013 to 15 December 2013, by clause 6 of the Electricity Industry Participation (Temporary Grid Reconfiguration) Code Amendment 2013.

Clause 12.116AC: inserted, on 16 December 2013, by clause 8 of the Electricity Industry Participation (Urgent Temporary Grid Reconfiguration) Code Amendment 2013.

Clause 12.116AC: amended, on 5 October 2017, by clause 312(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 12.116A *[Expired]*

Clause 12.116A: inserted, from 2 March 2012 to 3 December 2012, by clause 6 of the Electricity Industry Participation (Temporary Grid Reconfiguration) Code Amendment 2012.

### 12.116B *[Expired]*

Clause 12.116B: inserted, from 2 March 2012 to 3 December 2012, by clause 6 of the Electricity Industry Participation (Temporary Grid Reconfiguration) Code Amendment 2012.

**12.116C** *[Expired]*

Clause 12.116C: inserted, from 2 March 2012 to 3 December 2012, by clause 6 of the Electricity Industry Participation (Temporary Grid Reconfiguration) Code Amendment 2012.

**12.117 Permanent removal of interconnection assets from service or permanent grid reconfiguration**

- (1) **Transpower** may permanently remove **interconnection assets** from service or permanently reconfigure the **grid** as permitted under clause 12.112(1)(b) only if removal of the **asset** or reconfiguration of the **grid** results in a net benefit, as calculated under the test set out in subclause (2).
- (2) When **Transpower** is required to apply a net benefit test, **Transpower** must—
  - (a) estimate the following costs:
    - (i) any additional fuel costs incurred by a **generator** in respect of any **generating units** that will be **dispatched** or are likely to be **dispatched** during or after the removal of the **interconnection asset** or the reconfiguration of the **grid**, arising as a result of the removal or reconfiguration:
    - (ii) any direct labour and material costs that will be incurred by **Transpower** and the **designated transmission customers** undertaking the removal of the **interconnection asset** or the reconfiguration of the **grid**:
    - (iii) any increase in the estimate of **expected unserved energy** in MWh multiplied by the value per MWh of that **expected unserved energy**, arising as a result of the removal of the **interconnection asset** or the reconfiguration of the **grid**:
    - (iv) any relevant cost specified in clause 12.43(1)(a)(iv):
    - (v) any other relevant cost to a person that produces, transmits, retails or consumes **electricity** in New Zealand; and
  - (b) estimate the following benefits:
    - (i) any reduction in maintenance costs arising as a result of the removal of the **interconnection asset** or the reconfiguration of the **grid** (including **Transpower's** and any **designated transmission customer's** costs):
    - (ii) any reduction in fuel costs incurred by a **generator** in respect of any **generating units**, arising or likely to arise during or after the removal of the **interconnection asset** or the reconfiguration of the **grid**, as a result of the removal or reconfiguration:
    - (iii) any decrease in the estimate of **expected unserved energy** in MWh multiplied by the value per MWh of that **expected unserved energy**, arising as a result of the removal of the **interconnection asset** or the reconfiguration of the **grid**:
    - (iv) any relevant benefit specified in clause 12.43(1)(b)(iv):
    - (v) any other relevant benefit to a person that produces, transmits, retails or consumes **electricity** in New Zealand; and

- (c) deduct the costs estimated under paragraph (a) from the benefits estimated under paragraph (b) to determine the net benefit of the proposed removal of the **interconnection asset** or the reconfiguration of the **grid**.
- (3) **Transpower** may apply the test under this clause at differing levels of rigour in different circumstances, which may include taking into account the number of **assets** to be removed or reconfigured, the value of the **assets** involved, and the size of the load served by the **assets**.
- (4) **Transpower** is only required to—
- (a) make a reasonable estimate of the costs and benefits identified in subclause (2), based on information reasonably available to it at the time it undertakes the test, and taking into account the proposed number of **assets** to be removed or reconfigured, the value of the **assets** involved, and the size of the load served by the **assets**; and
- (b) take account of events that can be reasonably foreseen.
- (5) **Transpower's** estimate of fuel costs under subclause (2) must—
- (a) in relation to thermal **generating stations**, be a reasonable estimate of the fuel costs, based on the economic value of the fuel required for the relevant thermal **generating station**, and justified by **Transpower** with reference to opinions on the economic value of the fuel, provided by 1 or more independent and suitably qualified persons; and
- (b) in relation to hydroelectric **generating stations**—
- (i) be a reasonable estimate of the fuel costs, based on the economic value of the water stored at a hydroelectric **generating station**, provided by a suitably qualified person other than—
- (A) **Transpower**; or
- (B) an employee of **Transpower**; and
- (ii) be **published**, as provided for in the **Outage Protocol**.
- (6) The direct labour costs of **Transpower** and **designated transmission customers** under subclause (2)(a) may include any amounts paid to contractors, but must not include any apportionment of the overheads or office costs of **Transpower** or **designated transmission customers**.
- (7) The material costs of **Transpower** and **designated transmission customers** under subclause (2)(a) are the costs of the materials used in carrying out the work during the removal of the **interconnection asset** or the reconfiguration of the **grid**.
- (8) In assessing the costs and benefits under subclause (2), **Transpower** must consider any reasonably expected operating conditions, forecasts in the **system security forecast**, likely fuel costs, and any other reasonable assumptions.
- (9) The estimate of **expected unserved energy** in MWh multiplied by the value per MWh of that **expected unserved energy** under subclause (2) must be based on the **value of expected unserved energy** in clause 4 of Schedule 12.2 and **Transpower's** estimate of the **expected unserved energy** in respect of each affected **designated transmission customer** and end use customer.
- (10) To avoid doubt, this clause applies to the removal of **interconnection assets** from service if **Transpower** does not propose to replace those **assets** with another **asset**.

Compare: Electricity Governance Rules 2003 rule 8 section VI part F  
Clause 12.117 Heading: amended, on 5 October 2017, by clause 313(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 12.117: substituted, on 16 December 2013, by clause 9 of the Electricity Industry Participation (Urgent Temporary Grid Reconfiguration) Code Amendment 2013.  
Clause 12.117(1): amended, from 2 March 2012 to 3 December 2012, by clause 7 of the Electricity Industry Participation (Temporary Grid Reconfiguration) Code Amendment 2012.  
Clause 12.117(1): amended, from 15 March 2013 to 15 December 2013, by clause 7 of the Electricity Industry Participation (Temporary Grid Reconfiguration) Code Amendment 2013.  
Clause 12.117(1): amended, on 5 October 2017, by clause 313(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.  
Clause 12.117(9): amended, on 1 February 2016, by clause 56 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.  
Clause 12.117(9): amended, on 1 November 2018, by clause 79 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

### **12.118 Transpower to provide and publish annual report on interconnection asset capacity and grid configuration**

- (1) **Transpower** must provide the **Authority** with and **publish** an annual report including—
  - (a) any matter required to be reported on for the purposes of this clause by the **Outage Protocol**; and
  - (b) the extent to which, in the preceding year ending 30 June, it has complied with the requirements of clause 12.111(1)(a) and (2); and
  - (c) any specific instances in which **Transpower** has not complied with clause 12.111(1)(a) and (2); and
  - (d) to the extent practicable, the circumstances that have given rise to any failure to comply with clause 12.111(1)(a) and (2); and
  - (e) to the extent practicable, any steps that it intends to take or other options to reduce the likelihood of failing to comply with clause 12.111(1)(a) and (2) in the future; and
  - (f) any modifications made to **interconnection circuit branches**, the **HVDC link**, and each **shunt asset** under clause 12.112(c) to (e) in the preceding year ending 30 June and the extent to which it has complied with clause 12.112(2) in respect of those modifications, including any specific instances in which **Transpower** has not complied; and
  - (g) any **interconnection assets** that have been removed from service, or any reconfigurations to the **grid** made, in accordance with clause 12.116AA or clause 12.117; and
  - (h) copies of any agreements made under clause 12.128 or, in respect of **interconnection assets** only, clause 12.151 in the preceding year ending 30 June; and
  - (i) an update of the interconnection asset capacity and grid configuration required under clause 12.107(1), as at the end of the preceding year ending 30 June.
- (2) **Transpower** must provide to the **Authority** and **publish**, the report referred to in subclause (1) by 30 November each year.
- (3) The **Authority** may incorporate by reference in this Code the updated interconnection asset capacity and grid configuration referred to in subclause (1)(i) in accordance with clause 12.110. The **Authority** may consult with any person the **Authority** considers is

likely to be materially affected by the proposed amendments to the interconnection asset capacity and grid configuration, as it sees fit. **Transpower** must comply with the interconnection asset capacity and grid configuration incorporated by reference in this Code in accordance with clause 12.110.

Compare: Electricity Governance Rules 2003 rule 9 section VI part F

Clause 12.118(1)(g): amended, from 2 March 2012 to 3 December 2012, by clause 8 of the Electricity Industry Participation (Temporary Grid Reconfiguration) Code Amendment 2012.

Clause 12.118(1)(g): amended, from 15 March 2013 to 15 December 2013, by clause 8 of the Electricity Industry Participation (Temporary Grid Reconfiguration) Code Amendment 2013.

Clause 12.118(1)(g): amended, on 16 December 2013, by clause 10 of the Electricity Industry Participation (Urgent Temporary Grid Reconfiguration) Code Amendment 2013.

Clause 12.118(1): amended, on 5 October 2017, by clause 314(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.118(2): amended, on 5 October 2017, by clause 314(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### *Reporting on availability and reliability*

#### **12.119 Index measures for availability and reliability**

The index measures for availability and reliability for each **interconnection branch**, **shunt asset** and the **HVDC link** are the index measures for reliability for each **interconnection branch**, **shunt asset** and the **HVDC link** in Schedule 12.5.

#### **12.120 Updating of availability and reliability index measures**

- (1) This clause applies if **interconnection assets**—
  - (a) are modified or replaced as permitted under clause 12.112(1); or
  - (b) have been damaged or degraded but, after conducting the investigation required under clause 12.114(1), **Transpower** considers that they still meet the **grid reliability standards**.
- (2) If this clause applies, if, after the availability and the reliability or availability index measures for an **interconnection branch**, **shunt asset** and the **HVDC link** or aggregated **interconnection branches** or **shunt assets** no longer meet the requirements of clause 12.122, the availability and reliability index measures in Schedule 12.5 must be updated following the procedure specified in clauses 12.121 to 12.127.
- (3) **Transpower** must propose the revised index measures under clause 12.121 within 20 **business days** of the modification or replacement, or such longer period as the **Authority** may allow.

Compare: Electricity Governance Rules 2003 rule 10.9 section VI part F

#### **12.121 Transpower to submit draft index measures for availability and reliability**

- (1) **Transpower** must provide the **Authority** with proposed index measures for availability and reliability for each **interconnection branch**, **shunt asset** and the **HVDC link**, in accordance with this clause.
- (2) For the purposes of subclause (1), **Transpower** must categorise **interconnection branches** and **shunt assets** into groups of **interconnection branches** and **shunt assets** comprising similar **assets**.
- (3) The index measures to be provided under subclause (1) are—
  - (a) annual unavailability of each **interconnection branch**, **shunt asset** and the

- HVDC link** due to **planned outages** of 1 minute or longer in hours per year ending 30 June, expressed as a percentage; and
- (b) annual unavailability of each **interconnection branch, shunt asset** and the **HVDC link** due to **unplanned outages** of 1 minute or longer in hours per year ending 30 June, expressed as a percentage; and
  - (c) annual number of **planned interruptions** of 1 minute or longer caused by **planned outages** of 1 minute or longer of each **interconnection branch, shunt asset** and the **HVDC link**; and
  - (d) annual number of **unplanned interruptions** of 1 minute or longer caused by **unplanned outages** of 1 minute or longer of each **interconnection branch, shunt asset** and the **HVDC link**;
  - (e) total unserved energy per year ending 30 June in **MWh** resulting from **planned interruptions** of 1 minute or longer caused by **planned outages** of 1 minute or longer of each **interconnection branch, shunt asset** and the **HVDC link**; and
  - (f) total unserved energy per year ending 30 June in **MWh** resulting from **unplanned interruptions** of 1 minute or longer caused by **unplanned outages** of 1 minute or longer of each **interconnection branch, shunt asset** and the **HVDC link**.
- (4) At the same time, **Transpower** must propose availability and reliability index measures for aggregated **interconnection branches** and **shunt assets**, such as by **asset class** or for all of the **grid**.

Compare: Electricity Governance Rules 2003 rule 10.1 section VI part F

Clause 12.121(2): amended, on 5 October 2017, by clause 315(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.121(3): amended, on 5 October 2017, by clause 315(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### 12.122 Requirements for index measures

- (1) The proposed availability and reliability index measures under clause 12.121(3) must be based on the average annual availability and reliability of each category of **interconnection branch, or shunt asset** and of the **HVDC link** over the 5 year period (ending 30 June) immediately before this clause came into force.
- (2) The proposed index measures under clause 12.121(3) must be accompanied by an explanation showing how the requirements of subclause (1) were applied.
- (3) The index measure for unserved energy under clause 12.121(3)(e) and (f) must be determined in accordance with the methodology for determining **expected unserved energy** relating to **outages of interconnection assets** specified in the **Outage Protocol**.
- (4) In proposing the availability and reliability index measures under clause 12.121(4), **Transpower** must specify its reasons for proposing those measures.

Compare: Electricity Governance Rules 2003 rule 10.2 section VI part F

Clause 12.122(1): amended, on 5 October 2017, by clause 316 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

#### 12.123 Authority may initially approve proposed index measures or refer back to Transpower

After considering **Transpower's** proposed availability and reliability index measures and accompanying reasons the **Authority** may either—

- (a) provisionally approve the proposed availability and reliability index measures; or

- (b) refer the proposed availability and reliability index measures and accompanying explanation back to **Transpower** if in the **Authority's** view—
  - (i) the proposed availability and reliability index measures under clause 12.121 are not consistent with the requirements of clause 12.122(1) or the methodology referred to in clause 12.122(3); or
  - (ii) the proposed availability and reliability index measures under clause 12.121 do not provide sufficient information to meet the reasonable needs of **grid** users; or
  - (iii) the reasons provided with the availability and reliability targets in accordance with clause 12.122 are inadequate—

and **Transpower** must within 20 **business days** (or such longer period as the **Authority** may allow) consider the **Authority's** concerns and resubmit the proposed availability and reliability index measures and accompanying explanations for consideration by the **Authority**.

Compare: Electricity Governance Rules 2003 rule 10.3 section VI part F

#### 12.124 Amendment of proposed index measures by the Authority

If the **Authority** considers that the availability and reliability index measures resubmitted by **Transpower** under clause 12.123(b) are not consistent with the requirements of clause 12.122(1) or the methodology referred to in clause 12.122(3), or do not provide relevant information to **grid** users, the **Authority** may make any amendments to the index measures it considers necessary.

Compare: Electricity Governance Rules 2003 rule 10.4 section VI part F

#### 12.125 Authority must consult on proposed index measures

- (1) The **Authority** must **publish** the proposed availability and reliability index measures, either as provisionally approved by the **Authority** or as amended by the **Authority**, as soon as is practicable, for consultation with any person that the **Authority** thinks is likely to be materially affected by the proposed index measures.
- (2) As well as the consultation required under subclause (1), the **Authority** may undertake any other consultation it considers necessary.

Compare: Electricity Governance Rules 2003 rules 10.5 and 10.6 section VI part F

#### 12.126 Decision on index measures

When the **Authority** has completed its consultation on the proposed availability and reliability measures it must consider whether to include the index measures as a schedule to this Part.

Compare: Electricity Governance Rules 2003 rule 10.7 section VI part F

#### 12.127 Transpower to report on availability and reliability

- (1) By 30 November in each year, **Transpower** must **publish** and provide to the **Authority** information on availability and reliability of **interconnection assets** including—
  - (a) annual unavailability of each **interconnection branch, shunt asset** and the **HVDC link** due to **planned outages** of 1 minute or longer in the preceding year ending 30 June in hours per year expressed as a percentage; and

- (b) annual unavailability of each **interconnection branch, shunt asset** and the **HVDC link** due to **unplanned outages** of 1 minute or longer in the preceding year ending 30 June in hours per year, expressed as a percentage; and
  - (c) annual number of **planned interruptions** of 1 minute or longer caused by **planned outages** of one minute or longer of each **interconnection branch, shunt asset** and the **HVDC link** in the preceding year ending 30 June; and
  - (d) annual number of **unplanned interruptions** of 1 minute or longer caused by **unplanned outages** of 1 minute or longer of each **interconnection branch, shunt asset** and the **HVDC link** in the preceding year ending 30 June; and
  - (e) total unserved energy in the preceding year ending 30 June resulting from **planned interruptions** of 1 minute or longer caused by **planned outages** of 1 minute or longer of **interconnection branches, shunt assets** and the **HVDC link**; and
  - (f) total unserved energy in the preceding year ending 30 June resulting from **unplanned interruptions** of 1 minute or longer caused by **unplanned outages** of 1 minute or longer of **interconnection branches, shunt assets** and the **HVDC link**; and
  - (g) annual number of **outages** of each **interconnection branch, shunt asset** and the **HVDC link** that are shorter than 1 minute in the preceding year ending 30 June; and
  - (h) the annual number of **interruptions** shorter than 1 minute caused by **outages** that are shorter than 1 minute of each **interconnection branch, shunt asset** and the **HVDC link**, in the preceding year ending 30 June; and
  - (i) a comparison of the information required by paragraphs (a) to (f) against the availability and reliability index measures for **interconnection branches, shunt assets** and the **HVDC link** included in a schedule to this Part under clause 12.126;
  - (j) to the extent practicable, an explanation of the reasons for not meeting the reliability and availability index measures for **interconnection branches, shunt assets** and the **HVDC link** included in a schedule to this Part under clause 12.126 and any steps or other options it intends to take in future to meet the index measures; and
  - (k) information on its performance against the reliability and availability index measures for aggregated **interconnection branches** included in a schedule to this Part under clause 12.126.
- (2) The information **published** under subclause (1) must be specified in the same units of measurement as the corresponding index measures included in a schedule to this Part under clause 12.126.
- (3) **Transpower** does not breach this Code by reason of a failure to meet the index measures included in a schedule to this Part under clause 12.126.

Compare: Electricity Governance Rules 2003 rule 10.8 section VI part F

Clause 12.127(1): amended, on 5 October 2017, by clause 317 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 12.128 Transpower and designated transmission customers may agree on other requirements

- (1) **Transpower** and each **designated transmission customer** must comply with this Part, unless agreed otherwise by **Transpower** and the **designated transmission customer** in respect of specified **interconnection circuit branches**, the **HVDC link**, **shunt assets** or **interconnection assets**, or the **designated transmission customer** in accordance with subclause (2).
- (2) An agreement between **Transpower** and a **designated transmission customer** under this clause must not exclude the application of subclause (3)(b) and must be conditional in all respects on—
  - (a) obtaining agreement from all other potentially affected **designated transmission customers** that this Part does not apply to the specified **interconnection circuit branches**, the **HVDC link**, **shunt assets** or **interconnection assets**, or the **designated transmission customer**; and
  - (b) **Transpower** and the **designated transmission customer** confirming in writing to the **Authority** that they have consulted with all potentially affected end use customers on this Part not applying to the specified **interconnection branches**, **circuit branches**, the **HVDC link**, **shunt assets** or **interconnection assets** or the **designated transmission customer**, and that there are no material unresolved issues affecting the interests of those end use customers.
- (3) **Transpower** must—
  - (a) give written notice to the **Authority** as soon as practicable if **Transpower** enters into an agreement with a **designated transmission customer** under this clause; and
  - (b) **publish** the agreement no later than 20 **business days** after entering into the agreement.

Compare: Electricity Governance Rules 2003 rule 11 section VI part F

Clause 12.128(2): amended, on 5 October 2017, by clause 318(a) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.128(3): replaced, on 5 October 2017, by clause 318(b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## Subpart 7—Preparation of Outage Protocol

### 12.129 Purpose of this subpart

The purpose of this subpart is to provide for the making of an **Outage Protocol**, with input from **Transpower** and in consultation with other interested parties, that—

- (a) specifies the circumstances in which **Transpower** may temporarily remove any **assets** forming part of the **grid** from service or reduce the capacity of assets to efficiently manage the operation of the **grid**; and
- (b) specifies procedures and policies for **Transpower** to plan for **outages** and for carrying out such **outages** to—
  - (i) ensure **Transpower** involves **designated transmission customers** in making decisions on **planned outages** as much as possible; and
  - (ii) ensure coordination between **Transpower** and **designated transmission customers**; and

- (iii) enable **Transpower** to efficiently manage the operation of the **grid**; and
- (c) specifies procedures and policies for dealing with **unplanned outages** of the **grid**.

Compare: Electricity Governance Rules 2003 rule 1 section VII part F

### 12.130 Definition of outage

- (1) An **outage** exists when **interconnection assets** or **connection assets** are temporarily not provided in accordance with—
  - (a) the requirements of a **transmission agreement**; or
  - (b) the requirements of subpart 6.
- (2) Without limiting subclause (1), an **outage** includes any situation in which—
  - (a) **Transpower** removes **assets** from service temporarily; or
  - (b) **assets** are not able to be provided due to **grid emergencies**, in order to deal with health and safety issues, or due to circumstances beyond **Transpower's** reasonable control; or
  - (c) **Transpower** reduces the capacity of **branches** below the capacity required by a **transmission agreement** or clause 12.111; or
  - (d) **Transpower** changes the configuration of the **grid**; or
  - (e) **Transpower** is required by law to carry out an **outage**.

Compare: Electricity Governance Rules 2003 rule 2 section VII part F

### 12.131 Outage Protocol

- (1) The **Outage Protocol** set out in schedule F7 of section VII of part F of the **rules** immediately before this Code came into force, continues in force and is deemed to be the **Outage Protocol** that applies at the commencement of this Code, with the following amendments:
  - (a) every reference to the Board must be read as a reference to the **Authority**;
  - (b) every reference to the **rules** must be read as a reference to the Code;
  - (c) every reference to a provision of the **rules** must be read as a reference to the corresponding provision of the Code;
  - (d) the reference in clause 3.1.2(d), clause 3.3.5(c), and clause 3.3.8(a) to a reliability investment or an economic investment approved by the Board must be read as a reference to an **approved investment**;
  - (e) the reference in clause 10.2.1(a) and (b) to the **benchmark agreement** in schedule F2 must be read as a reference to the **default transmission agreement template**;
  - (f) the reference in clauses A1.1(a)(ii), A7.2(a)(ii), and A7.2(b)(i) to the value of unserved energy in clause 8.3.4 of schedule F4 of section III must be read as a reference to the **value of expected unserved energy** in clause 4 of Schedule 12.2;
  - (g) the reference in clauses A6.1(f) and A6.2(e) to the matters specified in clauses 27.1 to 27.9 of schedule F4 of section III must be read as the matters specified in clause 12.43(1)(a)(iv) and (b)(iv);
  - (h) the reference in clause A8.1(a)(i) to fuel costs specified in the statement of opportunities must be read as a reference to fuel costs calculated in accordance with clause 12.141(3)(a)(i).

- (2) The **Authority** must as soon as practicable after this Code comes into force, publish a version of the **Outage Protocol** in which the provisions of this Code that correspond to the provisions of the **rules** referred to in the **Outage Protocol** are shown.
- (3) Clause 12.150 applies to the **Outage Protocol**.  
Clause 12.131(1)(e): amended, on 1 October 2023, by clause 36 of the Electricity Industry Participation Code Amendment (Default Transmission Agreement) 2023

### *Review of Outage Protocol*

#### **12.132 Review of Outage Protocol**

The **Authority** may review the **Outage Protocol** at any time, in accordance with the requirements of clauses 12.133 and 12.145 to 12.149.

Compare: Electricity Governance Rules 2003 rule 14 section VII part F

#### **12.133 Transpower to submit proposed Outage Protocol**

- (1) **Transpower** must submit a proposed **Outage Protocol** to the **Authority** within 3 months (or such longer period as the **Authority** may allow) of receipt of a written request from the **Authority**. The **Authority** may issue such a request at any time.
- (2) The proposed **Outage Protocol** must give effect to or promote the principles set out in clause 12.134 and provide for the matters set out in clauses 12.135 to 12.144.
- (3) With its proposed **Outage Protocol**, **Transpower** must submit to the **Authority** an explanation of the proposed **Outage Protocol** and a **statement of proposal** for the proposed **Outage Protocol**.

Compare: Electricity Governance Rules 2003 rule 8 section VII part F

### *Principles and required content of Outage Protocol*

#### **12.134 Principles for developing Outage Protocol**

The **Outage Protocol** must give effect to the following principles:

- (a) the matters in clause 12.129;
- (b) the need for a fair and reasonable balance of interests between the **grid owner** and **designated transmission customers**;
- (c) the need to ensure that the **grid owner** can meet all obligations placed on it by the **system operator** for the purpose of meeting common security and power quality requirements under Part 8 of this Code;
- (d) the need to ensure that the safety of all personnel is maintained;
- (e) the need to ensure that the safety and integrity of equipment is maintained;
- (f) the desirability of the **Outage Protocol** and Part 8 operating in an integrated and consistent manner, if possible.

Compare: Electricity Governance Rules 2003 rule 3 section VII part F

#### **12.135 Required content of Outage Protocol**

- (1) The **Outage Protocol** must—
  - (a) require **Transpower** to plan for **outages**, other than **outages** that are not reasonably foreseeable, in accordance with clause 12.136; and

- (b) require **Transpower** and **designated transmission customers** to act reasonably and in good faith in planning for **outages**, in accordance with clause 12.137; and
  - (c) set out the situations and times at which **Transpower** must reconsider the timing of proposed **planned outages**, as specified in clause 12.138; and
  - (d) permit **Transpower** to vary a proposed **planned outage**, as specified in clause 12.139;
  - (e) set out the requirements for **Transpower** to consider when planning for **outages**, in order to give effect to the net benefit principle, as specified in clause 12.140; and
  - (f) permit **Transpower** to undertake **outages** in order to give effect to an **approved investment**, and to undertake **outages** that are required by the Electricity Act 1992, as specified in clause 12.142; and
  - (g) permit **Transpower** to undertake **outages**, or take such other steps, as the **system operator** may reasonably require.
- (2) The **Outage Protocol** must require **Transpower** to set out the procedures and policies for dealing with **unplanned outages**, as specified in clause 12.143.
- (3) The **Outage Protocol** must require **Transpower** to report on compliance with the **Outage Protocol**, in accordance with clause 12.144.
- (4) The **Outage Protocol** must set out—
- (a) processes for **Transpower** to consult with **designated transmission customers** and to determine an **outage plan** setting out **planned outages** for each year ending 30 June, and processes for the **outage plan** to be updated; and
  - (b) requirements on **Transpower** to keep **designated transmission customers** informed about **planned outages**, including minimum notice periods for **Transpower** to advise affected **designated transmission customers** of **planned outages** not set out in the **outage plan**; and
  - (c) procedures for **outage** co-ordination by **Transpower** and between **Transpower** and **designated transmission customers**; and
  - (d) requirements on **Transpower** to provide information to **designated transmission customers** about **unplanned outages**.
- (5) The **Outage Protocol** is not limited to the matters referred to in this clause, and may provide for any other matters related to **outages**.

Compare: Electricity Governance Rules 2003 rule 4 section VII part F  
Clause 12.135(4)(a): amended, on 5 October 2017, by clause 319 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

### 12.136 Planning for outages

The **Outage Protocol** must require **Transpower** to plan for **outages**, other than **outages** that are not reasonably foreseeable—

- (a) in respect of **interconnection assets**, in accordance with the requirements of the **Outage Protocol** specified under clause 12.140(1); and
- (b) in respect of **connection assets**, by agreeing with each affected **designated transmission customer** on the timing and duration of the **outage** or, failing agreement, in accordance with the requirements of the **Outage Protocol** specified under clause 12.140(1); and

- (c) in respect of outages of both **interconnection assets** and **connection assets** that are required in order to give effect to an **approved investment** or are required by the Electricity Act 1992, in accordance with the requirements of the **Outage Protocol** specified under clause 12.142.

Compare: Electricity Governance Rules 2003 rule 5.1 section VII part F

### **12.137 Transpower and designated transmission customers to act reasonably and in good faith**

- (1) The **Outage Protocol** must require **Transpower**, in planning for **outages** in accordance with clauses 12.136, 12.140, and 12.142, reconsidering the timing of proposed **planned outages** in accordance with clause 12.138 or varying proposed **planned outages** in accordance with clause 12.139, to act reasonably and in good faith, taking into account the information reasonably known at the time or that can be reasonably forecast.
- (2) The **Outage Protocol** must require **designated transmission customers**, in exercising rights or undertaking obligations under the **Outage Protocol**, to act reasonably and in good faith.

Compare: Electricity Governance Rules 2003 rule 5.2 section VII part F

### **12.138 Reconsideration of planned outages**

The **Outage Protocol** must set out the situations and the times at which **Transpower** must reconsider the timing of proposed **planned outages**, and the extent to which the proposed timing of **planned outages** needs to be reconsidered, which may include—

- (a) whenever material new information has been provided to **Transpower** about the likely effect of a proposed **planned outage**; and
- (b) whenever circumstances relating to a proposed **planned outage** have changed sufficiently to justify reconsideration of the requirements specified under clauses 12.140 or 12.142, and **Transpower** is aware or has been made aware of the change in circumstances.

Compare: Electricity Governance Rules 2003 rule 5.3 section VII part F

### **12.139 Variations to planned outages**

- (1) The **Outage Protocol** may permit **Transpower** to vary a proposed **planned outage** only if—
- (a) in respect of a proposed **planned outage** of **interconnection assets**, the variation of the proposed **planned outage** is permitted in accordance with the requirements of the **Outage Protocol** specified under clauses 12.140 or 12.142; or
- (b) in respect of a proposed **planned outage** of **connection assets**, **Transpower** and each affected **designated transmission customer** agree on the variation as provided for in the **Outage Protocol** or, failing agreement, the variation of the proposed **planned outage** is permitted in accordance with the requirements of the **Outage Protocol** specified under clauses 12.140 or 12.142; or
- (c) the variation is necessary as a result of a **grid emergency**, in order to deal with health and safety issues, in order to comply with the **Act** or due to other circumstances beyond **Transpower's** reasonable control; or

- (d) the variation is required to meet a request of the **system operator** that **Transpower** vary a proposed **planned outage**.
- (2) The **Outage Protocol** must require **Transpower**, if possible, to give notice of a variation before the proposed **planned outage**, and if prior notice is not possible, to advise of the variation to the proposed **planned outage** as soon as possible after the variation occurs.

Compare: Electricity Governance Rules 2003 rule 5.4 section VII part F

#### 12.140 Net benefit principle, requirements and methodologies

- (1) The requirements of the **Outage Protocol** relating to planning for **outages** under clause 12.136(a) or (b), or for varying proposed **planned outages** under clause 12.139(1)(a) or (b)—
  - (a) must give effect to the net benefit principle specified in subclause (2), in determining the timing and duration of a **planned outage**, and whether to undertake a **planned outage**, either by including the particular requirements set out in clause 12.141(2), or by some other means; and
  - (b) may include methodologies and processes for **Transpower** to apply when planning for **outages**; and
  - (c) may include other requirements that may apply in different situations.
- (2) The net benefit principle is that, in planning and varying a **planned outage**, **Transpower** must ensure that the **planned outage** is likely to result in net benefits to persons who produce, transmit, distribute, retail or consume **electricity**—
  - (a) in respect of **interconnection assets**, to the extent those persons are affected by an **outage**; and
  - (b) in respect of **connection assets**, if **Transpower** has not agreed the timing and duration of the **outage** with the relevant **designated transmission customer** in accordance with the **Outage Protocol**, to the extent those persons are affected by an **outage**.

Compare: Electricity Governance Rules 2003 rule 5.5 section VII part F

#### 12.141 Consideration of likely effects of planned outages

- (1) The **Outage Protocol** may require **Transpower** to determine the likely effect of a proposed **planned outage** on the power system, **generators** and **consumers**, and—
  - (a) if a proposed **outage** is not reasonably expected to—
    - (i) result in the power system failing to meet the **grid reliability standards**; and/or
    - (ii) give rise to **binding constraints**; and/or
    - (iii) result in loss of supply to **consumers**, may permit **Transpower** to undertake the **outage**; and
  - (b) if a proposed **outage** is likely to result in, or give rise to, the matters referred to in paragraph (a), the **Outage Protocol** may require **Transpower** to comply with the particular requirements specified in subclause (2).
- (2) The requirements in subclause (1) that the **Outage Protocol** may provide are—

- (a) if a proposed **planned outage** is likely to result in the power system failing to meet the **grid reliability standards**, but is not expected to give rise to **binding constraints** or result in loss of **supply to consumers**, **Transpower** must—
- (i) estimate the following costs:
    - (A) any direct labour and material costs that **Transpower** will incur in undertaking the **outage**:
    - (B) any direct labour and material costs that **designated transmission customers** will incur as a result of **Transpower** undertaking the **outage**:
    - (C) if the **outage** will result in an increased risk of loss of **supply**, any increase in the estimate of **expected unserved energy** in MWh multiplied by the value per MWh of that **expected unserved energy**:
    - (D) any relevant cost specified in clause 12.43(1)(a)(iv):
    - (E) any other relevant cost to a person that produces, transmits, retails or consumes **electricity** in New Zealand; and
  - (ii) estimate the following benefits:
    - (A) if the **outage** will result in a decreased risk of loss of **supply**, any decrease in the estimate of **expected unserved energy** in MWh multiplied by the value per MWh of that **expected unserved energy**:
    - (B) any reduction in maintenance costs arising as a result of the **outage** (including **Transpower's** and any **designated transmission customer's** costs):
    - (C) any relevant benefit specified in clause 12.43(1)(b)(iv):
    - (D) any other relevant benefit to a person that produces, transmits, retails or consumes **electricity** in New Zealand; and
  - (iii) carry out the **outage** only if the costs estimated under subparagraph (i) are less than the benefits estimated under subparagraph (ii); and
- (b) if a proposed **planned outage** is likely to give rise to **binding constraints**, whether or not the **outage** is also likely to result in a loss of **supply to consumers**, **Transpower** must—
- (i) estimate the following costs:
    - (A) any direct labour and material costs that **Transpower** will incur in undertaking the **outage**:
    - (B) any direct labour and material costs that **designated transmission customers** will incur as a result of **Transpower** undertaking the **outage**:
    - (C) if the **outage** will result in an increased risk of loss of **supply**, any increase in the estimate of **expected unserved energy** in MWh multiplied by the value per MWh of that **expected unserved energy**:

- (D) any additional fuel costs incurred by a **generator** in respect of any **generating units** that will be **dispatched** or are likely to be **dispatched** during or after the **outage** and as a result of the **outage**;
- (E) any relevant cost specified in clause 12.43(1)(a)(iv):
- (F) any other relevant costs to a person that produces, transmits, retails or consumes **electricity** in New Zealand; and
- (ii) estimate the following benefits:
  - (A) any reduction in maintenance costs resulting from the **outage** (including **Transpower's** and any **designated transmission customer's** costs):
  - (B) any reduction in fuel costs incurred by a **generator** in respect of any **generating units**, arising or likely to arise during or after the **outage** and as a result of the **outage**;
  - (BA) if the **outage** will result in a decreased risk of loss of **supply**, any decrease in the estimate of **expected unserved energy** in MWh multiplied by the value per MWh of that **expected unserved energy**;
  - (C) any relevant benefit specified in clause 12.43(1)(b)(iv):
  - (D) any other relevant benefit to a person that produces, transmits, retails or consumes **electricity** in New Zealand; and
- (iii) carry out the **outage** only if the costs estimated under subparagraph (i) are less than the benefits estimated under subparagraph (ii); and
- (c) if a proposed planned **outage** is likely to lead to loss of **supply** to **consumers**, whether or not the **outage** is also likely to give rise to **binding constraints**, **Transpower** must—
  - (i) estimate the following costs:
    - (A) any direct labour and material costs that **Transpower** will incur in undertaking the **outage**;
    - (B) any direct labour and material costs that **designated transmission customers** will incur as a result of **Transpower** undertaking the **outage**;
    - (C) any increase in the estimate of **expected unserved energy** in MWh multiplied by the value per MWh of that **expected unserved energy**, arising from the loss of **supply** during the **outage**;
    - (CA) any additional fuel costs incurred by a **generator** in respect of any **generating units** that will be **dispatched** or are likely to be **dispatched** during or after the **outage** and as a result of the **outage**;
    - (D) any relevant cost specified in clause 12.43(1)(a)(iv):
    - (E) any other relevant cost to a person that produces, transmits, retails or consumes **electricity** in New Zealand; and
  - (ii) estimate the following benefits:
    - (A) any reduction in maintenance costs resulting from the **outage** (including **Transpower's** and any **designated transmission customer's** costs):

- (B) if the **outage** will result in a decreased risk of loss of **supply**, any decrease in the estimate of **expected unserved energy** in MWh multiplied by the value per MWh of that **expected unserved energy**;
  - (C) any reduction in fuel costs incurred by a **generator** in respect of any **generating units**, arising or likely to arise during or after the **outage** and as a result of the **outage**;
  - (D) any relevant benefit specified in clause 12.43(1)(b)(iv);
  - (E) any other relevant benefit to a person that produces, transmits, retails or consumes **electricity** in New Zealand; and
- (iii) carry out the **outage** only if the costs estimated under subparagraph (i) are less than the benefits estimated under subparagraph (ii).
- (3) In providing for the matters referred to in subclause (2), the **Outage Protocol** must include the following requirements:
- (a) **Transpower's** estimate of the fuel costs under subclause (2)(b) and (c) must—
    - (i) in relation to thermal **generating stations**, be a reasonable estimate of the fuel costs, based on the economic value of the fuel required for the relevant thermal **generating station**, and justified by **Transpower** with reference to opinions on the economic value of the fuel, provided by 1 or more independent and suitably qualified persons; and
    - (ii) in relation to hydroelectric **generating stations**—
      - (A) be a reasonable estimate of the fuel costs, based on the economic value of the water stored at a hydroelectric **generating station**, provided by a suitably qualified person other than—
        - (1) **Transpower**; or
        - (2) an employee of **Transpower**; and
      - (B) be **published**, as provided for in the **Outage Protocol**;
  - (b) the direct labour costs of **Transpower** and **designated transmission customers** under subclause (2) may include any amounts paid to contractors, but must not include any apportionment of the overheads or office costs of **Transpower** or **designated transmission customers**;
  - (c) the material costs of **Transpower** and **designated transmission customers** under subclause (2) are the costs of the materials used in carrying out the work during the **outage**;
  - (d) the estimate of **expected unserved energy** in MWh multiplied by the value per MWh of that **expected unserved energy** under subclause (2) must—
    - (i) in the case of **connection assets**, be based on—
      - (A) the estimated amount and value of the **expected unserved energy** as agreed between **Transpower** and each affected **designated transmission customer**; or
      - (B) if **Transpower** and a **designated transmission customer** cannot agree on the amount and value of the **expected unserved energy** under subparagraph (A), the **value of expected unserved energy** in clause 4 of Schedule 12.2 and **Transpower's** estimate of the

- expected unserved energy** in respect of each affected **designated transmission customer** and end use customer; and
- (ii) in the case of **interconnection assets**, be based on—
    - (A) the **value of expected unserved energy** in clause 4 of Schedule 12.2; and
    - (B) **Transpower's** estimate of the **expected unserved energy** in respect of each affected **designated transmission customer** and end use customer.
  - (4) In addition to the requirements in subclause (3), the **Outage Protocol** must require **Transpower**, in planning for **outages**, to consider any reasonably expected operating conditions, forecasts in the **system security forecast**, likely fuel costs, and any other reasonable assumptions.
  - (5) The **Outage Protocol** must include a methodology for determining **expected unserved energy** for the purposes of subclause (2)(a) to (c) that complies with subclauses (3)(d) and (4).
  - (6) The **Outage Protocol** may permit **Transpower** to—
    - (a) make only a reasonable estimate of the matters specified in subclauses (2) to (4) based on information reasonably available to it at the time **Transpower** considers whether to carry out a **planned outage**, and taking into account the number of **assets** to which the proposed **outage** applies, the value of the **assets** involved, the size of the load served by the **assets**, the proposed duration of the **outage**; and
    - (b) apply differing levels of rigour in different circumstances, which may include taking into account the number of **assets** to which a proposed **outage** applies, the value of the **assets** involved, the size of the load served by the **assets**, the proposed duration of the **outage**, and any other relevant matters.

Compare: Electricity Governance Rules 2003 rule 5.6 section VII part F

Clause 12.141 heading: amended, on 20 December 2021, by clause 53 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2019.

Clause 12.141(2) to (4): substituted, on 16 December 2013, by clause 11 of the Electricity Industry Participation (Urgent Temporary Grid Reconfiguration) Code Amendment 2013.

Clause 12.141(3)(d)(i)(B): amended, on 1 February 2016, by clause 57(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 12.141(3)(d)(i)(B): amended, on 1 November 2018, by clause 80 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

Clause 12.141(3)(d)(ii)(A): amended, on 1 February 2016, by clause 57(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Clause 12.141(3)(d)(ii)(B): amended, on 1 November 2018, by clause 80 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2018.

#### **12.142 Planned outages required in order to give effect to an investment or required by the Act**

- (1) The **Outage Protocol** must set out requirements for **Transpower** to consider when determining the timing of **planned outages** that are required in order to give effect to an **approved investment** or that are required by the Electricity Act 1992.
- (2) The requirements specified under subclause (1) must require **Transpower** to give effect to the net benefit principle in clause 12.140(2) in determining the timing and duration of **outages** subject to this clause, and may require **Transpower** to consider some or all of the costs and benefits specified in clause 12.141.

Compare: Electricity Governance Rules 2003 rule 5.7 section VII part F

### 12.143 Required content of Outage Protocol in relation to unplanned outages

- (1) The **Outage Protocol** must—
  - (a) set out procedures and policies for dealing with **unplanned outages**, so as to minimise the costs and, if relevant, maximise the benefits arising from an **unplanned outage**; and
  - (b) set out the reasonable steps and measures that **Transpower** must take in order to be prepared for **unplanned outages**, so as to ensure that it is readily able to deal with **unplanned outages** in a way that minimises the costs and, if relevant, maximises the benefits arising from an **unplanned outage**; and
  - (c) require **Transpower** to deal with **unplanned outages** as quickly as reasonably possible, in accordance with the procedures specified in the **Outage Protocol**.
- (2) The costs and benefits under subclause (1) are the costs and benefits of the **outage** to persons who produce, transmit, distribute, retail, or consume **electricity**.

Compare: Electricity Governance Rules 2003 rule 6 section VII part F

### 12.144 Reporting on compliance with Outage Protocol

The **Outage Protocol** must require **Transpower** to publish and report to **designated transmission customers** and the **Authority**, whether in the report provided under clause 12.118 or otherwise, on its compliance with the requirements of the **Outage Protocol**, including the requirements specified in clause 12.140(1) for giving effect to the net benefit principle specified in clause 12.140(2) and the requirements of the **Outage Protocol** relating to **unplanned outages** specified in clause 12.143.

Compare: Electricity Governance Rules 2003 rule 7 section VII part F

### *Decisions on Outage Protocol*

### 12.145 Authority may initially approve the proposed Outage Protocol or refer back to Transpower

After consideration of **Transpower's** proposed **Outage Protocol** and accompanying explanation and **statement of proposal**, the **Authority** may—

- (a) provisionally approve the proposed **Outage Protocol** having regard to the principles in clause 12.134 and the matters set out in clauses 12.135 to 12.144; or
- (b) refer the proposed **Outage Protocol** and accompanying explanation and regulatory statement back to **Transpower**, if in the **Authority's** view—
  - (i) the proposed **Outage Protocol** does not adequately give effect to or promote the principles in clause 12.134; or
  - (ii) the proposed **Outage Protocol** does not adequately provide for the matters set out in clauses 12.135 to 12.144; or
  - (iii) the explanation or **statement of proposal** provided with the **Outage Protocol** in accordance with clause 12.133(3) is not adequate—

and **Transpower** must, within 20 **business days** (or such longer period as the **Authority** may allow), consider the **Authority's** concerns and resubmit its proposed

**Outage Protocol** and accompanying explanation and **statement of proposal** for reconsideration by the **Authority**.

Compare: Electricity Governance Rules 2003 rule 9 section VII part F

#### **12.146 Reconsideration of revised Outage Protocol by the Authority**

After reconsideration of **Transpower's** proposed **Outage Protocol**, and accompanying explanation and **statement of proposal**, as revised under clause 12.145(b), the **Authority** may either—

- (a) provisionally approve the proposed **Outage Protocol**, as revised, having regard to the principles in clause 12.134 and the matters set out in clauses 12.135 to 12.144; or
- (b) if the **Authority** considers that the **Outage Protocol** resubmitted by **Transpower** under clause 12.145(b) does not adequately give effect to or promote the principles in clause 12.134, or adequately provide for the matters set out in clauses 12.135 to 12.144, the **Authority** may make any amendments to the proposed **Outage Protocol**, as revised, that it considers necessary.

Compare: Electricity Governance Rules 2003 rule 10 section VII part F

#### **12.147 Authority must consult on the proposed Outage Protocol**

The **Authority** must **publish** the proposed **Outage Protocol**, either as provisionally approved by the **Authority** or as amended by the **Authority**, as soon as is practicable, for consultation with any person that the **Authority** thinks is likely to be materially affected by the proposed **Outage Protocol**.

Compare: Electricity Governance Rules 2003 rule 11 section VII part F

#### **12.148 Authority may undertake additional consultation**

As well as the consultation required under clause 12.147, the **Authority** may undertake any other consultation it considers necessary.

Compare: Electricity Governance Rules 2003 rule 12 section VII part F

#### **12.149 Decision on Outage Protocol**

- (1) When the **Authority** has completed its consultation on the proposed **Outage Protocol**, it must consider whether to incorporate the proposed **Outage Protocol** by reference as the **Outage Protocol**.
- (2) If the **Authority** decides to incorporate the **Outage Protocol** by reference in this Code, the **Authority** must determine a date on which the incorporation by reference takes effect.

Compare: Electricity Governance Rules 2003 rule 13 section VII part F

Clause 12.149(2): amended, on 1 August 2023, by clause 47 of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

#### **12.150 Incorporation of Outage Protocol by reference**

- (1) The **Outage Protocol** is incorporated by reference in this Code.
- (2) *[Revoked]*

Clause 12.150(1): amended, on 5 October 2017, by clause 320(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.150(1): amended, on 1 August 2023, by clause 48(1) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

Clause 12.150(2): amended, on 5 October 2017, by clause 320(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.150(2): revoked, on 1 August 2023, by clause 48(2) of the Electricity Industry Participation Code Amendment (System Operation Documents) 2023.

*Complying with Outage Protocol*

**12.151 Compliance with Outage Protocol**

- (1) **Transpower** and each **designated transmission customer** must comply with the **Outage Protocol**, unless agreed otherwise by **Transpower** and a **designated transmission customer** in respect of specified **assets** or the **designated transmission customer** in accordance with subclause (2).
- (2) An agreement between **Transpower** and a **designated transmission customer** to which the **Outage Protocol** does not apply in respect of specified **assets** must not exclude the application of subclause (3)(b) and must be conditional in all respects on—
  - (a) obtaining agreement from all other potentially affected **designated transmission customers** that the **Outage Protocol** does not apply in respect of the specified **assets** or the **designated transmission customer**; and
  - (b) **Transpower** and the **designated transmission customer** satisfying the **Authority** that they have consulted with all potentially affected end use customers on the **Outage Protocol** not applying in respect of the specified **assets** or the **designated transmission customer** and that there are no material unresolved issues affecting the interests of those end use customers.
- (3) **Transpower** must—
  - (a) give written notice to the **Authority** as soon as practicable if **Transpower** enters into an agreement with a **designated transmission customer** under this clause; and
  - (b) **publish** the agreement no later than 20 **business days** after entering into the agreement.

Compare: Electricity Governance Rules 2003 rule 15 section VII part F

Clause 12.151(2): amended, on 5 October 2017, by clause 321(a) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Clause 12.151(3): replaced, on 5 October 2017, by clause 321(b) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

## Schedule 12.1

### Categories of designated transmission customers

cl 12.7

#### 1 Categories of designated transmission customers required to enter into transmission agreements with Transpower

- (1) The categories of **designated transmission customers** required to enter into **transmission agreements with Transpower** are—
  - (a) **connected asset owners**; and
  - (b) *[Revoked]*
  - (c) **generators** that are directly connected to the **grid**.
- (2) *[Revoked]*
- (3) *[Revoked]*
- (4) *[Revoked]*
- (5) *[Revoked]*

Compare: Electricity Governance Rules 2003 schedule F1 part F

Schedule 12.1, clause 1(1): amended, on 16 December 2013, by clause 9(1) of the Electricity Industry Participation (Revocation of Part 16) Code Amendment 2013.

Schedule 12.1, clause 1(1)(a): amended, on 1 February 2016, by clause 58(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Schedule 12.1, clause 1(1)(b): revoked, on 1 February 2016, by clause 58(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Schedule 12.1, clause 1(1)(c): amended, on 23 February 2015, by clause 75 of the Electricity Industry Participation Code Amendment (Distributed Generation) 2014.

Schedule 12.1, clause 1(1)(c): amended, on 5 October 2017, by clause 322 of the Electricity Industry Participation Code Amendment (Code Review Programme) 2017.

Schedule 12.1, clause 1(2) to (5): revoked, on 16 December 2013, by clause 9(2) of the Electricity Industry Participation (Revocation of Part 16) Code Amendment 2013.

---

## Schedule 12.2

### Grid reliability standards

cl 12.55

#### 1 Preamble

Clause 12.55 of this Code, requires the **Authority** to determine the most appropriate **grid reliability standards** and in so doing must have regard to the purposes in clause 12.56 and the principles set out in clause 12.57, as required by clause 12.55.

Compare: Electricity Governance Rules 2003 clause 2 schedule F3 part F

#### 2 The grid reliability standards

- (1) The purpose of the **grid reliability standards** is to provide a basis for **Transpower** and other parties to appraise opportunities for transmission investments and **transmission alternatives**.
- (2) For the purpose of subclause (1), the **grid** satisfies the **grid reliability standards** if—
  - (a) the power system is reasonably expected to achieve a level of reliability at or above the level that would be achieved if all **economic reliability investments** were to be implemented; and
  - (b) with all **assets** that are reasonably expected to be in service, the power system would remain in a **satisfactory state** during and following a **single credible contingency event** occurring on the **core grid**.
- (3) For the purpose of subclause (2)(a), the expected level of reliability of the power system must be assessed at each and every **grid exit point** and **grid injection point** (wherever located on the **grid**).
- (4) For the purpose of subclause (2)(a) and (b), the expected level of reliability, and state, of the power system must be assessed using the range of relevant operating conditions that could reasonably be expected to occur.

Compare: Electricity Governance Rules 2003 clauses 3 to 6 schedule F3 part F

#### 3 Interpretation and definitions

- (1) For the purposes of these **grid reliability standards**, unless the context calls for another interpretation—
  - (a) the terms defined in Part 1 of this Code take that defined meaning; and
  - (b) the term defined in subclause (2) takes that defined meaning; and
  - (c) a reference—
    - (i) to the singular includes the plural and conversely; and
    - (ii) to a person includes an individual, company, other body corporate, association, partnership, firm, joint venture, trust, or Government Agency; and
  - (d) the word including or includes means including, but not limited to, or includes, without limitation; and
  - (e) the other grammatical forms of the term defined in subclause (2) have a corresponding meaning.

- (2) **Economic reliability investments** means investments in the **grid** and **transmission alternatives** that would satisfy the economic test for an investment proposal applied by the Commerce Commission under Part 4 of the Commerce Act 1986—
- (a) assuming that the economic test was applied to both investments in the **grid** and **transmission alternatives**; and
  - (b) having regard to Parts 7 and 8 (including the **policy statement**).

Compare: Electricity Governance Rules 2003 clauses 7 and 8 schedule F3 part F

#### **4 Value of expected unserved energy**

- (1) The value of any **expected unserved energy** is—
- (a) \$20,000 per **MWh**; or
  - (b) such other value as the **Authority** may determine.
- (2) The **Authority** may determine different **values of expected unserved energy** under this clause for different purposes and for different times.
- (3) If the **Authority** determines a **value of expected unserved energy** under this clause, the **Authority** must **publish** its determination.

Schedule 12.2, clause 4(1): amended, on 1 February 2016, by clause 59(1) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Schedule 12.2, clause 4(2): amended, on 1 February 2016, by clause 59(2) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

Schedule 12.2, clause 4(3): amended, on 1 February 2016, by clause 59(3) of the Electricity Industry Participation Code Amendment (Code Review Programme) 2015.

## Schedule 12.3 Core grid determination

cl 12.63

### 1 Background

Clause 12.63 of this Code, requires the **Authority** to determine the most appropriate **core grid determination** and in so doing to have regard to the purposes set out in clause 12.64, the principles set out in clause 12.57 for the **grid reliability standards** and the objectives set out in clause 12.65.

Compare: Electricity Governance Rules 2003 clause 2 schedule F3A part F

### 2 The core grid determination

- (1) The purpose of this **core grid determination** is to define the **core grid** for the purposes of the **grid reliability standards** and so provide a basis for—
  - (a) the **Authority** to determine the **grid reliability standards**; and
  - (b) **Transpower** and other parties to appraise opportunities for transmission investment and **transmission alternatives**.
- (2) The **core grid** consists of those assets that comprise the transmission links listed in Table 1 below:

*Table 1*

North Island core grid links	South Island core grid links
220kV Huapai-Marsden	220kV Islington-Kikiwa
220kV Huapai-Bream Bay	220kV Kikiwa-Stoke

Compare: Electricity Governance Rules 2003 clauses 3 and 4 schedule F3A part F

### 3 Interpretation

For the purposes of this **core grid determination**, unless the context calls for another interpretation, a term has the meaning given to that term in the **grid reliability standards**.

Compare: Electricity Governance Rules 2003 clause 5 schedule F3A part F

## Schedule 12.4 Transmission Pricing Methodology

Schedule 12.4: replaced, on 20 December 2022, by clause 4 of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology) 2022.

### Part A Preliminary

- 1 Purpose
- 2 Overview of Transmission Charges
- 3 General Definitions
- 4 Load Customers, Gross Energy and Maximum Gross Demand
- 5 Commissioning
- 6 Connection and Disconnection
- 7 Large Plant
- 8 Interpretation
- 9 Transmission Charges Calculated Separately
- 10 Calculations and Estimations
- 11 Determinations
- 12 Reverse Flow
- 13 Exceptional Operating Circumstances
- 14 Applications, Application Fees and Application Requirements
- 15 Consultation on Transmission Charges
- 16 Information about Transmission Charges

### Part B Grid Asset Classification

- 17 Grid Assets and Land and Buildings
- 18 Partial Funding of Grid Assets
- 19 Nodes and Links
- 20 Connection and Interconnection Nodes and Links
- 21 Connection and Interconnection Assets
- 22 Associating Connection Assets with Connection Locations and Customers
- 23 Discretion to Classify and Reclassify as Connection Asset

### Part C Connection Charges

- 24 Calculation of Connection Charges
- 25 Start of Connection Charges
- 26 Asset Component
- 27 Anticipatory BBIs
- 28 Funded Asset Component

29	Funded Asset Rebate
30	Maintenance Component
31	Operating Component
32	Connection Customer Allocations
33	De-rating
34	Replacement Costs
<b>Part D</b>	<b>Benefit-based Charges</b>
35	Calculation of Benefit-based Charges
36	Start of Benefit-based Charges
37	Expenditure on Existing BBIs
38	Assumptions Book
39	Covered Cost
40	Attributed Opex Component
40A	Commissioned Assets Not Asseted
41	Covered Cost of Anticipatory BBI
42	BBI Customer Allocations for Appendix A BBIs
43	BBI Customer Allocations for Post-2019 BBIs

- 63 Regional Customer Groups
- 64 Regional NPB
- 64A Publication of Simple Method Information
- 65 Intra-regional Allocators
- 66 Recent Customers
- 67 Notional IRA Value

**Part E Residual Charges**

- 68 Calculation of Residual Charges
- 69 Anytime Maximum Demand (Residual)
- 70 Anytime Maximum Demand (Residual) Baseline
- 71 Residual Charge Adjustment Factor
- 72 Reduction Events
- 73 Re-estimating for Recent Load Customers
- 74 Residual Charge Rate

**Part F Adjustments**

- 75 Adjustment Events
- 76 Connection Charge Adjustment Events
- 77 Connection Charge Adjustment Event: Connecting Customer
- 78 Connection Charge Adjustment Event: Disconnecting Customer
- 79 Connection Charge Adjustment Event: Sale of Business
- 80 Connection Charge Adjustment Event: Voluntary Under-recovery
- 81 Benefit-based Charge Adjustment Events
- 82 Benefit-based Charge Adjustment Event: Material Damage
- 83 Benefit-based Charge Adjustment Event: New Customer
- 84 Benefit-based Charge Adjustment Event: Exiting Customer
- 85 Benefit-based Charge Adjustment Event: Large Plant Connected or Disconnected
- 86 Benefit-based Charge Adjustment Event: Substantial Sustained Increase
- 87 Benefit-based Charge Adjustment Event: Distributor Connection at Grid Point of Connection
- 88 Benefit-based Charge Adjustment Event: Changed Point of Connection
- 89 Benefit-based Charge Adjustment Event: Sale of Business
- 90 Benefit-based Charge Adjustment Event: Voluntary Under-recovery
- 91 Benefit-based Charge Adjustment Event: SSCGU

- 92 Residual Charge Adjustment Events
- 93 Residual Charge Adjustment Event: Exiting Load Customer
- 94 Residual Charge Adjustment Event: Sale of Business
- 95 Residual Charge Adjustment Event: Voluntary Under-recovery

**Part G Reassignment**

- 96 Effect of Reassignment
- 97 Reassignment Amount
- 98 Eligibility for Reassignment
- 99 Reassignment Application
- 100 Application Screening and Publication
- 101 Assessment
- 102 Forecast Peak Loading and Reassignment Factors
- 103 Consultation on Draft Decision
- 104 Decision and Independent Review
- 105 Decision to be Published
- 106 Commercially Sensitive Information
- 107 Reversal for Increased Forecast Peak Loading
- 108 Reversal for Subsequent Write-Down
- 109 Application Fees, Application Requirements and Reassignment Practice Manual

**Part H Transitional Price Cap**

- 110 Cap and Cap Condition
- 111 Difference Cap
- 112 Cap Recovery Charge

**Part I Prudent Discount Policy**

- 113 Effect of Prudent Discount Agreements
- 114 Prudent Discount Applications
- 115 Application Screening and Publication
- 116 Assessment
- 117 Calculation of Alternative Project Costs
- 118 Assessment of Commercial Viability
- 119 Consultation on Draft Decision
- 120 Decision and Independent Review
- 121 Prudent Discount Agreement
- 122 Back-dated Prudent Discounts

## Part A Preliminary

### *Introduction*

#### 1 Purpose

The **transmission pricing methodology** is used to recover the cost of **transmission services** provided by **Transpower**, other than costs recovered under **investment agreements**, but not more than **recoverable revenue** for each **pricing year**. This **transmission pricing methodology** allocates that cost to **customers** through **transmission charges**.

#### 2 Overview of Transmission Charges

The **transmission charges** are—

- (a) **connection charges**, which recover part of **recoverable revenue** by reference to the cost of **connection investments**. Part C specifies how **connection charges** are calculated; and
- (b) **benefit-based charges**, which recover part of **recoverable revenue** by reference to the **covered cost of benefit-based investments**. Part D specifies how **benefit-based charges** are calculated; and
- (c) **cap recovery charges**, which are a redistribution of **transmission charges** that would otherwise be payable by **capped customers** who are receiving **cap reductions**; and
- (d) **prudent discount recovery charges**, which are a redistribution of **transmission charges** that would otherwise be payable by **prudent discount recipients**; and
- (e) **residual charges**, which recover the remainder of **recoverable revenue**. Part E specifies how **residual charges** are calculated.

Clause 2(a): amended, on 31 July 2023, by clause 4(1) of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Amendments) 2023.

Clause 2(b): amended, on 31 July 2023, by clause 4(2) of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Amendments) 2023.

Clause 2(e): amended, on 31 July 2023, by clause 4(3) of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Amendments) 2023.

### *Interpretation*

#### 3 General Definitions

In this **transmission pricing methodology**, unless the context otherwise requires—

**2020 guidelines** means the guidelines the **Authority** published under paragraph 12.83(b) of this Code on 10 June 2020

**AC assets** means **grid assets** other than **HVDC assets**

**AC switch** means a switch that is an **AC asset**

**accelerated depreciation** means **depreciation** or tax depreciation (as the context requires) of an asset exclusively due to damage to, or destruction, stranding, decommissioning or disposal of, the asset

**adjustment event** means a **connection charge adjustment event**, **benefit-based charge adjustment event** or **residual charge adjustment event**

**alleviated price** means, for a **regional customer group**, **factual** and **counterfactual**, a price at a **market node** in the **regional customer group's modelled region** that, due to a **modelled constraint** is—

- (a) higher in the **counterfactual** than the **factual**; or
- (b) higher in the **counterfactual** than a price at another **market node** in the **counterfactual** that is in a **modelled region** for a different **regional customer group** of the same type (**regional demand group** or **regional supply group**)

**allocation data** means any data about **supply, demand, injection, offtake** or **gross energy** that affects a **customer's** allocation of **transmission charges**

**allowance** means, for a cost or charge over a period, the forecast MAR building block under the **Transpower IPP** over the period for the cost or charge

**alternative project** means—

- (a) for an **inefficient bypass prudent discount**, an investment by the **customer** in a **transmission alternative** that, if implemented, would bypass existing **grid assets**; or
- (b) for a **stand-alone cost prudent discount**, an investment in the **grid** or 1 or more **transmission alternatives** by an efficient **transmission services** provider that, if implemented, would provide **transmission services** in substitution for all **transmission services** the **customer** currently receives

**alternative project costs** has the meaning in clause 117

**ancillary service BBI** means a **post-2019 BBI** that is expected to have a material impact on prices or quantities in the **wholesale market** for a **specified ancillary service** relative to the **post-2019 BBI's counterfactual**. An **ancillary service BBI** may also be a **market BBI** or **reliability BBI**, but cannot be a **resiliency BBI**

**ancillary service regional customer group** means a **regional customer group** defined in subclause 53(3)

**ancillary service regional NPB** means **regional NPB** arising from changes in prices or quantities in the **wholesale market** for a **specified ancillary service**. **Ancillary service regional NPB** may be calculated for **ancillary service BBIs**

**annual benefit-based charge** has the meaning in subclause 35(2)

**annual cap recovery charge** has the meaning in subclause 112(1)

**annual charges** means the following **transmission charges** for a **customer** and **pricing year**:

- (a) **annual connection charges**;
- (b) **annual benefit-based charges**;
- (c) **annual cap recovery charge**;
- (d) **annual prudent discount recovery charge**;
- (e) **annual residual charge**

**annual connection charge** has the meaning in subclause 24(2) or 24(3)

**annual prudent discount recovery charge** has the meaning in subclause 138(5)

**annual residual charge** has the meaning in subclause 68(2)

**anticipatory BBI** has the meaning in subclause 27(2)

**anticipatory connection asset** has the meaning given in subclause 26(3)

**anytime maximum demand (connection)** or **AMDC** means, for a **customer, connection location** and **pricing year**, the average of the 12 highest **offtake** quantities for the **customer** at

the **connection location** during **CMP A** for the **pricing year**, multiplied by 2 to convert to average **demand**

**anytime maximum demand (residual)** or **AMDR** means the amount calculated under clause 69 for a **load customer** and **pricing year**

**anytime maximum injection (connection)** or **AMIC** means, for a **customer, connection location** and **pricing year**, the average of the 12 highest **injection** quantities for the **customer** at the **connection location** during **CMP A** for the **pricing year**, multiplied by 2 to convert to average **supply**

**Appendix A allocation** means, for an **Appendix A customer** and **Appendix A BBI** and subject to clause 10(8), the **Appendix A customer's BBI customer allocation** for the **Appendix A BBI** specified in Appendix A to 2 decimal places

**Appendix A BBI** means the following **interconnection investments**:

Bunnythorpe Haywards      the **interconnection investment** approved by the **Commission** on 9 May 2014 as the Bunnythorpe-Haywards A and B Lines Conductor Replacement Project, including all amendments to that approved project subsequently approved by the **Commission**

HVDC      all **interconnection investments** in the **HVDC link commissioned** on or before 23 July 2019

LSI Reliability      the **interconnection investment** approved by the Electricity Commission on 6 September 2010 as the Lower South Island Reliability Transmission Investment, including all amendments to that approved project subsequently approved by the Electricity Commission or **Commission**

LSI Renewables      the **interconnection investment** approved by the Electricity Commission on 9 August 2010 as the Lower South Island Renewables Investment, including all amendments to that approved project subsequently approved by the Electricity Commission or **Commission**, but excluding the **post-2019 CUWLP investment**

NIGU      the **interconnection investment** approved by the Electricity Commission on 5 July 2007 as the North Island Grid Upgrade, including all amendments to that approved project subsequently approved by the Electricity Commission or **Commission**

UNIDRS      the **interconnection investment** approved by the Electricity Commission on 5 July 2010 as the Upper North Island Dynamic Reactive Support Investment, including all amendments to that approved project subsequently approved by the Electricity Commission or **Commission**

Wairakei Ring      the **interconnection investment** approved by the Electricity Commission on 20 February 2009 as the Wairakei Ring

Investment, including all amendments to that approved project subsequently approved by the Electricity Commission or  
**Commission**

**Appendix A beneficiary** means, for an **Appendix A BBI**, an **Appendix A customer** who has a positive **Appendix A allocation** for the **Appendix A BBI**

**Appendix A customer** means a person specified in Appendix A, even if not a current **customer** at the time this definition is applied

**application** means an application to **Transpower** under this **transmission pricing methodology**, including an application for a **prudent discount** or **reassignment**

**application fee** means a fee for a type of **application published** by **Transpower**, if any

**application requirements** means, for an **application**, the content requirements for the **application published** by **Transpower**

**asseted** means, for an asset comprised in a **BBI**, that there is sufficient information about the asset in **Transpower's** fixed asset register for **Transpower** to calculate accurately the part of the **BBI's covered cost** for a **pricing year** that relates to the asset

Clause 3 **asseted**: inserted, on 31 July 2023, by clause 5(3) of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Amendments) 2023.

**assumptions book** means a document **published** by **Transpower** containing assumptions and detailed methodologies that **Transpower**—

- (a) intends to apply for allocating and adjusting **benefit-based charges**; and
- (b) does not expect to vary between **BBIs** except according to the method (**standard method, simple method** or Appendix A) used to calculate their **BBI customer allocations**

**avoided charges** means—

- (a) for an **inefficient bypass prudent discount**—
  - (i) the **transmission charges** the relevant **customer** would avoid paying if the relevant **alternative project** were implemented—
    - (A) assessed relative to the **transmission charges** the **customer** would pay if the **alternative project** were not implemented; and
    - (B) assuming none of the **alternative project costs** for the **alternative project** would be recovered through **transmission charges**; less
  - (ii) the absolute value of any reduction in **settlement residue** that would be paid to the **customer** if the **alternative project** were implemented, assessed relative to the **settlement residue** that would be paid to the **customer** if the **alternative project** were not implemented; and
- (b) for a **stand-alone cost prudent discount**—
  - (i) the relevant **customer's connection charges, benefit-based charges** and **residual charge**; less
  - (ii) **settlement residue** paid to the **customer**

Clause 3 **avoided charges**: inserted, on 31 July 2023, by clause 5(3) of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Amendments) 2023.

**avoided transmission charges** [*Revoked*]

Clause 3 **avoided transmission charges**: revoked, on 31 July 2023, by clause 5(1) of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Amendments) 2023.

**back-dated prudent discount** means a **prudent discount** for which the **application**—

(a) is received by **Transpower** within 6 months of the date on which **Transpower** first publishes the **application requirements** and the **application fee**, if any, for the relevant type of **prudent discount (inefficient bypass prudent discount or stand-alone cost prudent discount)**; and

(b) is not rejected by **Transpower** under subclause 14(1), 115(1) or 115(2)

**battery storage** means equipment functioning together as a single entity that is able to both—

(a) take **electricity** and store the energy in another form; and

(b) inject that energy as **electricity** into the **grid**, a **local network**, a **non-grid network** or **consuming plant**

**BBI customer allocation** means a **customer's** allocation of the **benefit-based charge** for a **BBI**—

(a) specified in or calculated under this **transmission pricing methodology**; and

(b) as adjusted under this **transmission pricing methodology**

**BBI prudent discount recovery charge** means a charge calculated under subclause 138(1) for a **prudent discount**, **customer** and **pricing year**

**BBI reassessment factor** has the meaning in subclause 102(4)

**beneficiary** means, for a **BBI**, a **customer** who has a positive **BBI customer allocation** for the **BBI**

**benefit factor** has the meaning in subclause 83(7)

**benefit-based charge** means a charge described in subclause 2(b) and calculated under clause 35 for a **BBI**, **beneficiary** and **pricing year**

**benefit-based charge adjustment event** has the meaning in subclause 81(1)

**benefit-based investment** or **BBI** means—

(a) an **Appendix A BBI**; or

(b) a **post-2019 BBI**

**benefitting customer** means, for an **application** for an **inefficient bypass prudent discount**, any **customer** named in the **application** whose **transmission charges** would be reduced if the **alternative project** for the **application** were implemented

**cap condition** means the condition specified in subclause 110(2)

**cap recovery charge** means a charge described in subclause 2(c) and calculated under clause 112 for a **customer** and **pricing year**

**cap recovery-relevant charges** means, for a **customer** and **pricing year**, the **customer's**—

(a) **annual benefit-based charges** for the **Appendix A BBIs** and **pricing year**; and

(b) **annual residual charge** for the **pricing year**,

net of any **prudent discount** of those **transmission charges** for the **customer** and **pricing year**

**cap reduction** means the total reduction in a **capped customer's transmission charges** for a **pricing year** under subclause 110(1)

**capacity** means the rated capacity of an asset to (as the case may be)—

- (a) consume or generate **electricity**; or
  - (b) take **electricity** from or inject **electricity** into a **network**; or
  - (c) transmit or **distribute electricity**,
- in each case measured in units appropriate for the context

**capacity measurement period** or **CMP** means a period over which a calculation under this **transmission pricing methodology** is made, being either:

**CMP A** for **pricing year n**, **capacity year n-2**. **CMP A** is relevant to calculating **connection charges**

**CMP B** for a **BBI**, the period ending on the last **trading period** of the most recent complete **capacity year** before the **final investment decision date** for the **BBI (capacity year n)** and starting on the first **trading period** of **capacity year n-4**. **CMP B** is relevant to calculating **benefit-based charges** for **BBIs** under a **standard method**

**CMP C** for the first **simple method period**, the period ending on the last **trading period** of the second most recent complete **capacity year** before the **first pricing year (capacity year n)** and starting on the first **trading period** of **capacity year n-4**

for a subsequent **simple method period**, the period ending on the last **trading period** of the second most recent complete **capacity year** before the first **pricing year** of the **simple method period (capacity year n)** and starting on the first **trading period** of **capacity year n-4**.

**CMP C** is relevant to calculating **benefit-based charges** for **BBIs** under the **simple method**

**CMP D** the period from the first **trading period** of **financial year 2014** to the last **trading period** of **financial year 2017**. **CMP D** is relevant to calculating **benefit factors** and **residual charges**

**CMP E** for **pricing year n**, the period from the first **trading period** of **financial year n-8** to the last **trading period** of **financial year n-5**. **CMP E** is relevant to calculating **residual charges**

**CMP F** for a **SSCGU**, the period ending on the last **trading period** of the most recent complete **capacity year** before the **SSCGU** occurred (**capacity year n**) and starting on the first **trading period** of **capacity year n-4**. **CMP F** is relevant to adjusting **benefit-based charges** for **high-value BBIs**

**CMP G** the period from the first **trading period** of **pricing year 2015** to the last **trading period** of **pricing year 2019**. **CMP G** is relevant to calculating **difference caps**

**capacity year** means a period of 12 months starting on 1 September and ending on 31 August.  
**Capacity year n** means the **capacity year** starting in year n

**capital charge** means **Transpower’s** return on its investment in an asset

**capped charges** means, for a **capped customer** and **pricing year**, the **capped customer’s**:

- (a) **annual benefit-based charges** for the **Appendix A BBIs** and **pricing year**; and
- (b) **annual residual charge** for the **pricing year**
- (c) *[Revoked]*

Clause 3 **capped charges** paragraph (b): amended, on 31 July 2023, by clause 5(2)(a) of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Amendments) 2023.

Clause 3 **capped charges** paragraph (c): revoked, on 31 July 2023, by clause 5(2)(b) of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Amendments) 2023.

**capped customer** means—

- (a) for the **first pricing year**, a **customer**, other than in its capacity as a **generator**, who was a **customer** during **pricing year 2019** and at least 2 **pricing years** preceding **pricing year 2019**; and
- (b) for each subsequent **pricing year**, any such **customer** who had a **cap reduction** for the previous **pricing year**

**closing RAB value** has the meaning in the **Transpower IMs**

**coincident peak offtake** has the meaning in subclause 65(8)

**Commission** means the Commerce Commission established by section 8 of the Commerce Act 1986

**commissioned** has the meaning in clause 5

**commissioning date** means the date an asset, **connection investment** or **interconnection investment** (including a **BBI**) is **commissioned**

**compliance investment** means an investment by **Transpower** in an existing **grid asset** or **transmission alternative** to ensure the **grid asset** or **transmission alternative** is maintained, and can be operated, in accordance with **good electricity industry practice**. A **compliance investment** may also be an **enhancement investment**, **refurbishment investment** or **replacement investment**

**connection asset** has the meaning in subclause 21(1), and includes “deep” **connection assets** as described in paragraph 22(5)(b)

**connection charge** means a charge described in subclause 2(a) and calculated under clause 24 for a **customer** and **pricing year** and—

- (a) a **connection asset** and **connection location**; or
- (b) a **connection transmission alternative**

**connection charge adjustment event** has the meaning in clause 76

**connection customer allocation** means a **customer’s** allocation of the **connection charge** for a **connection asset** and **connection location** calculated under clause 32

**connection investment** means a **transmission investment** or group of related **transmission investments** exclusively in 1 or more **connection assets** or **connection transmission alternatives**

**connection link** has the meaning in paragraph 20(1)(e)

**connection node** has the meaning in paragraph 20(1)(d)

**connection region** means a region determined by **Transpower** under subclause 62(4)

**connection transmission alternative** means a **transmission alternative** to the extent it is an alternative to an investment in a **connection asset**, as determined by **Transpower**

**consuming plant** means—

- (a) equipment that consumes **electricity**, regardless of size, including electrical appliances as defined in the Electricity Act 1992; and
- (b) **battery storage** when charging

**continuing BBI** has the meaning in subclause 84(5) or 85(4)

**contributing customer** means, for a **funded asset**—

- (a) a **customer** who funded, or is funding, all or part of the capital cost of the **funded asset** under an **investment agreement**; or
- (b) a **customer** who funded, or is funding, all or part of the capital cost of the **funded asset** through **connection charges**

**counterfactual** means, for a **BBI**, the expected future **grid** state assuming the **BBI** is not **commissioned**

**covered cost** means the amount of **recoverable revenue** allocated to a **BBI** for a **pricing year** calculated under subclause 39(1)

**CPI** means the consumers price index (all groups) published by Stats NZ

**curtailed energy** means **unserved energy** or **unsupplied energy**

**customer** means a **designated transmission customer**

**demand factor** means the scaling factor for **regional NPB** for **regional demand groups** under the **simple method** calculated under clause 64(4)

**depreciation** means depreciation of an asset calculated in accordance with the **Transpower IMs**

**de-rate** means, for an asset or **plant**, to alter the asset or **plant** physically so that the asset's or **plant's capacity** is permanently reduced

**difference cap** has the meaning in clause 111(1)

**direct supplied load customer** means, for a **connection location** and **trading period**, a **connected asset owner** who—

- (a) owns or controls a **local network** or **consuming plant** connected to the **grid** at the **connection location**; and
- (b) has **embedded electricity** at the **connection location** of the type defined in paragraph 4(1)(b) for the **trading period**

**discounted BBI** means—

- (a) for an **inefficient bypass prudent discount**, a **BBI** that would be bypassed by the relevant **alternative project**; or
- (b) for a **stand-alone cost prudent discount**, a **BBI** of which the **prudent discount recipient** is a **beneficiary**

**economic life** means, for an asset, the asset's physical asset life as defined in the **Transpower IMs**

**EDB ID determination** means the *Electricity Distribution Information Disclosure Determination 2012* [2012] NZCC 22

**EDB IMs** means the *Electricity Distribution Services Input Methodologies Determination 2012* [2012] NZCC 26

**efficient stand-alone investment** has the meaning in clause 135

**eligible BBI** means a **BBI**, including a **BBI** that is currently **reassigned** or was previously **reassigned**, for which both of the following conditions are satisfied (as applicable):

- (a) the total **closing RAB value** of all assets comprised in the **BBI** for the most recent complete **financial year**, adjusted by the **BBI reassignment factor** for any current **reassignment** the **BBI** is subject to, is at least the **reassignment threshold**;
- (b) if the **BBI** is a **post-2019 BBI**, either—
  - (i) at least 10 years have passed since the **BBI's commissioning date**; or
  - (ii) since the **BBI's commissioning date**—
    - (A) a **customer** permanently disconnected from the **grid** at a **connection location** at which the **customer** was a **beneficiary** of the **BBI** when it disconnected; and
    - (B) that disconnection, by itself and without taking into account other events, caused the **BBI's BBI reassignment factor** to decrease by at least 0.2; or
  - (iii) since the **BBI's commissioning date**—
    - (A) a **customer** who is a **beneficiary** of the **BBI** permanently disconnected **plant** from the **grid**; and
    - (B) that disconnection, by itself and without taking into account other events, caused the **BBI's BBI reassignment factor** to decrease by at least 0.2

**eligible person** means, for an **application** for **reassignment** or a proposal to reverse a **reassignment**—

- (a) a **beneficiary** of the **BBI** to which the **application** or proposal relates; or
- (b) a person who owns or controls **embedded plant** connected to the **local network** or **grid-connected plant** of a **beneficiary** of the **BBI**

**embedded** means, for **plant**, that the **plant** is connected to a **local network** or to **grid-connected plant**. If the **plant** is also connected to the **grid**, **Transpower** may treat the **plant** as part **embedded** and part **grid-connected**

**embedded electricity** has the meaning in paragraph 4(1)(b), 4(1)(c) or 4(1)(d) for a **customer** and **trading period**

**enhancement investment** means a **transmission investment** that is not a **refurbishment investment** or **replacement investment**. An **enhancement investment** may also be a **compliance investment**

**event pricing year** means the **pricing year** during which an **adjustment event** occurs

**exacerbated price** means, for a **regional customer group**, **factual** and **counterfactual**, a price at a **market node** in the **regional customer group's modelled region** that, due to a **modelled constraint** is—

- (a) higher in the **factual** than the **counterfactual**; or
- (b) lower in the **counterfactual** than a price at another **market node** in the **counterfactual** that is in a **modelled region** for a different **regional customer group** of the same type (**regional demand group** or **regional supply group**)

**exempt post-2019 investment** means an **interconnection investment**, other than the **post-2019 CUWLP investment**, that is—

- (a) **commissioned** after 23 July 2019 and before the start of **financial year 2021**; and
- (b) a **refurbishment investment, replacement investment or enhancement investment** in respect of an **Appendix A BBI** or another **interconnection investment commissioned** on or before 23 July 2019

**exempt pricing year** means, for an **adjustment event** and **customer**—

- (a) the **event pricing year**; and
- (b) the **pricing year** after the **event pricing year** if the **adjustment event** occurred less than 1 month before the deadline for **Transpower** notifying the **customer** of its **transmission charges** for the **pricing year** under the relevant **transmission agreement**

**expected effective full commissioning date** means, for a **BBI**, a date determined by **Transpower**, which must fall within the period from (and including) the **BBI's** expected **commissioning date** to (and including) the **BBI's** expected **full commissioning date**, by which sufficient **grid assets** and **transmission alternatives** comprised in the **BBI** are expected to have been **commissioned** such that all of the **BBI's** principal benefits will have been released

**factual** means, for a **BBI**, the expected future **grid** state assuming the **BBI** is **fully commissioned**

**final investment decision date** means, for a **BBI**, the date **Transpower** makes its final decision to proceed with its investment in the **BBI**

**financial year** means a period of 12 months starting on 1 July and ending on 30 June.  
**Financial year n** means the **financial year** starting in year n

**first pricing year** means the first **pricing year** to which this **transmission pricing methodology** applies

**forecast loading period** has the meaning in subclause 102(1)

**forecast peak loading** has the meaning in subclause 102(2)

**full commissioning date** means the date a **connection investment** or **interconnection investment** (including a **BBI**) is **fully commissioned**

**fully commissioned** has the meaning in clause 5

**funded asset** means a **connection asset**—

- (a) **commissioned** after the start of the **first pricing year**; and
- (b) (all or part of the capital cost of which was funded, or is being funded, by a **customer** under an **investment agreement**

**future regional customer group** means a **regional customer group**—

- (a) that is expected to have no members when the relevant **post-2019 BBI** is **commissioned**; and
- (b) the future members of which (if any) will be new **customers** and **customers** who connect new **plant** to the **grid**

**GAAP** means generally accepted accounting practice in New Zealand

**GEIP** (standing for good electricity industry practice) means, for an **alternative project**, the exercise of that degree of skill, diligence, prudence, foresight and economic management that would reasonably be expected from a skilled and experienced asset owner engaged in the management of the **alternative project**, under conditions comparable to those applicable to the **alternative project**, consistent with applicable law, safety and environmental protection

**generating plant** has the meaning in Part 1 of this Code and includes **battery storage** when discharging

**grid assets** has the meaning in subclause 17(1)

**grid point of connection** means a **point of connection** to the **grid**

**gross energy** has the meaning in subclause 4(5)

**GXP tie** means a situation in which a **connected asset owner's assets** are simultaneously connected to the **grid** at more than 1 **point of connection**

**high-value** means, for a **BBI**, that the sum of—

- (a) the depreciated value of the assets comprised in the **BBI**; and
- (b) expected future **TA opex** for the **interconnection transmission alternatives** comprised in the **BBI**,

is, at the relevant time, more than the base capex threshold as defined in the **Transpower Capex IM**

**high-value intervening BBI** means a **post-2019 BBI**—

- (a) with a **final investment decision date** before the start of the **first pricing year**; and
- (b) **commissioned** on or before the last day of the **financial year** that precedes the **pricing year** after the **first pricing year**; and
- (c) expected to be **high-value** when **fully commissioned**

**high-voltage grid** means the part of the **grid** with a nominal voltage of 220 kV or more

**HILP event** means a low probability event or group of events that, if it or they occurred, would have a high impact on **unserved energy** other than by way of cascade failure, as determined by **Transpower**

**host customer** means, for **embedded plant**, the **customer** who owns or controls the **local network** or **grid-connected plant** the **embedded plant** is connected to

**HVDC asset** means a **grid asset** that is part of the **HVDC link**

**HVDC opex** means—

- (a) **availability costs** allocated to the **HVDC owner**; and
- (b) insurance premiums for the **HVDC link**

**ID WACC** means, for **Transpower** or a **distributor**, the post-tax or pre-tax (as the context requires) **WACC** determined by the **Commission** under the **Transpower IMs** or **EDB IMs** for the purposes of **Transpower's** or the **distributor's** information disclosure regulation under Part 4 of the Commerce Act 1986

**independent expert** means an independent person who is a recognised technical expert in the matter that has been referred to him or her. In appointing an **independent expert**, the party referring the matter to the **independent expert** must nominate 3 persons and the other party may agree that any 1 of them be appointed. Failing agreement between the parties, the **independent expert** will be appointed by the **Authority**

**independent verification** means, for an **application**, a written report on the accuracy and sufficiency of the information and analysis contained in the **application** prepared by 1 or more persons who are—

- (a) recognised technical experts on the subject matter of the **application**; and
- (b) independent of the **customer** making the **application**; and
- (c) approved by **Transpower**

**indirect supplied load customer** means, for a **connection location** and **trading period**, an **asset owner** who—

- (a) owns or controls a **local network**, **consuming plant** or **generating plant** connected to the **grid** at the **connection location**; and
- (b) has **embedded electricity** at the **connection location** of the type defined in paragraph 4(1)(c) for the **trading period**

**individual NPB** means **NPB** for a **customer** calculated under clause 47 or 57 or subclause 61(1)

**inefficient bypass prudent discount** means a discount of a **customer's transmission charges** provided under this **transmission pricing methodology** for the purpose in clause 127

**injection** means—

- (a) for a **trading period** and a **customer's grid point of connection**, the positive net quantity of **electricity** flow into the **grid** at the **grid point of injection** from the **customer's assets** during the **trading period** (if any); and
- (b) for a **trading period** and a **customer's connection location**, the positive net quantity of **electricity** flow into the **grid** at all of the **customer's grid points of connection** at the **connection location** during the **trading period** (if any)

**injection customer** means, for a **connection location** and **trading period**, a **customer** at the **connection location** who has **injection** at the **connection location** for the **trading period**

**interconnection asset** has the meaning in subclause 21(2)

**interconnection investment** means a **transmission investment** or group of related **transmission investments** exclusively in 1 or more **interconnection assets** or **interconnection transmission alternatives**

**interconnection link** has the meaning in paragraph 20(1)(f)

**interconnection node** has the meaning in paragraph 20(1)(a)

**interconnection transmission alternative** means a **transmission alternative** to the extent it is not a **connection transmission alternative**

**intra-regional allocator** has the meaning in subclause 65(1), 65(2), 65(3) or 65(4) for the relevant **regional customer group**

**investment agreement** means—

- (a) a contract entered into at any time between **Transpower** and another person (who may or may not be a **customer**) under which—
  - (i) **Transpower** agrees to provide any new, **upgraded** or modified **transmission investment**; or
  - (ii) the other person agrees to make a contribution to the capital, maintenance, operating or other cost of a **transmission investment**, including—
    - (iii) a **new investment agreement contract**; and

- (iv) a contract to move or remove **grid assets**; or
- (b) an agreement deemed to be an **investment agreement** under paragraph 28(5)(b)

**investment agreement asset** means a **grid asset** provided under an **investment agreement**

**investment grid** means a simplified model of the **grid** for a **market BBI's factual or counterfactual** that models—

- (a) all existing **branches** and **market nodes**, as those **branches** and **market nodes** may be added to or removed in the **market BBI's factual or counterfactual** (as the case may be); and
- (b) the **constraints** of the **HVDC link**, as those **constraints** would be in the **market BBI's factual or counterfactual** (as the case may be); and
- (c) the **market BBI's modelled constraints**, as those **constraints** would be in the **market BBI's factual or counterfactual** (as the case may be)

**investment reassignment factor** has the meaning in subclause 102(3)

**investment region** means a **modelled region** under the **simple method** where a **BBI** or part of a **BBI** is located

**investment test** means the investment test applied to a **tested investment** under section III of Part F of the **rules** or the **Transpower Capex IM**

**land and buildings** has the meaning in subclause 17(3)

**large** means, subject to clause 7—

- (a) for **plant**, that the **plant**—
  - (i) is connected to the **grid**; or
  - (ii) has **capacity** of at least 10 **MW**; and
- (b) for an **upgrade** of **plant**, that the **plant's capacity** has increased by at least 10 **MW** compared to the **plant's capacity** before the **upgrade**; and
- (c) for a **de-rating** of **plant**, that the **plant's capacity** has reduced by at least 10 **MW** compared to the **plant's capacity** before the **de-rating**

**link** has the meaning in subclause 19(3)

**load customer** means a **customer** who, at a **connection location** during a **trading period**, is or was (as the context requires) 1 or more of the following:

- (a) an **offtake customer**;
- (b) a **direct supplied load customer**;
- (c) an **indirect supplied load customer**;
- (d) a **supplying load customer**

**loop** has the meaning in paragraph 20(1)(b)

**low-value** means, for a **BBI**, that the sum of—

- (a) the depreciated value of the assets comprised in the **BBI**; and
- (b) expected future **TA opex** for the **interconnection transmission alternatives** comprised in the **BBI**,

is, at the relevant time, not more than the base capex threshold as defined in the **Transpower Capex IM**

**low-voltage grid** means the part of the **grid** with a nominal voltage of less than 220 kV

**market BBI** means a **post-2019 BBI** that is expected to have a material impact on prices or quantities in the **wholesale market** for **electricity** relative to the **post-2019 BBI's**

**counterfactual.** A **market BBI** may also be an **ancillary service BBI** or a **reliability BBI**, but cannot be a **resiliency BBI**

**market node** means a **GXP** or **GIP**

**market regional NPB** means **regional NPB** arising from changes in prices or quantities in the **wholesale market for electricity**. **Market regional NPB** is calculated for **market BBIs**

**market scenario** means, for a **BBI**, a future state for factors that influence **NPB** for the **BBI**

**material damage** means destruction of, or substantial damage to, a **BBI**, as determined by **Transpower**

**maximum gross demand** has the meaning in subclause 4(6)

**maximum revenue** means, for a **pricing year**, the maximum revenue **Transpower** is permitted to recover for the **pricing year**, as determined by the **Commission** under Part 4 of the Commerce Act 1986. At the date of this **transmission pricing methodology**, this is the most recently updated forecast SMAR for the **pricing year** under the **Transpower IPP**

**MCP opex** means operating costs of the type described in clause 3.1.3(1)(d) of the **Transpower IMs**, being operating costs relating to major capex projects

**mixed connection asset** means a **connection asset** that, as well as connecting a **customer**, is used for **grid** operation generally

**modelled constraint** means, for a **market BBI**—

- (a) a **constraint** affecting a new **grid asset** comprised in the **market BBI**; or
- (b) a **constraint** that would be alleviated materially if the **market BBI** were **fully commissioned**, as determined by **Transpower**

**modelled region** means a region defined in, or determined by **Transpower** under—

- (a) for a **BBI** under the **price-quantity method**, subclause 50(1), 54(3), 55(4) or 56(3) depending on the type of **regional NPB** being calculated; and
- (b) for a **BBI** under the **resiliency method**, clause 58; and
- (c) for a **BBI** under the **simple method**, subclause 62(1)

**monthly benefit-based charge** has the meaning in subclause 35(3)

**monthly cap recovery charge** has the meaning in subclause 112(2)

**monthly charges** means the following **transmission charges** for a **customer** and **pricing year**:

- (a) **monthly connection charges**;
- (b) **monthly benefit-based charges**;
- (c) **monthly cap recovery charge**;
- (d) **monthly prudent discount recovery charge**;
- (e) **monthly residual charge**

**monthly connection charge** has the meaning in subclause 24(4)

**monthly prudent discount recovery charge** has the meaning in subclause 138(6)

**monthly residual charge** has the meaning in subclause 68(3)

**net private benefit** or **NPB** (which may be negative, zero or positive)—

- (a) means, for a **regional customer group** or **customer**, the sum of the quantified benefits (positive values) and disbenefits (negative values) the **regional customer group** or **customer** is expected to receive from the relevant **BBI**; and
- (b) for a **host customer**, includes the sum of the quantified benefits (positive values) and disbenefits (negative values) the **embedded plant** owners connected to the **host customer's local network** or **grid-connected plant** are expected to receive from the relevant **BBI**

**node** has the meaning in subclause 19(1)

**nominated peak kVar** means, for a **connected asset owner**, **zone** and **capacity year**, the quantity  $\sum_j Q_{xjz}$  in subclause 8.67(2) of this Code calculated using the **connected asset owner's** nomination for the **zone** applying from the most recent 1 March before the start of the **capacity year**

**non-contributing customer** means, for a **funded asset**, a **customer** who—

- (a) is connected by the **funded asset** at a **connection location**; and
- (b) was not a **contributing customer** for the **funded asset** before connecting to it

**non-grid network** means a system of **lines**, substations and other **works**, used primarily for the conveyance of **electricity**, that is not part of the **grid** or connected to the **grid**, including an **embedded network**

**notional IRA value** has the meaning in clause 67

**offtake** means—

- (a) for a **trading period** and a **customer's grid point of connection**, the positive net quantity of **electricity** flow out of the **grid** at the **grid point of connection** into the **customer's assets** during the **trading period** (if any); and
- (b) for a **trading period** and a **customer's connection location**, the positive net quantity of **electricity** flow out of the **grid** at all of the **customer's grid points of connection** at the **connection location** during the **trading period** (if any)

**offtake customer** means, for a **connection location** and **trading period**, a **customer** at the **connection location** who has **offtake** at the **connection location** for the **trading period**

**opening RAB value** has the meaning in the **Transpower IMs**

**optimised replacement cost** means, for any **grid asset** or group of **grid assets**, the optimised replacement cost of the **grid asset** or group of **grid assets** as at 1 July 2006, as determined by **Transpower**

**other regional NPB** means **regional NPB** that is not **market regional NPB**, **ancillary service regional NPB** or **reliability regional NPB**. **Other regional NPB** may be calculated for **market BBIs**, **ancillary service BBIs** or **reliability BBIs**

**outage scenario** means, for a **reliability BBI**, an **outage** or other event or group of events affecting access to **transmission services** in respect of which the **reliability BBI** is expected to have a material impact on **curtailed energy**

**peak BBI** means a **post-2019 BBI** for which the investment need is primarily attributable to meeting **peak demand**

**peak offtake trading period** has the meaning in paragraph 65(8)

**periods of benefit** has the meaning in paragraph 51(3)(b)

**plant** means **consuming plant** or **generating plant**

**post-2019 BBI** means an **interconnection investment commissioned** after 23 July 2019 excluding any **exempt post-2019 investment**. To avoid doubt—

- (a) the **post-2019 CUWLP investment** is a **post-2019 BBI**; and
- (b) an **interconnection investment** that is an **Appendix A BBI** is not a **post-2019 BBI**; and
- (c) an **interconnection investment** carried out or approved as a single project or programme may comprise more than 1 **post-2019 BBI**; and
- (d) a **post-2019 BBI** may comprise more than 1 **interconnection investment**, each of which is carried out or approved as a single project or programme

**post-2019 CUWLP investment** means the **interconnection investment** comprising the following **transmission investments** approved by the Electricity Commission on 9 August 2010 as part of the Lower South Island Renewables Investment:

- (a) thermal upgrade of the circuits between Cromwell and Twizel;
- (b) re-conductoring of the circuits between Roxburgh and Livingstone

**PQ WACC** means, for **Transpower** or a price-quality regulated **distributor**, the vanilla or pre-tax (as the context requires) **WACC** determined by the **Commission** under the **Transpower IMs** or **EDB IMs** for the purposes of **Transpower's** or the **distributor's** price-quality regulation under Part 4 of the Commerce Act 1986

**pre-commencement adjustment event** means an event that occurred before the start of the **first pricing year** and—

- (a) would have been an **adjustment event** had it occurred at or after the start of the **first pricing year**; or
- (b) **Transpower** determines is analogous to an **adjustment event**

**pre-existing customer** means a **customer** who has been a member of a **regional customer group** for (as the case may be)—

- (a) at least 2 full **capacity years** during **CMP B** for the relevant **BBI**; or
- (b) at least 2 full **capacity years** during **CMP C** for the relevant **simple method period**

**pre-existing load customer** means a **load customer** who was a **customer** for the whole of **CMP D**

**pre-start adjustment event** means, for a **post-2019 BBI**, an event that occurred before the start of the **post-2019 BBI's start pricing year** and would have been a **benefit-based charge adjustment event** for the **post-2019 BBI** had it occurred at or after the start of the **post-2019 BBI's start pricing year**. To avoid doubt, a **pre-start adjustment event** may be a **pre-commencement adjustment event**

**previous discount** means—

- (a) a prudent discount provided under the **previous transmission pricing methodology**; or
- (b) a discount provided under a **notional embedding contract**; or
- (c) any other discount or effective discount of transmission charges provided under an agreement between **Transpower** and a **customer** entered into before the start of the **first pricing year**

**previous transmission pricing methodology** means, as applicable, the transmission pricing methodology comprised in this Code when it came into force, as subsequently amended up to the date this **transmission pricing methodology** came into force

**price-quantity method** means the method for calculating **NPB** for a **post-2019 BBI** specified in clauses 44 to 55

**pricing year** has the meaning given to that term in the **Transpower IMs**. At the date of this **transmission pricing methodology**, a **pricing year** is a period of 12 months starting on 1 April and ending on 31 March. **Pricing year n** means the **pricing year** starting in year n

**prior contributing customer** means, for a **funded asset** and in respect of a **non-contributing customer** for the **funded asset**, a **contributing customer** who was connected to the **funded asset** before the **non-contributing customer** became connected to the **funded asset**

**prudent discount** means an **inefficient bypass prudent discount** or **stand-alone cost prudent discount**. The amount of a **prudent discount** for a **pricing year** is—

- (a) the absolute value of the reduction in the **prudent discount recipient's transmission charges** for the **pricing year** under the **prudent discount** agreement; less
- (b) the annuity payable by the **prudent discount recipient** under the **prudent discount** agreement

**prudent discount calculation period** means, for a **prudent discount**, the period—

- (a) starting at the start of the **prudent discount's start pricing year**, or estimated **start pricing year** assuming the **prudent discount** is approved; and
- (b) ending—
  - (i) for an **inefficient bypass prudent discount**, at the end of the remaining **economic life** of the **grid assets** the relevant **alternative project** would bypass, up to a maximum of 15 years after the start of the **prudent discount calculation period**; or
  - (ii) for a **stand-alone cost prudent discount**, 15 years after the start of the **prudent discount calculation period**

**prudent discount confirmation date** means, for a **prudent discount** decision, the date the following conditions are satisfied:

- (a) either—
  - (i) the relevant **customer** has confirmed to **Transpower** in writing that it does not intend to refer any aspect of **Transpower's** decision to an **independent expert**; or
  - (ii) the **customer** did not refer any aspect of **Transpower's** decision to an **independent expert** before time to do so expired under subclause 120(3); or
  - (iii) an **independent expert** has made final binding decisions on all aspects of **Transpower's** decision referred to the **independent expert**:
- (b) for an approved **prudent discount**, **Transpower** and the **customer** have entered into a **prudent discount** agreement for the **prudent discount**

**prudent discount practice manual** means a document **published** by **Transpower** containing assumptions and detailed methodologies that **Transpower**—

- (a) intends to apply for assessing **applications** for **prudent discounts**; and
- (b) does not expect to vary between **prudent discount applications** except according to whether the **application** is for an **inefficient bypass prudent discount** or **stand-alone cost prudent discount**

**prudent discount rate** means—

- (a) subject to paragraph 128(c), for an **inefficient bypass prudent discount**—
  - (i) if the applicant **customer** is a **distributor**, the **distributor's ID WACC** at the time of the **application** for the **prudent discount**; or

- (ii) if the applicant **customer** is not a **distributor** but is subject to another regulated **WACC**, that **WACC**; or
  - (iii) otherwise, a **WACC** for the applicant **customer** determined by **Transpower** by applying the methodology for estimating **ID WACC** for **distributors** in the **EDB IMs**; or
- (b) for a **stand-alone cost prudent discount**, **Transpower's ID WACC** at the time of the **application** for the **prudent discount**

**prudent discount recipient** means a **customer** receiving a **prudent discount**

**prudent discount recovery charge** means a charge described in subclause 2(d), being a **BBI prudent discount recovery charge** or **residual prudent discount recovery charge**

**reassignment** means a reassignment of all or part of the **covered cost** of a **BBI** to **residual revenue**, and **reassigned** has a corresponding meaning

**reassignment amount** has the meaning in clause 97

**reassignment confirmation date** means, for a **reassignment** decision, the date any of the following conditions is satisfied:

- (a) the relevant **eligible person** has confirmed to **Transpower** in writing that it does not intend to refer any aspect of **Transpower's** decision to an **independent expert**:
- (b) **expert** the **eligible person** did not refer any aspect of **Transpower's** decision to an **independent** before time to do so expired under subclause 104(3) or paragraph 107(2)(c):
- (c) an **independent expert** has made final binding decisions on all aspects of **Transpower's** decision referred to the **independent expert**

**reassignment practice manual** means a document **published** by **Transpower** containing assumptions and detailed methodologies that **Transpower**—

- (a) intends to apply for assessing **applications** for **reassignment**; and
- (b) does not expect to vary between **reassignment applications**

**reassignment threshold** has the meaning in subclause 98(2)

**recent customer** means a **customer** who has been a member of a **regional customer group** for (as the case may be)—

- (a) less than 2 full **capacity years** during **CMP B** for the relevant **BBI**; or
- (b) less than 2 full **capacity years** during **CMP C** for the relevant **simple method period**

**recent load customer** means a **load customer** who is not a **pre-existing load customer**

**recoverable revenue** means, for a **pricing year**—

- (a) **maximum revenue** for the **pricing year**; less
- (b) any part of **maximum revenue** for the **pricing year** **Transpower** is able or required to recover other than through **transmission charges**, including by way of annuities paid by **prudent discount recipients**

**reduction event** means, for a **pre-existing load customer**, a reduction in the **pre-existing load customer's** expected **maximum gross demand** compared to the **pre-existing load customer's** **AMDR** baseline calculated under clause 70(1)—

- (a) of at least 10 MW; and
- (b) due to an event or series of directly related events that—
  - (i) occurred, or **Transpower** determines will occur, after the start of **CMP D** and before the start of the **first pricing year**; and
  - (ii) **Transpower** determines was, were or will be beyond the **pre-existing load customer's** reasonable control, not being—
    - (A) a change in the basis for calculating future transmission charges; or
    - (B) a change in the market for the **pre-existing load customer's** products or services, other than the services the **pre-existing load customer** supplies to an **embedded plant** owner connected to the **pre-existing load customer's local network** or **grid-connected plant** who is not a **related entity** of the **pre-existing load customer**; or
    - (C) any of the events specified in paragraph (d) of the definition of **force majeure event** in clause 1.1(1) of this Code occurring in respect of the **pre-existing load customer** or a **related entity** of the **pre-existing load customer**; or
    - (D) 1 or more events that could have been prevented by the **customer** by the exercise of a reasonable standard of care; and
- (c) that **Transpower** determines is reasonably likely to persist for at least 5 years after the event or series of directly related events occurred or will occur

**refurbishment investment** means a **transmission investment** that—

- (a) is asset refurbishment as defined in the **Transpower Capex IM**; or
- (b) would be asset refurbishment as defined in the **Transpower Capex IM** if an investment in a **transmission alternative** were an investment in the **grid**.

A **refurbishment investment** may also be a **compliance investment**

**regional customer group** means a **regional demand group** or **regional supply group**

**regional demand group** means a group of **customers** in a **modelled region** defined in, or determined by **Transpower** under—

- (a) for a **BBI** under the **price-quantity method**, subclause 50(2), 53(3), 55(4) or 55(3) depending on the type of **regional NPB** being calculated; and
- (b) for a **BBI** under the **resiliency method**, clause 58; and
- (c) for a **BBI** under the **simple method**, clause 63

**regional NPB** means **NPB** for a **regional customer group** calculated in accordance with, or assumed under, a **standard method** or the **simple method**

**regional supply group** means a group of **customers** in a **modelled region** defined in, or determined by **Transpower** under —

- (a) for a **BBI** under the **price-quantity method**, subclause 50(2), 54(3), 55(4) or 56(3) depending on the type of **regional NPB** being calculated; and
- (b) for a **BBI** under the **simple method**, clause 63

**regulatory asset base** or **RAB** means **Transpower's** record of **commissioned** assets and their depreciated values used to calculate **maximum revenue** under the **Transpower IMs**

**regulatory control period** or **RCP** means a regulatory period as defined in the **Transpower IPP**

**related entity** of a person means another person that controls, is controlled by, or is under common control with the first person, including a person that—

- (a) is a related company of the first person as defined in section 2(3) of the Companies Act 1993; or
- (b) would be a related company of the first person under that section if both the first person and the other person were companies registered under that Act

**reliability BBI** means a **post-2019 BBI** that is expected to reduce materially **curtailed energy** relative to the **post-2019 BBI's counterfactual** if there is an **outage** or other event or group of events affecting access to **transmission services**. A **reliability BBI** may also be a **market BBI** or **ancillary service BBI**, but cannot be a **resiliency BBI**

**reliability regional NPB** means **regional NPB** arising from changes in **curtailed energy**. **Reliability regional NPB** is calculated for **reliability BBIs**

**replacement cost** means, for a **grid asset** and subject to subclause 34(5), the cost of replacing the **grid asset**, either separately or as part of a group of **grid assets**, with a modern equivalent **grid asset** with the same service potential

**replacement cost adjustment factor** means, for a **grid asset** or group of **grid assets**, the **optimised replacement cost** for the **grid asset** or group of **grid assets** divided by the cost, as at (or about) 1 July 2006, of replacing the **grid asset** or group of **grid assets** with the then modern equivalent **grid asset** with the same service potential, as determined by **Transpower**

**replacement investment** means a **transmission investment** that—

- (a) is asset replacement as defined in the **Transpower Capex IM**; or
- (b) would be asset replacement as defined in the **Transpower Capex IM** if an investment in a **transmission alternative** were an investment in the **grid**.

A **replacement investment** may also be a **compliance investment**

**residual charge** means a charge described in subclause 2(e) and calculated under clause 68 for a **load customer** and **pricing year**

**residual charge adjustment event** has the meaning in subclause 92(1)

**residual charge adjustment factor** or **RCAF** means the factor calculated under clause 71 for a **load customer** and **pricing year**

**residual prudent discount recovery charge** means a charge calculated under subclause 138(3) for a **prudent discount**, **customer** and **pricing year**

**residual revenue** means, for a **pricing year**, **recoverable revenue** for the **pricing year** less all **transmission charges** for the **pricing year** other than **residual charges**. The minimum value of **residual revenue** for a **pricing year** is 0

**resiliency BBI** means a **post-2019 BBI** for which the investment need is primarily attributable to mitigating a risk of cascade failure or a **HILP event**. A **resiliency BBI** cannot also be a **market BBI**, **ancillary service BBI** or **reliability BBI**

**resiliency method** means the method for calculating **NPB** for a **resiliency BBI** specified in clauses 56 to 58

**reverse flow** means **electricity** exiting the **grid** at a **GXP** and entering the **grid** at another **GXP** as a result of a **GXP tie**

**scenario** means a **market scenario** or **outage scenario**

**Schedule 1 allocation** means, for a **Schedule 1 customer** and **Appendix A BBI**, the **Schedule 1 customer's** allocation for the **Appendix A BBI** specified in Schedule 1 of the **2020 guidelines** to 2 decimal places

**Schedule 1 beneficiary** means, for an **Appendix A BBI**, a **Schedule 1 customer** who has a positive **Schedule 1 allocation** for the **Appendix A BBI**

**Schedule 1 customer** means a person specified in Schedule 1 of the **2020 guidelines**, even if not a current **customer** at the time this definition is applied

**simple method** means the method for calculating **NPB** for a **low-value post-2019 BBI** specified in clauses 59 to 64

**simple method BBC cap** has the meaning in subclause 83(5B)

Clause 3 **simple method BBC cap**: inserted, on 10 April 2024, by clause 4 of the Electricity Industry Participation Code Amendment (Benefit-based Charge Adjustment Event: New Customer) 2024.

**simple method contribution** has the meaning in clause 64(7)

**simple method factor** has the meaning in subclause 61(2)

**simple method period** has the meaning in clause 60

**small regional loop** has the meaning in paragraph 20(1)(c)

**specified ancillary service** means **instantaneous reserve, frequency keeping or voltage support**

**specified pre-start adjustment event** means, for a **post-2019 BBI** and **pre-existing customer**, a **pre-start adjustment event** for the **post-2019 BBI** that would have been a **benefit-based charge adjustment event** in any of paragraphs 81(1)(d) to 81(1)(h) in respect of the **pre-existing customer**

**stand-alone cost prudent discount** means a discount of a **customer's transmission charges** provided under this **transmission pricing methodology** for the purpose in clause 133

**standard method** means the **price-quantity method** or **resiliency method**

**standard method calculation period** means, for a **BBI**, the period—

- (a) starting on the first 1 January after the **BBI's expected effective full commissioning date**; and
- (b) ending on the earlier of—
  - (i) 20 years after that 1 January; and
  - (ii) the end of the useful life of the **BBI**, as determined by **Transpower**

**standard method rate** means, for a **BBI**—

- (a) if the **BBI** is a **tested investment**, the pre-tax, real discount rate used when the **BBI** was assessed under the **investment test**, excluding discount rates used only for sensitivity analysis; or
- (b) otherwise—
  - (i) the applicable rate **published** in the **assumptions book**; or
  - (ii) if there is no applicable rate **published** in the **assumptions book**, the rate in clause D6(3)(a) of the **Transpower Capex IM**

**start pricing year** means—

- (a) for a **connection investment**, the first **pricing year** that starts after the end of the **financial year** during which the **connection investment** was **commissioned**; or
- (b) for a **BBI**, the first **pricing year** that starts after the end of the **financial year** during which the **BBI** was **commissioned** (which, for an **Appendix A BBI**, is the **first pricing year**); or

- (c) for a **SSCGU**, the first **pricing year** that starts at least 6 months (or such shorter period as **Transpower** may determine is practicable) after the date of the **SSCGU**; or
- (d) for a **reassignment**, the first **pricing year** that starts at least 6 months (or such shorter period as **Transpower** may determine is practicable) after the **reassignment confirmation date**; or
- (e) for an **inefficient bypass prudent discount** and subject to paragraph 122(2), the first **pricing year** that starts—
  - (i) at least 6 months (or such shorter period as **Transpower** may determine is practicable) after the **prudent discount confirmation date**; and
  - (ii) on or after a date determined by **Transpower** based on the time that would be required for the **prudent discount recipient** to implement the relevant **alternative project** if the project to implement the **alternative project** had started on the date **Transpower** received the **application** for the **inefficient bypass prudent discount**; or
- (f) for a **stand-alone cost prudent discount** and subject to paragraph 122(2), the first **pricing year** that starts at least 6 months (or such shorter period as **Transpower** may determine is practicable) after the **prudent discount confirmation date**

**station** means a substation or switching station

**substantial sustained increase** means, for **large plant**, an increase in the **large plant's** expected annual **electricity** consumption or generation (as the case may be)—

- (a) of at least 25% since the last time the relevant **customer's BBI customer allocations** for 1 or more **BBIs** were calculated, as assessed under subclause 81(4); and
- (b) that is not attributable to a **large upgrade** of the **large plant**; and
- (c) that **Transpower** determines is reasonably likely to persist for at least 5 years after the start of the relevant **event pricing year**

**substantial sustained change in grid use** or **SSCGU** means an event or series of directly related events that result in a change in expected total annual **injection** or **offtake**—

- (a) of at least 5% of average total annual **injection** or **offtake** (as the case may be) over **CMP F**; and
- (b) that **Transpower** determines is reasonably likely to persist for at least 5 years after the event or series of directly related events occurred

**supplying load customer** means, for a **connection location** and **trading period**, a **generator** who—

- (a) owns or controls **generating plant** connected to the **grid** at the **connection location**; and
- (b) has **embedded electricity** at the **connection location** of the type defined in paragraph 4(1)(d) for the **trading period**

**system limit** means a level of **supply**, **demand** or **electricity** flow at which the power system would not remain in a **satisfactory state** during and following an **outage scenario**, potentially requiring involuntary post-contingency generation or **demand** reduction

**system limit model** means a simplified model of the **grid** that—

- (a) models a **reliability BBI's factual, counterfactual, system limits and market scenarios**; and
- (b) applies the **reliability BBI's outage scenarios** to the **factual, counterfactual, system limits and market scenarios** to model the change in **curtailed energy** between the **reliability BBI's factual and counterfactual**

**TA opex** means operating costs for **transmission alternatives**

**tested investment** means a **connection investment** or **interconnection investment** that—

- (a) was approved by the Electricity Commission under section III of Part F of the **rules**; or
- (b) was individually approved by the **Commission** as a major capex project or listed project under the **Transpower Capex IM**; or
- (c) is a base capex project to which **Transpower** was required to apply a cost-benefit analysis under the **Transpower Capex IM**

**total gross energy** has the meaning in subclause 4(7)

**transmission charges** means the charges specified in clause 2

**transmission investment** means an investment by **Transpower** in the **grid** or a **transmission alternative**, including such an investment for which another person contributes to the capital, maintenance, operating or other cost under an **investment agreement**

**transmission services** means the following services provided by a **grid owner**:

- (a) electricity lines services, as defined in section 54C of the Commerce Act 1986, but excluding **system operator** services;
- (b) the provision of **transmission alternatives**

**Transpower Capex IM** means the *Transpower Capital Expenditure Input Methodology Determination 2012* [2012] NZCC 2

**Transpower IMs** means the *Commerce Act (Transpower Input Methodologies) Determination 2010* [2012] NZCC 17

**Transpower IPP** means the *Transpower Individual Price-Quality Path Determination 2020* [2019] NZCC 19

**Transpower operations facility** means a facility that is used by **Transpower** only to operate the **grid** and is not a **station**

**upgrade** means, for an asset or **plant**, to alter the asset or **plant** physically so that the asset's or **plant's capacity** is permanently increased

**unserved energy** (measured in kWh or MWh) means an amount by which **offtake** at 1 or more **GXP**s is curtailed

**unsupplied energy** (measured in kWh or MWh) means an amount by which **injection** at 1 or more **GIP**s is curtailed

**value of commissioned asset** has the meaning in the **Transpower IMs**

**value of lost load** or **VOLL** means, for a **reliability BBI**—

- (a) if the **reliability BBI** is a **tested investment**, the value of **unserved energy** used when the **reliability BBI** was assessed under the **investment test**, excluding values of **unserved energy** used only for sensitivity analysis; or
- (b) otherwise—
  - (i) the applicable value of **unserved energy published** in the **assumptions book**; or
  - (ii) if there is no applicable value of **unserved energy published** in the **assumptions book**, the value of **unserved energy** referred to in subclause 4(1) of Schedule 12.2 of this Code

**WACC** means weighted average cost of capital

**wholesale market model** means a simplified model of prices and quantities in the **wholesale market** for **electricity** (and only in that **wholesale market**) that—

- (a) models a **market BBI's factual, counterfactual and market scenarios**; and
- (b) assumes suppliers offer prices based on their marginal variable costs of supply; and
- (c) assumes perfectly inelastic demand up to 1 or more estimated costs of self-supply that are the same for all demand types; and
- (d) applies least-cost dispatch to the **market BBI's factual, counterfactual and market scenarios**, under the assumptions in paragraphs, (b) and (c) to model the change in prices and quantities in the **wholesale market for electricity** between the **market BBI's factual and counterfactual**

**write-down** means a reduction in an asset's **RAB** value or **value of commissioned asset** exclusively due to damage to, or destruction, stranding, decommissioning or disposal of, the asset, which may be a partial impairment or write-off

**zero RNPB investment region** has the meaning in subclause 83(12).

#### **4 Load Customers, Gross Energy and Maximum Gross Demand**

- (1) The different types of **load customer** are shown in figures 1, 2, 3 and 4 below. In figures 1, 2, 3 and 4, "LN" means **local network**, "CP" means **consuming plant**, "GP" means **generating plant**, "NGN" means **non-grid network** and "POC" means a **grid point of connection**. This subclause (1) is subject to subclause (2):
  - (a) In figure 1, a **customer** owning or controlling LN, CP or GP is an **offtake customer** to the extent of the **offtake** for the relevant **trading period**:
  - (b) In figure 2, a **customer** owning or controlling LN or CP is a **direct supplied load customer** to the extent of the generated **electricity** net of any coincident **injection** through LN or CP for the relevant **trading period (embedded electricity)**. The **embedded electricity** is referred to as the **direct supplied load customer's embedded electricity** "at" POC and the relevant **connection location** for the **trading period**:
  - (c) In figure 3, a **customer** owning or controlling LN, **grid-connected** CP or **grid-connected** GP is an **indirect supplied load customer** to the extent of the generated **electricity** net of any coincident **injection** through LN or **grid-connected** CP for the relevant **trading period (embedded electricity)**. The **embedded electricity** is referred to as the **indirect supplied load customer's embedded electricity** "at" POC and the relevant **connection location** for the **trading period**:
  - (d) In figure 4, a **customer** owning or controlling GP is a **supplying load customer** to the extent of the **embedded electricity** for the relevant **trading period**. The **embedded electricity** is referred to as the **supplying load customer's embedded electricity** "at" POC and the relevant **connection location** for the **trading period**.

Figure 1

Figure 2

Figure 3

Figure 4

- (2) If—
- (a) GP in figure 2 above is **battery storage**, the generated **electricity** referred to in paragraph (1)(b) is deemed to be 0; or
  - (b) **embedded** GP in figure 3 above is **battery storage**, the generated **electricity** referred to in paragraph (1)(c) is deemed to be 0; or
  - (c) GP in figure 4 above is **battery storage**, the **embedded electricity** referred to in paragraph (1)(d) is deemed to be 0.
- (3) If **Transpower** determines it has insufficient information to determine whether, or the extent to which, an amount of **electricity** was generated by **battery storage**, **Transpower** must assume none of that amount of **electricity** was generated by **battery storage**.
- (4) If a configuration of **consuming plant** and **generating plant** connected to the **grid** is such that the **customer** may be treated as either a **direct supplied load customer** or **supplying load customer**, the **customer's** status as a **direct supplied load customer** or **supplying load customer** must be determined by **Transpower**.
- (5) **Gross energy** (measured in kWh or MWh) means, for a **load customer**, **connection location** or **grid point of connection**, and **trading period**—
- (a) the **load customer's** **offtake** at the **connection location** or **grid point of connection** for the **trading period**; plus
  - (b) the **load customer's** **embedded electricity** at the **connection location** or **grid point of connection** for the **trading period**.
- (6) **Maximum gross demand** (measured in kW or MW) means, for a **load customer**, **connection location** or **grid point of connection**, and period, the **load customer's** maximum per-**trading period gross energy** at the **connection location** or **grid point of connection** during the period multiplied by 2.
- (7) **Total gross energy** (measured in kWh or MWh) for a **load customer** and period (TGE) is calculated as follows:

$$TGE = \left( \sum_l \sum_t GE_{tl} \right) - E_{battery}$$

where

$GE_{tl}$  is the **load customer's** **gross energy** for **trading period**  $t$  at **connection location**  $l$  during the period

$E_{battery}$  is total **injection** from all of the **load customer's** **grid-connected battery storage** over the period, if any.

## 5 Commissioning

- (1) An asset is **commissioned** when it is first commissioned as defined in the **Transpower IMs**.

- (2) A **connection investment** or **interconnection investment** (including a **BBI**) is **commissioned** when the first **grid asset** or **transmission alternative** comprised in it is **commissioned** or started (as the case may be).
- (3) A **connection investment** or **interconnection investment** (including a **BBI**) is **fully commissioned** when all **grid assets** and **transmission alternatives** comprised in it are **commissioned** or started (as the case may be).
- (4) Subject to subclauses (1) to (3), the time an asset, **connection investment** or **interconnection investment** (including a **BBI**) is **commissioned** or **fully commissioned** is to be determined by **Transpower**.

## 6 Connection and Disconnection

In this **transmission pricing methodology**, unless the context otherwise requires—

- (a) an asset becomes connected to a **network** at a **point of connection** at the time the **point of connection** is **commissioned**; and
- (b) an asset becomes disconnected from a **network** at a **point of connection** at the time the **point of connection** is **decommissioned**; and
- (c) subject to paragraphs (a) and (b), the time an asset becomes connected to or disconnected from a **network** or **plant** is to be determined by **Transpower**; and
- (d) **plant** is **grid-connected** only if it is directly connected to the **grid**; and
- (e) **embedded plant** is connected to a **local network** or **grid-connected plant** if the **embedded plant** is—
  - (i) directly connected to the **local network** or **grid-connected plant**; or
  - (ii) indirectly connected to the **local network** or **grid-connected plant** through other **plant** or a **non-grid network**.

## 7 Large Plant

Where **Transpower** is required under this **transmission pricing methodology** to assess whether **plant**, or an **upgrade** or **de-rating** of **plant**, is **large**, **Transpower** may make that assessment by combining 2 or more units of **plant** that are—

- (a) of the same type (**consuming plant** or **generating plant**); and
- (b) owned by the same person or **related parties**,

if **Transpower** determines it is reasonable in all the circumstances to do so.

## 8 Interpretation

In this **transmission pricing methodology**, unless the context otherwise requires—  
illustrated by the figure, table or associated commentary, the provisions being illustrated take precedence; and

- (a) all defined terms are shown in bold text; and
- (b) a term in bold text not defined in this **transmission pricing methodology** has the meaning given to it in Part 1 of this Code; and
- (c) any other grammatical form of a defined term has a corresponding meaning; and
- (d) if there is any inconsistency between the text description of a calculation for which there is formula and the formula, the formula takes precedence; and
- (e) if there is any inconsistency between an illustrative figure, table or associated commentary and the provisions of this **transmission pricing methodology** being a reference to **Transpower** means **Transpower** in its capacity as a **grid owner**; and
- (f) a reference—
  - (i) to the singular includes the plural and vice versa; and

- (ii) to a person includes an individual, company, other body corporate, association, partnership, firm, joint venture, trust or Crown entity; and
- (iii) to a clause, subclause, paragraph, subparagraph, Part or figure is to a clause, subclause, paragraph, subparagraph or Part of, or figure in, this **transmission pricing methodology**; and
- (iv) to any legislation, including this Code, the **Transpower IPP**, the **Transpower IMs** and the **Transpower Capex IM**, includes that legislation as amended or replaced from time to time; and
- (h) the word "including" is to be read as "including, but not limited to", and the word "includes" is to be read as "includes, without limitation"; and
- (i) a reference to a preceding **financial year** is a reference to the most recent complete **financial year** that precedes the start of the **pricing year** in respect of which the relevant calculation is undertaken or assessment is made; and
- (j) a reference to a **plant** owner is a reference to the person who owns or controls the **plant**; and
- (k) a reference to a **customer's offtake, embedded electricity or injection at a connection location** is a reference to the **customer's offtake, embedded electricity or injection at all grid points of connection at the connection location** where the **customer offtakes electricity, has embedded electricity or injects electricity** (as the case may be); and
- (l) a reference to a **load customer's (including an offtake customer's) or injection customer's connection location**:
  - (i) is a reference to all **grid points of connection at the connection location** where the **load customer offtakes electricity or has embedded electricity** or where the **injection customer injects electricity** (as the case may be); and
  - (ii) does not include any **connection location** where the **load customer** does not **offtake electricity** or have **embedded electricity** or where the **injection customer** does not **inject electricity** (as the case may be).

*Calculation of Transmission Charges*

**9 Transmission Charges Calculated Separately**

A **customer** may be both a **load customer** and an **injection customer** at a **connection location** (but cannot be both an **offtake customer** and **injection customer** at the **connection location** for the same **trading period**). If a **customer** is both a **load customer** and an **injection customer** at a **connection location**, the **customer's transmission charges** are calculated separately for the **customer** as a **load customer** and an **injection customer**, except as otherwise stated in this **transmission pricing methodology**.

**10 Calculations and Estimations**

- (1) Except as otherwise stated in this **transmission pricing methodology**—
  - (a) any calculation or estimation of a value under this **transmission pricing methodology** (including any **transmission charge**) is to be carried out by **Transpower**; and
  - (b) any input to a calculation or estimation of a value under this **transmission pricing methodology** is to be determined by **Transpower**; and
  - (c) to the extent a calculation or estimation of a value under this **transmission pricing methodology** requires modelling, **Transpower** may use the modelling tools it uses in its business from time to time, which may change over time.
- (2) To avoid doubt, **Transpower** is not required to maintain its access to a modelling tool it no longer uses in its business merely for the purpose of verifying previous calculations or

- estimations of values under this **transmission pricing methodology** that were made using the modelling tool.
- (3) If this **transmission pricing methodology** specifies a source for an input to a calculation or estimation of a value under this **transmission pricing methodology** but the source is not available or the input is not included in or provided by the source, the input is to be determined by **Transpower**.
- (4) Except as otherwise stated in this Code, **Transpower** may use the following information to calculate **allocation data** and is not required to (but may) use any other information:
- (a) **metering information:**
  - (b) information required to be provided by the **reconciliation manager** to **Transpower** under this Code, including under clause 28(b) of Schedule 15.4 of this Code:
  - (c) other **reconciled quantities** published or made available to **Transpower**:
  - (d) **half-hour metering information** required to be provided by **generators** to **Transpower** under this Code, including under clauses 13.136, 13.137 and 13.137A of this Code:
  - (e) indications and measurements required to be provided by a **participant** to the **system operator** under this Code, including under Technical Code C of Schedule 8.3 of this Code, that are published or made available to **Transpower**.
- (5) Except as otherwise stated in this **transmission pricing methodology**, **connection customer allocations**, **BBI customer allocations** and any other **transmission charge** allocators, and adjustments to those allocators, are calculated without regard to the impact of any **prudent discount** or **previous discount**.
- (6) **Transpower** must calculate or estimate all values under this **transmission pricing methodology**—
- (a) that are **connection customer allocations**, **BBI customer allocations** or other **transmission charge** allocators intended to sum to 1 or 100%, to at least 4 decimal places (if expressed as a decimal) or 2 decimal places (if expressed as a percentage), and **Transpower** is not obliged to calculate or estimate the values any more precisely than that; and
  - (b) that are in units of dollars, to 2 decimal places; and
  - (c) that are **supply** or **demand**, in whole kW; and
  - (d) that are **electricity**, in whole kWh.
- (7) If, after any methodology in this **transmission pricing methodology** is applied—
- (a) the **connection customer allocations** for a **connection asset**; or
  - (b) the **BBI customer allocations** for a **BBI**; or
  - (c) any other **transmission charge** allocators that are intended to sum to 1 or 100%, do not sum to 1 or 100%, **Transpower** must adjust all of the relevant **transmission charge** allocators on a pro rata basis to achieve a sum of 1 or 100% or as close to 1 or 100% as practicable given the precision of the **transmission charge** allocators.
- (8) The **BBI customer allocations** specified in Appendix A do not sum to 100% for every **Appendix A BBI** because they have been rounded to 2 decimal places. However, **Transpower** has calculated those **BBI customer allocations** to a greater number of decimal places and must use those more precise **BBI customer allocations**, as adjusted under this **transmission pricing methodology**, to calculate **benefit-based charges** and the **benefit factors** for the **Appendix A BBIs**. References in this **transmission pricing methodology** to an **Appendix A allocation** are to be interpreted accordingly.

- (9) If an **ID WACC**, **PQ WACC** or other regulated **WACC** is determined by the relevant regulator on a post-tax and not pre-tax basis, and a pre-tax **WACC** based on the post-tax **WACC** is required for a calculation under this **transmission pricing methodology**, the pre-tax **WACC** ( $W_{pre-tax}$ ) must be calculated as follows:

$$W_{pre-tax} = W_{post-tax} \times \frac{1}{1-r}$$

where

$W_{post-tax}$  is the post-tax **WACC**

$r$  is the corporate tax rate, as defined in the **Transpower IMs**, at the relevant time.

- (10) Subclause (9) also applies to calculating a post-tax **WACC** from a regulated pre-tax **WACC**, with a corresponding change to the formula.

## 11 Determinations

- (1) Matters under this **transmission pricing methodology** determined by **Transpower** are determined in **Transpower's** sole discretion while acting—
- reasonably; and
  - subject to subclause (2), in accordance with **GAAP**; and
  - subject to subclause (3), with reference to—
    - information made available to **Transpower** by or on behalf of **participants** and other persons with an interest in the determination; and
    - Transpower's** and (where published) other persons' financial and regulatory records, registers and disclosures, including the **RAB**; and
    - other information relevant to the determination **Transpower** is reasonably able to obtain.
- (2) If there is any inconsistency between the requirements of **GAAP** and the requirements of this **transmission pricing methodology**, this **transmission pricing methodology** takes precedence.
- (3) **Transpower** is not required to give equal weight to the information referred to in paragraph (1)(c).

## 12 Reverse Flow

- (1) This clause 12 applies if all of the following conditions are satisfied:
- a **customer** has an agreement with the **system operator** under clause 6 of Technical Code A of Schedule 8.3 of this Code;
  - the **customer** has notified **Transpower** in writing that there is **reverse flow** at a **connection location** as a result of a **GXP tie** authorised under the agreement referred to in paragraph (a);
  - the **customer** notified **Transpower** under paragraph 0 within 20 **business days** of the **reverse flow** starting;
  - Transpower** is reasonably satisfied there is **reverse flow** at the **connection location** as a result of a **GXP tie** authorised under the agreement referred to in paragraph (a).

- (2) Subject to subclause (3), **Transpower** must, despite anything else in this **transmission pricing methodology**—
  - (a) adjust the **customer's allocation data** for the **connection location** to mitigate or eliminate the impact of the **reverse flow**, as determined by **Transpower**; and
  - (b) use the adjusted **allocation data** to calculate future **transmission charges**.
- (3) Subclause (2) does not apply to any **allocation data** used to calculate **regional NPB** for a **regional customer group** under the **simple method**.
- (4) **Transpower** must **publish** the details of any adjustment it makes under subclause (2) within 20 **business days** of making the adjustment.

### 13 Exceptional Operating Circumstances

- (1) Subject to subclause (2), if **Transpower** determines—
  - (a) a **Transpower** requirement, **system operator** requirement, or planned or unplanned **outage** has caused exceptional operating circumstances in the power system; and
  - (b) those circumstances have resulted in a **customer's allocation data** not reflecting normal operating circumstances in the power system (a distortion),  
**Transpower** may, despite anything else in this **transmission pricing methodology**—
    - (c) adjust the **allocation data** to mitigate or eliminate the distortion, as determined by **Transpower**; and
    - (d) use the adjusted **allocation data** to calculate future **transmission charges**.
- (2) Subclause (1) does not apply to any **allocation data** used to calculate **regional NPB** for a **regional customer group** under the **simple method**.
- (3) **Transpower** must **publish** the details of any adjustment it makes under subclause (1) within 20 **business days** of making the adjustment.

### *General*

### 14 Applications, Application Fees and Application Requirements

- (1) **Transpower**—
  - (a) is not obliged to start assessing an **application**; and
  - (b) may suspend its assessment of, or reject, an **application**,  
if—
    - (c) the **application fee**, if any, for the **application** has not been paid; or
    - (d) the **application** does not comply with the relevant **application requirements**; or
    - (e) the applicant otherwise does not comply, or has not complied, with this **transmission pricing methodology** in relation to the **application**.
- (2) Subject to subclause (1), **Transpower** must—
  - (a) prioritise assessment of **applications** in the order they are received by **Transpower**; and
  - (b) complete its assessment of an **application** within a reasonable time of receiving it, having regard to the complexity of the **application** and the quality of the information provided by the applicant in support of it.

- (3) Any **application fee** must be reasonable having regard to **Transpower's** expected costs of assessing **applications** of the relevant type, and may be—
- (a) fixed or based on actual costs; and
  - (b) capped or uncapped; and
  - (c) up-front or staged; and
  - (d) refundable or non-refundable.
- (4) **Application requirements** must be reasonable having regard to the matters relevant to **Transpower's** assessment of **applications** of the relevant type.

**15 Consultation on Transmission Charges**

- (1) **Transpower** must consult on the following matters with at least the following groups before the relevant **transmission charges** or adjustments to them are finalised:

subject matter	minimum group to be consulted
Proposed <b>annual connection charges</b>	<b>Customers</b> who will pay the <b>connection charges</b>
Proposed material adjustment to <b>connection charges</b> during a <b>pricing year</b>	<b>Customers</b> who will pay the adjusted <b>connection charges</b>
Proposed starting <b>BBI customer allocations</b> for a <b>post-2019 BBI</b> expected to be <b>high-value</b> when <b>fully commissioned</b>	Public consultation
Proposed adjustment to the <b>BBI customer allocations</b> for a <b>post-2019 BBI</b> due to a <b>SSCGU</b>	Public consultation
Other proposed material adjustment to the <b>BBI customer allocations</b> for a <b>post-2019 BBI</b> expected to be <b>high-value</b> immediately before the adjustment	<b>Customers</b> who are or will be <b>beneficiaries</b> of the <b>post-2019 BBI</b>
Proposed allocation of <b>residual charges</b> for a <b>pricing year</b>	All <b>load customers</b>
Proposed material adjustment to the allocation of <b>residual charges</b> during a <b>pricing year</b>	All <b>load customers</b>

- (2) **Transpower** must consult publicly on the proposed **modelled regions** and **regional NPBs** under the **simple method**, and proposed **simple method factors**, for—
- (a) the first **simple method period**, before the start of the **first pricing year**; and
  - (b) each subsequent **simple method period**, before the start of the **simple method period**.

- (3) Consultation—
- (a) under subclause (1) on the proposed starting **BBI customer allocations** for a **high-value post-2019 BBI** or a proposed material adjustment to the **BBI customer allocations** for a **high-value post-2019 BBI**; and
  - (b) under subclause (2)
- must include information about any material departures from the assumptions and methodologies **published** in the **assumptions book** and the reasons for those departures.
- (4) Consultation under subclause (1) on—
- (a) the proposed starting **BBI customer allocations** for a **high-value post-2019 BBI**; or
  - (b) a proposed material adjustment to the **BBI customer allocations** for a **high-value post-2019 BBI**, including due to a **SSCGU**,
- must include an estimate of the **high-value post-2019 BBI's covered cost** when **fully commissioned**.
- (5) Consultation under subclause (1) or (2) may occur as part of **Transpower** or **Commission** consultation required under the **Transpower Capex IM**, other parts of this Code, or **transmission agreements**, either before or after the start of the **first pricing year**.

## **16 Information about Transmission Charges**

- (1) **Transpower** must provide each **customer** with reasonable information that is sufficient for the **customer** to understand the basis on which the **customer's annual charges** and **monthly charges** have been calculated. For a **load customer**, this information must include, for the relevant **pricing year**—
- (a) the amount of otherwise unallocated operating costs included in **residual revenue**; and
  - (b) **reassignment amounts** included in **residual revenue**.
- (2) The information referred to in subclause (1) may be provided to a **customer** as part of **Transpower's** obligation under a **transmission agreement** to notify the **customer** of **annual charges, monthly charges** and changes to them, either before or after the start of the **first pricing year**.

## Part B Grid Asset Classification

### 17 Grid Assets and Land and Buildings

- (1) Subject to subclause (3), **grid assets** are **assets** and other works (including land, easements, leases and other interests in land, buildings, containment facilities and other structures, but excluding **Transpower's** fibre optic network) that—
- (a) comprise or support the **grid**; and
  - (b) are—
    - (i) owned by or leased to **Transpower**, provided that if the **assets** or other works are leased by **Transpower** to another person then the **assets** or other works will only be **grid assets** if **Transpower** has expressly agreed in writing with that person that the **assets** or other works are to be treated as **grid assets** for the purposes of this **transmission pricing methodology**; or
    - (ii) owned by another person and not leased to **Transpower**, but only if **Transpower** has expressly agreed in writing with that person that the **assets** or other works are to be treated as **grid assets** for the purposes of this **transmission pricing methodology**.
- (2) **Transpower's** provision of, or agreement to provide, **grid assets** that facilitate the connection of other **assets** to the **grid** does not constitute **Transpower's** agreement to treat the other **assets** as **grid assets** for the purposes of subparagraph (1)(b)(ii).
- (3) An asset that was, immediately before the start of the **first pricing year**—
- (a) treated as a **grid asset** under the **previous transmission pricing methodology**; and
  - (b) not owned by or leased to **Transpower**,
- will not cease to be a **grid asset** merely because neither subparagraph (1)(b)(i) nor subparagraph (1)(b)(ii) applies to the asset.
- (4) **Land and buildings** are **grid assets** that are land, easements, leases or other interests in land, buildings, oil containment facilities, or other structures that are not comprised in the **grid**.
- (5) **Land and buildings** that support a part of the **grid** are referred to as being “part of” that part of the **grid**, together with the **grid assets** that comprise that part of the **grid**.

### 18 Partial Funding of Grid Assets

Subject to other legal requirements and **GAAP**, a **grid asset** the capital cost of which is partially funded under an **investment agreement**—

- (a) may be represented in **Transpower's** financial and regulatory records, registers and disclosures, including the **RAB**, as multiple **grid assets**; and
- (b) those **grid assets** may be treated as separate **grid assets** for the purposes of calculating **transmission charges**,

as necessary or convenient to ensure **Transpower** does not under-recover the total cost of the **grid asset** through this **transmission pricing methodology** and the **investment agreement**. To avoid doubt, **Transpower** must not use its discretion under this clause to over-recover the total cost of a **grid asset**.

## 19 Nodes and Links

- (1) A **node** is any of the following:
  - (a) a **connection location**;
  - (b) a **station** that is not a **connection location**;
  - (c) a location in the **grid** where a circuit diverges or terminates (such as a “tee” point, or a deviation of a circuit within a **line** to connect to a **station** where the **line** does not terminate).
- (2) For the purposes of paragraph (1)(c)—
  - (a) a circuit does not “diverge” at a location merely because it changes direction at the location, or transitions from overhead to underground or vice versa at the location; and
  - (b) adjacent towers, poles or other structures at which a circuit diverges may be treated as a single location.
- (3) Subject to subclause (8), a **link** is either a single circuit or multiple parallel circuits (of the same voltage) that are **grid assets** and connect 2 **nodes** (and includes any **grid assets**, such as circuit breakers, that are required to connect the **link** at either **node**).
- (4) To avoid doubt—
  - (a) a **Transpower operations facility** is not a **node**; and
  - (b) a circuit or multiple parallel circuits that are **grid assets** and connect—
    - (i) a **node**; and
    - (ii) a **Transpower operations facility** that is not connected to any other **node**, is not a **link**.
- (5) Figures 5 and 6 below illustrate how **nodes** and **links** are identified under subclauses (1) to (4):
  - (a) Figure 5 shows a physical **grid** configuration. CL1, CL2 and CL3 are **connection locations**. TOF is a **Transpower operations facility**. T1, T2, T3 and T4 are towers. The lines are circuits between the **connection locations** or **Transpower operations facility** and the towers. All of the circuits are **grid assets** except the circuit between CL2 and CL3:
  - (b) Figure 6 shows the same **grid** configuration as figure 5 but in the form of **nodes** and **links**. **Nodes** N2, N4 and N5 correspond to **connection locations** CL1, CL2 and CL3 respectively. **Node** N1 corresponds to the divergence at tower T1. **Node** N3 corresponds to the divergence at towers T2 and T3, which are adjacent and treated as a single location. There is no **node** corresponding to tower T4 because the change of direction of the circuits at T4 is insufficient to constitute a divergence. There is no **node** corresponding to **Transpower operations facility** TOF because a **Transpower operations facility** is not a **node**. There is no **link** between N4 and N5 because the circuit between CL2 and CL3 is not a **grid asset**. There is no **link** between T3 and TOF because TOF is not a **node**.

Figure 5

Figure 6

- (6) Subclauses (1) to (3) must be applied to identify **nodes** and **links** contemporaneously and not prospectively or retrospectively. If a **grid asset** is expected to change from being a **node** or **link** to not being a **node** or **link**, or vice versa, once a future event occurs (such as the **commissioning** or **decommissioning** of it or another **asset**), that does not affect the **node** or **link** status of the **grid asset** before the event occurs.
- (7) Subject to subclause (8), if a **grid asset** was a **node** or **link** before this **transmission pricing methodology** came into effect or before an event occurred, that does not prevent the **grid asset** ceasing to be a **node** or **link** when this **transmission pricing methodology** came into effect or when the event occurred, or vice versa.
- (8) A circuit or circuits that are not **grid assets** but, immediately before this **transmission pricing methodology** came into effect, comprised a “link” under the **previous transmission pricing methodology**—
- (a) will be treated as a **link** despite not being **grid assets**; but
  - (b) will cease to be a **link** if the circuit or circuits otherwise cease to meet the requirements for comprising a **link** under this **transmission pricing methodology**.

## 20 Connection and Interconnection Nodes and Links

- (1) **Nodes** and **links** are identified as **connection nodes** or **connection links** or **interconnection nodes** or **interconnection links** according to the following rules:
- (a) an **interconnection node** is any **node** connected to 2 or more **nodes** in a **loop**, other than a **small regional loop**:
  - (b) a **loop** is a continuous path of **nodes** and **links** with the same start and end **node**:
  - (c) a **small regional loop** is a **loop** between any group of **nodes** (excluding the **nodes** at the Benmore and Haywards substations) with only a single **link** from the **loop** to a **node** outside the **loop** that—
    - (i) is part of another **loop**; or
    - (ii) ultimately links to another **loop**, either directly or indirectly through other **nodes**:
  - (d) a connection node is any node that is not an interconnection node, including all nodes in a small regional loop:
  - (e) a **connection link** is a **link** with a **connection node** at 1 or both of its ends:
  - (f) an **interconnection link** is a **link** that connects 2 **interconnection nodes**.
- (2) Figures 7, 8 and 9 below illustrate how **small regional loops**, **interconnection nodes** and **links**, and **connection nodes** and **links** are identified under subclause (1):
- (a) In figures 7 and 8, **nodes** N2, N3 and N4 comprise a **small regional loop** because in each case there is only 1 **link** (from N4) to another **loop**. In figure 7, the **link** from N4 to the other **loop** is direct because **interconnection node** N6 is part of the other **loop**. In figure 8, the **link** from N4 to the other **loop** is indirect through **connection node** N5. In figures 7 and 8, N2, N3 and N4 are **connection nodes** and the **links** between and to them are **connection links**. In figure 8, the **link** from N5 to N6 is also a **connection link**:
  - (b) In figure 9, **nodes** N2, N3 and N4 do not comprise a **small regional loop** because there is more than 1 **link** (from N3 and N4) to another **loop**. Even if the **link** from N4 to N6 did not exist, N2, N3 and N4 would still not comprise a **small regional loop** because there are 2 **links** to another **loop** from N3. In figure 9, N2, N3 and N4 are **interconnection nodes** and (apart from the **link** from **connection node** N1 to N2, which is a **connection link**) the **links** between and to them are **interconnection links**.

Figure 7

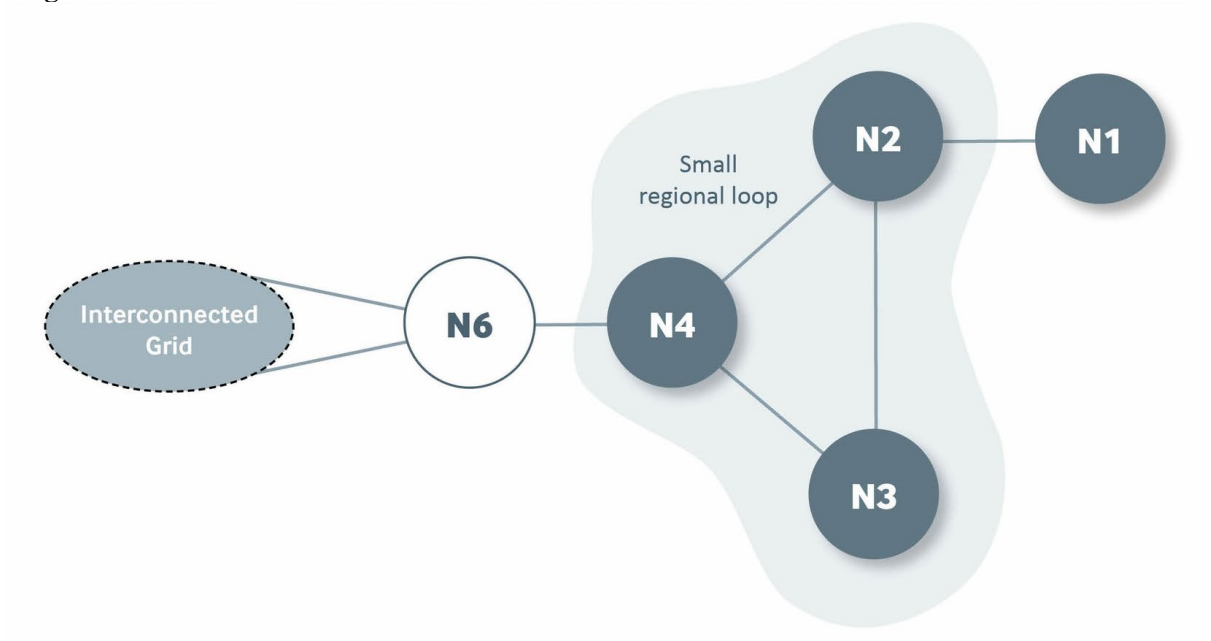

Figure 8

Figure 9

- (3) Subject to subclause (4), subclause (1) must be applied to classify **nodes** and **links** contemporaneously and not prospectively or retrospectively. If a **node** or **link** is expected to change from a **connection node** or **link** to an **interconnection node** or **link**, or vice versa, once a future event occurs (such as the **commissioning** or **decommissioning** of it or another **asset**), that does not affect the classification of the **node** or **link** before the event occurs.
- (4) If a group of **nodes** or **links** that are to be provided as part of the same project are **commissioned** in a staged manner, the **connection** or **interconnection** status of each **node** and **link** in the group must be determined prospectively based on all **nodes** and **links** in the group being **commissioned**. However—
- (a) if all the **nodes** and **links** have not been **commissioned** by the start of the **pricing year** that is at least 9 months after the first **node** or **link** is **commissioned**—
- (i) subclause (3) will apply from the start of that **pricing year** and not this subclause (4) (so that the **nodes** and **links** will be classified contemporaneously from the start of that **pricing year**); and
- (ii) once all the **nodes** and **links** are **commissioned**, subclause (3) will apply from the start of the first **pricing year** that starts after the last **node** or **link** is **commissioned** (so that the **nodes** and **links** will be classified contemporaneously from the start of that **pricing year**); and
- (b) this subclause (4) must not be applied to classify an **interconnection node** or **interconnection link** as a **connection node** or **connection link**.
- (5) If a **node** or **link** was classified as a **connection node** or **link** before this **transmission pricing methodology** came into effect or before an event occurred, that does not prevent the **node** or **link** being re-classified as an **interconnection node** or **link** when this **transmission pricing methodology** came into effect or when the event occurred, or vice versa.

## 21 Connection and Interconnection Assets

- (1) A **connection asset** is any of the following that is not an **HVDC asset**:
- (a) a **grid asset** at a **connection node**, other than voltage support equipment that is not an **investment agreement asset**;
- (b) at an **interconnection node** that is a **connection location**—
- (i) any **grid asset** that is used to connect a **customer's assets** to the **grid**. This may include:

- (A) a supply transformer, feeder bay, or supply transformer high voltage or low voltage breaker:
  - (B) a low voltage breaker, low voltage bus section breaker, voltage transformer, revenue meter, or other equipment that is on the same bus as a feeder; and
- (ii) a proportion of the **land and buildings** at the **connection location** ( $LB_{conn}$ ) calculated as follows:

$$LB_{conn} = \frac{RC_{conn\ total}}{RC_{total}}$$

where

$RC_{conn\ total}$  is the total **replacement cost** of all **grid assets** described in subparagraph (i) at the **connection location** at the end of the preceding **financial year**

$RC_{total}$  is the total **replacement cost** of all **grid assets** (excluding **land and buildings**) at the **connection location** at the end of the preceding **financial year**:

- (c) a **grid asset** that is part of a **connection link**. If a **line** is included in a **connection link** and 1 or more other **links**, the part of the **line** ascribed to the **connection link** must be determined according to the length of the **line** included in the **connection link** relative to the total length of the **line**.
- (2) An **interconnection asset** is any **grid asset** that is not a **connection asset**, and includes any **HVDC asset**.

## 22 Associating Connection Assets with Connection Locations and Customers

- (1) A **connection asset** that—
- (a) is at a **connection location**; or
  - (b) if the **connection location** is a **connection node**, connects the **connection location** (directly or indirectly) to an **interconnection node**,
- is referred to as a **connection asset** "for" the **connection location**, "that connects" (or other grammatical form of that phrase) the **customers** at the **connection location** and that those **customers** are "connected to" (or other grammatical form of that phrase).
- (2) A **customer** who owns or controls **assets** connected at a **connection location** is referred to as a **customer** "at" the **connection location**.
- (3) Subject to subclause (4), a **connection asset** for a **connection location** is referred to as "shared" between the **customers** at the **connection location**.
- (5) Figure 10 below is the **node** and **link** configuration in figure 7 above and illustrates how **connection assets** are associated with **connection locations** and **customers** under subclauses (1) to (3):
- (a) N1, N3, N4 and N6 are **connection locations** at which **customers** A, B, C, D and E are connected. The smaller circles within N1, N3, N4 and N6 are **connection assets** at those **connection locations** that connect the specific **customers** shown only:

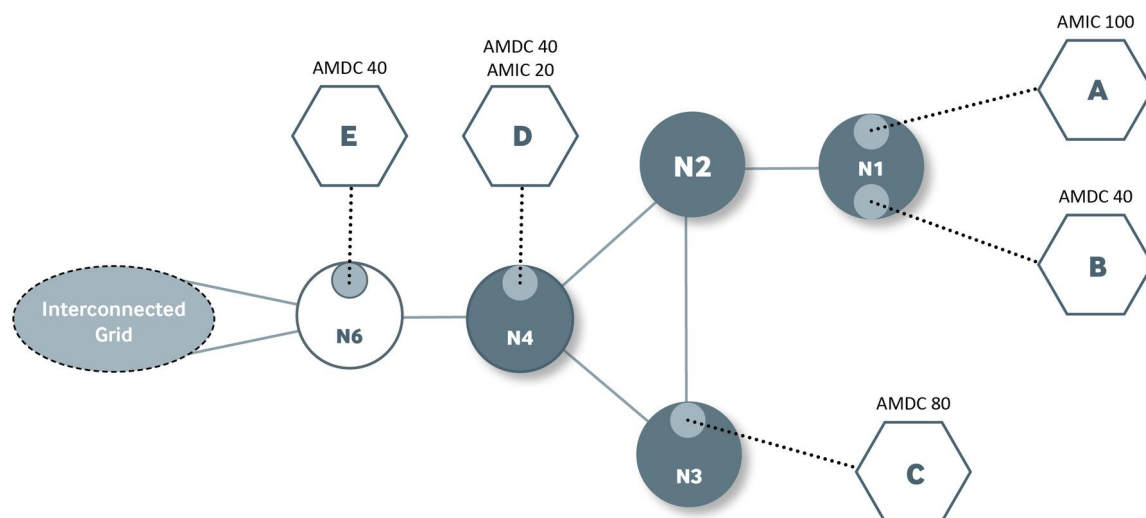

- (b) The following table shows which **connection assets** are “for” the **connection locations** at N1, N3, N4 and N6. The **links** with an asterisk are “deep” **connection assets** for the relevant **connection location** because they are not located at, and do not directly connect to, the **connection location**:

<b>connection assets</b>	N1	N3	N4	N6
at <b>connection location</b>	Y	Y	Y	Y
in <b>link</b> N1-N2	Y	N	N	N
in <b>link</b> N2-N3	Y*	Y	N	N
in <b>link</b> N3-N4	Y*	Y	N	N
in <b>link</b> N2-N4	Y*	Y*	N	N
in <b>link</b> N4-N6	Y*	Y*	Y	N

- (c) The following table shows how the **connection assets** at and between N1, N2, N3, N4 and N6 are “shared” between **customers** A, B, C, D and E:

<b>connection assets</b>	sharing
at N1	shared between A and B, apart from A- or B-specific <b>connection assets</b>
at N2	shared between A, B and C
at N3	shared between A, B and C, apart from C-specific <b>connection assets</b>
at N4	shared between A, B, C and D, apart from D-specific <b>connection assets</b>
at N6	shared between A, B, C, D and E, apart from E-specific <b>connection assets</b>
in <b>link</b> N1-N2	shared between A and B
in <b>link</b> N2-N3	shared between A, B and C
in <b>link</b> N3-N4	shared between A, B and C
in <b>link</b> N2-N4	shared between A, B and C
in <b>link</b> N4-N6	shared between A, B, C and D

Figure 10

### 23 Discretion to Classify and Reclassify as Connection Asset

- (1) Despite anything else in this **transmission pricing methodology**, **Transpower** may classify or (subject to subclause (2)) reclassify any **grid asset** that would otherwise be an **interconnection asset** as a **connection asset** if **Transpower** determines—
  - (a) the **grid asset** provides or will provide **transmission services** to 1 or more **customers** of a type and nature typically provided by **connection assets**; and
  - (b) the **grid asset** does not provide or will not provide any material **transmission services** of a type and nature typically provided by **interconnection assets**; and
  - (c) it is reasonable in all the circumstances to classify or reclassify the **grid asset** as a **connection asset**.
- (2) **Transpower** must not reclassify a **grid asset** as a **connection asset** under subclause (1) retrospectively.
- (3) **Transpower** must—
  - (a) before classifying or reclassifying a **grid asset** as a **connection asset** under subclause (1), consult with all **customers** who will be connected to the **grid asset**. This consultation may occur either before or after the start of the **first pricing year**; and
  - (b) notify those **customers** of **Transpower's** decision whether or not to classify or reclassify the **grid asset** as a **connection asset** under subclause (1).
- (4) A **customer** referred to in subclause (3) may, within 20 days of **Transpower** notifying the **customer** of **Transpower's** decision, refer **Transpower's** decision under subclause (1) to an **independent expert** for review.
- (5) The **independent expert's** decision will be binding on **Transpower** and the **customer**, and will have effect as if **Transpower** had made the decision itself, except that the **customer** may not refer the decision to an **independent expert** again.
- (6) The costs of the **independent expert** must be met by the **customer** unless the **independent expert** decides **Transpower's** decision was unreasonable, in which case **Transpower** may be required to meet all or some of the costs of the required to meet all or some of the costs of the **independent expert**, as determined by the **independent expert**.

## Part C Connection Charges

### 24 Calculation of Connection Charges

- (1) Only **customers** connected to **connection assets** pay **connection charges**.
- (2) A **customer's annual connection charge** for a **connection asset**, **connection location** and **pricing year** (CC) is calculated as follows:

$$CC = ((A + FA + M + O) \times CA) - RBT$$

where

A is the **asset component** for the **connection asset** and **pricing year** calculated under clause 26

FA is the **customer's funded asset component** for the **connection asset** and **pricing year** calculated under clause 28

M is the **maintenance component** for the **connection asset** and **pricing year** calculated under clause 30

O is the **operating component** for the **connection asset** and **pricing year** calculated under clause 31

CA is the **customer's connection customer allocation** for the **connection asset**, **connection location** and **pricing year**

RBT is the **customer's funded asset rebate** for the **connection asset**, **connection location** and **pricing year** calculated under clause 29.

- (3) A **customer's annual connection charge** for a **connection location** and **pricing year** (ACC) is calculated as follows:

$$ACC = \sum_a CC_a$$

where  $CC_a$  is the **customer's annual connection charge** for **connection asset** a for the **connection location** and **pricing year**.

- (4) A **customer's annual connection charge** for a **connection transmission alternative** and **pricing year** (TACC) is calculated as follows:

$$TACC = TAC \times \frac{\sum_l ACC_l}{\sum_l ACC_{l\ total}}$$

where

TAC is the **TA opex** for the **connection transmission alternative** and preceding **financial year**, less any contribution to the **TA opex** under **investment agreements**

ACC<sub>l</sub> is the **customer's annual connection charge** for **connection location l** and the previous **pricing year**, where **connection location l** is a **connection location** that would be connected by a **connection asset** for which the **connection transmission alternative** is an alternative

ACC<sub>l total</sub> is the total of all **customers' annual connection charges** for **connection location l** and the previous **pricing year**.

- (5) A **customer's monthly connection charge** for a **pricing year** (MCC) is calculated—  
(a) for a **connection location**, as follows:

$$MCC = \frac{ACC}{12}$$

where ACC is the **customer's annual connection charge** for the **connection location** and **pricing year**; and

- (b) for a **connection transmission alternative**, as follows:

$$MCC = \frac{TACC}{12}$$

where TACC is the **customer's annual connection charge** for the **connection transmission alternative** and **pricing year**.

- (6) **Connection charges** are calculated for each **pricing year** before the start of the **pricing year**.  
(7) A **connection charge** may be adjusted, including during a **pricing year**, under clauses 76 to 80 if there is a **connection charge adjustment event**.

## 25 Start of Connection Charges

Except as otherwise required under any relevant **transmission agreement**, **Transpower** must start the **connection charges** for a **connection investment** from the **connection investment's start pricing year**. To avoid doubt, this clause does not apply to charges under an **investment agreement**.

Clause 25: amended, on 31 July 2023, by clause 6 of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Amendments) 2023.

## 26 Asset Component

- (1) Subject to subclause (2), **Transpower** may designate a **connection asset**, or an actual or notional part of a **connection asset**, as anticipatory for a **pricing year** if—  
(a) the **connection asset** or part of the **connection asset** was **commissioned** at or after the start of the **first pricing year**; and  
(b) **Transpower** determines that the **connection asset** or part of the **connection asset** is not likely to be required during the **pricing year** by the **customers** connected to the **connection asset**.

- (2) Once **Transpower** has designated a notional part of a **connection asset** as anticipatory for a **pricing year** under subclause (1), **Transpower** must not designate a greater notional part of the **connection asset** or the whole **connection asset** as anticipatory for any subsequent **pricing year**.
- (3) A **connection asset** or part of a **connection asset** designated as anticipatory for a **pricing year** under subclause (1) is an **anticipatory connection asset** for the **pricing year**. If the **anticipatory connection asset** is part of a larger **connection asset** then, for the purposes of this clause 26 and clause 27, the larger **connection asset** is treated as two separate **connection assets** for the **pricing year**, being the **anticipatory connection asset** and the part of the larger **connection asset** that is not anticipatory for the **pricing year**.
- (4) Whether or not a **connection asset** or part of a **connection asset** is an **anticipatory connection asset** for a **pricing year** must be determined by **Transpower** having regard to the extent to which—
- (a) the **customers** connected to the **connection asset** have agreed to fund the **connection asset** under **investment agreements**; and
  - (b) the **connection asset** is likely to be required to meet the requirements of the **customers** connected to the **connection asset** and cover reasonable **grid** contingencies during the **pricing year**.
- (5) Half of the capital cost of an **anticipatory connection asset** is recovered through the asset component of **connection charges**. The other half of the capital cost of the **anticipatory connection asset** is recovered through **benefit-based charges** for the relevant **anticipatory BBI** (see clause 27).
- (6) The asset component of the **connection charge** for a **connection asset** and **pricing year** (A) allocates a portion of the capital cost of all **connection assets** to the **connection asset**, and is calculated as follows:

$$A = (ARR \times RC) + (DARR \times RC')$$

where

ARR is the **connection asset** return rate for the **pricing year** calculated under subclause (7)

RC is—

- (a) 0 if the **connection asset** is an **investment agreement asset** or **anticipatory connection asset**; or
- (b) otherwise, the **replacement cost** of the **connection asset** at the end of the preceding **financial year**

DARR is the discounted **connection asset** return rate for the **pricing year** calculated under subclause (8)

RC' is—

- (a) 0 if the **connection asset** is an **anticipatory connection asset**; or
- (b) otherwise, the **replacement cost** of the **connection asset** at the end of the preceding **financial year** (even if the **connection asset** is an **investment agreement asset**).

(7) The **connection asset** return rate for a **pricing year** (ARR) is calculated as follows:

$$ARR = \frac{(r \times (V_{total} - V_{total\ anticipatory})) + (D_{total} - D_{total\ anticipatory})}{RC_{total}}$$

where

- r is **Transpower's PQ WACC** (pre-tax) for the **pricing year**
- $V_{total}$  is the total **closing RAB value** of all **connection assets** for the preceding **financial year**
- $V_{total\ anticipatory}$  is the part of  $V_{total}$  attributable to **anticipatory connection assets**, as determined by **Transpower**
- $D_{total}$  is total **depreciation** of all **connection assets** other than **investment agreement assets** during the preceding **financial year**, excluding **accelerated depreciation**
- $D_{total\ anticipatory}$  is the part of  $D_{total}$  attributable to **anticipatory connection assets**, as determined by **Transpower**
- $RC_{total}$  is the total **replacement cost** of all **connection assets** other than **investment agreement assets** and **anticipatory connection assets** at the end of the preceding **financial year**.

(8) The discounted **connection asset** return rate for a **pricing year** (DARR) is calculated as follows:

$$DARR = \frac{(r \times V_{total\ anticipatory}) + D_{total\ anticipatory}}{RC'_{total}} \times 0.5$$

where

- r is **Transpower's PQ WACC** (pre-tax) for the **pricing year**
- $V_{total\ anticipatory}$  is the part of the total **closing RAB value** of all **connection assets** for the preceding **financial year** attributable to **anticipatory connection assets**, as determined by **Transpower**
- $D_{total\ anticipatory}$  is the part of total **depreciation** of all **connection assets** other than **investment agreement assets** during the preceding **financial year**, excluding **accelerated depreciation**, attributable to **anticipatory connection assets**, as determined by **Transpower**
- $RC'_{total}$  is the total **replacement cost** of all **connection assets** (including **connection assets** that are **investment agreement assets**) other than **anticipatory connection assets** at the end of the preceding **financial year**.

Clause 26(4)(a) and (b): amended, on 31 July 2023, by clause 7 of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Amendments) 2023.

## 27 Anticipatory BBIs

- (1) The **benefit-based charges** for **anticipatory BBIs** recover the part of the capital cost of **anticipatory connection assets** that is not recovered through the asset component of **connection charges**, specifically half of that capital cost.
- (2) For each **anticipatory connection asset** for a **pricing year** there is deemed to be a **commissioned BBI** (an **anticipatory BBI**) for the **pricing year** (only for the purpose of recovering half of the capital cost of the **anticipatory connection asset**)—
  - (a) that comprises the **anticipatory connection asset**; and
  - (b) that has a **covered cost** for the **pricing year** (CVC) calculated as follows:

$$CVC = \left( (r \times V_{anticipatory}) + D_{anticipatory} \right) \times 0.5$$

where

$r$  is **Transpower's PQ WACC** (pre-tax) for the **pricing year**

$V_{anticipatory}$  is the part of the total **closing RAB value** for the preceding **financial year** attributable to the **anticipatory connection asset**, as determined by **Transpower**

$D_{anticipatory}$  is the part of total **depreciation** during the preceding **financial year**, excluding **accelerated depreciation**, attributable to the **anticipatory connection asset**, as determined by **Transpower**; and

- (c) for which the **start pricing year** is the **pricing year**; and
  - (d) for which a **customer's individual NPB** is calculated under the **simple method**, subject to the modifications in subclause (3) and even if the **anticipatory BBI's** deemed **covered cost** for the **pricing year** under paragraph (b) is more than the base capex threshold as defined in the **Transpower Capex IM**.
- (3) The modifications referred to in paragraph 2(d) are as follows:
    - (a) If **Transpower** determines the **anticipatory BBI** is primarily to allow for a future increase in **offtake**, the **anticipatory BBI's regional customer groups** are limited to **regional supply groups**;
    - (b) If **Transpower** determines the **anticipatory BBI** is primarily to allow for a future increase in **injection**, the **anticipatory BBI's regional customer groups** are limited to **regional demand groups**.

## 28 Funded Asset Component

- (1) The **funded asset** component of the **connection charge** ensures that **non-contributing customers** pay part of the capital cost of **funded assets** through their **connection charges**.
- (2) A **customer's funded asset** component for a **connection asset** is 0 unless—
  - (a) the **connection asset** is a **funded asset**; and
  - (b) the **customer** is, but for the **funded asset** component, a **non-contributing customer** for the **funded asset**; and
  - (c) there is, in respect of the **customer**, at least one **prior contributing customer** who has a non-zero **connection customer allocation** for the **funded asset**.

Clause 28(2)(b) amended, on 17 June 2024, by clause 6(1) of the Electricity Industry Participation Code Amendment

(Transmission Pricing Methodology Related Amendments) 2024.  
Clause 28(2)(c) inserted, on 17 June 2024, by clause 6(2) of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Related Amendments) 2024.

- (3) Subject to subclauses (4) and (5), a **non-contributing customer's funded asset** component for a **funded asset** and **pricing year** (FA) is calculated as follows:

$$FA = TF \times \frac{EL_{remain}}{EL_{total}} \times \frac{1}{10}$$

where

- TF is the total amount paid, or expected to be paid, towards the capital cost of the **funded asset** under all **investment agreements**
- EL<sub>remain</sub> is the remaining **economic life** of the **funded asset** at the end of the **pricing year** during which the **non-contributing customer** connected to the **funded asset**
- EL<sub>total</sub> is the total **economic life** of the **funded asset**, including any part of it that has elapsed.

- (4) The **non-contributing customer's funded asset** component for the **funded asset** applies for 10 consecutive **pricing years** only, starting with the **pricing year** after the **pricing year** during which the **non-contributing customer** connected to the **funded asset**.
- (5) If the **non-contributing customer** agrees with 1 or more **prior contributing customers** to contribute towards the capital cost of a **funded asset**—
- subclause (3) applies to the **funded asset** subject to that agreement; and
  - the agreement is deemed to be an **investment agreement** for the **funded asset** (even if **Transpower** is not a party to it).

## 29 Funded Asset Rebate

- (1) A **non-contributing customer's funded asset** component for a **funded asset** and **pricing year** is rebated to each **prior contributing customer** for the **funded asset** in respect of the **non-contributing customer**.
- (2) A **customer's funded asset** rebate for a **connection asset** and **pricing year** is 0 unless—
- the **connection asset** is a **funded asset**; and
  - a **non-contributing customer** pays a **funded asset** component for the **funded asset** and **pricing year**; and
  - the **customer** is a **prior contributing customer** for the **funded asset** in respect of the **non-contributing customer**.
- (3) Subject to subclause (4), **prior contributing customer c's funded asset** rebate of **non-contributing customer i's funded asset** component for a **connection location** and **pricing year** (RBT<sub>c</sub>) is calculated as follows:

$$RBT_c = FA_i \times CA_i \times \frac{CA_c}{CA_{prior\ total}}$$

where

$FA_i$	is <b>non-contributing customer i's funded asset</b> component for the <b>funded asset and pricing year</b>
$CA_i$	is <b>non-contributing customer i's connection customer allocation</b> for the <b>funded asset, connection location and pricing year</b>
$CA_c$	is <b>prior contributing customer c's connection customer allocation</b> for the <b>funded asset, connection location and pricing year</b>
$CA_{\text{prior total}}$	is the total of all <b>prior contributing customers' (including prior contributing customer c's) connection customer allocations</b> for the <b>funded asset, connection location and pricing year</b> .

- (4) Subclause (3) applies subject to any agreement of the type referred to in subclause 28(5).

### 30 Maintenance Component

- (1) The maintenance component of the **connection charge** for a **connection asset and pricing year (M)** allocates to the **connection asset** a portion of **Transpower's** total maintenance costs for all **connection assets**, and is calculated as follows:

$$M = MC \times (1 - ICR_{\text{maint}})$$

where

$MC$  is the maintenance cost component for the **connection asset and pricing year** calculated under subclause (2)

$ICR_{\text{maint}}$  is the percentage of the maintenance cost for the **connection asset and pricing year** expected to be recovered by **Transpower** under **investment agreements**, expressed as a decimal and no more than 1.

- (2) The maintenance cost component for the **connection asset and pricing year (MC)** is—
- if the **connection asset** is located at a **station**, the **station** maintenance cost component for the **pricing year** calculated under subclause (3); or
  - if the **connection asset** is a **line**, the **line** maintenance cost component for the **pricing year** calculated under subclause (5).
- (3) The **station** maintenance cost component for the **connection asset and pricing year ( $MC_{\text{station}}$ )** is calculated as follows:

$$MC_{\text{station}} = MRR_{\text{station}} \times RC$$

where

$MRR_{\text{station}}$  is the **station** maintenance recovery rate for the **pricing year** calculated under subclause (4)

$RC$  is the **replacement cost** of the **connection asset** at the end of the preceding **financial year**.

- (4) The **station** maintenance recovery rate for a **pricing year** ( $MRR_{station}$ ) is calculated as follows:

$$MRR_{station} = \frac{AMC_{station\ total}}{RC_{station\ total}}$$

where

$AMC_{station\ total}$  is the average over the preceding 4 **financial years** of **Transpower's** maintenance costs for all **connection assets** located at **stations**

$RC_{station\ total}$  is the total **replacement cost** of all **connection assets** located at **stations** at the end of the preceding **financial year**.

- (5) The **line** maintenance cost component is calculated using a **line** maintenance recovery rate that depends on the **line** type. The different **line** types (all AC) used are—
- 220kV or higher voltage tower **lines**; and
  - other tower **lines**; and
  - pole **lines**; and
  - underground cable **lines**.
- (6) The **line** maintenance cost component for the **connection asset** and **pricing year** ( $MC_{line}$ ) is calculated as follows:

$$MC_{line} = MRR_{line\ t} \times L$$

where

$MRR_{line\ t}$  is the **line** maintenance recovery rate for the **connection asset's line** type t and the **pricing year** calculated under subclause (7)

L is the **line** length (in km) of the **connection asset** at the end of the preceding **financial year**.

- (7) Subject to subclause (8), the **line** maintenance recovery rate for **lines** of type t and a **pricing year** ( $MRR_{line\ t}$ ) is calculated as follows:

$$MRR_{line\ t} = \frac{AMC_{line\ t\ total}}{L_{t\ total}}$$

where

$AMC_{line\ t\ total}$  is the average over the preceding 4 **financial years** of **Transpower's** maintenance costs for all **connection assets** that are **lines** of type t

$L_{t\ total}$  is the total **line** length (in km) of all **connection assets** that are **lines** of type t at the end of the preceding **financial year**.

- (8) **Transpower** may estimate the **line** maintenance recovery rate for underground cable **lines** if **Transpower** determines it has insufficient data to carry out the calculation in subclause (7) for underground cable **lines**.

### 31 Operating Component

- (1) The operating component of the **connection charge** for a **connection asset** and **pricing year** (O) allocates to the **connection asset** a portion of **Transpower's** total operating costs for all **AC assets**, and is calculated as follows:

$$O = OC \times (1 - ICR_{op})$$

where

OC is the operating cost component for the **connection asset** and **pricing year** calculated under subclause (2)

ICR<sub>op</sub> is the percentage of the operating cost for the **connection asset** and **pricing year** expected to be recovered by **Transpower** under **investment agreements**, expressed as a decimal and no more than 1.

- (2) The operating cost component for the **connection asset** and **pricing year** (OC) is calculated as follows:

$$OC = ORR \times (S - (0.1 \times S_{cust}))$$

where

ORR is the operating recovery rate for the **pricing year** calculated under subclause (3)

S is the number of switches that are part of the **connection asset** at the end of the preceding **financial year**

S<sub>cust</sub> is the number of switches that are part of the **connection asset** and operated by a **customer** at the end of the preceding **financial year**.

- (3) The operating recovery rate for the **pricing year** (ORR) is calculated as follows:

$$ORR = \frac{OC_{switch\ total}}{(S_{total} - (0.1 \times S_{cust\ total}))}$$

where

OC<sub>switch total</sub> is **Transpower's** total operating costs for all **AC switches** over the preceding **financial year**

S<sub>total</sub> is the total number of **AC switches** at the end of the preceding **financial year**

S<sub>cust total</sub> is the total number of **AC switches** that are operated by a **customer** at the end of the preceding **financial year**.

**32 Connection Customer Allocations**

(1) Subject to subclause (5) and clause 33, a **customer's connection customer allocation** for a **connection asset, connection location and pricing year** ( $CA_1$ ) is calculated as follows if the **connection asset** is—

- (a) for 1 **connection location** only; and
- (b) not a **mixed connection asset**:

$$CA_1 = \frac{AMDIC}{AMDIC_{total}}$$

where

AMDIC is the total of the **customer's AMDC and AMIC** at the **connection location** for the **pricing year**

AMDIC<sub>total</sub> is the total of all **customers' AMDCs and AMICs** at the **connection location** for the **pricing year**.

(2) Subject to subclause (5) and clause 33, a **customer's connection customer allocation** for a **connection asset, connection location and pricing year** ( $CA_{2+}$ ) is calculated as follows if the **connection asset** is—

- (a) for 2 or more **connection locations**, being the set of **connection locations L**; and
- (b) not a **mixed connection asset**:

$$CA_{2+} = \frac{AMDIC}{AMDIC_{L\ total}}$$

where

AMDIC is the total of the **customer's AMDC and AMIC** at the **connection location** for the **pricing year**

AMDIC<sub>L total</sub> is the total of all **customers' AMDCs and AMICs** at all **connection locations** in the set of **connection locations L** for the **pricing year**.

(3) Subject to subclauses (4) and (5) and clause 33, a **customer's connection customer allocation** for a **connection asset, connection location and pricing year** ( $CA_{mixed}$ ) is calculated as follows if the **connection asset** is a **mixed connection asset**:

$$CA_{mixed} = \frac{AMDIC}{C}$$

where

AMDIC is the total of the **customer's AMDC and AMIC** at the **connection location** for the **pricing year**

C is the **capacity** of the **connection asset** at the end of **CMP A** for the **pricing year**.

- (4) If the sum of all **customers' connection customer allocations** for a **mixed connection asset** and **pricing year** is greater than 1, **Transpower** must scale down all of the **connection customer allocations** on a pro rata basis so that they sum to 1.
- (5) If a **connection asset** is—
- (a) an **investment agreement asset** provided under an **investment agreement** with a **customer**; and
  - (b) for more than 1 **connection location**, or for 1 **connection location** at which there is more than 1 **customer**,
- then the calculation of the **connection customer allocations** for the **connection asset** and **connection locations** is subject to any provisions in the **investment agreement** that alter the **customer's connection customer allocation** for the **connection asset** and **connection locations**.
- (6) The following table shows the **connection customer allocations** for the **connection assets** that are part of the **connection links** in figure 10 above (based on the **AMDC** and **AMIC** quantities shown in figure 10):

link	connection location	customer	connection customer allocation
N1-N2	N1	A	$\frac{100}{140} = 0.7143$
		B	$\frac{40}{140} = 0.2857$
N2-N3 N3-N4 N2-N4	N1	A	$\frac{100}{220} = 0.4545$
		B	$\frac{40}{220} = 0.1818$
	N3	C	$\frac{80}{220} = 0.3636$
N4-N6	N1	A	$\frac{100}{280} = 0.3571$
		B	$\frac{40}{280} = 0.1429$
	N3	C	$\frac{80}{280} = 0.2857$
	N4	D (offtake)	$\frac{40}{280} = 0.1429$
		D (injection)	$\frac{20}{280} = 0.0714$

### 33 De-rating

- (1) This clause 33 applies if both of the following conditions are satisfied:
- (a) a **customer** (the notifying **customer**) has notified **Transpower** in writing that—
    - (i) the notifying **customer's assets** at a **connection location** have been **de-rated**; or
    - (ii) **embedded plant** connected to the notifying **customer's assets** at a **connection location** have been **de-rated** and the **de-rating** is **large**:

- (b) **Transpower** is reasonably satisfied the notified **de-rating** or **large de-rating** has occurred.
- (2) In this clause 33, a relevant **pricing year** is—
  - (a) the first **pricing year** that starts at least 6 months (or such shorter period as **Transpower** may determine is practicable) after the date the conditions in subclause (1) are first satisfied; and
  - (b) a subsequent **pricing year** if the date the conditions in subclause (1) are first satisfied is within **CMP A** for the **pricing year**.
- (3) **Transpower** must, for each relevant **pricing year**, calculate **connection charges** for the **connection location** by—
  - (a) estimating the notifying **customer's** future **AMDC** and **AMIC** for the **connection location** taking into account—
    - (i) the reduced **capacity** of the connecting **customer's** assets or the **embedded plant** (as the case may be); and
    - (ii) any available historical information about the notifying **customer's** **offtake** and **injection** at the **connection location**; and
  - (b) capping the notifying **customer's** **AMDC** and **AMIC** for the **connection location** and relevant **pricing year** at the notifying **customer's** estimated future **AMDC** and **AMIC** for the **connection location**.

#### **34 Replacement Costs**

- (1) **Transpower** must review, including update as appropriate, the **replacement costs** it uses to calculate **connection charges** no later than 5 years after the start of the **first pricing year** and, after that, at intervals of no more than 5 years.
- (2) **Transpower's** first review of **replacement costs** under subclause (1) may occur before the start of the **first pricing year**.
- (3) Subject to subclause (4), **Transpower** must consult with all **customers** who pay **connection charges** on any update to **replacement costs** under subclause (1) before updating the **replacement costs**.
- (4) **Transpower** is not required to consult on an update to **replacement costs** under subclause (1) if **Transpower** determines—
  - (a) the update is technical and non-controversial; or
  - (b) there is widespread support for the update among **customers**; or
  - (c) there has been adequate prior consultation on the update so that all relevant views of **customers** have been considered.
- (5) Before **Transpower's** first review of **replacement costs** under subclause (1) is completed, the **replacement cost** of a **connection asset commissioned** before 1 July 2006 is calculated by multiplying the **connection asset's** unadjusted **replacement cost** by the **replacement cost adjustment factor**.
- (6) If **Transpower** does not have a **replacement cost** for a **connection asset**, **Transpower** must use the **replacement cost** available to **Transpower** for the closest equivalent of the **connection asset**, as determined by **Transpower**, for the purposes of calculating **connection charges** for the **connection asset**.

## Part D Benefit-based Charges

### *General*

#### **35 Calculation of Benefit-based Charges**

- (1) Subject to subclauses 84(7) and 85(6) and clause 88, only **beneficiaries** pay **benefit-based charges**, and only for the **BBIs** of which they are **beneficiaries**.
- (2) A **beneficiary's annual benefit-based charge** for a **BBI** and **pricing year** (**BBC**) is calculated as follows:

$$BBC = CC \times CA$$

where

**CC** is the **BBI's covered cost** for the **pricing year**

**CA** is the **beneficiary's BBI customer allocation** for the **BBI**.

- (3) A **beneficiary's monthly benefit-based charge** for a **BBI** and **pricing year** (**MBBC**) is calculated as follows:

$$MBBC = \frac{BBC}{12}$$

where **BBC** is the **beneficiary's annual benefit-based charge** for the **BBI** and **pricing year**.

- (4) **Benefit-based charges** are calculated for each **pricing year** before the start of the **pricing year**.
- (5) A **benefit-based charge** may be—
- adjusted, including during a **pricing year**, under clauses 81 to 91 if there is a **benefit-based charge adjustment event**; and
  - adjusted under clause 96 if the relevant **BBI** is subject to **reassignment**.

#### **36 Start of Benefit-based Charges**

**Transpower** must start the **benefit-based charges** for a **BBI** from the **BBI's start pricing year**. To avoid doubt, this clause does not apply to charges under an **investment agreement**.

Clause 36: replaced, on 31 July 2023, by clause 8 of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Amendments) 2023.

#### **37 Expenditure on Existing BBIs**

- (1) Subject to subclause (4) and (5), **Transpower** must treat a **refurbishment investment** or **replacement investment** in respect of an existing **post-2019 BBI** as—
- part of the existing **post-2019 BBI**, in which case the **refurbishment investment** or **replacement investment** will increase the **covered cost** of the **post-2019 BBI** but will not change its **BBI customer allocations**; or
  - a separate **post-2019 BBI**; or
  - part of an existing **post-2019 BBI** referred to in paragraph (b), in which case the **refurbishment investment** or **replacement investment** will increase the **covered cost** of the **post-2019 BBI** but will not change its **BBI customer allocations**.

- (2) Subject to subclause (4) and (5), **Transpower** must treat a **refurbishment investment** or **replacement investment commissioned** after 23 July 2019 in respect of an **Appendix A BBI** as—
  - (a) a separate **post-2019 BBI**; or
  - (b) part of an existing **post-2019 BBI** referred to in paragraph (a), in which case the **refurbishment investment** or **replacement investment** will increase the **covered cost** of the **post-2019 BBI** but will not change its **BBI customer allocations**.
- (3) Subject to subclause (5), **Transpower** must treat an **enhancement investment commissioned** after 23 July 2019 in respect of an existing **BBI** as a separate **post-2019 BBI**.
- (4) **Transpower** must not treat a **refurbishment investment** or **replacement investment** as part of an existing **post-2019 BBI** under subclause (1) or (2) if **Transpower** determines the **refurbishment investment** or **replacement investment** is likely to have—
  - (a) different **beneficiaries** than the existing **post-2019 BBI**; or
  - (b) a materially different distribution of **NPB** than the existing **post-2019 BBI**.
- (5) If a **refurbishment investment**, **replacement investment** or **enhancement investment** referred to in subclause (1), (2) or (3) is an **exempt post-2019 investment**—
  - (a) **Transpower** must not treat the **refurbishment investment**, **replacement investment** or **enhancement investment** as, or as part of, a **post-2019 BBI**; and
  - (b) if the **refurbishment investment**, **replacement investment** or **enhancement investment** is in respect of an **Appendix A BBI**, **Transpower** must treat the **refurbishment investment**, **replacement investment** or **enhancement investment** as part of the **Appendix A BBI**, in which case the **refurbishment investment**, **replacement investment** or **enhancement investment** will increase the **covered cost** of the **Appendix A BBI** but will not change its **BBI customer allocations**.

### **38 Assumptions Book**

- (1) **Transpower** must **publish**, and may from time to time **publish** updates to, an **assumptions book**.
- (2) The **assumptions book** must not contain any assumptions or methodologies that are inconsistent with this Code.
- (3) Subject to subclause (4), **Transpower** must consult with all **customers** on the **assumptions book** or any update to it before **publishing** the **assumptions book** or update.
- (4) **Transpower** is not required to consult on an update to the **assumptions book** if **Transpower** determines—
  - (a) the update is technical and non-controversial; or
  - (b) there is widespread support for the update among **customers**; or
  - (c) there has been adequate prior consultation on the update so that all relevant views of **customers** have been considered.
- (5) Except as otherwise stated in this **transmission pricing methodology**, the **assumptions book** is not binding on **Transpower** or any **independent expert**.
- (6) **Transpower** must review the content of the **assumptions book** and consider whether any of the content is appropriate for incorporation in this **transmission pricing methodology** by way of a

review under clause 12.85 of this Code no later than 7 years after its date of publication and, after that, at intervals of no more than 7 years.

- (7) The **assumptions book** may be part of the same document in which the **reassignment practice manual** or **prudent discount practice manual** is contained.

*Covered Cost*

**39 Covered Cost**

- (1) A **BBI's covered cost** for a **pricing year** (CC) is calculated as follows:

$$CC = \sum_a (D_a + C_a + T_a) + AO$$

where

$D_a$  is **depreciation** of asset a for the preceding **financial year**, where asset a is an asset comprised in the **BBI**, excluding **accelerated depreciation**

$C_a$  is the **capital charge** for asset a and the preceding **financial year** calculated under subclause (2)

$T_a$  is the sum of—

- (a) **Transpower's** depreciation tax loss (positive value) or gain (negative value) for asset a and the preceding **financial year** calculated under subclause (3); and
- (b) income tax on the **capital charge** for asset a and the preceding **financial year** calculated under subclause (5)

$AO$  is the attributed opex component for the **BBI** and **pricing year** calculated under subclause 40(1).

- (2) The **capital charge** for an asset and **financial year** (C) is calculated—

- (a) if the asset had an **opening RAB value** for the **financial year**, as follows:

$$C = r \times V$$

where

$r$  is **Transpower's PQ WACC** (vanilla) at the start of the **financial year**

$V$  is, subject to subclause 7, the **opening RAB value** for the asset and **financial year**; or

- (b) if the asset was **commissioned** during the **financial year**, as follows:

$$C = V \times \frac{r \times (12.5 - m)}{12}$$

where

V is, subject to subclause (7), the asset's **value of commissioned asset**

r is **Transpower's PQ WACC** (vanilla) at the start of the **financial year**

m is the month of the **financial year** during which the asset was **commissioned** (for example, m = 3 for September).

- (3) **Transpower's** depreciation tax loss or gain for an asset and **financial year** ( $T_{dep}$ ) is calculated as follows:

$$T_{dep} = \frac{r \times (AD - TD - I)}{1 - r}$$

where

r is the corporate tax rate, as defined in the **Transpower IMs**, at the start of the **financial year**

AD is **depreciation** of the asset during the **financial year**, excluding **accelerated depreciation**

TD is tax depreciation of the asset during the **financial year**, excluding **accelerated depreciation**

I is notional interest for the asset and **financial year** calculated under subclause (4).

- (4) Notional interest for an asset and **financial year** (I) is calculated as follows:

$$I = V \times L \times CD$$

where

V is, subject to subclause (7), the **opening RAB value** for the asset and **financial year**

L is leverage, as defined in the **Transpower IMs**, at the start of the **financial year**

CD is the estimated cost of debt used under the **Transpower IMs** to calculate **Transpower's PQ WACC** (vanilla) applicable at the start of the **financial year**.

- (5) Income tax on the **capital charge** for an asset and **financial year** ( $T_{inc}$ ) is calculated as follows:

$$T_{inc} = \frac{r \times C}{1 - r}$$

where

r is the corporate tax rate, as defined in the **Transpower IMs**, at the start of the **financial year**

C is the **capital charge** for the asset and **financial year** calculated under subclause (2).

(6) *[Revoked]*

(7) If the asset referred to in subclause (2) or (4)—

- (a) has been **written-down**; and
- (b) is comprised in a **BBI** that, as at the start of the relevant **financial year**, does not meet the requirements of subparagraph (b)(i), (b)(ii) or (b)(iii) of the definition of **eligible BBI** in clause 3; and
- (c) the circumstances justifying the **write-down** of the asset would otherwise justify **reassignment** of the **BBI** (excluding subparagraph 104(2)(b)(ii)),

**Transpower** must carry out the calculation under subclause (2) or (4) for the asset as if the asset had not been **written-down**.

(8) This clause 39 is subject to clause 40A.

Clause 39(1) and (3): amended, on 31 July 2023, by clause 9(1) of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Amendments) 2023.

Clause 39(6): revoked, on 31 July 2023, by clause 9(2) of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Amendments) 2023.

Clause 39(8): inserted, on 31 July 2023, by clause 9(3) of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Amendments) 2023.

#### 40 Attributed Opex Component

(1) The attributed opex component for a **BBI** and **pricing year** (AO) is calculated as follows:

$$AO = \sum_a (D_a \times AOR) + HVDC + TA + MCP$$

where

$D_a$  is **depreciation** of asset a for the preceding **financial year**, where asset a is an asset comprised in the **BBI**, excluding **accelerated depreciation**

AOR is the attributed opex ratio for the **pricing year** calculated under subclause (3)

HVDC is—

- (a) if the **BBI** comprises 1 or more **transmission investments** in the **HVDC link**, an allocation of **HVDC opex** for the preceding **financial year** as determined by **Transpower** subject to subclause (2); or
- (b) otherwise, 0

TA is—

- (a) if the **BBI** comprises 1 or more **interconnection transmission alternatives**, **TA opex** for the **interconnection transmission alternatives** and preceding **financial year**, less any contribution to the **TA opex** under **investment agreements**; or
- (b) otherwise, 0

MCP is **MCP opex** for the **BBI** and preceding **financial year**.

- (2) **HVDC opex** for a **financial year** must be fully allocated to 1 or more **BBIs** that comprise a **transmission investment** in the **HVDC link**, unless there are no such **BBIs**.
- (3) The attributed opex ratio for a **pricing year** during an **RCP** (AOR) is calculated as follows:

$$AOR = \frac{OC + PC + RC - HVDC - TA - MCP - FD}{D}$$

where

OC is the **allowance** for operating costs, as defined in the **Transpower IMs**, for the **RCP**

PC is the **allowance** for pass-through costs, as defined in the **Transpower IMs**, for the **RCP**

RC is the **allowance** for recoverable costs, as defined in the **Transpower IMs**, for the **RCP**

HVDC is forecast **HVDC opex** for the **RCP**

TA is the **allowance** for **TA opex** for the **RCP**, to the extent it is included in any of the above **allowances**

MCP is the **allowance** for **MCP opex** for the **RCP**, to the extent it is included in any of the above **allowances**

FD is an amount of operating costs attributable to **Transpower** assets that are fully depreciated at the start of the **RCP**, as determined by **Transpower**

D is the **allowance** for **depreciation** for the **RCP**.

- (4) The value of AOR in subclause (3) is—
- (a) calculated for the whole of the **RCP**; and
  - (b) only re-calculated if any of the relevant **allowances** are reset by the **Commission** during the **RCP**.
- (5) This clause 40 is subject to clause 40A.  
Clause 40(1): amended, on 31 July 2023, by clause 10(1) of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Amendments) 2023.  
Clause 40(5): inserted, on 31 July 2023, by clause 10(2) of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Amendments) 2023.

#### **40A Commissioned Assets Not Asseted**

An asset that—

- (a) is comprised in a **BBI**; and
- (b) was **commissioned** at or before the end of the **financial year** preceding the **pricing year** for which **Transpower** is calculating the **BBI's covered cost**; and
- (c) is not **asseted** at the time of that calculation,

must be ignored for the purposes of calculating the **BBI's covered cost** for the **pricing year**.  
Clause 40A: inserted, on 31 July 2023, by clause 11 of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Amendments) 2023.

**41 Covered Cost of Anticipatory BBI**

To avoid doubt, clauses 39 and 40 do not apply to an **anticipatory BBI**, the deemed **covered cost** of which is calculated under paragraph 27(2)(b).

*BBI Customer Allocations*

**42 BBI Customer Allocations for Appendix A BBIs**

- (1) Subject to paragraph 75(5)(a), for each **Appendix A BBI**—
- (a) the starting **beneficiaries** are the **Appendix A beneficiaries** for the **Appendix A BBI**; and
  - (b) the starting **BBI customer allocations** are the **Appendix A allocations** for the **Appendix A BBI**.
- (2) To avoid doubt, for each **Appendix A BBI**—
- (a) the **Appendix A beneficiaries** are based on the **Schedule 1 beneficiaries** of the **Appendix A BBI**; and
  - (b) the **Appendix A allocations** are based on the **Schedule 1 allocations** for the **Appendix A BBI**,

in each case adjusted as **Transpower** determined necessary to account for changes to and affecting **customers** before and after the **Authority** published the **2020 guidelines**.

**43 BBI Customer Allocations for Post-2019 BBIs**

- (1) A **customer's BBI customer allocation** for a **post-2019 BBI (CA)** is calculated as follows:

$$CA = \frac{NPB}{NPB_{total}}$$

where

$NPB$  is the **customer's individual NPB** for the **post-2019 BBI**

$NPB_{total}$  is the total of all **customers' individual NPBs** for the **post-2019 BBI**.

- (2) Subject to subclauses (3) and (4A), a **customer's individual NPB** for a **post-2019 BBI** is calculated under a **standard method** or the **simple method** as follows:

type	sub-type	method
<b>post-2019 BBI</b> expected to be <b>high-value</b> when <b>fully commissioned</b>	<b>resiliency BBI</b>	<b>resiliency method</b>
	otherwise	<b>price-quantity method</b>
<b>post-2019 BBI</b> expected to be <b>low-value</b> when <b>fully commissioned</b>	none	<b>simple method</b>

- (2A) If **Transpower's** expectation as to whether a **post-2019 BBI** will be **high-value** or **low-value** when **fully commissioned** changes before—
- (a) the **post-2019 BBI's final investment decision date**; or
  - (b) for a **post-2019 BBI** with a **final investment decision date** before the start of the **first pricing year**, the date the **post-2019 BBI** is **commissioned**,
- Transpower** may, but is not obliged to, change the method it applies to calculate **customers' BBI customer allocations** for the **post-2019 BBI** from a **standard method** to the **simple method** or vice versa in accordance with subclause (2). However, **Transpower** must not change the method if **Transpower** has already notified one or more **customers** of their **benefit-based charges** for the **post-2019 BBI** and its **start pricing year** under their **transmission agreements**.
- (3) For the purpose of calculating **customers' BBI customer allocations** for a **high-value intervening BBI** and its **start pricing year**, **Transpower** may apply the **simple method** if **Transpower** determines it is necessary to do so to ensure there is sufficient time for **Transpower** to complete a robust process for calculating the **BBI's BBI customer allocations** under the **standard method**, including consultation under clause 15.
- (4) If **Transpower** applies the **simple method** under subclause (3) for a **high-value intervening BBI**, **Transpower** must carry out a wash-up of **transmission charges** in the **pricing year** after the **BBI's start pricing year** so that no **customer** is under or over-charged **benefit-based charges** for the **BBI** and **start pricing year** as a result of **Transpower** applying the **simple method** under subclause (3). The wash-up must include time value of money adjustments using **Transpower's ID WACC** (pre-tax).
- (4A) If **Transpower**—
- (a) expects a **post-2019 BBI** to be **high-value** when **fully commissioned**; and
  - (b) expects one or more **interconnection investments** comprised in the **post-2019 BBI** to become **connection investments** within 3 years of the **post-2019 BBI's full commissioning date**; and
  - (c) would not expect the **post-2019 BBI** to be **high-value** when **fully commissioned** if those **interconnection investments** were excluded from the **post-2019 BBI** on its **full commissioning date**,
- Transpower** must apply the **simple method** to calculate **customers' BBI customer allocations** for the **post-2019 BBI**.
- (5) If a **post-2019 BBI** is a **tested investment**, the assumptions and other inputs (including the **factual, counterfactual, modelled constraints and scenarios**) **Transpower** uses in applying a **standard method** to the **post-2019 BBI** must be as consistent as reasonably practicable with the assumptions and other inputs used in applying the **investment test** to the **post-2019 BBI**, except—
- (a) as otherwise stated in this **transmission pricing methodology**; or
  - (b) to the extent **Transpower** determines such alignment would not produce **BBI customer allocations** that are broadly proportionate to positive **NPB** from the **post-2019 BBI**, in which case **Transpower** may use different assumptions and other inputs provided they do not contradict what **Transpower** determines were its key drivers for proceeding with its investment in the **post-2019 BBI** as at the **post-2019 BBI's final investment decision date**.
- (6) To avoid doubt, the order of the provisions of this **transmission pricing methodology** specifying the **standard methods** and **simple method** do not necessarily reflect the order in

which **Transpower** will carry out the steps specified in those provisions when **Transpower** applies the relevant **standard method** or **simple method**.

Clause 43(2): amended, on 31 July 2023, by clause 12(1) of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Amendments) 2023.

Clause 43(2A): inserted, on 31 July 2023, by clause 12(2) of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Amendments) 2023.

Clause 43(4A): inserted, on 31 July 2023, by clause 12(3) of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Amendments) 2023.

*Standard Method: Price-quantity Method*

#### 44 Overview of Price-quantity Method

- (1) Clauses 44 to 55 apply—
  - (a) to the **price-quantity method** only; and
  - (b) only to those **post-2019 BBIs** to which **Transpower** applies the **price-quantity method** in accordance with subclause 43(2).
  
- (2) Under the **price-quantity method**—
  - (a) **regional NPB** is calculated for a **regional customer group** as any of the following:
    - (i) **market regional NPB** under clauses 49 to 52
    - (ii) **ancillary service regional NPB** under clause 53;
    - (iii) **reliability regional NPB** under clause 54;
    - (iv) **other regional NPB** under clause 55; and
  - (b) subject to subclauses (3) and 55(2), **Transpower** may—
    - (i) calculate **market regional NPB** for a **market BBI**; and
    - (ii) calculate **ancillary service regional NPB** for an **ancillary service BBI**; and
    - (iii) calculate **reliability regional NPB** for a **reliability BBI**; and
    - (iv) calculate or estimate **other regional NPB** for a **market BBI**, **ancillary service BBI** or **reliability BBI**; and
  - (c) **individual NPB** is calculated for each **customer** in a **regional customer group** with positive **regional NPB**.
  
- (3) Under the **price-quantity method**, **Transpower** must—
  - (a) always calculate at least 1 of **market regional NPB**, **ancillary service regional NPB** or **reliability regional NPB** for a **post-2019 BBI**; and
  - (ab) calculate **market regional NPB** for a **market BBI** if **Transpower** determines it is necessary to do so to produce **BBI customer allocations** for the **market BBI** that are broadly proportionate to positive **NPB** from the **market BBI**; and
  - (b) calculate **ancillary service regional NPB** for an **ancillary service BBI** if **Transpower** determines it is necessary to do so to produce **BBI customer allocations** for the **ancillary service BBI** that are broadly proportionate to positive **NPB** from the **ancillary service BBI**; and
  - (c) calculate **reliability regional NPB** for a **reliability BBI** if **Transpower** determines it is necessary to do so to produce **BBI customer allocations** for the **reliability BBI** that are broadly proportionate to positive **NPB** from the **reliability BBI**.

Clause 44(3)(ab): inserted, on 1 March 2024, by clause 4(2) of the Electricity Industry Participation Code Amendment (Transmission Pricing Methodology Amendments) 2024.

#### 45 Factual and Counterfactual

- (1) **Transpower** must determine a **BBI's factual** and **counterfactual**.
- (2) **Transpower** must apply the following principles to determine the **BBI's counterfactual** unless **Transpower** determines applying these principles does not produce a reasonably likely future **grid** state:
  - (a) if a **transmission investment** comprised in the **BBI** is an **enhancement investment**, the **counterfactual** must include the **transmission investment** not being made;
  - (b) if a **transmission investment** comprised in the **BBI** is a **replacement investment** or **compliance investment**, the **counterfactual** must include the immediate decommissioning of the relevant **grid asset** or **transmission alternative** without replacement;
  - (c) if a **transmission investment** comprised in the **BBI** is a **refurbishment investment**, the **counterfactual** must include leaving the relevant **grid asset** or **transmission alternative** in operation without refurbishment until it reaches replacement state and then immediately decommissioning it without replacement.

#### 46 Scenarios

- (1) **Transpower** must determine a **BBI's scenarios** and probability weightings for the **scenarios**. A **market BBI's market scenarios** must include variations in load growth, generation expansion and hydrology.
- (2) **Transpower** must apply the same **scenarios** in a **BBI's factual** and **counterfactual**, unless the **BBI** is a **market BBI** that is expected to influence materially **generating plant** investment decisions, in which case **Transpower** may apply different generation expansion **market scenarios** in the **BBI's factual** and **counterfactual**.
- (3) If a **market scenario** for a **BBI** includes a **customer** ceasing to be a **customer**, the **market scenario** must not be applied in the **BBI's factual or counterfactual** in respect of the **customer**. To avoid doubt, this means the present value of **regional NPB** for a **regional customer group** for the **BBI** of which the **customer** is a member may be different for the **customer** than for all other **customers** who are members of the **regional customer group**.

#### 47 Individual NPB

A **customer's individual NPB** for a **BBI** (NPB) is calculated as follows:

$$NPB = \sum_g \left( PVRNPB_g \times \frac{IRA_g}{IRA_{g \text{ total}}} \right)$$

where

$PVRNPB_g$  is the present value of **regional NPB** for **regional customer group g** calculated under clause 48, where **regional customer group g** is a **regional customer group** for the **BBI**—

- (a) that has a positive present value of **regional NPB**; and
- (b) of which the **customer** is a member

$IRA_g$  is the value of the **customer's intra-regional allocator** for **regional customer group g**

$IRA_{g \text{ total}}$  is the total of the values of all **customers' intra-regional allocators** for **regional customer group g**.

#### 48 Present Value of Regional NPB

- (1) Subject to subclause (2), the present value of a **regional customer group's regional NPB (PVRNPB)** is calculated as follows:

$$PVRNPB = \sum_n \frac{RNPB_n}{(1+r)^n}$$

where

$RNPB_n$  is the **regional customer group's market regional NPB, ancillary service regional NPB, reliability regional NPB or other regional NPB** (as the case may be) for year n of the **BBI's standard method calculation period**

r is the **BBI's standard method rate**.

- (2) As an alternative to the calculation under subclause (1), **Transpower** may calculate a **regional customer group's market regional NPB, ancillary service regional NPB, reliability regional NPB or other regional NPB** (as the case may be) for each year of the **BBI's standard method calculation period** on a present value basis, provided that the method of calculating present value is consistent with the method in subclause (1).

#### 49 Modelling for Market Regional NPB

- (1) This clause 49 applies to modelling for calculating **market regional NPB** for a **market BBI**.
- (2) **Transpower** must determine the **market BBI's investment grids**.
- (3) **Transpower** must use a **wholesale market model** to model the prices, quantities and changes in prices and quantities in the **wholesale market for electricity** between the **market BBI's factual and counterfactual** under its **market scenarios** and based on its **investment grids**. The modelling must cover each year of the **market BBI's standard method calculation period**.
- (4) The illustrative **wholesale market models** in figures 11 and 12 below show alternative modelled prices, quantities and changes in prices and quantities for a notional **market BBI, market scenario** and year of the **market BBI's standard method calculation period** (assuming no adjustments under subclause (6)). The effect of the **market BBI** is modelled as a change in the supply curve from S (**counterfactual**) to S' (**factual**).  $P_{\max}$  is **consumers' estimated cost of self-supply for electricity or alternative energy**.

Figure 11

Figure 12

- (5) In carrying out the modelling under this clause 49, **Transpower** may model **embedded plant** as if it were **grid-connected**. If **Transpower** does this, the modelled market benefits and disbenefits in respect of the **plant** must be attributed to the relevant **host customer**, not the owner of the **plant**.
- (6) **Transpower** may adjust prices in the modelling under this clause 49 if, and to the extent, **Transpower** determines it is appropriate to do so to moderate the sensitivity of modelled prices and changes in prices to modelling assumptions and other inputs, or otherwise with the objective of ensuring the **BBI customer allocations** for the **market BBI** are broadly proportionate to positive **NPB** from the **market BBI**.

**50 Modelled Regions and Regional Customer Groups**

- (1) **Transpower** must determine the **market BBI's modelled regions** as follows and based on the outcomes of the modelling under clause 49:
- (aa) **Transpower** must determine the **market BBI's modelled regions** based on the outcomes of the modelling under clause 49 except to the extent **Transpower** determines basing the **modelled regions** on those outcomes would not support the objective in paragraph (d):
- (a) a **modelled region** must be a set of either **GXPs** or **GIPs**:
- (b) the expected price or quantity changes, if any, at all **GXPs** or **GIPs** in a **modelled region** must be in the same direction:
