**You are required *‘to protect the interests of domestic consumers and small business consumers in relation to the supply of electricity’* but your plans say otherwise.**

Making me pay when a new business or housing developer wants to connect to the electricity network is unfair because...

**User's Message:**

Enter Text: Residents should not be forced to subsidise private profit. The responsibility must rest with those who directly benefit.

In addition to my original submission:

- 1) These proposed changes weren't advertised properly to the masses. Such changes affecting everyone should be widely advertised and not published on some website quietly.
- 2) Use simple, straight to the point English to let people know your intentions of subsidising developers and passing the costs onto bill payers. Who pays for what, how developers benefit.
- 3) The developers stand to make money from these subsidies while normal users will pick up the costs.
- 4) Developers will not pass on the savings to users.

Thanks,  
Ben
